National Drug Control Policy, attention: [Jayme\\_A\\_Delano@ondcp.eop.gov](mailto:Jayme_A_Delano@ondcp.eop.gov). Formal requests for additional plans and instruments must be in writing. Copies of documents submitted to OMB and other information is available from Ms. Delano who may be contacted at 202-395-6794.

**SUPPLEMENTARY INFORMATION:** The Office of National Drug Control Policy desires to learn how adult drug courts are responding to the opioid epidemic. To do so, they propose to conduct a survey of State/Territory Drug Court Coordinators to learn more about adult drug courts' efforts to serve persons suffering from opioid use disorders, focusing particularly on the use of medication-assisted treatment (MAT). An earlier survey from 2012 found that nearly half of drug courts were not using MAT or had blanket prohibitions against methadone or buprenorphine. At the same time, ONDCP funded a suite of resources to increase uptake of MAT in treatment courts, including online and in-person training workshops, practitioner fact sheets, pocket guides for staff members and participants, professional tool kits, and sample policies and procedures materials. The proposed survey will examine statewide MAT efforts, and policies and procedures concerning MAT, including whether there have been recent changes in state certification requirements, training modules, or funding mandates to increase MAT adoption.

**SUPPLEMENTARY INFORMATION:** The Office of National Drug Control Policy desires to learn how adult drug courts are responding to the opioid epidemic. To do so, we propose to conduct a survey of 269 drug courts in the counties with the highest total opioid-related overdoses and the highest opioid-related overdose rates. The aim of the survey is to learn more about adult drug courts' efforts to serve persons suffering from opioid use disorders, focusing particularly on the use of medication-assisted treatment (MAT). An earlier survey from 2012 found that nearly half of drug courts were not using MAT or had blanket prohibitions against methadone or buprenorphine.
