National Agricultural Statistics Service

Title: Agricultural Resource Management, Chemical Use, and Post-Harvest Chemical Use Surveys.

OMB Control Number: 0535–0218.

Summary of Collection: The primary functions of the National Agricultural Statistics Service (NASS) are to prepare and issue State and national estimates of crop and livestock production, disposition, and prices and to collect information on related environmental and economic factors. Detailed economic and environmental data for various crops and livestock help to maintain a stable economic atmosphere and reduce the risk for production, marketing, and distribution operations. The Agricultural Resource Management Surveys (ARMS), are the primary source of information for the U.S. Department of Agriculture on a broad range of issues related to agricultural resource use, cost of production, and farm sector financial conditions. NASS uses a variety of survey instruments to collect the information in conjunction with these studies. General authority for these data collection activities is granted under U.S. Code Title 7, Section 2204.

Need and Use of the Information: ARMS is the only annual source of whole farm information available for objective evaluation of many critical issues related to agriculture and the rural economy, such as: Whole farm finance data, marketing information, input usage, production practices, and crop substitution possibilities. Without these data, decision makers cannot analyze and report on critical issues that affect farms and farm households when pesticide regulatory actions are being considered.

Number of Respondents: 131,619.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 105,774.
