

existing regulation means that most shows would require two drivers, significantly increasing the cost of the fireworks display.

The applicants assert that without the extra duty period provided by the exemption, safety would decline as firework drivers would be unable to return to their home base following each show should they have fireworks remaining after the display. Drivers would be forced to park the CMVs carrying Division 1.3G and 1.4G products in areas less secure than the motor carrier's home base.

#### IV. Method To Ensure an Equivalent or Greater Level of Safety

To ensure an equivalent level of safety, the applicant offers short distance driving from the distribution point to the site of the fireworks display, no more than 150 miles. Drivers have several hours of off duty in the late afternoon and early evening the day of the event. In addition, drivers drive in the early morning during light traffic. Lastly, the applicant states that they have not been involved in any reportable accidents while operating under terms and conditions of the same exemption granted to the previous owner of the company.

A copy of the application for exemption is available for review in the docket for this notice.
