

improve future censuses. The primary sampling unit is the Basic Collection Unit, which is the smallest unit of collection geography for 2020 Census listing operations, usually a block. In addition, a Basic Collection Unit is the building block for field area delineations and other geographic delineations. As in the past, including the 2010 Census Coverage Measurement program, the Post-Enumeration Survey operations and activities must be conducted separate from and independent of the other 2020 Census operations.

During the Independent Listing operation, field staff, referred to as "listers," will canvass in their assigned Basic Collection Units every street, road, or other place where people might live and construct a list of housing units from scratch. Once the listing for each Basic Collection Unit is complete, the addresses are computer and clerically matched to the 2020 Census addresses in the Initial Housing Unit Matching operation. Addresses that remain unmatched or have unresolved address status after matching will be sent to the Initial Housing Unit Follow-up operation, during which listers collect additional information that might allow a resolution of any differences between the Independent Listing and the preliminary census address list results. Matching to a preliminary census file of housing units allows the Post-Enumeration Survey to conduct person interviews close to census day (April 1, 2020), rather than waiting until the final census list is available, after the delivery of apportionment data in December 2020. In the Final Housing Unit Matching operation, addresses collected in the Independent Listing operation are matched to the final census list of housing units. The Initial Housing Unit Follow-up field operation seeks to answer questions needed to resolve the match or enumeration status of addresses identified in the Initial Housing Unit matching operation, while the Final Housing Unit Follow-up field operation seeks to answer similar questions identified in the Final Housing Unit matching operation.

Addresses identified for both Initial and Final Housing Unit Follow-ups will generally need additional information to determine housing unit status (for example, to clarify if the addresses refer to a housing unit or commercial building and to identify duplicate addresses) or to resolve inconsistencies between the Post-Enumeration Survey and census addresses. Using paper questionnaires tailored to capture information needed to resolve each specific status question or discrepancy,

listers will contact a member of each housing unit and ask questions to resolve housing unit status or to clarify discrepancies. If the listers do not find anyone at home after several attempts, they will try to collect the information from a proxy or by observation as a last resort. Proxies are respondents who are not members of the household.

The Initial and Final Housing Unit Follow-up operations will also have separate quality control operations. The first quality control operation is the Initial Housing Unit Follow-up Quality Control, which contains 15 percent of the Initial Housing Unit Follow-up workload. The second quality control operation is the Final Housing Unit Follow-up Quality Control, which contains 15 percent of the Final Housing Unit Follow-up workload. These operations are implemented to ensure that the work performed is of acceptable quality.

*Affected Public:* Individuals or Households.

*Frequency:* One Time.

*Respondent's Obligation:* Mandatory.

*Legal Authority:* Title 13, U.S. Code, Sections 141 and 193.

### Foreign-Trade Zones Board

[B-36-2019]

#### **Foreign-Trade Zone (FTZ) 7—Mayaguez, Puerto Rico; Authorization of Production Activity; Bristol-Myers Squibb Holdings Pharma, Ltd.; (Pharmaceuticals); Manati, Puerto Rico**

On May 13, 2019, Bristol-Myers Squibb Holdings Pharma, Ltd. submitted a notification of proposed production activity to the FTZ Board for its facility within FTZ 7, in Manati, Puerto Rico.

The notification was processed in accordance with the regulations of the

FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (84 FR 23759—23760, May 23, 2019). On September 10, 2019, the applicant was notified of the FTZ Board's decision that no further review of the activity is warranted at this time. The production activity described in the notification was authorized, subject to the FTZ Act and the FTZ Board's regulations, including Section 400.14.

Dated: September 16, 2019.
