

collection was previously published in the **Federal Register** (84 FR 41729) on August 15, 2019, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Electronic Visa Update System.
OMB Number: 1651-0139.

Form Number: N/A.

Current Actions: This submission is being made to extend the expiration date of this information collection with no changes to the burden hours or the information collected.

Type of Review: Extension (with no change).

Affected Public: Individuals.

Abstract: The Electronic Visa Update System (EVUS) allows for the collection of biographic and other information from nonimmigrant aliens who hold a passport issued by an identified country containing a U.S. nonimmigrant visa of a designated category. Nonimmigrant aliens subject to this requirement must periodically enroll in EVUS and obtain a notification of compliance with EVUS prior to travel to the United States. The EVUS requirement is currently limited to nonimmigrant aliens holding unrestricted, maximum validity B-1 (business visitor), B-2 (visitor for pleasure), or combination B-1/B-2 visas contained in a passport issued by the People's Republic of China.

EVUS provides for greater efficiencies in the screening of international

travelers by allowing DHS to identify nonimmigrant aliens who may be inadmissible before they depart for the United States, thereby increasing security and reducing traveler delays upon arrival at U.S. ports of entry. EVUS aids DHS in facilitating legitimate travel while also enhancing public safety and national security.

Recent Changes

On November 27, 2017, the Secretary of State designated DPRK, as a State Sponsor of Terrorism, or SST. Countries determined by the Secretary of State "to have repeatedly provided support for acts of international terrorism" are considered to have been designated as "state sponsors of terrorism."

To meet the requirements and intent of the law and in light of the designation of DPRK as a SST, DHS is strengthening the security of the United States through enhancements to the EVUS enrollment.

Under the Emergency Clearance request process DHS has recently added DPRK to the following question to EVUS "Have you traveled to, or been present in Iran, Iraq, Syria, Sudan, Libya, Somalia, Yemen, or the Democratic People's Republic of Korea (North Korea) on or after March 1, 2011? If yes, provide the country, date(s) of travel, and reason for travel."

Estimated Number of Respondents: 3,595,904.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 3,595,904.

Estimated Time per Response: 25 minutes.

Estimated Total Annual Burden Hours: 1,499,492.

IP Gateway User Registration

AGENCY: Infrastructure Security Division (ISD), Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

ACTION: 30-Day notice and request for comments; revision, 1670-0009.

SUMMARY: DHS CISA ISD will submit the following information collection request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of

1995. CISA previously published this ICR for a 60-day public comment period. No comments were received by CISA. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are due by November 20, 2019.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, OMB. Comments should be addressed to the OMB Desk Officer, Department of Homeland Security and sent via electronic mail to dhsdeskofficer@omb.eop.gov. All submissions must include the words "Department of Homeland Security" and the OMB Control Number 1670-0009.

Comments submitted in response to this notice may be made available to the public through relevant websites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

SUPPLEMENTARY INFORMATION: The Homeland Security Presidential Directive-7, Presidential Policy Directive-21, and the National Infrastructure Protection Plan highlight the need for a centrally managed repository of infrastructure attributes capable of assessing risks and facilitating data sharing. To support this mission need, the DHS CISA IDS has developed the IP Gateway. The IP Gateway contains several capabilities which support the homeland security mission in the area of critical infrastructure (CI) protection.

The purpose of this collection is to gather the details pertaining to the users of the IP Gateway for the purpose of creating accounts to access the IP Gateway. This information is also used to verify a need to know to access the IP Gateway. After being vetted and granted access, users are prompted and required to take an online training

course upon first logging into the system. After completing the training, users are permitted full access to the system. In addition, this collection will gather feedback from the users of the IP Gateway to determine any future system improvements.

The information gathered will be used by the CISA IP Gateway Program Management Team to vet users for a need to know and grant access to the system. As part of the registration process, users are required to take a one-time online training course. When logging into the system for the first time, the system prompts users to take the training courses. Users cannot opt out of the training and are required to take the course in order to gain and maintain access to the system. When users complete the training, the system automatically logs that the training is complete and allows full access to the system.

Additionally, CISA uses a Utilization Survey to assess the current functionality of the IP Gateway as well as identify any further capabilities to be developed. Through this process, the IP Gateway will remain a viable solution for the stakeholders. This survey is available to users as an ideal way to consolidate end user satisfaction feedback and gather undeveloped capabilities that would aid in the expansion and functionality of the IP Gateway.

The collection of information uses automated electronic forms. During the online registration process, there is an electronic form used to create a user account and an online training course required to grant access.

The survey is electronic and includes questions that measure the satisfaction of the user as well as a section to capture any improvements that the user would like to see added and/or corrected. This voluntary survey is available by clicking a link labeled "User Survey" on the IP Gateway landing page. By clicking on this link, the user is then provided the electronic form for them to complete and submit.

The changes to the collection since the previous OMB approval include: Updating the title of the collection, decrease in burden estimates and decrease in costs. The total annual burden cost for the collection has decreased by \$31,909, from \$37,230 to \$5,321 due to a decrease in registrations, as registration is a one-time burden. The total number of responses has decreased by 1,150 from 1,500 to 350 since most users are already registered for the system as well as making updates for the number of survey responses received. The annual government cost

for the collection has decreased by \$95,188 from \$107,857 to \$12,668, due to removing the costs associated with designing the survey.

This is a revision and renewal of an information collection.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Title of Collection: IP Gateway User Registration.
