SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the Job Openings and Labor Turnover Survey (JOLTS). JOLTS collects data on job vacancies, labor hires, and labor separations. The data can be used as demand-side indicators of labor shortages. These indicators of labor shortages at the national level greatly enhance policy makers' understanding of imbalances between the demand and supply of labor. Presently there is no other economic indicator of labor demand with which to assess the presence of labor shortages in the U.S. labor market. The availability of unfilled jobs is an important measure of tightness of job markets, symmetrical to unemployment measures. 29 U.S.C. Chapter 1 part 2 authorizes this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB, under the PRA, approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1220–0170. The current approval is scheduled to expire on September 30, 2021. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on July 31, 2019 (84 FR 37350).

Occupational Safety and Health Administration

[Docket No. OSHA-2019-0007]

Online Delivery of OSHA's Outreach Training Program 10- and 30-Hour Courses

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for information.

SUMMARY: OSHA requests information, comments, and documents that would

assist the agency in determining whether to adopt a new online delivery model for OSHA's Outreach Training Program. The OSHA Outreach Training Program is a hazard awareness training program that educates participants on the recognition, abatement, and prevention of job-related hazards in the construction, general, and maritime industries, and at disaster sites. The potential new model would be limited to OSHA's 10- and 30-hour Outreach courses for the construction, general, and maritime industries. The new model would not include the disaster site worker training program. OSHA plans to use the information collected from this request to determine whether the new model would address issues associated with the existing model. If the new model were implemented, the agency would develop policies and procedures for the online Outreach Training Program courses to ensure that online providers meet OSHA's expectations for program quality and consistency.
