

5. Are there data on the likelihood that some drivers may find that they are unable to use the CMS, but will not know this at the time of sale? Should NHTSA require that exempted vehicles include a warning label to inform potential customers of this possibility?

6. The field of view defined by S5.2.1 of FMVSS No. 111 for driver's side outside mirrors differs from the field of view defined by ECE R46 for Class III mirrors (Class III is the mirror class for which Audi's CMS has received type approval according to the documents submitted with the petition).²² In view of these differences, what weight should NHTSA give Audi's statement that the CMS complies with R46? Relatedly, what are the testing situations unique to the US market to which the petition refers?

7. How and to what extent should NHTSA consider in its safety analysis the inclusion of safety features that provide the driver with non-visual information about the driving environment (e.g., blind spot detection)?

8. How should NHTSA consider the incomplete VTTI study cited in the petition, especially given that the study has not yet produced results?

9. To inform possible future rulemaking activities in this area to permit CMS on all vehicles in place of mirrors, if NHTSA were to grant Audi an exemption, should the agency condition the exemption on submitting reports on the on-road experiences of Audi's vehicles? If so, what information should Audi be required to report?

IV. Comment Period

The agency has not made any judgment on the merits of the petition, and is placing a copy of the petition and supporting information in the docket.

The agency seeks comment from the public on the merits of Audi's petition for a temporary exemption from paragraphs FMVSS No. 111, "Rear Visibility". We are providing a 30-day comment period. After considering the petition, the public comments and other available information, we will publish a notice of final action on the petition in the **Federal Register**.

²² FMVSS 111, S5.2.1 states that passenger car mirrors must provide a view of the road that is 2.4 meters wide when measured 10.7 meters behind the mirror. ECE R46, 15.2.4.3 states that a Class III mirror must provide a view of the road that is 4 meters wide when measured 20 meters back from the mirror, and 1 meter wide when measured 4 meters back from the mirror. Overall, these differences mean that the required field of view for the driver's side mirror under FMVSS 111 is narrower than the required field of view for a driver's side Class III mirror under ECE R46 when measured close to the mirror, but wider than ECE R46 when measured further back from the mirror.

Issued in Washington, DC, under authority delegated in 49 CFR 1.95 and 501.4.

James Clayton Owens,

Acting Administrator.
