

On February 5, 2019, Commerce initiated the second five-year (sunset) review of the AD and CVD orders on woven sacks from China, pursuant to section 751(c) of the Act.⁶ As a result of its review, Commerce determined that revocation of the AD and CVD orders on woven sacks from China would likely lead to a continuation or recurrence of dumping and countervailable subsidies and, therefore, notified the ITC of the magnitude of the margins and net countervailable subsidy rates likely to prevail should the orders be revoked.⁷ On August 21, 2019, the ITC published its determination, pursuant to section 751(c) of the Act, that revocation of the AD and CVD orders on woven sacks from China would likely lead to a continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.⁸

Scope of the Orders

The merchandise covered by the orders is laminated woven sacks. Laminated woven sacks are bags or sacks consisting of one or more plies of fabric consisting of woven polypropylene strip and/or woven polyethylene strip, regardless of the width of the strip; with or without an extrusion coating of polypropylene and/or polyethylene on one or both sides of the fabric; laminated by any method either to an exterior ply of plastic film such as biaxially-oriented polypropylene (BOPP) or to an exterior ply of paper that is suitable for high quality print graphics;⁹ printed with three colors or more in register; with or without lining; whether or not closed on one end; whether or not in roll form (including sheets, lay-flat tubing, and sleeves); with or without handles; with or without special closing features; not exceeding one kilogram in weight. Woven sacks are typically used for retail

packaging of consumer goods such as pet foods and bird seed.

Effective July 1, 2007, laminated woven sacks are classifiable under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 6305.33.0050 and 6305.33.0080. Laminated woven sacks were previously classifiable under HTSUS subheading 6305.33.0020. If entered with plastic coating on both sides of the fabric consisting of woven polypropylene strip and/or woven polyethylene strip, laminated woven sacks may be classifiable under HTSUS subheadings 3923.21.0080, 3923.21.0095, and 3923.29.0000. If entered not closed on one end or in roll form (including sheets, lay-flat tubing, and sleeves), laminated woven sacks may be classifiable under other HTSUS subheadings including 3917.39.0050, 3921.90.1100, 3921.90.1500, and 5903.90.2500. If the polypropylene strips and/or polyethylene strips making up the fabric measure more than 5 millimeters in width, laminated woven sacks may be classifiable under other HTSUS subheadings including 4601.99.0500, 4601.99.9000, and 4602.90.0000. Although HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the orders is dispositive.

Continuation of the Orders

As a result of the determinations by Commerce and the ITC that revocation of the *Orders* would likely lead to a continuation or recurrence of dumping and countervailable subsidies, as well as material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, Commerce hereby orders the continuation of the AD and CVD orders on woven sacks from China. U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of the continuation of the orders will be the date of publication in the **Federal Register** of this notice of continuation. Pursuant to section 751(c)(2) of the Act, Commerce intends to initiate the next five-year review of the orders not later than 30 days prior to the fifth anniversary of the effective date of continuation.

Notification to Interested Parties

This five-year (sunset) review and this notice are in accordance with section 751(c) of the Act and published pursuant to section 777(i)(1) of the Act.

Dated: August 22, 2019.

Christian Marsh,

Deputy Assistant Secretary for Enforcement and Compliance.

Low Melt Polyester Staple Fiber From the Republic of Korea: Notice of Final Results of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On July 12, 2019, the Department of Commerce (Commerce) initiated, and published the preliminary results of, the changed circumstances review (CCR) of the antidumping duty (AD) order on low melt polyester staple fiber (low melt PSF) from the Republic of Korea (Korea). For these final results, Commerce continues to find that Toray Advanced Materials Korea, Inc. (TAK) is the successor-in-interest to Toray Chemical Korea, Inc. (TCK).

DATES: Applicable August 28, 2019.

FOR FURTHER INFORMATION CONTACT: Alice Maldonado, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-4682.

SUPPLEMENTARY INFORMATION:

Background

On May 23, 2019, TAK requested that, pursuant to section 751(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.216(b), Commerce conduct a CCR of the AD order on low melt PSF from Korea.¹ In its request, TAK argued that it is the successor-in-interest to its wholly-owned subsidiary TCK and, accordingly, Commerce should assign it the cash deposit rate established for TCK.² TAK stated that, in April 2019, TAK merged with TCK and, as a result of the merger, TAK assumed all of TCK's assets, rights, and liabilities.³

On July 12, 2019, Commerce initiated this CCR and concurrently published the notice of preliminary results, determining that TAK is the successor-

in-interest to TCK.⁴ In the *Initiation and Preliminary Results*, we provided all interested parties an opportunity to comment and to request a public hearing regarding our preliminary finding that TAK is the successor-in-interest to TCK.⁵ We received no comments or requests for a public hearing from interested parties within the time period set forth in the *Initiation and Preliminary Results*.⁶

Scope of the AD Order

The merchandise subject to this order is synthetic staple fibers, not carded or combed, specifically bi-component polyester fibers having a polyester fiber component that melts at a lower temperature than the other polyester fiber component (low melt PSF). The scope includes bi-component polyester staple fibers of any denier or cut length. The subject merchandise may be coated, usually with a finish or dye, or not coated.

Low melt PSF is classifiable under the Harmonized Tariff Schedule of the United States (HTSUS) subheading 5503.20.0015. Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of the order is dispositive.

Final Results of Changed Circumstances Review

For the reasons stated in the *Initiation and Preliminary Results*, and because we received no comments from interested parties to the contrary, Commerce continues to find that TAK is the successor-in-interest to TCK. As a result of this determination and consistent with established practice, we find that TAK should receive the cash deposit rate assigned to TCK. Consequently, Commerce will instruct U.S. Customs and Border Protection to suspend entries of subject merchandise produced or exported by TAK at TCK's current cash deposit rate of 16.27 percent.⁷ This cash deposit requirement will be effective on the publication date of our final results and shall remain in effect until further notice.

Notification to Interested Parties

We are issuing this determination and publishing these final results and notice in accordance with sections 751(b)(1)

and 777(i)(1) and (2) of the Act and 19 CFR 351.216(e), 351.221(b), and 351.221(c)(3).

Dated: August 22, 2019.

Christian Marsh,

Deputy Assistant Secretary for Enforcement and Compliance.
