II. Background

On August 14, 2019, FMCSA issued an NPRM concerning amendments to its hours-of-service (HOS) requirements to provide greater flexibility for drivers who are subject to the HOS rules without adversely affecting safety. First, the Agency proposed to change the short-haul exception to the record of duty status (RODS) requirement available to certain commercial motor vehicle (CMV) drivers by lengthening the drivers’ maximum on-duty period from 12 to 14 hours and extending the distance limit within which the driver may operate from 100 air miles (115.08 statute miles) to 150 air miles (172.6 statute miles). Second, the Agency proposed to modify the adverse driving conditions exception by extending by 2 hours the maximum window during which driving is permitted. Third, the Agency proposed to increase flexibility for the 30-minute break rule by requiring a break after 8 hours of driving time (instead of on-duty time), and allowing the requirement to be satisfied by an on-duty break from driving, rather than requiring an off-duty break. Fourth, the Agency proposed to modify the sleeper-berth exception to allow drivers to split their required 10-hours off duty into two periods: One period of at least 7 consecutive hours in the sleeper berth and the other period of not less than 2 consecutive hours, either off duty or in the sleeper berth. Neither period would count against the driver’s 14-hour driving window. Fifth, the Agency proposed to allow one off-duty break of at least 30 minutes, but not more than 3 hours, that would pause a truck driver’s 14-hour driving window, provided the driver takes 10 consecutive hours off-duty at the end of the work shift. The NPRM also posed questions about other HOS-related topics the Agency is considering as part of this rulemaking.

The listening sessions will provide interested persons the opportunity to share their views on these topics with representatives of the Agency.

III. Meeting Participation

The listening sessions are open to the public. Speakers’ remarks will be limited to 10 minutes each. The public may submit material to the FMCSA staff at each session for inclusion in the public docket, FMCSA–2018–0248.

Atlantic Highly Migratory Species; Amendment 12 to the 2006 Consolidated Atlantic Highly Migratory Species Fishery Management Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability; notice of intent; request for comments.

SUMMARY: NMFS announces the availability of a scoping document and its intent to initiate an amendment to the 2006 Consolidated Highly Migratory Species (HMS) Fishery Management Plan (FMP). Given recent revisions to the National Standard guidelines and recent NMFS policy directives, which aim to improve and streamline fishery management procedures to enhance their utility for managers and the public, NMFS has determined it is necessary to: Reassess current HMS FMP objectives to reflect the changing needs of the HMS fisheries, and potentially adopt revised FMP objectives; review stock status determination criteria (SDC) for internationally-managed HMS and adopt such criteria, rather than continue to apply domestic criteria, which at times differ; review the standardized bycatch reporting methodology (SBRM) for certain HMS fisheries and update, if necessary; consider triggers for initiating allocation reviews for quota-managed HMS stocks and adopt such triggers, if appropriate; and consider revising the publication date of the annual HMS Stock Assessment and Fishery Evaluation (SAFE) Report and adopt such revision. The goal of the scoping document is to examine potential options and modify domestic HMS fishery management measures to be consistent with the national standards guidelines and recent NMFS policy directives, and to request additional information and input from consulting parties and the public prior to development of Amendment 12 to the 2006 Consolidated Atlantic HMS FMP.

DATES: One webinar will be held on October 9, 2019. See SUPPLEMENTARY INFORMATION for webinar date and instructions. NMFS requests receipt of any comments on the scoping document by November 4, 2019.

ADDRESSES: You may submit comments on the scoping document, identified by NOAA–NMFS–2019–0096, by any of the following methods:

• Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#/docketDetail?D=NOAA-NMFS-2019-0096, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

• Mail: Submit written comments to Rick Pearson, NMFS/SF1, 263 13th Avenue South, Saint Petersburg, FL 33701.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and generally will be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).
