This notice invites public and agency input to ongoing planning efforts for the Project through commenting on the draft purpose and need, and potential impacts or concerns associated with the Project. The Proposed Project is being evaluated in an environmental impact statement under the New York State Environmental Quality Review Act (SEQRA), and public scoping for the SEQRA process is taking place concurrently with this NEPA early scoping. Should the Project receive FTA funding, FTA intends to use this early scoping process to satisfy the formal NEPA scoping.

**SUPPLEMENTARY INFORMATION:** This notice invites the public to comment on a statement of the Purpose and Need for the Project, the Project study area, potential impacts, and potential alternatives. This notice also invites the public to review and comment on reports previously developed by local planning and transportation agencies that support the focus to further study new BRT service for the North and West Shores.

Early scoping is an optional early step in the NEPA process, which begins when FTA issues a notice of intent to prepare an environmental impact statement (EIS). Early scoping is intended to generate public and agency review and comments on the scope of a planning effort within a defined transportation corridor, the project’s purpose and need, potential alternatives, study area, potential social, economic, and environmental impacts, and prior studies before formally preparing an EIS. Early scoping can ensure that the public and interested agencies are given the opportunity to review and provide comments on the results of planning activities that can then be used to inform the NEPA process. Early scoping is intended to identify the most reasonable alternatives to undergo NEPA environmental review.
