**SUPPLEMENTARY INFORMATION:** DOE published a Request for Information (RFI) pertaining to the energy conservation standards for unfired hot water storage tanks on August 9, 2019. 84 FR 39220. The RFI initiated a data collection process to consider whether to amend DOE's current uniform national standards for unfired hot water storage tanks, and whether amending the standards for unfired hot water storage tanks would result in significant

additional conservation of energy and be technologically feasible and economically justified. DOE requested written comment, data, and information pertaining to these standards by September 23, 2019.

On September 13, 2019, AHRI, an interested party in the matter, requested a sixty-day extension of the public comment period for the RFI that DOE previously published in the **Federal Register** on August 9, 2019.<sup>1</sup> More specifically, AHRI requested additional time to analyze data, possibly conduct further testing, and prepare comments.

After carefully considering this request, DOE has determined that a reopening of the comment period to allow additional time for interested parties to submit comments is appropriate. Therefore, DOE is reopening the comment period and will accept comments received on and before October 30, 2019, to provide interested parties additional time to prepare and submit comments. Accordingly, DOE will consider any comments received by this date, to be timely submitted.

Signed in Washington, DC, on September 23, 2019.
