II. Background

This interim staff guidance (ISG) is intended to provide guidance for NRC staff reviewing applications involving fuel products with chromium-coated zirconium alloy cladding. For coated claddings of this type, a phenomena identification and ranking table (PIRT) was generated for the NRC by Pacific Northwest National Laboratory; the guidance provided in this ISG extensively references the PIRT report, "Degradation and Failure Phenomena of Accident Tolerant Fuel Concepts: Chromium Coated Zirconium Alloy Cladding," issued June 2019. The

suggested cladding properties specified acceptable fuel design limits and new failure mechanisms sections from the PIRT are replicated in Appendices B and C. These appendices supersede Sections 5.1 and 5.2 of the PIRT report.

This ISG is not intended as stand-alone review guidance, but instead supplements NUREG-0800, "Standard Review Plan," Section 4.2, "Fuel System Design," and discusses the potential impact of coated claddings on reviews performed under Standard Review Plan (SRP), Section 4.3, "Nuclear Design," Section 4.4, "Thermal and Hydraulic Design," and Chapter 15, "Transient and Accident Analysis." In addition to the guidance provided in this ISG, reviewers of coated cladding applications should familiarize themselves with the PIRT report and with the relevant sections of the SRP.

The PIRT report and this ISG focus primarily on metallic chromium coatings applied to a zirconium alloy base metal, with some additional discussion that is applicable to chromium-based ceramic coatings. Reviewers of submittals on ceramic chromium-coated zirconium alloy claddings should carefully read the PIRT to determine the applicability to the review.

This ISG does not apply to reviews of fuel products other than metallic or ceramic chromium-based coatings on a zirconium alloy substrate.

Dated at Rockville, Maryland, this 18th day of October, 2019.

Pursuant to its authority under section 5051 of Public Law 100-203, Nuclear Waste Policy Amendments Act (NWPAA) of 1987, the U.S. Nuclear Waste Technical Review Board will hold a public meeting in Alexandria,

Virginia, on Tuesday, November 19, 2019, to review information on U.S. Department of Energy (DOE) research and development (R&D) activities related to drying, packaging, and dry storage of spent nuclear fuel (SNF), including aluminum-clad SNF. The Board is an independent federal agency established by Congress to conduct an ongoing technical and scientific evaluation of activities undertaken by DOE to manage and dispose of SNF and high-level radioactive waste (HLW).

The Board meeting will be held at the Embassy Suites Alexandria Hotel, 1900 Diagonal Road, Alexandria, VA 22314. The hotel telephone number is (703) 684-5900.

The meeting will begin at 8:00 a.m. and is scheduled to adjourn at 5:00 p.m. Speakers representing the DOE Office of Nuclear Energy, the DOE Office of Environmental Management, and the national laboratories will report on R&D projects related to the drying, packaging, and dry storage of SNF. Computer modeling of the thermal behavior of SNF casks and canisters also will be discussed. Information on the development of the DOE standardized canister for DOE-managed SNF and research on long-term dry storage of aluminum-clad SNF will be presented. Additionally, the Board will hear presentations from researchers in other countries, where the drying and dry-storage of aluminum-clad SNF is under examination. A detailed meeting agenda will be available on the Board's website at www.nwtrb.gov approximately one week before the meeting.

The meeting will be open to the public, and opportunities for public comment will be provided before the lunch break and again at the end of the meeting. Those wanting to speak are encouraged to sign the Public Comment Register at the check-in table near the entrance to the meeting room. The Board was established in the Nuclear Waste Policy Amendments Act of 1987 as an independent federal agency in the Executive Branch to evaluate the technical and scientific validity of DOE activities related to the management and disposal of SNF and HLW and to provide objective expert advice to Congress and the Secretary of Energy on these issues. Board members are experts in their fields and are appointed to the Board by the President from a list of candidates submitted by the National Academy of Sciences. The Board reports its findings, conclusions, and recommendations to Congress and the Secretary of Energy. All Board reports, correspondence, congressional testimony, and meeting transcripts and related materials are posted on the Board's website.
