

compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1-888-REG-FAIR (1-888-734-3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531-1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of

\$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023-01 and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone lasting only thirty minutes that will prohibit entry within a one-mile stretch of the Ohio River for one day. It is categorically excluded from further review under paragraph L60(a) in Table 3-1 of U.S. Coast Guard Environmental Planning Implementing Procedures 5090.1. A Record of Environmental Consideration supporting this determination is available in the docket where indicated under **ADDRESSES**.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS.

- 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051; 33 CFR 1.05-1, 6.04-1, 6.04-6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

- 2. Add § 165.T08-0591 to read as follows:

§ 165.T08-0591 Safety zone; Ohio River, Newburgh, IN.

(a) *Location.* All navigable waters of the Ohio River between Mile Markers

(MM) 777.3 to MM 778.3 in Newburgh, IN.

(b) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the Captain of the Port Sector Ohio Valley (COTP) or the COTP's designated representative.

(2) To seek permission to enter, contact the COTP or the COTP's representative by VHF-FM radio channel 16 or phone at 1-800-253-7465. Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative.

(c) *Enforcement period.* This section will be enforced from 9:30 p.m. through 10 p.m. August 31, 2019.

(d) *Information broadcasts.* The Coast Guard will issue Broadcast Notices to Mariners, Local Notices to Mariners, and Marine Safety Information Bulletins about this safety zone.

A.M. Beach,

Captain, U.S. Coast Guard, Captain of the Port Sector Ohio Valley.

BILLING CODE 9110-04-P

DEPARTMENT OF EDUCATION

34 CFR Chapter III

[Docket ID ED-2019-OSERS-0075]

Final Priority and Requirements—Technical Assistance on State Data Collection—National Technical Assistance Center To Improve State Capacity To Collect, Report, Analyze, and Use Accurate Early Childhood IDEA Data

[Catalog of Federal Domestic Assistance (CFDA) Number 84.373Z]

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Final priority and requirements.

SUMMARY: The Assistant Secretary for Special Education and Rehabilitative Services announces a funding priority and requirements under the Technical Assistance on State Data Collection program. The Assistant Secretary may use this priority and these requirements for competitions in fiscal year (FY) 2019 and later years. We take this action to focus attention on an identified national need to provide technical assistance (TA) to improve the capacity of States to meet the data collection requirements under Parts C and B of the Individuals with Disabilities Education Act (IDEA).

This center, CFDA Number 84.373Z, will support States in collecting, reporting, and determining how to best analyze and use their data to establish and meet high expectations for all people with disabilities and would customize its TA to meet each State's specific needs.

DATES: This priority and these requirements are effective September 11, 2019.

FOR FURTHER INFORMATION CONTACT: Meredith Miceli, U.S. Department of Education, 400 Maryland Avenue SW, Room 5141, Potomac Center Plaza, Washington, DC 20202-5076. Telephone: (202) 245-6028. Email: Meredith.Miceli@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

SUPPLEMENTARY INFORMATION:

Purpose of Program: Section 616 of the IDEA requires States to submit to the Department, and make available to the public, a State performance plan (SPP) and an annual performance report (APR) with data on how each State implements both Parts B and C of the IDEA to improve outcomes for infants, toddlers, children, and youth with disabilities. Section 618 of the IDEA requires States to submit to the Department, and make available to the public, quantitative data on infants, toddlers, children, and youth with disabilities who are receiving early intervention and special education services under IDEA. The purpose of the Technical Assistance on State Data Collection program is to improve the capacity of States to meet IDEA data collection and reporting requirements under Sections 616 and 618 of the IDEA. Funding for the program is authorized under section 611(c)(1) of IDEA, which gives the Secretary the authority to reserve up to 1/2 of 1 percent of the amounts appropriated under Part B for each fiscal year to provide TA, where needed, to improve the capacity of States to meet the data collection and reporting requirements under Parts B and C of IDEA. The maximum amount the Secretary may reserve under this set-aside for any fiscal year is \$25,000,000, cumulatively adjusted by the rate of inflation. Section 616(i) of IDEA requires the Secretary to review the data collection and analysis capacity of States to ensure that data and information determined necessary for the implementation of section 616 of IDEA are collected, analyzed, and accurately reported to the Secretary. It also requires the Secretary to provide

TA, where needed, to improve the capacity of States to meet the data collection requirements, which include the data collection and reporting requirements in sections 616 and 618 of IDEA. Additionally, Division H of the Consolidated Appropriations Act of 2018 gives the Secretary the authority to use funds reserved under section 611(c) to "carry out other services and activities to improve data collection, coordination, quality, and use under Parts B and C of the IDEA." Consolidated Appropriations Act, 2018; Div. H, Title III of Public Law 115-141; 132 Stat. 745 (2018).

Program Authority: 20 U.S.C. 1411(c), 1416(i), 1418(c), and 1442; and Department of Education Appropriations Act, 2018; Div. H, Title III of Public Law 115-141, Consolidated Appropriations Act, 2018; 132 Stat. 745 (2018).
Applicable Program Regulations: 34 CFR 300.702.

We published a notice of proposed priority and requirements for this program in the **Federal Register** on March 6, 2019 (84 FR 8059) (the NPP). The NPP contained background information and our reasons for proposing the particular priority and requirements.

There are differences between the NPP and this notice of final priority and requirements (NFP) as discussed in the *Analysis of Comments and Changes* section of this document. The most significant of these changes, as discussed below, is the addition of an indirect cost rate cap to the final requirements.

Public Comment: In response to our invitation in the NPP, 14 parties submitted comments on the proposed priority and requirements.

Generally, we do not address technical and other minor changes, or suggested changes the law does not authorize us to make under the applicable statutory authority. In addition, we do not address comments that raised concerns not directly related to the proposed priority and requirements.

Analysis of Comments and Changes: An analysis of the comments and changes in the priority and requirements since publication of the NPP follows. OSERS received comments on a number of specific topics from the proposed cap on the maximum allowable indirect cost rate to the topics for technical assistance. Each topic is addressed below.

General Comments

Comments: Several commenters were supportive of the notice of proposed

priority and requirements for this program as it was published in the **Federal Register** on March 6, 2019.

Discussion: The Department appreciates the commenters' support.

Changes: None.

Comments: None.

Discussion: As discussed in the NPP, the Department is particularly concerned about maximizing the efficiency and effectiveness of this investment. Given the purpose of the program, we believe a critical lever to meeting this goal is to ensure that TA is appropriately targeted to recipients with a known and ongoing need for support in reporting, analyzing, and using high quality IDEA data. As such, the Department is adding a requirement that applicants describe their proposed approach to prioritizing TA recipients with a particular focus on meeting the needs of States with ongoing data quality issues.

Changes: The final priority includes a requirement for applicants to describe their proposed approach to prioritizing TA recipients.

Indirect Cost Rate

Comments: A number of commenters agreed with the purpose of the indirect cost cap, which is to maximize funds that go directly to provide TA to States to improve their capacity to meet the IDEA data collection and reporting requirements. These same commenters, however, believed that setting a cap on indirect costs would not achieve this goal and that it may negatively impact the program. They noted that indirect costs support a wide variety of purchases and activities, including, but not limited to, facilities, information technology (IT) services, and support personnel. Further, a subset of these commenters stated that a cap on indirect cost rates would limit competition, reduce the number of qualified applicants, and likely degrade the quality of TA services provided to States. Specifically, some of these commenters stated that a cap could make it cost prohibitive for small businesses to compete for the grant, as they could not absorb any unrecovered indirect costs. Additionally, it would make it harder for applicants to attract and retain qualified personnel, thus depressing the quality of services provided to States.

Discussion: The Department appreciates the stakeholder input it received in response to the specific directed question on the indirect cost cap proposal but disagrees that it would have a negative impact on the program. Regarding potential impact, the Department has done an analysis of the

indirect cost rates for all current technical assistance centers funded under the Technical Assistance on State Data Collection programs as well as other grantees that are large, midsize, and small businesses and small nonprofit organizations and has found that, in general, total indirect costs charged on these grants by these entities were at or below 35 percent of total direct costs. We recognize that, dependent on the structure of the investment and activities, the modified total direct cost (MTDC) base could be much smaller than the total direct cost, which would imply a higher indirect cost rate than those calculated here. The Department arrived at a 40 percent rate to address some of that variation. Such a change accounts for a 12 percent variance between TDC and MTDC. However, we note that, in the absence of a cap, certain entities would likely charge indirect cost rates in excess of 40 percent of MTDC. Based on our review, it appears that those entities would likely be larger for-profit and nonprofit organizations, but these organizations appear to be outliers when compared to the majority of other large businesses as well as the entirety of OSEP's grantees. Setting an indirect cost rate cap at 40 percent is in line with the majority of applicant's existing negotiated rates with their cognizant Federal agency. Therefore, we do not believe that the cap we are setting in these final requirements would negatively impact the majority of entities' ability to recover indirect costs.

Regarding commenters' concerns that a cap on indirect costs would limit competition and reduce the number of qualified applicants, it is not clear how a cap would do so. The cap included in the final requirements does not limit the pool of eligible applicants because most entities' indirect cost rates are below the cap we are setting. Further, regarding the impact on the quality of TA services provided to States, we have no information indicating a direct correlation between an entity's negotiated indirect cost rate and its ability to attract and retain qualified personnel and thus their ability to provide high-quality TA services to States. Based on our analysis, there are many OSEP grantees that are able to effectively carry out project activities required by their individual grants with negotiated indirect cost rates under the cap included in the final requirements. Further, the Department's peer review process is intended to assess the ability of various applicants to provide high-quality TA to States. Finally, we do not believe the cap we are setting in these

final requirements would result in an amount of unrecovered costs that would deter most prospective applicants. The prospective applicants could look at the cost cap prior to applying and either choose to absorb unrecovered costs or opt not to apply.

In light of these considerations, we have determined that placing an indirect cost cap that is the lesser of the percentage approved by the grantee's cognizant Federal agency and 40 percent for this priority is appropriate as it maximizes the availability of funds for the primary technical assistance purposes of this priority, which is to improve the capacity of States to meet the data collection and reporting requirements under Parts B and C of IDEA and to ultimately benefit programs serving children with disabilities.

Changes: Paragraph (d)(5) of the final requirements now includes an indirect cost cap that is the lesser of the percentage approved by the grantee's cognizant Federal agency and a cap of 40 percent on the reimbursement of indirect costs.

Comments: A number of commenters expressed concerns that many of the most qualified organizations could not compete because once indirect cost rates are set by, and audited by, a cognizant agency, they cannot be lowered for a single project.

Discussion: We considered this requirement based on 2 CFR 200.414(c)(1), which allows a Federal awarding agency to use an indirect cost rate different from the negotiated rate when required by Federal statute or regulation or when approved by a Federal awarding agency head based on documented justification when the Federal awarding agency implements, and makes publicly available, the policies, procedures, and general decision making criteria that their programs will follow to seek and justify deviations from negotiated rates. Federal discretionary grantees have historically been reimbursed for indirect costs at the rate that each grantee negotiates with its cognizant Federal agency, and we believe that use of the negotiated rate is appropriate for most grants in most circumstances. However, because funding for this program comes from funds reserved by the Department that would otherwise be allocated to States under Part B (which applies a restricted indirect cost rate to State grantees), we determined that using an indirect cost rate different from the negotiated rate was appropriate since it would maximize funds available to provide TA to States to improve their capacity to meet the IDEA data collection and reporting requirements.

Changes: None.

Comments: Numerous commenters expressed concerns that the implementation of an indirect cost rate limit would not impact each vendor equally or result in equal savings to the government, as categories of indirect costs vary across vendors.

Discussion: We appreciate the commenters' concerns and recognize that a cap on the indirect cost rate, although it would apply equally to all applicants, may be more difficult for particular entities to meet, particularly those with high negotiated indirect cost rates. However, as noted above, our analysis indicates that the rate established in the final requirements would not appear to create unreasonable burdens for many applicants. Further, it was not the Department's intention to institute a limit on the reimbursement of indirect costs by specific cost category, but rather to apply it as a percentage of MTDC. We have clarified in the final requirements that the limit applies to MTDC as defined in 2 CFR 200.68. As the MTDC is applied to the total direct costs of the grant, each grantee's MTDC will include direct salaries and wages, applicable fringe benefits, materials and supplies, services, travel, and up to the first \$25,000 of each subaward, thus ensuring equity across vendors.

Changes: The final requirement clarifies that the 40 percent maximum indirect cost rate is applied to MTDC as defined in 2 CFR 200.68.

Comments: Two commenters provided alternatives to setting a cap. One commenter proposed gauging competitiveness based on a vendor's total price in combination with the proposed quality and level of effort. A second commenter suggested that the program add a cost share requirement in lieu of an indirect cost cap. The commenter suggested that a modest cost share may not impact vendor economics to the same degree as a cap on indirect costs.

Discussion: The Department appreciates the commenters' suggestions. Regarding gauging competitiveness based on a vendor's total price in combination with the proposed quality and level of effort, this may represent a viable approach for contract procurement, but does not lend itself to making discretionary grant awards. Regarding the second commenter's recommendation to add a cost share requirement, the nature of the funding source for this program does not allow for a cost sharing requirement and, in addition, could have the unintended consequence of eliminating small businesses.

Changes: None.

Comments: One commenter advocated for the Department to provide clarification and guidance to States on what should be covered by indirect cost rates and how to determine appropriate indirect cost rates. Additionally, a second commenter suggested the Department allow States the flexibility to determine and justify funds allocated to indirect costs.

Discussion: The Department appreciates the commenters' suggestions. We were not proposing a cap on the indirect cost rates for State formula grants. Clarification or guidance on what is or is not an indirect cost can be obtained from the indirect cost office of the applicant's cognizant Federal agency.

Changes: None.

Topics for Technical Assistance

Comment: One commenter highlighted the need for the proposed center to support States in their data collection initiatives and to give States the leeway to identify issues that are particular to the State and its population.

Discussion: The Department agrees with the commenter, and believes that the center is already designed to support this objective. This center will design and provide TA on collecting, reporting, analyzing, and using high-quality IDEA Part C early intervention data and IDEA Part B preschool special education data based on needs identified by the States. States will have the opportunity to engage in TA with the center in various ways (*i.e.*, universal TA, targeted TA, and intensive TA). Through these different levels of TA, this center will be able to meet specific State requests for assistance related to collecting, reporting, analyzing, and using high-quality IDEA Part C early intervention data and IDEA Part B preschool special education data.

Changes: None.

Potential Duplication of Efforts

Comment: One commenter voiced a concern that the resources generated by the proposed center may overlap with the resources provided by other Office of Special Education Programs (OSEP) funded TA centers. They highlighted the importance of clarifying each entity's role and reducing duplication of services to help States to make more efficient use of resources and cut costs.

Discussion: The Department agrees any overlap in the scopes of TA centers should be minimized and duplication should be avoided. The Department has redefined the scope of this center, as well as the scope of the National Technical Assistance Center to Improve

State Capacity to Collect, Report, Analyze, and Use Accurate IDEA Part B Data, CFDA number 84.373Y, in order to minimize unnecessary overlap. Where similar topics are within scope for multiple TA centers, we believe that effective communication and collaboration among these centers will prevent duplication and assist States in efficiently identifying, accessing, and using resources provided by these centers.

Changes: We have revised the purpose of priority to remove TA on the section 618, Part B Child Count and Educational Environments data for children with disabilities ages 3 through 5 from the scope of this center. This TA will be provided by the National Technical Assistance Center to Improve State Capacity to Collect, Report, Analyze, and Use Accurate IDEA Part B Data, CFDA number 84.373Y. In addition, we revised paragraph (b)(5)(iv)(F) of the requirements to require applicants to propose a plan for collaborating and coordinating with the National Technical Assistance Center to Improve State Capacity to Collect, Report, Analyze, and Use Accurate IDEA Part B Data, and other Department-funded TA investments. Applicants must propose how they will align complementary work and jointly develop and implement products and services with other TA centers to meet the purposes of this priority and to develop and implement a coordinated TA plan when they are involved in a State. This structure that specifies more distinct portfolios of the centers (*i.e.*, less overlap) will make it easier for States to work with the two centers.

Significant Disproportionality

Comment: One commenter noted the States' continued need for data-related TA on significant disproportionality.

Discussion: States typically use Part B Child Count, Part B Educational Environment, and Part B Discipline data to analyze significant

disproportionality. Since these data are outside of the scope of this priority, this center will not provide TA on this topic.

Changes: None.

Division of Activities Between 84.373Y and 84.373Z

Comment: One commenter voiced a concern with splitting the responsibilities of providing TA on the IDEA Part B preschool special education data between the proposed center and the National Technical Assistance Center to Improve State Capacity to Collect, Report, Analyze, and Use Accurate IDEA Part B Data, CFDA number 84.373Y. The commenter stated

that splitting the responsibilities regarding the IDEA Part B preschool special education data across the two centers may require Part B data managers to work with both centers in order to improve the quality of their IDEA Part B preschool special education data.

Discussion: The Department appreciates the commenter's concerns. The Department believes that including IDEA Part B preschool special education data in the scope of this center makes sense for some of the IDEA data and including IDEA Part B preschool special education data in the scope of the National Technical Assistance Center to Improve State Capacity to Collect, Report, Analyze, and Use Accurate IDEA Part B Data, CFDA number 84.373Y, is appropriate for other IDEA data.

The Department believes that including the IDEA Part B preschool special education data required under IDEA section 616 for Indicators B-7 (Preschool Outcomes) and B-12 (Early Childhood Transition) within the scope for this center is appropriate because it will facilitate better linkages between the Part C data and the IDEA Part B preschool special education data on children with disabilities and the inclusion of the Part C and IDEA Part B preschool special education data in the Early Childhood Integrated Data Systems (ECIDS). This will allow for enhanced opportunities to improve the quality of data States are collecting, reporting, analyzing, and using related to children's transition from the Part C early intervention program to the Part B preschool special education program. In addition, due to the similarities in the type of data required under IDEA section 616 for Indicator C-3 (Infant and Toddler Outcomes) in the Part C SPP/APR and Indicator B-7 (Preschool Outcomes) in the Part B SPP/APR, it is more efficient to have this center provide TA on these data.

The Department believes that including the IDEA Part B preschool special education data required under IDEA section 618 (including the section 618, Part B Child Count and Educational Environments data) and those preschool data required under IDEA section 616 for indicators in the IDEA Part B State Performance Plan/Annual Performance Report (SPP/APR) that solely use the *EDFacts* data as the source for reporting, such as Indicator B-5 (Preschool Least Restrictive Environment), within the scope of the National Technical Assistance Center to Improve State Capacity to Collect, Report, Analyze, and Use Accurate IDEA Part B Data, CFDA number 84.373Y will allow States

to obtain TA on IDEA data submitted via ED*Facts* from a single center. Since a State Part B data manager plays a significant role in submitting the IDEA data on children with disabilities ages 3 through 5 and children with disabilities ages 6 through 21 via ED*Facts*, the data manager will be able to access TA on these data through a single center. Finally, this will allow States to receive TA on IDEA data-related topics and analyses that are supported by and use IDEA section 618 data submitted via ED*Facts*.

Changes: None.

Support for Low-Income Communities

Comment: One commenter asked how this funding opportunity will benefit students from low income families.

Discussion: As specified by IDEA, the purpose of the Technical Assistance on State Data Collection program is to improve the capacity of States to meet IDEA data collection and reporting requirements. This center's primary audiences and recipients of TA will be State level staff who work with the IDEA Part B preschool special education programs and IDEA Part C early intervention programs. This center will not provide direct services to children with disabilities. This center will facilitate, support, and encourage the States use of data to improve IDEA program for all infants, toddlers, and children with disabilities served under IDEA.

Changes: None.

Data Collection Under IDEA

Comment: A commenter recommended that the Department collect data on students who identify in a gender-neutral category, use a different language/communication system, or are born in the United States but do not speak English as their first language, and on their socioeconomic status, parental English fluency, and parents' highest educational level.

Discussion: The Department appreciates the comment; however, this priority does not address the data collection and reporting requirements for States under IDEA. The ED*Facts* information collection package (OMB control number 1850-0925), which would more squarely address these issues, was published in the **Federal Register** on April 8, 2019 (84 FR 13913). It addressed the IDEA Section 618 Part B data collection requirements and was open for public comment from April 8, 2019, to May 8, 2019.

Changes: None.

Definition of Evidence-Based Practices

Comment: One commenter stated that the definition of evidence-based practices (EBPs) used in the proposed requirements does not align with the highest level of available evidence, and that EBP is a dynamic process that requires ongoing evaluation.

Discussion: We understood the commenter to be recommending a higher level of evidence than required in the proposed requirements. We agree with the commenter regarding the importance of ensuring the provision of effective TA to States; however, we do not agree that the definition of EBPs used in the proposed requirements is insufficient. We are continually reviewing the effectiveness of services provided by our federally funded TA centers. We believe that the definition of EBPs used in the proposed requirements—the definition in 34 CFR 77.1—is well established and provides the necessary standards against which high-quality services may be judged for the purposes of making an award and monitoring the implementation of TA to improve the capacity of States to meet the data collection and reporting requirements under Parts B and C of IDEA.

Changes: None.

Funds for Targeted and Intensive Technical Assistance

Comment: None.

Discussion: As a result of our further review of the proposed priority and requirements and public comments received for the two notices of proposed priority under the TA on State Data Collection program published in the **Federal Register** on March 6, 2019, we realized that the requirement to use 50 percent of the funds for intensive, sustained TA needed to be updated to align with the requirement in the priority establishing the National Technical Assistance Center to Improve State Capacity to Collect, Report, Analyze, and Use Accurate IDEA Part B Data, CFDA number 84.373Y. The Department believes that aligning the two priorities, whenever possible, will allow for more efficient collaborations and will allow the centers funded under these two priorities to provide a clear and seamless set of TA services related to collecting, reporting, analyzing, and using high-quality IDEA data on infants, toddlers, and children with disabilities, birth through age 21, to States.

Changes: We have changed the requirement to use 50 percent of the funds for intensive, sustained TA to a requirement to use 50 percent of funds for targeted and intensive TA to States.

Final Priority:

National Technical Assistance Center To Improve State Capacity To Collect, Report, Analyze, and Use Accurate Early Childhood IDEA Data.

The purpose of this priority is to fund a cooperative agreement to establish and operate a National Technical Assistance Center to Improve State Capacity to Collect, Report, Analyze, and Use Accurate Early Childhood IDEA Data (Center).

The Center will focus on providing TA on collecting, reporting, analyzing, and using Part C data required under sections 616 and 618 of IDEA and Part B data on children with disabilities, ages 3 through 5, required under section 616 of IDEA for those indicators that are not solely based on IDEA section 618 data (e.g., Annual Performance Report (APR) Indicators B7 (Preschool Children with Improved Outcomes) and B12 (Transition Between Part C and Part B)). The Center will provide TA to (1) improve States' capacity to collect, report, analyze, and use high-quality IDEA Part C data (including IDEA section 618 Part C data and IDEA section 616 Part C data) and IDEA Part B preschool special education data; and (2) enhance, streamline, and integrate statewide, child-level early childhood data systems (including Part C and Part B preschool special education data systems) to address critical policy questions that will facilitate program improvement, improve compliance accountability, and improve outcomes or results for children served under Part C and Part B preschool special education programs. These Part C early intervention and Part B preschool special education data systems must allow the States to: (1) Effectively and efficiently respond to all IDEA-related data submission requirements (e.g., Part C section 616 and 618 data and Part B preschool special education data); (2) respond to critical policy questions that will facilitate program improvement and compliance accountability; and (3) comply with applicable privacy requirements, including the confidentiality requirements under Parts B and C of IDEA, the Privacy Rule under the Health Insurance Portability and Accountability Act (HIPAA) (45 CFR part 160 and subparts A and E of part 164), and the Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. 1232g) and its regulations at 34 CFR part 99.

The Center must be designed to achieve, at a minimum, the following expected outcomes:

(a) Increased capacity of States to collect, report, analyze, and use high-quality IDEA Part C data (including

IDEA section 616 Part C data and section 618 Part C data);

(b) Increased capacity of States to collect, report, analyze, and use high-quality IDEA Part B preschool special education data;

(c) Increased number of States that use their Part C early intervention and Part B preschool special education data system to answer critical State-determined policy questions to drive program improvement, improve results for children with disabilities, and improve compliance accountability;

(d) Increased number of States with integrated or linked Part C early intervention and Part B preschool special education data;

(e) Increased number of States that use linked or integrated early childhood data to improve program compliance and accountability;

(f) Increased number of States with data system integration plans that allow for the linking of Part C and Part B preschool special education data as well as linking to other statewide longitudinal and early learning data systems and that comply with all applicable privacy laws;

(g) Increased capacity of States to implement and document Part C and Part B preschool special education data management policies and procedures and data system integration activities and to develop a sustainability plan to continue this data management and data system integration work in the future; and

(h) Increased capacity of States to address personnel training needs to meet the Part C and Part B preschool special education data collection and reporting requirements under sections 616 and 618 of IDEA through development of effective tools (e.g., training modules) and resources (e.g., new Part C Data Managers resources), as well as providing opportunities for in-person and virtual cross-State collaboration about Part C data (required under sections 616 and 618 of IDEA) and Part B preschool special education data collection and reporting requirements that States can use to train personnel in local programs and agencies.

Types of Priorities

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

Absolute priority: Under an absolute priority, we consider only applications

that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

Final Requirements

The Assistant Secretary establishes the following requirements for this program. We may apply one or more of these requirements in any year in which this program is in effect.

Requirements:

Applicants must—

(a) Demonstrate, in the narrative section of the application under “Significance,” how the proposed project will—

(1) Address State challenges associated with early childhood data management and data system integration, including implementing early childhood data system integration and improvements; enhancing and streamlining Part C early intervention and Part B preschool special education data systems to respond to critical policy questions; using ECIDS for program improvement and compliance accountability for Part C early intervention and Part B preschool special education programs; and reporting high-quality IDEA Part C data (including IDEA section 616 Part C data and section 618 Part C data) and IDEA Part B preschool special education data to the Department and the public. To meet this requirement the applicant must—

(i) Present applicable national, State, or local data demonstrating the challenges of States to implement effective early childhood data management policies and procedures and data system integration activities, including integrating early childhood data systems across IDEA programs, other early learning programs, and other educational programs for school-aged students; linking Part C and Part B preschool special education program data; and using their Part C and Part B preschool special education data systems to respond to critical State-

determined policy questions for program improvement and compliance accountability;

(ii) Demonstrate knowledge of current educational and technical issues and policy initiatives relating to early childhood data management and data system integration, data use, data privacy, Part C IDEA sections 616 and 618 data, Part B preschool special education data, and Part C and Part B preschool special education data systems; and

(iii) Present information about the current level of implementation of integrating or linking Part C and Part B preschool special education data systems; integrating or linking Part C and/or Part B preschool special education data systems with other early learning data systems; using Part C and Part B preschool special education data systems to respond to critical State-determined policy questions; and collecting, reporting, analyzing, and using high-quality IDEA Part C data (including IDEA section 616 Part C data and section 618 Part C data) and IDEA Part B preschool special education data; and

(2) Improve early childhood data management policies and procedures and data system integration activities used to collect, report, and analyze high-quality Part C and Part B preschool special education data; to integrate or link Part C and Part B preschool special education data systems as well as integrate or link these data with data on children participating in other early learning programs and data on school-aged children; and to develop and use robust early childhood data systems to answer critical State-determined policy questions and indicate the likely magnitude or importance of the improvements.

(b) Demonstrate, in the narrative section of the application under “Quality of project services,” how the proposed project will—

(1) Ensure equal access and treatment for members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability. To meet this requirement, the applicant must describe how it will—

(i) Identify the needs of the intended recipients for TA and information; and

(ii) Ensure that products and services meet the needs of the intended recipients of the grant;

(2) Achieve its goals, objectives, and intended outcomes. To meet this requirement, the applicant must provide—

(i) Measurable intended project outcomes; and

(ii) In Appendix A, the logic model (as defined in 34 CFR 77.1) by which the proposed project will achieve its intended outcomes that depicts, at a minimum, the goals, activities, outputs, and intended outcomes of the proposed project;

(3) Use a conceptual framework (and provide a copy in Appendix A) to develop project plans and activities, describing any underlying concepts, assumptions, expectations, beliefs, or theories, as well as the presumed relationships or linkages among these variables, and any empirical support for this framework;

Note: The following websites provide more information on logic models and conceptual frameworks:

www.osepideastthatwork.org/logicModel and www.osepideastthatwork.org/resources-grantees/program-areas/ta-ta-tad-project-logic-model-and-conceptual-framework.

(4) Be based on current research and make use of evidence-based¹ practices (EBPs). To meet this requirement, the applicant must describe—

(i) The current research on early childhood data management and data system integration, and related EBPs; and

(ii) How the proposed project will incorporate current research and EBPs in the development and delivery of its products and services;

(5) Develop products and provide services that are of high quality and sufficient intensity and duration to achieve the intended outcomes of the proposed project. To address this requirement, the applicant must describe—

(i) How it proposes to identify or develop the knowledge base on early childhood data management and data system integration;

(ii) Its proposed approach to universal, general TA,² which must identify the intended recipients, including the type and number of

¹For the purposes of this priority, “evidence-based” means the proposed project component is supported, at a minimum, by evidence that demonstrates a rationale (as defined in 34 CFR 77.1), where a key project component included in the project’s logic model is informed by research or evaluation findings that suggest the project component is likely to improve relevant outcomes.

²“Universal, general TA” means TA and information provided to independent users through their own initiative, resulting in minimal interaction with TA center staff and including one-time, invited or offered conference presentations by TA center staff. This category of TA also includes information or products, such as newsletters, guidebooks, or research syntheses, downloaded from the TA center’s website by independent users. Brief communications by TA center staff with recipients, either by telephone or email, are also considered universal, general TA.

recipients, that will receive the products and services under this approach;

(iii) Its proposed approach to targeted, specialized TA,³ which must identify—

(A) The intended recipients, including the type and number of recipients, that will receive the products and services under this approach;

(B) Its proposed approach to measure the readiness of potential TA recipients to work with the project, assessing, at a minimum, their current infrastructure, available resources, and ability to build capacity at the State and local levels; and

(C) The process by which the proposed project will collaborate with OSEP-funded centers and other federally funded TA centers to develop and implement a coordinated TA plan when they are involved in a State;

(iv) Its proposed approach to intensive, sustained TA⁴ which must identify—

(A) The intended recipients, including the type and number of recipients, that will receive the products and services under this approach;

(B) Its proposed approach to addressing States’ challenges associated with limited resources to engage in early childhood data system integration and enhancement activities that streamline the established Part C and Part B preschool special education data systems to respond to critical policy questions and to report high-quality IDEA data to the Department and the public, which should, at a minimum, include providing on-site consultants to the State lead agency (LA) or State educational agency (SEA) to—

(1) Model and document data management and data system integration policies, procedures, processes, and activities within the State;

³“Targeted, specialized TA” means TA services based on needs common to multiple recipients and not extensively individualized. A relationship is established between the TA recipient and one or more TA center staff. This category of TA includes one-time, labor-intensive events, such as facilitating strategic planning or hosting regional or national conferences. It can also include episodic, less labor-intensive events that extend over a period of time, such as facilitating a series of conference calls on single or multiple topics that are designed around the needs of the recipients. Facilitating communities of practice can also be considered targeted, specialized TA.

⁴“Intensive, sustained TA” means TA services often provided on-site and requiring a stable, ongoing relationship between the TA center staff and the TA recipient. “TA services” are defined as negotiated series of activities designed to reach a valued outcome. This category of TA should result in changes to policy, program, practice, or operations that support increased recipient capacity or improved outcomes at one or more systems levels.

(2) Develop and adapt tools and provide technical solutions to meet State-specific data needs; and

(3) Develop a sustainability plan for the State to continue the data management and data system integration work in the future;

(C) Its proposed approach to measure the readiness of the State LA and SEA personnel to work with the project, including their commitment to the initiative, alignment of the initiative to their needs, current infrastructure, available resources, and ability to build capacity at the State and local program and district levels;

(D) Its proposed approach to prioritizing TA recipients with a primary focus on meeting the needs of States with known ongoing data quality issues, as measured by OSEP’s review of the quality of the IDEA sections 616 and 618 data;

(E) Its proposed plan for assisting State LAs and SEAs to build or enhance training systems that include professional development based on adult learning principles and coaching;

(F) Its proposed plan for working with appropriate levels of the education system (e.g., State LAs, SEAs, regional TA providers, districts, local programs, families) to ensure that there is communication between each level and that there are systems in place to support the collection, reporting, analysis, and use of high-quality IDEA Part C data (including IDEA section 616 Part C data and section 618 Part C data) and IDEA Part B preschool special education data as well as early childhood data management and data system integration; and

(G) Its proposed plan for collaborating and coordinating with the National Technical Assistance Center to Improve State Capacity to Collect, Report, Analyze, and Use Accurate IDEA Part B Data, Department-funded TA investments, other federally funded TA investments, and Institute of Education Sciences/National Center for Education Statistics research and development investments, where appropriate, in order to align complementary work and jointly develop and implement products and services to meet the purposes of this priority and to develop and implement a coordinated TA plan when they are involved in a State;

(6) Develop products and implement services that maximize efficiency. To address this requirement, the applicant must describe—

(i) How the proposed project will use technology to achieve the intended project outcomes;

(ii) With whom the proposed project will collaborate and the intended outcomes of this collaboration; and

(iii) How the proposed project will use non-project resources to achieve the intended project outcomes.

(c) In the narrative section of the application under “Quality of the project evaluation,” include an evaluation plan for the project developed in consultation with and implemented by a third-party evaluator.⁵ The evaluation plan must—

(1) Articulate formative and summative evaluation questions, including important process and outcome evaluation questions. These questions should be related to the project’s proposed logic model required in paragraph (b)(2)(ii) of these requirements;

(2) Describe how progress in and fidelity of implementation, as well as project outcomes, will be measured to answer the evaluation questions. Specify the measures and associated instruments or sources for data appropriate to the evaluation questions. Include information regarding reliability and validity of measures where appropriate;

(3) Describe strategies for analyzing data and how data collected as part of this plan will be used to inform and improve service delivery over the course of the project and to refine the proposed logic model and evaluation plan, including subsequent data collection;

(4) Provide a timeline for conducting the evaluation and include staff assignments for completing the plan. The timeline must indicate that the data will be available annually for the Annual Performance Report (APR); and

(5) Dedicate sufficient funds in each budget year to cover the costs of developing or refining the evaluation plan in consultation with a third-party evaluator, as well as the costs associated with the implementation of the evaluation plan by the third-party evaluator.

(d) Demonstrate, in the narrative section of the application under “Adequacy of resources and quality of project personnel,” how—

(1) The proposed project will encourage applications for employment from persons who are members of groups that have traditionally been underrepresented based on race, color,

national origin, gender, age, or disability, as appropriate;

(2) The proposed key project personnel, consultants, and subcontractors have the qualifications and experience to carry out the proposed activities and achieve the project’s intended outcomes;

(3) The applicant and any key partners have adequate resources to carry out the proposed activities;

(4) The proposed costs are reasonable in relation to the anticipated results and benefits and funds will be spent in a way that increases their efficiency and cost-effectiveness, including by reducing waste or achieving better outcomes; and

(5) The applicant will ensure that it will recover the lesser of: (A) Its actual indirect costs as determined by the grantee’s negotiated indirect cost rate agreement with its cognizant Federal agency; and (B) 40 percent of its modified total direct cost (MTDC) base as defined in 2 CFR 200.68.

Note: The MTDC is different from the total amount of the grant. Additionally, the MTDC is not the same as calculating a percentage of each or a specific expenditure category. If the grantee is billing based on the MTDC base, the grantee must make its MTDC documentation available to the program office and the Department’s Indirect Cost Unit. If a grantee’s allocable indirect costs exceed 40 percent of MTDC as defined in 2 CFR 200.68, the grantee may not recoup the excess by shifting the cost to other grants or contracts with the U.S. Government, unless specifically authorized by legislation. The grantee must use non-Federal revenue sources to pay for such unrecovered costs.

(e) Demonstrate, in the narrative section of the application under “Quality of the management plan,” how—

(1) The proposed management plan will ensure that the project’s intended outcomes will be achieved on time and within budget. To address this requirement, the applicant must describe—

(i) Clearly defined responsibilities for key project personnel, consultants, and subcontractors, as applicable; and

(ii) Timelines and milestones for accomplishing the project tasks;

(2) Key project personnel and any consultants and subcontractors will be allocated to the project and how these allocations are appropriate and adequate to achieve the project’s intended outcomes;

(3) The proposed management plan will ensure that the products and

services provided are of high quality, relevant, and useful to recipients; and

(4) The proposed project will benefit from a diversity of perspectives, including those of families, educators, TA providers, researchers, and policy makers, among others, in its development and operation.

(f) Address the following application requirements. The applicant must—

(1) Include, in Appendix A, personnel-loading charts and timelines, as applicable, to illustrate the management plan described in the narrative;

(2) Include, in the budget, attendance at the following:

(i) A one and one-half day kick-off meeting in Washington, DC, after receipt of the award, and an annual planning meeting in Washington, DC, with the OSEP project officer and other relevant staff during each subsequent year of the project period.

Note: Within 30 days of receipt of the award, a post-award teleconference must be held between the OSEP project officer and the grantee’s project director or other authorized representative;

(ii) A two- and one-half-day project directors’ meeting in Washington, DC, during each year of the project period; and

(iii) Three annual two-day trips to attend Department briefings, Department-sponsored conferences, and other meetings, as requested by OSEP;

(3) Include, in the budget, a line item for an annual set-aside of 5 percent of the grant amount to support emerging needs that are consistent with the proposed project’s intended outcomes, as those needs are identified in consultation with, and approved by, the OSEP project officer. With approval from the OSEP project officer, the project must reallocate any remaining funds from this annual set-aside no later than the end of the third quarter of each budget period;

(4) Maintain a high-quality website, with an easy-to-navigate design, that meets government or industry-recognized standards for accessibility;

(5) Include, in Appendix A, an assurance to assist OSEP with the transfer of pertinent resources and products and to maintain the continuity of services to States during the transition to this new award period and at the end of this award period, as appropriate; and

(6) Budget at least 50 percent of the grant award for providing targeted and intensive TA to States.

This document does not preclude us from proposing additional priorities or requirements, subject to meeting applicable rulemaking requirements.

⁵ A “third-party” evaluator is an independent and impartial program evaluator who is contracted by the grantee to conduct an objective evaluation of the project. This evaluator must not have participated in the development or implementation of any project activities, except for the evaluation activities, nor have any financial interest in the outcome of the evaluation.

Note: This notice does *not* solicit applications. In any year in which we choose to use this priority and these requirements, we invite applications through a notice in the **Federal Register**.

Executive Orders 12866, 13563, and 13771

Regulatory Impact Analysis

Under Executive Order 12866, it must be determined whether this regulatory action is “significant” and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of \$100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities in a material way (also referred to as an “economically significant” rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles stated in the Executive order.

This final regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866. Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not a “major rule,” as defined by 5 U.S.C. 804(2).

Under Executive Order 13771, for each new rule that the Department proposes for notice and comment or otherwise promulgates that is a significant regulatory action under Executive Order 12866 and that imposes total costs greater than zero, it must identify two deregulatory actions. For FY 2019, any new incremental costs associated with a new rule must be fully offset by the elimination of existing costs through deregulatory actions. Because the proposed regulatory action is not significant, Executive Order 13771 does not apply.

We have also reviewed this final regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing

regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency “to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.” The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include “identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.”

We are issuing the final priority and requirements only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, and Tribal governments in the exercise of their governmental functions.

In accordance with these Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for

administering the Department’s programs and activities.

Discussion of Potential Costs and Benefits

The Department believes that this regulatory action does not impose significant costs on eligible entities, whose participation in this program is voluntary. While this action does impose some requirements on participating grantees that are cost-bearing, the Department expects that applicants for this program will include in their proposed budgets a request for funds to support compliance with such cost-bearing requirements. Therefore, costs associated with meeting these requirements are, in the Department’s estimation, minimal.

The Department believes that these benefits to the Federal government outweigh the costs associated with this action.

Regulatory Alternatives Considered

The Department believes that the priority and requirements are needed to administer the program effectively.

Paperwork Reduction Act of 1995

The final priority and requirements contain information collection requirements that are approved by OMB under OMB control number 1894–0006; the final priority and requirements do not affect the currently approved data collection.

Regulatory Flexibility Act

Certification: The Secretary certifies that this final regulatory action would not have a significant economic impact on a substantial number of small entities. The U.S. Small Business Administration (SBA) Size Standards define proprietary institutions as small businesses if they are independently owned and operated, are not dominant in their field of operation, and have total annual revenue below \$7,000,000. Nonprofit institutions are defined as small entities if they are independently owned and operated and not dominant in their field of operation. Public institutions are defined as small organizations if they are operated by a government overseeing a population below 50,000.

The small entities that this final regulatory action will affect are SEAs; LEAs, including charter schools that operate as LEAs under State law; institutions of higher education (IHEs); other public agencies; private nonprofit organizations; freely associated States and outlying areas; Indian Tribes or Tribal organizations; and for-profit organizations. We believe that the costs imposed on an applicant by the final priority and requirements will be

limited to paperwork burden related to preparing an application and that the benefits of this proposed priority and these proposed requirements will outweigh any costs incurred by the applicant.

Participation in the Technical Assistance on State Data Collection program is voluntary. For this reason, the final priority and requirements will impose no burden on small entities unless they applied for funding under the program. We expect that in determining whether to apply for Technical Assistance on State Data Collection program funds, an eligible entity would evaluate the requirements of preparing an application and any associated costs, and weigh them against the benefits likely to be achieved by receiving a Technical Assistance on State Data Collection program grant. An eligible entity would probably apply only if it determines that the likely benefits exceed the costs of preparing an application.

We believe that the final priority and requirements will not impose any additional burden on a small entity applying for a grant than the entity would face in the absence of the proposed action. That is, the length of the applications those entities would submit in the absence of the proposed regulatory action and the time needed to prepare an application will likely be the same.

This final regulatory action will not have a significant economic impact on a small entity once it receives a grant because it would be able to meet the costs of compliance using the funds provided under this program.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for this program.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the

Code of Federal Regulations at www.govinfo.gov. At this site you can view this document, as well as all other documents of the Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Johnny W. Collett,

Assistant Secretary for Special Education and Rehabilitative Services.

[FR Doc. 2019-17219 Filed 8-7-19; 4:15 pm]

BILLING CODE 4000-01-P

DEPARTMENT OF EDUCATION

34 CFR Chapter III

[Docket ID ED-2019-OSERS-0001]

Final Priority and Requirements— Technical Assistance on State Data Collection Program—National Technical Assistance Center To Improve State Capacity To Collect, Report, Analyze, and Use Accurate IDEA Part B Data

AGENCY: Office of Special Education and Rehabilitative Services (OSERS), Department of Education.

ACTION: Final priority and requirements.

[Catalog of Federal Domestic Assistance (CFDA) Number: 84.373Y.]

SUMMARY: The Assistant Secretary for Special Education and Rehabilitative Services announces a priority and requirements under the Technical Assistance on State Data Collection Program. The Assistant Secretary may use this priority and these requirements for competitions in fiscal year (FY) 2019 and later years. We take this action to focus attention on an identified national need to provide technical assistance (TA) to improve the capacity of States to meet the data collection and reporting requirements under Part B of the Individuals with Disabilities Education Act (IDEA). This center, CFDA number 84.373Y, will support States in collecting, reporting, and determining how to best analyze and use their data to establish and meet high expectations for each child with a disability and would customize its TA to meet each State's specific needs.

DATES: This priority and these requirements are effective September 11, 2019.

FOR FURTHER INFORMATION CONTACT: Richelle Davis, U.S. Department of Education, 400 Maryland Avenue SW, Room 5025A, Potomac Center Plaza, Washington, DC 20202-5076. Telephone: (202) 245-7334. Email: Richelle.Davis@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

SUPPLEMENTARY INFORMATION:

Purpose of Program: Section 616 of the IDEA requires States to submit to the Department, and make available to the public, a State performance plan (SPP) and an annual performance report (APR) with data on how each State implements both Parts B and C of the IDEA to improve outcomes for infants, toddlers, children, and youth with disabilities. Section 618 of the IDEA requires States to submit to the Department, and make available to the public, quantitative data on infants, toddlers, children, and youth with disabilities who are receiving early intervention and special education services under IDEA. The purpose of the Technical Assistance on State Data Collection program is to improve the capacity of States to meet IDEA data collection and reporting requirements under Sections 616 and 618 of the IDEA to collect, analyze, and report the data used to prepare the SPP/APR. Funding for the program is authorized under section 611(c)(1) of IDEA, which gives the Secretary the authority to reserve up to ½ of 1 percent of the amounts appropriated under Part B for each fiscal year to provide TA activities, where needed, to improve the capacity of States to meet the data collection and reporting requirements under Parts B and C of IDEA. The maximum amount the Secretary may reserve under this set-aside for any fiscal year is \$25,000,000, cumulatively adjusted by the rate of inflation. Section 616(i) of IDEA requires the Secretary to review the data collection and analysis capacity of States to ensure that data and information determined necessary for implementation of section 616 of IDEA are collected, analyzed, and accurately reported to the Secretary. It also requires the Secretary to provide TA, where needed, to improve the capacity of States to meet the data collection requirements, which include the data collection and reporting requirements in sections 616 and 618 of IDEA. Additionally, Division H of the
