**SUPPLEMENTARY INFORMATION:**

*I. Overview:* Porsche has determined that certain MY 2008–2019 Porsche Cayenne and Macan motor vehicles do not fully comply with paragraphs S4.4.2(a) and S4.4.2(c) of FMVSS No. 110, *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 kilograms (10,000 pounds) or Less* (49 CFR 571.110). Porsche filed a noncompliance report dated March 28, 2019, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports*, and subsequently petitioned NHTSA on April 20, 2019, for an exemption from the notification and remedy requirements of 49 U.S.C. *III. Noncompliance:* Porsche explains that the noncompliance is that the subject vehicles are equipped with rims that do not contain the required rim markings as specified in paragraph S4.4.2 of FMVSS No. 110. Specifically, the rims on the subject vehicles do not contain the designation symbol “E” as required by paragraph S4.4.2(a) of FMVSS No. 110 and the certification symbol “DOT” as required by paragraph S4.4.2(c) of FMVSS No. 110.

*IV. Rule Requirements:* Paragraphs S4.4.2(a) and S4.4.2(c) of FMVSS 110, include the requirements relevant to this petition. Each rim or, at the option of the manufacturer in the case of a single-piece wheel, each wheel disc shall be marked with the designation that indicates the source of the rim’s published nominal dimensions, specifically, “E” indicating The European Tyre and Rim Technical Organization and the symbol DOT, constituting a certification by the manufacturer of the rim that the rim complies with all applicable FMVSS.

*V. Summary of Petition:* Porsche described the subject noncompliance and stated its belief that the noncompliance is inconsequential as it relates to motor vehicle safety.

In support of its petition, Porsche submitted the following reasoning:

1. With respect to FMVSS No. 110, paragraph S4.4.2(c), the DOT marking signifies that the manufacturer of the rim has certified that the rim complies with all applicable FMVSSs. As the DOT marking is a “certification,” it is a violation of 49 U.S.C. 30115 (“Certification”), which does not require

notification or remedy. Porsche asserts that this is consistent with NHTSA’s prior decision on petitions for the same issue. (*See* 74 FR 69376).

2. With respect to FMVSS No. 110, paragraph S4.4.2(a), Porsche believes that the omission of the designation symbol “E” will not prevent the proper matching of tires and rims because sufficient information about rim size is available from other markings on the rim and the corresponding owner’s manual instructions. More specifically, Porsche states, the rims are marked correctly with the size designation; the correct tire size information is listed on the Tire and Loading Information placard, and the tire size is marked on the tire sidewall. The vehicles’ Certification label also contains the correct tire and rim sizes. Importantly, the omitted marking does not affect the ability to identify the rims in the event of a recall and is not likely to have any effect on motor vehicle safety. Porsche asserts that this is again consistent with NHTSA’s prior decision on petitions for the same. (*See* 74 FR 69376).

3. The tire and rim of the affected spare wheels are properly matched, and are appropriate for the load-carrying characteristics of the subject vehicle. Porsche asserts that the incorrect association marking has no effect on the performance of the tire/rim combination.

4. The subject tire/rim assembly meets paragraph S4.4.1(b) rapid air loss requirement of FMVSS No. 110. All other applicable requirements of FMVSS Nos. 109 and 110 have been met.

5. Lastly, Porsche is unaware of any accidents, injuries, or customer complaints related to the omitted markings.

Porsche’s complete petition and all supporting documents are available by logging onto the Federal Docket Management System (FDMS) website at <https://www.regulations.gov> and by following the online search instructions to locate the docket number as listed in the title of this notice.

Porsche concluded by expressing the belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety, and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the

duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that Porsche no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after Porsche notified them that the subject noncompliance existed.
