B. Background Information

Additional information and a more detailed agenda are electronically available at <https://www.epa.gov/scram/12th-conference-air-quality-modeling>.

C. Conference

The conference will be held in the EPA Auditorium, Room C111, 109 T.W. Alexander Drive, Research Triangle Park, NC 27711.

II. Background

The *Guideline on Air Quality Models (Guideline)*, which is found in Appendix W to 40 CFR (Code of Federal

Regulations) part 51, is used by the EPA, other federal, state, territorial, local, and tribal air quality agencies, and industry to prepare and review new or modified source permits, State Implementation Plan (SIP) submittals or revisions, conformity, and other air quality assessments required under the CAA and EPA regulations. The *Guideline* serves as a means by which national consistency is maintained in air quality analyses for regulatory activities under 40 CFR 51.112, 51.117, 51.150, 51.160, 51.165, 51.166, 52.21, 93.116, 93.123, and 93.150.

The EPA originally published the *Guideline* in April 1978 (EPA-450/2-78-027), and it was incorporated by reference in the regulations for the PSD program in June 1978. The EPA revised the *Guideline* in 1986 (51 FR 32176), and updated it with supplement A in 1987 (53 FR 32081), supplement B in July 1993 (58 FR 38816), and supplement C in August 1995 (60 FR 40465). The EPA published the *Guideline* as appendix W to 40 CFR part 51 when the EPA issued supplement B. The EPA republished the *Guideline* in August 1996 (61 FR 41838) to adopt the CFR system for labeling paragraphs. Subsequently, the EPA revised the *Guideline* on April 15, 2003 (68 FR 18440), to adopt CALPUFF as the preferred model for long-range transport of emissions from 50 to several hundred kilometers (km) and to make various editorial changes to update and reorganize information and remove obsolete models. The EPA further revised the *Guideline* on November 9, 2005 (70 FR 68218), to adopt AERMOD as the preferred model for near-field dispersion of emissions for distances up to 50 km. The publication and incorporation of the *Guideline* into the EPA's Prevention of Significant Deterioration (PSD) regulations satisfies the requirement under CAA section 165(e)(3) for the EPA to promulgate regulations that specify, with reasonable particularity, models to be used under specified sets of conditions for purposes of the PSD program.

On July 29, 2015, the EPA proposed the revisions to the *Guideline* in the **Federal Register** (80 FR 45340). To inform the development of these proposed revisions to the *Guideline* and in compliance with CAA section 320, the EPA held the Tenth Conference on Air Quality Modeling in March 2012. The conference addressed updates on (1) the regulatory status and future development of AERMOD and CALPUFF; (2) review of the Mesoscale Model Interface (MMIF) prognostic meteorological data processing tool for dispersion models; (3) draft modeling

guidance for compliance demonstrations of the fine particulate matter (PM_{2.5}) National Ambient Air Quality Standards (NAAQS); (4) modeling for compliance demonstration of the 1-hour nitrogen dioxide (NO₂) and sulfur dioxide (SO₂) NAAQS; and (5) new and emerging models/ techniques for future consideration under the *Guideline* to address single-source modeling for ozone and secondary PM_{2.5}, as well as long-range transport and chemistry. Based on comments received from stakeholders at the Tenth Modeling Conference, "Phase 3" of the Interagency Workgroup on Air Quality Modeling (IWAQM) was formalized in June 2013 to provide additional guidance for modeling single-source impacts on secondarily formed pollutants (e.g., ozone and PM_{2.5}) in the near-field and for long-range transport. A transcript of the conference proceedings and a summary of the public comments received are available in the docket for the Tenth Modeling Conference (Docket ID No. EPA-HQ-OAR-2012-0056). Additionally, all of the materials associated with this conference are available on the EPA's SCRAM website at <https://www3.epa.gov/ttn/scram/10thmodconf.htm>.

The Eleventh Conference on Air Quality Modeling was held August 12-13, 2015, in continuing compliance with CAA section 320. This conference included the public hearing for the proposed revisions to the *Guideline*. It began with a thorough overview of these proposed revisions, including presentations from EPA staff on the formulation updates to the preferred models and the research and technical evaluations that support these and other revisions. Specifically, there were presentations summarizing the proposed updates to the AERMOD modeling system; replacement of CALINE3 with AERMOD for modeling of mobile sources; incorporation of prognostic meteorological data for use in dispersion modeling; the proposed screening approach for long-range transport for NAAQS and PSD increments assessments with use of CALPUFF as a screening technique rather than an EPA-preferred model; the proposed 2-tiered screening approach to address ozone and PM_{2.5} in PSD compliance demonstrations; the status and role of the Model Clearinghouse; and updates to procedures for single-source and cumulative modeling analyses (e.g., modeling domain, source input data, background data, and compliance demonstration procedures). At the conclusion of these

presentations, the public hearing on the proposed revisions to the *Guideline* was convened. The EPA presentations and the presentations from the public hearing, along with the transcript of the conference proceedings, are available in the docket for the Eleventh Modeling Conference (Docket ID No. EPA-HQ-OAR-2015-0310). Additionally, all of the materials associated with the Eleventh Modeling Conference and the public hearing are available on the EPA's SCRAM website at <https://www3.epa.gov/ttn/scram/11thmodconf.htm>.

The 2015 proposed revisions to the *Guideline* were finalized and published in the **Federal Register** (82 FR 5182) on January 17, 2017. Supporting information on this final rule is available on the EPA's SCRAM website at https://www3.epa.gov/ttn/scram/appendix_w-2016.htm and a direct link to the final rule publication is https://www3.epa.gov/ttn/scram/guidance/guide/appw_17.pdf.

III. Public Participation

The Twelfth Conference on Air Quality Modeling will be open to the public; no admission fee is charged and there is no formal registration. The conference will begin the first morning with introductory remarks by the presiding EPA official. The following topics will be presented:

1. Conference overview;
2. Currently preferred air quality models status and updates;
3. Expert panel discussions and invited presentations on model/technique enhancements:
 - Treatment of low wind conditions
 - Building downwash
 - Mobile source modeling
 - Overwater modeling
 - Prognostic meteorological data
 - Near-field and long-range model evaluation criteria
 - NO₂ modeling techniques
 - Single source O₃ and PM_{2.5} modeling techniques
 - Plume rise;
4. Model Clearinghouse and modeling guidance updates; and
5. Other presentations by the public.

Those wishing to speak at the conference, whether to volunteer a presentation on a special topic or to offer general comment on any of the modeling techniques scheduled for presentation, should contact us at the address given in the **FOR FURTHER INFORMATION CONTACT** section (note the cutoff date). Such persons should identify the organization (if any) on whose behalf they are speaking and the length of the presentation. If a

presentation of general comments is projected to be longer than 10 minutes, the presenter should also state why a longer period is needed. Persons failing to submit a written notice but desiring to speak at the conference should notify the presiding officer immediately before the conference, and they will be scheduled on a time-available basis.

The conference will be conducted informally and chaired by an EPA official. There will be no sworn testimony or cross examination. A verbatim transcript of the conference proceedings will be produced and placed in the docket. Speakers should bring extra copies of their presentation for inclusion in the docket and for the convenience of the recorder. Speakers will also be permitted to enter written comments into the record. Additional written statements or comments should be sent to the OAR Regulatory Docket (see **ADDRESSES** section). A transcript of the proceedings and a copy of all written comments will be maintained in Docket ID No. EPA-HQ-OAR-2019-0454, which will remain open until November 4, 2019, for the purpose of receiving additional comments.

Dated: August 2, 2019.
