

another impairment(s), medically equals a listing.<sup>25</sup>

Epilepsy (listing 11.02) is the most closely analogous listed impairment for an MDI of a primary headache disorder. While uncommon, a person with a primary headache disorder may exhibit equivalent signs and limitations to those detailed in listing 11.02 (paragraph B or D for dyscognitive seizures), and we may find that his or her MDI(s) medically equals the listing.

Paragraph B of listing 11.02 requires dyscognitive seizures occurring at least once a week for at least 3 consecutive months despite adherence to prescribed treatment. To evaluate whether a primary headache disorder is equal in severity and duration to the criteria in 11.02B, we consider: A detailed description from an AMS of a typical headache event, including all associated phenomena (for example, premonitory symptoms, aura, duration, intensity, and accompanying symptoms); the frequency of headache events; adherence to prescribed treatment; side effects of treatment (for example, many medications used for treating a primary headache disorder can produce drowsiness, confusion, or inattention); and limitations in functioning that may be associated with the primary headache disorder or effects of its treatment, such as interference with activity during the day (for example, the need for a darkened and quiet room, having to lie down without moving, a sleep disturbance that affects daytime activities, or other related needs and limitations).

Paragraph D of listing 11.02 requires dyscognitive seizures occurring at least once every 2 weeks for at least 3 consecutive months despite adherence to prescribed treatment, and marked limitation in one area of functioning. To evaluate whether a primary headache disorder is equal in severity and duration to the criteria in 11.02D, we consider the same factors we consider for 11.02B and we also consider whether the overall effects of the primary headache disorder on functioning results in marked limitation in: Physical functioning; understanding, remembering, or applying information; interacting with others; concentrating, persisting, or maintaining pace; or adapting or managing oneself.

9. *How do we consider an MDI of a primary headache disorder in assessing a person's residual functional capacity?*

If a person's primary headache disorder, alone or in combination with another impairment(s), does not medically equal a listing at step three of the sequential evaluation process, we assess the person's residual functional capacity (RFC). We must consider and discuss the limiting effects of all impairments and any related symptoms when assessing a person's RFC.<sup>26</sup> The RFC is the most a person can do despite his or her limitation(s).

We consider the extent to which the person's impairment-related symptoms are consistent with the evidence in the record. For example, symptoms of a primary headache disorder, such as photophobia, may cause a person to have difficulty sustaining attention and concentration. Consistency and supportability between reported symptoms and objective medical evidence is key in assessing the RFC.

### Bureau of International Security and Nonproliferation; Imposition of Additional Sanctions on Russia Under the Chemical and Biological Weapons Control and Warfare Elimination Act of 1991

**SUMMARY:** On August 6, 2018, a determination was made that the Russian government used chemical weapons in violation of international law or lethal chemical weapons against its own nationals. Notice of this determination was published on August 27, 2018 in the **Federal Register**, under Public Notice 10519, which resulted in sanctions against Russia. Section 307(B) of the Chemical and Biological Weapons Control and Warfare Elimination Act of 1991 (CBW Act), requires a decision within three months of August 6, 2018 regarding whether Russia has met certain conditions described in the law. Additional sanctions on Russia are required if these conditions are not met. The Secretary of State decided on November 2, 2018 that Russia had not met the CBW Act's conditions and decided to impose additional sanctions on Russia on March 29, 2019.

**DATES:** This determination is effective on August 26, 2019.
