Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Mukilteo Multimodal Project in Mukilteo, Washington

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; reissuance of incidental harassment authorization.

SUMMARY: NMFS has received a request from the Washington State Department of Transportation (WSDOT) for the reissuance of a previously issued incidental harassment authorization (IHA) with the only change being effective dates that are ten months later (August 1, 2019–July 31, 2020). The initial IHA authorized take of 12 species of marine mammals, by Level A and Level B harassment, incidental to construction associated with the Mukilteo Multimodal Project in Mukilteo, Washington. The project has been delayed and none of the work covered in the initial IHA (effective October 1, 2018–September 30, 2019) has been conducted. The scope of the activities and anticipated effects remain the same, authorized take numbers would not change, and the required mitigation, monitoring, and reporting would remain the same as authorized in the 2018 IHA referenced above. NMFS is, therefore, issuing a second IHA to cover the identical incidental take analyzed and authorized in the initial IHA.

DATES: This authorization is effective from August 1, 2019 through July 31, 2020.

ADDRESSES: An electronic copy of the final 2018 IHA previously issued to WSDOT, WSDOT's application, and the Federal Register notices proposing and issuing the 2018 IHA may be obtained by visiting <https://www.fisheries.noaa.gov/national/>

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

NMFS has defined “negligible impact” in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The MMPA states that the term “take” means to harass, hunt, capture, kill or attempt to harass, hunt, capture, or kill any marine mammal.

Except with respect to certain activities not pertinent here, the MMPA defines “harassment” as any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On August 28, 2018, NMFS published final notice of our issuance of an IHA

authorizing take of marine mammals incidental to the Mukilteo Multimodal Project at the Mukilteo ferry terminal (83 FR 43849). The effective dates of that IHA were October 1, 2018 through September 30, 2019. On May 8, 2019, WSDOT informed NMFS that the project was being delayed by one year. None of the work identified in the IHA (*i.e.*, pile driving and removal) has occurred and no take of any marine mammals has occurred since the effective date of the initial IHA. WSDOT submitted a formal request for a new identical IHA that would be effective from August 1, 2019 through July 31, 2020, in order to conduct the construction work that was analyzed and authorized through the previously issued IHA. Therefore, an IHA is appropriate.

Summary of Specified Activity and Anticipated Impacts

The planned activities (including mitigation, monitoring, and reporting), authorized incidental take, and anticipated impacts on the affected stocks are the same as those analyzed and authorized through the previously issued IHA.

Planned activities include improving the operations and facilities serving the mainland terminus of the Mukilteo-Clinton ferry route in Washington State. Specifically, the location, timing, and nature of the activities, including the types of equipment planned for use, are identical to those described in the original IHA. The mitigation and monitoring are also identical to the original IHA and will include limiting construction to an in-water work window (July 15–February 15), limiting construction to daylight hours only, using bubble curtains during impact driving of steel piles, using soft-start during impact pile driving, and monitoring and reporting of qualified protected species observers (PSOs).

Species that are expected to be taken by the planned activity include harbor seal (*Phoca vitulina*), California sea lion (*Zalophus californianus*), northern elephant seal (*Mirounga angustirostris*), Steller sea lion (*Eumetopias jubatus*), killer whale (*Orcinus orca*), gray whale (*Eschrichtius robustus*), humpback whale (*Megaptera novaeangliae*), Dall's porpoise (*Phocoenoides dalli*), harbor porpoise (*Phocoena phocoena*), minke whale (*Balaenoptera acutorostrata*), bottlenose dolphin (*Tursiops truncatus*), and long-beaked common dolphin (*Delphinus capensis*). The takes authorized in the 2018 IHA are presented in Table 1.
