II. Information About the Document

Two sections of the Clean Air Act (CAA) govern the establishment and revision of the NAAQS. Section 108 (42 U.S.C. 7408) directs the Administrator to identify and list certain air pollutants and then to issue air quality criteria for those pollutants. The Administrator is to list those air pollutants that in his “judgment, cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare”; “the presence of which in the ambient air results from numerous or diverse mobile or stationary sources”; and “for which . . . [the Administrator] plans to issue air quality criteria . . .” (42 U.S.C. 7408(a)(1)(A)–(C)). Air

quality criteria are intended to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air . . .” (42 U.S.C. 7408(a)(2)). Under section 109 (42 U.S.C. 7409), the EPA establishes primary (health-based) and secondary (welfare-based) NAAQS for pollutants for which air quality criteria are issued. Section 109(d) requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria. Section 109(d)(2) requires that an independent scientific review committee “shall complete a review of the criteria . . . and the national primary and secondary ambient air quality standards . . . and shall recommend to the Administrator any new . . . standards and revisions of the existing criteria and standards as may be appropriate . . .” Since the early 1980s, this independent review function has been performed by the Clean Air Scientific Advisory Committee (CASAC).

Presently, the EPA is reviewing the air quality criteria and NAAQS for PM. The EPA’s overall plan for this review is presented in the *Integrated Review Plan for the National Ambient Air Quality Standards for Particulate Matter* (IRP).¹ A draft of the *Integrated Science Assessment for Particulate Matter* (ISA)² was reviewed by the CASAC at a public meeting in December 2018 (83 FR 55529, November 6, 2018) and discussed on a public teleconference in March 2019 (84 FR 8523, March 8, 2019). The draft PA announced today draws from the scientific evidence assessed in the draft ISA, together with the results of air quality and other quantitative analyses, as available. When final, the PA is intended to “bridge the gap” between the scientific and technical information available in the review and the judgments required of the Administrator in determining whether to retain or revise the existing PM NAAQS. The draft PA will be available on or about September 4, 2019,

on the EPA's website at <https://www.epa.gov/naaqs/particulate-matter-pm-air-quality-standards>.

The EPA is soliciting advice and recommendations from the CASAC by means of a review of the draft PA at an upcoming public meeting. Information about this public meeting, including the dates and location, will be published as a separate notice in the **Federal Register**. Following the CASAC meeting, the EPA will consider comments received from the CASAC and the public in preparing revisions to the draft PA.

The documents briefly described above do not represent, and should not be construed to represent, any final EPA policy, viewpoint, or determination. The EPA will consider any public comments submitted in response to this notice when revising the draft PA.

Director, Office of Air Quality Planning and Standards.

Underground Injection Control Program; Hazardous Waste Injection Restrictions; Petition for Exemption Reissuance—Class I Hazardous Waste Injection; TM Deer Park Services (TMDPS) Limited Partnership Deer Park, Texas Facility

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of a final decision on a UIC no migration petition reissuance.

SUMMARY: Notice is hereby given that a reissuance of an exemption to the Land Disposal Restrictions, under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act, has been granted to TMDPS for three Class I hazardous waste injection wells located at their Deer Park, Texas facility. The company has adequately demonstrated to the satisfaction of the Environmental Protection Agency (EPA) by the petition reissuance application and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by TMDPS of the specific restricted hazardous wastes

identified in this exemption reissuance request, into Class I hazardous waste injection wells WDW-169, WDW-249 and WDW-422 until December 31, 2030, unless the EPA moves to terminate this exemption. Additional conditions included in this final decision may be reviewed by contacting the EPA Region 6 Ground Water/UIC Section. A public notice was issued June 19, 2019, and the public comment period closed on August 12, 2019, and no comments were received. This decision constitutes final Agency action and there is no Administrative appeal.

Proposed Settlement Agreement, Challenge to Clean Air Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended ("CAA" or the "Act"), notice is hereby given of a proposed settlement agreement to resolve petitions for review filed by United States Steel Corporation ("U.S. Steel") with respect to U.S. Steel's Minntac taconite facility, involving several actions taken by EPA with regard to nitrogen oxide (NO_x) emission limits for Minntac. On November 29, 2013, June 13, 2016, and February 1, 2018, U.S. Steel filed petitions in the United States Court of Appeals for the Eighth Circuit challenging EPA's 2013 Regional Haze (RH) Federal Implementation Plan (FIP) for Minnesota and Michigan; 2013 RH State Implementation Plan (SIP) partial disapprovals for Michigan and Minnesota; 2016 revised RH FIP for Michigan and Minnesota; and EPA's denial of U.S. Steel's petitions for reconsideration of the 2013 FIP, 2013 SIP partial disapprovals, and 2016 revised FIP. The Settlement Agreement would resolve U.S. Steel's challenges to these actions, with respect to Minntac. Under the proposed settlement agreement, the parties agree to take certain specified actions.

DATES: Written comments on the proposed settlement agreement must be received by October 11, 2019.
