Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including

whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The purpose of this information collection is to survey stakeholders currently using the EPA's Office of Research and Development's (ORD) scientific research products to increase transparency and public participation, and to ascertain the quality, usability, and timeliness of the research products. ORD will collect these data to inform the annual end of year performance reporting to the Office of Management and Budget (OMB) that will be published each year in the Annual Performance Report (APR), which is part of the President's Budget Request and mandated under the Government Performance and Results Act (GPRA). The survey results will be used to estimate the degree to which ORD research products meet customer needs and will enable the improvement of the development and delivery of products.
