

Overview of This Information Collection

Title: Application to Establish a Centralized Examination Station.
OMB Number: 1651-0061.

Abstract: A CES is a facility where imported merchandise is made available to CBP officers for physical examination. If a port director decides that a CES is needed, he or she solicits applications to operate a CES. The information contained in the application is used to determine the suitability of the applicant's facility; the fairness of fee structure; and the knowledge of cargo handling operations and of CBP procedures. The names of all corporate officers and all employees who will come in contact with uncleared cargo are also to be provided so that CBP may perform background investigations. The CES application is provided for by 19 CFR 118.11 and is authorized by 19 U.S.C. 1499, Tariff Act of 1930.

Current Actions: CBP proposes to extend the expiration date of this information collection with no change to the burden hours or to the information collected.

Type of Review: Extension (without change).

Affected Public: Businesses.

Estimated Number of Respondents: 50.

Estimated Number of Annual Responses per Respondent: 1.

Estimated Number of Total Annual Responses: 50.

Estimated Time per Respondent: 2 hours.

Estimated Total Annual Burden Hours: 100 hours.

Dated: August 22, 2019.

Seth D. Renkema,

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

SUPPLEMENTARY INFORMATION: The CISA ISD Office of Bombing Prevention (OBP) has a leading role in implementation of the national counter-IED policy, articulated through Presidential Policy Directive 17 (PPD-17) Countering IEDs), serving as the Deputy Administrator of the federal interagency Joint Program Office for Countering Improvised

Explosive Devices (JPO C-IED) and working in close collaboration with the White House National Security Council. The JPO C-IED coordinates and tracks Federal government progress in building national counter-IED capabilities. OBP also leads the DHS in implementation of the national counter-IED policy, serving as the DHS Counter-IED Program Management Office and chairing the DHS IED Working Group.

OBP is instrumental in aligning DHS and national counter-IED efforts through centralized and effective coordination of ongoing programs with national policy and strategy goals, resulting in better resource allocation within OBP and across DHS and our Federal, state, local, tribal, territorial and private sector partners.

TRIPwire (Technical Resource for Incident Prevention) is the DHS online, collaborative information-sharing network for bomb technicians, first responders, military personnel, government officials, intelligence analysts, and select private sector security professionals to increase awareness of evolving IED tactics, techniques, and procedures, as well as incident lessons learned and counter-IED preparedness information.

Users from Federal, State, local, and tribal government entities, as well as business and/or other for-profit industries, can elect to register for TRIPwire access. The TRIPwire portal contains sensitive information related to terrorist use of explosives and therefore user information is needed to verify eligibility and access to the system.

There are three main instruments within this collection: TRIPwire User Registrations, TRIPwire Revalidations, and TRIPwire Questionnaire. The information collected during the TRIPwire user registration process is reviewed electronically by the OBP to validate the user's "need to know," which determines their eligibility for and access to TRIPwire. OBP verifies users need for access by confirming that a valid email address is used to register and checking employment references.

Annually, users are revalidated based on the information provided during their registration. For revalidation, users and employment references receive a system generated email to validate that access is still required and their information is still accurate.

OBP sends registered users a quarterly questionnaire seeking feedback as to how registrants use TRIPwire information, products, and tools. OBP uses the information collected during a quarterly questionnaire to review and improve the effectiveness and adequacy

of the TRIPwire content and system features.

TRIPwire registration is user-driven and is completed electronically via the secure TRIPwire interface. Users are required to have a computer and access to the internet. The registration process requires users to provide their full name, assignment, citizenship, job title, employer name, professional address and contact information, as well as an Employment Verification Contact and their contact information. Notifications regarding the user registration are handled via electronic submission responses and/or email. In addition to electronic registration, TRIPwire uses automated notifications to registered users when/if their account or password is set to expire as well as annual re-verification of users' need for access to TRIPwire.

The TRIPwire Questionnaire is also collected electronically via a Survey Monkey link that is emailed to respondents. The Survey Monkey settings selected ensure that submissions are anonymous, and that an IP address is not collected.

The changes to the collection since the previous OMB approval include: Updating the collection title, updating the TRIPwire User registration page, clarifying the revalidation burden, and adding a TRIPwire Questionnaire. Overall, these changes result in a decrease in burden estimates and costs.

This is a revision and renewal of an information collection.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
