Procedural Requirements

a. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This proposed rule has not been designated a “significant regulatory action,” under Executive Order 12866. Accordingly, this proposed rule has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

The Corps has made a determination this proposed rule is not a significant regulatory action. This regulatory action determination is based on the size, duration, and location of the restricted area. The restricted area occupies only a portion of the waterway and a vessel that needs to transit the restricted area may do so if the operator of the vessel obtains permission from the Commanding Officer, JBM–HH or his/her designated representative. Fishermen may be authorized controlled access to the restricted area after registering with JBM–HH/Ft. McNair officials and following specific access notification procedures.

b. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.
