FOR FURTHER INFORMATION CONTACT:

Seleda Perryman or Theda Kenney, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, telephone (202) 693-2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of a continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance process to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, the reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and

Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (see 29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with a minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining said information (see 29 U.S.C. 657).

The Respirable Crystalline Silica Standards for general industry and maritime (29 CFR 1910.1053) and construction (29 CFR 1926.1053) contain the following information collection requirements: Conducting worker exposure assessments and notifying workers of the assessment results and any corrective actions being taken; establishing, implementing, reviewing, evaluating, and updating a written exposure control plan and making the plan available to workers and designated representatives; creating and submitting air quality permit notifications; establishing a respiratory protection program; providing qualitative fit-testing and maintaining records; providing medical surveillance to workers; providing the physician or other licensed health care provider (PLHCP), or the specialist, with specific information; ensuring that the PLHCP, or specialist, explains the results of the medical examination to the employee and provides each employee with a copy of their written medical report; obtaining a written medical opinion from the PLHCP, or specialist, and ensuring that each employee receives a copy of the opinion; and making and maintaining air monitoring data, objective data, and medical surveillance records; and providing workers and designated representatives with access to these records. The records are used by workers, employers, and OSHA to determine the effectiveness of the employer's compliance efforts.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;

- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply—for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Respirable Crystalline Silica Standards for General Industry, Maritime and Construction. The agency requests approval for an adjustment increase of 347,653 burden hours (from 12,118,364 to 12,466,017). The requested adjustment increase is associated with the agency's correction of several administrative errors in the previous ICR. Specifically, the adjustment would include additional burden hours for the development and updating of the written exposure control plan associated with medium-sized general industry establishments. In addition, the adjustment would add additional burden hours for employers to provide information to a physician or other licensed health care professional in association with employee periodic medical examinations. These burden hours were displayed in the previous ICR spreadsheets as costs incurred after the initial year of standard implementation, but were not included in the burden hour totals in the previous ICR. The adjustment also would add additional burden hours for managers to ensure worker receipt of the PLHCP and specialist's written medical report and distribute the PLHCP and specialist's written medical opinion to workers and the employer in association with employee initial, periodic, and additional medical examinations. The request seeks approval to maintain all other previously approved burden hours.

The agency also requests approval to maintain the previously approved operation and maintenance costs of \$393,789,901.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–409 and 72–046; EA–19–077; NRC–2019–0110]

In the Matter of Dairyland Power Cooperative; La Crosse Boiling Water Reactor

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Direct transfer of license; order.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an order approving the direct transfer of Possession Only License No. DPR–45 for the La Crosse Boiling Water Reactor (LACBWR), with respect to NRC-licensed possession, maintenance, and decommissioning authorities, from the current holder, LaCrosseSolutions, LLC (LS), to Dairyland Power Cooperative (DPC), which held these authorities prior to transferring them to LS on June 1, 2016, and which is currently the licensed owner of LACBWR. The NRC is also amending the facility operating license for administrative purposes to reflect the license transfer from LS to DPC. The NRC determined that DPC is qualified to be the holder of the license and that the transfer of the license is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission. The Order approving the transfer of the LACBWR license to DPC became effective on September 24, 2019.

DATES: The Order was issued on September 24, 2019, and is effective for one year.
