

water source for livestock and wildlife while recharging the aquifer. The remaining portion of dewatering water would be piped to the RIBs.

Under the No Action Alternative, the plan modification would not be authorized and the activities described under the Proposed Action would not occur. MMC would continue mining activities as authorized in their current Plan, dated November 6, 2013, with closure in 2027, followed by approximately three years of reclamation.

Amendments to two associated rights-of-ways (ROWs) needed to accommodate the proposed mine changes are also evaluated in the EIS. These ROWs include relocation of a portion of the county road called Buffalo Valley Road and of a portion of the existing 120-kV power line (ROW held by NV Energy).

A Notice of Availability (NOA) of the Draft EIS for the proposed Mackay Project was published in the **Federal Register** on May 20, 2019 (FR Doc No: 2019-10473). Two open house public meetings were held during the comment period. The BLM received 13 letters with 186 public scoping comments during the 45-day comment period. Five of the letters contained substantive comments which included concerns on potential impacts to existing fissures on Interstate 80, stability of the pit and waste rock storage facility adjacent to the county road, the California Trail, groundwater quality, pit lake quality, springs and associated wetlands, and eagles. These comments were considered and addressed in Appendix I (Draft Environmental Impact Statement Public Comments and Responses) of the Final EIS.

Comments on the Draft EIS received from the public and internal BLM review were considered and incorporated as appropriate into the Final EIS. Public comments resulted in the addition of clarifying text, but did not significantly change the proposed action.
