FEDERAL REGISTER

Vol. 84 Friday,

No. 212 November 1, 2019

Pages 58595–59288

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

How To Cite This Publication: Use the volume number and the page number. Example: 84 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

The President

Executive Order 13896 of October 28, 2019

Commission on Law Enforcement and the Administration of Justice

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to enhance public safety and support the well-ordered administration of justice, it is hereby ordered as follows:

Section 1. *Purpose.* Crime, especially violent crime, denies people their unalienable rights to life, liberty, and the pursuit of happiness. Together as a society, we must work to prevent crime from occurring, ensure that those who perpetrate crime face justice, and assist victims in overcoming the effects of crime on their lives. My Administration is focused on reducing crime, and the social and economic problems—including family and neighborhood disintegration—that contribute to criminal behavior. In addition, the continued malign activity of transnational criminal organizations, and the widespread abuse of drugs trafficked by such groups, are challenges that confront our communities and law enforcement in their efforts to keep the American people safe.

Rigorous study of crime, including its causal factors, and current law enforcement practices is essential to assessing our current criminal justice system's merits and opportunities for improvement. Over 85 percent of United States law enforcement personnel are State, local, and tribal officials. The Department of Justice has long respected this traditional balance of law enforcement resources while supporting State, local, and tribal law enforcement efforts with Federal resources. State and local law enforcement benefit from Federal programs and partnerships in the areas of information-sharing, collaborative enforcement operations, training and technical assistance initiatives, and Federal grants. Public safety and proper policing are issues of both national and local significance that continue to require the close cooperation and coordination between the Department of Justice and State, local, and tribal law enforcement. In particular, the Department of Justice has a historically important role in helping to develop, identify, and establish best practices for law enforcement and supporting a range of programs related to the administration of justice. My Administration builds upon that important work every day.

Sec. 2. *Establishment.* (a) The Attorney General shall establish a Commission on Law Enforcement and the Administration of Justice (Commission), and designate an individual to chair the Commission.

(b) The Attorney General shall determine the composition of and procedures for the functioning of the Commission.

(c) Officers or employees of the Federal Government designated to the Commission shall be full-time, or permanent part-time, officers or employees of the Federal Government. Any such designation shall not affect the civil service status or privileges of the Federal officer or employee.

(d) The Attorney General may, at his discretion, invite elected officers of State, local, and tribal governments (or their designated employees with authority to act on their behalf) to serve on the Commission in their official capacities.

Sec. 3. *Function.* (a) The Commission shall study issues related to law enforcement and the administration of justice and make recommendations to the Attorney General, who shall submit a report and recommendations to the President on actions that can be taken to prevent, reduce, and control crime, increase respect for the law, and assist victims. The Commission shall undertake, as directed by the Attorney General, a review of relevant research and expertise and make recommendations regarding important current issues facing law enforcement and the criminal justice system such as:

(i) challenges to law enforcement associated with mental illness, homelessness, substance abuse, and other social factors that influence crime and strain criminal justice resources;

(ii) the recruitment, hiring, training, and retention of law enforcement officers, including in rural and tribal communities;

(iii) the potential for public and private initiatives, including in ''qualified opportunity zones'' as defined in section 13823(a) of the Tax Cuts and Jobs Act of 2017, to reduce crime and improve police-community relations;

(iv) refusals by State and local prosecutors to enforce laws or prosecute categories of crimes;

(v) the physical safety, health, and wellness of law enforcement officers;

(vi) the need to promote public respect for the law and law enforcement officers;

(vii) better integration of education, employment, social services, and public health services into efforts to reduce crime and ease the burden on law enforcement, courts, and corrections systems;

(viii) the use of targeted deterrence approaches to reduce violent crime;

(ix) new and developing methodologies, technologies, and best practices for combatting criminal activity, delinquency, and public disorder;

(x) the effects of technological innovations on law enforcement and the criminal justice system, including the challenges and opportunities presented by such innovations;

(xi) the effectiveness of contemporary law enforcement training methods around critical topics, the direction of next generation training methods, and an understanding of critical training needs;

(xii) the effectiveness of Federal grant programs in establishing best practices for law enforcement and supporting the administration of justice in State, local, and tribal jurisdictions; and

(xiii) other topics related to law enforcement and the control of crime as the Attorney General deems appropriate.

(b) In carrying out its functions under subsection (a) of this section, the Commission may host listening sessions and otherwise solicit input from a diverse array of stakeholders in the area of criminal justice, including State, local, and tribal law enforcement agencies and organizations; government service providers; businesses; nonprofit entities; public health experts; victims rights' organizations; other advocacy and interest groups; reentry experts; academia; and other public and private entities and individuals with relevant experience or expertise.

(c) In developing its recommendations under subsection (a) of this section, the Commission shall seek to recommend only practical and concrete actions that can be taken by Federal, State, local, and tribal law enforcement and other government entities to improve the administration of justice.

(d) Upon the request of the Chair, the heads of executive departments and agencies (agencies) shall, to the extent permitted by law, provide the Commission with reasonable access to the information it needs for purposes of carrying out its functions.

(e) Upon the request of the Attorney General, the heads of agencies may detail personnel to the Commission to assist in carrying out its functions, and shall endeavor to provide such personnel and other assistance to the Commission to the extent practicable, consistent with applicable law and within existing appropriations, through appropriate interagency agreements, including agreements under the Economy Act. Consistent with applicable law and within existing appropriations, the Attorney General shall use the resources and personnel of the Department of Justice in support of the Commission and its activities.

Sec. 4. *Reports.* The Commission shall submit a report and recommendations to the Attorney General no later than 1 year from the date of this order. The Attorney General, following consultation with the Director of the Office of Management and Budget, shall submit a report and recommendations to the President no later than 60 days thereafter.

Sec. 5. *Termination.* The Commission shall terminate no later than 90 days after submitting its report and recommendations to the Attorney General, unless extended by the President.

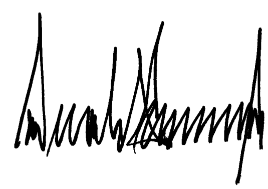
Sec. 6. *General Provisions.* (a) Nothing in this order shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department or agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.



THE WHITE HOUSE,
October 28, 2019.

[Docket No. FAA–2019–0372; Airspace Docket No. 18–ANM–17]

RIN 2120–AA66

Amendment of Class E Airspace; Walden, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies Class E airspace extending upward from 700 feet above the surface at Walden-Jackson County Airport, Walden, CO, to accommodate a new area navigation (RNAV) procedure at the airport. Additionally, this action removes Class E airspace extending upward from 700 feet above the surface north of the airport that is not required to contain IFR procedures. This action also updates the geographic coordinates of the airport to match the FAA's data base. This action ensures the safety and management of instrument flight rules (IFR) operations at the Walden-Jackson County Airport.

DATES: Effective 0901 UTC, January 30, 2020. The Director of the Federal Register approves this incorporation by reference action under Title 1 Code of Federal Regulations part 51, subject to the annual revision of FAA Order 7400.11 and publication of conforming amendments.

ADDRESSES: FAA Order 7400.11D, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *http://www.faa.gov/air_traffic/publications/*. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11D at NARA, email *fedreg.legal@nara.gov* or go to *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

FOR FURTHER INFORMATION CONTACT: Matthew Van Der Wal, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231–3695.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend Class E airspace to support a new RNAV procedure at Walden-Jackson County Airport, Walden, CO.

History

The FAA published a notice of proposed rulemaking in the **Federal Register** (84 FR 36501; July 29, 2019) for Docket No. FAA–2019–0372 to amend Class E airspace extending upward from 700 feet above the surface at Walden-Jackson County Airport, Walden, CO. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. One comment was received. The commenter recommended that no additional airspace be established for the airport. The commenter also recommended that the volume of air traffic into the airport be reduced in order to manage noise. Airspace actions do not control the volume of air traffic at airports; they are completed to protect IFR aircraft operating on approved procedures for a particular airport.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11D, dated August 8, 2019, and effective September 15, 2019, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019. FAA Order 7400.11D is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11D lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 modifies Class E airspace extending upward from 700 feet above the surface at Walden-Jackson County Airport, Walden, CO, within 4 miles each side of the 227° bearing from the airport extending from the 5 mile radius to 9.4 miles southwest of airport. Additionally, this action removes Class E airspace extending upward from 700 feet above the surface within 4 miles each side of the 342° bearing from the airport extending from the 5 mile radius to V–524 northwest of the Walden-Jackson County Airport, Walden, CO. This action updates the airport's geographic coordinates to match the FAA's database.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11D, dated August 8, 2019, and effective September 15, 2019, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11D Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANM CO E5 Walden, CO

Walden-Jackson County Airport, CO
(Lat. 40°45′01″ N, long. 106°16′18″ W)

That airspace extending upward from 700 feet above the surface within a 5-mile radius of airport, and within 4 miles each side of the 227° bearing from the airport extending from the 5-mile radius to 9.4 miles southwest of the Walden-Jackson County Airport.

Issued in Seattle, Washington, on October 16, 2019.

Shawn M. Kozica,

Group Manager, Operations Support Group, Western Service Center.

RIN 2120–AA66

Amendment of Class E Airspace; Wray, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies Class E airspace extending upward from 700 feet above the surface at Wray Municipal Airport, Wray, CO, to accommodate new area navigation (RNAV) procedures at the airport. This action is necessary for the safety and management of instrument flight rules (IFR) operations at the airport. Additionally, this action removes Class E airspace extending upward from 1,200 feet above the surface at Wray Municipal Airport, Wray, CO. This airspace is wholly contained within the Denver en route airspace area and duplication is not necessary.

DATES: Effective 0901 UTC, January 30, 2020. The Director of the Federal Register approves this incorporation by reference action under Title 1 Code of Federal Regulations part 51, subject to the annual revision of FAA Order 7400.11 and publication of conforming amendments.

ADDRESSES: FAA Order 7400.11D, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *http://www.faa.gov/air_traffic/publications/*. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11D at NARA, email *fedreg.legal@nara.gov* or go to *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

FOR FURTHER INFORMATION CONTACT: Matthew Van Der Wal, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231–3695.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend Class E airspace to support new RNAV procedures at Wray Municipal Airport, Wray, CO.

History

The FAA published a notice of proposed rulemaking in the **Federal Register** (84 FR 27044; June 11, 2019) for Docket No. FAA–2019–0371 to amend Class E airspace extending upward from 700 feet above the surface at Wray Municipal Airport, Wray, CO. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11D, dated August 8, 2018, and effective September 15, 2019, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019. FAA Order 7400.11D is publicly available as listed in the ADDRESSES section of this document. FAA Order 7400.11D lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 modifies Class E airspace extending upward from 700 feet above the surface at Wray Municipal Airport, Wray, CO, to within 1 mile each side of the 180° bearing extending from the 6.5 mile radius to 11 miles south of the airport and 2 miles each side of the 360° bearing extending from the 6.5 mile radius to 10.8 miles north of the airport. Additionally, this action removes Class E airspace extending upward from 1,200 feet above the surface at Wray Municipal Airport, Wray, CO. This airspace is wholly contained within the Denver en route airspace area and duplication is not necessary.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures,'' paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANM CO E5 Wray, CO

Wray Municipal Airport
(Lat. 40°06′01″ N, long. 102°14′28″ W)

National Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action finalizes certain amendments to the National Emission Standards for Hazardous Air Pollutants (NESHAP): Clay Ceramics Manufacturing source category. The final amendments are being issued in response to a petition for reconsideration filed by an affected industry (Kohler Company) on the final rule promulgated on October 26, 2015, as well as our review of the 2015 rule with respect to certain other issues raised by Kohler. This action revises the temperature monitoring methodology used to demonstrate continuous compliance with the dioxin/furan (D/F) emissions limit of the final rule. In addition, we are addressing concerns raised by Kohler regarding visible emissions (VE) monitoring of tunnel kiln stacks for continuous compliance with particulate matter (PM) and mercury (Hg) emission limitations. This action also amends the requirements for weekly visual inspections of system ductwork and control device equipment for water curtain spray booths. Lastly, this action amends the NESHAP to include provisions for emissions averaging, makes technical corrections, and adds certain definitions.

DATES: This final rule is effective on November 1, 2019.

ADDRESSES: The U.S. Environmental Protection agency (EPA) has established a docket for this rulemaking under Docket ID No. EPA–HQ–OAR–2013–0290. All documents in the docket are listed on the *https://www.regulations.gov/* website. Although listed, some information is not publicly available, *e.g.,* confidential business information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *https://www.regulations.gov/,* or in hard copy form at the EPA Docket Center, Room 3334, WJC West Building, 1301 Constitution Avenue NW, Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the EPA Docket Center is (202) 566–1742.

FOR FURTHER INFORMATION CONTACT: For questions about this final action, contact Mr. Brian Storey, Sector Policies and Programs Division (D243–04), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–1103; fax number: (919) 541–4991; and email address: *storey.brian@epa.gov.*

SUPPLEMENTARY INFORMATION:

Preamble acronyms and abbreviations. We use multiple acronyms and terms in this preamble. While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

VE visible emissions

Background information. On August 20, 2018, the EPA proposed revisions to the Clay Ceramics Manufacturing NESHAP. In this action, we are finalizing revisions to the rule. The EPA briefly summarizes the more significant comments we received regarding the proposed rule that have resulted in changes to the final rule, and we provide our responses in this preamble. A more comprehensive summary of the public comments on the proposal and the EPA's responses to those comments is available in the *National Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing; Amendments—Background Information for Final Rule: Summary of Public Comments and Responses.* A ''track changes'' version of the regulatory language that incorporates the changes in this action is available in the docket.

Organization of this document. The information in this preamble is organized as follows:

Table of Contents

I. General Information
A. Does this action apply to me?
B. Where can I get a copy of this document and other related information?
C. Judicial Review and Administrative Reconsideration
II. Background
A. What is the statutory authority for this action?

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations
L. Congressional Review Act (CRA)

I. General Information

A. Does this action apply to me?

Table 1 of this preamble lists the NESHAP and associated regulated industrial source categories that are the subject of this final action. Table 1 is not intended to be exhaustive but rather provides a guide for readers regarding the entities that this final action is likely to affect. The final amendments will be directly applicable to the affected sources. Federal, state, local and tribal government entities would not be affected by this final action. As defined in the *Initial List of Categories of Sources Under Section 112(c)(1) of the Clean Air Act Amendments of 1990* (see 57 FR 31576, July 16, 1992) and *Documentation for Developing the Initial Source Category List* (*see* EPA–450/3–91–030), the Clay Products Manufacturing source category as originally listed included any facility engaged in manufacturing of clay products such as brick, vitrified clay pipe, structural clay tile, and clay refractories. The Clay Products Manufacturing source category has since been replaced by the Brick and Structural Clay Products (BSCP) Manufacturing source category and the Clay Ceramics Manufacturing source category (see 67 FR 47894, July 22, 2002).

TABLE 1—NESHAP AND INDUSTRIAL SOURCE CATEGORIES AFFECTED BY THIS FINAL ACTION

Category	NAICS code [1]	Examples of potentially regulated entities
Industry	327120	Ceramic wall and floor tile manufacturing facilities (Clay Ceramics Manufacturing NESHAP).
	327110	Vitreous plumbing fixtures (sanitaryware) manufacturing facilities (Clay Ceramics Manufacturing NESHAP).
Federal government		Not affected.
State/local/tribal government		Not affected.

[1] North American Industry Classification System.

B. Where can I get a copy of this document and other related information?

In addition to being available in the docket, an electronic copy of this final action is available on the internet. Following signature by the EPA Administrator, the EPA will post a copy of this final action at *https://www.epa.gov/stationary-sources-air-pollution/brick-and-structural-clay-products-national-emission-standards.* Following publication in the **Federal Register**, the EPA will post the **Federal Register** version of the final amendments and key technical documents at this same website.

A redline version of the regulatory language that incorporates the changes in this final action is available in the docket for this action (Docket ID No. EPA–HQ–OAR–2013–0290).

C. Judicial Review and Administrative Reconsideration

Under Clean Air Act (CAA) section 307(b)(1), judicial review of this final action is available only by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit by December 31, 2019. Under CAA section 307(b)(2), the requirements established by this final rule may not be challenged separately in any civil or criminal proceedings brought by the EPA to enforce the requirements.

Section 307(d)(7)(B) of the CAA further provides that only an objection to a rule or procedure which was raised with reasonable specificity during the period for public comment (including any public hearing) may be raised during judicial review. This section also provides a mechanism for the EPA to reconsider the rule if the person raising an objection can demonstrate to the Administrator that it was impracticable to raise such objection within the period for public comment or if the grounds for such objection arose after the period for public comment (but within the time specified for judicial review) and if such objection is of central relevance to the outcome of the rule. Any person seeking to make such a demonstration should submit a Petition for Reconsideration to the Office of the Administrator, U.S. EPA, Room 3000, WJC South Building, 1200 Pennsylvania Ave. NW, Washington, DC 20460, with a copy to both the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section, and the Associate General Counsel for the Air and Radiation Law Office, Office of General Counsel (Mail Code 2344A), U.S. EPA, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

II. Background

A. What is the statutory authority for this action?

The statutory authority for this action is provided by sections 112 and 307(d)(7)(B) of the CAA as amended (42 U.S.C. 7412 and 7607(d)(7)(B)).

B. What actions preceded these final amendments?

The initial NESHAP for Clay Ceramics Manufacturing was published in the **Federal Register** on May 16, 2003 (68 FR 26690), and codified at 40 CFR part 63, subpart KKKKK, pursuant to section 112 of the CAA. These standards were challenged and subsequently vacated by the United States Court of Appeals for the District of Columbia Circuit in 2007. See *Sierra Club* v. *EPA,* 479 F.3d 875, 876 (D.C. Cir. 2007). Following the 2007 vacatur of the 2003 rule, the EPA collected additional data and information to support new standards for the clay ceramics industry. This information is contained in the docket at *https://www.regulations.gov/* (see Docket ID No. EPA–HQ–OAR–2013–0290). On December 18, 2014, the EPA proposed the new NESHAP for Clay Ceramics Manufacturing (79 FR 75622). The EPA received additional data and comments during the public comment period. These data and comments were considered and analyzed and, where appropriate, revisions to the NESHAP were made. The NESHAP for Clay Ceramics Manufacturing was finalized on October 26, 2015 (80 FR 65470).

On December 23, 2015, Kohler Company (Kohler) petitioned the EPA for reconsideration of the final rule for Clay Ceramics Manufacturing (Docket ID No. EPA–HQ–OAR–2013–0290–0316). On August 20, 2018, we proposed revisions to the Clay Ceramics Manufacturing NESHAP based on the information provided by Kohler in their petition and information collected by the EPA (83 FR 42066). Public comments were received on the proposal requesting some changes to the proposed revisions. This action finalizes the revisions to the NESHAP and, where deemed appropriate, incorporates the requested changes. The intent of these amendments is to provide flexibility to the clay ceramics manufacturing industry, while maintaining the emissions and operational standards of the NESHAP.

III. Summary of the Final Amendments

The EPA is issuing the following amendments to 40 CFR part 63, subpart KKKKK, in response to Kohler's petition for reconsideration on the October 26, 2015, final rule (80 FR 65470):

- Revise the temperature monitoring methodology used to demonstrate continuous compliance with the D/F emissions limits from sanitaryware first-fire tunnel kilns;
- Provide an alternative to the monitoring provisions for VE from tunnel kiln exhaust stacks;
- Amend the requirements for weekly visual inspections of system ductwork and control device equipment for water curtain spray booths;
- Define cooling stacks in the rule and differentiate cooling stacks from kiln exhaust stacks for compliance purposes; and
- Include provisions to allow emissions averaging for emissions from existing tunnel kilns and glaze spray booths and make associated revisions to the definition of affected source and recordkeeping and reporting requirements.

We are finalizing all the amendments listed above as proposed except for the provisions to allow emissions averaging. A description of the changes made to the emissions averaging provisions since proposal along with the rationale for those changes is provided in section IV of this preamble.

This final rule achieves meaningful burden reduction by providing regulated facilities with the ability to use existing monitoring equipment and removing the requirements for periodic inspections that we have determined are not necessary to demonstrate compliance. We also more clearly identify which stacks are cooling stacks; thus, avoiding the possibility that a source might be required to perform an emission test on a stack that emits only cooling air. Finally, this action provides additional compliance flexibility for sources to meet certain emissions limits by averaging; thereby, simplifying compliance. All of these actions should reduce the overall burden to the regulated sources.

This action is limited to the specific issues raised in the petition for reconsideration, plus some minor technical corrections. There are no changes to emission limits as a result of these final amendments. Technical corrections are being issued as proposed to correct inaccuracies that were promulgated in the final rule, replace text that might be considered confusing, and correct outdated information. These changes are described in Table 2 of this preamble.

TABLE 2—TECHNICAL CORRECTIONS TO 40 CFR PART 63, SUBPART KKKKK

Table to subpart KKKKK	Description of correction
40 CFR 63.8635(g)(1)	Update the addresses for EPA websites.
Table 2, item 3	To avoid confusion, revise the description of the operating limit for carbon flow rate.

TABLE 2—TECHNICAL CORRECTIONS TO 40 CFR PART 63, SUBPART KKKKK—Continued

Table to subpart KKKKK	Description of correction
Table 2, items 10 and 11	Revise the block period for average operating temperature for spray dryers and floor tile press dryers from 3-hour to 4-hour to align with the test run length for EPA Method 23.
Table 4, item 8	In the measurement of carbon flow rate data, include data from the Hg and D/F performance test data for tunnel or roller kilns equipped with an activated carbon injection system.
Table 4, items 11 and 12	Revise the block average for operating temperature for spray dryers and floor tile press dryers from 3-hour to 4-hour to align with the test run length for EPA Method 23.
Table 6, items 2.a.ii, 2.b.ii, 2.c.ii, 3.a.ii, 3.b.ii, 3.c.ii, 4.a.ii, 4.b.ii, 4.c.ii, 5.a.ii, 5.b.ii, 6.a.ii, 7.a.ii, 8.a.ii, 9.a.ii, 10.a.ii, 11.a.ii, 12.a.ii, 12.b.ii, 12.c.ii, 13.a.ii, 13.b.ii, 13.c.ii, 14.a.ii, 14.b.ii, 14.c.ii, 15.a.ii, 15.b.ii, 16.a.ii, 17.a.ii, 18.a.ii, 19.a.ii, 20.a.ii, and 21.a.ii.	To avoid confusion, remove mention of the specific block period and simply refer to "the period of the initial performance test."
Table 7, items 10 and 11	Revise the block average for operating temperature for spray dryers and floor tile press dryers from 3-hour to 4-hour to align with the test run length for EPA Method 23.

IV. Rationale for Changes to the Proposed Amendments

A. Visible Emissions Monitoring of Tunnel Kiln Exhaust

In its petition for reconsideration, Kohler stated that the EPA failed to adequately respond to Kohler's public comments regarding VE monitoring in the Agency's response to comments document and in the preamble for the final rule. In their comments on the December 18, 2014, proposal, Kohler had argued that VE monitoring is not a useful parameter to assess kiln operation nor to assess hazardous air pollutant (HAP) emissions. Kohler requested that the EPA open a new public comment period to reconsider and respond to Kohler's concerns. In response to the petition, we proposed amendments to 40 CFR 63.8620 in the Clay Ceramics Manufacturing NESHAP, adding a new paragraph (e)(2) which provided an alternative to VE testing that allowed sources to demonstrate compliance by maintaining the kiln temperature profile within acceptable parameters and, for any incidence where the kiln exceeds its temperature profile, monitor VE at each kiln stack as specified.

In public comments on the proposed amendments, a commenter questioned Kohler's assertion about VE monitoring and recommended that the EPA define what a "temperature profile" is and clarify what it means to "maintain" it *v.* "exceed" it. In response to this comment, we are finalizing amendments to 40 CFR 63.8620(e)(2), the operating limits table (Table 2), and the continuous compliance table (Table 7) to clarify that the owner or operator will be required to maintain their kiln operating temperature within the range of acceptable temperatures (*i.e.,* a temperature profile) established for each kiln and product. For any incident where the kiln is operating outside of its acceptable temperature range (*i.e.,* exceeding its temperature profile) for the product being fired, the owner or operator will be required to record the incident as a deviation, and perform corrective action in accordance with the facility's operation, maintenance, and monitoring (OM&M) plan.

B. Weekly Visual Inspections of Water Curtain Spray Booths

In its petition for reconsideration, Kohler requested that the EPA reconsider the frequency of visual inspection requirements for system ductwork and control device equipment for water curtain spray booths. In response to the petition, we proposed amendments to the operating limits table (Table 2) and the continuous compliance table (Table 7) to remove the requirement to conduct weekly visual inspections of the system ductwork and control equipment for leaks for all glaze spray operations equipped with water curtains.

In public comments on the proposal, one commenter stated that if the EPA is relying on operator observations of visible particulate on the product to determine when there is a leak in the spray booth ductwork, the rule should require operators to log such incidents and report them as deviations when they occur. We recognize the commenter's concerns and agree that if there is an indication of particulate in the glaze of the product, then it is likely there is a failure in the ductwork requiring corrective action, and, therefore, this would be considered a deviation. We are finalizing amendments to Table 7 to require owners or operators to record as deviations any observations of particulates or other impurities getting into the glaze that has been sprayed onto a piece of ware and perform corrective action in accordance with the facility's OM&M plan.

C. Emissions Averaging

In its petition for reconsideration, Kohler requested that the EPA allow the use of emissions averaging as a compliance option in the Clay Ceramics Manufacturing NESHAP for existing tunnel kilns and glaze spray booths. In response to the petition, we proposed amendments to 40 CFR 63.8595 in the Clay Ceramics Manufacturing NESHAP that included alternative emissions averaging limits for the following:

- PM and Hg, in units of pounds per ton (lb/ton) of fired product for existing floor tile roller kilns;
- PM and Hg in units of lb/ton of fired product for existing wall tile roller kilns;
- PM and Hg, in units of lb/ton of greenware fired for existing first-fired sanitaryware tunnel kilns;
- PM and Hg, in units of lb/ton of first-fired glaze sprayed (dry weight basis) for existing tile glaze lines with glaze spraying; and
- PM, in units of lb/ton of first-fire glaze sprayed (dry weight basis), for existing sanitaryware manual, spray machine, or robot glaze applications.

The proposed conditions required for emissions averaging included the following: (1) Emissions averaging would only be permitted between individual sources at a single existing affected source; (2) emissions averaging would only be permitted between individual sources subject to the Clay Ceramics Manufacturing NESHAP; (3) emissions averaging would not be permitted between two or more different affected sources; (4) emissions averaging would not be permitted between two or more sources in different subcategories;

(5) new sources could not use emissions averaging; and (6) averaged emissions could not exceed 90 percent of the applicable emission limit, which translates to a discount factor of 1.1 applied to actual emissions.

The emissions averaging provisions that we proposed were based, in part, on the emissions averaging provisions in the Hazardous Organic NESHAP (HON). The legal basis and rationale for the HON emissions averaging provisions were provided in the preamble to the final HON (59 FR 19425, April 22, 1994).

In public comments on the proposal, two commenters requested that the EPA remove the requirement that averaged emissions cannot exceed 90 percent of the applicable emission limit, and a third commenter stated that no justification was provided for the selection of 90 percent (instead of an alternate value, such as 80 or 99 percent). While averaging should only be permitted if it can be demonstrated that the total quantity of any HAP will not be greater than it could be if each individually affected unit complied separately with the applicable standard, one commenter stated this requirement can be demonstrated without the ''90 percent of the limit'' safety factor. The commenter noted that the EPA has allowed emissions averaging across similar emission units in other NESHAP, such as the Reinforced Plastics Composites NESHAP (40 CFR part 63, subpart WWWW), and stated that similar logic for averaging should be applied to this subpart to eliminate the unnecessary factor.

In response to these comments, we have re-evaluated whether a discount factor is appropriate for the emissions averaging provisions in this subpart and have concluded that a discount factor is not necessary here. The issues faced in the HON, where a discount factor of 1.1 was applied to the emissions averaging calculation, included significant differences in toxicity of the various HAP and a situation where facilities were applying emissions controls. This is not the case here. All facilities are meeting the relevant standards in this subpart without added controls and are using pollution prevention where needed. Accordingly, a straight average, without any discount factor, is appropriate in this situation. This straight-average approach is consistent with other rules, such as the Reinforced Plastic Composites NESHAP. Therefore, the EPA has decided not to include a discount factor in 40 CFR 63.8595(h), Equation 9, and 40 CFR 63.8620, Equation 10 to calculate the average weighted emissions.

In addition, a commenter noted that the proposed emissions averaging provisions prohibited emissions averaging of new sources but did not prohibit emissions averaging of reconstructed sources. The commenter stated that reconstructed sources should not be allowed to use the emissions averaging provisions. We agree with the commenter, and in the final amendments the EPA has revised 40 CFR 63.8595(h)(1) to indicate that neither new nor reconstructed sources can be included in the emissions averaging.

Finally, we note that Equations 9 through 11 were all proposed to be added to 40 CFR 63.8595(h). However, one commenter noted an apparent discrepancy between Equation 9 and Equation 10, and it appears that the commenter misunderstood that Equation 9 is intended to determine initial compliance based on an initial performance test, while Equation 10 is intended to determine ongoing compliance based on the latest performance test. Equation 11 is also used for ongoing compliance and is intended to determine the 12-month rolling average of the monthly weighted average emission rates. Therefore, in the final amendments, Equations 10 and 11 have been moved to 40 CFR 63.8620, the section that describes how to demonstrate continuous compliance.

V. Summary of Cost, Environmental, and Economic Impacts

This action will have no cost, environmental, energy, or economic impacts beyond those impacts presented in the October 26, 2015, final rule for Clay Ceramics Manufacturing and may result in a cost savings due to the changes in monitoring and testing requirements discussed in section III of this preamble. The technical corrections are cost neutral.

VI. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was, therefore, not submitted to the OMB for review.

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is considered an Executive Order 13771 deregulatory action. This final rule provides meaningful burden reduction by providing additional regulatory flexibilities.

C. Paperwork Reduction Act (PRA)

This action does not impose any new information collection burden under the PRA. OMB has previously approved the information collection activities contained in the existing regulation (40 CFR part 63, subpart KKKKK) and has assigned OMB control number 2060–0513. This action does not change the information collection requirements.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, has no net burden, or otherwise has a positive economic effect on the small entities subject to the rule. This final rule will not impose any additional requirements on small entities, only alternatives to existing requirements. We have, therefore, concluded that this action will have no net regulatory burden for all directly regulated small entities.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive

Order 13175. It will neither impose substantial direct compliance costs on federally recognized tribal governments, nor preempt tribal law. The final amendments impose no requirements on tribal governments. Thus, Executive Order 13175 does not apply to this action.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations, and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). The documentation for this decision is contained in the docket. (See *EJ Screening Report for Clay Ceramics,* Docket ID Item No. EPA–HQ–OAR–2013–0290–0241.)

L. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 63

Environmental protection, Administrative practices and procedures, Air pollution control, Hazardous substances, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: October 10, 2019.

Andrew R. Wheeler,

Administrator.

For the reasons set out in the preamble, 40 CFR part 63 is amended as follows:

PART 63—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS FOR SOURCE CATEGORIES

■ 1. The authority citation for part 63 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart KKKKK—National Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing

■ 2. Section 63.8595 is amended by:
■ a. Revising paragraph (c);
■ b. Redesignating paragraph (h) as paragraph (i);
■ c. Adding a new paragraph (h); and
■ d. Revising newly redesignated paragraphs (i) introductory text and (i)(1) introductory text.

The revisions and addition read as follows:

§ 63.8595 How do I conduct performance tests and establish operating limits?

* * * * *

(c) Each performance test must be conducted according to the requirements in § 63.7 and under the specific conditions in Table 4 to this subpart. Stacks to be tested at sanitaryware manufacturing facilities shall be limited to products of combustion (POC) stacks and not include cooling stacks.

* * * * *

(h)(1) As an alternative to meeting the requirements of § 63.8555 for PM or mercury, if you have more than one existing source in any subcategories located at your facility, you may demonstrate compliance by emissions averaging, if your averaged emissions are no higher than the applicable emission limit, according to the procedures in this section. You may not include new or reconstructed sources in an emissions average.

(2) For a group of two or more existing sources in the same subcategory that each vent to a separate stack, you may average PM or mercury emissions among existing units to demonstrate compliance with the limits in Table 1 to this subpart as specified in paragraph (h)(2)(i) through (iv) of this section, if you satisfy the requirements in paragraphs (h)(3) and (4) of this section.

(i) You may average across existing sources in the same kiln type and size category (*e.g.,* roller or tunnel kilns, large or small kilns) and the same subcategory (*e.g.,* sanitaryware manual or spray machine or robot glaze application) where applicable;

(ii) You may not include a unit in the emissions average if the unit shares a common stack with units in other subcategories;

(iii) You may not include spray dryers or press dryers in the emissions average; and

(iv) You may not average between different types of pollutants.

(3) The averaged emissions rate from the existing sources participating in the emissions averaging option must not exceed the limits in Table 1 to this subpart at all times the affected units are subject to numeric emission limits following the compliance date specified in § 63.8545.

(4)(i) You must demonstrate initial compliance using the maximum process rate and the results of the initial performance tests.

(ii) You must use Equation 9 of this section to demonstrate that the PM or mercury emissions from all existing units participating in the emissions averaging option for that pollutant do not exceed the emission limits in Table 1 to this subpart.

$$ER_i = \sum_{i=1}^{n}\left(E_i \times P_{max\ i}\right) \div \sum_{i=1}^{n} P_{max\ i} \quad \text{(Eq. 9)}$$

Where:

ER_i = Average weighted emissions for PM or mercury, in units of kilograms (pounds) per megagram (ton) of fired product for existing floor tile roller kilns and wall tile roller kilns, greenware fired for existing first-fired sanitaryware tunnel kilns, and first-fire glaze sprayed (dry weight basis) for existing tile glaze lines with glaze spraying and average weighted emissions for PM, in units of kilograms (pounds) per megagram (ton) of first-fire glaze sprayed (dry weight basis) for existing sanitaryware manual, spray machine, or robot glaze applications.

E_i = Emission rate (as determined during the initial compliance demonstration) of PM or mercury from unit i, in units of kilograms (pounds) per megagram (ton). Determine the emission rate for PM or mercury by performance testing according to Table 4 to this subpart using the applicable equation in paragraph (f) of this section.

$P_{max\ i}$ = Maximum process rate for unit i, in units of megagrams per hour (tons per hour).

n = Number of units participating in the emissions averaging option.

(5) You must develop and submit upon request to the applicable Administrator for review and approval, an implementation plan for emissions averaging according to the following procedures and requirements in paragraphs (h)(5)(i) through (iv) of this section.

(i) If requested, you must submit the implementation plan no later than 180 days before the date that the facility intends to demonstrate compliance using the emissions averaging option.

(ii) You must include the information contained in paragraphs (h)(5)(ii)(A) through (D) of this section in your implementation plan for all emission sources included in an emissions average:

(A) The identification of all existing sources in the averaging group, including for each either the applicable HAP emissions level or the control technology installed and the date on which you are requesting emissions averaging to commence;

(B) The specific control technology or pollution prevention measure to be used for each source in the averaging group and the date of its installation or application. If the pollution prevention measure reduces or eliminates emissions from multiple sources, the owner or operator must identify each source;

(C) The test plan for the measurement of emissions in accordance with the requirements in this section; and

(D) The operating parameters to be monitored for each control system or device consistent with § 63.8555 and Table 2 to this subpart, and a description of how the operating limits will be determined.

(iii) If submitted upon request, the Administrator shall review and approve or disapprove the plan according to the following criteria:

(A) Whether the content of the plan includes all of the information specified in paragraph (h)(5)(ii) of this section; and

(B) Whether the plan presents sufficient information to determine that compliance will be achieved and maintained.

(iv) The applicable Administrator shall not approve an emissions averaging implementation plan containing any of the following provisions:

(A) Any averaging between emissions of differing pollutants or between differing sources; or

(B) The inclusion of any emission source other than an existing unit in the same subcategories.

(i) For each affected source that is subject to the emission limits specified in Table 1 to this subpart and is equipped with an APCD that is not addressed in Table 2 to this subpart or that is using process changes as a means of meeting the emission limits in Table 1 to this subpart, you must meet the requirements in § 63.8(f) and paragraphs (i)(1) and (2) of this section.

(1) Submit a request for approval of alternative monitoring procedures to the Administrator no later than the notification of intent to conduct a performance test. The request must contain the information specified in paragraphs (i)(1)(i) through (iv) of this section.

* * * * *

■ 3. Section 63.8620 is amended by:

■ a. Redesignating paragraphs (e) introductory text and (e)(1) through (3) as paragraphs (e)(1) introductory text and (e)(1)(i) through (iii), respectively;

■ b. Revising newly redesignated paragraph (e)(1) introductory text; and

■ c. Adding new paragraph (e)(2) and paragraphs (f) and (g).

The revision and additions read as follows:

§ 63.8620 How do I demonstrate continuous compliance with the emission limitations and work practice standards?

* * * * *

(e)(1) *Visible emissions testing.* You must demonstrate continuous compliance with the operating limits in Table 2 to this subpart for visible emissions (VE) from tunnel or roller kilns that are uncontrolled or equipped with DIFF, DLS/FF, or other dry control device by monitoring VE at each kiln stack according to the requirements in paragraphs (e)(1)(i) through (iii) of this section.

* * * * *

(2) *Alternative to VE testing.* You must demonstrate continuous compliance with the operating limits in Table 2 to this subpart for kiln temperature profile for tunnel or roller kilns that are uncontrolled or equipped with DIFF, DLS/FF, or other dry control device by maintaining the kiln operating temperature within the range of acceptable temperatures (*i.e.,* temperature profile) established for each kiln and product. For any incidence where the kiln is operating outside of its acceptable temperature range (*i.e.,* exceeds its temperature profile) for the product being fired, you must record the incident as a deviation, and perform the necessary corrective action in accordance with your OM&M plan to return the kiln to the acceptable operating temperature for the product being fired. To confirm the kiln has returned to the acceptable temperature range, you will monitor VE at the kiln stack according to the requirements in paragraphs (e)(2)(i) through (iii) of this section.

(i) Perform VE observations at the stack of each kiln operating outside of its temperature profile according to the procedures of Method 22 of 40 CFR part 60, appendix A–7. The duration of each Method 22 test must be at least 15 minutes.

(ii) If VE are observed during any test conducted using Method 22 of 40 CFR part 60, appendix A–7, you must continue to perform corrective action until VE are no longer observed.

(iii) If VE are observed during any test conducted using Method 22 of 40 CFR part 60, appendix A–7, you must report these deviations by following the requirements in § 63.8635.

(f) Following the compliance date, you must demonstrate compliance with the emissions averaging provision under this subpart on a continuous basis by meeting the requirements of paragraphs (f)(1) through (3) of this section.

(1)(i) After the initial compliance demonstration described in § 63.8595(h)(4), you must demonstrate compliance on a monthly basis determined at the end of every month (12 times per year) according to paragraph (f)(1)(ii) of this section. The first monthly period begins on the compliance date specified in § 63.8545.

(ii) For each calendar month, you must use Equation 10 of this section to calculate the average weighted emission rate for that month.

$$ER_i = \sum_{i=1}^{n}\left(E_i \times P_{month\ i}\right) \div \sum_{i=1}^{n} P_{month\ i} \quad \text{(Eq. 10)}$$

Where:

ER_i = Average weighted emissions for PM or mercury, in units of kilograms (pounds) per megagram (ton) of fired product for existing floor tile roller kilns and wall tile roller kilns, greenware fired for existing first-fired sanitaryware tunnel kilns, and first-fire glaze sprayed (dry weight basis) for existing tile glaze lines with glaze spraying and average weighted emissions for PM, in units of kilograms (pounds) per megagram (ton) of first-fire glaze sprayed (dry weight basis) for existing sanitaryware manual, spray machine, or robot glaze applications, for that calendar month.

E_i = Emission rate (as determined during the most recent compliance demonstration) of PM or mercury from unit i, in units of kilograms (pounds) per megagram (ton). Determine the emission rate for PM or mercury by performance testing according to Table 4 to this subpart using the applicable equation in § 63.8595(f).

$P_{month\ i}$ = The process rate for that calendar month for unit i, in units of megagrams (tons).

n = Number of units participating in the emissions averaging option.

(2) Until 12 monthly weighted average emission rates have been accumulated, calculate and report only the average weighted emission rate determined under paragraph (f)(1)(ii) of this section for each calendar month. After 12 monthly weighted average emission rates have been accumulated, for each subsequent calendar month, use Equation 11 of this section to calculate the 12-month rolling average of the monthly weighted average emission rates for the current calendar month and the previous 11 calendar months.

$$E_{avg} = \sum_{i=1}^{n} ER_i \div 12 \quad \text{(Eq. 11)}$$

Where:

E_{avg} = 12-month rolling average emission rate for PM or mercury, in units of kilograms (pounds) per megagram (ton) of fired product for existing floor tile roller kilns and wall tile roller kilns, greenware fired for existing first-fired sanitaryware tunnel kilns, and first-fire glaze sprayed (dry weight basis) for existing tile glaze lines with glaze spraying and average weighted emissions for PM, in units of kilograms (pounds) per megagram (ton) of first-fire glaze sprayed (dry weight basis) for existing sanitaryware manual, spray machine, or robot glaze applications.

ER_i = Monthly weighted average, for calendar month ‘‘i,’’ in units of kilograms (pounds) per megagram (ton), as calculated by paragraph (f)(1)(ii) of this section.

(3) For each existing unit participating in the emissions averaging option, you must comply with the continuous compliance requirements in Table 7 to this subpart.

(g) Any instance where you fail to comply with the continuous monitoring requirements in paragraphs (f)(1) through (3) of this section is a deviation.

■ 4. Section 63.8630 is amended by revising paragraph (c) introductory text and adding paragraph (c)(4) to read as follows:

§ 63.8630 What notifications must I submit and when?

* * * * *

(c) If you are required to conduct a performance test or other initial compliance demonstration as specified in Tables 4 and 6 to this subpart, your Notification of Compliance Status as specified in Table 9 to this subpart must include the information in paragraphs (c)(1) through (4) of this section.

* * * * *

(4) Identification of whether you plan to demonstrate compliance by emissions averaging. If you plan to demonstrate compliance by emissions averaging, report the emissions level that was being achieved or the control technology employed on December 28, 2015.

* * * * *

■ 5. Section 63.8635 is amended by:

■ a. Revising paragraphs (c) introductory text and (c)(4)(iii)(C);

■ b. Adding paragraph (c)(9); and

■ c. Revising paragraph (g)(1).

The revisions and addition read as follows:

§ 63.8635 What reports must I submit and when?

* * * * *

(c) The compliance report must contain the information in paragraphs (c)(1) through (9) of this section.

* * * * *

(4) * * *

(iii) * * *

(C) Based on the information recorded under paragraphs (c)(4)(iii)(A) and (B) of this section, compute the annual percent of affected source operating uptime during which the control device was offline for routine maintenance using Equation 12 of this section.

$$RM = \frac{DT_p + DT_c}{SU_p + SU_c}(100) \quad \text{(Eq. 12)}$$

Where:

RM = Annual percentage of affected source uptime during which control device was offline for routine control device maintenance.

DT_p = Control device downtime claimed under the routine control device maintenance alternative standard for the previous semiannual compliance period.

DT_c = Control device downtime claimed under the routine control device maintenance alternative standard for the current semiannual compliance period.

SU_p = Affected source uptime for the previous semiannual compliance period.

SU_c = Affected source uptime for the current semiannual compliance period.

* * * * *

(9) If you plan to demonstrate compliance by emissions averaging, certify the emissions level achieved or the control technology employed is no less stringent than the level or control technology contained in the notification of compliance status in § 63.8630(c)(4), including all necessary documentation

to support this certification, such as inputs to Equations 9 through 11 of this subpart.

* * * * *

(g) * * *

(1) For data collected using test methods supported by the EPA's Electronic Reporting Tool (ERT) as listed on the EPA's ERT website (*https://www.epa.gov/electronicreporting-air-emissions/electronicreporting-tool-ert*) at the time of the test, you must submit the results of the performance test to the EPA via the Compliance and Emissions Data Reporting Interface (CEDRI). (CEDRI can be accessed through the EPA's Central Data Exchange (CDX) (*https://cdx.epa.gov/*).) Performance test data must be submitted in a file format generated through the use of the EPA's ERT or an alternate electronic file format consistent with the extensible markup language (XML) schema listed on the EPA's ERT website. If you claim that some of the performance test information being submitted is confidential business information (CBI), you must submit a complete file generated through the use of the EPA's ERT or an alternate electronic file consistent with the XML schema listed on the EPA's ERT website, including information claimed to be CBI, on a compact disc, flash drive, or other commonly used electronic storage media to the EPA. The electronic media must be clearly marked as CBI and mailed to U.S. EPA/OAPQS/CORE CBI Office, Attention: Group Leader, Measurement Policy Group, MD C404–02, 4930 Old Page Rd., Durham, NC 27703. The same ERT or alternate file with the CBI omitted must be submitted to the EPA via the EPA's CDX as described earlier in this paragraph (g)(1).

* * * * *

■ 6. Section 63.8640 is amended by revising paragraph (c) introductory text and adding paragraph (c)(11) to read as follows:

§ 63.8640 What records must I keep?

* * * * *

(c) You must also maintain the records listed in paragraphs (c)(1) through (11) of this section.

* * * * *

(11) If you elect to average emissions consistent with § 63.8595(h), you must additionally keep a copy of the emissions averaging implementation plan required in § 63.8595(h)(5), all calculations required under § 63.8595(h), including monthly records of process rate, as applicable, and monitoring records consistent with § 63.8620(f).

■ 7. Section 63.8665 is amended by adding definitions for "Cooling stack," "Emissions averaging sources," and "Products of combustion (POC) stack" in alphabetical order to read as follows:

§ 63.8665 What definitions apply to this subpart?

* * * * *

Cooling stack means a stack (release point) installed on the cooling zone of a tunnel kiln to release air used to cool down the fired product from its maximum temperature to room temperature. A cooling stack does not release any air from the firing zone of the tunnel kiln.

* * * * *

Emissions averaging sources means, for purposes of the emissions averaging provisions of § 63.8595(h), the collection of all existing ceramic tile roller kilns, sanitaryware tunnel kilns, ceramic tile glaze lines using glaze spraying, and sanitaryware glaze spray booths, within a kiln type and size category and within a subcategory.

* * * * *

Products of combustion (POC) stack means a stack (release point) installed on the front end of the firing zone of a tunnel kiln to release air used to heat the greenware from room temperature to its maximum temperature.

* * * * *

■ 8. Table 1 to subpart KKKKK is revised to read as follows:

TABLE 1 TO SUBPART KKKKK OF PART 63—EMISSION LIMITS

As stated in § 63.8555, you must meet each emission limit in the following table that applies to you:

For each . . .	You must meet the following emission limits . . .
1. Collection of all tunnel or roller kilns at facility.	HF and HCl emissions must not exceed 62 kilograms per hour (kg/hr) (140 pounds per hour (lb/hr)) HCl equivalent, under the health-based standard, as determined using Equations 4 and 5 of this subpart.
2. Existing floor tile roller kiln	a. PM emissions must not exceed 0.063 kilogram per megagram (kg/Mg) (0.13 pound per ton (lb/ton)) of fired product. b. Hg emissions must not exceed 6.3 E–05 kg/Mg (1.3 E–04 lb/ton) of fired product. c. Dioxin/furan emissions must not exceed 2.8 nanograms per kilogram (ng/kg) of fired product.
3. Existing wall tile roller kiln	a. PM emissions must not exceed 0.19 kg/Mg (0.37 lb/ton) of fired product. b. Hg emissions must not exceed 1.1 E–04 kg/Mg (2.1 E–04 lb/ton) of fired product. c. Dioxin/furan emissions must not exceed 0.22 ng/kg of fired product.
4. Existing first-fire sanitaryware tunnel kiln.	a. PM emissions must not exceed 0.17 kg/Mg (0.34 lb/ton) of greenware fired. b. Hg emissions must not exceed 1.3 E–04 kg/Mg (2.6 E–04 lb/ton) of greenware fired. c. Dioxin/furan emissions must not exceed 3.3 ng/kg of greenware fired.
5. Existing tile glaze line with glaze spraying.	a. PM emissions must not exceed 0.93 kg/Mg (1.9 lb/ton) of first-fire glaze sprayed (dry weight basis). b. Hg emissions must not exceed 8.0 E–05 kg/Mg (1.6 E–04 lb/ton) of first-fire glaze sprayed (dry weight basis).
6. Existing sanitaryware manual glaze application.	PM emissions must not exceed 18 kg/Mg (35 lb/ton) of first-fire glaze sprayed (dry weight basis).
7. Existing sanitaryware spray machine glaze application.	PM emissions must not exceed 6.2 kg/Mg (13 lb/ton) of first-fire glaze sprayed (dry weight basis).
8. Existing sanitaryware robot glaze application.	PM emissions must not exceed 4.5 kg/Mg (8.9 lb/ton) of first-fire glaze sprayed (dry weight basis).
9. Existing floor tile spray dryer	Dioxin/furan emissions must not exceed 19 ng/kg of throughput processed.
10. Existing wall tile spray dryer	Dioxin/furan emissions must not exceed 0.058 ng/kg of throughput processed.
11. Existing floor tile press dryer	Dioxin/furan emissions must not exceed 0.024 ng/kg of throughput processed.
12. New or reconstructed floor tile roller kiln.	a. PM emissions must not exceed 0.019 kg/Mg (0.037 lb/ton) of fired product. b. Hg emissions must not exceed 2.0 E–05 kg/Mg (3.9 E–05 lb/ton) of fired product. c. Dioxin/furan emissions must not exceed 1.3 ng/kg of fired product.

TABLE 1 TO SUBPART KKKKK OF PART 63—EMISSION LIMITS—Continued

As stated in § 63.8555, you must meet each emission limit in the following table that applies to you:

For each . . .	You must meet the following emission limits . . .
13. New or reconstructed wall tile roller kiln.	a. PM emissions must not exceed 0.19 kg/Mg (0.37 lb/ton) of fired product.
	b. Hg emissions must not exceed 1.1 E–04 kg/Mg (2.1 E–04 lb/ton) of fired product.
	c. Dioxin/furan emissions must not exceed 0.22 ng/kg of fired product.
14. New or reconstructed first-fire sanitaryware tunnel kiln.	a. PM emissions must not exceed 0.048 kg/Mg (0.095 lb/ton) of greenware fired.
	b. Hg emissions must not exceed 6.1 E–05 kg/Mg (1.3 E–04 lb/ton) of greenware fired.
	c. Dioxin/furan emissions must not exceed 0.99 ng/kg of greenware fired.
15. New or reconstructed tile glaze line with glaze spraying.	a. PM emissions must not exceed 0.31 kg/Mg (0.61 lb/ton) of first-fire glaze sprayed (dry weight basis).
	b. Hg emissions must not exceed 8.0 E–05 kg/Mg (1.6 E–04 lb/ton) of first-fire glaze sprayed (dry weight basis).
16. New or reconstructed sanitaryware manual glaze application.	PM emissions must not exceed 2.0 kg/Mg (3.9 lb/ton) of first-fire glaze sprayed (dry weight basis).
17. New or reconstructed sanitaryware spray machine glaze application.	PM emissions must not exceed 1.6 kg/Mg (3.2 lb/ton) of first-fire glaze sprayed (dry weight basis).
18. New or reconstructed sanitaryware robot glaze application.	PM emissions must not exceed 1.2 kg/Mg (2.3 lb/ton) of first-fire glaze sprayed (dry weight basis).
19. New or reconstructed floor tile spray dryer.	Dioxin/furan emissions must not exceed 0.071 ng/kg of throughput processed.
20. New or reconstructed wall tile spray dryer.	Dioxin/furan emissions must not exceed 0.058 ng/kg of throughput processed.
21. New or reconstructed floor tile press dryer.	Dioxin/furan emissions must not exceed 0.024 ng/kg of throughput processed.
22. Collection of emissions averaging sources.	PM emissions must not exceed the applicable emission limit, under the emissions averaging option, as determined using Equations 9 through 11 of this subpart.
23. Collection of emissions averaging sources.	Hg emissions must not exceed the applicable emission limit, under the emissions averaging option, as determined using Equations 9 through 11 of this subpart.

■ 9. Table 2 to subpart KKKKK is revised to read as follows:

TABLE 2 TO SUBPART KKKKK OF PART 63—OPERATING LIMITS

As stated in § 63.8555, you must meet each operating limit in the following table that applies to you:

For each . . .	You must . . .	Or you must . . .
1. Tunnel or roller kiln equipped with a DIFF or DLS/FF.	a. If you use a bag leak detection system, initiate corrective action within 1 hour of a bag leak detection system alarm and complete corrective actions in accordance with your OM&M plan; operate and maintain the fabric filter such that the alarm is not engaged for more than 5 percent of the total operating time in a 6-month block reporting period; and	i. Maintain no VE from the DIFF or DLS/FF stack; or ii. Maintain your kiln operating temperature within the range of acceptable temperatures (*i.e.,* temperature profile established for each kiln and product.
	b. Maintain free-flowing lime in the feed hopper or silo and to the APCD at all times for continuous injection systems; maintain the feeder setting (on a per ton of throughput basis) at or above the level established during the performance test for continuous injection systems in which compliance was demonstrated.	
2. Tunnel or roller kiln equipped with a WS.	a. Maintain the average scrubber liquid pH for each 3-hour block period at or above the average scrubber liquid pH established during the HF/HCl performance test in which compliance was demonstrated; and	
	b. Maintain the average scrubber liquid flow rate for each 3-hour block period at or above the highest average scrubber liquid flow rate established during the HF/HCl and PM performance tests in which compliance was demonstrated.	
3. Tunnel or roller kiln equipped with an ACI system.	Maintain the 3-hour block average carbon flow rate at or above the highest average carbon flow rate established during the Hg and dioxin/furan performance tests in which compliance was demonstrated.	

TABLE 2 TO SUBPART KKKKK OF PART 63—OPERATING LIMITS—Continued

As stated in § 63.8555, you must meet each operating limit in the following table that applies to you:

For each . . .	You must . . .	Or you must . . .
4. Tunnel or roller kiln intending to comply with dioxin/furan emission limit without an ACI system.	Maintain the average operating temperature for each 12-hour block period at or below the highest operating temperature established during the dioxin/furan performance test in which compliance was demonstrated.	i. Maintain your kiln operating temperature within the range of acceptable temperatures (*i.e.,* temperature profile established for each kiln and product.
5. Tunnel or roller kiln with no add-on control.	a. Maintain no VE from the stack; and	
	b. Maintain the kiln process rate at or below the kiln process rate determined according to § 63.8595(g)(1) if your total facility maximum potential HCl-equivalent emissions are greater than the HCl-equivalent limit in Table 1 to this subpart; and	
	c. Maintain the average operating temperature for each 12-hour block period at or below the highest operating temperature established during the dioxin/furan performance test in which compliance was demonstrated.	i. Maintain no VE from the FF stack.
6. Glaze spray operation equipped with a FF.	a. If you use a bag leak detection system, initiate corrective action within 1 hour of a bag leak detection system alarm and complete corrective actions in accordance with your OM&M plan; operate and maintain the fabric filter such that the alarm is not engaged for more than 5 percent of the total operating time in a 6-month block reporting period.	
7. Glaze spray operation equipped with a WS.	a. Maintain the average scrubber pressure drop for each 3-hour block period at or above the average pressure drop established during the PM performance test in which compliance was demonstrated; and	
	b. Maintain the average scrubber liquid flow rate for each 3-hour block period at or above the average scrubber liquid flow rate established during the PM performance test in which compliance was demonstrated.	
8. Glaze spray operation equipped with a water curtain.	a. Conduct daily inspections to verify the presence of water flow to the wet control system; and	
	b. Conduct annual inspections of the interior of the control equipment (if applicable) to determine the structural integrity and condition of the control equipment.	
9. Glaze spray operation equipped with baffles.	Conduct an annual visual inspection of the baffles to confirm the baffles are in place.	
10. Spray dryer	Maintain the average operating temperature for each 4-hour block period at or above the average temperature established during the dioxin/furan performance test in which compliance was demonstrated.	
11. Floor tile press dryer	Maintain the average operating temperature for each 4-hour block period at or below the average temperature established during the dioxin/furan performance test in which compliance was demonstrated.	

■ 10. Table 4 to subpart KKKKK is revised to read as follows:

TABLE 4 TO SUBPART KKKKK OF PART 63—REQUIREMENTS FOR PERFORMANCE TESTS

As stated in § 63.8595, you must conduct each performance test in the following table that applies to you:

For each . . .	You must . . .	Using . . .	According to the following requirements . . .
1. Tunnel or roller kiln	a. Select locations of sampling ports and the number of traverse points.	Method 1 or 1A of 40 CFR part 60, appendix A–1.	Sampling sites must be located at the outlet of the APCD and prior to any releases to the atmosphere for all affected sources.
	b. Determine velocities and volumetric flow rate.	Method 2 of 40 CFR part 60, appendix A–1.	You may use Method 2A, 2C, 2D, or 2F of 40 CFR part 60, appendix A–1, or Method 2G of 40 CFR part 60, appendix A–2, as appropriate, as an alternative to using Method 2 of 40 CFR part 60, appendix A–1.

TABLE 4 TO SUBPART KKKKK OF PART 63—REQUIREMENTS FOR PERFORMANCE TESTS—Continued

As stated in § 63.8595, you must conduct each performance test in the following table that applies to you:

For each . . .	You must . . .	Using . . .	According to the following requirements . . .
	c. Conduct gas molecular weight analysis.	Method 3 of 40 CFR part 60, appendix A–2.	You may use Method 3A or 3B of 40 CFR part 60, appendix A–2, as appropriate, as an alternative to using Method 3 of 40 CFR part 60, appendix A–2. ANSI/ASME PTC 19.10–1981 (incorporated by reference, see § 63.14) may be used as an alternative to the manual procedures (but not the instrumental procedures) in Methods 3A and 3B.
	d. Measure moisture content of the stack gas.	Method 4 of 40 CFR part 60, appendix A–3.	
	e. Measure HF and HCl emissions.	i. Method 26A of 40 CFR part 60, appendix A–8; or	You may use Method 26 of 40 CFR part 60, appendix A–8, as an alternative to using Method 26A of 40 CFR part 60, appendix A–8, when no acid PM (*e.g.,* HF or HCl dissolved in water droplets emitted by sources controlled by a WS) is present. ASTM D6735–01 (Reapproved 2009) (incorporated by reference, see § 63.14) may be used as an alternative to Methods 26 and 26A.
		ii. Method 320 of appendix A of this part.	When using Method 320 of appendix A of this part, you must follow the analyte spiking procedures of section 13 of Method 320 of appendix A of this part, unless you can demonstrate that the complete spiking procedure has been conducted at a similar source. ASTM D6348–03 (Reapproved 2010) (incorporated by reference, see § 63.14) may be used as an alternative to Method 320 if the test plan preparation and implementation in Annexes A1–A8 are mandatory and the %R in Annex A5 is determined for each target analyte.
	f. Measure PM emissions ..	i. Method 5 of 40 CFR part 60, appendix A–3; or ii. Method 29 of 40 CFR part 60, appendix A–8.	
	g. Measure Hg emissions	Method 29 of 40 CFR part 60, appendix A–8.	ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14) may be used as an alternative to Method 29 (portion for Hg only).
	h. Measure dioxin/furan emissions.	Method 23 of 40 CFR part 60, appendix A–7.	
2. Glaze spray operation	a. Select locations of sampling ports and the number of traverse points.	Method 1 or 1A of 40 CFR part 60, appendix A–1.	Sampling sites must be located at the outlet of the APCD and prior to any releases to the atmosphere for all affected sources.
	b. Determine velocities and volumetric flow rate.	Method 2 of 40 CFR part 60, appendix A–1.	You may use Method 2A, 2C, 2D, or 2F of 40 CFR part 60, appendix A–1, or Method 2G of 40 CFR part 60, appendix A–2, as appropriate, as an alternative to using Method 2 of 40 CFR part 60, appendix A–1.
	c. Conduct gas molecular weight analysis.	Method 3 of 40 CFR part 60, appendix A–2.	You may use Method 3A or 3B of 40 CFR part 60, appendix A–2, as appropriate, as an alternative to using Method 3 of 40 CFR part 60, appendix A–2. ANSI/ASME PTC 19.10–1981 (incorporated by reference, see § 63.14) may be used as an alternative to the manual procedures (but not the instrumental procedures) in Methods 3A and 3B.
	d. Measure moisture content of the stack gas.	Method 4 of 40 CFR part 60, appendix A–3.	
	e. Measure PM emissions	Method 5 of 40 CFR part 60, appendix A–3.	
	f. Measure Hg emissions (tile glaze spray operations only).	Method 29 of 40 CFR part 60, appendix A–8.	ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14) may be used as an alternative to Method 29 (portion for Hg only).
3. Spray dryer or floor tile press dryer.	a. Select locations of sampling ports and the number of traverse points.	Method 1 or 1A of 40 CFR part 60, appendix A–1.	Sampling sites must be located at the outlet of the APCD and prior to any releases to the atmosphere for all affected sources.
	b. Determine velocities and volumetric flow rate.	Method 2 of 40 CFR part 60, appendix A–1.	You may use Method 2A, 2C, 2D, or 2F of 40 CFR part 60, appendix A–1, or Method 2G of 40 CFR part 60, appendix A–2, as appropriate, as an alternative to using Method 2 of 40 CFR part 60, appendix A–1.

TABLE 4 TO SUBPART KKKKK OF PART 63—REQUIREMENTS FOR PERFORMANCE TESTS—Continued

As stated in § 63.8595, you must conduct each performance test in the following table that applies to you:

For each . . .	You must . . .	Using . . .	According to the following requirements . . .
	c. Conduct gas molecular weight analysis.	Method 3 of 40 CFR part 60, appendix A–2.	You may use Method 3A or 3B of 40 CFR part 60, appendix A–2, as appropriate, as an alternative to using Method 3 of 40 CFR part 60, appendix A–2. ANSI/ASME PTC 19.10–1981 (incorporated by reference, see § 63.14) may be used as an alternative to the manual procedures (but not the instrumental procedures) in Methods 3A and 3B.
	d. Measure moisture content of the stack gas.	Method 4 of 40 CFR part 60, appendix A–3.	
	e. Measure dioxin/furan emissions.	Method 23 of 40 CFR part 60, appendix A–7.	
4. Tunnel or roller kiln with no add-on control.	a. Establish the operating limit(s) for kiln process rate if the total facility maximum potential HCl-equivalent emissions are greater than the HCl-equivalent limit in Table 1 to this subpart.	HCl-equivalent limit in Table 1 to this subpart and emissions and production data from the HF/HCl/Cl_2 performance test.	Using the procedures in § 63.8595(g)(1), you must determine the maximum process rate(s) for your kiln(s) that would ensure total facility maximum potential HCl-equivalent emissions remain at or below the HCl-equivalent limit in Table 1 to this subpart. The maximum process rate(s) would become your site-specific process rate operating limit(s).
	b. Establish the operating limit for kiln operating temperature.	i. Data from the kiln operating temperature measurement device during the dioxin/furan performance test.	(1) You must continuously measure the kiln operating temperature during three 4-hour test runs and, from a 12-hour block of time consisting of 1-hour increments, calculate the following two values: (a) The standard deviation of the 12 1-hour temperature measurements (refer to Note 1). (b) 1 percent of the 12-hour block average. (2) You must decide which of the two values would provide the greatest variability (*i.e.,* the highest value), and then add this value to the 12-hour block average measured during the compliance testing. The result is the maximum temperature at which your kiln may operate during normal operations.
5. Tunnel or roller kiln that is complying with PM and/or Hg production-based emission limits.	Determine the production rate during each PM/Hg test run in order to determine compliance with PM and/or Hg production-based emission limits.	Production data collected during the PM/Hg performance tests (*e.g.,* the number of ceramic pieces and weight per piece in the kiln during a test run divided by the amount of time to fire a piece).	You must measure and record the production rate, on a ton of throughput processed basis, of the affected kiln for each of the three test runs.
6. Tunnel or roller kiln equipped with a DIFF or DLS/FF.	Establish the operating limit for the lime feeder setting.	Data from the lime feeder during the HF/HCl performance test.	For continuous lime injection systems, you must ensure that lime in the feed hopper or silo and to the APCD is free-flowing at all times during the performance test and record the feeder setting, on a per ton of throughput basis, for the three test runs. If the feed rate setting varies during the three test runs, determine and record the average feed rate from the three test runs. The average of the three test runs establishes your minimum site-specific feed rate operating limit.
7. Tunnel or roller kiln equipped with a WS.	a. Establish the operating limit for the average scrubber liquid pH.	Data from the pH measurement device during the HF/HCl performance test.	You must continuously measure the scrubber liquid pH, determine and record the block average pH values for the three test runs, and determine and record the 3-hour block average of the recorded pH measurements for the three test runs. The average of the three test runs establishes your minimum site-specific liquid pH operating limit.
	b. Establish the operating limit for the average scrubber liquid flow rate.	Data from the flow rate measurement device during the HF/HCl and PM performance tests.	You must continuously measure the scrubber liquid flow rate, determine and record the block average flow rate values for the three test runs, and determine and record the 3-hour block average of the recorded flow rate measurements for the three test runs. The average of the three test runs establishes your minimum site-specific liquid flow rate operating level. If different average wet scrubber liquid flow rate values are measured during the HF/HCl and PM tests, the highest of the average values become your site-specific operating limit.

TABLE 4 TO SUBPART KKKKK OF PART 63—REQUIREMENTS FOR PERFORMANCE TESTS—Continued

As stated in § 63.8595, you must conduct each performance test in the following table that applies to you:

For each . . .	You must . . .	Using . . .	According to the following requirements . . .
8. Tunnel or roller kiln equipped with an ACI system.	Establish the operating limit for the average carbon flow rate.	Data from the carbon flow rate measurement conducted during the Hg and dioxin/furan performance tests.	You must measure the carbon flow rate during each test run, determine and record the block average carbon flow rate values for the three test runs, and determine and record the 3-hour block average of the recorded carbon flow rate measurements for the three test runs. The average of the three test runs establishes your minimum site-specific activated carbon flow rate operating limit.
9. Tunnel or roller kiln intending to comply with dioxin/furan emission limit without an ACI system.	a. Establish the operating limit for kiln operating temperature.	i. Data from the kiln operating temperature measurement device during the dioxin/furan performance test.	(1) You must continuously measure the kiln operating temperature during three 4-hour test runs and, from a 12-hour block of time consisting of 1-hour increments, calculate the following two values: (a) The standard deviation of the 12 1-hour temperature measurements (refer to Note 1). (b) 1 percent of the 12-hour block average (2) You must decide which of the two values would provide the greatest variability (*i.e.,* the highest value), and then add this value to the 12-hour block average measured during the compliance testing. The result is the maximum temperature at which your kiln may operate during normal operations.
10. Glaze spray operation equipped with a WS.	a. Establish the operating limit for the average scrubber pressure drop.	Data from the pressure drop measurement device during the PM performance test.	You must continuously measure the scrubber pressure drop, determine and record the block average pressure drop values for the three test runs, and determine and record the 3-hour block average of the recorded pressure drop measurements for the three test runs. The average of the three test runs establishes your minimum site-specific pressure drop operating limit.
	b. Establish the operating limit for the average scrubber liquid flow rate.	Data from the flow rate measurement device during the PM performance test.	You must continuously measure the scrubber liquid flow rate, determine and record the block average flow rate values for the three test runs, and determine and record the 3-hour block average of the recorded flow rate measurements for the three test runs. The average of the three test runs establishes your minimum site-specific liquid flow rate operating limit.
11. Spray dryer	Establish the operating limit for operating temperature.	Data from the temperature measurement device during the dioxin/furan performance test.	You must continuously measure the operating temperature, determine and record the block average temperature values for the three test runs, and determine and record the 4-hour block average of the recorded temperature measurements for the three test runs. The average of the three test runs establishes your minimum site-specific operating limit.
12. Floor tile press dryer	Establish the operating limit for operating temperature.	Data from the temperature measurement device during the dioxin/furan performance test.	You must continuously measure the operating temperature, determine and record the block average temperature values for the three test runs, and determine and record the 4-hour block average of the recorded temperature measurements for the three test runs. The average of the three test runs establishes your maximum site-specific operating limit.

Note 1: The standard deviation of the 12 1-hour temperature measurements is calculated as follows:

$$\sigma = \sqrt{\frac{1}{N} \times \sum_{i=1}^{N} \left(x_i - \mu\right)^2} \quad \text{(Eq. 13)}$$

Where:

σ = standard deviation

x_i = each 1-hour temperature measurement

μ = mean of all 12 1-hour measurements

N = 12 measurements

■ 11. Table 6 to subpart KKKKK is revised to read as follows:

TABLE 6 TO SUBPART KKKKK OF PART 63—INITIAL COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS

As stated in § 63.8605, you must demonstrate initial compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You have demonstrated initial compliance if . . .
1. Collection of all tunnel or roller kilns at the facility.	a. HF, HCl, and Cl_2 emissions must not exceed 62 kg/hr (140 lb/hr) HCl equivalent.	i. You measure HF and HCl emissions for each kiln using Method 26 or 26A of 40 CFR part 60, appendix A–8 or its alternative, ASTM D6735–01 (Reapproved 2009) (incorporated by reference, see § 63.14); or Method 320 of appendix A of this part or its alternative, ASTM D6348–03 (Reapproved 2010) (incorporated by reference, see § 63.14); and ii. You calculate the HCl-equivalent emissions for HF for each kiln using Equation 4 to this subpart; and iii. You sum the HCl-equivalent values for all kilns at the facility using Equation 5 to this subpart; and iv. The facility total HCl-equivalent does not exceed 62 kg/hr (140 lb/hr).
2. Existing floor tile roller kiln	a. PM emissions must not exceed 0.063 kg/Mg (0.13 lb/ton) of fired product.	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3 or Method 29 of 40 CFR part 60, appendix A–8, over the period of the initial performance test, according to the calculations in § 63.8595(f)(1), do not exceed 0.063 kg/Mg (0.13 lb/ton) of fired product; and ii. You establish and have a record of the applicable operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 0.063 kg/Mg (0.13 lb/ton) of fired product.
	b. Hg emissions must not exceed 6.3 E–05 kg/Mg (1.3 E–04 lb/ton) of fired product.	i. The Hg emissions measured using Method 29 of 40 CFR part 60, appendix A–8 or its alternative, ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14), over the period of the initial performance test, do not exceed 6.3 E–05 kg/Mg (1.3 E–04 lb/ton) of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which Hg emissions did not exceed 6.3 E–05 kg/Mg (1.3 E–04 lb/ton) of fired product.
	c. Dioxin/furan emissions must not exceed 2.8 ng/kg of fired product.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 2.8 ng/kg of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 2.8 ng/kg of fired product.
3. Existing wall tile roller kiln	a. PM emissions must not exceed 0.19 kg/Mg (0.37 lb/ton) of fired product.	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3 or Method 29 of 40 CFR part 60, appendix A–8, over the period of the initial performance test, according to the calculations in § 63.8595(f)(1), do not exceed 0.19 kg/Mg (0.37 lb/ton) of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 0.19 kg/Mg (0.37 lb/ton) of fired product.
	b. Hg emissions must not exceed 1.1 E–04 kg/Mg (2.1 E–04 lb/ton) of fired product.	i. The Hg emissions measured using Method 29 of 40 CFR part 60, appendix A–8 or its alternative, ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14), over the period of the initial performance test, do not exceed 1.1 E–04 kg/Mg (2.1 E–04 lb/ton) of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which Hg emissions did not exceed 1.1 E–04 kg/Mg (2.1 E–04 lb/ton) of fired product.
	c. Dioxin/furan emissions must not exceed 0.22 ng/kg of fired product.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 0.22 ng/kg of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 0.22 ng/kg of fired product.
4. Existing first-fire sanitaryware tunnel kiln.	a. PM emissions must not exceed 0.17 kg/Mg (0.34 lb/ton) of greenware fired.	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3 or Method 29 of 40 CFR part 60, appendix A–8, over the period of the initial performance test, according to the calculations in § 63.8595(f)(1), do not exceed 0.17 kg/Mg (0.34 lb/ton) of greenware fired; and

TABLE 6 TO SUBPART KKKKK OF PART 63—INITIAL COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS—Continued

As stated in § 63.8605, you must demonstrate initial compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You have demonstrated initial compliance if . . .
		ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 0.17 kg/Mg (0.34 lb/ton) of greenware fired.
	b. Hg emissions must not exceed 1.3 E–04 kg/Mg (2.6 E–04 lb/ton) of greenware fired.	i. The Hg emissions measured using Method 29 of 40 CFR part 60, appendix A–8 or its alternative, ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14), over the period of the initial performance test, do not exceed 1.3 E–04 kg/Mg (2.6 E–04 lb/ton) of greenware fired; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which Hg emissions did not exceed 1.3 E–04 kg/Mg (2.6 E–04 lb/ton) of greenware fired.
	c. Dioxin/furan emissions must not exceed 3.3 ng/kg of greenware fired.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 3.3 ng/kg of greenware fired; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 3.3 ng/kg of greenware fired.
5. Existing tile glaze line with glaze spraying.	a. PM emissions must not exceed 0.93 kg/Mg (1.9 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3, over the period of the initial performance test, according to the calculations in § 63.8595(f)(2), do not exceed 0.93 kg/Mg (1.9 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 0.93 kg/Mg (1.9 lb/ton) of first-fire glaze sprayed (dry weight basis).
	b. Hg emissions must not exceed 8.0 E–05 kg/Mg (1.6 E–04 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The Hg emissions measured using Method 29 of 40 CFR part 60, appendix A–8 or its alternative, ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14), over the period of the initial performance test, do not exceed 8.0 E–05 kg/Mg (1.6 E–04 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which Hg emissions did not exceed 8.0 E–05 kg/Mg (1.6 E–04 lb/ton) of first-fire glaze sprayed (dry weight basis).
6. Existing sanitaryware manual glaze application.	a. PM emissions must not exceed 18 kg/Mg (35 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3, over the period of the initial performance test, according to the calculations in § 63.8595(f)(2), do not exceed 18 kg/Mg (35 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 18 kg/Mg (35 lb/ton) of first-fire glaze sprayed (dry weight basis).
7. Existing sanitaryware spray machine glaze application.	a. PM emissions must not exceed 6.2 kg/Mg (13 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3, over the period of the initial performance test, according to the calculations in § 63.8595(f)(2), do not exceed 6.2 kg/Mg (13 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 6.2 kg/Mg (13 lb/ton) of first-fire glaze sprayed (dry weight basis).
8. Existing sanitaryware robot glaze application.	a. PM emissions must not exceed 4.5 kg/Mg (8.9 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3, over the period of the initial performance test, according to the calculations in § 63.8595(f)(2), do not exceed 4.5 kg/Mg (8.9 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 4.5 kg/Mg (8.9 lb/ton) of first-fire glaze sprayed (dry weight basis).
9. Existing floor tile spray dryer	a. Dioxin/furan emissions must not exceed 19 ng/kg of throughput processed.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 19 ng/kg of throughput processed; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 19 ng/kg of throughput processed.

TABLE 6 TO SUBPART KKKKK OF PART 63—INITIAL COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS—Continued

As stated in § 63.8605, you must demonstrate initial compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You have demonstrated initial compliance if . . .
10. Existing wall tile spray dryer	a. Dioxin/furan emissions must not exceed 0.058 ng/kg of throughput processed.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 0.058 ng/kg of throughput processed; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 0.058 ng/kg of throughput processed.
11. Existing floor tile press dryer	a. Dioxin/furan emissions must not exceed 0.024 ng/kg of throughput processed.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 0.024 ng/kg of throughput processed; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 0.024 ng/kg of throughput processed.
12. New or reconstructed floor tile roller kiln.	a. PM emissions must not exceed 0.019 kg/Mg (0.037 lb/ton) of fired product.	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3 or Method 29 of 40 CFR part 60, appendix A–8, over the period of the initial performance test, according to the calculations in § 63.8595(f)(1), do not exceed 0.019 kg/Mg (0.037 lb/ton) of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 0.019 kg/Mg (0.037 lb/ton) of fired product.
	b. Hg emissions must not exceed 2.0 E–05 kg/Mg (3.9 E–05 lb/ton) of fired product.	i. The Hg emissions measured using Method 29 of 40 CFR part 60, appendix A–8 or its alternative, ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14), over the period of the initial performance test, do not exceed 2.0 E–05 kg/Mg (3.9 E–05 lb/ton) of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which Hg emissions did not exceed 2.0 E–05 kg/Mg (3.9 E–05 lb/ton) of fired product.
	c. Dioxin/furan emissions must not exceed 1.3 ng/kg of fired product.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 1.3 ng/kg of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 1.3 ng/kg of fired product.
13. New or reconstructed wall tile roller kiln.	a. PM emissions must not exceed 0.19 kg/Mg (0.37 lb/ton) of fired product.	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3 or Method 29 of 40 CFR part 60, appendix A–8, over the period of the initial performance test, according to the calculations in § 63.8595(f)(1), do not exceed 0.19 kg/Mg (0.37 lb/ton) of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 0.19 kg/Mg (0.37 lb/ton) of fired product.
	b. Hg emissions must not exceed 1.1 E–04 kg/Mg (2.1 E–04 lb/ton) of fired product.	i. The Hg emissions measured using Method 29 of 40 CFR part 60, appendix A–8 or its alternative, ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14), over the period of the initial performance test, do not exceed 1.1 E–04 kg/Mg (2.1 E–04 lb/ton) of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which Hg emissions did not exceed 1.1 E–04 kg/Mg (2.1 E–04 lb/ton) of fired product.
	c. Dioxin/furan emissions must not exceed 0.22 ng/kg of fired product.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 0.22 ng/kg of fired product; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 0.22 ng/kg of fired product.

TABLE 6 TO SUBPART KKKKK OF PART 63—INITIAL COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS—Continued

As stated in § 63.8605, you must demonstrate initial compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You have demonstrated initial compliance if . . .
14. New or reconstructed first-fire sanitaryware tunnel kiln.	a. PM emissions must not exceed 0.048 kg/Mg (0.095 lb/ton) of greenware fired.	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3 or Method 29 of 40 CFR part 60, appendix A–8, over the period of the initial performance test, according to the calculations in § 63.8595(f)(1), do not exceed 0.048 kg/Mg (0.095 lb/ton) of greenware fired; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 0.048 kg/Mg (0.095 lb/ton) of greenware fired.
	b. Hg emissions must not exceed 6.1 E–05 kg/Mg (1.3 E–04 lb/ton) of greenware fired.	i. The Hg emissions measured using Method 29 of 40 CFR part 60, appendix A–8 or its alternative, ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14), over the period of the initial performance test, do not exceed 6.1 E–05 kg/Mg (1.3 E–04 lb/ton) of greenware fired; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which Hg emissions did not exceed 6.1 E–05 kg/Mg (1.3 E–04 lb/ton) of greenware fired.
	c. Dioxin/furan emissions must not exceed 0.99 ng/kg of greenware fired.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 0.99 ng/kg of greenware fired; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 0.99 ng/kg of greenware fired.
15. New or reconstructed tile glaze line with glaze spraying.	a. PM emissions must not exceed 0.31 kg/Mg (0.61 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3, over the period of the initial performance test, according to the calculations in § 63.8595(f)(2), do not exceed 0.31 kg/Mg (0.61 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 0.31 kg/Mg (0.61 lb/ton) of first-fire glaze sprayed (dry weight basis).
	b. Hg emissions must not exceed 8.0 E–05 kg/Mg (1.6 E–04 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The Hg emissions measured using Method 29 of 40 CFR part 60, appendix A–8 or its alternative, ASTM D6784–02 (Reapproved 2008) (incorporated by reference, see § 63.14), over the period of the initial performance test, do not exceed 8.0 E–05 kg/Mg (1.6 E–04 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which Hg emissions did not exceed 8.0 E–05 kg/Mg (1.6 E–04 lb/ton) of first-fire glaze sprayed (dry weight basis).
16. New or reconstructed sanitaryware manual glaze application.	a. PM emissions must not exceed 2.0 kg/Mg (3.9 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3, over the period of the initial performance test, according to the calculations in § 63.8595(f)(2), do not exceed 2.0 kg/Mg (3.9 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 2.0 kg/Mg (3.9 lb/ton) of first-fire glaze sprayed (dry weight basis).
17. New or reconstructed sanitaryware spray machine glaze application.	a. PM emissions must not exceed 1.6 kg/Mg (3.2 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3, over the period of the initial performance test, according to the calculations in § 63.8595(f)(2), do not exceed 1.6 kg/Mg (3.2 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 1.6 kg/Mg (3.2 lb/ton) of first-fire glaze sprayed (dry weight basis).
18. New or reconstructed sanitaryware robot glaze application.	a. PM emissions must not exceed 1.2 kg/Mg (2.3 lb/ton) of first-fire glaze sprayed (dry weight basis).	i. The PM emissions measured using Method 5 of 40 CFR part 60, appendix A–3, over the period of the initial performance test, according to the calculations in § 63.8595(f)(2), do not exceed 1.2 kg/Mg (2.3 lb/ton) of first-fire glaze sprayed (dry weight basis); and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which PM emissions did not exceed 1.2 kg/Mg (2.3 lb/ton) of first-fire glaze sprayed (dry weight basis).

TABLE 6 TO SUBPART KKKKK OF PART 63—INITIAL COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS—Continued

As stated in § 63.8605, you must demonstrate initial compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You have demonstrated initial compliance if . . .
19. New or reconstructed floor tile spray dryer.	a. Dioxin/furan emissions must not exceed 0.071 ng/kg of throughput processed.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 0.071 ng/kg of throughput processed; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 0.071 ng/kg of throughput processed.
20. New or reconstructed wall tile spray dryer.	a. Dioxin/furan emissions must not exceed 0.058 ng/kg of throughput processed.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 0.058 ng/kg of throughput processed; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 0.058 ng/kg of throughput processed.
21. New or reconstructed floor tile press dryer.	a. Dioxin/furan emissions must not exceed 0.024 ng/kg of throughput processed.	i. The dioxin/furan emissions measured using Method 23 of 40 CFR part 60, appendix A–7, over the period of the initial performance test, do not exceed 0.024 ng/kg of throughput processed; and ii. You establish and have a record of the operating limits listed in Table 2 to this subpart over the period of the initial performance test during which dioxin/furan emissions did not exceed 0.024 ng/kg of throughput processed.
22. Existing, new, or reconstructed sanitaryware shuttle kiln.	a. Minimize HAP emissions	i. Use natural gas, or equivalent, as the kiln fuel; and ii. Develop a designed firing time and temperature cycle for the sanitaryware shuttle kiln. You must either program the time and temperature cycle into your kiln or track each step on a log sheet; and iii. Label each sanitaryware shuttle kiln with the maximum load (in tons) of greenware that can be fired in the kiln during a single firing cycle; and iv. Develop maintenance procedures for each kiln that, at a minimum, specify the frequency of inspection and maintenance of temperature monitoring devices, controls that regulate air-to-fuel ratios, and controls that regulate firing cycles.

■ 12. Table 7 to subpart KKKKK is revised to read as follows:

TABLE 7 TO SUBPART KKKKK OF PART 63—CONTINUOUS COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS

As stated in § 63.8620, you must demonstrate continuous compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You must demonstrate continuous compliance by . . .	Or by . . .
1. Tunnel or roller kiln equipped with a DIFF or DLS/FF.	a. Each emission limit in Table 1 to this subpart and each operating limit in Item 1 of Table 2 to this subpart for kilns equipped with DIFF or DLS/FF.	i. If you use a bag leak detection system, as prescribed in § 63.8450(e), initiating corrective action within 1 hour of a bag leak detection system alarm and completing corrective actions in accordance with your OM&M plan; operating and maintaining the fabric filter such that the alarm is not engaged for more than 5 percent of the total operating time in a 6-month block reporting period; in calculating this operating time fraction, if inspection of the fabric filter demonstrates that no corrective action is required, no alarm time is counted; if corrective action is required, each alarm is counted as a minimum of 1 hour; if you take longer than 1 hour to initiate corrective action, the alarm time is counted as the actual amount of time taken by you to initiate corrective action; and	(1) Performing VE observations of the DIFF or DLS/FF stack at the frequency specified in § 63.8620(e) using Method 22 of 40 CFR part 60, appendix A–7; and maintaining no VE from the DIFF or DLS/FF stack; or (2) Maintaining your kiln operating temperature within the range of acceptable temperatures (*i.e.,* temperature profile for each kiln and product; for any incidence where the kiln is operating outside of its acceptable temperature range (*i.e.,* exceeds its temperature profile) for the product being fired, performing VE observations of the DIFF or DLS/FF stack as specified in § 63.8620(e) using Method 22 of 40 CFR part 60, appendix A–7; and observing no VE from the DIFF or DLS/FF stack.

TABLE 7 TO SUBPART KKKKK OF PART 63—CONTINUOUS COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS—Continued

As stated in § 63.8620, you must demonstrate continuous compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You must demonstrate continuous compliance by . . .	Or by . . .
		ii. Verifying that lime is free-flowing via a load cell, carrier gas/lime flow indicator, carrier gas pressure drop measurement system, or other system; recording all monitor or sensor output, and if lime is found not to be free flowing, promptly initiating and completing corrective actions in accordance with your OM&M plan; recording the feeder setting once each shift of operation to verify that the feeder setting is being maintained at or above the level established during the HF/HCl performance test in which compliance was demonstrated.	
2. Tunnel or roller kiln equipped with a WS.	a. Each emission limit in Table 1 to this subpart and each operating limit in Item 2 of Table 2 to this subpart for kilns equipped with WS.	i. Collecting the scrubber liquid pH data according to § 63.8600(a); reducing the scrubber liquid pH data to 3-hour block averages according to § 63.8600(a); maintaining the average scrubber liquid pH for each 3-hour block period at or above the average scrubber liquid pH established during the HF/HCl performance test in which compliance was demonstrated; and	
		ii. Collecting the scrubber liquid flow rate data according to § 63.8600(a); reducing the scrubber liquid flow rate data to 3-hour block averages according to § 63.8600(a); maintaining the average scrubber liquid flow rate for each 3-hour block period at or above the highest average scrubber liquid flow rate established during the HF/HCl and PM performance tests in which compliance was demonstrated.	
3. Tunnel or roller kiln equipped with an ACI system.	Each emission limit in Table 1 to this subpart and each operating limit in Item 3 of Table 2 to this subpart for kilns equipped with ACI system.	Collecting the carbon flow rate data according to § 63.8600(a); reducing the carbon flow rate data to 3-hour block averages according to § 63.8600(a); maintaining the average carbon flow rate for each 3-hour block period at or above the highest average carbon flow rate established during the Hg and dioxin/furan performance tests in which compliance was demonstrated.	
4. Tunnel or roller kiln intending to comply with dioxin/furan emission limit without an ACI system.	Each emission limit in Table 1 to this subpart and each operating limit in Item 4 of Table 2 to this subpart for kilns intending to comply with dioxin/furan emission limit without an ACI system.	Collecting the operating temperature data according to § 63.8600(a); and maintaining the operating temperature at or below the highest operating temperature established during the dioxin/furan performance test in which compliance was demonstrated.	Collecting the operating temperature data according to § 63.8600(a); reducing the operating temperature data to a 12-hour block average; and maintaining the average operating temperature for each 12-hour block period at or below the highest operating temperature established during the dioxin/furan performance test in which compliance was demonstrated.
5. Tunnel or roller kiln with no add-on control.	a. Each emission limit in Table 1 to this subpart and each operating limit in Item 5 of Table 2 to this subpart for tunnel or roller kilns with no add-on control.	i. Performing VE observations of the stack at the frequency specified in § 63.8620(e) using Method 22 of 40 CFR part 60, appendix A–7; and maintaining no VE from the stack; and	(1) Maintaining your kiln operating temperature within the range of acceptable temperatures (*i.e.,* temperature profile established for each kiln and product for any incidence where the kiln is operating outside of its acceptable temperature range (*i.e.,* exceeds its temperature profile) for the product being fired, performing VE observations of the DIFF or DLS/FF stack as specified in § 63.8620(e) using Method 22 of 40 CFR part 60, appendix A–7; and observing no VE from the DIFF or DLS/FF stack.

TABLE 7 TO SUBPART KKKKK OF PART 63—CONTINUOUS COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS—Continued

As stated in § 63.8620, you must demonstrate continuous compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You must demonstrate continuous compliance by . . .	Or by . . .
		ii. If your last calculated total facility maximum potential HCl-equivalent was not at or below the health-based standard in Table 1 to this subpart, collecting the kiln process rate data according to § 63.8600(a); reducing the kiln process rate data to 3-hour block averages according to § 63.8600(a); maintaining the average kiln process rate for each 3-hour block period at or below the kiln process rate determined according to § 63.8595(g)(1); and	
		iii. Collecting the operating temperature data according to § 63.8600(a); and maintaining the operating temperature at or below the highest operating temperature established during the dioxin/furan performance test in which compliance was demonstrated.	(1) Collecting the operating temperature data according to § 63.8600(a); reducing the operating temperature data to a 12-hour block average; and maintaining the average operating temperature for each 12-hour block period at or below the highest operating temperature established during the dioxin/furan performance test in which compliance was demonstrated.
6. Glaze spray operation equipped with a FF.	Each emission limit in Table 1 to this subpart and each operating limit in Item 6 of Table 2 to this subpart for glaze spray operations equipped with a FF.	If you use a bag leak detection system, initiating corrective action within 1 hour of a bag leak detection system alarm and completing corrective actions in accordance with your OM&M plan; operating and maintaining the fabric filter such that the alarm is not engaged for more than 5 percent of the total operating time in a 6-month block reporting period; in calculating this operating time fraction, if inspection of the fabric filter demonstrates that no corrective action is required, no alarm time is counted; if corrective action is required, each alarm is counted as a minimum of 1 hour; if you take longer than 1 hour to initiate corrective action, the alarm time is counted as the actual amount of time taken by you to initiate corrective action.	Performing VE observations of the FF stack at the frequency specified in § 63.8620(e) using Method 22 of 40 CFR part 60, appendix A–7; and maintaining no VE from the FF stack.
7. Glaze spray operation equipped with a WS.	a. Each emission limit in Table 1 to this subpart and each operating limit in Item 7 of Table 2 to this subpart for kilns equipped with WS.	i. Collecting the scrubber pressure drop data according to § 63.8600(a); reducing the scrubber pressure drop data to 3-hour block averages according to § 63.8600(a); maintaining the average scrubber pressure drop for each 3-hour block period at or above the average pressure drop established during the PM performance test in which compliance was demonstrated; and	
		ii. Collecting the scrubber liquid flow rate data according to § 63.8600(a); reducing the scrubber liquid flow rate data to 3-hour block averages according to § 63.8600(a); maintaining the average scrubber liquid flow rate for each 3-hour block period at or above the average scrubber liquid flow rate established during the PM performance test in which compliance was demonstrated.	
8. Glaze spray operation equipped with a water curtain.	a. Each emission limit in Table 1 to this subpart and each operating limit in Item 8 of Table 2 to this subpart for kilns equipped with a water curtain.	i. Conducting daily inspections to verify the presence of water flow to the wet control system; and	

TABLE 7 TO SUBPART KKKKK OF PART 63—CONTINUOUS COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS—Continued

As stated in § 63.8620, you must demonstrate continuous compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You must demonstrate continuous compliance by . . .	Or by . . .
		ii. Conducting annual inspections of the interior of the control equipment (if applicable) to determine the structural integrity and condition of the control equipment; and iii. Recording as deviations any observations of particulates or other impurities getting into the glaze that has been sprayed onto a piece of ware and completing corrective actions in accordance with your OM&M plan.	
9. Glaze spray operation equipped with baffles.	Each emission limit in Table 1 to this subpart and each operating limit in Item 9 of Table 2 to this subpart for kilns equipped with baffles.	Conducting an annual visual inspection of the baffles to confirm the baffles are in place.	
10. Spray dryer	Each emission limit in Table 1 to this subpart and each operating limit in Item 10 of Table 2 to this subpart for spray dryers.	Collecting the operating temperature data according to § 63.8600(a); reducing the operating temperature data to 4-hour block averages according to § 63.8600(a); maintaining the average operating temperature for each 4-hour block period at or above the average operating temperature established during the dioxin/furan performance test in which compliance was demonstrated.	
11. Floor tile press dryer.	Each emission limit in Table 1 to this subpart and each operating limit in Item 11 of Table 2 to this subpart for floor tile press dryers.	Collecting the operating temperature data according to § 63.8600(a); reducing the operating temperature data to 4-hour block averages according to § 63.8600(a); maintaining the average operating temperature for each 4-hour block period at or below the average operating temperature established during the dioxin/furan performance test in which compliance was demonstrated.	
12. Sanitaryware shuttle kiln.	a. Minimize HAP emissions.	i. Maintaining records documenting your use of natural gas, or an equivalent fuel, as the kiln fuel at all times except during periods of natural gas curtailment or supply interruption; and ii. If you intend to use an alternative fuel, submitting a notification of alternative fuel use within 48 hours of the declaration of a period of natural gas curtailment or supply interruption, as defined in § 63.8665; and. iii. Submitting a report of alternative fuel use within 10 working days after terminating the use of the alternative fuel, as specified in § 63.8635(g); and iv. Using a designed firing time and temperature cycle for each sanitaryware shuttle kiln; and v. For each firing load, documenting the total tonnage of greenware placed in the kiln to ensure that it is not greater than the maximum load identified in Item 1.a.iii of Table 3 to this subpart; and vi. Following maintenance procedures for each kiln that, at a minimum, specify the frequency of inspection and maintenance of temperature monitoring devices, controls that regulate air-to-fuel ratios, and controls that regulate firing cycles; and	

TABLE 7 TO SUBPART KKKKK OF PART 63—CONTINUOUS COMPLIANCE WITH EMISSION LIMITATIONS AND WORK PRACTICE STANDARDS—Continued

As stated in § 63.8620, you must demonstrate continuous compliance with each emission limitation and work practice standard that applies to you according to the following table:

For each . . .	For the following . . .	You must demonstrate continuous compliance by . . .	Or by . . .
		vii. Developing and maintaining records for each sanitaryware shuttle kiln, as specified in § 63.8640.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2018–0047; FRL–10000–79]

Isotianil; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes a tolerance for residues of isotianil in or on banana. Bayer CropScience requested this tolerance under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective November 1, 2019. Objections and requests for hearings must be received on or before December 31, 2019, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2018–0047, is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Michael L. Goodis, P.E., Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (703) 305–7090; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Publishing Office's e-CFR site at *http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.* To access the OCSPP test guidelines referenced in this document electronically, please go to *http://www.epa.gov/ocspp* and select "Test Methods and Guidelines."

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2018–0047 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before December 31, 2019. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2018–0047, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.* Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of April 11, 2018 (83 FR 15528) (FRL–9975–57), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 7E8656) by Bayer CropScience, 2 T.W. Alexander Drive, Research Triangle Park, NC 27709. The petition requested that 40 CFR part 180 be amended by establishing a tolerance for residues of the fungicide isotianil in or on banana at 0.01 parts per million (ppm). That document referenced a summary of the petition prepared by

Bayer CropScience, the registrant, which is available in the docket, *http://www.regulations.gov.* There were no comments received in response to the notice of filing.

Based upon review of the data supporting the petition, EPA has recommended the tolerance be set at 0.02 ppm in or on banana. The reason for this change is explained in Unit IV.C.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) of FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .''

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for isotianil including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with isotianil follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

Subchronic and chronic studies indicate that the liver is the primary target organ for isotianil in all species except for rats, in which the primary target organ for isotianil was the forestomach. Liver effects include organ weight increases, histopathology alterations, and associated enzyme and cholesterol increases. Hyperplasia was observed in the forestomach of rats in longer duration studies. Kidney effects, seen in dogs and rats, included chronic nephropathy and organ weight increases with longer exposure durations. Altered hematological profiles and spleen weight changes were also seen near the limit dose in longer duration studies of dogs and rats. Skin effects/hair loss were seen at high doses, but either occurred above the lowest-observed-adverse-effect-level (LOAEL) or were considered not adverse. Lung bronchiolization of the alveolar wall was observed in the longer duration dietary rat studies.

No evidence of neurotoxicity was observed in the isotianil guideline studies. The database does not include any guideline neurotoxicity studies but limited functional observational battery and motor activity-related measurements were incorporated in the design of the available subchronic and chronic rat and dog guideline studies. No signs of neurotoxicity were noted at any dose in the database.

Evidence of quantitative susceptibility was observed in the developmental rabbit and two-generation rat reproductive toxicity studies. The 2-generation reproductive toxicity study in rats showed no parental or reproductive effects up to the highest dose tested; however, both generations of offspring exhibited decreased body weight in both sexes. Decreased fetal weights were observed in the absence of maternal toxicity in the developmental rabbit study. The immunotoxicity study was waived based on the available hazard and exposure data.

There was a slight increase in liver tumors in male mice at the highest dose tested, but the rat carcinogenicity study did not show an increased incidence of tumors in either sex. Studies showed no evidence of mutagenicity or genotoxicity. Therefore, isotianil is classified as ''not likely to be carcinogenic to humans.''

Additional studies were available for the select metabolites of isotianil, DCIT-acid and anthranilonitrile. In a subchronic rat oral toxicity study, DCIT-acid showed no evidence of toxic effects up to 349 mg/kg and DCIT-acid was not mutagenic with or without metabolic activation. A developmental study with DCIT-acid noted toxicity in both the maternal (mortality, clinical signs) and fetal (decreased fetal weight) groups at 250 mg/kg, with a no-observed-adverse-effect-level (NOAEL) of 50 mg/kg. Anthranilonitrile was not mutagenic with or without metabolic activation.

Specific information on the studies received and the nature of the adverse effects caused by isotianil as well as the NOAEL and the LOAEL from the toxicity studies can be found at *http://www.regulations.gov* in document ''Isotianil. Human Health Risk Assessment of the Proposed Tolerance for Residues on Imported Bananas without a U.S. Registration'' on pages 21–25 in docket ID number EPA–HQ–OPP–2018–0047.

B. Toxicological Points of Departure/Levels of Concern

Once a pesticide's toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of the reference value for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see *http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/assessing-human-health-risk-pesticides.*

A summary of the toxicological endpoint for isotianil used for human risk assessment is shown in Table 1 of this unit.

TABLE 1—SUMMARY OF TOXICOLOGICAL DOSE AND ENDPOINT FOR ISOTIANIL FOR USE IN HUMAN HEALTH RISK ASSESSMENT

Exposure/scenario	Point of departure and uncertainty/safety factors	PAD for risk assessment	Study and toxicological effects
Acute dietary (General population, including females 13 to 49 years of age).	An appropriate endpoint was not identified for acute exposure.		
Chronic dietary (All populations)	NOAEL = 27 mg/kg/day UF_A = 10× UF_H = 10× FQPA SF = 1×	cPAD = 0.27 mg/kg/day	Chronic Dog LOAEL = 107/110 (M/F) mg/kg/day based on clinical chemistry, hematology, liver weight and histopathology, spleen weight and appearance, increased hematopoiesis, and kidney weight and histopathology.
Cancer (Oral, dermal, inhalation)	Classification: "Not Likely to be Carcinogenic to Humans."		

FQPA SF = Food Quality Protection Act Safety Factor. LOAEL = lowest-observed-adverse-effect-level. mg/kg/day = milligram/kilogram/day. NOAEL = no-observed-adverse-effect-level. PAD = population adjusted dose (c = chronic). UF = uncertainty factor. UF_A = extrapolation from animal to human (interspecies). UF_H = potential variation in sensitivity among members of the human population (intraspecies).

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to isotianil, EPA considered exposure under the petitioned-for tolerance. EPA assessed the dietary exposure to isotianil in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a 1-day or single exposure. No such effects were identified in the toxicological studies for isotianil; therefore, a quantitative acute dietary exposure assessment was unnecessary.

ii. *Chronic exposure.* In conducting the chronic dietary exposure assessment, EPA used the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM–FCID) Version 3.16, which uses food consumption data from the U.S. Department of Agriculture's (USDA's) National Health and Nutrition Examination Survey, ''What We Eat in America'' (NHANES/WWEIA) from 2003 through 2008. As to residue levels in food, EPA used the tolerance value for parent isotianil (0.02 ppm) plus the maximum observed residue value of the DCIT-acid metabolite from the magnitude of the residue study. The maximum DCIT-acid residue observed in the magnitude of the residue study was <0.010 ppm, so the total isotianil residue estimate used in the chronic assessment was 0.030 ppm. It is EPA's typical practice to include plantains in dietary assessments that include bananas, so EPA used the banana residue data to estimate a value for residues of isotianil in/on plantains. The chronic assessment made use of EPA's 2018 default processing factor for dried bananas and dried plantains (processing factor of 4.8x). HED assumed 100% crop treated (PCT) for all commodities in the chronic assessment.

iii. *Cancer.* Based on the data summarized in Unit III.A., EPA has concluded that isotianil does not pose a cancer risk to humans. Therefore, a dietary exposure assessment for the purpose of assessing cancer risk was unnecessary.

iv. *Anticipated residue and PCT information.* EPA did not use anticipated residue or PCT information in the dietary assessment for isotianil. Tolerance level residues and 100 PCT were assumed for all food commodities.

2. *Dietary exposure from drinking water.* Isotianil is not registered for use in the U.S. Therefore, residues are not expected in groundwater or surface water sources of drinking water, and no exposure to isotianil through drinking water is anticipated.

3. *From non-dietary exposure.* The term ''residential exposure'' is used in this document to refer to non-occupational, non-dietary exposure (*e.g.,* for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Isotianil is not currently registered for any uses that could result in residential exposures.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

EPA has not found isotianil to share a common mechanism of toxicity with any other substances, and isotianil does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that isotianil does not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's website at *http://www.epa.gov/pesticides/cumulative.*

D. Safety Factor for Infants and Children

1. *In general.* Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10x) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure, unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the FQPA Safety Factor (SF). In applying this provision, EPA either retains the default value of 10x, or uses a different safety factor when reliable data available to EPA support the choice of a different factor.

2. *Prenatal and postnatal sensitivity.* Quantitative susceptibility was observed in the 2-generation rat reproductive toxicity study in rats and in the developmental rabbit study. In the rat reproduction study, decreased pup body weights were observed in the absence of parental toxicity. The developmental rabbit study noted decreased fetal weights in the absence of maternal effects at the highest dose tested (1,000 mg/kg/day). Although susceptibility was observed, clear NOAELs were observed and the doses selected for risk assessment are protective of the observed susceptibility; therefore, there are no residual uncertainties with respect to pre- or postnatal toxicity.

3. *Conclusion.* EPA has determined that reliable data show the safety of

infants and children would be adequately protected if the FQPA SF were reduced to 1x. That decision is based on the following findings:

i. The toxicity database for isotianil is complete.

ii. There is no indication that isotianil is a neurotoxic chemical and there is no need for a developmental neurotoxicity study or additional UFs to account for neurotoxicity.

iii. There was evidence of quantitative susceptibility in the database, observed in the rabbit developmental toxicity study and the rat reproductive toxicity study; however, the degree of concern is low because clear NOAELs were identified, and the endpoint selected for risk assessment is protective of the observed susceptibility.

iv. There are no residual uncertainties identified in the exposure databases. The dietary food exposure assessments were performed based on 100 PCT and tolerance-level residues. These assessments will not underestimate the exposure and risks posed by isotianil.

E. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

There are no residential uses for isotianil, and therefore aggregate exposure and risk estimates are equivalent to dietary exposure and risk estimates, which are not of concern.

1. *Acute risk.* An acute aggregate risk assessment takes into account acute exposure estimates from dietary consumption of food and drinking water. No adverse effect resulting from a single oral exposure was identified and no acute dietary endpoint was selected. Therefore, isotianil is not expected to pose an acute risk.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that chronic exposure to isotianil from food is not of concern for the general U.S. population and all population subgroups. The population subgroup that received the greatest exposure estimate was the children 1 to 2 years old subgroup, which utilized <1% of the cPAD. There are no residential uses for isotianil, so aggregate risk is equivalent to dietary risk, and is not of concern.

3. *Aggregate cancer risk for U.S. population.* Based on the lack of evidence of carcinogenicity in two adequate rodent carcinogenicity studies, isotianil is not expected to pose a cancer risk to humans.

4. *Determination of safety.* Based on this risk assessment, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to isotianil residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (Method 01390, a high-performance liquid chromatography with tandem mass spectrometry (HPLC–MS/MS method) is adequate to measure residues of isotianil in/on plant matrices. Method 01390 has a limit of quantification (LOQ) of 0.01 ppm for isotianil.

The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; email address: *residuemethods@epa.gov.*

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has not established an MRL for isotianil.

C. Revisions to Petitioned-For Tolerances

The petitioner's requested tolerance of 0.01 ppm for residues of isotianil in/on banana is based on magnitude of the residue data collected for bagged bananas. EPA standard practice is to use unbagged banana residue data for tolerance establishment. Based on magnitude of the residue data collected for unbagged bananas and the Organization for Economic Development and Cooperation (OECD) tolerance calculation procedure, EPA is establishing a tolerance of 0.02 ppm for residues of isotianil in or on banana.

V. Conclusion

Therefore, tolerances are established for residues of isotianil in or on banana at 0.02 ppm.

VI. Statutory and Executive Order Reviews

This action establishes a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), nor is it considered a regulatory action under Executive Order 13771, entitled ''Reducing Regulations and Controlling Regulatory Costs'' (82 FR 9339, February 3, 2017). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: October 10, 2019.

Daniel Rosenblatt,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Add § 180.708 to subpart C to read as follows:

§ 180.708 Isotianil; tolerances for residues.

(a) *General.* Tolerances are established for residues of isotianil, including its metabolites and degradates, in or on the commodities in the table below. Compliance with the tolerance level specified in the table in this paragraph (a) is to be determined by measuring only isotianil (3,4-dichloro-N-(2-cyanophenyl)-5-isothiazolecarboxamide) in or on the commodity.

Commodity	Parts per million
Banana [1]	0.02

[1] There are no U.S. registrations for bananas as of November 1, 2019.

(b) [Reserved]

[FR Doc. 2019–23385 Filed 10–31–19; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL SERVICES AGENCY

40 CFR Part 282

[EPA–R01–UST–2019–0421; FRL–10001-60–Region 1]

New Hampshire: Final Approval of State Underground Storage Tank Program Revisions, Codification, and Incorporation by Reference

AGENCY: Environmental Services Agency (EPA).

ACTION: Direct final rule.

SUMMARY: Pursuant to the Resource Conservation and Recovery Act (RCRA or Act), the Environmental Services Agency (EPA) is taking direct final action to approve revisions to the State of New Hampshire's Underground Storage Tank (UST) program submitted by the New Hampshire Department of Environmental Services (NH DES). This action also codifies EPA's approval of New Hampshire's State program and incorporates by reference those provisions of the State regulations that we have determined meet the requirements for approval. The provisions will be subject to EPA's inspection and enforcement authorities under sections 9005 and 9006 of RCRA Subtitle I and other applicable statutory and regulatory provisions.

DATES: This rule is effective December 31, 2019, unless EPA receives adverse comment by December 2, 2019. If EPA receives adverse comments, it will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register, as of December 31, 2019, in accordance with 5 U.S.C. 552(a) and 1 CFR part 51.

ADDRESSES: Submit your comments by one of the following methods:

1. *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions for submitting comments.
2. *Email: hanamoto.susan@epa.gov.*
3. *Mail:* Susan Hanamoto, RCRA Waste Management, UST, and Pesticides Section; Land, Chemicals, and Redevelopment Division; EPA Region 1, 5 Post Office Square, Suite 100, (Mail Code 07–1), Boston, MA 02109–3912.
4. *Hand Delivery or Courier:* Deliver your comments to Susan Hanamoto, RCRA Waste Management, UST, and Pesticides Section; Land, Chemicals, and Redevelopment Division; EPA Region 1, 5 Post Office Square, Suite 100, (Mail Code 07–1), Boston, MA 02109–3912. Such deliveries are only accepted during the Regional Office's normal hours of operation.

Instructions: Direct your comments to Docket ID No. EPA–R01–UST–2019–0421. EPA's policy is that all comments received will be included in the public docket without change and may be available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov,* or email. The Federal website, *http://www.regulations.gov,* is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and also with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties, and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information might not be publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, might be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy.

IBR and supporting material: You can view and copy the documents that form the basis for this codification and associated publicly available materials from 8:30 a.m. to 4:00 p.m. Monday through Friday at the following location: EPA Region 1 Library, 5 Post Office Square, 1st floor, Boston, MA 02109–3912; by appointment only; tel: (617) 918–1990. Interested persons wanting to examine these documents should make an appointment with the office at least two weeks in advance.

FOR FURTHER INFORMATION CONTACT:
Susan Hanamoto, (617) 918–1219, *hanamoto.susan@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Approval of Revisions to New Hampshire's Underground Storage Tank Program

A. Why are revisions to state programs necessary?

States that have received final approval from the EPA under RCRA section 9004(b) of RCRA, 42 U.S.C. 6991c(b), must maintain an underground storage tank program that is equivalent to, consistent with, and no less stringent than the Federal UST program. Either EPA or the approved state may initiate program revision. When EPA makes revisions to the regulations that govern the UST program, states must revise their programs to comply with the updated regulations and submit these revisions to the EPA for approval. Program revision may be necessary when the controlling Federal or state statutory or regulatory authority is modified or when responsibility for the state program is shifted to a new agency or agencies.

B. What decisions has the EPA made in this rule?

On June 24, 2019, in accordance with 40 CFR 281.51(a), New Hampshire submitted a complete program revision application seeking the EPA approval for its UST program revisions (State Application). New Hampshire's revisions correspond to the EPA final rule published on July 15, 2015 (80 FR 41566), which revised the 1988 UST regulations and the 1988 state program approval (SPA) regulations (2015 Federal Revisions). As required by 40 CFR 281.20, the State Application contains the following: A transmittal letter requesting approval, a description of the program and operating procedures, a demonstration of the State's procedures to ensure adequate enforcement, a Memorandum of Agreement outlining the roles and responsibilities of the EPA and the implementing agency, a statement of certification from the Attorney General, and copies of all relevant state statutes and regulations. We have reviewed the State Application and determined that the revisions to New Hampshire's UST program are equivalent to, consistent with, and no less stringent than the corresponding Federal requirements in subpart C of 40 CFR part 281, and that the New Hampshire program provides for adequate enforcement of compliance (40 CFR 281.11(b)). Therefore, the EPA grants New Hampshire final approval to operate its UST program with the changes described in the program revision application, and as outlined below in section I.G of this document.

C. What is the effect of this approval decision?

This action does not impose additional requirements on the regulated community because the regulations being approved by this rule are already effective in New Hampshire, and they are not changed by this action. This action merely approves the existing State regulations as meeting the Federal requirements and renders them federally enforceable.

D. Why is EPA using a direct final rule?

EPA is publishing this direct final rule concurrent with a proposed rule because we view this as a noncontroversial action and anticipate no adverse comment. EPA is providing an opportunity for public comment now.

E. What happens if the EPA receives comments that oppose this action?

Along with this direct final, the EPA is publishing a separate document in the ''Proposed Rules'' Section of this issue of the **Federal Register** that serves as the proposal to approve the State's UST program revisions, providing opportunity for public comment. If EPA receives comments that oppose this approval, EPA will withdraw the direct final rule by publishing a document in the **Federal Register** before the rule becomes effective. The EPA will base any further decision on the approval of the State program changes after considering all comments received during the comment period. EPA will then address all public comments in a later final rule. You may not have another opportunity to comment. If you want to comment on this approval, you must do so at this time.

F. For what has New Hampshire previously been approved?

On June 19, 1991, the EPA finalized a rule approving the UST program, effective July 19, 1991, to operate in lieu of the Federal program. On November 2, 1993, effective January 3, 1994, the EPA codified the approved New Hampshire program, incorporating by reference the State statutes and regulatory provisions that are subject to EPA's inspection and enforcement authorities under RCRA sections 9005 and 9006, 42 U.S.C. 6991d and 6991e, and other applicable statutory and regulatory provisions.

G. What changes are we approving with this action?

On June 24, 2019, in accordance with 40 CFR 281.51(a), New Hampshire submitted a complete application for final approval of its UST program revisions adopted on October 10, 2018. The EPA now makes an immediate final decision, subject to receipt of written comments that oppose this action, that New Hampshire's UST program revisions satisfy all of the requirements necessary to qualify for final approval. Therefore, EPA grants New Hampshire final approval for the following program changes:

Required Federal element	Implementing State authority
40 CFR 281.30, New UST Systems and Notification	Env-Or 401.03(k), 404.01–404.03, 404.10, 405.01–405.06, 405.07(d), 405.08, 405.09, 407, 408.05(d).
40 CFR 281.31, Upgrading Existing UST Systems	Not applicable.
40 CFR 281.32, General Operating Requirements	RSA 146–C:19, II(c); Env-Or 404.09(a) and (b); 405.01(h) and (i), 405.10, 405.11; 406.03, 406.08(g)(1) and (2), 406.09–406.19; 408.01(c).
40 CFR 281.33, Release Detection	Env-Or 405.08, 405.09; 406.02, 406.13.
40 CFR 281.34, Release Reporting, Investigation, and Confirmation.	Env-Or 406.04; 604.06; 605.03 and 605.10; 606.01.

Required Federal element	Implementing State authority
40 CFR 281.35, Release Response and Corrective Action.	Env-Or 605.03, 605.04, 605.07, 605.08; 606.01, 606.08, 606.10; 607.02(b).
40 CFR 281.36, Out-of-service Systems and Closure	Env-Or 408.04, 408.05(e), 408.06–408.10.
40 CFR 281.37, Financial Responsibility for USTs Containing Petroleum.	Env-Or 404.04(h); 404.12(a), (c), (d), and (j).
40 CFR 281.40, Legal Authorities for Compliance Monitoring.	RSA 146–C:5.
40 CFR 281.41, Legal Authorities for Enforcement Response.	RSA 146–C:9–a, RSA 146–C:10, RSA 21–O:9, RSA 541.

The State also demonstrates that its program provides adequate enforcement of compliance as described in 40 CFR 281.11(b) and part 281, subpart D. The NH DES has broad statutory authority with respect to USTs to regulate installation, operation, maintenance, closure, and UST releases, and to the issuance of orders. These statutory authorities are found in: New Hampshire Revised Statutes Annotated, Title I, The State and its Government, Chapter 21–O Department of Environmental Services; New Hampshire Revised Statutes Annotated, Title X, Public Health, Chapter 146–C Underground Storage Facilities; New Hampshire Revised Statutes Annotated Title L, Water Management and Protection, Chapter 485–C Groundwater Protection Act; New Hampshire Revised Statutes Annotated Title LV, Proceedings in Special Cases, Chapter 541 Rehearings and Appeals in Certain Cases.

H. Where are the revised rules different from the Federal rules?

Broader in Scope Provisions

The following statutory and regulatory provisions are considered broader in scope than the Federal program, and are therefore not enforceable as a matter of Federal law:

For any UST system installed prior to April 22, 1997 or that otherwise does not have existing spill containment at Stage I system connections, the owner shall install spill containment meeting the requirements of Env-Or 405.05(f) at Stage I system connections no later than October 13, 2021.

Each dispensing area shall have a concrete pad with positive limiting barrier that contains a volume of at last five gallons and extends beyond the reach of all dispensing nozzles.

Tank pads installed after October 10, 2018 shall be constructed of reinforce Portland cement concrete and have liquid-tight sealed joints at all expansion, contraction, cold, and crack control joints within three feet of spill containment. The tank pads shall be sealed and maintained with a fuel-product compatible joint sealant installed per manufacturer's instruction.

Any day tank that is connected by piping to an underground storage tank that is subject to the rules shall be marked with the type of product stored, the registered tank number corresponding to the UST that automatically supplies product to the day tank, and the appropriate emergency response system symbol(s) that meet(s) the requirements of section 21.7.2.1 of NFPA 30 to identify the hazards posed by the product stored.

All Stage I system connection spill containment equipment shall be tested for tightness no later than October 13, 2021 and triennially thereafter.

Prior to commencing construction or installation of a new facility or making one or more substantial modifications at an existing facility, including any changes to a cathodic protection system, an owner shall submit plans and specifications stamped by an engineer licensed to practice in New Hampshire. Within 90 days of receipt of a complete plan and specification submittal, the department shall send the owner written notice of construction approval or disapproval. Failure to send a notice within 90 days shall be deemed to be approval of the plans. A UST or UST system component shall be installed only by a certified tank installer.

UST systems shall not be installed within the sanitary protective area of a public water system well and in any area where flooding over the top of the tank is reasonably likely or the ground surface is below the 100-year flood elevation, unless the plans include specific requirements designed to ensure that the tank will not float and its contents will not escape during a flood.

New UST systems installed on or after February 2, 2005 shall be installed no closer to public and non-public water supply wells than the minimum distances specified in Table 407–1.

With the exception of marinas and fueling systems over water, no UST system at any new site shall be located closer than 75 feet from surface waters of the state.

Storm water runoff from UST facilities shall not be directly discharged to surface water or below the ground surface unless a permit is obtained under applicable state or federal law. Storm water shall not be directed to flow over any tank or dispensing pad.

The owner of any UST system that has been red-tagged in accordance with RSA 146–C:15 shall bring the system into compliance with all applicable requirements or permanently close the system within one year of the date the red tag was placed.

An owner who wishes to obtain a waiver form any rule in Env-Or 400 shall request a waiver as specified in Env-Or 409.02.

A responsible party shall apply for and obtain a groundwater management permit for any site where the discharge of a regulated contaminant at that site has caused and continues to cause the groundwater quality criteria of Env-Or 603.01 to be violated.

More Stringent Provisions

The following statutory and regulatory provisions are considered more stringent than the Federal program and are therefore enforceable as a matter of Federal law:

Airport hydrant fuel distribution systems and UST systems with field-constructed tanks shall meet release detection requirements for tanks and piping systems. Piping associated with airport hydrant distribution systems and field constructed UST systems shall have secondary containment.

For any UST system installed on or after September 1, 2013, all spill containment equipment shall be installed within a liquid-tight sump or be of double walled construction.

II. Codification

A. What is codification?

Codification is the process of placing a state's statutes and regulations that comprise the state's approved UST program into the CFR. Section 9004(b) of RCRA, as amended, allows the EPA to approve State UST programs to operate in lieu of the Federal program. The EPA codifies its authorization of state programs in 40 CFR part 282 and incorporates by reference state statutes and regulations that the EPA will enforce under sections 9005 and 9006 of RCRA and any other applicable state provisions. The incorporation by reference of state authorized programs in the CFR should substantially enhance the public's ability to discern the current status of the approved state program and state requirements that can be federally enforced. This effort provides clear notice to the public of the scope of the approved program in each state.

B. What is the history of codification of New Hampshire's UST program?

EPA incorporated by reference the New Hampshire DES approved UST program effective January 3, 1994 (58 FR 58624; November 2, 1993). In this document, EPA is revising 40 CFR 282.79 to include the approved revisions.

C. What codification decisions have we made in this rule?

Incorporation by reference: In this rule, we are finalizing regulatory text that includes incorporation by reference. In accordance with the requirements of 1 CFR 51.5, we are finalizing the incorporation by reference of the New Hampshire statutes and regulations described in the amendments to 40 CFR part 282 set forth below. The EPA has made, and will continue to make, these documents generally available through *www.regulations.gov* and at the EPA Region 1 office (see the **ADDRESSES** Section of this preamble for more information).

The purpose of this **Federal Register** document is to codify New Hampshire's approved UST program. The codification reflects the State program that would be in effect at the time EPA's approved revisions to the New Hampshire UST program addressed in this direct final rule become final. The document incorporates by reference New Hampshire's UST statutes and regulations and clarifies which of these provisions are included in the approved and federally enforceable program. By codifying the approved New Hampshire program and by amending the CFR, the public will more easily be able to discern the status of the federally-approved requirements of the New Hampshire program.

EPA is incorporating by reference the New Hampshire approved UST program in 40 CFR 282.79. Section 282.79(d)(1)(i)(A) incorporates by reference for enforcement purposes the State's statutes and regulations.

Section 282.79 also references the Attorney General's Statement, Demonstration of Adequate Enforcement Procedures, the Program Description, and the Memorandum of Agreement, which are approved as part of the UST program under Subtitle I of RCRA. These documents are not incorporated by reference.

D. What is the effect of New Hampshire's codification on enforcement?

The EPA retains the authority under sections 9005 and 9006 of Subtitle I of RCRA, 42 U.S.C. 6991d and 6991e, and other applicable statutory and regulatory provisions to undertake inspections and enforcement actions and to issue orders in approved states. With respect to these actions, EPA will rely on Federal sanctions, Federal inspection authorities, and Federal procedures rather than the state authorized analogues to these provisions. Therefore, the EPA is not incorporating by reference such particular, approved New Hampshire procedural and enforcement authorities. Section 282.79(d)(1)(ii) of 40 CFR lists those approved New Hampshire authorities that would fall into this category.

E. What State provisions are not part of the codification?

The public also needs to be aware that some provisions of the State's UST program are not part of the federally approved State program. Such provisions are not part of the RCRA Subtitle I program because they are ''broader in scope'' than Subtitle I of RCRA. Title 40 CFR 281.12(a)(3)(ii) states that where an approved state program has provisions that are broader in scope than the Federal program, those provisions are not a part of the federally approved program. As a result, State provisions which are broader in scope than the Federal program are not incorporated by reference for purposes of enforcement in part 282. Section 282.79(d)(1)(iii) lists for reference and clarity the New Hampshire statutory and regulatory provisions which are broader in scope than the Federal program and which are not, therefore, part of the approved program being codified in this document. Provisions that are broader in scope cannot be enforced by EPA; the State, however, will continue to implement and enforce such provisions under State law.

III. Statutory and Executive Order Reviews

This action only applies to New Hampshire's UST Program requirements pursuant to RCRA section 9004 and imposes no requirements other than those imposed by State law. It complies with applicable Executive Orders (EOs) and statutory provisions as follows:

A. Executive Order 12866 Regulatory Planning and Review, Executive Order 13563: Improving Regulation and Regulatory Review

The Office of Management and Budget (OMB) has exempted this action from the requirements of Executive Order 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011). This action approves and codifies State requirements for the purpose of RCRA section 9004 and imposes no additional requirements beyond those imposed by State law. Therefore, this action is not subject to review by OMB.

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is not an Executive Order 13771 (82 FR 9339, February 3, 2017) regulatory action because actions such as this final approval of New Hampshire's revised underground storage tank program under RCRA are exempted under Executive Order 12866. Accordingly, I certify that this action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

C. Unfunded Mandates Reform Act and Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

Because this action approves and codifies pre-existing requirements under State law and does not impose any additional enforceable duty beyond that required by State law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538). For the same reason, this action also does not significantly or uniquely affect the communities of Tribal governments, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

D. Executive Order 13132: Federalism

This action will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves and codifies State requirements as part of the State RCRA underground storage tank program without altering the relationship or the distribution of power and responsibilities established by RCRA.

E. Executive Order 13045: Services of Children From Environmental Health and Safety Risks

This action also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant, and it does not make decisions based on environmental health or safety risks.

F. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This rule is not subject to Executive Order 13211, ''Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001) because it is not a ''significant regulatory action'' as defined under Executive Order 12866.

G. National Technology Transfer and Advancement Act

Under RCRA section 9004(b), EPA grants a State's application for approval as long as the State meets the criteria required by RCRA. It would thus be inconsistent with applicable law for EPA, when it reviews a State approval application, to require the use of any particular voluntary consensus standard in place of another standard that otherwise satisfies the requirements of RCRA. Thus, the requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply.

H. Executive Order 12988: Civil Justice Reform

As required by Section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct.

I. Executive Order 12630: Governmental Actions and Interference With Constitutionally Protected Property Rights

EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the ''Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings'' issued under the executive order.

J. Paperwork Reduction Act

This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). ''Burden'' is defined at 5 CFR 1320.3(b).

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629, February 16, 1994) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States. Because this rule approves pre-existing State rules which are at least equivalent to, and no less stringent than existing Federal requirements, and imposes no additional requirements beyond those imposed by State law, and there are no anticipated significant adverse human health or environmental effects, the rule is not subject to Executive Order 12898.

L. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801–808, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this document and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2). However, this action will be effective December 31, 2019 because it is a direct final rule.

Authority: This rule is issued under the authority of sections 2002(a), 7004(b), and 9004 of the Solid Waste Disposal Act, as amended, 42 U.S.C. 6912, 6991c, 6991d, and 6991e.

List of Subjects in 40 CFR Part 282

Environmental Services, Administrative practice and procedure, Confidential business information, Hazardous substances, Incorporation by reference, Insurance, Intergovernmental relations, Penalties, Petroleum, Reporting and recordkeeping requirements, Surety bonds, Water supply.

Dated: October 7, 2019.

Dennis Deziel,

Regional Administrator, EPA Region 1.

For the reasons set forth in the preamble, EPA is amending 40 CFR part 282 as follows:

PART 282—APPROVED UNDERGROUND STORAGE TANK PROGRAMS

■ 1. The authority citation for part 282 continues to read as follows:

Authority: 42 U.S.C. 6912, 6991c, 6991d, and 6991e.

■ 2. Revise § 282.79 to read as follows:

§ 282.79 New Hampshire State-Administered Program.

(a) The State of New Hampshire is approved to administer and enforce an underground storage tank program in lieu of the Federal program under Subtitle I of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, 42 U.S.C. 6991 *et seq.* The State's program, as administered by the New Hampshire Department Environmental Services (NH DES), was approved by EPA pursuant to 42 U.S.C. 6991c and 40 CFR part 281. EPA approved the New Hampshire program on June 19, 1991, which was effective on July 19, 1991.

(b) New Hampshire has primary responsibility for administering and enforcing its federally approved underground storage tank program. However, EPA retains the authority to exercise its inspection and enforcement authorities under sections 9005 and 9006 of Subtitle I of RCRA, 42 U.S.C. 6991d and 6991e, as well as under any other applicable statutory and regulatory provisions.

(c) To retain program approval, New Hampshire must revise its approved program to adopt new changes to the Federal Subtitle I program which makes it more stringent, in accordance with Section 9004 of RCRA, 42 U.S.C. 6991c and 40 CFR part 281, subpart E. If New Hampshire obtains approval for the revised requirements pursuant to section 9004 of RCRA, 42 U.S.C. 6991c, the newly approved statutory and regulatory provisions will be added to this subpart and notification of any change will be published in the **Federal Register**.

(d) New Hampshire has final approval for the following elements of its program application originally submitted to EPA and approved effective July 19, 1991, and the program revision application approved by EPA, effective on December 31, 2019.

(1) *State statutes and regulations*—(i) *Incorporation by reference.* The material cited in this paragraph (d)(1)(i), and listed in appendix A to this part, is incorporated by reference as part of the underground storage tank program under Subtitle I of RCRA, 42 U.S.C. 6991 *et seq.* (See § 282.2 for incorporation by reference approval and inspection information.) You may obtain copies of the New Hampshire regulations and statutes that are incorporated by reference in this paragraph (d)(1)(i) from Oil Compliance Section Supervisor, New Hampshire DES, PO Box 29, Concord, NH 03302–0029; Phone number: 603–271–6058; Hours: Monday–Friday, 8:00 a.m. to 4:00 p.m.; link to statutes and regulations: NH RSA 21–O: *http://www.gencourt.state.nh.us/rsa/html/l/21-O-mrg.htm*; NH RSA 91–A: *http://www.gencourt.state.nh.us/rsa/html/vi/91-a/91-a-mrg.htm*; NH RSA 146–C: *http://www.gencourt.state.nh.us/rsa/html/X/146-C/146-C-mrg.htm*; NH RSA 485–C: *http://www.gencourt.state.nh.us/rsa/html/NHTOC/NHTOC-L-485-C.htm*; NHDES Env-Or 400: *https://www.des.nh.gov/organization/commissioner/legal/rules/documents/env-or400.pdf*; NHDES Env-Or 600: *https://www.des.nh.gov/organization/commissioner/legal/rules/documents/env-or600.pdf*.

(A) ''New Hampshire Statutory and Regulatory Requirements Applicable to the Underground Storage Tank Program, October 2018.''

(B) [Reserved]

(ii) *Legal basis.* EPA evaluated the following statutes and regulations which are part of the approved program, but they are not being incorporated by reference for enforcement purposes, and do not replace Federal authorities:

(A) The statutory provisions include:

(*1*) *New Hampshire Revised Statutes Annotated, Title I, The State and its Government, Chapter 21–O, Department of Environmental Services,* Section 21–O:9. Waste Management Council; Section 21–O:14 Administrative Appeals.

(*2*) *New Hampshire Revised Statutes Annotated, Title X, Public Health, Chapter 146–C Underground Storage Facilities,* Section C:5 Records Required, Inspections; Section C:9–a Orders, Injunctions; Section C:10 Penalty; Section C:10–a Administrative Fines; Section C:11 Liability for Cleanup Costs, Municipal Regulations; Section C:13 Penalty, Persons Strictly Liable; Section C:14 Delivery Prohibition; Section C:15 Non-Compliant Storage Tanks or Facilities, Red-Tagging Procedure; Section C:16 Appeals.

(*3*) *New Hampshire Revised Statutes Annotated, Title L, Water Management and Protection, Chapter 485–C Groundwater Protection Act,* Section C:15 Investigation and Inspections; Section C:16 Cease and Desist Orders; Section C:17 Appeals; Section C:18 Administrative Fines; Section C:19 Penalties and Other Relief.

(*4*) *New Hampshire Revised Statutes Annotated, Title LV, Proceedings in Special Cases,* Chapter 541 Rehearings and Appeals in Certain Cases.

(B) The regulatory provisions include:

(*1*) *New Hampshire Code of Administrative Rules,* Chapter Env-Or 400 Underground Storage Tank Facilities: 404.05(b)(3) Signature Required; 404.11 Suspension or Revocation of Permit to Operate.

(*2*) [Reserved]

(iii) *Provisions not incorporated by reference.* The following specifically identified statutory and regulatory provisions applicable to the New Hampshire's UST program are broader in scope than the Federal program, are not part of the approved program, and are not incorporated by reference herein for enforcement purposes:

(A) *New Hampshire Code of Administrative Rules,* Chapter Env-Or 400 Underground Storage Tank Facilities: 405.05(f) and (g) Spill Containment; 405.07(a)(2) Dispensing Areas; 405.12(a) Day Tank Markings Required; 406.12(c) Spill Containment Integrity Testing; 407.01(a) Application for Approval of UST Systems; 407.06(b–e), (g) and (h) UST System Design Requirements; 408.05(f) Permanent Closure Required; Part Env-Or 409 Waivers.

(B) [Reserved]

(2) *Statement of legal authority.* The Attorney General's Statements, signed by the Attorney General of New Hampshire on November 1, 1990, and June 3, 2019, though not incorporated by reference, are referenced as part of the approved underground storage tank program under Subtitle I of RCRA, 42 U.S.C. 6991 *et seq.*

(3) *Demonstration of procedures for adequate enforcement.* The ''Demonstration of Procedures for Adequate Enforcement'' submitted as part of the original application on January 8, 1991, and as part of the program revision application for approval on June 24, 2019 though not incorporated by reference, is referenced as part of the approved underground storage tank program under Subtitle I of RCRA, 42 U.S.C. 6991 *et seq.*

(4) *Program description.* The program description and any other material submitted as part of the original application on January 8, 1991, and as part of the program revision application on June 24, 2019, though not incorporated by reference, are referenced as part of the approved underground storage tank program under Subtitle I of RCRA, 42 U.S.C. 6991 *et seq.*

(5) *Memorandum of Agreement.* The Memorandum of Agreement between EPA Region 1 and the New Hampshire Department of Environmental Services, signed by the EPA Regional Administrator on February 12, 2019 though not incorporated by reference, is referenced as part of the approved underground storage tank program under Subtitle I of RCRA, 42 U.S.C. 6991 *et seq.*

■ 3. Appendix A to part 282 is amended by revising the entry for New Hampshire to read as follows:

Appendix A to Part 282—State Requirements Incorporated by Reference in Part 282 of the Code of Federal Regulations

* * * * *

New Hampshire

(a) The statutory provisions include:

1. New Hampshire Revised Statutes Annotated, Title I, The State and its Government, Chapter 21–O Department of Environmental Services

Section O:1. Establishment, General Functions; Section O:8 Division of Waste Management.

2. New Hampshire Revised Statutes Annotated, Title VI, Public Officers and Employees, Chapter 91–A Access to Government Records and Meetings

Section 91–A:1 Preamble, Section 91–A:1–a Definitions, Section 91–A:4 Minutes and Records Available for Public Inspection.

3. New Hampshire Revised Statutes Annotated, Title X Public Health, Chapter 146–C Underground Storage Facilities

Section 146–C:1 Definitions; Section 146–C:2 Discharges Prohibited; Section 146–C:3 Registration of Underground Storage Facilities; Section 146–C:4 Underground Storage Facility Permit Required; Section 146–C:6 Transfer of Ownership; Section 146–C:6–a Exemption; Section 146–C:7 New Facilities; Section 146–C:8 Prohibition Against Reusing Tanks; Section 146–C:17 Operator Training Required; Section 146–C:18 Operator Training Program Requirements; Section 146–C:19 Additional Operator Requirements; Section 146–C:20 Revocation of Operator Training Program Approval; Section 146–C:21 Repeating Operator Training.

4. New Hampshire Revised Statutes Annotated, Title L Water Management and Protection, Chapter 485–C Groundwater Protection Act

Section 485–C:1 Statement of Purpose, Section 485–C:2 Definitions, Section 485–C:3 Duties of the Department, Section 485–C:5 Classes of Groundwater, Section 485–C:6 Ambient Groundwater Quality Standards, Section 485–C:6–a Groundwater Management Zones, Section 485–C:6–b Recordation of Groundwater Management Zone Permits, Section 485–C:7 Potential Contamination Sources, Section 485–C:8 Inventory and Management, Section 485–C:9 Procedures for Classification and Reclassification, Section 485–C:10 Degraded Groundwater, Section 485–C:11 Best Management Practices, Section 485–C:12 Prohibited Uses, Section 485–C:13 Groundwater Release Detection Permit, Section 485–C:14 Notice to Municipality, Section 485–C:14–b Notification of Groundwater Contamination Required.

(b) The regulatory provisions include:

1. New Hampshire Code of Administrative Rules, Chapter Env-Or 400 Underground Storage Tank Facilities: (Effective October 10, 2018)

Part Env-Or 401 Purpose, Applicability, Federal Regulations; Section 401.01 Purpose; Section 401.02 Applicability; Section 401.03 Exclusions, except 401.03(b); Section 401.04 Date of Incorporated Federal Regulations;

Part Env-Or 402 Definitions;

Part Env-Or 403 Reference Standards; Section 403.01 Availability and Applicability of Reference Standards; Section 403.02 American Petroleum Institute, Section 403.03 ASME International, Section 403.04 Fiberglass Tank and Pipe Institute, Section 403.05 NACE International, Section 403.06 National Fire Protection Association, Section 403.07 Petroleum Equipment Institute.

Part Env-Or 404 Registration; Permit to Operate; Required Notifications and Records; Financial Responsibility; Section 404.01 Registration; Section 404.02 Change from Use Not Previously Covered to Covered Use; Section 404.03 Change in Product; Section 404.04 Additional Information Required for Registration; Section 404.05 Signature Required, except 404.05(b)(3); Section 404.06 Permit to Operate Required; Section 404.07 Obtaining a Permit to Operate; Section 404.08 Display, Applicability, and Validity of Permit to Operate; Section 404.09 Records to be Maintained; Section 404.10 Transfer of Facility Ownership; Section 404.12 Financial Responsibility, except 404.12(d)(4) and (m); Section 404.13 Owner Liability.

Part Env-Or 405 Equipment Standards; Section 405.01 Tank Standards for UST Systems; Section 405.02 Piping Standards for UST Systems; Section 405.03 Secondary Containment for Tanks; Section 405.04 Secondary Containment and Sumps for Piping Systems; Section 405.05 Spill Containment, except 405.05(f) and (g);, and 405.12(a); Section 405.06 Overfill Protection; Section 405.07 Dispensing Areas, except for 405.07(a–c), (g), and (h); Section 405.08 Leak Monitoring Systems for Tanks; Section 405.09 Leak Monitoring Systems for Piping Systems; Section 405.10 Cathodic Protection Systems; Section 405.11 Changes to Cathodic Protection Systems.

Part Env-Or 406 Operation, Maintenance, and Testing; Section 406.01 On-Going Maintenance Required; Section 406.02 Operation and Maintenance of Leak Monitoring Systems; Section 406.03 Delivery or Transfer of Regulated Substances; Section 406.04 Unusual Operating Conditions; Section 406.05 Requirements for Tightness Testers and Test Methods; Section 406.06 Leak Rate Detection Criteria; Section 406.07 Requirements for Test Reports; Section 406.08 Test Failures; Section 406.09 Automatic Line Leak Detector Testing; Section 406.10 Cathodic Protection System Testing; Section 406.11 Overfill Prevention Device Testing; Section 406.12 Spill Containment Integrity Testing, except 406.12(c); Section 406.13 Leak Monitoring Equipment Testing; Section 406.14 Containment Sump Integrity Testing; Section 406.15 Hydrostatic Testing Test for Sumps and Spill Containment; Section 406.16 Pneumatic Tightness Test for Piping; Section 406.17 Primary Containment System Testing; Section 406.18 Monthly, Bi-Monthly, and Annual Visual Inspections; Section 406.19 Reports of Visual Inspections.

Part Env-Or 407 Installation Requirements, Section 407.06(a) UST System Design Requirements.

Part Env-Or 408 Repair, Closure, Removal; Section 408.01 Repair of Tanks: Pre-Repair Considerations and Requirements; Section 408.02 Repair of Tanks: Post-Repair Requirements; Section 408.03 Repair and Replacement of Underground Piping, Containment Sumps, and Spill Containment; Section 408.04 Temporary Closure; Section 408.05 Permanent Closure Required, except 408.05(f); Section 408.06 Permanent Closure: Notification and Supervision Required; Section 408.07 Procedures for Permanent Closure; Section 408.08 Permanent Closure: Site Assessment; Section 408.09 Permanent Closure: Inspection Required; Section 408.10 Permanent

Closure: Closure Report, Recordkeeping; Section 408.11 Limitations on Re-Use of Tanks. APPENDIX A: State Statutes and Federal Statutes/Regulation Implemented, APPENDIX B: Incorporation by Reference Information, APPENDIX C: Statutory Definitions, APPENDIX D: Excerpts from RSA 146–C, APPENDIX E: 40 CFR Provisions Referenced.

2. New Hampshire Code of Administrative Rules, Chapter Env-Or 600 Contaminated Site Management: (Effective June 1, 2015)

Part Env-Or 601 Purpose and Applicability, Section 601.01 Purpose, Section 601.02 Applicability.

Part Env-Or 602 Definitions.

Part-Env-Or 603 Groundwater Quality Criteria, Section 603.01 Groundwater Quality Criteria, Section 603.02 Exemptions to Groundwater Quality Criteria, Section 603.03 Ambient Groundwater Quality Standards (AGQS).

Part Env-Or 604 Notification, Section 604.01 Purpose, Section 604.02 Notification of Groundwater Quality Violation, Section 604.03 Exemptions to Notification of Groundwater Quality Violation, Section 604.05 NAPL Notification, Section 604.06 Discharges of Oil Requiring Immediate Notification, Section 604.07 Potential Discharges of Oil Requiring Notification Within 60 Days, Section 604.08 Oil Notification Requirements.

Part Env-Or 605 Preliminary Response Actions, Section 606.01 Purpose, Section 605.03 Emergency Response Actions for Oil Discharges, Section 605.04 Initial Response Actions, Section 605.05 Emergency and Initial Response Action Approval, Section 605.06 Emergency and Initial Response Action Reporting Requirements, Section 605.07 Initial Site Characterization Required, Section 605.08 Initial Site Characterization, Section 605.09 Initial Site Characterization Report, Section 605.10 Investigation Due to Discovery of Discharges from Unknown Sources.

Part Env-Or 606 Comprehensive Response Actions, Section 606.01 Site Investigation Required; Section 606.02 Site Investigation Request, Exemptions; Section 606.03 Site Investigation Report ; Section 606.04 Site Background Information; Section 606.05 Summary of Subsurface Explorations and Sampling; Section 606.06 Site Geology and Hydrology; Section 606.07 Conceptual Model; Section 606.08 Remedial Alternatives, Summary, and Recommendations; Section 606.09 Appendices; Section 606.10 Remedial Action Plan; Section 606.11 Remedial Action Plan Exemptions; Section 606.12 Remedial Action Plan Report; Section 606.13 Remedial Action Plan Approval; Section 606.14 Corrective Action Prior to Remedial Action Plan Approval; Section 606.15 Remedial Action Implementation; Section 606.16 Design Plans and Construction Specifications; Section 606.17 Remedial Action Implementation Report; Section 606.18 Periodic Status Report; Section 606.19 Soil Remediation Criteria; Section 606.20 Financial Assurance; Section 606.21 Financial Assurance Mechanisms.

Part Env-Or 609 Certificates of Completion or No Further Action, Section 609.01 Certificate of Completion, Section 609.02 Certificate of No Further Action.

Part Env-Or 610 Monitoring and Reporting, Section 610.01 Applicability, Section 610.02 Sampling and Analysis, Section 610.03 Reporting, Section 610.04 Groundwater Monitoring Wells.

Part Env-Or 611 Contaminated Soil, Section 611.01 Requirements for Managing Contaminated Soil, Section 611.02 Definitions, Section 611.03 Non-hazardous Oil-Contaminated Soil (NOCS) Certification, Section 611.04 Contaminated Soil Sampling, Section 611.05 Contaminated Soil Storage, Section 611.06 Contaminated Soil Disposal and Reuse.

Appendix A: State States and Federal Statutes/Regulations Implemented; Appendix B: Incorporation by Reference Information; Appendix C: Statutory Definitions.

BILLING CODE 6560–50–P

Proposed Rules

Federal Register

Vol. 84, No. 212

Friday, November 1, 2019

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2019–0861; Product Identifier 2019–NM–129–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Airbus SAS Model A320–214, –232, and –271N airplanes, and Model A321–231 airplanes. This proposed AD was prompted by a report of a production line inspection finding of damage on a main landing gear (MLG) side stay attachment outboard lug. This proposed AD would require an inspection for discrepancies of the MLG side stay attachment outboard lugs, left-hand and right-hand sides, and applicable corrective action, as specified in a European Union Aviation Safety Agency (EASA) AD, which will be incorporated by reference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by December 16, 2019.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For the material identified in this proposed AD that will be incorporated by reference (IBR), contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 89990 1000; email *ADs@easa.europa.eu*; internet *www.easa.europa.eu*. You may find this IBR material on the EASA website at *https://ad.easa.europa.eu*. You may view this IBR material at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2019–0861.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2019–0861; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the regulatory evaluation, any comments received, and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Sanjay Ralhan, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3223.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2019–0861; Product Identifier 2019–NM–129–AD'' at the beginning of your comments. The FAA specifically invites comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. The FAA will consider all comments received by the closing date and may amend this NPRM based on those comments.

The FAA will post all comments, without change, to *http://www.regulations.gov,* including any personal information you provide. The FAA will also post a report summarizing each substantive verbal contact the agency receives about this NPRM.

Discussion

The EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2019–0167, dated July 15, 2019 (''EASA AD 2019–0167'') (also referred to as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Airbus SAS Model A320–214, –232, and –271N airplanes, and Model A321–231 airplanes.

This proposed AD was prompted by a report of a production line inspection finding of damage on a MLG side stay attachment outboard lug. Investigation results determined that the detected damage had been caused by using incorrect tooling, and identified a batch of affected parts that may have received the same treatment. The FAA is proposing this AD to address damaged MLG side stay attachment outboard lugs, which could reduce the structural integrity of the attachment of the MLG to the wing. See the MCAI for additional background information.

Related IBR Material Under 1 CFR Part 51

EASA AD 2019–0167 describes procedures for an inspection for discrepancies (cracks, wear, damage, and corrosion) of the MLG side stay attachment outboard lugs, left-hand and right-hand sides, and corrective action (repair). This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, the FAA has been notified of the unsafe condition described in the MCAI referenced above. The FAA is proposing this AD because the FAA evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in EASA AD 2019–0167 described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA initially worked with Airbus and EASA to develop a process to use certain EASA ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has since coordinated with other manufacturers and civil aviation authorities (CAAs) to use this process. As a result, EASA AD 2019–0167 will be incorporated by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2019–0167 in its entirety, through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in the EASA AD does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in the EASA AD. Service information specified in EASA AD 2019–0167 that is required for compliance with EASA AD 2019–0167 will be available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2019–0861 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this proposed AD affects 1 airplane of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
121 work-hours × $85 per hour = $10,285	$0	$10,285	$10,285

The FAA has received no definitive data that would enable the FAA to provide cost estimates for the on-condition actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This proposed AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes and associated appliances to the Director of the System Oversight Division.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Airbus SAS: Docket No. FAA–2019–0861; Product Identifier 2019–NM–129–AD.

(a) Comments Due Date

The FAA must receive comments by December 16, 2019.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus SAS Model A320–214, –232, –271N airplanes, and Model A321–231 airplanes certificated in any category, as identified in European Union Aviation Safety Agency (EASA) AD 2019–0167, dated July 15, 2019 (''EASA AD 2019–0167'').

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Reason

This AD was prompted by a report of a production line inspection finding of damage on a main landing gear (MLG) side stay attachment outboard lug. The FAA is issuing this AD to address damaged MLG side stay attachment outboard lugs, which could reduce the structural integrity of the attachment of the MLG to the wing.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2019–0167.

(h) Exception to EASA AD 2019–0167

The ''Remarks'' section of EASA AD 2019–0167 does not apply to this AD.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2019–0167 specifies to submit certain information to the manufacturer, and specifies that action as ''RC'' (required for compliance), this AD does not include that requirement.

(j) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Section, Transport Standards Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Section, send it to the attention of the person identified in paragraph (k)(2) of this AD. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Section, Transport Standards Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* For any service information referenced in EASA AD 2019–0167 that contains RC procedures and tests: Except as required by paragraph (2) of EASA AD 2019–0167 and paragraphs (i) and (j)(2) of this AD, RC procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(k) Related Information

(1) For information about EASA AD 2019–0167, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 89990 6017; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2019–0861.

(2) For more information about this AD, contact Sanjay Ralhan, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3223.

Issued in Des Moines, Washington, on October 24, 2019.

Dionne Palermo,

Acting Director, System Oversight Division, Aircraft Certification Service.

[Docket No. FAA–2019–0719; Product Identifier 2019–NM–137–AD]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain The Boeing Company Model 787–8 airplanes. This proposed AD was prompted by a report of failure of a wing strut leak test due to a missing bolt on the firewall. This proposed AD would require a one-time leak test of the strut upper spar areas for the left and right wing struts, and corrective action if necessary. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by December 16, 2019.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110 SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; internet *https://www.myboeingfleet.com.* You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Examining the AD Docket

You may examine the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2019–0719; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the regulatory evaluation, any comments received, and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Tak Kobayashi, Aerospace Engineer, Propulsion Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3553; email: *takahisa.kobayashi@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2019–0719; Product Identifier 2019–NM–137–AD'' at the beginning of your comments. The agency specifically invites comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. The FAA will consider all comments received by the closing date and may amend this NPRM because of those comments.

The FAA will post all comments received, without change, to *https://*

www.regulations.gov, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Discussion

The FAA received a report indicating failure of a wing strut leak test due to a missing bolt on the firewall. Failure during manufacture to install a bolt that plugs a strut firewall penetration would result in a hole in the firewall. This condition, if not addressed, could allow flammable fluid leakage in the strut area. This leakage could overwhelm the drainage provision, enter the engine compartment, and result in an uncontrollable engine fire and consequent structural failure of the wing.

FAA's Determination

The FAA is proposing this AD because the agency evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require a one-time leak test of the strut upper spar areas for the left and right wing struts, and corrective action if necessary.

Costs of Compliance

The FAA estimates that this proposed AD would affect 2 airplanes of U.S. registry. The agency estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
3 work-hours × $85 per hour = $255	$0	$255	$510

The FAA estimates the following costs to do any necessary on-condition action that would be required based on the results of any proposed actions. The FAA has no way of determining the number of aircraft that might need this on-condition action:

ESTIMATED COSTS OF ON-CONDITION ACTION

Labor cost	Parts cost	Cost per product
1 work-hour × $85 per hour = $85	Minimal	$85

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This proposed AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes and associated appliances to the Director of the System Oversight Division.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

The Boeing Company: Docket No. FAA–2019–0719; Product Identifier 2019–NM–137–AD.

(a) Comments Due Date

The FAA must receive comments by December 16, 2019.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 787–8 airplanes, certificated in any category, line numbers 6, 11, 17, 19, 20, 21, 23, 25 through 30 inclusive, and 32 through 38 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 54, Nacelles/Pylons.

(e) Unsafe Condition

This AD was prompted by a report of failure of a wing strut leak test due to a missing bolt on the firewall. The FAA is issuing this AD to address a hole in the firewall, which could allow flammable fluid leakage in the strut area. This leakage could overwhelm the drainage provision, enter the engine compartment, and result in an uncontrollable engine fire and consequent structural failure of the wing.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Leak Test and Corrective Action

Within 12 months after the effective date of this AD: Do a one-time leak (functional) test of the strut upper spar areas for the left and right wing struts, by doing the actions specified in paragraphs (g)(1) through (5) of this AD. A review of airplane maintenance records is acceptable in lieu of this test if it can be conclusively determined from that review that the leak test was previously accomplished and successfully completed.

(1) Put a plug in the strut forward drain outlet (this drain outlet is labeled as ''pylon strut''). Put an empty container below the strut forward drain outlet to collect water drained through this outlet.

(2) Apply 381 to 387 fluid ounces (11.3 to 11.4 liters) of water in 2.5 to 3.5 minutes, to the strut upper spar (strut areas between the forward and mid-vapor barriers).

(3) Make sure that no leakage occurred after doing the action specified in paragraph (g)(2) of this AD.

(4) Remove the plug from the strut forward drain outlet and make sure that the water is drained through the strut forward drain outlet only.

(5) After 3 minutes from accomplishing the action specified in paragraph (g)(4) of this AD, measure the water collected in the container, and do the applicable actions specified in paragraphs (g)(5)(i) through (iii) of this AD.

(i) If leaks were found, do corrective action before further flight using a method approved in accordance with the procedures specified in paragraph (h) of this AD.

(ii) If no leaks were found and less than 354 fluid ounces (10.5 liters) of water is collected in the container, do corrective action before further flight using a method approved in accordance with the procedures specified in paragraph (h) of this AD.

(ii) Before further flight after accomplishing any corrective action required by paragraph (g)(5)(i) or (ii) of this AD, repeat the actions specified in paragraphs (g)(1) through (5) of this AD until successful completion of the test (*i.e.,* no leaks are found and 354 fluid ounces (10.5 liters) of water or more is measured in the container).

Note 1 to paragraph (g): Additional guidance for performing the leak (functional) test can be found in Boeing Model 787 Aircraft Maintenance Manual (AMM), 54–65–01, Strut Spar—Upper—Functional Test.

(h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (i)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(i) Related Information

(1) For more information about this AD, contact Tak Kobayashi, Aerospace Engineer, Propulsion Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3553; email: *takahisa.kobayashi@faa.gov.*

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; internet *https://www.myboeingfleet.com.* For information on the availability of this material at the FAA, call 206–231–3195.

Issued in Des Moines, Washington, on October 24, 2019.

Dionne Palermo,

Acting Director, System Oversight Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters (Type Certificate Previously Held by Eurocopter France) Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2011–12–07 for Eurocopter France (now Airbus Helicopters) Model SA–365C, SA–365C1, SA–365C2, SA–365N, SA–365N1, AS–365N2, AS 365 N3, and SA–366G1 helicopters. AD 2011–12–07 currently requires repetitively inspecting the adhesive bead between the bushings and the Starflex star (Starflex) arms and the Starflex arm ends. Since the FAA issued AD 2011–12–07, Airbus Helicopters has developed an improved Starflex. This proposed AD would retain the requirements of AD 2011–12–07 and revise the Applicability paragraph by omitting helicopters with the improved Starflex installed. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by December 31, 2019.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Docket:* Go to *http://www.regulations.gov.* Follow the online instructions for sending your comments electronically.
- *Fax:* 202–493–2251.
- *Mail:* Send comments to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.
- *Hand Delivery:* Deliver to the ''Mail'' address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2019–0827; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the European Aviation Safety Agency (EASA) AD, the economic evaluation, any comments received and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

For service information identified in this proposed rule, contact Airbus Helicopters, 2701 N Forum Drive, Grand Prairie, TX 75052; telephone (972) 641–0000 or (800) 232–0323; fax (972) 641–3775; or at *http://www.helicopters.airbus.com/website/en/ref/Technical-Support_73.html.* You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177.

FOR FURTHER INFORMATION CONTACT: Matt Fuller, Senior Aviation Safety Engineer, Safety Management Section, Rotorcraft Standards Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5110; email *matthew.fuller@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to participate in this rulemaking by submitting written comments, data, or views. The FAA also invites comments relating to the economic, environmental, energy, or federalism impacts that might result from adopting the proposals in this document. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should send only one copy of written comments, or if comments are filed electronically, commenters should submit only one time.

The FAA will file in the docket all comments that the FAA receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments received.

Discussion

The FAA issued AD 2011–12–07, Amendment 39–16714 (76 FR 35346, June 17, 2011) (''AD 2011–12–07'') for Eurocopter France (now Airbus Helicopters) Model SA–365C, SA–365C1, SA–365C2, SA–365N, SA–365N1, AS–365N2, AS 365 N3, and SA–366G1 helicopters. AD 2011–12–07 requires repetitively inspecting the adhesive bead between the bushings and the Starflex arms for a crack, a gap, and loss of the adhesive bead, inspecting the Starflex arm ends for delamination, and replacing the Starflex if any of these conditions are found. AD 2011–12–07 was prompted by three cases of deterioration of a Starflex arm end. In two of these cases, the deterioration caused high amplitude vibrations in flight, compelling the pilot to make a precautionary landing. The requirements of AD 2011–12–07 are intended to prevent failure of the Starflex, high-amplitude vibrations in flight, and subsequent loss of control of the helicopter.

Actions Since AD 2011–12–07 Was Issued

Since the FAA issued AD 2011–12–07, Airbus Helicopters has developed new part-numbered Starflex, 365A31–1212–00 and 365A31–1213–00, with different material. This change in material improves the reliability and technical performance of the Starflex, improves temperature-related behavior in the area of the Starflex arm ends, and increases dimension margins. Subsequently, Airbus Helicopters has extended the inspection interval of Starflex arm ends with these Starflex installed. Airbus Helicopters identifies helicopters with Starflex part number 365A31–1212–00 or 365A31–1213–00 installed as Modification (MOD) 0762C37.

Accordingly, EASA, which is the Technical Agent for the Member States of the European Union, issued AD No. 2008–0165R1, dated June 30, 2017 (EASA AD 2008–0165R1), to address this unsafe condition for Airbus Helicopters Model SA 365 N, SA 365 N1, AS 365 N2, AS 365 N3, SA 365 C, SA 365 C1, SA 365 C2, SA 365 C3 and SA 366 G1 helicopters, except helicopters with MOD 0762C37 installed in production. EASA advises that the Airbus Helicopters Starflex manufactured with improved materials make the 10-hour repetitive inspections specified in the original issue of EASA AD 2008–0165R1 unnecessary. EASA AD 2008–0165R1 retains the repetitive inspections from the original issue but does not apply to helicopters with the new Starflex.

Also since the FAA issued AD 2011–12–07, Eurocopter France changed its name to Airbus Helicopters. This proposed AD reflects that change and updates the contact information to obtain service documentation.

FAA's Determination

These helicopters have been approved by EASA and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the European Union, EASA has notified the FAA of the unsafe condition described in its AD. The FAA is proposing this AD after evaluating all known relevant information and determined that an unsafe condition is likely to exist or develop on other helicopters of the same type designs.

Related Service Information Under 1 CFR Part 51

The FAA reviewed one document that co-publishes four Airbus Helicopters Emergency Alert Service Bulletin (EASB) identification numbers: No. 05.00.51 for Model 365N-series helicopters, No. 05.35 for Model 366G1 helicopters, No. 05.28 for Model 365C-series helicopters, and No. 05.00.21 for non FAA-type certificated military helicopters, all Revision 4 and dated November 20, 2014. EASB Nos. 05.00.51, 05.35, and 05.28 are proposed for incorporation by reference in this proposed AD. EASB No. 05.00.21 is not proposed for incorporation by reference in this proposed AD.

This service information specifies visually inspecting the adhesive bead on the bushes of the Starflex arm ends for bonding failure of the bushes and distortion of the Starflex arm ends. This service information also specifies inspecting the leading edges and the trailing edges of the Starflex arm ends for delamination.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Other Related Service Information

The FAA reviewed Airbus Helicopters Master Servicing Manual (MSM) AS 365 N for Model SA–365N helicopters, MSM AS 365 N1 for Model SA–365N1 helicopters, MSM AS 365 N2 for Model AS–365N2 helicopters, and MSM AS 365 N3 for Model AS 365 N3 helicopters, all Revision 7 and dated October 9, 2017. This service information provides a schedule of maintenance tasks for the helicopters.

The FAA also reviewed one document that co-publishes four Eurocopter EASB identification numbers: No. 05.00.51 for Model 365N-series helicopters, No. 05.35 for Model 366G1 helicopters, No. 05.28 for Model 365C-series helicopters, and No. 05.00.21 for non FAA-type certificated military helicopters, all Revision 3 and dated August 18, 2008. This service information specifies the same Accomplishment Instructions as Revision 4, which is issued under the name Airbus Helicopters, although Revision 4 excludes helicopters that have MOD 0762C37 installed.

Proposed AD Requirements

This proposed AD would retain the requirements of AD 2011–12–07 to repetitively inspect the adhesive bead between the bushings and the Starflex arms for a crack, a gap, and loss of the adhesive bead, and repetitively inspect the Starflex arm ends for delamination. However, this proposed AD would not apply to helicopters with MOD 0762C37 installed.

Differences Between This Proposed AD and the EASA AD

The EASA AD uses the word ''check,'' whereas this proposed AD uses the word ''inspect'' instead. In some ADs, the FAA uses the word ''check'' to designate specific actions that may be performed by the owner/operator (pilot). An ''inspection'' is a maintenance action that must be performed by a certificated person as specified in 14 CFR 43.3.

Costs of Compliance

The FAA estimates that this proposed AD affects 35 helicopters of U.S. Registry. The FAA estimates that operators may incur the following costs in order to comply with this AD. Labor costs are estimated at $85 per work-hour.

Inspecting the Starflex would take about 0.25 work-hour for an estimated cost of $21 per helicopter and $735 for the U.S. fleet per inspection cycle. Replacing the Starflex would take about 10 work-hours and parts would cost about $65,900 for an estimated cost of $66,750.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA prepared an economic evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2011–12–07, Amendment 39–16714 (76 FR 35346, June 17, 2011), and adding the following new AD:

Airbus Helicopters (Type Certificate Previously Held by Eurocopter France): Docket No. FAA–2019–0827; Product Identifier 2019–SW–014–AD.

(a) Applicability

This AD applies to Airbus Helicopters (Type Certificate previously held by Eurocopter France) Model SA–365C, SA–365C1, SA–365C2, SA–365N, SA–365N1, AS–365N2, AS 365 N3, and SA–366G1 helicopters, certificated in any category, without Airbus Helicopters Modification 0762C37 (starflex arm part number (P/N) 365A31–1212–00 or P/N 365A31–1213–00) installed.

(b) Unsafe Condition

This AD defines the unsafe condition as failure of the Starflex star (Starflex) arm. This condition could result in high amplitude vibrations in flight and subsequent loss of control of the helicopter.

(c) Affected ADs

This AD replaces AD 2011–12–07, Amendment 39–16714 (76 FR 35346, June 17, 2011).

(d) Comments Due Date

The FAA must receive comments by December 31, 2019.

(e) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(f) Required Actions

Within 10 hours time-in-service (TIS) and thereafter at intervals not to exceed 10 hours TIS:

(1) Visually inspect the adhesive bead between the bushing and the Starflex arm for a crack, a gap, and loss of the adhesive bead, and inspect the Starflex arm ends for delamination in accordance with the Accomplishment Instructions, paragraphs 2.B.1. and 2.B.2. of Airbus Helicopters Emergency Alert Service Bulletin (EASB) No. 05.00.51, Revision 4, dated November 20, 2014 (EASB 05.00.51), EASB No. 05.35, Revision 4, dated November 20, 2014 (EASB 05.35), or EASB No. 05.28, Revision 4, dated November 20, 2014 (EASB 05.28), as applicable to your model helicopter.

(2) If there is a crack in the shockproof paint around the entire adhesive bead where the Starflex arm joins the bushing (as shown in Figure 2 of EASB 05.00.51, EASB 05.35, or EASB 05.28, as applicable to your model helicopter), a gap between the adhesive bead and the bushing (as shown in Figure 3 of EASB 05.00.51, EASB 05.35, or EASB 05.28, as applicable to your model helicopter), delamination of a Starflex arm end (as shown in Figure 4 of EASB 05.00.51, EASB 05.35, or EASB 05.28, as applicable to your model helicopter), or loss of adhesive bead (as shown in Figure 5 of EASB 05.00.51, EASB 05.35, or EASB 05.28, as applicable to your model helicopter), replace the Starflex before further flight.

(g) Credit for Previous Actions

Actions accomplished before the effective date of this AD in accordance with the procedures specified in Eurocopter Emergency Alert Service Bulletin Nos. 05.00.51, 05.35, or 05.28, all Revision 3 and dated August 18, 2008, as applicable to your model helicopter, are considered acceptable for compliance with the corresponding actions specified in paragraph (f) of this AD as long as the last inspection was accomplished within the prior 10 hours TIS.

(h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Safety Management Section, Rotorcraft Standards Branch, FAA, may approve AMOCs for this AD. Send your proposal to: Matt Fuller, Senior Aviation Safety Engineer, Safety Management Section, Rotorcraft Standards Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–5110; email *9-ASW-FTW-AMOC-Requests@faa.gov*.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, the FAA suggests that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or

certificate holding district office before operating any aircraft complying with this AD through an AMOC.

(i) Additional Information

(1) Airbus Helicopters Master Servicing Manual (MSM) AS 365 N, MSM AS 365 N1, MSM AS 365 N2, and MSM AS 365 N3, all Revision 7 and dated October 9, 2017; and Eurocopter Emergency Alert Service Bulletin Nos. 05.00.51, 05.35, 05.28, and 05.00.21, all Revision 3 and dated August 18, 2008, which are not incorporated by reference, contain additional information about the subject of this AD. For service information identified in this AD, contact Airbus Helicopters, 2701 N Forum Drive, Grand Prairie, TX 75052; telephone (972) 641–0000 or (800) 232–0323; fax (972) 641–3775; or at *http://www.helicopters.airbus.com/website/en/ref/Technical-Support_73.html*. You may view a copy of the service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177.

(2) The subject of this AD is addressed in European Aviation Safety Agency (EASA) AD No. 2008–0165R1, dated June 30, 2017. You may view the EASA AD on the internet at *http://www.regulations.gov* in the AD Docket.

(j) Subject

Joint Aircraft Service Component (JASC) Code: 6200, Main Rotor System.

Issued in Fort Worth, Texas, on October 21, 2019.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2019–23832 Filed 10–31–19; 8:45 am]

BILLING CODE 4910–13–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2018–0562; FRL–10001–51–Region 9]

Clean Air Plans; 2008 8-Hour Ozone Nonattainment Area Requirements; Determination of Attainment by the Attainment Date; Imperial County, California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve two state implementation plan (SIP) revisions submitted by the State of California to meet Clean Air Act (CAA or ''Act'') requirements for the 2008 ozone national ambient air quality standards (NAAQS) in the Imperial County nonattainment area, as follows. The EPA proposes to approve the ''Imperial County 2017 State Implementation Plan for the 2008 8-Hour Ozone Standard'' (''Imperial Ozone Plan'' or ''Plan'') and the portions of the ''2018 Updates to the California State Implementation Plan'' (''2018 SIP Update'') that address the requirement for a reasonable further progress (RFP) demonstration for the Imperial County for the 2008 ozone standards. In addition, the EPA is proposing to determine, based on a separate demonstration submitted by the State of California, that the Imperial County nonattainment area would have attained the 2008 ozone NAAQS by the ''Moderate'' area attainment date of July 20, 2018, but for emissions emanating from outside of the United States, and therefore would no longer be subject to the CAA requirements pertaining to reclassification upon failure to attain. If we finalize these proposed actions, the Imperial County nonattainment area would remain classified as a Moderate nonattainment area for the 2008 ozone NAAQS.

DATES: Any comments must arrive by December 2, 2019.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2018–0562, at *https://www.regulations.gov*. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets*.

FOR FURTHER INFORMATION CONTACT: Rory Mays, Air Planning Office (AIR–2), EPA Region IX, (415) 972–3227, *mays.rory@epa.gov*.

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us,'' and ''our'' refer to the EPA. The EPA proposes to approve the portions of the Imperial Ozone Plan that address the requirements for emissions statements, a base year emissions inventory, a reasonably available control measures (RACM) demonstration, a demonstration of attainment of the standards by the applicable attainment date but for emissions emanating from outside of the United States, and motor vehicle emission budgets. The EPA proposes that the requirements for contingency measures for failing to meet RFP would be moot if we finalize our proposed determination that Imperial County has met its 2017 RFP targets. The EPA also proposes that contingency measures for failing to attain the standards would not be required if we finalize our proposed approval of the State's demonstrations of attainment by the attainment date but for international emissions. The EPA proposes to approve the portions of the 2018 SIP Update that address the requirement for a reasonable further progress (RFP) demonstration for the Imperial County for the 2008 ozone standards.

I. Background

A. Ozone Standards, Area Designations, and SIPs

Ground-level ozone pollution is formed from the reaction of volatile organic compounds (VOC) and oxides of nitrogen (NO_X) in the presence of sunlight. These two pollutants, referred to as ozone precursors, are emitted by many types of sources, including on-and non-road motor vehicles and engines, power plants and industrial facilities, and smaller area sources such as lawn and garden equipment and paints.

Scientific evidence indicates that adverse public health effects occur following exposure to ozone, particularly in children and adults with lung disease. Breathing air containing ozone can reduce lung function and inflame airways, which can increase respiratory symptoms and aggravate asthma or other lung diseases.[1]

Under CAA section 109, the EPA promulgates NAAQS (or ''standards'') for pervasive air pollutants, such as ozone. The EPA has previously promulgated NAAQS for ozone in 1979 and 1997.[2] In 2008, the EPA revised and further strengthened the ozone NAAQS by setting the acceptable level of ozone in the ambient air at 0.075 parts per million (ppm) averaged over an 8-hour period.[3] Although the EPA tightened the 8-hour ozone standards in 2015 (to 0.070 ppm), this action relates to the requirements for the 2008 ozone standards.[4]

Following promulgation of a new or revised NAAQS, the EPA is required under CAA section 107(d) to designate areas throughout the country as attaining or not attaining the NAAQS. Under the CAA, after the EPA designates areas as nonattainment for a NAAQS, states with nonattainment areas are required to submit SIP revisions that provide for, among other things, attainment of the NAAQS within certain prescribed periods that vary depending on the severity of nonattainment. Areas classified as Moderate must attain the NAAQS within 6 years of the effective date of the nonattainment designation.[5]

The EPA designated Imperial County, California, as nonattainment for the 2008 ozone standards on May 21, 2012, and classified the area as ''Marginal.''[6] Within 6 months of the applicable attainment date, the EPA is required under CAA section 181(b)(2) to determine whether an area has attained the NAAQS based on the design value of the area as of the area's attainment date. Based on 2012–2014 ozone monitoring data, on May 4, 2016, the EPA determined that Imperial County had not attained the 2008 ozone NAAQS by the July 20, 2015 Marginal area attainment date and reclassified the area as Moderate with an attainment date of no later than July 20, 2018.[7]

In California, the California Air Resources Board (CARB) is the state agency responsible for the adoption and submission to the EPA of the California SIP and revisions to the SIP and has broad authority to establish emission standards and other requirements for mobile sources. Local and regional air pollution control districts in California are responsible for the regulation of stationary sources and are generally responsible for the development of regional air quality plans. The Imperial County Air Pollution Control District (Imperial County APCD or ''District'') develops and adopts air quality management plans to address CAA planning requirements applicable to Imperial County. Such plans are then submitted to CARB for adoption and submitted to the EPA as revisions to the California SIP.

B. Imperial County Ozone Nonattainment Area

The Imperial County nonattainment area for the 2008 ozone standards includes the whole county as well as Indian country within the geographic boundary of Imperial County pertaining to the Quechan Tribe of the Fort Yuma Indian Reservation and the Torres Martinez Desert Cahuilla Indians.[8] The County encompasses over 4,000 square miles in southeastern California.[9] It is home to approximately 184,000 people, and its principal industries are farming and retail trade. It is bordered by Riverside County to the north, Arizona to the east, Mexico to the south, and San Diego County to the west. The Imperial Valley runs north-south through the central part of the County and includes the County's three most populated cities: Brawley, El Centro, and Calexico. Most of the County's population and industries exist within this relatively narrow land area that extends about one-fourth the width of the County. The rest of Imperial County is primarily desert, with little or no human population.

Ambient 8-hour ozone concentrations in Imperial County are above the level of the 2008 8-hour ozone NAAQS of 0.075 ppm. The maximum design value for the area, based on certified monitoring data at the Calexico monitor (Air Quality System (AQS) ID: 06–025–0005), was 0.077 ppm for the 2015–2017 period.[10]

II. Imperial Ozone Plan and 2018 SIP Update

A. Overarching Requirements

States must implement the 2008 ozone standards under Title 1, part D of the CAA, which includes the ozone specific requirements for attainment plans in sections 181–185 of subpart 2 (''Additional Provisions for Ozone Nonattainment Areas'') and, to the extent not amended by subpart 2, the general requirements for attainment plans in section 172 (''Nonattainment plan provisions in general''). To assist states in developing plans to address ozone nonattainment problems, in 2015, the EPA issued a SIP Requirements Rule for the 2008 ozone standards (''2008 Ozone SRR'') that addresses statutory obligations pertaining to implementation of the NAAQS, including requirements for emissions inventories and attainment and RFP demonstrations.[11] The 2008 Ozone SRR is codified at 40 CFR part 51 subpart AA.

Following a challenge to the EPA's 2008 Ozone SRR, on February 16, 2018, the U.S. Court of Appeals for the D.C. Circuit (''D.C. Circuit'') published its decision in *South Coast Air Quality Management District* v. *EPA* (''*South Coast II*'').[12] The primary aspect of the *South Coast II* decision that affects the 2017 Imperial Ozone Plan is the vacatur of a provision in the 2008 Ozone SRR that allowed states to demonstrate RFP using baseline years other than 2011. The 2017 Imperial Ozone Plan's RFP demonstration used 2008 as the baseline year; following *South Coast II,* CARB submitted the 2018 SIP Update, which includes an RFP demonstration for Imperial County that uses 2011 as the RFP baseline year.

Pursuant to CAA Title I, Part D, the District's nonattainment new source

[12] *South Coast Air Quality Management District* v. *EPA,* 882 F.3d 1138 (D.C. Cir. 2018). The term ''*South Coast II*'' is used in reference to the 2018 court decision to distinguish it from a decision published in 2006 with the same lead plaintiff. The earlier decision involved a challenge to the EPA's Phase 1 implementation rule for the 1997 ozone standards. *South Coast Air Quality Management Dist.* v. *EPA,* 472 F.3d 882 (D.C. Cir. 2006).

review (NSR) program must regulate new major sources and major modifications of NO_X and VOC as ozone precursors. The EPA recently approved Imperial County APCD rules addressing various permit rule requirements, including Rules 204 (''Applications''), 206 (''Processing of Applications''), and 207 (''New and Modified Stationary Source Review'') into the California SIP.[13] Therefore, the EPA is not proposing any further action on nonattainment NSR requirements for Imperial County in this notice.

We discuss the CAA and regulatory requirements for 2008 ozone plans that are relevant to this proposal in more detail in the following sections of this proposed rule.

B. Requirements for International Border Areas

For a nonattainment area affected by emissions emanating from outside the U.S., CAA section 179B(a) provides that, notwithstanding any other provision of law, the EPA Administrator shall approve a SIP revision required under Title I of the CAA for such an area if (i) the SIP revision meets all of the applicable requirements other than the requirement to demonstrate attainment and maintenance of the relevant NAAQS by the applicable attainment date; and (ii) the state establishes to the Administrator's satisfaction that the SIP revision would be adequate to attain and maintain the relevant NAAQS by the applicable attainment date, but for emissions emanating from outside of the U.S. Moreover, for any state that establishes to the Administrator's satisfaction that the state would have attained the ozone NAAQS by the applicable attainment date, but for emissions emanating from outside the U.S., CAA section 179B(b) provides that the area shall not be subject to section 181(b)(2), which obligates the Administrator to determine whether the area attained by its attainment date and if not, to reclassify such area to a higher classification.[14]

It is important to note that the EPA's approval of a state's CAA section 179B(a) demonstration that a nonattainment area would attain the standards but for emissions emanating from outside the U.S. does not affect the area's nonattainment designation—the area retains its nonattainment designation and remains subject to requirements applicable to nonattainment areas, such as nonattainment new source review and conformity.[15] Similarly, where the EPA approves a state's CAA section 179B(b) demonstration that the nonattainment area would have attained the standards by the applicable attainment date but for emissions emanating from outside of the U.S., the area retains its nonattainment designation and is still subject to all applicable requirements, based on the area's classification.

The 2008 Ozone SRR does not include regulatory requirements specific to CAA section 179B. Instead, the preamble of the 2008 Ozone SRR recommends that states work with relevant EPA Regional Offices ''on a case-by-case basis to determine the most appropriate information and analytical methods for each area's unique situation.'' [16]

In addition, both the EPA's 1992 General Preamble and 1994 General Preamble Addendum provide general guidance on CAA section 179B.[17] The General Preamble Addendum describes several types of information that may be relevant, such as analyzing monitoring data where a dense network exists, meteorological influences, particle composition, comparison of U.S. and international emissions inventories, and modeling that can be used to evaluate the impact of emissions emanating from outside the U.S. In the General Preamble Addendum, the EPA indicated that it is appropriate to consider this information ''for individual nonattainment areas on a case-by-case basis in determining whether an area may qualify for treatment under section 179B.'' [18] While the focus of the EPA's discussion in the General Preamble Addendum is on particulate matter (*e.g.,* evaluation of particle composition), the EPA is applying these general principles for evaluation of international impacts on ambient ozone levels to the Imperial County nonattainment area.

C. Summary of the Imperial Ozone Plan and 2018 SIP Update

On November 14, 2017, CARB submitted the Imperial Ozone Plan as a revision to the Imperial County portion of the California SIP.[19] The Imperial Ozone Plan addresses the requirements for base year inventories for attainment planning, baseline emissions inventories for RFP plans, and periodic emission inventories at 3-year intervals. It also includes air quality modeling demonstrating that the area would attain the 2008 ozone standards by the July 20, 2018 Moderate area attainment date (based on a modeled attainment year of 2017), but for emissions emanating from Mexico (pursuant to section 179B(a)), demonstrations for implementation of reasonably available control technology (RACT) and RACM, a demonstration for RFP, motor vehicle emission budgets for 2017, and contingency measures for failure to make RFP. The Plan also includes a certification that an existing SIP-approved rule from the District meets the CAA's emission statement requirements for the 2008 ozone NAAQS.

On December 11, 2018, CARB submitted the 2018 SIP Update to the EPA as a revision to the California SIP for several ozone nonattainment areas.[20] In part, CARB developed the 2018 SIP Update in response to the court's decision in *South Coast II* vacating the 2008 Ozone SRR with respect to the use of an alternate baseline year for demonstrating RFP. For Imperial County, the 2018 SIP Update includes a revised RFP demonstration for the 2008 ozone NAAQS using 2011 as the baseline year, as well as an updated emissions inventory for 2017 that is also used for the revised RFP demonstration (to reflect actual emissions data for 2017 for certain sources, and updated activity data for certain other sources that were not available when the Imperial Ozone Plan was adopted in 2017). The 2018 Update also addresses aspects of contingency measure and motor vehicle emission budget requirements.

Sections 110(a)(1) and (2) and 110(l) of the CAA require a state to provide reasonable public notice and opportunity for public hearing prior to the adoption and submission of a SIP or SIP revision. To meet this requirement, every SIP submittal should include evidence that adequate public notice was given and an opportunity for a public hearing was provided consistent with the EPA's implementing regulations in 40 CFR 51.102.

Both the District and CARB satisfied applicable statutory and regulatory requirements for reasonable public

[13] 82 FR 27125 (June 14, 2017), for Rules 204 and 206; 84 FR 44545 (August 26, 2019), for Rule 207.

[14] The actual text of CAA section 179B(b) refers to section 181(a)(2); however, the EPA has long understood this reference to be erroneous and that Congress intended to refer to section 181(b)(2). ''State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' 57 FR 13498, 13569, n. 41 (April 16, 1992) (''General Preamble'').

[15] 78 FR 34178, 34205 (June 6, 2013).

[16] 2008 Ozone SRR, 12293. See also 78 FR 34178, 34204.

[17] General Preamble, 13569; and ''State Implementation Plans for Serious PM_{10} Nonattainment Areas, and Attainment Date Waivers for PM–10 Nonattainment Areas Generally; Addendum to the General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' 59 FR 41998, 42000 (August 16, 1994) (''General Preamble Addendum'').

[18] General Preamble Addendum, 42001.

[19] Letter dated November 14, 2017, from Richard Corey, Executive Officer, CARB, to Alexis Strauss, Acting Regional Administrator, EPA Region 9.

[20] Letter dated December 5, 2018, from Richard Corey, Executive Officer, CARB, to Michael Stoker, Regional Administrator, EPA Region 9.

notice and hearing prior to adoption and submission of the Imperial Ozone Plan. The District provided a public comment period and held a public hearing prior to the adoption of the SIP submission on September 12, 2017.[21] CARB provided the required public notice and opportunity for public comment prior to its October 26, 2017 public hearing and adoption of the SIP submission.[22] The submission includes proof of publication of notices for the respective public hearings. Therefore, we find that the Imperial Ozone Plan meets the procedural requirements for public notice and hearing in CAA sections 110(a) and 110(l) and 40 CFR 51.102.

Similarly, CARB satisfied applicable statutory and regulatory requirements for reasonable public notice and hearing prior to adoption and submission of the 2018 SIP Update. CARB provided the required public notice and opportunity for public comment prior to its October 25, 2018 public hearing and adoption of the SIP submission.[23] The submission includes proof of publication of notices for the respective public hearings. Therefore, we find that the Imperial Ozone Plan meets the procedural requirements for public notice and hearing in CAA sections 110(a) and 110(l) and 40 CFR 51.102.

CAA section 110(k)(1)(B) requires the EPA to determine whether a SIP submission is complete within 60 days of receipt. This section of the CAA also provides that any plan that the EPA has not affirmatively determined to be complete or incomplete will become complete by operation of law six months after the date of submission. The EPA's SIP completeness criteria are found in 40 CFR part 51, Appendix V. The Imperial Ozone Plan submission, dated November 14, 2017, became complete by operation of law on May 14, 2018. The 2018 SIP Update, submitted December 11, 2018, was found complete as part of the EPA's completeness review for purposes of another ozone nonattainment area addressed in the 2018 SIP Update.[24]

[24] 84 FR 11198, 11199 (March 25, 2019).

D. Emissions Statement Certification

1. Statutory and Regulatory Requirements

Section 182(a)(3)(B)(i) of the Act requires states to submit a SIP revision requiring owners or operators of stationary sources of VOC or NO_X to provide the state with statements of actual emissions from such sources. Statements must be submitted at least every year and must contain a certification that the information contained in the statement is accurate to the best knowledge of the individual certifying the statement. Section 182(a)(3)(B)(ii) allows states to waive the emissions statement requirement for any class or category of stationary sources that emits less than 25 tons per year of VOCs or NO_X if the state provides an inventory of emissions from such class or category of sources as part of the base year or periodic inventories required under CAA sections 182(a)(1) and 182(a)(3)(A) that is based on the use of emission factors established by the EPA or other methods acceptable to the EPA.

The preamble of the 2008 Ozone SRR states that if the EPA has previously approved an emissions statement rule for the 1997 ozone NAAQS or the 1-hour ozone NAAQS that covers all portions of the nonattainment area for the 2008 ozone NAAQS, then such rule should be sufficient for purposes of the emissions statement requirement for the 2008 ozone NAAQS.[25] The state should review the existing rule to ensure it is adequate and, if so, may rely on it to meet the emissions statement requirement for the 2008 ozone NAAQS. In cases when an existing emissions statement requirement is still adequate to meet this requirement for the 2008 ozone NAAQS, states can provide the rationale for that determination to the EPA in a written statement in the SIP submission explaining how it meets this requirement. States should identify the various requirements within the emissions statement requirement and indicate how each is met by the existing emissions statement program. In cases when an emissions statement requirement is modified for any reason, states must provide the revisions to the emissions statement as part of their SIP submission.

2. Summary of State's Submission

The Imperial Ozone Plan explains that Imperial County APCD adopted Rule 116 (''Emissions Statement and Certification'') in 2010 to address the emissions statement requirements for the 1997 ozone NAAQS.[26] The District notes that Rule 116 applies to the nonattainment area for the 1997 ozone NAAQS, which covers the same area as the nonattainment area for the 2008 ozone NAAQS, and that EPA approved the rule into the California SIP in 2012 for purposes of meeting the 1997 ozone NAAQS planning requirements.[27] The Plan then includes a summary of the requirements of CAA section 182(a)(3)(B) and how the District reviewed Rule 116 against those requirements for the 2008 ozone NAAQS.

[25] 2008 Ozone SRR, 12291.

The District states that the explicit purpose of Rule 116 is to address the requirement for owners and operators of stationary sources of NO_X or VOC to provide a statement of actual emissions of such pollutants; that the rule requires such statements to be submitted annually with a certification by a responsible company official; and that the rule addresses the provision of CAA section 182(a)(3)(B)(ii) that allows states to waive the application of the emissions statement requirements for sources emitting less than 25 tons per year (tpy) or NO_X or VOC so long as the state provides emissions inventories for such classes or categories of sources. Based on this review, the District concludes that Rule 116 fulfills the emissions statement requirements for the 2008 ozone NAAQS.

3. EPA Review of State's Submission

The EPA evaluated Imperial County APCD Rule 116 and the Plan's assessment of Rule 116 for compliance with the specific requirements for emissions statements under CAA section 182(a)(3)(B)(i). We find that Rule 116 applies within the entire nonattainment area for the 2008 ozone NAAQS; applies to all permitted sources of VOC and NO_X; requires the submittal, on an annual basis, of the types of information necessary to estimate actual emissions from the subject stationary sources; and requires certification by the responsible officials representing the owners and operators of stationary sources. Therefore, we propose to find that Rule 116 meets the requirements of CAA section 182(a)(3)(B)(i).

We also note that, while Rule 116 provides authority to the District to waive the requirement for any class or category of stationary sources that emit less than 25 tons per year, such a waiver is allowed under CAA section 182(a)(3)(B)(ii) so long as the state includes estimates of such class or

[26] Imperial Ozone Plan, 10–1.

[27] 77 FR 72968 (December 7, 2012).

category of stationary sources in base year emissions inventories and periodic inventories submitted under CAA sections 182(a)(1) and 182(a)(3)(A) based on EPA emission factors or other methods acceptable to the EPA. We recognize that emissions inventories developed by CARB for Imperial County routinely include actual emissions estimates for all stationary sources or classes or categories of such sources, including those less than 25 tons per year, and that such inventories provide the basis for inventories submitted to meet the requirements of CAA sections 182(a)(1) and 182(a)(3)(A). By approval of emissions inventories as meeting the requirements of CAA sections 182(a)(1) and 182(a)(3)(A), the EPA is accepting the methods and factors used by CARB to develop those emissions estimates. For example, in 2014, the EPA approved the 2002 base year emissions inventory for Imperial county for the 1997 ozone NAAQS,[28] and in this notice we are proposing to approve the Imperial Ozone Plan's 2012 base year emissions inventory for the 2008 ozone NAAQS.

Thus, for the reasons stated herein, we propose to approve the Imperial Ozone Plan's certification that Rule 116 (adopted February 23, 2010) meets the emissions statement requirements under CAA section 182(a)(3)(B) for the 2008 ozone NAAQS.[29]

E. Emissions Inventories

1. Statutory and Regulatory Requirements

Sections 172(c)(3) and 182(a)(1) of the CAA require states to submit for each ozone nonattainment area a ''base year inventory'' that is a comprehensive, accurate, current inventory of actual emissions from all sources of the relevant pollutant or pollutants in the area. In addition, the 2008 Ozone SRR requires that the inventory year selected be consistent with the baseline year for the RFP demonstration, which is the most recent calendar year for which a complete triennial inventory is required to be submitted to the EPA under the Air Emissions Reporting Requirements (AERR).[30]

The EPA has issued guidance on the development of emissions inventories for ozone and other pollutants.[31] Emissions inventories for ozone must include emissions of VOC and NO_X and represent emissions for a typical ozone season weekday.[32] States should include documentation explaining the approaches used to calculate emissions data. In estimating mobile source emissions, states should use the latest emissions models and planning assumptions available at the time it develops the SIP revision.[33]

The base year inventory required by sections 172(c)(3) and 182(a)(1) serves as the starting point for attainment demonstration air quality modeling, assessing RFP, and determining the need for additional SIP control measures. Future year emissions inventories (also referred to as baseline inventories) are necessary to show the projected effectiveness of SIP control measures and must reflect the most recent population, employment, travel and congestion estimates for the area. Both base year and future year inventories are necessary for photochemical modeling to demonstrate attainment and RFP.

2. Summary of State's Submission

The Imperial Ozone Plan includes a base year inventory (using 2012 as the base year) and future year baseline inventories (2008, 2014, and 2017) [34] for NO_X and VOC.[35] Documentation for the emissions inventories appears in Chapter 4, which also contains summary inventories in Tables 4–6 through 4–9; Appendix A contains more detailed inventories.[36] The Plan explains that the inventories represent a joint effort by staff from both CARB and the District. The Plan also explains the reason for selecting 2012 as the base year as related an on-going data collection effort by the South Coast Air Quality Management District to study exposure to air toxics and a desire to maintain consistency for plans developed in the State.[37] The Plan states that the inventories reflect average summer day emissions because ozone levels in Imperial County are typically higher from May through October.[38]

The Imperial Ozone Plan presents VOC and NO_X emissions estimates in two general categories: stationary sources and mobile sources. Stationary sources are subdivided into point sources and areawide sources. The Plan first explains that point sources typically include permitted facilities that have one or more identified and fixed pieces of equipment and emissions points. The Plan's 2012 base year inventory for these types of point sources uses actual emissions for 2012 as reported by regulated entities consistent with the AERR and may be based on testing, continuous emissions monitoring, or calculations.[39] In addition, the Plan explains that the term ''point source'' includes ''stationary area sources,'' which are smaller sources such as internal combustion engines (*e.g.,* agricultural diesel irrigation pumps) and gasoline dispensing facilities (gas stations) for which emissions are estimated as a group and included in the inventories as an aggregated total.[40] The Plan provides information regarding the methodologies used to estimate base year and forecasted emissions for the various categories of stationary area sources.[41] Areawide sources are small sources that produce emissions over a wide geographic area (*e.g.,* consumer products, architectural coatings, asphalt paving/roofing, residential wood combustion, fires, and agricultural burning). Similar to the approach for stationary area sources, the Plan

[28] 79 FR 63332 (October 23, 2014).

[29] For further background on our evaluation of Rule 116, see ''Technical Support for the Imperial County Air Pollution Control District Rule 116, Emissions Statement and Certification,'' EPA Region IX, January 2012, included in the docket for today's action.

[30] 2008 Ozone SRR at 40 CFR 51.1115(a) and the Air Emissions Reporting Requirements at 40 CFR part 51, subpart A.

[31] ''Emissions Inventory Guidance for Implementation of Ozone and Particulate Matter National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations,'' EPA–454/B–17–002, May 2017. At the time the emission inventory for the Imperial Ozone Plan was developed, the following EPA emissions inventory guidance applied: ''Emissions Inventory Guidance for Implementation of Ozone and Particulate Matter National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations,'' EPA–454–R–05–001, August 2005.

[32] 40 CFR 51.1115(a) and (c), and 40 CFR 51.1100(bb) and (cc).

[33] 2008 Ozone SRR, 12290.

[34] The 2018 SIP Update contains a new baseline inventory, using 2011 as the baseline year, to demonstrate RFP. We discuss the baseline emission inventory in the 2018 SIP Update as part of our RFP evaluation in section II.H of this proposed rule.

[35] The Plan uses the term ''reactive organic gases'' (ROG) to refer to VOCs. Imperial Ozone Plan, 4–1. In general, ROG represent a slightly broader group of compounds than those in the EPA's list of VOCs and pertain to common chemical species (*e.g.,* benzene, xylene, etc.) as VOCs. Therefore, this proposed rulemaking refers to this set of gases as VOCs.

[36] The 2012 base year inventory included in the Imperial Ozone Plan updates a previous submittal from CARB, the ''8-Hour Ozone State Implementation Plan Emission Inventory Submittal'' (the Multi-area Emission Inventory). The Multi-area Emission Inventory was submitted by CARB on July 17, 2014, and included inventories for 16 nonattainment areas, including Imperial County. The base year inventory submitted with the Imperial Ozone Plan in November 2017 revises and updates the base year emission inventory for Imperial County included in the Multi-area Emission Inventory submitted in July 2014. Because we understand the State intended the November 2017 submittal to replace the July 2014 submittal (at least with respect to Imperial County), we plan no further action on the inventory for Imperial County submitted by CARB in July 2014.

[37] Imperial Ozone Plan, 4–2.

[38] Id. at 4–3.

[39] Id.

[40] Id. at 4–4

[41] Id. at 4–4 to 4–5.

provides information for each of the various categories of areawide sources regarding the methods used to estimate emissions.[42]

The Plan divides mobile sources into ''on-road sources'' and ''off-road sources.''[43] On-road mobile sources include automobiles, light-, medium-, and heavy-duty trucks, and motorcycles. Off-road sources include aircraft, locomotives, cargo handling equipment, farm equipment, and recreational vehicles. Emissions from on-road sources were calculated using CARB's EMFAC2014 model[44] and travel activity data from Southern California Association of Governments (SCAG) using the 2016 Regional Transportation Plan/Sustainable Communities Strategy.[45] Off-road emissions were developed using different category-specific models developed to support District regulations or the OFFROAD2007 model where specific models were not available.[46]

With respect to future year baseline inventories, the Plan explains the approaches used to forecast emissions for various categories of both stationary and mobile sources.[47] Forecasted emissions rely on assumptions regarding growth and reductions from adopted control measures, and information used to forecast emissions of stationary sources includes on data regarding economic activity, fuel usage, population and residential housing (*i.e.,* growth and control profiles), whereas projections of mobile source emissions are accomplished through the use of models that predict activity and vehicle turnover rates and also reflect adopted regulatory measures.[48]

The Plan also explains how the emissions inventories reflect emissions reduction credits (ERCs) generated by facilities that voluntarily reduced emissions or ceased operation of equipment prior to the base year of 2012.[49] District Rule 207 (''New and Modified Stationary Source Review'') allows voluntarily reduced emissions to be banked for future use as offsets to meet nonattainment permitting requirements.[50] As noted in the Plan, EPA regulations require inclusion of ERCs banked prior to the base year in the base year and forecasted emission inventories.[51]

The detailed inventories in Appendix A provide emissions of point sources (including stationary area sources) in five primary categories (Fuel Combustion, Waste Disposal, Cleaning and Surface Coatings, Petroleum Production and Marketing, and Industrial Processes) and various subcategories; emissions for areawide sources in two primary categories (Solvent Evaporation and Miscellaneous Processes) and various subcategories; and emissions for mobile sources in two categories (On-Road and Off-Road).

3. EPA Review of State's Submission

We have reviewed the 2012 base year inventory developed for the Imperial Ozone Plan and the inventory methodologies used by CARB and the District for consistency with CAA requirements and the EPA's guidance. First, as required by EPA regulation, we find that that the 2012 base year inventory includes estimates for NO_X and VOCs for a typical ozone season weekday, and that the Plan includes adequate information to determine how emissions were calculated. Second, we find that the 2012 base year inventory reflects appropriate emissions models and methodologies, and therefore represents a comprehensive, accurate, and current inventory of actual emissions for that year in Imperial County. Third, we find that the selection of 2012 for the base year emissions inventory is appropriate because it is consistent with the 2011 baseline year inventory in the 2018 SIP Update used to demonstrate RFP for Imperial County, as both inventories are derived from a common set of models and methods.

Table 1 presents a summary of ozone precursor summer emissions by source category for the 2012 base year. Based on the 2012 inventory of anthropogenic emissions, which used tons per day (tpd), mobile sources account for 89 percent (%) of NO_X emissions and 49% of VOC emissions. The next largest categories include stationary sources (6% of NO_X emissions) and area sources (44% of VOC emissions).

TABLE 1—SUMMARY OF OZONE PRECURSOR SUMMER EMISSIONS FOR THE 2012 BASE YEAR

Source category	2012	
	NO_X (tpd)	VOC (tpd)
Stationary Sources	1.73	1.33
Area Sources	0.67	8.51
On-road Mobile Sources	10.01	4.25
Non-road Mobile Sources	9.43	5.10
Total for Imperial County	21.83	19.20

Source: Imperial Ozone Plan, App. A, Table A–2. Totals may not add up due to rounding.

With respect to future baseline projections, we reviewed the approaches used and find them acceptable and conclude that the future baseline emissions projections in the Imperial Ozone Plan reflect appropriate methods and assumptions. With respect to nonattainment NSR requirements for offsets,[52] we find that the District properly included emissions reductions generated before the base year (*i.e.,* pre-base year emission reduction credits) in

[42] Id. at 4–6 to 4–8.

[43] In general, CARB uses the term ''off-road'' to refer to sources to which the EPA typically applies the term ''non-road.''

[44] EMFAC is short for EMission FACtor. The EPA announced the availability of the EMFAC2014 model for use in state implementation plan development and transportation conformity in California on December 14, 2015. 80 FR 77337. The EPA's approval of the EMFAC2014 emissions model for SIP and conformity purposes was effective on the date of publication of the notice in the **Federal Register**. On August 15, 2019, the EPA approved and announced the availability of EMFAC2017, the latest update to the EMFAC model for use by State and local governments to meet CAA requirements. See 84 FR 41717.

[45] Imperial Ozone Plan, 4–10. SCAG is the metropolitan planning organization for six counties in Southern California, including Imperial County. Imperial Ozone Plan, 4–1.

[46] Id. at 4–11.

[47] Id. at 4–8 to 4–10 and 4–12 to 4–13.

[48] Id. at 4–2.

[49] Id. at 4–16 to 4–17.

[50] The rule governing the use of such emission reduction credits for new of modified major sources of NO_X or VOC in Imperial County is District Rule 207. The EPA has approved Rule 207, as amended on September 11, 2018, including applicable major source thresholds and offset ratios, into the California SIP. 84 FR 44545.

[51] 40 CFR 51.165(a)(3)(ii)(C)(*1*)(*ii*).

[52] 40 CFR 51.165(a)(3)(ii)(C)(*1*)(*ii*).

the forecasted year inventory and thus satisfied this requirement.[53]

Therefore, the EPA is proposing to approve the 2012 emissions inventory in the Imperial Ozone Plan as meeting the requirements for a base year inventory set forth in CAA sections 172(c)(3) and 182(a)(1) and 40 CFR 51.1115.

F. Reasonably Available Control Measures Demonstration

1. Statutory and Regulatory Requirements

Section 172(c)(1) of the CAA requires that each attainment plan provide for the implementation of all RACM as expeditiously as practicable, including such reductions in emissions from existing sources in the area as may be obtained through implementation of RACT.[54] EPA regulations governing implementation of the 2008 ozone NAAQS require that, for each nonattainment area required to submit an attainment demonstration, the state concurrently submit a SIP revision demonstrating that it has adopted all RACM necessary to demonstrate attainment as expeditiously as practicable and to meet any RFP requirements.[55] The 2008 Ozone SRR provided that the determination of whether a SIP contains all RACM requires an area-specific analysis establishing that there are no additional economically and technically feasible control measures (alone or cumulatively) that will provide for expeditious attainment or advance the attainment date by one year.'' [56]

The 2008 ozone NAAQS implementation regulations require that all control measures needed for attainment must be implemented no later than the beginning of the attainment year ozone season.[57] The attainment year ozone season is defined as the ozone season immediately preceding a nonattainment area's maximum attainment date.[58]

2. Summary of State's Submission

When the EPA acted to reclassify Imperial County (and certain other areas) from Marginal to Moderate, the EPA established a deadline of January 1, 2017, for the submission of a SIP revision to address the Moderate area requirements for the 2008 ozone NAAQS, including the RACM requirement of CAA section 172. Imperial County APCD and CARB undertook a process to identify and evaluate potential RACM in Imperial County. They present their assessment of RACM in Chapter 6 of the Imperial Ozone Plan, which is further explained and supported in Appendix C (area source RACM), Appendix D (key mobile source regulations and programs), and Appendix E (compilation of CARB control measures, 1985–2016) of the Plan. This assessment describes how the state and local control measures address the RACM requirements for purposes of demonstrating RFP (in Chapter 5 of the Plan) and in support of the demonstration that the reductions from such measures would be adequate to bring Imperial County into attainment of the 2008 ozone NAAQS but for emissions from Mexico (in Chapter 8 of the Plan).[59] CARB and the District conclude in their RACM evaluations that no additional measures are necessary in accordance with EPA regulations and RACM guidance.[60]

The District also describes strategic efforts to understand and address air quality and emissions sources at the U.S.-Mexico border and in Mexico (in Chapter 9 of the Plan).[61] The Plan does not relate these efforts to specific CAA requirements for Moderate ozone nonattainment areas, and, accordingly, we are not evaluating this portion of the Plan.

The following paragraphs of this proposed rule separately describe the Plan's RACM analyses as prepared by the District for certain source categories and by CARB for other source types.

a. District's RACM Analysis

Stationary sources emitted an estimated 8% of the NO_X and 8% of the VOC in Imperial County in 2017.[62] The largest portions of stationary source emissions are from fuel combustion (*e.g.,* manufacturing and industrial, and electric utility sources) for NO_X and from cleaning and surface coatings, and petroleum marketing for VOC.

For stationary sources subject to RACT as major sources of NO_X or VOC and non-major point sources subject to CTGs under RACT, the District states that RACM can be achieved through the adoption of RACT and includes its RACT evaluation and summary.[63] The EPA has in a separate action proposed to approve in part and conditionally approve in part the portions of the Imperial Ozone Plan that relate to the RACT requirements under CAA section 182(b)(2) and 40 CFR 51.1112, and thus we do not re-summarize those portions herein.[64] The District's RACM analysis also describes its nonattainment NSR rule for stationary sources (Rule 207).[65]

CARB estimated that area sources would emit 3% of the NO_X and 46% of the VOC in Imperial County in 2017.[66] The largest portions of these emissions are from managed burning and disposal for NO_X and from farming operations, pesticides, consumer products, and managed burning and disposal for VOC. For these area sources, the District's RACM analysis indicates that the District evaluated its area source control measures against EPA's Menu of Control Measures for NO_X and VOC.[67] The District presents a summary of that evaluation in Appendix C of the Plan where, for most source categories, the District found either that the District has rules in place for such measures or that Imperial County has no sources within a source category. For the latter situation, the Plan includes negative declarations.[68]

Table 2 identifies the District's area source control measures (as listed in

[53] Imperial Ozone Plan, 4–16 to 4–17.

[54] For ozone nonattainment areas classified as Moderate or above, CAA section 182(b)(2) also requires implementation of RACT for all major sources of VOC and for each VOC source category for which EPA has issued a Control Techniques Guideline (CTG). Section 182(f) of the Act requires that RACT under section 182(b)(2) also apply to major stationary sources of NO_X. In a separate action, the EPA has proposed to approve in part and conditionally approve in part the portions of the Imperial Ozone Plan (Chapter 7, ''Reasonably Available Control Technology Assessment'' and App. B, ''Reasonably Available Control Technology Analysis for the 2017 Imperial County State Implementation Plan for the 2008 8-Hour Ozone Standard'') that relate to the RACT requirements under CAA section 182(b)(2) and 40 CFR 51.1112. 84 FR 49202 (September 19, 2019).

n/a	CARB Consumer Products Program, various rules	(*)	Various rulemakings.

Note: This table is adapted from Table C–1 of the Imperial Ozone Plan. See also, Imperial Ozone Plan, section 8.3 (''Weight of Evidence Analysis''), which provides a weight of evidence analysis that describes how the overall emission reduction trends for NO_X and VOC support reduction in ambient ozone concentrations.

* Various dates.

The Plan provides a discussion of the District's and CARB's Smoke Management Programs, under which the District and CARB may call no-burn days in Imperial County, and states that these programs are more protective of public health compared to the EPA's episodic burning control measure.[69] The District also states that it does not have a rule for municipal solid waste landfills, but instead issues permits that must comply with CARB and EPA waste management statutes and regulations.[70] Though not described in the RACM portion of the Plan, the District also refers to its Rule 217 (''Large Confined Animal Facilities'') as a stationary source control rule in the Plan's inventory.[71]

In addition to the source categories described above, the District states that it was not feasible to adopt and implement control measures for three source categories before the attainment year given the short time between the area's reclassification to Moderate, effective June 3, 2016, and the 2017 attainment year.[72] The District also states that it was determined that these measures were not necessary to demonstrate expeditious attainment or to meet RFP.[73]

The Plan also discusses regional and local transportation control measures (TCMs) that address the portion of the NO_X and VOC emissions sources under regional and local jurisdictions.[74] For regional measures, the District refers to the current quadrennial regional transportation plan applicable to Imperial County, the ''2016–2040 Regional Transportation Plan/ Sustainable Communities Strategy (2016 RTP/SCS),'' and the biennial ''Federal Transportation Improvement Plan (FTIP).'' The District states that the 2016 RTP/SCS addresses the long-term planning requirements for how transportation projects, plans, and programs will conform with applicable air quality plans, while the FTIP addresses the associated short-term planning implementation requirements. For local measures, the District refers to the Imperial County ''CEQA Air Quality Handbook'' that provides guidance to determine emissions from residential, commercial, and industrial projects and feasible measures to mitigate the effect of such emissions.

The District states that to be considered RACM, TCMs must be technologically and economically feasible in the area, and able to be implemented by the attainment year. The District notes that CAA section 108(f)(1)(A) provides a list of TCMs that could potentially qualify as RACM, and that there are currently no on-going TCMs in Imperial County. The District concludes that no new TCMs are being proposed in the Plan due to the short time between the area's reclassification to Moderate, effective June 3, 2016, and the 2017 attainment year.

b. CARB's RACM Analysis

The Plan notes that CARB provided the RACM analysis for certain sources, including consumer products, pesticides, and mobile sources.[75]

CARB states that CARB's Consumer Products Program has established regulations that limit VOC emissions from 129 consumer product categories and that each applies in Imperial County.[76] These include product categories such as antiperspirants and deodorants and aerosol coatings. The Plan also refers to a voluntary Alternative Control Plan that provides compliance flexibilities to companies. The Plan also notes that the EPA's consumer products regulation was promulgated in 1998 [77] and states that California's requirements for general consumer products and aerosol coatings are more stringent than those EPA standards.[78]

CARB states that California Department of Pesticide Regulation (DPR) is responsible for regulating the application of pesticides, and that DPR has adopted and implemented regulations to limit VOC emissions from use of agricultural pesticides in certain areas of California.[79] In May 2019, CARB provided additional technical clarifications (''CARB's Technical Clarification Letter'') with respect to the RACM conclusion for not regulating

[69] Imperial Ozone Plan, App. C, Table C–1, page 2.

[70] Id. at 4.

[71] Id., Table 4–4.

[72] Id., App. C, Table C–1, pages 1, 2, and 4. The District states that, in 2019, it will adopt new limits on NO_X emissions from (i) boilers, steam generators, and process heaters rated 0.075 to 5 MMBtu per hour (a new limit of 14 nanograms (ng) NO_X per joule of heat output or 20 ppm), and (ii) new and replacement residential water heaters rated less than 0.075 MMBtu per hour (a new limit of 10 ng NO_X per joule of heat output). The District intends to implement both new limits by January 1, 2020. Imperial Ozone Plan, App. C, 1–2. See also, sections 5.5.4 and 5.5.2, respectively, of CARB and Imperial County APCD's SIP revision for the 2012 $PM_{2.5}$ NAAQS, submitted July 18, 2018. ''Imperial County 2018 Annual Particulate Matter Less Than 2.5 Microns in Diameter State Implementation Plan,'' Imperial County APCD, April 2018 (''Imperial $PM_{2.5}$ Plan'').

[73] Imperial Ozone Plan, 6–3.

[74] Id. at 6–3 to 6–7.

[75] Imperial Ozone Plan, 6–6.

[76] Imperial Ozone Plan, 6–10 and App. C, Table C–1, page 3.

[77] 63 FR 8819 (September 11, 1998).

[78] Imperial Ozone Plan, 6–10. Regarding the EPA's more recent 2008 rule on VOC emission standards for aerosol coatings, 73 FR 15604 (March 24, 2008), the District states that the rule was aimed primarily at manufacturers of such coatings, which are not present in Imperial County. Imperial Ozone Plan, App. C, Table C–1, page 3.

[79] Imperial Ozone Plan, 6–10 and App. C, Table C–1, page 4.

pesticides in the Imperial Ozone Plan.[80] While acknowledging the ''relative significance'' of VOC emissions from pesticides, CARB presented its position that implementation of pesticide regulations in the area would not contribute to RFP and is not necessary for expeditious attainment.

CARB provides three bases for this position. First, CARB argues that implementation would not have been feasible given the short timeframe between reclassification in June 2016 and the attainment year of 2017. Second, CARB relies on data in the Imperial Ozone Plan to estimate that a 1.0 tpd reduction in NO_X or VOC emissions would result in 0.2 parts per billion (ppb) reduction in ambient ozone concentration at the modeled high site (El Centro). Based on a conservative assumption of 100% reduction of the pesticide VOC emissions in 2017 of 2.21 tpd VOC, CARB estimates that the modeled 2015–2017 design value of 79 ppb would decrease by no more than 0.44 ppb and concludes that such reductions would not result in attainment of the 2008 ozone NAAQS by the 2017 attainment year. Third, CARB also states that annual emissions data demonstrate that Imperial County has achieved a level of VOC reductions in the pesticide/fertilizer category that is comparable to VOC reduction levels in five other areas (Sacramento Metro, San Joaquin Valley, South Coast, Southeast Desert, and Ventura County) where pesticide regulations are in effect as a result of an earlier ozone SIP obligation.

For mobile sources, CARB discusses how California's mobile source measures for NO_X and VOC emissions meet RACM in Imperial County.[81] Given the need for substantial emissions reductions from mobile and area sources to meet the NAAQS in California nonattainment areas, the State of California has developed stringent control measures for on-road and non-road mobile sources and the fuels that power them. California has unique authority under CAA section 209 (subject to a waiver by the EPA) to adopt and implement new emissions standards for many categories of on-road vehicles and engines and new and in-use non-road vehicles and engines. The EPA has approved such mobile source regulations for which waiver authorizations have been issued as revisions to the California SIP.[82]

CARB's mobile source program extends beyond regulations that are subject to the waiver or authorization process set forth in CAA section 209 to include standards and other requirements to control emissions from in-use heavy-duty trucks and buses, gasoline and diesel fuel specifications, and many other types of mobile sources. Generally, these regulations have been submitted and approved as revisions to the California SIP.[83]

CARB identifies the key mobile source regulations and programs that provide emissions reductions in Imperial County.[84] These key measures include requirements for light-duty vehicles,[85] heavy-duty vehicles,[86] non-road sources,[87] and incentive programs for a variety of sources [88] that applied through the Imperial County attainment year of 2017. CARB also describes its Mobile Source Strategy, which was adopted in November 2016 and included a suite of actions to address federal air quality standards and other state air quality goals, and its State SIP Strategy, which was adopted by CARB on March 23, 2017 and submitted to the EPA as a revision to the California SIP on April 27, 2017.[89]

CARB concludes that, considering the comprehensiveness and stringency of its mobile source program, all RACM for mobile sources under CARB's jurisdiction are being implemented, and that no additional measures are being proposed in the Plan due to the short time between the area's reclassification to Moderate and the attainment year.[90]

3. EPA Review of State's Submission

The process followed by CARB and the District in the Imperial Ozone Plan to identify RACM is generally consistent with the EPA's regulations and guidance. The process included compiling a comprehensive list of potential control measures for sources of NO_X and VOC in Imperial County.[91] As part of this process, CARB and the District evaluated potential controls for relevant source categories and provided justifications for the rejection of certain identified measures.

The EPA has reviewed the Imperial Ozone Plan's determination that current stationary, area, and mobile source control measures represent RACM for NO_X and VOC. For the reasons presented below, we propose that the State and District's rules provide for the implementation of RACM for sources of NO_X and VOC for the 2008 ozone NAAQS.

With respect to mobile sources, CARB has developed and implemented stringent control measures for on-road and non-road mobile sources, and its current program addresses the full range of mobile sources in Imperial County through regulatory programs for both new and in-use vehicles. With respect to transportation controls, we note that the SCAG has a program to fund cost-effective TCMs. Overall, we propose to determine that the programs developed and administered by CARB and SCAG provide for the implementation of RACM for NO_X and VOC in Imperial County.

[90] Imperial Ozone Plan, 6–7 and 6–10.

[91] Id., App. C.

For area-wide sources and stationary sources not subject to RACT, we reviewed Chapter 6 and Appendix C and found that the measures identified by the District, as reflected in Table 2 of this proposed action, meet RACM for each source category.[92] Regarding consumer products, the EPA has approved many CARB measures into the California SIP that limit VOC emissions from a wide array of products, including antiperspirants and deodorants, aerosol coating products, and other consumer products.[93]

For open burning, we reviewed the District's SIP-approved measures that address managed burning and disposal,[94] which account for 0.54 tpd of NO_X and 1.10 tpd of VOC in the Plan's 2017 emissions inventory.[95] The District has SIP-approved rules for open burning in general, open burning of wood wastes, agricultural burning, and range improvement burning.

Regarding landfills, the District stated that it does not have a rule for municipal solid waste landfills and instead permits such facilities. We found that there are no major source landfills in Imperial County, which is consistent with the Plan's 2017 emissions inventory for this source category.[96] We note that methane, which comprises a large portion of landfill organic carbon emissions, is excluded from the EPA's definition of VOCs due to its negligible photochemical reactivity.[97]

In reviewing the Plan's 2017 emissions inventory, we also found that farming operations were projected to emit 2.53 tpd of VOC, which is 15% of the total 2017 VOC emissions inventory.[98] According to CARB's California Emissions Projection Analysis Model (CEPAM), such VOC emissions in Imperial County largely come from agricultural waste from livestock husbandry, particularly feedlot cattle.[99] Imperial County Rule 217 (adopted February 9, 2016) was developed to limit such VOC emissions by requiring the use of best management practices for activities relating to livestock waste, and it is included in the Imperial Ozone Plan's table of stationary source rules in the Plan's emissions inventory.[100] The EPA approved this rule into the California SIP in June 2017, including a determination that the rule represented RACT-level controls.[101] A review of other areas shows that there is no change to the set of reasonable controls that may apply to such sources.

We also evaluated the Plan's determinations for three source categories (*i.e.,* commercial and institutional natural gas water heaters; residential, commercial, and institutional low-NO_X water heaters and low-NO_X burner space heaters; and pesticides).

For commercial and institutional natural gas water heaters and residential, commercial, and institutional low-NO_X water heaters and low-NO_X burner space heaters, we considered whether there are additional economically and technically feasible control measures that could have been adopted into the SIP by the attainment year of 2017 to meet RACM. While Imperial County APCD plans to adopt new rules for these two source categories in 2019 to limit NO_X emissions from such sources,[102] no additional measures were proposed for adoption prior to the attainment date due to the short time between the area's reclassification to Moderate and the attainment year of 2017. Based on CEPAM data, these source categories emitted a combined 0.88 tpd of NO_X in 2017,[103] which amounts to 5.4% of the 2017 total NO_X emissions in Imperial County. The combined estimated emissions reductions from both measures constitute 0.27 tpd of NO_X or 1.5% of the total 2017 NO_X emissions of 18.0 tpd.[104] The EPA notes that although not considered RACM, these anticipated new control measures could contribute to a small air quality improvement in the area in the future.

For the pesticides category VOC emissions are 2.2 tpd in 2017,[105] which amounts to 13% of the total VOC emissions of 16.9 tpd in Imperial County.[106] CARB concluded that implementation of additional pesticide emissions reduction measures would not be feasible given the short timeframe between reclassification in June 2016 and the attainment year of 2017. CARB also estimated that, even if there were a 100% reduction in pesticide VOC emissions, resulting in a maximum reduction in the ozone design value of 0.44 ppb, and even if such reductions had been achieved by 2017, those reductions would not have been sufficient to attain the standards but for international emissions.[107]

Consistent with the EPA's past guidance interpreting the RACM requirement, the EPA has considered which of the above-discussed control measures were technologically and economically feasible and could be adopted by the attainment year of 2017, and if implemented collectively, would achieve sufficient emissions reductions to provide for attainment by the attainment date but for international emissions. As described in the preceding paragraphs, we have considered potential emissions reductions from two NO_X source categories and one VOC category.

The District estimated that adoption of controls on commercial and

[92] We also note that while the EPA's Menu of Control Measures is periodically updated with examples of reasonable measures, it should not be relied on as the sole source of comparison for determining RACM for any given source category.

[93] CARB's consumer product measures are found in the California Code of Regulations, Title 17 (''Public Health''), Division 3 (''Air Resources''), Chapter 1 (''Air Resources Board''), Subchapter 8.5 (''Consumer Products''). The compilation of such measures that have been approved into the California SIP, including **Federal Register** citations, is available at: *https://www.epa.gov/sips-ca/epa-approved-regulations-california-sip.* EPA's most recent approval of amendments to California's consumer products regulations was in 2014. 79 FR 62346 (October 17, 2014).

[106] Imperial Ozone Plan, Table 8–1.

[107] CARB also examined whether the conditions at each Imperial County ozone monitor in 2012 represented a NO_X-limited regime (where VOC emission reductions have minimal effect on ozone concentrations) or a transitional regime (where both NO_X and VOC emission reductions can reduce ozone concentrations). Imperial Ozone Plan, App. F, 36. CARB found that the modeled 2012 baseline ozone values showed a prevalence of NO_X-limited conditions at the Niland and El Centro sites, and that the observed 2012 values were consistent with a more transitional ozone chemistry at the Calexico site. Regarding the presentation, in CARB's Technical Clarification Letter, of reductions in pesticide VOC emissions from 1990 to 2016 in Imperial County relative to other areas of California where pesticide regulations have been imposed, CARB does not state how the similar scale of past reductions supports a RACM determination. Accordingly, the EPA is not relying on Imperial County's historic pesticide VOC emission reductions as a basis for evaluating RACM.

institutional natural gas water heaters and residential, commercial, and institutional low-NO_X water heaters and low-NO_X burner space heaters would not be feasible given the short timeframe between reclassification in June 2016 and the attainment year of 2017. However, the District estimated that rules to be adopted soon after the attainment date for these source categories would result in a combined emissions reduction of 0.27 tpd of NO_X over more than a decade. CARB's Technical Clarification Letter also evaluated a conservative reduction of 2.21 tpd of VOC emissions on the basis of zeroing out the 2017 emissions for the pesticide source category. Thus, as a conservatively high estimate, these emissions reductions sum to 0.27 tpd of NO_X and 2.21 tpd of VOC, or 2.48 tpd combined.

Based on estimates available in the Imperial Ozone Plan, we have applied the modeled relationship between ozone concentrations in Imperial County and reductions in NO_X or VOC emissions in Mexico to the combined 2.48 tpd of emission reductions, given the proximity (9 miles and 1 mile, respectively) of the El Centro and Calexico monitoring sites to the Mexican border and the Mexicali region. This relationship estimates that a 1.0 tpd reduction in NO_X or VOC emissions would result in a 0.2 ppb reduction in ambient ozone concentration at the modeled high site (El Centro). Thus, based on conservative assumptions, the combined potential emissions reductions would be estimated to result in no more than a 0.50 ppb reduction in the modeled 8-hour ozone concentration and thus would not be sufficient to provide for attainment by the attainment date.

As noted at the outset of this section, the EPA's regulations governing implementation of the 2008 ozone NAAQS require that, for each nonattainment area required to submit an attainment demonstration, the state concurrently submit a SIP revision demonstrating that it has adopted all RACM necessary to demonstrate attainment as expeditiously as practicable and to meet any RFP requirements.[108] The 2008 Ozone SRR provided that ''[t]he determination of whether a SIP contains all RACM requires an area-specific analysis establishing that there are no additional economically and technically feasible control measures (alone or cumulatively) that will advance'' attainment.[109] Based on our evaluation, we propose to determine that the two NO_X source categories and pesticides measures analyzed above are not technologically and economically feasible control measures that could have been adopted by the attainment year of 2017, and therefore would not have provided for expeditious attainment of the 2008 ozone NAAQS in Imperial County by the attainment date. Thus, we propose to find that the Imperial Ozone Plan provides for implementation of all RACM for the 2008 ozone NAAQS as required by CAA section 172(c)(1) and 40 CFR 51.1112(c).

G. Demonstration of Attainment but for International Emissions

1. Statutory and Regulatory Requirements

Section 172(c)(1) of the CAA requires that plans for nonattainment areas provide for expeditious attainment of the NAAQS, and section 182(b)(1)(A) requires that such plans for areas classified as Moderate nonattainment for an ozone NAAQS demonstrate attainment by the applicable attainment date for Moderate areas. To implement these requirements for Moderate areas, the 2008 Ozone SRR requires that states submit an attainment demonstration based on photochemical modeling or another equivalent method that is at least as effective as the method required of ozone nonattainment areas classified Serious and above.[110] The attainment demonstration predicts future ambient concentrations for comparison to the NAAQS, making use of available information on measured concentrations, meteorology, and current and projected emissions inventories of ozone precursors, including the effect of control measures in the plan.

These requirements for the 2008 ozone NAAQS are codified at 40 CFR 51.1108 (''Modeling and attainment demonstration requirements'') and, in turn, rely on the requirements of 40 CFR 51.112 (''Demonstration of adequacy''). The latter section requires such a plan to demonstrate that its measures, rules, and regulations are adequate to provide for timely attainment and maintenance of the NAAQS and includes a list of specific requirements for the content of such demonstration.

As described in section I.A of this proposed rule, the EPA designated Imperial County as nonattainment for the 2008 ozone NAAQS and classified the area as Marginal, effective July 20, 2012. On May 4, 2016, the EPA published its determination that Imperial County had not attained the 2008 ozone NAAQS by the July 20, 2015 Marginal area attainment date and reclassified the area as Moderate with an attainment date of no later than July 20, 2018. An attainment demonstration must show attainment of the standards for the ozone season immediately preceding the area's outermost attainment date.[111] As applied to areas in California, where the ozone season is the full calendar year, the State must demonstrate attainment for any Moderate nonattainment area in 2017.

As discussed in section II.B of this proposed rule, for a nonattainment area affected by emissions emanating from outside the U.S., CAA section 179B(a) provides that, notwithstanding any other provision of law, the EPA Administrator shall approve an attainment plan SIP submission if it (1) meets all of the applicable nonattainment area requirements other than the requirement to demonstrate attainment and maintenance of the relevant NAAQS by the applicable attainment date, and (2) establishes to the Administrator's satisfaction that the SIP revision would be adequate to attain and maintain the relevant NAAQS by the applicable attainment date but for emissions emanating from outside of the U.S.[112]

The 2008 Ozone SRR does not establish specific requirements for how states should demonstrate attainment but for emissions emanating from outside the U.S., and instead recommends as ''the best approach'' that states work with EPA regional offices ''on a case-by-case basis to determine the most appropriate information and analytical methods for each area's unique situation.''[113]

The EPA's recommended procedures for modeling ozone as part of an attainment demonstration are relevant to such a section 179B demonstration,

[108] 40 CFR 51.1112(c).

[109] 2008 Ozone SRR, 12286.

[110] 40 CFR 51.1108(c); 2008 Ozone SRR, 12268.

[111] 40 CFR 51.1100(h) defining ''attainment year ozone season'' as ''the ozone season immediately preceding a nonattainment area's maximum attainment date.'' Due to California's predominately temperate climate, the term ''ozone season'' is understood to mean the full calendar year. Therefore, an attainment date of July 20, 2018 requires attainment to be demonstrated by calendar year 2017.

[112] In addition, as explained below in section III of this proposed rule, CAA section 179B(b) provides that for the purposes of the ozone NAAQS, any state that establishes to the Administrator's satisfaction that the state would have attained the NAAQS by the applicable attainment date, but for emissions emanating from outside the U.S., the area shall not be subject to section 181(b)(2), which requires the EPA to determine whether an area attained the standards by its attainment date and reclassify to a higher classification those areas that fail to attain.

[113] 2008 Ozone SRR, 12293.

in terms of their modeling and adequacy criteria and their purpose in predicting future ambient concentrations for comparison to the NAAQS, making use of available information on measured concentrations, meteorology, and current and projected emissions inventories of ozone precursors, including the effect of control measures in the plan. These recommended procedures are contained in the EPA's ''Modeling Guidance for Demonstrating Attainment of Air Quality Goals for Ozone, $PM_{2.5}$, and Regional Haze,'' (''Modeling Guidance'').[114] The Modeling Guidance includes recommendations for a modeling protocol, model input preparation, model performance evaluation, use of model output for the numerical NAAQS attainment test, and modeling documentation.

As described in the Modeling Guidance, the modeling process starts with the development of base year emissions and meteorology inputs, which are then used to assess model performance by comparing predicted concentrations from this base case to air quality monitoring data. Once the model performance is determined to be acceptable, future year emissions are simulated with the model. The relative (or percent) change in modeled concentration due to future emissions reductions provides a Relative Response Factor (RRF). Each monitoring site's RRF is applied to its monitored base year design value to project the future design value, which can then be compared to the NAAQS. The Modeling Guidance also recommends supplemental air quality analyses that may corroborate the attainment demonstration by considering evidence other than the main air quality modeling attainment test, such as trends and additional monitoring and modeling analyses.

Neither the 2008 Ozone SRR nor the Modeling Guidance specify that a particular year be used as the base year to demonstrate attainment with the 2008 ozone standards.[115] The Modeling Guidance explains that the most recent year of the National Emission Inventory may be appropriate for use as the base year for modeling, but that other years may be more appropriate when considering meteorology, transport patterns, exceptional events, or other factors that may vary from year to year.[116]

2. Summary of State's Submission

The Imperial Ozone Plan includes a demonstration prepared by CARB and Imperial County APCD that Imperial County would attain the 2008 ozone NAAQS by the Moderate area attainment date, but for emissions emanating from outside the United States. Using several lines of evidence, CARB evaluated whether, and the extent to which, ambient ozone levels in Imperial County would be affected by Mexican emissions, including photochemical air quality modeling, back trajectory analysis, and emissions inventory comparisons. The modeling relies on a 2012 base year and projects that, (i) when the Mexican emissions inventory is included in the model, the highest predicted 2017 ozone design value is 79 ppb, which exceeds the 2008 8-hour ozone NAAQS of 75 ppb; and (ii) removal of the anthropogenic emissions inventory from Mexico lowers 2017 predicted ozone design values to below 75 ppb. CARB also conducted additional analyses, described in section III.B of this proposed rule, that scaled CARB's photochemical air quality modeling, scaled separate photochemical air quality modeling performed by the EPA (using monitored data from 2015–2017), and updated CARB's back trajectory modeling.

CARB's modeling and modeled attainment demonstration are described in Chapter 8 of the Imperial Ozone Plan, and in more detail in Appendices F–I. Appendix F provides a description of model input preparation procedures and various model configuration options.[117] The Plan's modeling protocol is in Appendix G[118] and contains all the elements recommended in the Modeling Guidance, including selection of model, time period to model, modeling domain, and model boundary conditions and initialization procedures; a discussion of emissions inventory development and other model input preparation procedures; model performance evaluation procedures; selection of days and other details for calculating RRFs. Appendix H explains the modeling emission inventories.[119] Appendix I discusses the use of anthropogenic emissions inventories, photochemical modeling, and other factors to assess the impact of emissions emanating from Mexico and whether the area would have attained but for Mexican emissions.[120]

For photochemical modeling for the Imperial Ozone Plan's attainment demonstration, CARB and Imperial County APCD used the Community Multiscale Air Quality (CMAQ) model developed by the EPA.[121] The overall CMAQ air quality modeling domain covering the entire State of California has a horizontal grid size resolution of 12 kilometer (km) with 107 x 97 lateral grid cells for each vertical layer and extends from the Pacific Ocean in the west to eastern Nevada in the east and from the U.S.-Mexico border in the south to the California-Oregon border in the north. The smaller nested domain used to model the Imperial County nonattainment area covers southern California (including the South Coast, San Diego, and Salton Sea air basins), has a finer scale 4 km grid resolution, and includes 156 x 102 lateral grid cells.

To prepare meteorological input for CMAQ, CARB and the District used the Weather and Research Forecasting (WRF) model version 3.6.1 from the National Center for Atmospheric Research.[122] The WRF modeling used routinely available meteorological and air quality data collected during 2012.

[114] ''Modeling Guidance for Demonstrating Air Quality Goals for Ozone, $PM_{2.5}$, and Regional Haze,'' EPA–454/R–18–009, November 2018; available at: *https://www.epa.gov/scram/state-implementation-plan-sip-attainment-demonstration-guidance.* During development of the Imperial Ozone Plan, CARB relied on the draft version of this guidance update: ''Draft Modeling Guidance for Demonstrating Attainment of Air Quality Goals for Ozone, $PM_{2.5}$, and Regional Haze,'' December 3, 2014 Draft, EPA OAQPS. Additional EPA modeling guidance can be found in 40 CFR 51 Appendix W (''Guideline on Air Quality Models''), 82 FR 5182 (January 17, 2017); available at *https://www.epa.gov/scram/clean-air-act-permit-modeling-guidance.*

[121] CMAQ model version 5.0.2, released by the EPA in May 2014. Further information on CMAQ is available at: *https://www.cmascenter.org/cmaq/.*

[122] The overall WRF meteorological modeling domain covers California's neighboring states, and major portions of the next outer ring of states, with 36-kilometer (km) resolution (*i.e.,* grid cell size); it has nested domains with 12 km and 4 km resolution, with the latter, innermost covering the entire State of California; and it has 30 vertical layers extending up to 16 km.

The peak ozone levels in California for a given year at any monitor tend to occur between May and September. Therefore, the Imperial Ozone Plan's attainment demonstration modeled the May to September period for both 2012 and 2017 to ensure simulation for the top ozone days in Imperial County.

The ozone model (CMAQ) and meteorological model (WRF) results and performance statistics are described in Appendix F of the Imperial Ozone Plan. Tables of statistics recommended in the Modeling Guidance for 8-hour ozone are provided for each of the three Imperial ozone monitoring sites.[123] Time series plots of the hourly, 1-hour daily maximum, and 8-hour daily maximum ozone data for each of the three monitors located in the Imperial County can be found in the supplementary material.

After CARB and Imperial County APCD confirmed the model performance for the 2012 base case, they applied the model to develop RRFs for the attainment demonstration.[124] CARB and the District conducted four sets of simulations for this purpose: (1) A base year simulation for 2012 to verify that the model reasonably reproduced the observed air quality; (2) a reference year simulation for 2012, which was the same as the base year simulation but excluded event-influenced data such as wildfires;[125] (3) a future year simulation for 2017 with Mexican emissions that were the same as the reference year simulation, except that projected anthropogenic emissions for 2017 were used in lieu of 2012 emissions; and (4) a future year simulation for 2017 without Mexican emissions that was the same as the reference year simulation, except that projected anthropogenic emissions for 2017 were used in lieu of 2012 emissions and Mexican anthropogenic emissions in the modeling domain were removed.

The modeled attainment test carried out by CARB and the District is consistent with the Modeling Guidance. The RRFs were calculated as the ratio of future to base year concentrations. This calculation was done for each monitor using the top 10 ozone days over 60 ppb, *i.e.,* using the base year concentration in the highest of the three by three modeling grid cells centered on the monitor, and the future concentration from the same day and grid cell, with some exclusions, *e.g.,* if there were too few days above 60 ppb.

The resulting RRFs were then applied to 2012 weighted base year design values[126] for each monitor to arrive at 2017 future year design values.[127] The results based on CARB modeling are listed in Table 3 of this proposed rule. The highest predicted 2017 ozone design value (including the Mexican emissions inventory) is 79 ppb at the El Centro site, which exceeds the 2008 8-hour ozone NAAQS of 75 ppb. When the anthropogenic emissions inventory from Mexico (within the modeling domain) is removed, the resulting 2017 ozone design values at each of the three sites (Niland, El Centro, and Calexico) are below 75 ppb. CARB concludes that this supports a demonstration of attainment of the 2008 ozone NAAQS but for emissions from Mexico.[128]

TABLE 3—CARB'S ESTIMATED 2017 DESIGN VALUES BASED ON CARB MODELING

Monitoring site (AQS ID)	2012 base year design value (ppb)	Predicted 2017 design value with Mexican emission inventory (ppb)	Predicted 2017 design values without Mexican emission inventory (ppb)
Niland (06–025–4004)	70.3	67	64
El Centro (06–025–1003)	81.0	79	68
Calexico (06–025–0005)	76.3	75	62

The ''CARB Review of the Imperial County 2017 State Implementation Plan for the 2008 8-Hour Ozone Standard'' (''CARB's Staff Report'') for the Imperial Ozone Plan includes an analysis of back trajectories modeled using the National Oceanic and Atmospheric Administration's (NOAA) Hybrid Single Particle Lagrangian Integrated Trajectory (HYSPLIT) Model.[129] The analysis focused on exceedance days at the Calexico and El Centro sites for the years 2014, 2015, and 2016. The analysis shows that the majority of exceedance days at each site had back trajectories for at least 4 of the 6 hours leading up to the last hour that exceeded 75 ppb that originated from or went through Northern Mexico, indicating influence from sources in the Mexicali Region.[130]

Finally, the Plan contains additional analysis in Appendix I, which is summarized in section 8.3 of the Plan. The analysis presents trends from 1995–2000 in NO_X and VOC emissions, ozone concentrations, design values, exceedance days, and the top 30 daily maximum 8-hour ozone concentrations.

3. EPA Review of State's Submission

The EPA has evaluated the several lines of evidence presented by CARB and proposes that together they support the conclusion that Imperial County would attain the 2008 ozone NAAQS by the Moderate area attainment date but for emissions emanating from Mexico. We present our evaluation of CARB's photochemical modeling from the Imperial Ozone Plan in this section of this proposed rule. We present our evaluation of CARB's scaling of its own modeling and EPA modeling, back trajectory modeling, and emissions inventory comparison from CARB's additional analyses in section III of this proposed rule, as described further below.

Regarding CARB's photochemical modeling from the Imperial Ozone Plan, the EPA reviewed CARB's attainment demonstration and agrees that it supports the conclusion that the 8-hour

[123] Imperial Ozone Plan, App. F, Table 8.

[124] Id., section 8.2 (''Attainment Demonstration''), and App. F, Section 5.3 (''Relative Response Factors, Future Design Values, and the Impact from Mexico Anthropogenic Emissions'').

[125] Certain data modification and exclusion is allowed, as described in the EPA's ''Modeling Guidance for Demonstrating Air Quality Goals for Ozone, $PM_{2.5}$ and Regional Haze,'' November 29, 2018, section 4.1.1 (''Establishing the Base Design Value'').

[126] The Modeling Guidance recommends that RRFs be applied to the average of three 3-year design values centered on the base year. In this case the RRFs were applied to the design values for 2010–2012, 2011–2013, and 2012–2014. This amounts to a 5-year weighted average of individual year 4th high concentrations, centered on the base year of 2012, and so is referred to as a weighted design value.

[127] Imperial Ozone Plan, Table 8–2.

[128] Imperial Ozone Plan, 8–5.

[129] CARB Staff Report, September 22, 2017, App. A (''Supplemental Weight of Evidence Analysis: 2014–2016 Exceedance Day Hysplit Analysis'').

[130] According to the Imperial Ozone Plan, the Mexicali Region includes the City of Mexicali and surrounding metropolitan area, has five times the population of Imperial County, and emits about four times the NO_X and VOC of Imperial County. Imperial Ozone Plan, 1–2 and Table 8–1.

ozone design values at each ozone monitoring site in Imperial County would have predicted attainment for the 2008 ozone NAAQS of 75 ppb by 2017 but for emissions emanating from Mexico. We include a technical support document (TSD), ''Imperial County Ozone Plan and Determination Regarding Attainment,'' August 2019 (''EPA's 179B TSD for Imperial County Ozone''), which provides further information regarding our evaluation of the Imperial Ozone Plan's demonstration of attainment but for emissions from Mexico, in the docket of this proposed rule.

The Modeling Guidance recognizes both CMAQ and WRF as technically sound, state-of-the-science models. The size of the modeling domain and the horizontal and vertical grid resolution used in these models are sufficient to model ozone in Imperial County.

CARB calculated the model performance statistics using simulated data at Niland, El Centro, and Calexico, respectively, from the modeling in the Imperial Ozone Plan. The modeling performance statistical metrics for hourly, daily maximum 1-hour, and daily maximum 8-hour ozone from this work are consistent with, and in many cases superior to, values reported by other studies in the literature.[131] The mean bias for daily maximum 8-hour ozone ranged from approximately −7 ppb to +13 ppb, while the mean error ranged from around 4 ppb to 22 ppb, and the root mean squared error ranged from approximately 8 ppb to 23 ppb. The 8-hour maximum performance statistics during the 2012 ozone season for each monitor in Imperial County fall within these ranges. Each of these ranges is similar in magnitude to the statistics presented in the Imperial Ozone Plan.[132] The Modeling Guidance cautions against using comparisons to performance benchmarks as pass/fail tests and stresses their use in assessing general confidence and in guiding refinement of model inputs when statistics fall outside benchmark ranges. In summary, the Imperial Ozone Plan's modeling performance statistics appear satisfactory, and support CARB's determination that Imperial County would attain the 2008 ozone NAAQS by the 2017 attainment year but for emissions from Mexico.

In addition to the analysis in CARB's Staff Report for the Imperial Ozone Plan of back trajectories for the exceedance days that occurred during 2014–2016,[133] CARB also provided updated 8-hour trajectories for 2015–2017 in the ''Imperial County Clean Air Act Section 179B(b) Retrospective Analysis for the 75 ppb 8-hour Ozone Standard'' (''Imperial Ozone Retrospective Demonstration,''), submitted July 3, 2018.[134] This updated analysis includes the three years in the 2015–2017 attainment design value period, and also includes back trajectories for each hour of the high 8-hour ozone period (*i.e.,* 8 back trajectories per exceedance), rather than the 6 back trajectories leading to the last 1-hour that exceeded 75 ppb, as presented in the CARB Staff Report. While both the original and updated analyses serve to investigate the degree to which Mexican emissions may affect Imperial County, we focused our evaluation on CARB's updated analysis given that it addresses the attainment year design value period and a fuller complement of hours per exceedance.[135] Our evaluation of CARB's updated back trajectory analysis is included in sections III.B.3 and III.C of this proposed rule that are part of our overall presentation of the Imperial Ozone Retrospective Demonstration.

The Imperial Ozone Retrospective Demonstration also includes CARB's emissions inventory comparison, which is also relevant to our evaluation of the Imperial Ozone Plan's attainment demonstration. The emissions inventory comparison describes the small scale of Imperial County emissions relative to those from Mexico. These results support the conclusion that Imperial County would attain the 2008 ozone NAAQS by the 2017 attainment year but for emissions from Mexico. Our evaluation of CARB's emissions inventory comparison is included in sections III.B.4 and III.C below as part of our discussion of the Imperial Ozone Retrospective Demonstration.

In addition, Appendix I of the Plan contains other analyses, including trends in ambient air quality and emissions and additional emissions controls and reductions summarized in section 8.3 of the Plan. These analyses support and corroborate the modeling used in the attainment demonstration of attainment in 2017 but for emissions emanating from Mexico. For example, the trends analyses show long-term downward trends that continue through 2015, the latest year available prior to development of the Imperial Ozone Plan.[136]

Also, EPA modeling conducted in support of other actions is useful for estimating the amount of ozone resulting from ozone precursors emitted in Mexico. The EPA modeled interstate air pollution transport across the continental United States with ozone source apportionment technology for the Cross-State Air Pollution Rule (CSAPR) Update.[137] The ozone contribution at each receptor[138] was tracked from different sources, such as individual states, Mexico and Canada, as well as boundary conditions. Two sets of modeling results have been released, one for year 2017 and one for year 2023. Both cases were simulated using a 2011 base year modeling platform, which means the 2011 meteorology and boundary conditions were applied to both future years' (2017 and 2023) cases. The predicted design values with and without Mexican contribution at each Imperial County site are shown in Table 4.[139] When the contribution of Mexican anthropogenic

[133] CARB Staff Report, App. A (''Supplemental Weight of Evidence Analysis: 2014–2016 Exceedance Day Hysplit Analysis). In a general case, back trajectories may not be available as part of a section 179B(a) demonstration because they rely on having monitored data. However, due to the timing of the Imperial Ozone Plan development, monitored data for 2015 and 2016 were available and CARB included back trajectory modeling in its section 179B(a) demonstration.

[134] Imperial Ozone Retrospective Demonstration, App. A.

[135] CARB also noted that 8 hours of data better represented the hours of the day that contributed to 8-hour ozone exceedance. Imperial Ozone Retrospective Demonstration, 9.

Page, Director, OAQPS, EPA, ''Supplemental Information on the Interstate Transport State Implementation Plan Submissions for the 2008 Ozone National Ambient Air Quality Standards under Clean Air Act Section 110(a)(2)(D)(i)(I),'' October 27, 2017, including 2023 modeling results (''Supplemental 2008 Ozone Transport Memo''). Further information on the CSAPR Update rule and the Supplemental 2008 Ozone Transport Memo are available at the following websites, respectively: *https://www.epa.gov/airmarkets/final-cross-state-air-pollution-rule-update;* and *https://www.epa.gov/airmarkets/october-2017-memo-and-supplemental-information-interstate-transport-sips-2008-ozone-naaqs.*

[138] Receptors were regulatory monitors at each ambient air quality monitoring site for ozone.

[139] The CSAPR Update 2008 Ozone Design Values and Contributions Spreadsheet lists Mexican and Canadian contribution as one value for each receptor. However, for purposes of this proposed rule, the EPA assumes that the Canadian influence is negligible at Imperial County receptors given that Imperial County is about 1,700 km from Canada whereas the County borders Mexico. Thus, we express the Mexican and Canadian contribution as ''Contribution from Mexican Emissions'' in Table 4.

emissions (within the modeling domain) is removed, the resulting 2017 ozone design values at each of the three sites (Niland, El Centro, and Calexico) are below 75 ppb, which supports the Imperial Ozone Plan's demonstration of attainment for the 2008 ozone NAAQS but for emissions from Mexico.

TABLE 4—EPA'S 2015–2017 DESIGN VALUE ESTIMATES BASED ON EPA MODELING

Site	2011 CSAPR update base year design value (ppb)	Predicted 2015–2017 design value with Mexican emissions inventory (ppb)	Contribution from Mexican emissions (ppb)	Predicted 2015–2017 design values without Mexican emission inventory (ppb)
Niland	71.3	66.7	6.95	59.8
El Centro	81.0	79.3	12.19	67.1
Calexico	74.0	73	13.9	59.1

In conclusion, the EPA finds that the various lines of evidence described above support the demonstration of attainment by 2017 but for emissions emanating from Mexico. Given the extensive discussion of modeling procedures, tests, and performance analyses called for in the Modeling Guidance and the good performance of CARB's model, the EPA agrees that CARB's modeling supports the demonstration of attainment but for Mexican emissions. CARB's model shows that, in 2017, with Mexican emissions included, the ozone design value at one monitor would exceed the 75 ppb standard, but by removing the contribution of Mexican anthropogenic emissions, the ozone design values at each of the three sites (Niland, El Centro, and Calexico) would be below 75 ppb. Therefore, the EPA agrees that CARB's modeling of the projected year 2017 both with and without anthropogenic emission inventory from Mexico (within the modeling domain) supports the conclusion that Imperial County would attain the 2008 ozone NAAQS but for Mexican emissions.

Regarding CARB's analyses of back trajectories, emissions, and EPA air quality modeling, we incorporate our evaluation and discussion presented in section III of this proposed rule into our evaluation of the State's section 179B(a) demonstration. These lines of evidence, as well as CARB's modeling discussed above, together support the conclusion that Imperial County would attain the 2008 ozone NAAQS in 2017 but for emissions emanating from Mexico.

H. Rate of Progress and Reasonable Further Progress Demonstration

1. Statutory and Regulatory Requirements

Requirements for RFP for Moderate ozone nonattainment areas are specified in CAA section 182(b)(1).[140] CAA section 182(b)(1) requires that ozone nonattainment areas that are classified as Moderate or above demonstrate a 15% reduction in VOC within the first six years of the planning period. The EPA has typically referred to section 182(b)(1) as the Rate of Progress (ROP) requirement.[141] Except as specifically provided in CAA section 182(b)(1)(C), emissions reductions from all SIP-approved, federally promulgated, or otherwise SIP-creditable measures that occur after the baseline year are creditable for purposes of demonstrating that the RFP targets are met.[142]

As noted in section II.E of this proposed rule, future year emissions inventories are necessary to show the projected effectiveness of SIP control measures and must reflect the most recent population, employment, travel, and congestion estimates for the area. EPA regulations require that the base year emissions inventory be consistent with the baseline year for the RFP demonstration.[143] Furthermore, the 2008 Ozone SRR requires the RFP baseline year to be the most recent calendar year for which a complete triennial inventory was required to be submitted to the EPA.[144] For the purposes of developing RFP demonstrations for the Imperial County nonattainment area for the 2008 ozone standards, the applicable triennial inventory year is 2011. As discussed previously, the *South Coast II* decision vacated the 2008 Ozone SRR's provision allowing states to use an alternative baseline year for RFP.[145]

2. Summary of State's Submission

CARB developed the 2018 SIP Update and submitted it to the EPA on December 5, 2018, in part to address the impacts of the *South Coast II* decision on several plans for ozone nonattainment areas in California that, like the Imperial Ozone Plan, had relied

[140] CAA section 182(b)(1) is the specific requirement regarding RFP in Part D, Subpart 2, and is applicable to ozone nonattainment areas classified Moderate and higher. CAA sections 171(1) and 172(c)(2) in Part D, Subpart 1 address RFP for all nonattainment pollutants. *E.g.,* CAA section 171(1), which defines RFP as annual incremental reductions in emissions of the relevant air pollutant as are required under part D (''Plan Requirements for Nonattainment Areas'') or may reasonably be required by the EPA for the purpose of ensuring attainment of the applicable NAAQS by the applicable attainment date.

[141] The 2008 Ozone SRR provides that, for areas classified Moderate or higher for the 2008 8-hour ozone standard, the ROP requirements of CAA section 182(b)(1) will be met if the area has a fully approved 15% ROP plan for the 1979 1-hour or 1997 8-hour ozone standards (provided the boundaries of the ozone nonattainment areas are the same). For more information about how the RFP requirement of section 172(c)(2) applies in such areas, see 84 FR 28157 (June 17, 2019). Imperial County does not have a fully approved 15% ROP plan for either the 1979 1-hour or the 1997 8-hour ozone standards. For the 1979 1-hour ozone NAAQS, the EPA classified Imperial County as a CAA section 185A (or ''transitional'') area and, thus, it was not subject to the ROP requirement. For the 1997 8-hour ozone NAAQS, the EPA initially designated Imperial County as a Marginal nonattainment area and later reclassified the area to Moderate, triggering the ROP requirement, but subsequently issued a clean data determination, which suspended attainment-related planning requirements, including the ROP requirement. 73 FR 8209 (February 13, 2008); 74 FR 63309 (December 3, 2009). Therefore, the 15% ROP requirement of section 182(b)(1) remains applicable to Imperial County.

[142] Because the EPA has determined that the passage of time has caused the effect of certain exclusions to be de minimis, the RFP demonstration is no longer required to calculate and specifically exclude reductions from measures related to motor vehicle exhaust or evaporative emissions promulgated by January 1, 1990; regulations concerning Reid vapor pressure promulgated by November 15, 1990; measures to correct previous RACT requirements; and, measures required to correct previous inspection and maintenance (I/M) programs. 40 CFR 51.1110(a)(7).

[143] 40 CFR 51.1115(a).

[144] 2008 Ozone SRR, 12272; 40 CFR 51.1110(b); and the Air Emissions Reporting Requirements at 40 CFR part 51 subpart A.

[145] *South Coast Air Quality Management District v. EPA,* 882 F.3d 1138 (D.C. Cir. 2018).

on the provision in the 2008 Ozone SRR that states could use years other than 2011 as the RFP baseline year to demonstrate RFP. The portions of 2018 SIP Update related to Imperial County include an emissions inventory consistent with the new RFP baseline year of 2011, an updated inventory for the RFP milestone year of 2017, and a revised RFP demonstration using 2011 as the RFP baseline year and the updated 2017 RFP milestone inventory.[146]

To develop the 2011 and 2017 inventories, CARB used emissions as reported by larger point sources to the District and, for smaller point sources (stationary area sources), areawide sources and mobile sources, back-casted emissions from the base year inventory of 2012.[147] CARB explains that back-casted emissions rely on the same assumptions regarding growth and emissions reductions from adopted control measures (*i.e.,* ''growth parameters and control profiles'') that are used to project emissions inventories in future years.[148] CARB also explains that the 2011 RFP baseline emissions inventory and the 2012 base year emissions inventory are consistent with one another, as required by the 2008 Ozone SRR: Both inventories use actual emissions as reported to the District by larger point sources, and emissions for other sources (stationary area sources, areawide sources, and mobile sources) in the 2011 baseline inventory are back-casted from the 2012 base year inventory.[149]

Table 5 presents a summary of the 2011 RFP baseline inventory and the updated 2017 RFP milestone inventory.

TABLE 5—SUMMARY OF OZONE PRECURSOR SUMMER EMISSIONS FOR 2011 AND 2017

Source category	2011		2017	
	NO_X (tpd)	VOC (tpd)	NO_X (tpd)	VOC (tpd)
Stationary Sources	1.7	1.3	1.3	1.2
Area Sources	0.7	8.4	0.2	5.7
On-road Mobile Sources	11.3	4.5	6.5	3.1
Non-road Mobile Sources	9.2	5.2	7.1	3.5
Total for Imperial County	23.0	19.5	15.2	13.5

Source: 2018 SIP Update, Table II–1 (noting that numbers may not add up due to rounding) and App. A, A–3 to A–6.

The 2018 SIP Update's RFP demonstration calculates future year VOC targets from the 2011 baseline, consistent with CAA 182(b)(1), which requires a 15% reduction in VOC within six years of the RFP baseline year for a Moderate ozone nonattainment area as shown in Table 6.

TABLE 6—RATE OF PROGRESS DEMONSTRATION

	VOC (tpd, unless otherwise noted)	
	2011	2017
1. Baseline VOC	19.5	13.5
2. Transportation conformity safety margin [a]		0.8
3. Baseline VOC + safety margin (Line 1 + Line 2)		14.3
4. Required VOC emission reduction, % [b]		15%
5. Target VOC Level (Line 1 (2011) − Line 4 (2017) × Line 1 (2011))		16.6
6. Apparent Surplus in VOC emission reductions (Line 5 − Line 3) [c]		2.3
7. Apparent Surplus in VOC emission reductions, % (Line 6/Line 1 (2017)) [c]		11.7%
RFP Met?		YES

Note: This table is adapted from the 2018 SIP Update, Table II–2 and CARB's Technical Clarification Letter, Attachment A.
[a] CARB Technical Clarification Letter, Attachment A.
[b] While the 2018 SIP Update characterizes the % change as (VOC or NO_X), in fact, the required change is just for VOC, per our discussion of the ROP requirement herein.
[c] The CARB Technical Clarification Letter identifies 2.2 tpd and 11.4% as the apparent surplus in VOC emission reductions. The difference between the values in the CARB Technical Clarification Letter and this table is due to rounding. Numbers listed here in Table 6 are calculated as shown in the table.

CARB concludes that the RFP demonstration for Imperial County in the 2018 SIP Update meets the CAA's applicable requirements for RFP.

3. EPA Review of State's Submission

We have reviewed the portions of the 2018 SIP Update relating to Imperial County, including the 2011 baseline and 2017 emissions inventories and the updated RFP demonstration that uses a 2011 baseline year, and CARB's Technical Clarification Letter for consistency with CAA and regulatory requirements and EPA guidance. Based on our review of the emissions inventory documentation in the 2018 SIP Update, as well as the Imperial Ozone Plan, we find that CARB and the District used the most recent planning and activity assumptions, emissions models, and methodologies in developing the RFP baseline and milestone year inventories.

Regarding the 2008 Ozone SRR's requirement that the base year inventory be consistent with the baseline year for

[146] 2018 SIP Update, section II (''SIP Elements for Imperial County''), 11–13, and App. A (''Nonattainment Area Inventories''), A–3 to A–6.

[147] 2018 SIP Update, 5, 11.

[148] Id. at 5.

[149] Id.

the RFP demonstration, we note that 2012 is the year used for the base year inventory, while 2011 is the year used for the baseline inventory for the RFP demonstration. However, both the 2012 base year inventory and 2011 RFP baseline inventory use actual emissions reported by larger point sources, and, for other sources (*e.g.,* stationary area sources, areawide sources, and mobile sources), the 2011 RFP baseline inventory is back-casted from the 2012 base year inventory, and therefore based on the same data. Therefore, we find that selection of 2012 as the base year for the emissions inventory is consistent with the 2011 baseline year for the RFP demonstration for this nonattainment area as required by 40 CFR 51.1115(a).

In addition to the 2011 RFP baseline inventory, the 2018 SIP Update also includes an inventory for the RFP milestone year of 2017. Similar to the 2011 RFP baseline inventory, the 2017 RFP milestone inventory includes actual emissions reported for 2017 for certain stationary sources and forecasted emissions for other sources using updated activity data, where available. The 2017 RFP milestone inventory from the 2018 SIP Update (13.5 tpd of VOC) is smaller than the 2017 emissions inventory from the Imperial Ozone Plan (16.85 tpd of VOC). These emission inventory updates are directionally consistent with the observed 2015–2017 design value of 77 ppb as compared to the modeled 2015–2017 design value of 79 ppb and suggest that Imperial County made greater progress towards attaining the 2008 ozone NAAQS than was originally predicted, even though the area did not actually attain the standards.

We also reviewed the calculations in Table II–2 of the 2018 SIP Update and CARB's Technical Clarification Letter, Attachment A, as presented in Table 6 of this proposed rule, and find that CARB and the District used an appropriate calculation method to demonstrate RFP. Specifically, we reviewed the 2011 and 2017 emissions inventories included in the 2018 SIP Update, as discussed in the preceding paragraphs of this evaluation subsection; the inclusion of a safety margin in the 2017 VOC motor vehicle emission budgets and whether the area still achieves sufficient emissions reductions to demonstrate RFP with such safety margin;[150] and the comparison of the VOC emissions reductions against the 15% ROP requirement. As shown in Table 6, the RFP demonstration shows a 26.7% reduction in VOC emissions from 2011 to 2017 (*i.e.,* 15% required reduction plus 11.7% surplus reduction). Such reductions satisfy the ROP requirement for Imperial County for the 2008 ozone NAAQS.

For these reasons, we propose to determine that the State has demonstrated RFP in the applicable milestone year of 2017, consistent with CAA requirements and EPA guidance. We therefore propose to approve the RFP demonstrations under section 182(b)(1) of the CAA and 40 CFR 51.1110(a)(4)(i).

I. Motor Vehicle Emission Budgets

1. Statutory and Regulatory Requirements

Section 176(c) of the CAA requires federal actions in nonattainment and maintenance areas to conform to the SIP's goals of eliminating or reducing the severity and number of violations of the NAAQS and achieving timely attainment of the standards. Conformity to the SIP's goals means that such actions will not: (1) Cause or contribute to violations of a NAAQS, (2) worsen the severity of an existing violation, or (3) delay timely attainment of any NAAQS or any interim milestone.

Actions involving Federal Highway Administration (FHWA) or Federal Transit Administration (FTA) funding or approval are subject to the EPA's transportation conformity rule, codified at 40 CFR part 93, subpart A. Under this rule, metropolitan planning organizations in nonattainment and maintenance areas coordinate with state and local air quality and transportation agencies, the EPA, the FHWA, and the FTA to demonstrate that an area's regional transportation plans and transportation improvement programs conform to the applicable SIP. This demonstration is typically done by showing that estimated emissions from existing and planned highway and transit systems are less than or equal to the motor vehicle emission budgets (MVEBs or "budgets") contained in all control strategy SIPs. Budgets are generally established for specific years and specific pollutants or precursors. Ozone plans should identify budgets for on-road emissions of ozone precursors (NO_X and VOC) in the area for each RFP milestone year and the attainment year, if the plan demonstrates attainment.[151]

For budgets to be approvable, they must meet, at a minimum, the EPA's adequacy criteria in 40 CFR 93.118(e)(4). To meet these requirements, the budgets must be consistent with the attainment and RFP requirements and reflect all the motor vehicle control measures contained in the attainment and RFP demonstrations.[152]

The EPA's process for determining adequacy of a budget consists of three basic steps: (1) Providing public notification of a SIP submission; (2) providing the public the opportunity to comment on the budget during a public comment period; and, (3) making a finding of adequacy or inadequacy.[153]

2. Summary of State's Submission

The Imperial Ozone Plan includes NO_X and VOC budgets for Imperial County for 2017 and states that they are consistent with the emissions inventory used in the Plan's section 179B(a) demonstration.[154] The budgets were calculated by SCAG using updated vehicle miles traveled estimates and speed distribution data in the SCAG's 2016 RTP/SCS and updated emission rates and planning assumptions from EMFAC2014.[155] They reflect average summer weekday emissions consistent with the 2017 RFP milestone year for the 2008 ozone NAAQS. The 2017 on-road mobile source emissions are 6.53 tpd of NO_X and 3.13 tpd of VOC, and the 2017 budgets in the Imperial Ozone Plan are 7 tpd of NO_X and 4 tpd of VOC. In CARB's Technical Clarification Letter, CARB identifies the difference between the 2017 on-road mobile source emissions and the 2017 budgets as a

[150] A safety margin is "the amount by which the total projected emissions from all sources of a given pollutant are less than the total emissions that would satisfy the applicable requirement for reasonable further progress, attainment, or maintenance." 40 CFR 93.101. A safety margin allows future transportation projects to increase on-road mobile source emissions provided they satisfy applicable requirements (*e.g.,* support a demonstration of RFP in Imperial County in 2017) and the emissions from such future projects are calculated using the same method.

[151] 40 CFR 93.102(b)(2)(i).

[152] 40 CFR 93.118(e)(4)(iii), (iv) and (v). For more information on the transportation conformity requirements and applicable policies on MVEBs, please visit our transportation conformity website at: *http://www.epa.gov/otaq/stateresources/transconf/index.htm.*

[153] 40 CFR 93.118(f)(2).

[154] Imperial Ozone Plan, 10–3. We note that the 2018 SIP Update simply states that the 2017 budgets in the Imperial Ozone Plan are still applicable. 2018 SIP Update, 13.

[155] At the time the Imperial Ozone Plan was developed, EMFAC2014 was CARB's latest version of the EMFAC model for estimating emissions from on-road vehicles operating in California that had been approved into the California SIP. 80 FR 77337. It was the appropriate model to use for SIP development purposes, as noted in the EPA's implementation rule for the 2015 ozone NAAQS. 83 FR 62998, 63022, n. 54 (December 6, 2018).

safety margin of 0.4 tpd of NO_X and 0.8 tpd of VOC.[156]

CARB also asked that the EPA limit the duration of the approval of the 2017 budgets in the Imperial Ozone Plan and includes an explanation for why the budgets have become, or will become, outdated or deficient.[157] In short, CARB has requested that we limit the duration of the approval of the budgets in anticipation, in the near term, of the EPA's approval of EMFAC2017, which is an updated version of the model (EMFAC2014) used for the budgets in the Imperial Ozone Plan.[158] EMFAC2017 updates vehicle mix and emissions data of the currently approved version of the model, EMFAC2014.

CARB explains that, upon approval of EMFAC2017, the budgets from the Imperial Ozone Plan, for which we are proposing approval in today's action, will become outdated and will need to be revised using EMFAC2017 within the grace period established in our approval of EMFAC2017. This in turn would allow for the EPA to use the adequacy process to review and replace the budgets proposed for approval in this notice so that they can be used in future conformity determinations for the SCAG regional transportation plan and program, as applied to Imperial County. In addition, CARB states that, without the ability to replace the budgets using the budget adequacy process, the benefits of using the updated data may not be realized for a year or more after the updated SIP (with the EMFAC2017-derived budgets) is submitted, due to the length of the SIP approval process.

3. EPA Review of State's Submission

We have evaluated the budgets in the Imperial Ozone Plan against our adequacy criteria in 40 CFR 93.118(e)(4) as part of our review of the budgets' approvability and will complete the adequacy review concurrent with our final action on the ozone plan.[159] The EPA is not required under its transportation conformity rule to find budgets adequate prior to proposing approval of them.[160]

As discussed in section II.H of this proposed rule, the 2011 RFP baseline and 2017 RFP emissions inventories, including the figures for mobile sources, were back-casted and forecasted, respectively, from the 2012 base year emissions inventory. For the reasons discussed in section II.H of this proposed rule, we are proposing to approve the RFP demonstration in the 2018 SIP Update, including the safety margins identified in CARB's Technical Clarification Letter. While only the VOC emissions reductions are required for ROP, the Imperial Ozone Plan's demonstration of attainment but for emissions emanating from Mexico relies on reductions of both NO_X and VOC emissions. As described in our summary of the State's submission, the 2017 budgets, including safety margins, are shown in Table 7, below.

TABLE 7—2017 MOTOR VEHICLE EMISSION BUDGETS FOR IMPERIAL COUNTY FOR THE 2008 OZONE NAAQS

	2017	
	NO_X (tpd)	VOC (tpd)
On-road Mobile Sources	6.53	3.13
Safety Margin	0.4	0.8
Motor Vehicle Emission Budget (rounded to nearest whole number)	7	4

Source: 2018 SIP Update, Table II–2 and CARB's Technical Clarification Letter, Attachment A.

The EPA has determined that these budgets are consistent with emissions control measures in the SIP and RFP for the 2008 ozone NAAQS. They are clearly identified and precisely quantified, and meet all other applicable statutory and regulatory requirements, including the adequacy criteria in 40 CFR 93.118(e)(4) and (5). In addition, we conclude that CARB has identified an appropriate safety margin for the 2017 NO_X and VOC MVEBs and demonstrated how such budgets remain consistent with demonstrating RFP, as discussed in section II.F of this proposed rule. For these reasons, the EPA is proposing to approve the 2017 budgets in the Imperial Ozone Plan for transportation conformity purposes for the 2008 ozone NAAQS. Also, we anticipate completing the budget adequacy process upon our final rule.

Under our transportation conformity rule, as a general matter, once budgets are approved, they cannot be superseded by revised budgets submitted for the same CAA purpose and the same period of years addressed by the previously approved SIP until the EPA approves the revised budgets as a SIP revision. In other words, as a general matter, such approved budgets cannot be superseded by revised budgets found adequate, but rather only through approval of the revised budgets, unless the EPA specifies otherwise in its approval of a SIP by limiting the duration of the approval to last only until subsequently submitted budgets are found adequate.[161]

In this instance, CARB has requested that we limit the duration of our approval of the budgets in the Imperial Ozone Plan only until the effective date of the EPA's adequacy finding for any subsequently submitted budgets. Generally, we will consider a state's request to limit an approval of an MVEB only if the request includes the following elements:[162]

- An acknowledgement and explanation as to why the budgets under consideration have become outdated or deficient;
- A commitment to update the budgets as part of a comprehensive SIP update; and
- A request that the EPA limit the duration of its approval to the time when new budgets have been found to be adequate for transportation conformity purposes.

We find that CARB's explanation for why the budgets will become outdated

[156] CARB's Technical Clarification Letter, Attachment A. We note that the hundredths place of the 2017 emissions amounts are rounded up to the nearest whole number (*i.e.,* 6.53 tpd + 0.4 tpd = 6.93 tpd, rounded to 7 tpd NO_X; and 3.13 tpd + 0.8 tpd = 3.93 tpd, rounded up to 4 tpd VOC).

[157] Letter dated December 5, 2018 from Richard Corey, Executive Officer, CARB, to Mike Stoker, Regional Administrator, EPA Region IX, 2, and CARB's Technical Clarification Letter, 1–2.

[158] The EPA has approved EMFAC2017 for use in SIP development and transportation conformity decisions in California. 84 FR 41717.

[159] Memorandum from Karina O'Connor, Air Planning Office, EPA Region IX, ''Adequacy Documentation for Plan Motor Vehicle Emission Budgets in September 2017 Imperial Ozone Plan,'' May 24, 2019.

[160] Under the transportation conformity regulations, the EPA may review the adequacy of submitted motor vehicle emission budgets simultaneously with the EPA's approval or disapproval of the submitted implementation plan. 40 CFR 93.118(f)(2).

[161] 40 CFR 93.118(e)(1).

[162] 67 FR 69141 (November 15, 2002), limiting our prior approval of MVEB in certain California SIPs.

and why limiting the duration of the approval of the budgets is appropriate. This information provides us with a reasonable basis on which to limit the duration of the approval of the budgets.

We note that CARB has not committed to update the budgets as part of a comprehensive SIP update, but as a practical matter, CARB must submit a SIP revision that includes updated demonstrations as well as the updated budgets to meet the adequacy criteria in 40 CFR 93.118(e)(4); [163] and thus, we do not need a specific commitment for such a plan at this time. For the reasons provided above, and in light of CARB's explanation for why the budgets will become outdated and should be replaced upon an adequacy finding for updated budgets, we propose to limit the duration of our approval of the budgets in the Imperial Ozone Plan until new budgets have been found adequate.

J. Contingency Measures

1. Statutory and Regulatory Requirements

Under the CAA, ozone nonattainment areas classified under subpart 2 as Moderate must include in their SIPs contingency measures consistent with section 172(c)(9).[164] Contingency measures are additional controls or measures to be implemented in the event the area fails to meet RFP requirements or to attain the NAAQS by the attainment date. The SIP should contain trigger mechanisms for the contingency measures, specify a schedule for implementation of the measures, and indicate that the measures will be implemented without significant further action by the state or the EPA.[165]

Neither the CAA nor the EPA's implementing regulations establish a specific amount of emissions reductions that implementation of contingency measures must achieve, but the 2008 Ozone SRR reiterates the EPA's recommendation that contingency measures should provide for emissions reductions approximately equivalent to one year's worth of RFP, thus amounting to reductions of 3% of the baseline emissions inventory for the nonattainment area.[166]

It has been the EPA's longstanding interpretation of section 172(c)(9) that states may rely on existing federal measures (*e.g.,* federal mobile source measures based on the incremental turnover of the motor vehicle fleet each year) and state or local measures in the SIP already scheduled for implementation that provide emissions reductions in excess of those needed to meet any other nonattainment plan requirements, such as meeting RACM/RACT, RFP, or expeditious attainment requirements. The key is that the statute requires that contingency measures provide for additional emissions reductions that are not relied on for RFP or attainment and that are not included in the RFP or attainment demonstrations as meeting part or all of the contingency measure requirements. The purpose of contingency measures is to provide continued emissions reductions while the state revises the SIP to meet the missed milestone or attainment date.

The EPA has approved numerous nonattainment area plan SIP submissions under this interpretation, *i.e.,* SIPs that use as contingency measures one or more federal or state control measures that are already in place and provide reductions that are in excess of the reductions required to meet other requirements or relied upon in the modeled attainment demonstration,[167] and there is case law supporting the EPA's interpretation in this regard.[168] However, in *Bahr* v. *EPA,* the Ninth Circuit rejected the EPA's interpretation of CAA section 172(c)(9) as allowing for approval of already implemented control measures as contingency measures.[169] The Ninth Circuit concluded that contingency measures must be measures that would take effect at the time the area fails to make RFP or to attain by the applicable attainment date, not before.[170] Thus, within the geographic jurisdiction of the Ninth Circuit, states cannot rely on already implemented control measures to comply with the contingency measure requirements under CAA section 172(c)(9).

2. Summary of State's Submission

Imperial County APCD and CARB adopted the Imperial Ozone Plan after the *Bahr* v. *EPA* decision. Nevertheless, the Plan relies upon surplus emissions reductions from already implemented control measures in the 2017 RFP year to demonstrate compliance with the RFP contingency measure requirements of CAA sections 172(c)(9).[171] With respect to the attainment contingency measure requirements, the Imperial Ozone Plan stated that such measures are not required.[172]

In the 2018 SIP Update, CARB revised the RFP demonstration for the 2008 ozone standards for Imperial County. Based on that demonstration and the fact that 2017 had passed, CARB concludes that Imperial County successfully met applicable RFP requirements in 2017 and, therefore, the RFP contingency measure requirement in CAA section 172(c)(9) is irrelevant for Imperial County for the 2008 ozone NAAQS.[173]

3. EPA Review of State's Submission

The EPA has reviewed the Imperial Ozone Plan and the 2018 SIP Update and proposes that the contingency measure requirement of CAA section 172(c)(9) for RFP is moot, as described below. Regarding the contingency measure requirement of section 172(c)(9) for failure to attain by the applicable attainment date, we propose that such measures would no longer be required if the EPA were to finalize our proposed approval of the section 179B demonstrations for Imperial County for the 2008 ozone NAAQS, as also described below.

The contingency measure portion of the Imperial Ozone Plan, based on the Plan's RFP demonstration from a 2008 RFP baseline emission inventory through the 2017 RFP emission inventory, relies upon emissions reductions that are surplus to those needed to demonstrate RFP. As noted in our summary of the statutory and regulatory requirements for contingency measures, states in the Ninth Circuit cannot rely on already implemented control measures to comply with the contingency measure requirements under CAA sections 172(c)(9), and thus we do not propose to approve such an

[163] Under 40 CFR 93.118(e)(4), the EPA will not find a budget in a submitted SIP to be adequate unless, among other criteria, the budgets, when considered together with all other emissions sources, are consistent with applicable requirements for RFP and attainment. 40 CFR 93.118(e)(4)(iv).

[164] Contingency measures in ozone nonattainment areas classified under CAA Title I, subpart 2 as Serious or higher must also be consistent with CAA section 182(c)(9). However, this requirement does not apply to the Imperial County nonattainment area, which is classified as Moderate for the 2008 ozone NAAQS.

[173] Imperial Ozone Plan, 13.

approach for Imperial County for the 2008 ozone NAAQS.

However, as described in section II.H of this proposed rule, we reviewed the revised 2017 RFP emissions inventory and RFP demonstration for Imperial County in the 2018 SIP Update. Given that the revised RFP demonstration is based upon actual emissions reported for 2017 for stationary point sources, and forecasted emissions for other sources using updated activity data, consistent with the Imperial Ozone Plan's section 179B(a) demonstration, using the appropriate metric (summer emissions of ozone precursor pollutants) and that the area achieved greater than 3% annual emissions reductions in VOC, we agree with CARB that Imperial County has met applicable RFP requirements for 2017. Because the area met RFP for 2017, and because no RFP demonstration is required for a year beyond 2017 for Imperial County for the 2008 ozone NAAQS, the event that would otherwise trigger implementation of RFP contingency measures did not occur and will not occur in the future. Accordingly, we propose that the RFP contingency measure requirement is moot as applied to Imperial County for purposes of the 2008 ozone NAAQS.

With respect to attainment contingency measures, CARB and Imperial County APCD state that attainment contingency measures are not required due to the area's attainment but for the impacts of international emissions. We agree that such measures are not required for Imperial County for the 2008 ozone NAAQS as follows.

Attainment contingency measures under CAA section 172(c)(9) are triggered upon the EPA's determination that an area failed to attain a given NAAQS by its applicable attainment date. However, section 179B(b) provides that where a state demonstrates to the EPA that the area would have attained the ozone NAAQS by the applicable attainment date but for emissions emanating from outside the U.S., the area is not subject to the reclassification provisions in section 181(b)(2) and will not be reclassified to a higher nonattainment level.[174] It is therefore consistent with section 179B(b) to conclude that the EPA's approval of a demonstration of attainment but for international emissions under section 179B(b) means that the EPA is not required to make determinations of attainment by the attainment date for that area. Therefore, contingency measures would not be triggered for the area's failure to attain by the attainment date, provided that the EPA has approved the area's demonstration that it would have attained by the applicable attainment date but for emissions emanating from outside the U.S. Given these considerations, the EPA interprets the CAA not to require contingency measures for failure to attain in an area with an approved section 179B demonstration.

As described in sections II.G and III of this proposed rule, the EPA proposes to approve the Imperial Ozone Plan, the 2018 SIP Update (with respect to Imperial County), and the Imperial Ozone Retrospective Demonstration under section 179B(b) that Imperial County would have attained the 2008 ozone NAAQS by July 20, 2018, but for emissions from Mexico. Thus, if the EPA were to finalize this proposed action, there would be no requirement for the EPA to determine whether the area attained the NAAQS, and therefore no requirement for the state to submit attainment contingency measures. Accordingly, we propose that the attainment contingency measure requirement does not apply to Imperial County for the 2008 ozone NAAQS.

K. Other Requirements

The Imperial Ozone Plan notes that the Moderate area requirements of CAA section 182(b)(3) (''Gasoline vapor recovery'') no longer apply since the promulgation of the Onboard Refueling Vapor Recovery Rule, and that the requirements of section 182(b)(4) (''Motor vehicle inspection and maintenance'') do not apply to Imperial County because its population is below the 200,000 persons threshold.[175] The EPA agrees with CARB's assessment and proposes that these two requirements do not apply in Imperial County for the 2008 ozone NAAQS.

III. Imperial County Ozone Determination of Attainment but for International Emissions

A. Statutory and Regulatory Requirements

Section 181(b)(2)(A) of the CAA requires that within 6 months following the applicable attainment date, the EPA Administrator shall determine whether an ozone nonattainment area attained the ozone standards based on the area's design value as of that date.[176] In the event an area fails to attain the relevant ozone NAAQS by the applicable attainment date, CAA section 181(b)(2)(A) requires the Administrator to make the determination that the area failed to attain the ozone standards and requires the area to be reclassified by operation of law to the higher of (i) the next higher classification for the area, or (ii) the classification applicable to the area's design value as of the determination of failure to attain.

Section 179B(b), however, provides that if a state demonstrates to the EPA that an area would have attained the ozone NAAQS by the applicable attainment date, but for emissions emanating from outside the U.S., the area is not subject to the reclassification provisions in section 181(b)(2) and will not be reclassified to a higher nonattainment level. The EPA interprets section 179B(b) to involve an analysis of the relationship between past exceedances (*i.e.,* those used in determining attainment) and international emissions.

B. Summary of State's Submission

CARB submitted the Imperial Ozone Retrospective Demonstration to the EPA on July 3, 2018.[177] CARB states that despite air quality improvement in Imperial County due to wide-ranging controls on NO_X and VOC sources, the area would not attain the 2008 ozone NAAQS by the July 20, 2018 attainment deadline.[178] In the Imperial Ozone Retrospective Demonstration, CARB presents an analysis that estimated the ozone levels in Imperial County, without the influence of emissions in the Mexicali Region, for 2017. The Imperial Ozone Retrospective Demonstration is based on a number of factors, including two modeling exercises: (1) Photochemical modeling in the Imperial Ozone Plan, discussed in section II.G of this proposed rule; and (2) the EPA's interstate air pollution transport modeling for the 2008 ozone NAAQS, including the CSAPR Update modeling results for 2017 and supplemental modeling results for

[174] The EPA's long held view is that CAA section 179B(b)'s reference to section 181(a)(2) was made in error, and that Congress actually intended to refer to section 181(b)(2). 83 FR 62998, 63009, n.24; ''State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' 57 FR 13498, 13569 n.41 (April 16, 1992).

[175] Imperial Ozone Plan, 1–1, n. 4. See also, 59 FR 16262 (April 6, 1994) (known as the Onboard Refueling Vapor Recovery Rule) and 40 CFR 51.350(a)(8) (population threshold for applicability of motor vehicle inspection and maintenance requirements).

[176] We note that CAA section 181(a)(5) gives the Administrator the discretion to grant a 1-year extension of the attainment date specified in CAA section 181(a) upon application by any state if certain criteria are met. However, CARB is not seeking such an extension for Imperial County but rather invokes the provisions of section 179B(b).

[177] Letter dated July 3, 2018, from Richard Corey, Executive Officer, CARB, to Michael Stoker, Regional Administrator, EPA Region 9.

[178] Imperial Ozone Retrospective Demonstration, 1.

2023.[179] CARB also presented a back trajectory analysis for each day in 2015, 2016, and 2017 when the ozone level was above 75 ppb at any of the three monitoring sites. CARB presented additional supporting information, including a comparison of the emissions inventory for ozone precursors in Imperial County to the emissions inventory to the Mexicali Municipality, the ozone design value trends from 1996 to 2017, and a discussion of the conditions that influence ozone formation in Imperial County.

1. Imperial Ozone Plan Attainment Demonstration Modeling

To show the effect of emissions emanating from Northern Mexico on ozone levels in Imperial County in 2017, CARB relied in part on modeling conducted for the attainment demonstration in the Imperial Ozone Plan. Specifically, CARB performed an exercise using existing modeling results to estimate the effect of Mexican emissions within the Southern California Modeling domain (*i.e.,* a subset of the Mexican emissions sources nearest Imperial County) and applied those estimates to 2015–2017 design values.

As discussed in section II.G of this proposed rule, the attainment demonstration for the Imperial Ozone Plan includes two modeling scenarios (or cases) for the year 2017. Case one was a ''base'' run that used projected 2017 anthropogenic emissions for both the U.S. and Mexicali Municipality within the modeling domain, while all other model inputs were based on the year 2012. Case two was a ''sensitivity'' run, where the only difference from the base run was that Mexican anthropogenic emissions (within the modeling domain) were zeroed out. The sensitivity run analysis estimated the ozone contribution from Mexican emissions to Imperial County monitoring sites based on the change in the predicted design values due to the removal of the Mexican anthropogenic emissions (within the modeling domain). CARB then applied the estimated ozone reduction from the removal of the Mexican emissions as generated by the sensitivity run analysis to the measured 2015–2017 design value at each of the monitoring sites. The results are shown here in Table 8.

TABLE 8—CARB'S 2015–2017 DESIGN VALUES ESTIMATES BASED ON SCALING EXERCISE FROM CARB MODELING

Monitoring site	Measured 2015–2017 design value (ppb)	Estimated 2015–2017 design value without anthropogenic Mexican emissions (ppb)	Change in design value (percent)
Niland	63	60.7	3.7
El Centro	76	65.9	13.3
Calexico	77	64.3	16.5

2. CARB's Estimate of Ozone Transport Based on the EPA's Air Quality Modeling

As part of the CSAPR Update rule, the EPA conducted air quality modeling to project ozone concentrations at individual monitoring sites in 2017 and to estimate state-by-state contributions to those 2017 concentrations.[180] The EPA used the Comprehensive Air Quality Model with Extensions (CAMx),[181] including state-level ozone source apportionment modeling using the OSAT/APCA technique.[182] This exercise involved tracking the ozone contribution at each receptor from different sources (*e.g.,* individual states, Mexico and Canada), as well as boundary conditions. As noted in section II.G.3 of this proposed rule, the EPA has released two sets of modeling results, one for year 2017 and one for year 2023.[183] Both cases were simulated using a 2011 base year modeling platform, which means the 2011 meteorology and boundary conditions were applied to both future year cases (2017 and 2023).

CARB's Imperial Ozone Retrospective Demonstration lists the measured 8-hour ozone design value for 2015–2017 at each Imperial County site.[184] It also lists the estimated contribution to ozone in Imperial County resulting from Mexican anthropogenic emissions based on the CSAPR Update 2017.[185] The Mexican contributions to the design values at the Niland, El Centro, and Calexico sites are estimated to be 11%, 15%, and 17% respectively.[186] Then, CARB estimated the 2015–2017 design values without the influence Mexican emissions for each site by reducing the measured ozone design value by the percentage estimated by the interstate transport modeling developed as part of the CSAPR Update for that site. The results are shown in Table 9.

[179] 81 FR 74504; CSAPR Update Air Quality Modeling TSD; and CSAPR Update 2008 Ozone Design Values and Contributions Spreadsheet; and Supplemental 2008 Ozone Transport Memo.

[184] Imperial Ozone Retrospective Demonstration, Table 4.

[185] The Canadian influence is assumed to be negligible.

[186] Imperial Ozone Retrospective Demonstration, Table 3. Due to a major update of the Mexican emission inventory used in the 2023 modeling, the modeling results show higher ozone contributions from Mexico at all Imperial County sites in 2023. This larger contribution is likely due to an increase in Mexican emissions with the update to the inventory, as well as a reduction in local Imperial County emissions between 2017 and 2023.

TABLE 9—CARB'S 2017 DESIGN VALUE ESTIMATES BASED ON SCALING EPA'S CSAPR UPDATE MODELING

3. CARB's Back Trajectory Model Analysis

CARB provided a trajectory analysis for each day that exceeded the ozone standards at the Calexico and El Centro monitoring sites for the years 2015, 2016, and 2017. There were no days that exceeded the 2008 Ozone NAAQS at the Niland monitoring site in that period. CARB used the NOAA HYSPLIT model for its back trajectory modeling and identified the hours of each exceedance day with the maximum 8-hour average ozone value. CARB then used the HYSPLIT model to draw an 8-hour back trajectory for each of the 8 hours of data that contributed to the maximum 8-hour ozone value where each line drawn represents the back trajectory for one hour at the air quality monitor.[187]

CARB listed each site and each exceedance day for which at least 5 out of 8 of the eight-hour back trajectories originated from or went through the Mexicali region of Mexico (''CARB's 5 of 8 Back Trajectory Test'').[188] CARB determined that for Calexico, 11 of the 14 days were likely to have an influence from sources in the Mexicali region since they each had 5 or more hours with back trajectories passed through the Mexicali region. For El Centro, CARB determined that 8 of the 12 days were likely influenced by sources in the Mexicali region. CARB then excluded the 8-hour monitoring values for the days for which there was a likely influence from Mexico (*i.e.,* 11 days for Calexico and 8 days for El Centro) and calculated new design values for each site. CARB listed the maximum 8-hour average ozone values on all exceedance days at each site, resulting in 2015–2017 design values of 73 ppb in both cases, as shown here in Table 10.

TABLE 10—CARB'S PREDICTED 2015–2017 DESIGN VALUES EXCLUDING DAYS WITH LIKELY MEXICAN INFLUENCE BASED ON CARB'S 5 OF 8 BACK TRAJECTORY TEST

4. CARB's Additional Supporting Information

The comparison of the emissions inventory shows that the Mexicali Municipality and the NO_X emissions (summer planning inventory) are 3.8 times greater than those of Imperial County, and the ROG emissions are 3.1 times greater, as shown in Table 11.

[187] Id., App. A.

[188] Id., Table 6.

TABLE 11—CARB'S 2012 IMPERIAL COUNTY AND MEXICALI MUNICIPALITY EMISSIONS INVENTORY

Source	Imperial County				Mexicali Municipality

Source: Imperial Ozone Retrospective Demonstration, Table 1.[189]

CARB also included a figure displaying the 8-hour ozone design value trend, which shows a decrease from 0.112 ppm 1996 to 0.079 ppm in 2010, and fairly consistent values from 2010 to 2017, with a design value of 0.077 ppm for 2015–2017.[190]

C. EPA Review of State's Submission

The EPA has reviewed CARB's analyses and agrees that, despite CARB and Imperial County APCD's measures to reduce NO_X and VOC emissions, the 8-hour ozone design values at each ozone monitoring site in Imperial County would have been below the 2008 ozone NAAQS of 75 ppb for the 2015–2017 design value period, but for emissions emanating from Mexico. We include the EPA's 179B TSD for Imperial County Ozone, which provides further information regarding our evaluation of the Imperial Ozone Retrospective Demonstration, in the docket of this proposed rule.

First, we reviewed CARB's analysis of the contribution to ozone from Mexican emissions based on CARB's modeling for demonstrating attainment as part of the Imperial Ozone Plan. This scaling exercise first estimated the contribution of Mexican anthropogenic emissions to ozone formation on the measured 2015–2017 ozone design values by assuming that the contribution to the 2015–2017 observed design values was the same proportion as the contribution to the projected 2017 year in the attainment demonstration. The scaling exercise then subtracted this estimated contribution to ozone formation of Mexican anthropogenic emissions from the measured 2015–2017 ozone design values, which resulted in an Imperial County maximum design value of 65 ppb.[191]

The EPA believes the modeling that served as a basis for estimating the contribution was sound. As discussed in section II.G.3 of this proposed rule, CARB and the District implemented the modeling procedures, tests, and performance analyses consistent with the EPA's Modeling Guidance, discussed that modeling in detail, and found that the model performed well. Also, CARB modeled attainment of the 2008 ozone NAAQS but for emissions from Mexico by modeling the year 2017, both with and without the anthropogenic emissions inventory from Mexico (within the modeling domain); given the availability of data to perform such analyses, this is a reasonable method of assessing the degree to which Mexican emissions affect ozone concentrations in Imperial County, together with other lines of evidence.

Second, we reviewed CARB's estimation of the contribution to ozone from Mexican emissions based on modeling results from the EPA's interstate air pollution transport modeling developed to estimate ozone design values in the Moderate area attainment year of 2017 for the 2008 ozone NAAQS. We note that this is a similar yet distinct analysis from the analysis described in section II.G.3 of this proposed rule. This scaling exercise on the actual 2015–2017 design values use EPA's CSAPR Update modeling to remove the estimated effect of Mexican emissions and resulted in a maximum design value of 64 ppb for Imperial County. The EPA's CSAPR Update modeling considered multiple aspects of the transport of ozone, including consideration of measured and modeled ambient ozone concentrations; estimated NO_X and VOC emissions inventories for the continental U.S., Mexico, Canada, and boundary conditions; application of state of the science modeling tools for regional air pollution analysis and appropriate model validation; existing and planned emissions control regimes; and meteorology. While the EPA did not design that modeling specifically to assess the degree to which Mexican emissions may affect ozone concentrations in Imperial County, CARB's method of employing the CSAPR Update data among several other lines of evidence is reasonable and estimates that the effect of the Mexican emissions (11% to 17%) would be in a similar range as CARB's analysis of its own modeling (3.7% to 16.5%).

Thus, each of the two modeling exercises indicates that the measured 2015–2017 design values with the predicted impact from Mexican emissions removed would be below the 2008 ozone NAAQS for all three monitoring sites. These analyses make use of detailed and appropriate modeling techniques and data sets and support CARB's conclusion that Imperial County would have attained the 2008 Ozone NAAQS by the 2017 attainment year but for emissions emanating from Mexico.

Third, we reviewed CARB's back trajectory analyses, wherein CARB studied each day that exceeded the 2008 ozone NAAQS at the Calexico and El Centro monitoring sites for the years 2015, 2016, and 2017, and determined which days at the Calexico and El Centro sites were likely to have been influenced by sources in the Mexicali region. As a complement to Table 10 of this proposed rule, we summarized the count of exceedance days that were likely influenced by Mexican emissions based on CARB's 5 of 8 Back Trajectory Test and the count of such days likely to be influenced to a lesser degree by Mexican emissions (4 or less of 8 back trajectories). These counts are shown in Table 12.

[189] See also Imperial Ozone Plan, Table 8–1. Mexicali emissions based on the EPA's 2011 Version 6.3 Platform inventory. The 2011 Version 6.3 Platform is based on the 2011 NEI version 2 and includes projected future years of 2017, 2023, and 2028. The 2011 Version 6.3 Platform supported the CSAPR Update, a rule related to interstate transport for the 2008 ozone NAAQS.

[190] Imperial Ozone Retrospective Demonstration, Figure 3, 5.

[191] Imperial Ozone Plan, Table 8–2.

TABLE 12—EPA'S COUNT OF DAYS INFLUENCED BY MEXICAN EMISSIONS BASED ON CARB'S 5 OF 8 BACK TRAJECTORY TEST

Year	Calexico		El Centro	
	Count of days with likely influence from Mexico (5 of 8 Test)	Count of days with less likely influence from Mexico	Count of days with likely influence from Mexico (5 of 8 Test)	Count of days with less likely influence from Mexico
2015	4	0	6	0
2016	2	1	1	1
2017	8	2	5	3

The EPA finds that CARB's methodology for assessing the potential effect of Mexican emissions on recorded ozone exceedances in Imperial County is a reasonable means, among several lines of evidence, for identifying exceedance days and the highest 8-hour period within each such day and examining the origin and pathway of air traveling each hour to the Imperial County monitoring sites within that 8-hour period.

In addition to reviewing the approach and results of CARB's 5 of 8 Back Trajectory Test, the EPA considered a more stringent test that would only remove an exceedance day if 75% (6 of 8) of the back trajectories originated in or passed through Mexico (''EPA's 6 of 8 Back Trajectory Test'') as this would reflect a more conservative approach to examining how many days may have been affected by emissions from sources in the Mexicali region.

The EPA reanalyzed the data and determined that 8 of the 14 days for Calexico and 5 of the 12 days for El Centro were likely to have an influence from sources in the Mexicali region.[192] As CARB had done, the EPA excluded the days for which there was a likely influence from Mexico (*i.e.,* 8 days at Calexico and 5 days for El Centro) and calculated new design values for each site. This more stringent analysis resulted in an Imperial County design value of 75 ppb, as shown here in Table 13, supporting the conclusion that Imperial County would have attained the 2008 ozone NAAQS by the 2017 attainment year but for emissions emanating from Mexico. This estimated design value is higher than the estimated design value from the modeling exercises discussed herein because many of the days with fewer than 6 trajectories emanating from Mexico are likely to have some contribution from Mexico. This approach is also conservative because there is likely Mexico influence on all days and this method only removes days where the Mexico influence is expected to be largest.

TABLE 13—EPA'S PREDICTED 2015–2017 DESIGN VALUES EXCLUDING DAYS WITH LIKELY MEXICAN INFLUENCE BASED ON EPA'S 6 OF 8 BACK TRAJECTORY TEST

Year	Calexico		El Centro	
	4th high (ppb)	4th high excluding Mexico influenced days (ppb)	4th high (ppb)	4th high excluding Mexico influenced days (ppb)
2015	77	74	77	73
2016	74	74	74	73
2017	82	75	79	79
2015–2017 Design Value	77	74	76	75

For comparison, we also include a count of exceedance days that were likely influenced by Mexican emissions based on EPA's 6 of 8 Back Trajectory Test and the count of such days likely to be influenced to a lesser degree by Mexican emissions (5 or less of 8 back trajectories). These counts are shown in Table 14.

[192] For the days identified for El Centro with trajectories as having a likely influence from Mexico, the EPA has conducted additional trajectory analyses to further assess the influence of the Mexicali emissions. This information is provided in the EPA's 179B TSD for Imperial County Ozone.

TABLE 14—EPA'S COUNT OF DAYS INFLUENCED BY MEXICAN EMISSIONS BASED ON EPA'S 6 OF 8 BACK TRAJECTORY TEST

Year	Calexico		El Centro	
	Count of days with likely influence from Mexico (6 of 8 Test)	Count of days with less likely influence from Mexico	Count of days with likely influence from Mexico (6 of 8 Test)	Count of days with less likely influence from Mexico
2015	[193] 4	0	4	2
2016	0	3	1	1
2017	7	3	0	8

The additional information provided by the State also supports the conclusion that Imperial County would have attained the 2008 ozone NAAQS by the attainment date of July 20, 2018, but for emissions emanating from Mexico. In brief, the emission inventory data presented indicate that the Mexicali Municipality emits three times the amount of ozone precursors emitted in Imperial County, such emissions could have had a substantial effect on Imperial County ozone concentrations, and Imperial County ozone concentrations would have been lower in the absence of Mexican emissions. In addition, the proximity of the Mexican border to the monitoring sites (1 mile from Calexico and 9 miles from El Centro) and the shared topography and meteorology of Imperial Valley also support the potential of Mexican emissions having a substantial and immediate effect on ozone concentrations in Imperial County.

In conclusion, the EPA evaluated the information provided by CARB and applied a more conservative test using CARB's back trajectory method. CARB's modeling estimates of Mexican contribution based on modeling data from the Imperial Ozone Plan attainment demonstration and the EPA's CSAPR Update modeling, and the EPA's application of a more conservative test using CARB's back trajectory method to analyze exceedance days in the 2015–2017 design value period together support the conclusion that Imperial County would have attained the standards but for the impacts of emissions from Mexico. Furthermore, the emissions inventory, showing that the ozone precursor emissions for Mexicali Municipality are over three times those emitted in Imperial County, and the proximity and shared airshed of the Calexico and El Centro monitor to these emissions, also support the conclusion that the Mexican emissions affected the ozone concentrations at these sites.

Thus, based on our evaluation of these several lines of evidence and analyses that together support the same conclusion, the EPA proposes to determine, under CAA sections 179B(b) and 181(b)(2)(A), that Imperial County would have attained the 2008 ozone NAAQS by the Moderate area attainment date of July 20, 2018, but for emissions emanating from Mexico.

IV. Proposed Action

For the reasons discussed in this notice, under CAA section 110(k)(3), the EPA is proposing to approve, as a revision to the California SIP, the Imperial Ozone Plan and the Imperial County portion of the 2018 SIP Update related to:

- Emissions statement certification as meeting the requirements of CAA section 182(a)(3)(B);
- Base year emissions inventory as meeting the requirements of CAA sections 172(c)(3) and 182(a)(1) and 40 CFR 51.1115 with respect to attainment planning;
- RACM demonstration as meeting the requirements of CAA section 172(c)(1) and 40 CFR 51.1112(c);
- RFP demonstration as meeting the requirements of CAA section 182(b)(1) and 40 CFR 51.1110(a)(4)(i); and
- Motor vehicle emission budgets for the 2017 RFP milestone year because they are consistent with the RFP demonstration and the demonstration of attainment but for international emissions that are proposed for approval herein and meet the other criteria in 40 CFR 93.118(e).

We also propose that finalization of this action would render the RFP contingency measure requirement of CAA section 172(c)(9) moot and that attainment contingency measures would no longer be required, as discussed in section II.J of this proposed rule.

Given our proposal that the Imperial Ozone Plan meets all requirements for the Imperial County Moderate ozone nonattainment area, other than the requirement to demonstrate attainment, and our evaluation of the State's lines of evidence that together support the conclusion that Imperial County would attain the 2008 ozone NAAQS by the July 20, 2018 attainment date but for emissions emanating from Mexico, the EPA proposes to approve the Imperial Ozone Plan's section 179B attainment demonstration as meeting the requirements of CAA sections 172(c)(1), 182(b)(1)(A), and 179B(a) and 40 CFR 51.1108.

Concurrently, we are proposing to determine, consistent with our evaluation of the Imperial Ozone Plan, the 2018 Update, and Imperial Ozone Retrospective Demonstration, that the Imperial County nonattainment area would have attained the 2008 ozone NAAQS by the Moderate area attainment date of July 20, 2018, but for emissions emanating from outside of the United States, under CAA sections 179B(b). Therefore, if finalized, the EPA's obligation under section 181(b)(2)(A) to determine whether the area attained by its attainment date would no longer apply and the area would not be reclassified.

The EPA is soliciting public comments on the issues discussed in this document. We will accept comments from the public on this proposal for the next 30 days and will consider comments before taking final action.

V. Statutory and Executive Order Reviews

With respect to our proposal on the Imperial Ozone Plan and the 2018 SIP Update, under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve state plans

[193] September 23, 2015 has 5 of the 6 trajectories (83%) for which data was available originating in Mexico. Thus, we included this exceedance day in the count of days with likely influence from Mexico.

as meeting federal requirements and does not impose additional requirements beyond those imposed by state law.

With respect to our proposed determination that Imperial County attained the 2008 ozone NAAQS by July 20, 2018 but for emissions from Mexico, the purpose of this rule is to determine whether Imperial County attained the 2008 ozone standards by its Moderate area attainment date, which is required under the CAA for purposes of implementing the 2008 ozone standards.

For these reasons, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, with respect to our proposal on the Imperial Ozone Plan and the 2018 SIP Update, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the proposed rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

However, with respect to our proposed determination that Imperial County attained the 2008 ozone NAAQS by July 20, 2018, but for emissions from Mexico, this action has tribal implications. Nonetheless, it will neither impose substantial direct compliance costs on federally recognized tribal governments, nor preempt tribal law. Two tribes have areas of Indian country within or directly adjacent to the Imperial County: Quechan Tribe of the Fort Yuma Indian Reservation and the Torres Martinez Desert Cahuilla Indians. The EPA intends to communicate with potentially affected tribes located within or directly adjacent to the boundaries of Imperial County on this proposed action.

Pesticides; Agricultural Worker Protection Standard; Revision of the Application Exclusion Zone Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing changes to the Agricultural Worker Protection Standard (WPS) to simplify the application exclusion zone (AEZ) requirements. The proposed changes described in this document are the only changes EPA is currently planning to make to the WPS provisions that are now in effect.

DATES: Comments must be received on or before January 30, 2020.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2017–0543, by one of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *https://www.epa.gov/dockets/where-send-comments-epa-dockets.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Jackie Mosby, Field and External Affairs Division (7506P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (703) 347–0224; email address: *OPP_NPRM_AgWorkerProtection@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

You may be potentially affected by this action if you work in or employ persons working in crop production agriculture where pesticides are applied. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Agricultural Establishments (NAICS code 111000).
- Nursery and Tree Production (NAICS code 111421).
- Timber Tract Operations (NAICS code 113110).
- Forest Nurseries and Gathering of Forest Products (NAICS code 113210).

• Farm Workers (NAICS codes 11511, 115112, and 115114).
• Pesticide Handling on Farms (NAICS code 115112).
• Farm Labor Contractors and Crew Leaders (NAICS code 115115).
• Pesticide Handling in Forestry (NAICS code 115310).
• Pesticide Manufacturers (NAICS code 325320).
• Farm Worker Support Organizations (NAICS codes 813311, 813312, and 813319).
• Farm Worker Labor Organizations (NAICS code 813930).
• Crop Advisors (NAICS codes 115112, 541690, 541712).

If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What action is the Agency taking?

EPA is proposing to revise one requirement of the WPS (40 CFR part 170), adopted in 2015 (80 FR 67496, November 2, 2015) (FRL–9931–81). Information supporting the 2015 final rule, including the proposed rule, public comments and EPA's responses thereto, is available at *https://www.regulations.gov* under docket number EPA–HQ–OPP–2011–0184. The Agency is proposing changes to the regulation and soliciting additional information and public comment to inform its proposed revision of the rule's Application Exclusion Zone (AEZ) requirements. EPA is proposing to clarify and simplify the AEZ requirements based in part on input received as part of EPA's outreach efforts with state lead agencies (SLAs) and various stakeholders after the 2015 rule and through the Regulatory Reform Agenda process.

C. Why is the Agency taking this action?

As further described in Unit II.B., members of the agricultural community, including the US Department of Agriculture (USDA), State pesticide regulatory agencies and organizations, and several agricultural interest groups have expressed concerns with the AEZ requirements in the 2015 WPS rule. EPA began hearing general concerns about rule implementation and more specific concerns about the rule's AEZ requirements from some State pesticide regulatory agencies responsible for WPS and pesticide enforcement (*i.e.,* SLAs) during the Agency's extensive outreach and training efforts for those agencies after promulgation of the 2015 WPS rule. Comments about the AEZ included concerns about the complexity and enforceability. Similar concerns were expressed through the Regulatory Reform Agenda outreach process and are found in docket number EPA–HQ–OA–2017–0190 at *https://www.regulations.gov.*

EPA has also solicited comments on the AEZ requirements from the Pesticide Program Dialogue Committee (PPDC). The PPDC is a federal advisory committee that is broadly representative of EPA's stakeholders with members from environmental and public interest groups, pesticide manufacturers, trade associations, commodity groups, public health and academic institutions, federal and state agencies, and the general public. The PPDC meets biannually with the EPA's Office of Pesticide Programs to discuss regulatory, policy, and program implementation issues. PPDC members discussed the WPS requirements for the application exclusion zone in public meetings with EPA on November 2, 2017 and expressed both support and some concerns with the AEZ requirements of the WPS rule at the May 4, 2017 meeting. The transcripts for PPDC meetings can be found at *https://www.epa.gov/pesticide-advisory-committees-and-regulatory-partners/pesticide-program-dialogue-committee-ppdc.*

Clarifying and simplifying the WPS AEZ requirements was one of the most repeated requests from SLAs. These requests, together with comments received through the Regulatory Reform Agenda process and input from the PPDC, prompted EPA's decision to develop this proposed rule.

D. What is the Agency's authority for taking this action?

This action is issued under the authority of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136–136y, particularly sections 136a(d), 136i, and 136w. Additionally, in accordance with the Pesticide Registration Improvement Extension Act of 2018 (Pub. L. 116–8), EPA is only proposing revisions to the AEZ requirements in the WPS.

E. What are the estimated incremental impacts of this action?

EPA has evaluated the potential incremental economic impacts and determined that these proposed changes will reduce existing burden. Cost savings from the changes are largely in terms of reducing management complexity both on and off establishment. However, EPA has not quantified the anticipated cost savings. EPA remains committed to ensuring the protection of workers and persons in areas where pesticide applications are taking place. The AEZ and no contact provisions aim to ensure such protections. EPA also has a strong interest in promulgating regulations that are enforceable, clear, and effective. See Units II.C. through II.F.

F. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit confidential business information (CBI) to EPA through *http://www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

II. Proposed Changes to the WPS

A. Background and Existing Requirements

Under the WPS established in 1992 (57 FR 38101; August 21, 1992) (FRL–3374–6), the pesticide handler's employer and the pesticide handler are required to ensure that no pesticide is applied so as to contact, either directly or through drift, any agricultural worker or other person, other than an appropriately trained and equipped pesticide handler involved in the application. These requirements prohibit application in a way that contacts agricultural workers or other persons both on and off the agricultural establishment where the pesticide is being applied.

The 2015 WPS rule added requirements to reinforce existing requirements and enhance compliance with safe application practices to protect agricultural workers and bystanders from pesticide exposure through drift. The 2015 WPS rule established application exclusion zone requirements (AEZ) for outdoor production, defined as the area extending horizontally around application equipment from which persons generally must be excluded during pesticide applications. The AEZ moves with the application equipment. For aerial, airblast, and ground applications with fine or very fine droplet size, as well as fumigations, mists, and foggers, the area encompasses 100 feet from the application equipment in all directions. For ground applications with medium or larger droplet size and a spray height of more than 12 inches from the ground, the area encompasses 25 feet from the application equipment in all directions. For all other applications, there is no AEZ.

The 1992 WPS prohibited agricultural employers from allowing or directing any agricultural worker or other person other than a trained and equipped pesticide handler involved in the application to enter or remain in the treated area until after the pesticide application is complete. The 2015 WPS further prohibits the employer from allowing anyone in the part of the AEZ (which can extend beyond the treated area) that is within the boundaries of the establishment. For example, employers and applicators have to ensure that workers in adjacent fields or buildings within their establishment move out of an AEZ as the pesticide application equipment passes; workers could return once the equipment has moved on and the Restricted Entry Interval is no longer in effect, if applicable. The 2015 WPS also requires a handler to ''immediately suspend a pesticide application'' if anyone other than a trained and equipped handler is within the AEZ, including any part of the AEZ beyond the boundaries of the agricultural establishment.

These restrictions were intended to reduce incidents, or the probability of incidents, in which people in areas adjacent to pesticide applications are affected by drift. The purpose of the AEZ was to reinforce the prohibition against applying pesticides in a manner that results in contact to others by establishing a well-defined area from which persons generally must be excluded during applications.

B. Stakeholder Engagement

EPA finalized revisions to the WPS in 2015 (80 FR 67496, November 2, 2015). During the Agency's extensive outreach and training efforts for SLAs after promulgation of the 2015 rule, some SLAs raised concerns about the AEZ requirements. Comments about the AEZ included concerns about its complexity and enforceability.

In accordance with Executive Order 13777, *Enforcing the Regulatory Reform Agenda* (82 FR 12285, March 1, 2017), EPA solicited comments in the spring of 2017 on regulations that may be appropriate for repeal, replacement or modification as part of the Agency's Regulatory Reform Agenda efforts. EPA encouraged entities significantly affected by Federal regulations, including State, local, and tribal governments, small businesses, consumers, non-governmental organizations, and trade associations, to provide input and other assistance, as permitted by law. EPA received comments from stakeholders on the WPS rule as part of the public's response to Executive Order 13777.

These revisions are also in the spirit of Executive Order 13790, *Promoting Agriculture and Rural Prosperity in America* (82 FR 20237, April 25, 2017), which was designed to help ensure that regulatory burdens do not unnecessarily encumber agricultural production or harm rural communities. The Executive Order required USDA to assemble an interagency taskforce, including EPA, to identify legislative, regulatory, and policy changes to promote in rural America agriculture, economic development, job growth, infrastructure improvements, technological innovation, energy security, and quality of life.

Information pertaining specifically to EPA's evaluation of existing regulations under Executive Order 13777, including the comments received, can be found at *https://www.regulations.gov* under docket number EPA–HQ–OA–2017–0190. Approximately 25 commenters provided input specific to the 2015 WPS AEZ requirements. Commenters included USDA, State pesticide regulatory agencies, State organizations, an organization representing Tribal pesticide regulators, a local government advisory committee, an agricultural coalition, farm bureau federations, growers, grower organizations, farmworker advocacy organizations, a public health association, a retailer organization and private individuals (Ref. 1).

Commenters discussed the need for changes to several WPS requirements, including the AEZ. Comments on the AEZ from organizations representing state regulatory agencies and agricultural interests raised concerns about the ability of states to enforce the requirement, expressed a need for clarity about how the requirement was intended to work, described problems with worker housing near treated areas, and the perception of increased burden on the regulated community. EPA is proposing revisions to these requirements in light of the comments received from agricultural interests and State pesticide regulatory officials.

In addition to comments received through the Regulatory Reform Agenda process, EPA solicited feedback on the WPS and AEZ requirements from the Pesticide Program Dialogue Committee (PPDC). In May 2017, the PPDC discussed the implementation of the WPS (*https://www.epa.gov/pesticide-advisory-committees-and-regulatory-partners/pesticide-program-dialogue-committee-meeting-4*). On November 2, 2017, PPDC members discussed the WPS requirements for the application exclusion zone in a public meeting with EPA. (*https://www.epa.gov/sites/production/files/2018-01/documents/november-2-2017-ppdc-meeting-transcript.pdf*).

Requests from SLAs to clarify and simplify WPS AEZ requirements, together with comments received through the Regulatory Reform Agenda process and input from the PPDC, prompted EPA's decision to develop this proposed rule.

C. Summary of Proposed Amendments

EPA is proposing to amend the AEZ requirements in the 2015 WPS rule to limit the AEZ to the boundaries of the agricultural establishment. EPA is also proposing to revise the provisions related to handlers suspending and resuming applications, and the presence of persons on the agricultural establishment during application who are not under the control of the owner or agricultural employer. EPA is proposing to simplify the criteria for determining the AEZ distances for outdoor applications based on application method. EPA is also proposing to amend the AEZ requirements for owners of agricultural establishments and their immediate family members by expanding the exemption at 40 CFR 170.601(a) to include the AEZ requirements at 40 CFR 170.405(a). EPA is not proposing any changes to the existing ''do not contact'' provision in the WPS that prohibits a handler/applicator and the handler employer from applying a pesticide in such a way that it contacts workers or other persons directly or through drift (other than appropriately trained and PPE equipped handlers involved in the application).

D. Revisions To Address Issues Raised About the AEZ Extending Beyond the Boundary of the Establishment

1. *Proposed Changes.* EPA is proposing several changes to the AEZ, which are intended to work together to address concerns about the AEZ and improve the understanding and implementation of the AEZ requirements. The different AEZ

proposals are discussed in Unit II.E. through Unit II.G.

EPA is proposing to revise the AEZ provision at 170.505(b) that requires handlers to ''suspend the application'' if a worker or other person is in the AEZ, which as currently described can extend beyond the boundaries of the agricultural establishment. The proposal would limit the AEZ to within the boundaries of the agricultural establishment. This change would bring the pesticide handlers' duty to suspend applications in 170.505(b) in line with the agricultural employers' duty to exclude persons from the AEZ in 170.405(a)(2) so the two requirements are more consistent.

The AEZ is an area surrounding pesticide application equipment that exists only during outdoor pesticide applications. The 2015 WPS added the AEZ requirements to supplement the ''do not contact'' requirements of the label and the old WPS to reduce the number of exposure incidents during agricultural applications. The existing requirement at 170.505(b) requires pesticide handlers (applicators) making a pesticide application to temporarily suspend the application if any worker or other person (besides trained/equipped handlers assisting in the application) is in the AEZ. The handler's obligation to suspend applications applies if a worker or other person is in any portion of the AEZ—on or off the establishment. EPA is proposing to revise 170.505(b) so the handler/applicator would not be responsible for implementing AEZ requirements off the establishment, where he/she lacks control over persons in the AEZ. However, EPA is not proposing any changes to the existing provision in the 2015 WPS that prohibits a handler/applicator and the handler employer from applying a pesticide in such a way that it contacts workers or other persons directly or through drift (other than appropriately trained and PPE equipped handlers involved in the application). This provision will remain the key mechanism for ensuring the protections of individuals off the establishment from the potential exposures to pesticides from nearby agricultural pesticide applications.

After reviewing public input on the AEZ issues and concerns, EPA has concluded that the ''do not contact'' provision provides the more appropriate and enforceable regulatory mechanism to protect workers on nearby establishments and other people/bystanders that may be off the agricultural establishment but in close proximity to agricultural pesticide applications. EPA has determined that the current WPS provision extending the AEZ boundary beyond the agricultural establishment is confusing and unnecessary. EPA concludes the costs of including off the establishment areas in the AEZ do not outweigh the minimal benefits of including the additional area in the AEZ, so EPA is proposing to revise the WPS rule to limit the AEZ to the boundaries of the establishment.

These proposed revisions are intended to address the AEZ concerns noted in the Regulatory Reform Agenda docket (Ref. 1). EPA received approximately 25 individual comments on the AEZ requirements in the Regulatory Reform Agenda docket from the U.S. Department of Agriculture, States, State organizations, a Tribal organization, farm bureau federations, grower associations, retailer organizations, an applicator organization, an agricultural coalition, farmworker advocate organizations, public health organizations and individuals. Some of these concerns were also expressed by State regulatory agencies during training and outreach sessions that EPA conducted in 2016 and 2017. Most comments about the AEZ in the Regulatory Reform Agenda docket expressed concerns about the handler requirement to suspend applications for situations when the AEZ extends beyond the boundaries of the agricultural establishment and people are in the AEZ. A few commenters supported revising the AEZ requirements while other commenters urged EPA to completely eliminate the AEZ requirements in the 2015 WPS rule (Ref. 1). Some points made by the commenters included:

- The concept of a regulatory requirement to keep individuals out of varying widths of areas surrounding treated areas seems difficult for an agricultural employer to implement and next to impossible for a State trying to ensure compliance. The logic behind the requirement is understandable and supportable but making this a regulatory requirement with an expectation of compliance monitoring and enforcement is not.
- The AEZ concept was presented in the 2014 WPS proposal as an ''entry restricted area.'' In the final 2015 WPS rule (80 FR 67495), EPA replaced the term ''entry restricted area'' with ''application exclusion zone'' to make it more distinct from the requirements regarding Restricted Entry Interval. However, this change was not clear to the commenters. The commenters suggested that the concept of the AEZ was not proposed; and neither was the idea of the AEZ extending beyond the boundary of the establishment. They suggested that this approach was not well thought out, was not open for public comment, and was not in the spirit of co-regulating with States and Tribes.
- Burdens and economic impacts upon agricultural operations and employers were not considered or addressed. One commenter likened this provision of the rule to an unlawful taking of private property.
- The AEZ requirement to cease application if a passing vehicle is within 25 or 100 feet of the property could be problematic.
- EPA guidance addressing the implementation concerns does not carry the weight of regulation and is not sufficiently clear for growers and the state regulatory agencies to implement the requirement.

The main revision being proposed is to revise the handler's responsibility to suspend applications in 170.505(b)(1). In addition, EPA is proposing to revise the handler training content in 170.501(c)(3)(xi) to reflect that proposed change.

2. *Anticipated Effects.* The primary benefit of changing the AEZ requirements is a reduction in the complexity of applying a pesticide. The monetized benefits are difficult to quantify due to the variability of off establishment activities that could be within the AEZ (Ref. 2).

3. *Options Considered but Not Proposed.* The Agency considered keeping the WPS AEZ provision at 170.505(b) that requires handlers to ''suspend the application'' as it is in the current rule but adding provisions to the rule to better clarify the scope of the AEZ, as well as issuing additional outreach material, and guidance if necessary, about the handler AEZ requirements. However, such an approach would not fully address all concerns with the applicability of the AEZ off the establishment and would require more resources from EPA without necessarily providing any additional benefits or protection. EPA issued AEZ guidance in April 2016 (Ref. 3) which was revised in February 2018 (Ref. 4) in an attempt to address concerns raised by stakeholders, but this guidance has not fully resolved all concerns. The intent of the AEZ guidance was to provide further explanation of the AEZ requirements in the WPS and to confirm that the AEZ requirements supplement the ''do not contact'' requirement by defining specific areas from which people generally must be excluded during a pesticide application. However, an exception of the AEZ beyond the

boundary of the establishment where handlers do not have the ability to control the movement of people off the establishment or within easements (*e.g.,* utility workers), which commenters argued can effectively suspend an application activity, can only be accomplished through regulation.

EPA also considered the option of making no changes to the AEZ provision at 170.505(b). However, that option would not address concerns with the AEZ or the concerns from State and Tribal pesticide regulators with compliance and enforcement issues related to the AEZ applying off the establishment. Some State and Tribal pesticide regulators have stated that the AEZ requirements applicable to situations where people are in the AEZ but off the establishment are unenforceable because the AEZ provisions do not apply if the applicator does not see the persons off the establishment, and it would be difficult if not impossible to prove the applicator saw persons in the AEZ. State and Tribal pesticide regulators state that it is easier for them to prove that a person has been contacted by pesticides from an application and take action to enforce the do not contact provision. This option would still leave EPA needing to address existing AEZ issues through additional guidance and to address future issues needing clarification through guidance related to the ''off establishment'' provisions. Therefore, EPA has elected to propose the revision to 170.505(b) as described above.

E. Revisions To Address Issues Raised About When Handlers May Resume an Application That Has Been Suspended

1. *Proposed Changes.* EPA is proposing to revise the AEZ provision at 170.505(b) to add a paragraph clarifying conditions under which a handler may resume the application after having to suspend an application if people are in the AEZ on the agricultural establishment. The proposed revision of 170.505(b) would also clarify how the AEZ applies to persons not employed by the agricultural establishment who may be working on or in easements (*e.g.,* gas, mineral, utility, wind/solar energy) that may be within the boundaries of the establishment. These people are generally not within the control of the owner or agricultural employer so their presence could disrupt and prevent pesticide applications. EPA is not proposing any changes to the existing ''do not contact'' provision in the WPS.

The 2015 WPS rule was silent on if and when a handler could resume an application after it has been suspended because workers or other people were present in the AEZ. EPA never envisioned that the AEZ requirement would lead to an application being suspended permanently, and the proposed change makes EPA's expectations explicit. EPA is proposing to revise the WPS to clarify that handlers may resume a suspended application when no workers or other persons (other than appropriately trained and equipped handlers involved in the application) remain in an AEZ within the boundaries of the establishment.

EPA also is proposing language to allow applications to be made or resume while persons not employed by the establishment are present on easements that may exist within the boundaries of agricultural establishments because, depending on the terms of the easement, the owner or agricultural employer may be unable to control the movement of people (*e.g.,* utility workers) within an easement. The existing AEZ requirement at 170.405(a) precludes an application from being made on an agricultural establishment while workers or other people are in the AEZ within the boundaries of the establishment. In developing the original AEZ requirement, EPA presumed that all persons on an agricultural establishment would be subject to the control of the owner or agricultural employer, not recognizing the prevalence of easements which deprive the landowner of the ability, in whole or in part, to control the movements of persons within the easement. The proposed revisions at 170.505(b) would address this situation by allowing handlers to make or resume an application despite the presence within the AEZ of persons not employed by the establishment in an area subject to an easement that would otherwise prevent the agricultural employer from temporarily excluding those persons. These individuals will still be protected by the ''do not contact'' provision, so even though they could remain in an easement in the AEZ, the handler and the handler employer would be prohibited from allowing the pesticide application to result in any contact to these persons. The proposed revision to the regulatory text would be codified at 170.505(b).

These proposed revisions are intended to address the AEZ concerns raised by stakeholders during WPS implementation efforts and those noted above from the Regulatory Reform Agenda docket (Ref. 1).

2. *Anticipated Effects.* The primary benefit of clarifying the AEZ requirements about resuming a suspended application is providing certainty about when and how a pesticide application can occur. EPA does not anticipate the proposed revision about when a handler can resume an application when people are in the AEZ on the establishment to increase costs to handlers or employers or to change the intended protections to workers or other persons because this revision simply clarifies how the requirement was intended to be implemented in the 2015 WPS. The proposal to address people not employed by the establishment who are in an area subject to an easement (*e.g.,* utility workers) provides regulatory relief to handlers and agricultural employers and may prevent pesticide applications from being disrupted. However, EPA does not anticipate a change in the protections provided by WPS to the people in the easements because the handler must still apply the pesticide in a way that does not contact them, either directly or through drift.

3. *Options Considered but Not Proposed.* The Agency considered the option of making no changes to the AEZ provision at 170.505(b). However, that option would not address concerns about when a suspended application may be resumed and could prevent pesticide applications from being made when people are in areas subject to an easement. Therefore, EPA has elected to propose the revision to 170.505(b) as described above.

F. Revisions To Clarify and Simplify the AEZ Requirements for Outdoor Production

1. *Proposed Changes.* EPA is proposing to revise the criteria and factors for determining AEZ distances at 170.405(a). EPA is proposing the following revisions to simplify the AEZ requirements while maintaining the protections intended under the 2015 WPS:

- Eliminating the language and criteria pertaining to spray quality and droplet size and volume median diameter and using only ''sprayed applications'' as the criterion for determining the appropriate AEZ distance for outdoor production.
- Limiting the criteria for 100-foot AEZ distances for outdoor production to pesticide applications made by any of the following methods: (1) Aerially; (2) by air blast or air-propelled applications; or (3) as a fumigant, smoke, mist, or fog.
- Establishing a 25-foot AEZ for all sprayed applications made from a height greater than 12 inches from the soil surface or planting medium, and no longer differentiating between sprayed

applications based on the spray quality or other factors for setting different AEZ distances for outdoor production.

During repeated outreach and training events during WPS implementation efforts, it became clear to EPA that there was a great deal of confusion and misunderstanding regarding the AEZ requirements and the criteria for determining the appropriate AEZ distance. This was also reflected in comments to EPA from some members of the PPDC and submitted through the Regulatory Reform Agenda process. Some of the specific points made by the commenters on the complexity of the AEZ distance criteria included the following:

- It would be very difficult to enforce the AEZ requirements in many circumstances because it would be challenging to determine what the AEZ should have been during an application in many situations unless it is simplified or there were additional recordkeeping requirements (not recommended).
- The current rule refers to factors and criteria for determining the AEZ (*i.e.,* droplet size and ''volume median diameters'') that are no longer appropriate based on new information from the American Society of Agricultural and Biological Engineers (ASABE). In July 2018, ASABE revised the standards regarding the criteria for the droplet size classification system (Ref. 5). With this proposed rule, EPA seeks to make it easier for the regulated community to comply with the requirement while still maintaining protections for bystanders and other persons. The current rule and criteria for determining the AEZ are no longer appropriate based on information from ASABE. The AEZ distances are currently based on factors that make it difficult for some applicators to determine their required AEZ. This has resulted in confusion and difficulty in complying with the AEZ requirement.
- The AEZ distances are currently based on factors that make it difficult for some applicators to determine their required AEZ, making it difficult to comply with the requirement. The complexity has resulted in many calling for the elimination of the AEZ altogether.
- Although there is a good rationale and basis for the AEZ requirement, it needs to be simplified to make it more practical, understandable, and easier to implement.

EPA acknowledges that some pesticide labels will have restrictions for applications that are different than the existing or proposed AEZs. For example, the restrictions on soil fumigant labels are more restrictive than the AEZ of 100 feet. In situations like this, pesticide users must follow the product-specific instructions on the labeling. As stated in 170.303(c) and 170.317(a), when 40 CFR part 170 is referenced on a pesticide label, pesticide users must comply with all the requirements in 40 CFR part 170, except those that are inconsistent with product-specific instructions on the pesticide product labeling.

After reviewing public input on the AEZ issues and concerns, EPA concludes these proposed revisions will maintain essentially the same level of protection as provided by the AEZ provisions in the current rule, while addressing the concerns raised about the complexity of the AEZ requirements and criteria. EPA expects that this proposal would address the major concerns of stakeholders (when combined with other options from issues discussed above) and could increase compliance by making the AEZ requirements easier to understand and implement. The proposed revision to the regulatory text would be codified at 170.405(a).

Some of these proposed revisions are intended to address the AEZ concerns noted in the Regulatory Reform Agenda docket. Commenters raised concerns related to the general and/or overall complexity of the AEZ requirements in 170.405(a) (*i.e.,* that establish the criteria and factors for determining AEZ distances) and the difficulty this creates in being able to comply with these requirements and enforce them.

2. *Anticipated Effects.* In 2015, EPA estimated that the cost to the agricultural employer for implementing an AEZ around application equipment would be negligible. These proposed revisions are simplifying the existing provisions and not adding any new requirements or burden. Therefore, the proposed changes would not result in any added costs for the agricultural employer based on EPA's cost estimate of the 2015 WPS rule.

EPA concludes these proposed revisions will maintain essentially the same level of protection as provided by the AEZ provisions in the current rule because they maintain the same general distances. These changes could increase compliance by making the AEZ requirements easier to understand and implement. Also, the requirement for the handler (applicator) to apply in a manner that does not contact workers or other people continues to apply.

3. *Options Considered but Not Proposed.* The Agency considered making no changes to the AEZ provision at 170.405(a) or issuing guidance to clarify and potentially simplify these AEZ requirements for outdoor production. One member of the PPDC expressed concern that the size of the AEZ was already minimal for aerial, air-blast, fumigation, smoke, mist, and fog applications, and stated that the existing AEZ should be upheld so that workers and their families do not lose any level of protection. However, making no changes would not address concerns from State and Tribal pesticide regulators related to the complexity of the AEZ requirements and the confusion and consternation in the regulated community caused by that complexity. Making no changes to the AEZ provisions would not address concerns raised about WPS compliance and would require more extensive training and outreach, without added benefits or protection. EPA requests comments and supporting data to inform EPA's proposed changes to the AEZ requirements, on other options considered and any other suggested changes that could simplify the regulatory requirements around the AEZ, help SLAs improve their compliance monitoring and enforcement efforts, and maintain appropriate protections for workers, handlers, and other persons during applications.

EPA issued interpretive guidance on February 15, 2018 addressing the AEZ (Ref. 4) that explains what the AEZ is, describes the responsibilities of agricultural employers and pesticide handlers for the AEZ, identifies the actions that should be taken by the pesticide applicator when someone enters the AEZ both when on and when off the establishment, explains the circumstances under which a pesticide applicator may resume a pesticide application after suspending application as a result of a person entering the AEZ, and provides instruction on how to determine the size of the AEZ. While helpful, the EPA guidance has not fully resolved all concerns, does not carry the weight and authority of a codified federal regulation, and may not provide the necessary clarity to assist state regulatory agencies with compliance activities for all AEZ issues. Therefore, EPA has elected to propose the revision to 170.405(a) as described above.

G. Proposed Revisions To Expand the Exemption for Owners of Agricultural Establishments and Their Immediate Families To Exempt Them From the Requirements of 170.405(a)

1. Proposed Changes. EPA is proposing to amend the AEZ requirement or owners of agricultural establishments and their immediate families by expanding the exemption at 170.601 to include entry restrictions during outdoor production pesticide applications (170.405(a)), to relieve burdens on family owned agricultural establishments during pesticide applications.

EPA is proposing this revision to address issues that arose during implementation of the 2015 revisions resulting from the unforeseen impacts of the AEZ requirements in certain situations. Stakeholders raised concerns related to the AEZ requirement in 170.405(a) (*i.e.,* that employers must not allow workers/people to remain in the AEZ on the establishment other than properly trained and equipped handlers involved in the application) applying to workers or other persons that are in buildings, housing, or shelters on the establishment. When workers or other people are in closed buildings, housing, or shelters that are within the boundaries of the establishment, the employer cannot legally apply the pesticide if those people are within the boundary area of the AEZ—it is a violation of the WPS. There is no choice under the current rule but to remove them from the AEZ before the application can take place, regardless of whether the buildings are closed or the handler can ensure the pesticide will not contact the people. This raises specific concerns for owners of agricultural establishments and their immediate families.

In the case of owners of agricultural establishments and their immediate families, family members cannot stay in their own home during pesticide applications if the home is within the AEZ. Even though the owner/applicator may be taking all the appropriate steps to ensure he or she will not contact other family members in their home during applications, it would still be a violation for them to stay in their home within the AEZ during applications if this exemption is not expanded. Although EPA acknowledges that there is an exposure risk for owners and immediate family members present within the AEZ during pesticide applications, EPA anticipates that family members will take appropriate steps to protect other family members to ensure they will not be contacted during pesticide applications, and that the AEZ requirement therefore subjects owners of agricultural establishments and their immediate families to unnecessary burdens. Accordingly, EPA proposes to revise 170.601 so that owners and applicators would be exempt from the provisions of 170.405(a) in regard to members of their immediate families who are inside closed buildings, housing, or shelters on the establishment. This should not impact WPS protections for workers and handlers because owners would still have to observe AEZ requirements for non-family member employees on the establishment. Because the proposed exemption is limited to 170.405(a), family members will still be subject to all other AEZ requirements.

After reviewing public input on the AEZ issues and concerns, EPA concludes this proposed revision will maintain essentially the same AEZ protections provided in the current rule for owners and immediate family members because of their interest in protecting each other. The proposed revision to the regulatory text would be codified at 170.601(a).

2. *Anticipated Effects.* This proposed revision is considered regulatory relief and should decrease costs and burden associated with the rule while maintaining essentially the same benefits by exempting owners of agricultural establishments and their immediate families from some regulatory requirements. The benefits of this change are not necessarily monetary. However, some owners of agricultural establishments and their immediate families may see more tangible benefits if they are able to avoid costs of moving families from housing or the costs of new equipment to change application methods.

3. *Options Considered but Not Proposed.* EPA considered addressing the AEZ issues by developing an exception to the AEZ requirement that would identify appropriate conditions for allowing people to remain in a building or structure in the AEZ. EPA also considered the option of making no changes to the owner exemption at 170.601(a). However, the Agency decided that it would be complicated to develop a national regulatory approach in the WPS that would address the many variables across the country where people might be in a building or structure in the AEZ on the agricultural establishment. Making no changes would not substantively address concerns identified by stakeholders (Ref. 1). Therefore, EPA has elected to propose the revision to 170.601(a) as described above.

III. Request for Comment

EPA requests comments and supporting data to inform EPA's proposed changes to the AEZ requirements, on other options considered and any other suggested changes that could simplify the regulatory requirements around the AEZ while maintaining appropriate protections for workers, handlers, and other persons during applications. To ensure that EPA is able to give your comments the fullest consideration, please provide the rationale and data or information that support your position.

IV. Severability

The Agency intends that the provisions of this rule be severable. In the event that any individual provision or part of this rule is invalidated, the Agency intends that this would not render the entire rule invalid, and that any individual provisions that can continue to operate will be left in place.

V. References

The following is a listing of the documents that are specifically referenced in this document. The docket includes these documents and other information considered by EPA, including documents that are referenced within the documents that are included in the docket, even if the referenced document is not physically located in the docket. For assistance in locating these other documents, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

1. EPA. *Reference List of Public Comments Regarding the Worker Protection Standard Submitted to Docket EPA–HQ–OA–2017–0190.*

VI. FIFRA Review Requirements

Under FIFRA section 25(a), EPA has submitted a draft of the proposed rule to the Secretary of the Department of Agriculture, the FIFRA Scientific Advisory Panel (SAP), and the appropriate Congressional Committees. USDA completed review of the draft proposed rule during the interagency review mentioned in Unit VII.A., and the SAP waived its review.

VII. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review; and, Executive Order 13563: Improving Regulation and Regulatory Review

This action is a significant regulatory action that was submitted to the Office of Management and Budget (OMB) for review under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011). Any changes made in response to OMB recommendations have been documented in the docket. EPA prepared a cost analysis associated with this action, which is available in the docket (Ref. 2).

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is expected to be a deregulatory action as specified in Executive Order 13771 (82 FR 9339, February 3, 2017). The EPA cost analysis associated with this action is available in the docket (Ref. 2).

C. Paperwork Reduction Act (PRA)

This action does not impose any new or modify information collection activities under the PRA, 44 U.S.C. 3501 *et seq.* OMB has previously approved the information collection activities contained in the existing regulations under OMB control number 2070–0190 (EPA ICR No. 2491.02). This proposal does not impose an information collection burden because the application exclusion zone requirements are not associated with any of the existing burdens in the approved information collection request.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under RFA, 5 U.S.C. 601 *et seq.* In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves burden or has no net burden on the small entities subject to the rule. These proposed changes would reduce the impacts on all small entities subject to the rule, so there are no significant impacts to any small entities. We have therefore concluded that this action will relieve regulatory burden for all directly regulated small entities.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of $100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The proposed rule requirements would primarily affect agricultural employers and commercial pesticide handler employers. This action is also expected to be a burden-reducing action and does not result in net costs exceeding $100 million. EPA does not estimate the cost savings of the burden reduction in this proposed rule. However, removing the requirements should reduce the complexity of arranging and conducting a pesticide application. If anything, these corrections should improve understanding of the requirements, which would facilitate compliance. The cost analysis associated with this action is available in the docket (Ref. 2).

F. Executive Order 13132: Federalism

This action does not have ''federalism implications'' as that term is defined in Executive Order 13132 (64 FR 43255, August 10, 1999). It would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have Tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). The proposed rule would change the requirements around AEZs. There are no costs to Tribes associated with the proposed changes because the WPS is implemented through the pesticide label, so changes to the regulation do not impose any new obligations on the part of Tribes. Thus, Executive Order 13175 does not apply to this action.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This proposed rule is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it is not an economically significant regulatory action as defined by Executive Order 12866. This rulemaking will not result in increased risk to children. The minimum age requirements in WPS will ensure that children are not allowed to handle pesticides or engage in early-entry work, helping to prevent children's exposure to pesticides as handlers or early-entry workers.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This proposed rule is not a ''significant energy action'' as defined in Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Further, this rule is not likely to have any adverse energy effects because it does not require any action related to the supply, distribution, or use of energy.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards that would require Agency consideration under NTTAA section 12(d), 15 U.S.C. 272.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629; February 16, 1994) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that this proposed rule would not have disproportionately high and adverse human health or environmental effects on minority or low-income populations.

List of Subjects in 40 CFR Part 170

Environmental protection, pesticides, agricultural worker, pesticide handler, employer, farms, forests, nurseries, greenhouses, worker protection standard.

Dated: October 24, 2019.

Andrew R. Wheeler,

Administrator.

Therefore, EPA proposes to amend 40 CFR chapter I, subchapter R, as follows:

PART 170—[AMENDED]

■ 1. The authority citation for part 170 continues to read:

Authority: 7 U.S.C. 136–136w.

■ 2. Amend § 170.305 by revising the definition of *Application Exclusion Zone* to read as follows:

§ 170.305 Definitions.

* * * * *

Application exclusion zone means the area surrounding the application equipment from which persons generally must be excluded during pesticide applications.

* * * * *

■ 3. Amend § 170.405 by removing paragraph (a)(1)(i)(D), and revising paragraphs (a)(1)(i)(B), (a)(1)(i)(C), (a)(1)(ii), and (a)(2) to read as follows:

§ 170.405 Entry restrictions associated with pesticide applications.

* * * * *

(a) * * *

(1) * * *

(i) * * *

(A) * * *

(B) Air blast or air-propelled applications.

(C) As a fumigant, smoke, mist, or fog.

(ii) The application exclusion zone is the area that extends 25 feet horizontally from the application equipment in all directions during application when the pesticide is applied as a spray from a height greater than 12 inches from the soil surface or planting medium and not as in paragraph (a)(1)(i) of this section.

* * * * *

(2) During any outdoor production pesticide application, the agricultural employer must not allow or direct any worker or other person to enter or to remain in the treated area or an application exclusion zone that is within the boundaries of the establishment until the application is complete, except for:

(i) An appropriately trained and equipped handler involved in the application, and

(ii) A person not employed by the establishment who is in an area subject to an easement that prevents the agricultural employer from temporarily excluding the person from that area.

* * * * *

■ 3. Amend § 170.501 by revising paragraph (c)(3)(xi) to read as follows:

§ 170.501 Training requirements for handlers.

* * * * *

(c) * * *

(3) * * *

(xi) Handlers must suspend a pesticide application if workers or other persons are in the application exclusion zone within the boundaries of the agricultural establishment and must not resume the application while workers or other persons remain in the application exclusion zone within the boundaries of the agricultural establishment, except for an appropriately trained and equipped handler involved in the application, and a person not employed by the establishment who is in an area subject to an easement that prevents the agricultural employer from temporarily excluding the person from that area.

* * * * *

■ 4. Amend § 170.505 by revising paragraph (b) to read as follows:

§ 170.505 Requirements during applications to protect handlers, workers, and other persons.

* * * * *

(b) *Suspending applications.* (1) Any handler performing a pesticide application must immediately suspend the pesticide application if any worker or other person, other than an appropriately trained and equipped handler involved in the application, is in an application exclusion zone described in § 170.405(a)(1) that is within the boundaries of the agricultural establishment or the area specified in column B of the Table in § 170.405(b)(4), except for:

(i) An appropriately trained and equipped handler involved in the application, and

(ii) A person not employed by the establishment who is in an area subject to an easement that prevents the agricultural employer from temporarily excluding the person from that area.

(2) A handler must not resume a suspended pesticide application while any workers or other persons (other than appropriately trained and equipped handlers involved in the application) remain in an application exclusion zone described in § 170.405(a)(1) that is within the boundaries of the agricultural establishment or the area specified in column B of the Table in § 170.405(b)(4), except for persons not employed by the establishment in an area subject to an easement that prevents the agricultural employer from temporarily excluding those persons from that area.

* * * * *

■ 5. Amend § 170.601 by revising paragraph (a)(1) to read as follows:

§ 170.601 Exemptions.

(a) * * *

(1) On any agricultural establishment where a majority of the establishment is owned by one or more members of the same immediate family, the owner(s) of the establishment are not required to provide the protections of the following provisions to themselves or members of their immediate family when they are performing handling activities or tasks related to the production of agricultural plants that would otherwise be covered by this part on their own agricultural establishment.

(i) Section 170.309(c).

(ii) Section 170.309(f) through (j).

(iii) Section 170.311.

(iv) Section 170.401.

(v) Section 170.403.

(vi) Section 170.405(a).

(vii) Section 170.409.

(viii) Sections 170.411 and 170.509.

(ix) Section 170.501.

(x) Section 170.503.

(xi) Section 170.505(c) and (d).

(xii) Section 170.507(c) through (e).

(xiii) Section 170.605(a) through (c), and (e) through (j).

* * * * *

[FR Doc. 2019–23718 Filed 10–31–19; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL SERVICES AGENCY

40 CFR Part 282

[EPA–R01–UST–2019–0421; FRL–10001–59–Region 1]

New Hampshire: Final Approval of State Underground Storage Tank Program Revisions, Codification, and Incorporation by Reference

AGENCY: Environmental Services Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Pursuant to the Resource Conservation and Recovery Act (RCRA or Act), the Environmental Services Agency (EPA) is proposing to approve revisions to the State of New Hampshire's Underground Storage Tank (UST) program submitted by the New Hampshire Department of Environmental Services (NHDES). This action is based on EPA's determination that these revisions satisfy all requirements needed for program approval. This action also proposes to codify EPA's approval of New Hampshire's state program and to incorporate by reference those provisions of the State regulations that we have determined meet the requirements for approval. The provisions will be subject to EPA's inspection and enforcement authorities under sections 9005 and 9006 of RCRA subtitle I and other applicable statutory and regulatory provisions.

DATES: Send written comments by December 2, 2019.

ADDRESSES: Submit any comments, identified by EPA–R01–UST–2019–0421, by one of the following methods:

1. *Federal eRulemaking Portal: http://www.regulations.gov*. Follow the on-line instructions for submitting comments.

2. *Email: hanamoto.susan@epa.gov*.

3. *Mail:* Susan Hanamoto, RCRA Waste Management, UST, and Pesticides Section; Land, Chemicals, and Redevelopment Division; EPA Region 1, 5 Post Office Square, Suite 100, (Mail Code 07–1), Boston, MA 02109–3912.

4. *Hand Delivery or Courier:* Deliver your comments to Susan Hanamoto, RCRA Waste Management, UST, and Pesticides Section; Land, Chemicals, and Redevelopment Division; EPA Region 1, 5 Post Office Square, Suite 100, (Mail Code 07–1), Boston, MA 02109–3912.

Instructions: Direct your comments to Docket ID No. EPA–R01–UST–2019–0421. EPA's policy is that all comments received will be included in the public docket without change and may be available online at *http://www.regulations.gov*. including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov.,* or email. The Federal *http://www.regulations.gov*. Website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties, and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

You can view and copy the documents that form the basis for this codification and associated publicly available materials from 8:30 a.m. to 4 p.m. Monday through Friday at the following location: EPA Region 1 Library, 5 Post Office Square, 1st floor, Boston, MA 02109–3912; by appointment only; tel: (617) 918–1990. Interested persons wanting to examine these documents should make an appointment with the office at least two weeks in advance.

FOR FURTHER INFORMATION CONTACT: Susan Hanamoto, (617) 918–1219; email address: *hanamoto.susan@epa.gov*.

SUPPLEMENTARY INFORMATION: For additional information, see the direct final rule published in the ''Rules and Regulations'' section of this **Federal Register**.

Authority: This rule is issued under the authority of Sections 2002(a), 9004, and 7004(b) of the Solid Waste Disposal Act, as amended, 42 U.S.C. 6912, 6991c, 6991d, and 6991e.

Dated: October 7, 2019.

Dennis Deziel,

Regional Administrator, EPA Region 1.

Animal and Plant Health Inspection Service

[Docket No. APHIS–2019–0071]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Veterinary Services Field Operations Export Services Customer Service Survey Project

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a revision to and extension of approval of an information collection to evaluate service delivery by the Veterinary Services Field Operations Export Service Centers to the public.

DATES: We will consider all comments that we receive on or before December 31, 2019.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2019*-0071.
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2019–0071, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road, Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *http://www.regulations.gov/#!docketDetail;D=APHIS-2019-0071* or in our reading room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the Veterinary Services Field Operations Export Services customer service survey project, contact Ms. Melinda Springer, Chief of Staff, VS, APHIS, Field Operations, 2150 Centre Avenue, Building B, Fort Collins, CO; (970) 494–7351. For more detailed information on the information collection, contact Mr. Joseph Moxey, APHIS' Information Collection Coordinator, at (301) 851–2483.

SUPPLEMENTARY INFORMATION:

Title: Veterinary Services Field Operations Export Services Customer Service Survey Project.

OMB Control Number: 0579–0334.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture, among other things, regulates and provides services related to the importation, interstate movement, and exportation of animals, animal products, and other articles to prevent the spread of pests and diseases of livestock. APHIS' Veterinary Services' (VS') Field Operations is the program unit that carries out these activities at the field level (through service centers, airports, and seaports) to protect animal health.

After performing a service for an individual or business, the Field Operations Export Service Centers conduct a survey to evaluate customer service. The survey consists of a short questionnaire in which respondents are asked to identify the type of customer they are (*e.g.,* pet owners, animal importers/exporters, animal product and byproduct importers/exporters, users of quarantine facilities, and accredited veterinarians), and to rate the services received in terms of courtesy, timeliness, helpfulness, etc. Respondents are also asked to rate and provide comments concerning their overall experience. Completion of the questionnaire is voluntary and responses do not identify the individual respondent.

Field Operations uses the surveys to gain a general view of the public's perception of customer service at the service centers, airports, and seaports and identify areas in which VS can improve service delivery to the public and more efficiently meet the needs and expectations of customers.

Since the last approval of this collection by the Office of Management and Budget (OMB), we have changed the name from Veterinary Services Export Service Center Customer Service Survey to Veterinary Services Field Operations Export Services Customer Service Survey Project.

We are asking OMB to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.,* permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.0402 hours per response.

Respondents: Members of the public who receive services from Veterinary Services (*e.g.,* pet owners, animal importers/exporters, animal product and byproduct importers/exporters, users of quarantine facilities, and accredited veterinarians).

Estimated annual number of respondents: 15,050.

Estimated annual number of responses per respondent: 1.32.

Estimated annual number of responses: 19,850.

Estimated total annual burden on respondents: 797 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 28th day of October 2019.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

Animal and Plant Health Inspection Service

[Docket No. APHIS–2019–0073]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Domestic Quarantine Regulations

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a revision to and extension of approval of an information collection associated with the domestic quarantine regulations for preventing the spread of plant pests and diseases within the United States.

DATES: We will consider all comments that we receive on or before December 31, 2019.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2019-0073.*
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2019–0073, Regulatory Analysis and Development, PPD, APHIS, 4700 River Road, Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *http://www.regulations.gov/#!docketDetail;D=APHIS-2019-0073* or in our reading room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information regarding the regulations for preventing the spread of plant pests and diseases within the United States, contact Mr. Andrew Wilds, National Policy Manager, Plant Protection and Quarantine, APHIS, 4700 River Road, Unit 160, Riverdale, MD 20737; (301) 851–3051. For more detailed information on the information collection, contact Mr. Joseph Moxey, APHIS' Information Collection Coordinator, at (301) 851–2483.

SUPPLEMENTARY INFORMATION:

Title: Domestic Quarantine Regulations.

OMB Control Number: 0579–0088.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Plant Protection Act (7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture is authorized to prohibit or restrict the importation, entry, or movement in interstate commerce of any plant, plant product, biological control organism, noxious weed, article, or means of conveyance, if the Secretary determines that the prohibition or restriction is necessary to prevent the introduction or the dissemination of a plant pest into the United States.

The Animal and Plant Health Inspection Service's (APHIS') regulations in 7 CFR part 301, "Domestic Quarantine Notices," are necessary to regulate the movement of certain articles from infested areas to noninfested areas to prevent the spread of plant pests. These measures help prevent the pests from spreading from quarantined areas to noninfested areas of the United States.

Administering these regulations requires APHIS to collect information from a variety of individuals who are involved in growing, packing, handling, and transporting plants and plant products. The information serves as supporting documentation required for the issuance of forms and documents that authorize the movement of regulated plants and plant products and is vital to help prevent the spread of injurious plant pests within the United States. Collecting this information requires APHIS to use a number of forms and documents, including permits and certificates; compliance and cooperative agreements; workplans and petitions; requests for inspection; labeling, notices, and reports; emergency action notifications and reports of violation; warnings, cancellations, and appeals; and recordkeeping.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.,* permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.2 hours per response.

Respondents: State, local, and Tribal government agricultural representatives, agricultural business representatives, and private citizens.

Estimated annual number of respondents: 8,185.

Estimated annual number of responses per respondent: 211.

Estimated annual number of responses: 1,723,768.

Estimated total annual burden on respondents: 345,949 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 28th day of October 2019.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

National School Lunch, Special Milk, and School Breakfast Programs, National Average Payments/Maximum Reimbursement Rates

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: This Notice supersedes the notice published in the August 7, 2019 issue of the **Federal Register** entitled National School Lunch, Special Milk, and School Breakfast Programs, National Average Payments/Maximum Reimbursement Rates (FR Doc. 84–38590). It establishes new reimbursement rates for Guam and Virgin Islands to match the reimbursement rate provided to Puerto Rico, and corrects an incorrect date. Similar to FR Doc. 84–38590, this Notice announces the annual adjustments to the national average payments, the amount of money the Federal Government provides States for lunches, afterschool snacks, and breakfasts served to children participating in the National School Lunch and School Breakfast Programs; to the maximum reimbursement rates, the maximum per lunch rate from Federal funds that a State can provide a school food authority for lunches served to children participating in the National School Lunch Program; and to the rate of reimbursement for a half-pint of milk served to non-needy children in a school or institution that participates in the Special Milk Program for Children. The annual payments and rates adjustments for the National School Lunch and School Breakfast Programs reflect changes in the Food Away From Home series of the Consumer Price Index for All Urban Consumers. As stated above, Food and Nutrition Service is establishing new reimbursement rates for Guam and the Virgin Islands: It has approved a 17-percent increase in school meal reimbursement rates for Guam and the Virgin Islands to reflect their higher cost of providing school meals. The rate adjustment will take effect beginning July 1, 2019, for school year 2019–2020. This increase is based on data indicating that the cost of producing school lunches, breakfasts, and snacks are higher than those in the continental United States, as well as other factors impacting both Guam and the Virgin Islands school meal programs. The annual rate adjustment for the Special Milk Program reflects changes in the Producer Price Index for Fluid Milk Products. The payments and rates are prescribed on an annual basis each July.

Overall, reimbursement rates this year for the National School Lunch, Breakfast Programs and the Special Milk Program either remained the same or increased compared to last year. Of note, the performance-based reimbursement for lunches certified as meeting the meal pattern increased from 6 cents to 7 cents.

DATES: These rates are effective from July 1, 2019 through June 30, 2020

FOR FURTHER INFORMATION CONTACT: Jessica Saracino, Branch Chief, Program Monitoring and Operational Support Division, Child Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Room 640, Alexandria, VA 22302–1594.

SUPPLEMENTARY INFORMATION:

Background

Special Milk Program for Children—Pursuant to section 3 of the Child Nutrition Act of 1966, as amended (42 U.S.C. 1772), the Department announces the rate of reimbursement for a half-pint of milk served to non-needy children in a school or institution that participates in the Special Milk Program for Children. This rate is adjusted annually to reflect changes in the Producer Price Index for Fluid Milk Products, published by the Bureau of Labor Statistics of the Department of Labor.

National School Lunch and School Breakfast Programs—Pursuant to sections 11 and 17A of the Richard B. Russell National School Lunch Act, (42 U.S.C. 1759a and 1766a), and section 4 of the Child Nutrition Act of 1966 (42 U.S.C. 1773), the Department annually announces the adjustments to the National Average Payment Factors and to the maximum Federal reimbursement rates for lunches and afterschool snacks served to children participating in the National School Lunch Program and breakfasts served to children participating in the School Breakfast Program. Adjustments are prescribed each July 1, based on changes in the Food Away From Home series of the Consumer Price Index for All Urban Consumers, published by the Bureau of Labor Statistics of the Department of Labor.

Lunch Payment Levels—Section 4 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1753) provides general cash for food assistance payments to States to assist schools in purchasing food. The Richard B. Russell National School Lunch Act provides two different section 4 payment levels for lunches served under the National School Lunch Program. The lower payment level applies to lunches served by school food authorities in which less than 60 percent of the lunches served in the school lunch program during the second preceding school year were served free or at a reduced price. The higher payment level applies to lunches served by school food authorities in which 60 percent or more of the lunches served during the second preceding school year were served free or at a reduced price.

To supplement these section 4 payments, section 11 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1759(a)) provides special cash assistance payments to aid schools in providing free and reduced price lunches. The section 11 National Average Payment Factor for each reduced price lunch served is set at 40 cents less than the factor for each free lunch.

As authorized under sections 8 and 11 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1757 and 1759a), maximum reimbursement rates for each type of lunch are prescribed by the Department in this Notice. These maximum rates are to ensure equitable disbursement of Federal funds to school food authorities.

Performanced-based Reimbursement—In addition to the funding mentioned above, school food authorized certified as meeting the meal pattern and nutrition standard requirements set forth in 7 CFR parts 210 and 220 are eligible to receive performance-based cash assistance for each reimbursable lunch served (an additional seven cents per lunch available beginning July 1, 2019, increased by inflation from six cents to seven cents, and will continue to be adjusted and rounded down to the nearest whole cent).

Afterschool Snack Payments in Afterschool Care Programs—Section 17A of the Richard B. Russell National School Lunch Act (42 U.S.C. 1766a) establishes National Average Payments for free, reduced price and paid afterschool snacks as part of the National School Lunch Program.

Breakfast Payment Factors—Section 4 of the Child Nutrition Act of 1966 (42 U.S.C. 1773) establishes National Average Payment Factors for free, reduced price, and paid breakfasts served under the School Breakfast Program and additional payments for free and reduced price breakfasts served in schools determined to be in ‘‘severe need’’ because they serve a high percentage of needy children.

Adjusted Payments

The following specific section 4, section 11, and section 17A National Average Payment Factors and maximum reimbursement rates for lunch, the afterschool snack rates, and the breakfast rates are in effect from July 1, 2019 through June 30, 2020. Due to a higher cost of living, the average payments and maximum reimbursements for Alaska, Guam, Hawaii, Puerto Rico, and the Virgin Islands are higher than those for all other States. The District of Columbia uses figures specified for the contiguous States. These rates do not include the value of USDA Foods or cash-in-lieu of USDA Foods which schools receive as additional assistance for each meal served to participants under the Program. A notice announcing the value of USDA Foods and cash-in-lieu of USDA Foods is published separately in the **Federal Register**.

Adjustments to the national average payment rates for all lunches served under the National School Lunch Program, breakfasts served under the School Breakfast Program, and afterschool snacks served under the National School Lunch Program are rounded down to the nearest whole cent.

Special Milk Program Payments

For the period July 1, 2019 through June 30, 2020, the rate of reimbursement for a half-pint of milk served to a non-needy child in a school or institution that participates in the Special Milk Program is 21.50 cents reflecting an increase of 1 cent from the School Year (SY) 2018–2019 level. This change is based on the 3.92 percent increase in the Producer Price Index for Fluid Milk Products from May 2018 to May 2019.

As a reminder, schools or institutions with pricing programs that elect to serve milk free to eligible children continue to receive the average cost of a half-pint of milk (the total cost of all milk purchased during the claim period divided by the total number of purchased half-pints) for each half-pint served to an eligible child.

National School Lunch Program Payments

Overall, payments for the National School Lunch Program and the Afterschool Snack Program either remained the same or increased from last years payments due to a 2.94 percent increase in the national average payment rates for schools and residential child care institutions for the period July 1, 2019 through June 30, 2020 in the Consumer Price Index for All Urban Consumers for the food away from home series during the 12-month period May 2018 to May 2019 (from a level of 275.307 in May 2018, as previously published in the **Federal Register** to 283.394 in May 2019).

These changes are reflected below.

Section 4 National Average Payment Factors—In school food authorities that served less than 60 percent free and reduced price lunches in School Year (SY) 2017–2018, the payments for meals served are: *Contiguous States*—paid rate—32 cents (1 cent increase from the SY 2018–2019 level), free and reduced price rate—32 cents (1 cent increase), maximum rate—40 cents (1 cent increase); *Alaska*—paid rate—53 cents (2 cents increase), free and reduced price rate—53 cents (2 cents increase), maximum rate—63 cents (2 cents increase); *Guam, Hawaii, Puerto Rico, and the Virgin Islands*—paid rate—38 cents (1 cent increase), free and reduced price rate—38 cents (1 cent increase), maximum rate—46 cents (1 cent increase).

In school food authorities that served 60 percent or more free and reduced price lunches in School Year 2017–2018, payments are: *Contiguous States*—paid rate—34 cents (1 cent increase from the SY 2018–2019 level), free and reduced price rate—34 cents (1 cent increase), maximum rate—40 cents (1 cent increase); *Alaska*—paid rate—55 cents (2 cents increase), free and reduced price rate—55 cents (2 cents increase), maximum rate—63 cents (2 cents increase); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—paid rate—40 cents (1 cent increase), free and reduced price rate—40 cents (1 cent increase), maximum rate—46 cents (1 cent increase).

Beginning this year, School food authorities certified to receive the performance-based cash assistance will receive an additional 7 cents (adjusted annually) added to the above amounts as part of their section 4 payments.

Section 11 National Average Payment Factors—*Contiguous States*—free lunch—3 dollars and 9 cents (9 cents increase from the SY 2018–2019 level), reduced price lunch—2 dollars and 69 cents (9 cents increase); *Alaska*—free lunch—5 dollars and 1 cent (14 cents increase), reduced price lunch—4 dollars and 61 cents (14 cents increase); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—free lunch—3 dollars and 62 cents (11 cents increase), reduced price lunch—3 dollars and 22 cents (11 cents increase).

Afterschool Snacks in Afterschool Care Programs—The payments are: *Contiguous States*—free snack—94 cents (3 cents increase from the SY 2018–2019 level), reduced price snack—47 cents (2 cents increase), paid snack—8 cents (no change); *Alaska*—free snack –1 dollar and 52 cents (4 cents increase), reduced price snack—76 cents (2 cents increase), paid snack—13 cents (no change); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—free snack—1 dollar and 10 cents (4 cents increase), reduced price snack—55 cents (2 cent increase), paid snack—10 cents (1 cent increase).

School Breakfast Program Payments

Overall, payments for the National School Breakfast Program either remained the same or increased from last years payments due to a 2.94 percent increase in the national average payment rates for schools and residential child care institutions for the period July 1, 2019 through June 30, 2020 in the Consumer Price Index for All Urban Consumers in the Food Away from Home series during the 12-month period May 2018 to May 2019 (from a level of 275.307 in May 2018, as previously published in the **Federal Register** to 283.394 in May 2019).

These changes are reflected below.

For schools ''not in severe need'' the payments are: *Contiguous States*—free breakfast—1 dollar and 84 cents (5 cents increase from the SY 2018–2019 level), reduced price breakfast—1 dollar and 54 cents (5 cents increase), paid breakfast—31 cents (no change); *Alaska*—free breakfast—2 dollars and 95 cents (8 cents increase), reduced price breakfast—2 dollars and 65 cents (8 cents increase), paid breakfast—47 cents (1 cent increase); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—free breakfast—2 dollars and 15 cents (6 cents increase), reduced price breakfast—1 dollar and 85 cents (6 cents increase), paid breakfast—36 cents (1 cent increase).

For schools in ''severe need'' the payments are: *Contiguous States*—free breakfast—2 dollars and 20 cents (6 cents increase from the SY 2018–2019 level), reduced price breakfast—1 dollar and 90 cents (6 cents increase), paid breakfast—31 cents (no change); *Alaska*—free breakfast—3 dollars and 53 cents (10 cents increase), reduced price breakfast—3 dollars and 23 cents (10 cents increase), paid breakfast—47 cents (1 cent increase); *Guam, Hawaii, Puerto Rico and the Virgin Islands*—free breakfast—2 dollars and 57 cents (7 cents increase), reduced price breakfast—2 dollars and 27 cents (7 cents increase), paid breakfast—36 cents (1 cent increase).

Payment Chart

The following chart illustrates the lunch National Average Payment

Factors with the sections 4 and 11 already combined to indicate the per lunch amount; the maximum lunch reimbursement rates; the reimbursement rates for afterschool snacks served in afterschool care programs; the breakfast National Average Payment Factors including severe need schools; and the milk reimbursement rate. All amounts are expressed in dollars or fractions thereof. The payment factors and reimbursement rates used for the District of Columbia are those specified for the contiguous States.

[2] Performance-based cash reimbursement (adjusted annually for inflation)

This action is not a rule as defined by the Regulatory Flexibility Act (5 U.S.C. 601–612) and thus is exempt from the provisions of that Act.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), no new recordkeeping or reporting requirements have been included that are subject to approval from the Office of Management and Budget.

This rule has been determined to be not significant and was reviewed by the Office of Management and Budget in conformance with Executive Order 12866. Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as note a major rule, as defined by 5 U.S.C. 804(2).

National School Lunch, School Breakfast, and Special Milk Programs are listed in the Catalog of Federal Domestic Assistance under No. 10.555, No. 10.553, and No. 10.556, respectively, and are subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 2 CFR 415.3–415.6).

Authority: Sections 4, 8, 11, and 17A of the Richard B. Russell National School Lunch Act, as amended, (42 U.S.C. 1753, 1757, 1759a, 1766a) and sections 3 and 4(b) of the Child Nutrition Act, as amended, (42 U.S.C. 1772 and 42 U.S.C. 1773(b)).

Dated: September 10, 2019.

Pamilyn Miller,

Administrator, Food and Nutrition Service.

BILLING CODE 3410–30–C

DEPARTMENT OF AGRICULTURE

Rural Business-Cooperative Service

Information Collection Activity; Comment Request

AGENCY: Rural Business-Cooperative Service, Department of Agriculture.

ACTION: Proposed collection; comments requested.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995), this Notice announces the Rural Business-Cooperative Service intention to request an extension for a currently approved information collection for the Rural Microentrepreneur Assistance Program (RMAP).

DATES: Comments on this notice must be received by December 31, 2019 to be assured of consideration.

FOR FURTHER INFORMATION CONTACT: Director, Specialty Programs Division, Rural Business-Cooperative Service, U.S. Department of Agriculture, 1400 Independence Avenue SW, Washington, DC 20250–3226, Telephone (202) 720–1400

SUPPLEMENTARY INFORMATION:

Title: Rural Microentrepreneur Assistance Program.

OMB Number: 0570–0062.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: The purpose of the RMAP program is to support the development and ongoing success of rural microentrepreneurs and microenterprises. Direct loans and grants are made to selected Microenterprise Development Organizations (MDOs).

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 2.17 hours per response.

Respondents: Nonprofits, Indian Tribes, and Public Institutions of Higher Education.

Estimated Number of Respondents: 40.

Estimated Number of Responses per Respondent: 11.

Estimated Number of Responses: 804.

Estimated Total Annual Burden Hours on Respondents: 1,748.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (2) the accuracy of the Agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to Thomas P. Dickson, Rural Development Innovation Center—Regulatory Team 2, USDA, 1400 Independence Avenue SW, STOP 1522, South Building, Washington, DC 20250–1522. Telephone: (202) 690–4492. Email *thomas.dickson@usda.gov.* All comments received will be available for public inspection during regular business hours at the same address. All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record.

Bette B. Brand,

Administrator, Rural Business-Cooperative Service.

BILLING CODE P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meetings of the Nebraska Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Nebraska Advisory Committee (Committee) will hold a meeting on Friday November 15, 2019 at 2:00 p.m. Central time. The Committee will review testimony received and discuss a partial draft report on civil rights and prison conditions for incarcerated individuals who are also living with mental illness in Nebraska.

DATES: The meeting will take place on Friday November 15, 2019 at 2 p.m. Central.

FOR FURTHER INFORMATION CONTACT: Melissa Wojnaroski, DFO, at *mwojnaroski@usccr.gov* or (312) 353–8311.

SUPPLEMENTARY INFORMATION:

Public Call Information: Dial: 800–367–2403, Conference ID: 6135675.

Members of the public may listen to this discussion through the above call in number. An open comment period will be provided to allow members of the public to make a statement as time allows. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be mailed to the Regional Programs Unit, U.S. Commission on Civil Rights, 230 S Dearborn, Suite 2120, Chicago, IL 60604. They may also be faxed to the Commission at (312) 353–8324, or emailed to Corrine Sanders at *csanders@usccr.gov.* Persons who desire additional information may contact the Regional Programs Unit at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Unit Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Nebraska Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Unit at the above email or street address.

Agenda

Welcome and Roll Call
Civil Rights in Nebraska: Prisons and Mental Health
Future Plans and Actions

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

Census Bureau

Proposed Information Collection; Comment Request; Monthly Wholesale Trade Survey

AGENCY: U.S. Census Bureau, Department of Commerce.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a proposed extension of the Monthly Wholesale Trade Survey (0607–0190), as required by the Paperwork Reduction Act of 1995.

DATES: To ensure consideration, written comments must be submitted on or before December 31, 2019.

ADDRESSES: Direct all written comments to Thomas Smith, PRA Liaison, U.S. Census Bureau, 4600 Silver Hill Road, Room 7K250A, Washington, DC 20233 (or via the internet at *PRAcomments@doc.gov*). You may also submit comments, identified by Docket Number USBC–2019–0015, to the Federal e-Rulemaking Portal: *http://www.regulations.gov.* All comments received are part of the public record. No comments will be posted to *http://www.regulations.gov* for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Aidan Smith, U.S. Census Bureau, Room 6K081, Washington, DC 20233–6500, (301) 763–2972 (or via the internet at *aidan.d.smith@census.gov*).

SUPPLEMENTARY INFORMATION:

I. Abstract

The Monthly Wholesale Trade Survey (MWTS) provides a continuous measure of monthly sales, end-of-month inventories, and inventories/sales ratios in the United States by selected kinds of business for merchant wholesalers, excluding manufacturers' sales branches and offices. Estimates from the MWTS are released in three different reports each month. High level aggregate estimates for end-of-month inventories are first released as part of the Advance Economic Indicators Report approximately 25 to 29 calendar days after the close of the reference month. The full Monthly Wholesale Trade Report containing both sales and inventories estimates is released approximately 6 weeks after the close of the reference month. Sales and inventories estimates from the MWTS are also released as part of the Manufacturing and Trade Inventories and Sales (MTIS) report issued approximately 6 weeks after the close of the reference month. The Bureau of Economic Analysis uses this information to improve the inventory valuation adjustments applied to estimates of the Gross Domestic Product. The Bureau of Labor Statistics uses the data as input to develop Producer Price Indexes and productivity measurements.

Estimates produced from the MWTS are based on a probability sample and are published on the North American Industry Classification System (NAICS) basis. The sample of 4,200 small, medium, and large wholesale businesses reports monthly on sales and inventories. The sample is drawn from the Business Register, which contains all Employer Identification Numbers (EINs) and listed establishment locations. The sample is updated quarterly to reflect employer business ''births'' and ''deaths.'' New employer businesses identified in the Business and Professional Classification Survey are added and employer businesses determined to be no longer active are removed.

II. Method of Collection

We contact respondents initially by mailing them the MWTS form. Respondents have the option of reporting their data online, returning the paper form by fax or mail, or giving data by telephone. After initial contact, respondents have a choice to receive future correspondence by mailed form, faxed notice, or email. The email and faxed notices inform respondents that the online system is open for reporting for the specified reference month.

III. Data

OMB Control Number: 0607–0190.

Form Number(s): SM4217–A and SM4217–E.

Type of Review: Regular submission.

Affected Public: U.S. merchant wholesale firms, excluding manufacturers' sales branches and offices.

Estimated Number of Respondents: 4,200.

Estimated Time per Response: 7 minutes.

Estimated Total Annual Burden Hours: 5,880 hours.

Estimated Total Annual Cost to Public: $0. (This is not the cost of respondents' time, but the indirect costs respondents may incur for such things as purchases of specialized software or hardware needed to report, or expenditures for accounting or records maintenance services required specifically by the collection.)

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C. Sections 131 and 182.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

Departmental Lead PRA Officer, Office of the Chief Information Officer, Commerce Department.

Membership of the Departmental Performance Review Board

AGENCY: Department of Commerce.

ACTION: Notice of membership of the Departmental Performance Review Board.

SUMMARY: The Department of Commerce (DOC), announces the appointment of those individuals who have been selected to serve as members of the Departmental Performance Review Board. The Performance Review Board is responsible for (1) reviewing performance appraisals and ratings of Senior Executive Service (SES) members and (2) making recommendations to the appointing authority on other performance management issues, such as pay adjustments, bonuses and Presidential Rank Awards. The appointment of these members to the Performance Review Board will be for a period of twenty-four (24) months.

DATES: The period of appointment for those individuals selected for the Departmental Performance Review Board begins on November 1, 2019.

FOR FURTHER INFORMATION CONTACT: Joan Nagielski, U.S. Department of Commerce, Office of Human Resources Management, Department of Commerce Human Capital Client Services, Office of Employment and Compensation, 14th and Constitution Avenue NW, Room 50013, Washington, DC 20230, at (202) 482–6342.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 4314(c)(4), the Department of Commerce (DOC), announces the appointment of those individuals who have been selected to serve as members of the Departmental Performance Review Board. The Performance Review Board is responsible for (1) reviewing performance appraisals and ratings of Senior Executive Service (SES) members and (2) making recommendations to the appointing authority on other performance management issues, such as pay adjustments, bonuses and Presidential Rank Awards. The appointment of these members to the Performance Review Board will be for a period of twenty-four (24) months. The name, position title, and type of appointment of each member of the Performance Review Board are set forth below:

1. *Department of Commerce, Office of the Secretary (OS)*
   Renee Macklin, Director of Information Technology for Enterprise Services, Career SES
2. *Department of Commerce, Office of the General Counsel, Office of the Secretary (OGC/OS)*
   John Guenther, Chief, Employment and Labor Law Division, Career SES
3. *Department of Commerce, Economic Development Agency (EDA)*
   Gregory Brown, Chief Financial Officer and Chief Administrative Officer, Career SES
4. *Department of Commerce, U.S. Bureau of the Census*
   Lisa Blumerman, Chief, Office of Survey and Census Analytics, Career SES

Dated: October 29, 2019.

Joan Nagielski,

Human Resources Specialist, Office of Employment and Compensation, Department of Commerce Human Capital Client Services, Office of Human Resources Management, Office of the Secretary, Department of Commerce.

BILLING CODE 3510–03–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

Agency: U.S. Census Bureau.

Title: American Community Survey Methods Panel Tests, 2020 Specialized Mail Materials Test.

OMB Control Number: 0607–0936.

Form Number(s): ACS–1(X) (2020), ACS internet.

Type of Request: Non-Substantive Change Request.

Number of Respondents: 2,016,000.

Average Hours per Response: 40 minutes for the average household questionnaire.

Burden Hours: No additional burden hours are requested under this non-substantive change request.

Needs and Uses: The American Community Survey (ACS) collects detailed socioeconomic data from about 3.5 million housing units in the United States and 36,000 in Puerto Rico each year. The ACS also collects detailed socioeconomic data from about 195,000 residents living in Group Quarter (GQ) facilities. An ongoing data collection effort with an annual sample of this magnitude requires that the ACS continue research, testing, and evaluations aimed at reducing respondent burden, improving data quality, achieving survey cost efficiencies, and improving ACS questionnaire content and related data collection materials. The ACS Methods Panel is a research program designed to address and respond to issues and survey needs.

Households in sample for the ACS in 2020 are legally required to respond to both the ACS and the decennial census. Receiving two sets of mailings in one calendar year can be confusing to respondents, which can increase the perception that the ACS is burdensome and intrusive and decrease the rate of self-response. During the 2010 Census, ACS response rates were higher than usual in the first few months of the year but were lower than usual in the spring and summer months (Chesnut and Davis 2011, Baumgardner 2013). The increased response rates early in the year were attributed to the decennial census communications campaign while the decrease later in the year was attributed to respondent confusion or burden, as respondents had already filled out the decennial census form.

To mitigate these issues, a set of modified mail materials were developed with language that directly addresses the difference between the ACS and the 2020 Census, in order to differentiate the two. These materials will be used during the main response period for the 2020 Census, March through September. The language modifications in the 2020 ACS materials are based on an evaluation conducted by the Census Bureau in 2010 to examine the use of modified language, color, and branding to create a distinct identity for the ACS (Chesnut and Davis 2011). Additionally, cognitive interviews of the 2020 ACS modified materials were conducted in the fall of 2018.

In order to assess the effect of the modified messaging in the ACS materials the Census Bureau is proposing to conduct the 2020 Specialized Mail Materials Test. From March through September, the ACS will use mail materials that help clarify that these mailings are not for the 2020 Census. This will be the control treatment for the experiment and will be sent to approximately 264,000 sampled addresses each month. The experimental treatment will not contain the modified language but otherwise will be the same as the control materials. These materials will be sent to approximately 24,000 sampled addresses each month from March through September and will also be used for ACS production for the remainder of the year (January, February, and October through December).

Affected Public: Individuals or households.

Frequency: One-time test, over seven months.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13, United States Code, Sections 141, 193, and 221.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Sheleen Dumas,

Departmental Lead PRA Officer, Office of the Chief Information Officer, Commerce Department.

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis

[Docket Number 191028–0071]

RIN 0691–XC107

Request for Comment; Notice of Development of Economic Statistics for Puerto Rico

AGENCY: Bureau of Economic Analysis, Department of Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Bureau of Economic Analysis (BEA) is soliciting comments from the public on its new prototype Economic Statistics for Puerto Rico, which cover consumer spending, business investment, and trade in goods for Puerto Rico. BEA seeks comments on the statistics' methodology, presentation, level of detail, and scope. Following the public comment period, BEA will incorporate feedback, update the methodology and related materials for these economic statistics, and incorporate the revised prototype economic statistics into research to develop estimates of Puerto Rico GDP.

DATES: Comments must be received no later than December 2, 2019.

ADDRESSES: You may submit comments by the following methods:

• *Email: territories@bea.gov.*

• *Mail:* Sabrina Montes, Office of the Director, Bureau of Economic Analysis, Department of Commerce, 4600 Silver Hill Road (BE–40), Washington, DC 20233.

Comments sent by any other method or after the comment period may not be considered. All comments are a part of the public record.

FOR FURTHER INFORMATION CONTACT: Sabrina Montes, Office of the Director, Bureau of Economic Analysis, Department of Commerce, 4600 Silver Hill Road (BE–40), Washington, DC 20233; phone: (301) 278–9268 or email *Sabrina.Montes@bea.gov.*

SUPPLEMENTARY INFORMATION: In 2018, BEA initiated a project to calculate GDP for Puerto Rico in order to support Puerto Rico's economic recovery following devastating hurricanes in 2017. This project follows technical collaborations between BEA and the Commonwealth of Puerto Rico dating back to 2010. The project also responds to recommendations from the Congressional Task Force on Economic Growth in Puerto Rico and Government Accountability Office that BEA calculate GDP for Puerto Rico.

The present project—a collaborative effort between the Commonwealth of Puerto Rico and BEA—combines the best available Puerto Rico source data with BEA's current national accounting methodologies. The project seeks to produce accurate and objective economic statistics for Puerto Rico comparable to data for other U.S. territories, states, and the nation.

Methodological updates incorporated in the prototype statistics include:

• Using chain-type Fisher indexes to calculate changes in aggregate output and prices;

• Expanding the use of economic census data from the U.S. Census Bureau; and

• Treating expenditures on intangible assets as investment to allow users to understand how these intangible assets drive economic growth.

In October 2019, BEA published prototype estimates that incorporate these methodological updates for select GDP components for 2012–2017.

BEA is seeking feedback on its prototype statistics of consumer spending, business investment, and trade in goods for Puerto Rico. BEA will consider this feedback as it continues to refine source data, methodology, and data presentations before incorporating these measures into future prototype Puerto Rico GDP statistics.

BEA invites comments from the public; private industry; state, local, and territorial governments; non-profit organizations; and other interested parties to assist in improving the prototype statistics. In particular, BEA is interested in feedback regarding the following:

1. How will the statistics on consumer spending, business investment, and trade in goods for Puerto Rico be used?

2. Would an annual publication in May be useful? If not, what time of the year would be most valuable to inform planning and other uses?

3. Are the prototype estimates consistent with the data and local information that are available elsewhere on Puerto Rico? If not, please describe the differences.

4. Do you have any feedback about the methodology used to create the prototype Economic Statistics for Puerto Rico described in the October 2019 *Summary of Methodologies: Puerto Rico Personal Consumption Expenditures, Private Fixed Investment, and Net Exports of Goods* (available at *BEA.gov*)*?*

5. Are there additional or alternative source data that you believe could be used to generate and corroborate these statistics beyond those described in the October 2019 *Summary of Methodologies: Puerto Rico Personal Consumption Expenditures, Private Fixed Investment, and Net Exports of Goods* (available at *BEA.gov*)?

6. Which would be more useful: Less-detailed industry breakdowns, which will result in fewer data suppressions to protect confidentiality, or more-detailed industry breakdowns, with the necessary suppressions?

Authority: Chapter 5, Title 15 U.S.C.; 15 U.S.C. Section 1516; 13 U.S.C. Section 401 and 402.

Sabrina Montes,

Economist, Bureau of Economic Analysis.

International Trade Administration

[A–485–805]

Carbon and Alloy Seamless Standard, Line and Pressure Pipe (Under 4.5 Inches) From Romania: Partial Rescission of Antidumping Duty Administrative Review; 2018–2019

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is rescinding the administrative review, in part, of the antidumping duty order on carbon and alloy seamless standard, line and pressure pipe (under 4.5 inches) (small diameter seamless pipe) from Romania for the period August 1, 2018 through July 31, 2019.

DATES: Applicable November 1, 2019.

FOR FURTHER INFORMATION CONTACT: Katherine Johnson or Samantha Kinney, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4929 or 202–482–2285 respectively.

SUPPLEMENTARY INFORMATION:

Background

On October 7, 2019, based on a timely request for review of four companies by United States Steel Corporation (the petitioner),[1] Commerce published in the **Federal Register** a notice of initiation of an administrative review of the antidumping duty order on small diameter seamless pipe from Romania covering the period August 1, 2018, through July 31, 2019.[2]

On October 15, 2019, the petitioner withdrew its request for administrative review of SC TMK-Artrom S.A. (TMK-Artrom)[3] and SC Tubinox S.A. (Tubinox).[4] No other interested parties requested an administrative review.

Partial Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if the party that requested the review withdraws its request within 90 days of the publication of the notice of initiation of the requested review.

Because the petitioner's request for administrative review of TMK-Artrom and Tubinox was withdrawn within 90 days of the date of publication of the *Initiation Notice,* and no other interested party requested a review of these companies, Commerce is rescinding this review with respect to TMK-Artrom and Tubinox, in accordance with 19 CFR 351.213(d)(1). The administrative review remains active with respect to the two remaining companies for which a review was initiated, *i.e.,* ArcelorMittal Tubular Products Roman S.A. and Silcotub S.A.

Assessment

Commerce will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries at a rate equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, during the period August 1, 2018, through July 31, 2019, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions to CBP 15 days after the publication of this notice in the **Federal Register**, if appropriate.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Notification Regarding Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Tariff Act of 1930, as amended, and 19 CFR 351.213(d)(4).

Dated: October 28, 2019.

James Maeder,

Deputy Assistant Secretary, for Antidumping and Countervailing Duty Operations.

Certain Passenger Vehicle and Light Truck Tires From the People's Republic of China: Countervailing Duty Administrative Review, Correction of Notification of Rescission, in Part, 2017

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is correcting the rescission, in part, of the countervailing duty administrative review of passenger vehicle and light truck tires (passenger tires) from the People's Republic of China (China) for the period of review (POR) January 1, 2017, through December 31, 2017.

DATES: Applicable November 1, 2019.

FOR FURTHER INFORMATION CONTACT: Andrew Huston, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4261.

SUPPLEMENTARY INFORMATION: On October 18, 2019, Commerce published the *Preliminary Results* of the 2017 countervailing duty administrative review of passenger tires from China.[1] In the **Federal Register** notice, Commerce inadvertently included eight companies which had timely withdrawn their requests for review,[2] in accordance with 19 CFR 351.213(d)(1), in the list of non-selected companies under review. These companies are: Riversun Industry Limited, Haohua Orient International Trade Ltd., Windforce Tyre Co., Limited, Tyrechamp Group Co., Limited, Macho Tire Corporation Limited, Qingdao Lakesea Tyre Co., Ltd., Fleming Limited, and Safe & Well (HK) International Trading Limited. This notice serves as a correction that

Certain Malleable Cast Iron Pipe Fittings From the People's Republic of China: Final Results of Expedited Third Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of this sunset review, the Department of Commerce (Commerce) finds that revocation of the antidumping duty (AD) order on certain malleable cast iron pipe fittings from the People's Republic of China (China) would be likely to lead to continuation or recurrence of dumping at the dumping margins identified in the ''Final Results of Review'' section of this notice.

DATES: Applicable November 1, 2019].

FOR FURTHER INFORMATION CONTACT: Laura Griffith, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6430.

SUPPLEMENTARY INFORMATION:

Background

On July 1, 2019, Commerce published the notice of initiation of the third sunset review of the *Order* on malleable pipe fittings from China, pursuant to section 751(c)(2) of the Tariff Act of 1930, as amended (the Act).[1] On July 9, 2019, Commerce received a notice of intent to participate from the domestic interested parties within the deadline specified in 19 CFR 351.218(d)(1)(i).[2]

On July 31, 2019, Commerce received complete substantive responses from the domestic interested parties within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i).[3] We did not receive any responses from respondent interested parties in this proceeding. As a result, pursuant to 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited (120-day) sunset review of the *Order.*

Scope of the Order

The products covered by the *Order* are certain malleable iron pipe fittings, cast, other than grooved fittings, from the People's Republic of China. The merchandise is currently classifiable under item numbers 7307.19.30.60, 7307.19.30.85, 7307.19.90.30, 7307.19.90.60, 7307.19.90.80, and 7326.90.86.88 of the Harmonized Tariff Schedule of the United States (HTSUS). Excluded from the scope of this order are metal compression couplings, which are imported under HTSUS number 7307.19.90.80. A metal compression coupling consists of a coupling body, two gaskets, and two compression nuts. These products range in diameter from ½ inch to 2 inches and are carried only in galvanized finish. Although HTSUS subheadings are provided for convenience and customs purposes, Commerce's written description of the scope of the order is dispositive.

Analysis of Comments Received

Commerce addressed all issues raised in this sunset review in the Issues and Decision Memorandum, which is hereby adopted by this notice.[4] A list of the issues discussed in the Issues and Decision Memorandum is attached at Appendix. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov* and to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed at *http://enforcement.trade.gov/frn/.* The signed Issues and Decision Memorandum and the electronic version of the Issues and Decision Memorandum are identical in content.

Final Results of Review

Pursuant to sections 751(c)(1) and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the *Order* would be likely to lead to continuation or recurrence of dumping, and that the magnitude of the dumping margins likely to prevail would be weighted-average dumping margins up to 111.36 percent.

Notification Regarding Administrative Protective Order

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these results and notice in accordance with sections 751(c), 752, and 777(i)(1) of the Act and 19 CFR 351.218.

International Trade Administration

Initiation of Five-Year (Sunset) Reviews

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In accordance with the Tariff Act of 1930, as amended (the Act), the Department of Commerce (Commerce) is automatically initiating the five-year reviews (Sunset Reviews) of the antidumping and countervailing duty (AD/CVD) order(s) listed below. The International Trade Commission (the Commission) is publishing concurrently with this notice its notice of *Institution of Five-Year Reviews* which covers the same order(s).

DATES: Applicable (November 1, 2019).

FOR FURTHER INFORMATION CONTACT: Commerce official identified in the *Initiation of Review* section below at AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230. For information from the Commission, contact Mary Messer, Office of Investigations, U.S. International Trade Commission at (202) 205–3193.

SUPPLEMENTARY INFORMATION:

Background

Commerce's procedures for the conduct of Sunset Reviews are set forth in its *Procedures for Conducting Five-Year (Sunset) Reviews of Antidumping and Countervailing Duty Orders,* 63 FR 13516 (March 20, 1998) and 70 FR 62061 (October 28, 2005). Guidance on methodological or analytical issues relevant to Commerce's conduct of Sunset Reviews is set forth in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Duty Proceedings; Final Modification,* 77 FR 8101 (February 14, 2012).

Initiation of Review

In accordance with section 751(c) of the Act and 19 CFR 351.218(c), we are initiating the Sunset Reviews of the following antidumping and countervailing duty order(s):

DOC Case No.	ITC Case No.	Country	Product	Commerce Contact
A–570–996	731–TA–1238	China	Non-Oriented Electrical Steel (1st Review)	Matthew Renkey, (202) 482–2312.

A–401–809	731–TA–1242	Sweden	Non-Oriented Electrical Steel (1st Review)	Matthew Renkey, (202) 482–2312.
A–583–851	731–TA–1243	Taiwan	Non-Oriented Electrical Steel (1st Review)	Matthew Renkey, (202) 482–2312.
C–583–852	701–TA–508	Taiwan	Non-Oriented Electrical Steel (1st Review)	Joshua Poole, (202) 482–1293.

Filing Information

As a courtesy, we are making information related to sunset proceedings, including copies of the pertinent statute and Commerces's regulations, Commerce's schedule for Sunset Reviews, a listing of past revocations and continuations, and current service lists, available to the public on Commerce's website at the following address: *http://enforcement.trade.gov/sunset/.* All submissions in these Sunset Reviews must be filed in accordance with Commerce's regulations regarding format, translation, and service of documents. These rules, including electronic filing requirements via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), can be found at 19 CFR 351.303.[1]

Any party submitting factual information in an AD/CVD proceeding must certify to the accuracy and completeness of that information.[2] Parties must use the certification formats provided in 19 CFR 351.303(g).[3] Commerce intends to reject factual submissions if the submitting party does not comply with applicable revised certification requirements.

On April 10, 2013, Commerce modified two regulations related to AD/CVD proceedings: The definition of factual information (19 CFR 351.102(b)(21)), and the time limits for the submission of factual information (19 CFR 351.301).[4] Parties are advised to review the final rule, available at *http://enforcement.trade.gov/frn/2013/1304frn/2013-08227.txt,* prior to submitting factual information in these segments. To the extent that other regulations govern the submission of factual information in a segment (such as 19 CFR 351.218), these time limits will continue to be applied. Parties are also advised to review the final rule concerning the extension of time limits for submissions in AD/CVD proceedings, available at *http://enforcement.trade.gov/frn/2013/1309frn/2013-22853.txt,* prior to

[1] *See also Antidumping and Countervailing Duty Proceedings: Electronic Filing Procedures; Administrative Protective Order Procedures,* 76 FR 39263 (July 6, 2011).

[2] *See* section 782(b) of the Act.

[3] *See also Certification of Factual Information to Import Administration During Antidumping and Countervailing Duty Proceedings,* 78 FR 42678 (July 17, 2013) (*Final Rule*). Answers to frequently asked questions regarding the *Final Rule* are available at *http://enforcement.trade.gov/tlei/notices/factual_info_final_rule_FAQ_07172013.pdf.*

submitting factual information in these segments.[5]

Letters of Appearance and Administrative Protective Orders

Pursuant to 19 CFR 351.103(d), Commerce will maintain and make available a public service list for these proceedings. Parties wishing to participate in any of these five-year reviews must file letters of appearance as discussed at 19 CFR 351.103(d). To facilitate the timely preparation of the public service list, it is requested that those seeking recognition as interested parties to a proceeding submit an entry of appearance within 10 days of the publication of the Notice of Initiation. Because deadlines in Sunset Reviews can be very short, we urge interested parties who want access to proprietary information under administrative protective order (APO) to file an APO application immediately following publication in the **Federal Register** of this notice of initiation. Commerce's regulations on submission of proprietary information and eligibility to receive access to business proprietary information under APO can be found at 19 CFR 351.304–306.

Information Required From Interested Parties

Domestic interested parties, as defined in section 771(9)(C), (D), (E), (F), and (G) of the Act and 19 CFR 351.102(b), wishing to participate in a Sunset Review must respond not later than 15 days after the date of publication in the **Federal Register** of this notice of initiation by filing a notice of intent to participate. The required contents of the notice of intent to participate are set forth at 19 CFR 351.218(d)(1)(ii). In accordance with Commerce's regulations, if we do not receive a notice of intent to participate from at least one domestic interested party by the 15-day deadline, Commerce will automatically revoke the order without further review.[6]

If we receive an order-specific notice of intent to participate from a domestic interested party, Commerce's regulations provide that *all parties* wishing to participate in a Sunset Review must file complete substantive responses not later than 30 days after the date of publication in the **Federal Register** of this notice of initiation. The required contents of a substantive response, on an order-specific basis, are set forth at 19 CFR 351.218(d)(3). Note that certain information requirements differ for respondent and domestic parties. Also, note that Commerce's information requirements are distinct from the Commission's information requirements. Consult Commerce's regulations for information regarding Commerce's conduct of Sunset Reviews. Consult Commerce's regulations at 19 CFR part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at Commerce.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218(c).

Dated: October 22, 2019.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

International Trade Administration

[A–570–601]

Tapered Roller Bearings From the People's Republic of China: Rescission of Antidumping Duty Administrative Review; 2018–2019

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is rescinding its administrative review of the antidumping duty (AD) order on tapered roller bearings (TRBs) from the People's Republic of China (China) for the period June 1, 2018, through May 31, 2019, based on the timely withdrawal of all requests for review.

DATES: Applicable November 1, 2019.

FOR FURTHER INFORMATION CONTACT: Alex Wood, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1959.

SUPPLEMENTARY INFORMATION:

Background

On June 3, 2019, Commerce published in the **Federal Register** a notice of opportunity to request administrative review of the AD order on TRBs from China for the period June 1, 2018, through May 31, 2019.[1]

From June 27, 2019, to July 1, 2019, we received timely requests for review from Taizhou Zson Bearing Technology Co., Ltd. (Zson), Hangzhou Feiwang Auto Parts Co., Ltd. (Feiwang), Ningbo Xinglun Bearings Import & Export Co., Ltd. (Ningbo Xinglun), GGB Bearing Technology (Suzhou) Co., Ltd. (GGB), BRTEC Wheel Hub Bearing Co., Ltd. (BRTEC), Zhejiang Sihe Machine Co., Ltd. (Sihe), Zhejiang Sling Automobile Bearing Co., Ltd. (Sling), Changshan Peer Bearing Company, Ltd. (CPZ), and Shanghai General Bearing Co., Ltd. (SGBC).[2]

On July 29, 2019, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), Commerce published in the **Federal Register** a notice of initiation of an administrative review of the AD order.[3] The administrative review was initiated with respect to nine companies and covers the period June 1, 2018 through May 31, 2019. Subsequent to the initiation of the administrative review, each of the exporters in this proceeding timely withdrew their review requests, as discussed below.

Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if a party that requested a review withdraws its request within 90 days of the date of publication of notice of initiation of the requested review. In August 2019, Chinese exporters GGB, CPZ, SGBC, Sihe, Sling, and Ningbo Xinglun withdrew their requests for review within 90 days of the date of publication of the *Initiation Notice.*[4] In

[3] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 84 FR 36572 (July 29, 2019) (*Initiation Notice*).

[4] *See* GGB's Letter, ''Withdrawal of Request for Administrative Review of the Antidumping Duty Order on Tapered Roller Bearings from the People's Republic of China, A–570–601 (POR: 6/1/18–5/31/19),'' dated August 20, 2019; CPZ's Letter, ''Certain

September 2019, Chinese exporters BRTEC and Zson withdrew their requests for review within 90 days of the date of publication of the *Initiation Notice.*[5] Finally, in October 2019, Feiwang withdrew its request for review within 90 days of the publication of the *Initiation Notice.*[6] Accordingly, Commerce is rescinding this review in accordance with 19 CFR 353.213(d)(1), in its entirety.

Assessment

Commerce will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries. Antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions directly to CBP 15 days after the date of publication of this notice in the **Federal Register**.

Notification to Importers

This notice serves as a reminder to importers whose entries will be liquidated as a result of this rescission notice, of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement may result in the presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Notification Regarding Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

This notice is published in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(d)(4).

Dated: October 24, 2019.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Advance Notification of Sunset Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

Background

Every five years, pursuant to the Tariff Act of 1930, as amended (the Act), the Department of Commerce (Commerce) and the International Trade Commission automatically initiate and conduct reviews to determine whether revocation of a countervailing or antidumping duty order or termination of an investigation suspended under section 704 or 734 of the Act would be likely to lead to continuation or recurrence of dumping or a countervailable subsidy (as the case may be) and of material injury.

Upcoming Sunset Reviews for December 2019

Pursuant to section 751(c) of the Act, the following Sunset Reviews are scheduled for initiation in December 2019 and will appear in that month's *Notice of Initiation of Five-Year Sunset Reviews* (Sunset Review).

	Department contact
Antidumping Duty Proceedings	
Calcium Hypochlorite from China (A–570–008) (1st Review)	Matthew Renkey, (202) 482–2312
Carbon and Certain Alloy Steel Wire Rod from China (A–570–012) (1st Review)	Joshua Poole, (202) 482–1293
Electrolytic Manganese Dioxide from China (A–570–919) (2nd Review)	Matthew Renkey, (202) 482–2312
Lightweight Thermal Paper from China (A–580–872) (2nd Review)	Joshua Poole, (202) 482–1293
Countervailing Duty Proceedings	
Calcium Hypochlorite from China (C–570–009) (1st Review)	Matthew Renkey, (202) 482–2312
Carbon and Certain Alloy Steel Wire Rod from China (C–570–013) (1st Review)	Joshua Poole, (202) 482–1293
Lightweight Thermal Paper from China (A–580–872) (2nd Review)	Joshua Poole, (202) 482–1293
Suspended Investigations	
No Sunset Review of suspended investigations is scheduled for initiation in December 2019.	

Commerce's procedures for the conduct of Sunset Review are set forth in 19 CFR 351.218. The *Notice of Initiation of Five-Year* (*Sunset) Review* provides further information regarding what is required of all parties to participate in Sunset Review.

Pursuant to 19 CFR 351.103(c), Commerce will maintain and make available a service list for these proceedings. To facilitate the timely preparation of the service list(s), it is requested that those seeking recognition as interested parties to a proceeding contact Commerce in writing within 10 days of the publication of the Notice of Initiation.

Please note that if Commerce receives a Notice of Intent to Participate from a member of the domestic industry within

Tapered Roller Bearings and Parts Thereof from the People's Republic of China: Withdrawal of Request for Administrative Review,'' dated August 26, 2019; and SGBC's Letter, ''Certain Tapered Roller Bearings and Parts Thereof from the People's Republic of China: Withdrawal of Request for Administrative Review,'' dated August 26, 2019; Sihe and Sling's Letter, ''Tapered Roller Bearings from the People's Republic of China—Withdrawal of Requests for Administrative Review, dated August 28, 2019; Ningbo Xinglun's Letter, ''Tapered Roller Bearings from China: 2018–2019 Review; Withdrawal of Request for Administrative Review,'' dated August 30, 2019.

15 days of the date of initiation, the review will continue.

Thereafter, any interested party wishing to participate in the Sunset Review must provide substantive comments in response to the notice of initiation no later than 30 days after the date of initiation.

This notice is not required by statute but is published as a service to the international trading community.

Dated: October 22, 2019.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[FR Doc. 2019–23895 Filed 10–31–19; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

FOR FURTHER INFORMATION CONTACT: Brenda E. Brown, Office of AD/CVD Operations, Customs Liaison Unit, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, telephone: (202) 482–4735.

SUPPLEMENTARY INFORMATION:

Background

Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspended investigation, an interested party, as defined in section 771(9) of the Tariff Act of 1930, as amended (the Act), may request, in accordance with 19 CFR 351.213, that the Department of Commerce (Commerce) conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

All deadlines for the submission of comments or actions by Commerce discussed below refer to the number of calendar days from the applicable starting date.

Respondent Selection

In the event Commerce limits the number of respondents for individual examination for administrative reviews initiated pursuant to requests made for the orders identified below, Commerce intends to select respondents based on U.S. Customs and Border Protection (CBP) data for U.S. imports during the period of review. We intend to release the CBP data under Administrative Protective Order (APO) to all parties having an APO within five days of publication of the initiation notice and to make our decision regarding respondent selection within 21 days of publication of the initiation **Federal Register** notice. Therefore, we encourage all parties interested in commenting on respondent selection to submit their APO applications on the date of publication of the initiation notice, or as soon thereafter as possible. Commerce invites comments regarding the CBP data and respondent selection within five days of placement of the CBP data on the record of the review.

In the event Commerce decides it is necessary to limit individual examination of respondents and conduct respondent selection under section 777A(c)(2) of the Act:

In general, Commerce finds that determinations concerning whether particular companies should be ''collapsed'' (*i.e.,* treated as a single entity for purposes of calculating antidumping duty rates) require a substantial amount of detailed information and analysis, which often require follow-up questions and analysis. Accordingly, Commerce will not conduct collapsing analyses at the respondent selection phase of a review and will not collapse companies at the respondent selection phase unless there has been a determination to collapse certain companies in a previous segment of this antidumping proceeding (*i.e.,* investigation, administrative review, new shipper review or changed circumstances review). For any company subject to a review, if Commerce determined, or continued to treat, that company as collapsed with others, Commerce will assume that such companies continue to operate in the same manner and will collapse them for respondent selection purposes. Otherwise, Commerce will not collapse companies for purposes of respondent selection. Parties are requested to (a) identify which companies subject to review previously were collapsed, and (b) provide a citation to the proceeding in which they were collapsed. Further, if companies are requested to complete a Quantity and Value Questionnaire for purposes of respondent selection, in general each company must report volume and value data separately for itself. Parties should not include data for any other party, even if they believe they should be treated as a single entity with that other party. If a company was collapsed with another company or companies in the most recently completed segment of a proceeding where Commerce considered collapsing that entity, complete quantity and value data for that collapsed entity must be submitted.

Deadline for Withdrawal of Request for Administrative Review

Pursuant to 19 CFR 351.213(d)(1), a party that requests a review may withdraw that request within 90 days of the date of publication of the notice of initiation of the requested review. The regulation provides that Commerce may extend this time if it is reasonable to do so. Determinations by Commerce to extend the 90-day deadline will be made on a case-by-case basis.

Deadline for Particular Market Situation Allegation

Section 504 of the Trade Preferences Extension Act of 2015 amended the Act by adding the concept of particular market situation (PMS) for purposes of constructed value under section 773(e) of the Act.[1] Section 773(e) of the Act states that ''if a particular market situation exists such that the cost of materials and fabrication or other processing of any kind does not accurately reflect the cost of production in the ordinary course of trade, the administering authority may use another calculation methodology under this subtitle or any other calculation methodology.'' When an interested party submits a PMS allegation pursuant to section 773(e) of the Act, Commerce will respond to such a submission consistent with 19 CFR 351.301(c)(2)(v). If Commerce finds that a PMS exists under section 773(e) of the Act, then it will modify its dumping calculations appropriately.

Neither section 773(e) of the Act nor 19 CFR 351.301(c)(2)(v) set a deadline for the submission of PMS allegations and supporting factual information. However, in order to administer section 773(e) of the Act, Commerce must receive PMS allegations and supporting factual information with enough time to consider the submission. Thus, should an interested party wish to submit a PMS allegation and supporting new factual information pursuant to section 773(e) of the Act, it must do so no later than 20 days after submission of initial Section D responses.

Opportunity To Request a Review: Not later than the last day of November 2019,[2] interested parties may request

[1] *See* Trade Preferences Extension Act of 2015, Public Law 114–27, 129 Stat. 362 (2015).

[2] Or the next business day, if the deadline falls on a weekend, federal holiday or any other day when Commerce is closed.

administrative review of the following orders, findings, or suspended investigations, with anniversary dates in November for the following periods:

	Period of review
Antidumping Duty Proceedings

Suspension Agreements	
UKRAINE: Certain Cut-To-Length Carbon Steel Plate, A–823–808	11/1/18–10/31/19

In accordance with 19 CFR 351.213(b), an interested party as defined by section 771(9) of the Act may request in writing that the Secretary conduct an administrative review. For both antidumping and countervailing duty reviews, the interested party must specify the individual producers or exporters covered by an antidumping finding or an antidumping or countervailing duty order or suspension agreement for which it is requesting a review. In addition, a domestic interested party or an interested party described in section 771(9)(B) of the Act must state why it desires the Secretary to review those particular producers or exporters. If the interested party intends for the Secretary to review sales of merchandise by an exporter (or a producer if that producer also exports merchandise from other suppliers) which was produced in more than one country of origin and each country of origin is subject to a separate order, then the interested party must state specifically, on an order-by-order basis, which exporter(s) the request is intended to cover.

Note that, for any party Commerce was unable to locate in prior segments, Commerce will not accept a request for an administrative review of that party absent new information as to the party's location. Moreover, if the interested party who files a request for review is unable to locate the producer or exporter for which it requested the review, the interested party must provide an explanation of the attempts it made to locate the producer or exporter at the same time it files its request for review, in order for the Secretary to determine if the interested party's attempts were reasonable, pursuant to 19 CFR 351.303(f)(3)(ii).

As explained in *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties,* 68 FR 23954 (May 6, 2003), and *Non-Market Economy Antidumping*

Proceedings: Assessment of Antidumping Duties, 76 FR 65694 (October 24, 2011), Commerce clarified its practice with respect to the collection of final antidumping duties on imports of merchandise where intermediate firms are involved. The public should be aware of this clarification in determining whether to request an administrative review of merchandise subject to antidumping findings and orders.[3]

Commerce no longer considers the non-market economy (NME) entity as an exporter conditionally subject to an antidumping duty administrative review.[4] Accordingly, the NME entity will not be under review unless Commerce specifically receives a request for, or self-initiates, a review of the NME entity.[5] In administrative reviews of antidumping duty orders on merchandise from NME countries where a review of the NME entity has not been initiated, but where an individual exporter for which a review was initiated does not qualify for a separate rate, Commerce will issue a final decision indicating that the company in question is part of the NME entity. However, in that situation, because no review of the NME entity was conducted, the NME entity's entries were not subject to the review and the rate for the NME entity is not subject to change as a result of that review (although the rate for the individual exporter may change as a function of the finding that the exporter is part of the NME entity). Following initiation of an antidumping administrative review when there is no review requested of the NME entity, Commerce will instruct CBP to liquidate entries for all exporters not named in the initiation notice, including those that were suspended at the NME entity rate.

All requests must be filed electronically in Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS) on Enforcement and Compliance's ACCESS website at *http://access.trade.gov.*[6]

[3] *See also* the Enforcement and Compliance website at *http://trade.gov/enforcement/.*

[4] *See Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings,* 78 FR 65963 (November 4, 2013).

[5] In accordance with 19 CFR 351.213(b)(1), parties should specify that they are requesting a review of entries from exporters comprising the entity, and to the extent possible, include the names of such exporters in their request.

[6] *See Antidumping and Countervailing Duty Proceedings: Electronic Filing Procedures; Administrative Protective Order Procedures,* 76 FR 39263 (July 6, 2011).

Further, in accordance with 19 CFR 351.303(f)(l)(i), a copy of each request must be served on the petitioner and each exporter or producer specified in the request.

Commerce will publish in the **Federal Register** a notice of ''Initiation of Administrative Review of Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation'' for requests received by the last day of November 2019. If Commerce does not receive, by the last day of November 2019, a request for review of entries covered by an order, finding, or suspended investigation listed in this notice and for the period identified above, Commerce will instruct CBP to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

For the first administrative review of any order, there will be no assessment of antidumping or countervailing duties on entries of subject merchandise entered, or withdrawn from warehouse, for consumption during the relevant provisional-measures ''gap'' period of the order, if such a gap period is applicable to the period of review.

This notice is not required by statute but is published as a service to the international trading community.

Dated: October 24, 2019.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Open Meeting of the Information Security and Privacy Advisory Board

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice.

SUMMARY: The Information Security and Privacy Advisory Board (ISPAB) will meet Wednesday, December 4, 2019 from 9:00 a.m. until 5:00 p.m., Eastern Time, and Thursday, December 5, 2019 from 9:00 a.m. until 4:30 p.m., Eastern Time. All sessions will be open to the public, with no pre-registration required.

DATES: The meeting will be held on Wednesday, December 4, 2019, from 9:00 a.m. until 5:00 p.m., Eastern Time, and Thursday, December 5, 2019, from 9:00 a.m. until 4:30 p.m., Eastern Time.

ADDRESSES: The meeting will be held at American University College of Law, 4300 Nebraska Ave NW, Washington, DC 20016.

FOR FURTHER INFORMATION CONTACT: Jeff Brewer, Information Technology Laboratory, NIST, 100 Bureau Drive, Stop 8930, Gaithersburg, MD 20899–8930, Telephone: (301) 975–2489, email address: *jeffrey.brewer@nist.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. App., notice is hereby given that the ISPAB will meet Wednesday, December 4, 2019, from 9:00 a.m. until 5:00 p.m., Eastern Time, and Thursday, December 5, 2019 from 9:00 a.m. until 4:30 p.m. Eastern Time. All sessions will be open to the public. The ISPAB is authorized by 15 U.S.C. 278g–4, as amended, and advises the National Institute of Standards and Technology (NIST), the Secretary of Homeland Security, and the Director of the Office of Management and Budget (OMB) on information security and privacy issues pertaining to Federal government information systems, including thorough review of proposed standards and guidelines developed by NIST. Details regarding the ISPAB's activities are available at *https://csrc.nist.gov/projects/ispab.*

The agenda is expected to include the following items:

—Briefing on Testing and Conformance Programs used by the Federal Government,
—Briefing on work in Election Infrastructure Cybersecurity,
—Briefing on the Cybersecurity Solarium Report,
—Discussion by the Board on Cybersecurity and Privacy Issues in the Federal Government,
—Discussions by the Board on recent Legislative Proposals and GAO findings in Cybersecurity and Privacy.

Note that agenda items may change without notice. The final agenda will be posted on the website indicated above. Seating will be available for the public and media. Pre-registration is not required to attend this meeting.

Public Participation: The ISPAB agenda will include a period, not to exceed thirty minutes, for oral comments from the public (Wednesday, December 4, 2019, between 4:30 p.m. and 5:00 p.m.). Speakers will be selected on a first-come, first-served basis. Each speaker will be limited to five minutes. Questions from the public will not be considered during this period. Members of the public who are interested in speaking are requested to contact Jeff Brewer at the contact information indicated in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Speakers who wish to expand upon their oral statements, those who had wished to speak but could not be accommodated on the agenda, and those who were unable to attend in person are invited to submit written statements. In addition, written statements are invited and may be submitted to the ISPAB at any time. All written statements should be directed to the ISPAB Secretariat, Information Technology Laboratory, 100 Bureau Drive, Stop 8930, National Institute of Standards and Technology, Gaithersburg, MD 20899–8930.

Kevin A. Kimball,

Chief of Staff.

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's Bluefish Advisory Panel will hold a public meeting, jointly with the Atlantic States Marine Fisheries Commission's Bluefish Advisory Panel.

DATES: The meeting will be held on Tuesday, November 19, 2019, from 10 a.m. until 12 p.m.

ADDRESSES: The meeting will be held via webinar, which can be accessed at: *http://mafmc.adobeconnect.com/bfapnov19/.* Meeting audio can also be accessed via telephone by dialing 1–800–832–0736 and entering room number 5068609.

Council address: Mid-Atlantic Fishery Management Council, 800 N. State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The Mid-Atlantic Fishery Management Council's Bluefish Advisory Panel, together with the Atlantic States Marine Fisheries Commission's Bluefish Advisory Panel, will meet on Tuesday, November 19, 2019. The purpose of this meeting is to provide comments and recommendations on recreational management measures for bluefish for the 2020 fishing year. A detailed agenda and background documents will be made available on the Council's website (*www.mafmc.org*) prior to the meeting.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to M. Jan Saunders, (302) 526–5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 29, 2019.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

[RTID 0648–XV121]

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Scallop Committee to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Wednesday, November 20, 2019 at 8:30 a.m.

ADDRESSES:

Meeting address: The meeting will be held at the Hilton Providence, 21 Atwells Avenue, Providence, RI 02903; phone: (401) 831–3900.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Scallop Committee will review Framework 32 (FW 32): specifically, a review of specifications alternatives in FW 32 and make final recommendations. FW 32 will set specifications including acceptable biological catch/annual catch limit (ABC/ACLs), days-at-sea (DAS), access area allocations for Limited Access (LA) and Limited Access General Category (LAGC), Total Allowable Catch (TAC) for Northern Gulf of Maine (NGOM) management area, target-TAC for LAGC incidental catch and set-asides for the observer and research programs for fishing year 2020 and default specifications for fishing year 2021. They will also review options for mitigating impacts on Georges Bank yellowtail flounder and make final recommendations. The committee plans to discuss Amendment 21 and the group may be asked to review progress from the Plan Development Team on Committee tasking from the September 2019 Committee meeting. Other business may be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date. This meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 29, 2019.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[RTID 0648–XX017]

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments; correction.

SUMMARY: NMFS is correcting a notice that informed the public that the Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS, has made a preliminary determination that an application submitted by the Cape Cod Commercial Fishermen's Alliance for an exempted fishing permit contains all of the required information and warrants further consideration. The proposed active date of the exempted fishing permit was incorrect.

DATES: Comments must be received on or before November 5, 2019.

ADDRESSES: You may submit written comments by either of the following methods:

• *Email: nmfs.gar.efp@noaa.gov.* Include in the subject line ''6–INCH MESH CODEND EM EFP.''

• *Mail:* Michael Pentony, Regional Administrator, NMFS, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope ''6–INCH MESH CODEND EM EFP.''

FOR FURTHER INFORMATION CONTACT: Spencer Talmage, Fishery Management Specialist, 978–281–9232.

SUPPLEMENTARY INFORMATION: On October 21, 2019, NMFS published a notification that informed the public that the Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS, made a preliminary determination that an application submitted by the Cape Cod Commercial Fishermen's Alliance for an exempted fishing permit (EFP) contains all of the required information and warrants further consideration. The document incorrectly listed the active period for the EFP as January 1, 2019, through April 30, 2019, instead of the correct active period of January 1, 2020, through April 30, 2020. This correction does not change the scope or impact of the proposed EFP. This correction is necessary to provide interested parties the opportunity to comment on the application with correct and complete information.

Correction

In the **Federal Register** of October 21, 2019, in FR Doc 2019–22854, on page 56181, column 3, in the first full paragraph, the third sentence is corrected to read as follows: ''The EFP would be active from January 1, 2020, through April 30, 2020.''

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 29, 2019.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's (Council) Research Steering Committee will hold a meeting.

DATES: The meeting will be held on Friday, November 22, 2019, from 10 a.m. to 12 p.m. See **SUPPLEMENTARY INFORMATION** for agenda details.

ADDRESSES: The meeting will take place over webinar with a telephone-only connection option. Details on how to connect to the webinar by computer and by telephone will be available at: *http://www.mafmc.org.*

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; website: *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is for the Research Steering Committee to review and provide feedback on the Council's draft Five-Year (2020–24) Research Priorities document. The draft document has been re-organized and prioritized based on feedback and input from the Council's Scientific and Statistical Committee (SSC), Monitoring Committees and Advisory Panels. Research Steering Committee recommendations will be incorporated into the draft document and provided to the Council prior to the December 2019 Council meeting when final review and approval is scheduled to take place.

A detailed agenda and background documents will be made available on the Council's website (*www.mafmc.org*) prior to the meeting.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to M. Jan Saunders, (302) 526–5251, at least 5 days prior to the meeting date.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–PR–A003 X

Marine Mammals; File No. 22629

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public hearing.

SUMMARY: Notice is hereby given that the NMFS Office of Protected Resources will hold a public hearing related to a permit application (File No. 22629) submitted by Mystic Aquarium (Responsible Party: Stephen M. Coan, Ph.D.) to import five beluga whales (*Delphinapterus leucas*) for scientific research purposes.

DATES: The public hearing will be held from 1 p.m. to 3 p.m. (local time) on November 18, 2019.

ADDRESSES: The public hearing will be held in the Great Hall (1st Floor) at the Silver Spring Civic Center, 1 Veterans Place, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Amy Sloan, Courtney Smith, or Jennifer Skidmore, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

On October 1, 2019, NMFS published notice of receipt of a permit application submitted by Mystic Aquarium to import five captive-born beluga whales for scientific research purposes (84 FR 52072). The permit application, **Federal Register** notice of receipt of the application, and information on how to submit written comments are available online at *https://www.fisheries.noaa.gov/action/permit-application-import-5-beluga-whales-scientific-research-file-no-22629-mystic-aquarium.* The public comment period ends on December 2, 2019.

Public Hearing

The public hearing will begin with a brief presentation by NMFS describing the permit application and decision process. Following the presentation, members of the public will have the opportunity to provide oral comments regarding the permit application and may also submit written comments at the hearing. Any interested person may appear in person, or through representatives, and may submit any relevant material, data, views, or comments. A record of the hearing will be kept. All personal identifying information (*e.g.,* name, address, *etc.*), confidential business information, or otherwise sensitive information submitted voluntarily by the commenter will be publicly accessible.

Reasonable Accommodations

People needing accommodations so that they may attend and participate at the public hearings should submit a request for reasonable accommodations as soon as possible, and no later than 7 business days prior to the hearing date, by contacting Jennifer Skidmore at (301) 427–8401.

Authority: 16 U.S.C. 1374.

Dated: October 29, 2019.

Julia Marie Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XV122]

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Scallop Advisory Panel to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Tuesday, November 19, 2019 at 8:30 a.m.

ADDRESSES:

Meeting address: The meeting will be held at the Hilton Providence, 21 Atwells Avenue, Providence, RI 02903; phone: (401) 831–3900.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Scallop Advisory Panel will review Framework 32 (FW 32): Specifically, a review of specifications alternatives in FW 32 and make final recommendations. FW 32 will set specifications including acceptable biological catch/annual catch limit (ABC/ACLs), days-at-sea (DAS), access area allocations for Limited Access (LA) and Limited Access General Category (LAGC), Total Allowable Catch (TAC) for Northern Gulf of Maine (NGOM) management area, target-TAC for LAGC incidental catch and set-asides for the observer and research programs for fishing year 2020 and default specifications for fishing year 2021. They will also review options for mitigating impacts on Georges Bank yellowtail flounder and make final recommendations. The panel plans to discuss Amendment 21 and the group may be asked to review progress from the Plan Development Team on Committee tasking from the September 2019 Committee meeting. Other business may be discussed as necessary.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date. This meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 29, 2019.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to and deletions from the Procurement List.

SUMMARY: This action adds services to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes products and services from the Procurement List previously furnished by such agencies.

DATES: *Date added to and deleted from the Procurement List:* December 1, 2019.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202–4149.

FOR FURTHER INFORMATION CONTACT: Michael R. Jurkowski, Telephone: (703) 603–2117, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION:

Additions

On 8/23/2019, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the services and impact of the additions on the current or most recent contractors, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.
2. The action will result in authorizing small entities to furnish the services to the Government.
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the services proposed for addition to the Procurement List.

End of Certification

Accordingly, the following services are added to the Procurement List:

Services

Service Type: Janitorial Service
Mandatory for: US Coast Guard, USCG Training Center, Petaluma, CA
Mandatory for: US Coast Guard, USCG Pacific Strike Team, Novato, CA
Mandatory Source of Supply: North Bay Rehabilitation Services, Inc., Rohnert Park, CA
Contracting Activity: U.S. COAST GUARD, SILC BSS(00084)
Service Type: Transportation Maintenance and Operations Services
Mandatory for: US Navy, MCIEast, MCB Camp Lejeune (including MCAS New River), Camp Lejeune, NC
Mandatory Source of Supply: Skookum Educational Programs, Bremerton, WA
Contracting Activity: Dept of the Navy, Commanding General

Deletions

On 9/27/2019, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products and services listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.
2. The action may result in authorizing small entities to furnish the services to the Government.
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products and services deleted from the Procurement List.

End of Certification

Accordingly, the following products and services are deleted from the Procurement List:

Products

NSNs—Product Names:
7510–01–435–9775—Micro-Cell Stamp Pad, Size #1 2¾ × 4½, Red

DEPARTMENT OF DEFENSE

Department of the Army

Board of Visitors for the Western Hemisphere Institute for Security Cooperation Meeting Notice

AGENCY: Department of the Army, DoD.

ACTION: Notice of open meeting.

SUMMARY: The Department of the Army is publishing this notice to announce the following Federal advisory committee meeting of the Board of Visitors for the Western Hemisphere Institute for Security Cooperation (WHINSEC). This meeting is open to the public.

DATES: The WHINSEC Board of Visitors will meet from 9:00 a.m. to 4:00 p.m. on Thursday, November 7, 2019.

ADDRESSES: Western Hemisphere Institute for Security Cooperation, Bradley Hall, 7301 Baltzell Avenue, Building 396, Fort Benning, GA 31905.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Procell, Acting Executive Secretary for the Committee, in writing at USACGSC, 100 Stimson Avenue, Fort Leavenworth, KS 66027–2301, by email at *richard.d.procell2.civ@mail.mil,* or by telephone at (913) 684–2963.

SUPPLEMENTARY INFORMATION: The committee meeting is being held under the provisions of the Federal Advisory

Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), 41 CFR 102–3.140(c), and 41 CFR 102–3.150. Due to circumstances beyond the control of the Department of Defense (DoD) and the Designated Federal Officer, the Western Hemisphere Institute for Security Cooperation Board of Visitors was unable to provide sufficient public notification required by 41 CFR 102–3.150(a) concerning its annual meeting scheduled for November 7, 2019. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

Purpose of the Meeting: The Western Hemisphere Institute for Security Cooperation (WHINSEC) Board of Visitors (BoV) is a non-discretionary Federal Advisory Committee chartered to provide the Secretary of Defense, through the Secretary of the Army, independent advice and recommendations on matters pertaining to the curriculum, instruction, physical equipment, fiscal affairs, and academic methods of the institute; other matters relating to the institute that the board decides to consider; and other items that the Secretary of Defense determines appropriate. The board reviews curriculum to determine whether it adheres to current U.S. doctrine, complies with applicable U.S. laws and regulations, and is consistent with U.S. policy goals toward Latin America and the Caribbean. The board also determines whether the instruction under the curriculum of the institute appropriately emphasizes human rights, the rule of law, due process, civilian control of the military, and the role of the military in a democratic society. The Secretary of Defense may act on the committee's advice and recommendations.

Agenda: Status briefing from the institute's commandant; updates from the Department of State, U.S. Northern Command and U.S. Southern Command; a public comments period; and presentation of other information appropriate to the board's interests.

Public Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b, as amended, and 41 CFR 102–3.140 through 102–3.165, and subject to the availability of space, this meeting is open to the public. A 15-minute period between 11:15 to 11:45 will be available for verbal public comments. Seating is on a first to arrive basis. Attendees are requested to submit their name, affiliation, and daytime phone number seven business days prior to the meeting to Mr. Procell, via electronic mail, the preferred mode of submission, at the address listed in the **FOR FURTHER INFORMATION CONTACT** section. Because the meeting of the committee will be held in a Federal Government facility on a military base, security screening is required. A photo ID is required to enter the base. Please note that security and gate guards have the right to inspect vehicles and persons seeking to enter and exit the installation. Bradley Hall is fully handicap accessible. Wheelchair access is available in front at the main entrance of the building. For additional information about public access procedures, contact Mr. Procell at the email address or telephone number listed in the **FOR FURTHER INFORMATION CONTACT** section.

Written Comments and Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the committee, in response to the stated agenda of the open meeting or in regard to the committee's mission in general. Written comments or statements should be submitted to Mr. Procell, via electronic mail, the preferred mode of submission, at the address listed in the **FOR FURTHER INFORMATION CONTACT** section. Each page of the comment or statement must include the author's name, title or affiliation, address, and daytime phone number. Written comments or statements being submitted in response to the agenda set forth in this notice must be received at least two business days prior to the meeting to be considered by the committee. The Designated Federal Officer will review all timely submitted written comments or statements with the committee chairperson, and ensure the comments are provided to all members of the committee before the meeting. Written comments or statements received after this date will be filed and presented to the committee during its next meeting.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 5001–03–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Board of Regents, Uniformed Services University of the Health Sciences; Notice of Federal Advisory Committee Meeting

AGENCY: Under Secretary of Defense for Personnel and Readiness (USD(P&R)), Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the Board of Regents, Uniformed Services University of the Health Sciences, will take place.

DATES: Tuesday, November 5, 2019 open to the public from 8:00 a.m. to 11:05 a.m. The closed session will follow from approximately 11:15 a.m. to 12:00 p.m.

ADDRESSES: Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Bethesda, MD 20814.

FOR FURTHER INFORMATION CONTACT: Sarah Marshall, Designated Federal Officer, at (301) 295–3955 or *sarah.marshall@usuhs.edu.* Mailing address is 4301 Jones Bridge Road, Bethesda, MD 20814. Website: *https://www.usuhs.edu/vpe/bor.*

SUPPLEMENTARY INFORMATION: Due to circumstances beyond the control of the Department of Defense and the Designated Federal Officer, the Board of Regents, Uniformed Services University of the Health Sciences, was unable to provide public notification required by 41 CFR 102–3.150(a), concerning the meeting on November 5, 2019 of the Board of Regents, Uniformed Services University of the Health Sciences. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) (5 U.S.C., Appendix), the Government in the Sunshine Act (5 U.S.C. 552b), and 41 CFR 102–3.140 and 102–3.150.

Purpose of the Meeting: The purpose of the meeting is to provide advice and recommendations to the Secretary of Defense, through the USD(P&R), on academic and administrative matters critical to the full accreditation and successful operation of USU. These actions are necessary for USU to pursue its mission, which is to educate, train and comprehensively prepare uniformed services health professionals, officers, scientists, and leaders to support the Military and Public Health Systems, the National Security and National Defense Strategies of the United States, and the readiness of our Uniformed Services.

Agenda: The actions scheduled to occur include the review of any administrative matters of general consent (*e.g.,* degree conferrals, faculty appointments and promotions, award recommendations, etc.) that may have been electronically voted on since the previous Board meeting on August 6, 2019; Board actions, to include recommendations for degree conferrals, faculty appointments and promotions, and faculty awards presented by the deans of USU's schools and colleges; a report by the USU President on recent actions affecting academic and operational aspects of USU; a member report covering an academics summary (consisting of reports from the University Registrar, the Office of Accreditation and Organizational Assessment, and the Faculty Senate); a member report covering a finance and administration summary (consisting of reports from the Office of Finance and Administration, the Office of Information and Education Technology, the Office of General Counsel, and the Henry M. Jackson Foundation for the Advancement of Military Medicine); and additional reports from the Hébert School of Medicine, the Inouye Graduate School of Nursing, the Postgraduate Dental College, and the College of Allied Health Sciences. A closed session will be held following the open session to discuss active investigations and personnel actions.

Meeting Accessibility: Pursuant to Federal statutes and regulations (5 U.S.C. Appendix, 5 U.S.C. 552b, and 41 CFR 102–3.140 through 102–3.165) and the availability of space, the meeting is open to the public from 8:00 a.m. to 11:05 a.m. Seating is on a first-come basis. Members of the public wishing to attend the meeting should contact Ms. Marshall no later than five business days prior to the meeting at the address and phone number noted in the **FOR FURTHER INFORMATION CONTACT** section. Pursuant to 5 U.S.C. 552b(c)(2, 5–7), the DoD has determined that the portion of the meeting from 11:15 a.m. to 12:00 p.m. shall be closed to the public. The USD(P&R), in consultation with the DoD Office of General Counsel, has determined in writing that this portion of the Board's meeting will be closed as the discussion will disclose sensitive personnel information, will include matters that relate solely to the internal personnel rules and practices of the agency, will involve allegations of a person having committed a crime or censuring an individual, and may disclose investigatory records compiled for law enforcement purposes.

Written Statements: Pursuant to section 10(a)(3) of the FACA and 41 CFR 102–3.140, the public or interested organizations may submit written comments to the Board about its approved agenda pertaining to this meeting or at any time regarding the Board's mission. Individuals submitting a written statement must submit their statement to Designated Federal Officer at the address listed in the **FOR FURTHER INFORMATION CONTACT** section. Written statements that do not pertain to a scheduled meeting of the Board may be submitted at any time. If individual comments pertain to a specific topic being discussed at the planned meeting, then these statements must be received at least five calendar days prior to the meeting. Otherwise, the comments may not be provided to or considered by the Board until a later date. The Designated Federal Officer will compile all timely submissions with the Board's Chair and ensure such submissions are provided to Board Members before the meeting.

Dated: October 29, 2019.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

2019–2020 Award Year Deadline Dates for Reports and Other Records Associated With the Free Application for Federal Student Aid (FAFSA), the Federal Supplemental Educational Opportunity Grant Program (FSEOG), the Federal Work-Study (FWS) Programs, the Federal Pell Grant (Pell Grant) Program, the William D. Ford Federal Direct Loan (Direct Loan) Program, the Teacher Education Assistance for College and Higher Education (TEACH) Grant Program, and the Iraq and Afghanistan Service Grant Program

AGENCY: Federal Student Aid, Department of Education.

ACTION: Notice.

SUMMARY: The Secretary announces deadline dates for the receipt of documents and other information from applicants and institutions participating in certain Federal student aid programs authorized under title IV of the Higher Education Act of 1965, as amended (HEA), for the 2019–2020 award year. These programs, administered by the U.S. Department of Education (Department), provide financial assistance to students attending eligible postsecondary educational institutions to help them pay their educational costs. The Federal student aid programs (title IV, HEA programs) covered by this deadline date notice are the Pell Grant, Direct Loan, TEACH Grant, Iraq and Afghanistan Service Grant, and campus-based (FSEOG and FWS) programs.

DATES:

Deadline and Submission Dates: See Tables A and B at the end of this notice.

FOR FURTHER INFORMATION CONTACT: Bruce Hughes, U.S. Department of Education, Federal Student Aid, 830 First Street NE, Union Center Plaza, 11th Floor, Washington, DC 20202–5345. Telephone: (202) 377–3882. Email: *Bruce.Hughes@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service, toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Catalog of Federal Domestic Assistance (CFDA) Numbers: 84.007 FSEOG Program; 84.033 FWS Program; 84.063 Pell Grant Program; 84.268 Direct Loan Program; 84.379 TEACH Grant Program; 84.408 Iraq and Afghanistan Service Grant Program.

Table A—2019–2020 Award Year Deadline Dates by Which a Student Must Submit the FAFSA, by Which the Institution Must Receive the Student's Institutional Student Information Record (ISIR) or Student Aid Report (SAR), and by Which the Institution Must Submit Verification Outcomes for Certain Students.

Table A provides information and deadline dates for receipt of the FAFSA, corrections to and signatures for the FAFSA, ISIRs, and SARs, and verification documents.

The deadline date for the receipt of a FAFSA by the Department's Central Processing System is June 30, 2020, regardless of the method that the applicant uses to submit the FAFSA. The deadline date for the receipt of a signature page for the FAFSA (if required), corrections, notices of change of address or institution, or requests for a duplicate SAR is September 12, 2020.

For all title IV, HEA programs, an ISIR or SAR for the student must be received by the institution no later than the student's last date of enrollment for the 2019–2020 award year or September 19, 2020, whichever is earlier. Note that a FAFSA must be submitted and an ISIR or SAR received for the dependent student for whom a parent is applying for a Direct PLUS Loan.

Except for students selected for Verification Tracking Groups V4 and

V5, verification documents must be received by the institution no later than 120 days after the student's last date of enrollment for the 2019–2020 award year or September 19, 2020, whichever is earlier. For students selected for Verification Tracking Groups V4 and V5, institutions must submit identity and high school completion status verification results no later than 60 days following the institution's first request to the student to submit the documentation.

For all title IV, HEA programs except for (1) Direct PLUS Loans that will be made to parent borrowers, and (2) Direct Unsubsidized Loans that will be made to dependent students who have been determined by the institution, pursuant to section 479A(a) of the HEA, to be eligible for such a loan without providing parental information on the FAFSA, the ISIR or SAR must have an official expected family contribution (EFC) and the ISIR or SAR must be received by the institution no later than the earlier of the student's last date of enrollment for the 2019–2020 award year or September 19, 2020. For the two exceptions mentioned above, the ISIR or SAR must be received by the institution by the same dates noted in this paragraph but the ISIR or SAR is not required to have an official EFC.

For a student who is requesting aid through the Pell Grant, FSEOG, or FWS programs or for a student requesting Direct Subsidized Loans, who does not meet the conditions for a late disbursement under 34 CFR 668.164(j), a valid ISIR or valid SAR must be received by the institution by the student's last date of enrollment for the 2019–2020 award year or September 19, 2020, whichever is earlier.

In accordance with 34 CFR 668.164(j)(4)(i), an institution may not make a late disbursement of title IV, HEA program funds later than 180 days after the date of the institution's determination that the student was no longer enrolled. Table A provides that, to make a late disbursement of title IV, HEA program funds, an institution must receive a valid ISIR or valid SAR no later than 180 days after its determination that the student was no longer enrolled, but not later than September 19, 2020.

Table B—2019–2020 Award Year Pell Grant, Iraq and Afghanistan Service Grant, Direct Loan, and TEACH Grant Programs Deadline Dates for Disbursement by Institutions.

For the Pell Grant, Iraq and Afghanistan Service Grant, Direct Loan, and TEACH Grant programs, Table B provides the earliest disbursement date, the earliest dates for institutions to submit disbursement records to the Department's Common Origination and Disbursement (COD) System, and deadline dates by which institutions must submit disbursement and origination records.

An institution must submit Pell Grant, Iraq and Afghanistan Service Grant, Direct Loan, and TEACH Grant disbursement records to COD, no later than 15 days after making the disbursement or becoming aware of the need to adjust a previously reported disbursement. In accordance with 34 CFR 668.164(a), title IV, HEA program funds are disbursed on the date that the institution: (a) Credits those funds to a student's account in the institution's general ledger or any subledger of the general ledger; or (b) pays those funds to a student directly. Title IV, HEA program funds are disbursed even if an institution uses its own funds in advance of receiving program funds from the Department.

An institution's failure to submit disbursement records within the required timeframe may result in the Department rejecting all or part of the reported disbursement. Such failure may also result in an audit or program review finding or the initiation of an adverse action, such as a fine or other penalty for such failure, in accordance with subpart G of the General Provisions regulations in 34 CFR part 668.

Deadline Dates for Enrollment Reporting by Institutions.

In accordance with 34 CFR 674.19(f), 682.610(c), 685.309(b), and 690.83(b)(2), upon receipt of an enrollment report from the Secretary, institutions must update all information included in the report and return the report to the Secretary in a manner and format prescribed by the Secretary and within the timeframe prescribed by the Secretary. Consistent with the *National Student Loan Data System (NSLDS) Enrollment Reporting Guide,* the Secretary has determined that institutions must report at least every two months. Institutions may find the *NSLDS Enrollment Reporting Guide* on the Information for Financial Aid Professionals website at *https://ifap.ed.gov.*

Other Sources for Detailed Information.

We publish a detailed discussion of the FAFSA application process in the Application and Verification Guide volume of the 2019–2020 *Federal Student Aid Handbook* and in the 2019–2020 *ISIR Guide.*

Information on the institutional reporting requirements for the Pell Grant, Iraq and Afghanistan Service Grant, Direct Loan, and TEACH Grant programs is included in the 2019–2020 *Common Origination and Disbursement (COD) Technical Reference.* Also, see the *NSLDS Enrollment Reporting Guide.*

Dated: October 25, 2019.

Mark A. Brown,

Chief Operating Officer, Federal Student Aid.

TABLE A—2019–2020 AWARD YEAR DEADLINE DATES BY WHICH A STUDENT MUST SUBMIT THE FAFSA, BY WHICH THE INSTITUTION MUST RECEIVE THE STUDENT'S INSTITUTIONAL STUDENT INFORMATION RECORD (ISIR) OR STUDENT AID REPORT (SAR), AND BY WHICH THE INSTITUTION MUST SUBMIT VERIFICATION OUTCOMES FOR CERTAIN STUDENTS

Who submits?	What is submitted?	Where is it submitted?	What is the deadline date for receipt?
Student	FAFSA—''FAFSA on the Web'' (original or renewal).	Electronically to the Department's Central Processing System (CPS).	June 30, 2020 [1].
	Signature page (if required)	To the address printed on the signature page	September 12, 2020.
Student through an Institution.	An electronic FAFSA (original or renewal)	Electronically to the Department's CPS using ''Electronic Data Exchange'' (EDE) or ''FAA Access to CPS Online''.	June 30, 2020 [1].
Student	A paper original FAFSA	To the address printed on the FAFSA	June 30, 2020.
Student	Electronic corrections to the FAFSA using ''Corrections on the Web''.	Electronically to the Department's CPS	September 12, 2020 [1].
	Signature page (if required)	To the address printed on the signature page	September 12, 2020.
Student through an Institution.	Electronic corrections to the FAFSA	Electronically to the Department's CPS using EDE or ''FAA Access to CPS Online''.	September 12, 2020 [1].
Student	Paper corrections to the FAFSA using a SAR, including change of mailing and email addresses and change of institutions.	To the address printed on the SAR	September 12, 2020.
Student	Change of mailing and email addresses, change of institutions, or requests for a duplicate SAR.	To the Federal Student Aid Information Center by calling 1–800–433–3243.	September 12, 2020.
Student	A SAR with an official EFC calculated by the Department's CPS, except for Parent PLUS Loans and Direct Unsubsidized Loans made to a dependent student under HEA section 479A(a), for which the SAR does not need to have an official EFC.	To the institution	The earlier of: —The student's last date of enrollment for the 2019–2020 award year; or —September 19, 2020 [2].
Student through CPS	An ISIR with an official EFC calculated by the Department's CPS, except for Parent PLUS Loans and Direct Unsubsidized Loans made to a dependent student under HEA section 479A(a), for which the ISIR does not need to have an official EFC.	To the institution from the Department's CPS.	
Student	Valid SAR (Pell Grant, FSEOG, FWS, and Direct Subsidized Loans).	To the institution	Except for a student meeting the conditions for a late disbursement under 34 CFR 668.164(j), the earlier of: —The student's last date of enrollment for the 2019–2020 award year; or —September 19, 2020 [2].
Student through CPS	Valid ISIR (Pell Grant, FSEOG, FWS, and Direct Subsidized Loans).	To the institution from the Department's CPS.	
Student	Valid SAR (Pell Grant, FSEOG, FWS, and Direct Subsidized Loans).	To the institution	For a student receiving a late disbursement under 34 CFR 668.164(j)(4)(i), the earlier of: —180 days after the date of the institution's determination that the student withdrew or otherwise became ineligible; or —September 19, 2020 [2].
Student through CPS	Valid ISIR (Pell Grant, FSEOG, FWS, and Direct Subsidized Loans).	To the institution from the Department's CPS.	
Student	Verification documents	To the institution	The earlier of: [3] —120 days after the student's last date of enrollment for the 2019–2020 award year; or —September 19, 2020 [2].
Institution	Identity and high school completion verification results for a student selected for verification by the Department and placed in Verification Tracking Group V4 or V5.	Electronically to the Department's CPS using ''FAA Access to CPS Online''.	60 days following the institution's first request to the student to submit the required V4 or V5 identity and high school completion documentation [4].

[1] The deadline for electronic transactions is 11:59 p.m. (Central Time) on the deadline date. Transmissions must be completed and accepted before 12:00 midnight to meet the deadline. If transmissions are started before 12:00 midnight but are not completed until after 12:00 midnight, those transmissions do not meet the deadline. In addition, any transmission submitted on or just prior to the deadline date that is rejected may not be reprocessed because the deadline will have passed by the time the user gets the information notifying him or her of the rejection.

[2] The date the ISIR/SAR transaction was processed by CPS is considered to be the date the institution received the ISIR or SAR regardless of whether the institution has downloaded the ISIR from its Student Aid Internet Gateway (SAIG) mailbox or when the student submits the SAR to the institution.

[3] Although the Secretary has set this deadline date for the submission of verification documents, if corrections are required, deadline dates for submission of paper or electronic corrections and, for Pell Grant applicants and applicants selected for verification, deadline dates for the submission of a valid SAR or valid ISIR to the institution must still be met. An institution may establish an earlier deadline for the submission of verification documents for purposes of the campus-based programs and the Direct Loan Program, but it cannot be later than this deadline date.

[4] Note that changes to previously submitted Identity Verification Results must be updated within 30 days of the institution becoming aware that a change has occurred.

TABLE B—PELL GRANT, IRAQ AND AFGHANISTAN SERVICE GRANT, DIRECT LOAN, AND TEACH GRANT PROGRAMS DEADLINE DATES FOR DISBURSEMENT INFORMATION BY INSTITUTIONS FOR THE 2019–2020 AWARD YEAR OR PROCESSING YEAR [1]

Which program?	What is submitted?	Under what circumstances is it submitted?	Where is it submitted?	What are the deadlines for disbursement and for submission of records and information?
Pell Grant, Direct Loan, TEACH Grant, and Iraq and Afghanistan Service Grant programs.	An origination or disbursement record.	The institution has made or intends to make a disbursement.	To the Common Origination and Disbursement (COD) System using the Student Aid Internet Gateway (SAIG); or to the COD System using the COD website at: *https://cod.ed.gov*.	The earliest disbursement date is January 23, 2019. The earliest submission date for anticipated disbursement information is April 7, 2019. The earliest submission date for actual disbursement information is April 7, 2019, but no earlier than: (a) 7 calendar days prior to the disbursement date under the advance payment method or the Heightened Cash Monitoring Payment Method 1 (HCM1); or (b) The disbursement date under the reimbursement or the Heightened Cash Monitoring Payment Method 2 (HCM2).
Pell Grant, Iraq and Afghanistan Service Grant, and TEACH Grant programs.	An origination or disbursement record.	The institution has made a disbursement and will submit records on or before the deadline submission date.	To COD using SAIG; or to COD using the COD website at: *https://cod.ed.gov*.	The deadline submission date [2] is the earlier of: (a) 15 calendar days after the institution makes a disbursement or becomes aware of the need to make an adjustment to previously reported disbursement data, except that records for disbursements made between January 23, 2019 and April 7, 2019 must be submitted no later than April 22, 2019; or (b) September 30, 2020.
Direct Loan Program	An origination or disbursement record.	The institution has made a disbursement and will submit records on or before the deadline submission date.	To COD using SAIG; or to COD using the COD website at: *https://cod.ed.gov*.	The deadline submission date [2] is the earlier of: (a) 15 calendar days after the institution makes a disbursement or becomes aware of the need to make an adjustment to previously reported disbursement data, except that records of disbursements made between October 1, 2018 and April 7, 2019, may be submitted no later than April 22, 2019; or (b) July 30, 2021.
Pell Grant and Iraq and Afghanistan Service Grant programs.	A downward adjustment to an origination or disbursement record.	It is after the deadline submission date.	To COD using SAIG; or to COD using the COD website at: *https://cod.ed.gov*.	No later than September 30, 2025.
Pell Grant and Iraq and Afghanistan Service Grant programs.	An origination or disbursement record.	It is after the deadline submission date and the institution has received approval of its request for an extension to the deadline submission date.	Via the COD website at: *https://cod.ed.gov*.	The earlier of: (a) When the institution is fully reconciled and is ready to submit all additional data for the program and the award year; or (b) September 30, 2025.
TEACH Grant and Direct Loan programs.		Requests for extensions to the established submission deadlines may be made for reasons including, but not limited to: (a) A program review or initial audit finding under 34 CFR 690.83; (b) A late disbursement under 34 CFR 668.164(j); or (c) Disbursements previously blocked as a result of another institution failing to post a downward adjustment.		When the institution is fully reconciled and is ready to submit all additional data for the program and the award year.

TABLE B—PELL GRANT, IRAQ AND AFGHANISTAN SERVICE GRANT, DIRECT LOAN, AND TEACH GRANT PROGRAMS DEADLINE DATES FOR DISBURSEMENT INFORMATION BY INSTITUTIONS FOR THE 2019–2020 AWARD YEAR OR PROCESSING YEAR [1]—Continued

Which program?	What is submitted?	Under what circumstances is it submitted?	Where is it submitted?	What are the deadlines for disbursement and for submission of records and information?
Pell Grant and Iraq and Afghanistan Service Grant programs.	An origination or disbursement record.	It is after the deadline submission date and the institution has received approval of its request for an extension to the deadline submission date based on a natural disaster, other unusual circumstances, or an administrative error made by the Department.	Via the COD website at: *https://cod.ed.gov*.	The earlier of: (a) A date designated by the Secretary after consultation with the institution; or (b) February 1, 2021.
Pell Grant and Iraq and Afghanistan Service Grant programs.	An origination or disbursement record.	It is after the deadline submission date and the institution has received approval of its request for administrative relief to extend the deadline submission date based on a student's reentry to the institution within 180 days after initially withdrawing [3].	Via the COD website at: *https://cod.ed.gov*.	The earlier of: (a) 15 days after the student reenrolls; or (b) May 3, 2021.

[1] A COD Processing Year is a period of time in which institutions are permitted to submit Direct Loan records to the COD System that are related to a given award year. For a Direct Loan, the period of time includes loans that have a loan period covering any day in the 2019–2020 award year.

[2] Transmissions must be completed and accepted before the designated processing time on the deadline submission date. The designated processing time is published annually via an electronic announcement posted to the Information for Financial Aid Professionals website (*https://ifap.ed.gov*). If transmissions are started at the designated time, but are not completed until after the designated time, those transmissions will not meet the deadline. In addition, any transmission submitted on or just prior to the deadline date that is rejected may not be reprocessed because the deadline will have passed by the time the user gets the information notifying him or her of the rejection.

[3] Applies only to students enrolled in clock-hour and nonterm credit-hour educational programs.

Note: The COD System must accept origination data for a student from an institution before it accepts disbursement information from the institution for that student. Institutions may submit origination and disbursement data for a student in the same transmission. However, if the origination data is rejected, the disbursement data is rejected.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2019–ICCD–0097]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; RISE Award

AGENCY: Office of Communications and Outreach (OCO), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a new information collection.

DATES: Interested persons are invited to submit comments on or before December 2, 2019.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2019–ICCD–0097. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, ED will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W208B, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Andrea Falken, 202–503–8985.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: RISE Award.

OMB Control Number: 1860–NEW.

Type of Review: A new information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 120.

Total Estimated Number of Annual Burden Hours: 4,920.

Abstract: The purpose of the Recognizing Inspirational School Employees (RISE) Award is to recognize and promote the commitment and excellence exhibited by classified school employees who provide exemplary service to students in pre-kindergarten through high school and to inspire innovation and excellence among all classified school employees. A classified school employee is an employee of a state or any political subdivision of a state, or an employee of a nonprofit entity, who works in any grade from pre-kindergarten through high school in any of the following occupational specialties: Paraprofessional, clerical and administrative services, transportation services, food and nutrition services, custodial and maintenance services, security services, health and student services, technical services, and skilled trades. The terms used have the meaning given the terms in section 8101 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7801). The U.S. Department of Education (Department) invites the governor of each state to nominate up to two classified school employees by November 30, 2020. The Secretary of Education will select a single classified school employee to receive the RISE Award for that school year by spring 2021. The Department will communicate the selectee's story in order to inspire other innovative practices and excellence among classified school employees.

Dated: October 29, 2019.

Stephanie Valentine,

PRA Coordinator, Information Collection Clearance Program, Information Management Branch, Office of the Chief Information Officer.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2019–ICCD–0138]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Fast Response Survey System (FRSS) 110: Use of Educational Technology for Instruction in Public Schools

AGENCY: National Center for Education Statistics (NCES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a new generic information collection.

DATES: Interested persons are invited to submit comments on or before December 2, 2019.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2019–ICCD–0138. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, ED will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W–208B, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Kashka Kubzdela, 202–245–7377 or email *NCES.Information.Collections@ed.gov.*

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Fast Response Survey System (FRSS) 110: Use of Educational Technology for Instruction in Public Schools.

OMB Control Number: 1850–0733.

Type of Review: A new generic information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 3,380.

Total Estimated Number of Annual Burden Hours: 742.

Abstract: This request is to conduct preliminary activities for the Fast Response Survey System (FRSS) survey #110 on use of educational technology for instruction in public schools. The Office of Educational Technology (OET) requested that NCES conduct this FRSS survey. The expanding use of technology affects the lives of students both inside and outside the classroom. For this reason, the role of technology in education is an increasingly important area of research. While access to technology can provide valuable learning opportunities to students, technology by itself does not guarantee successful outcomes. Schools and teachers play an important role in successfully integrating technology into teaching and learning. The purpose of this FRSS 110 survey is to collect nationally representative data from public schools about their use of educational technology for instruction. The request to conduct the FRSS 110 preliminary activities, which involved securing research approval from special contact school districts, was approved by OMB in May 2019 (OMB #1850–0733 v.35). This request is to conduct the full-scale survey data collection, beginning in January 2020 and scheduled to end in June 2020.

Dated: October 29, 2019.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer.

Total Estimated Number of Annual Responses: 1,179.

Total Estimated Number of Annual Burden Hours: 20,515.

Abstract: The purpose of the Upward Bound (UB) and Upward Bound Math Science (UBMS) Programs is to generate in program participants the skills and motivation necessary to complete a program of secondary education and to enter and succeed in a program of postsecondary education.

Authority for this program is contained in Title IV, Part A, Subpart 2, Chapter 1, Section 402C of the Higher Education Opportunity Act of 2008. Eligible applicants include institutions of higher education, public or private agencies or organizations, including community-based organizations with experience in serving disadvantaged youth, secondary schools, and combinations of institutions, agencies, organizations and secondary schools.

UB Program participants must be potential first-generation college students, low-income individuals, or individuals who have a high risk of academic failure and have a need for academic support in order to pursue successfully a program of education beyond high school. Required Program services include: (1) Academic tutoring; (2) advice and assistance in secondary and postsecondary course selection; (3) preparation for college entrance exams and completing college admission applications; (4) information on federal student financial aid programs including (a) Federal Pell grant awards, (b) loan forgiveness, and (c) scholarships; (5) assistance completing financial aid applications; (6) guidance and assistance in: (a) secondary school reentry, (b) alternative programs for secondary school drop outs that lead to the receipt of a regular secondary school diploma, (c) entry into general educational development (GED) programs or (d) entry into postsecondary education; (7) education or counseling services designed to improve the financial and economic literacy of students or the students' parents, including financial planning for postsecondary education; and (8) projects funded for at least two years under the program must provide instruction in mathematics through pre-calculus; laboratory science; foreign language; composition; and literature.

Dated: October 29, 2019.

Kate Mullan,

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER20–136–000]

Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization: Reading Wind Energy, LLC

This is a supplemental notice in the above-referenced proceeding of Reading Wind Energy, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is November 12, 2019.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the website that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: October 23, 2019.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP20–4–000]

Notice of Request Under Blanket Authorization; Vector Pipeline, L.P.

Take notice that on October 15, 2019, Vector Pipeline, L.P. (Vector) Post Office Box 1087, Colorado Springs, Colorado 80944, filed a prior notice request pursuant to sections 157.205 and 157.208 of the Commission's regulations under the Natural Gas Act and its blanket certificate issued in Docket No.

CP98–135–000 for authorization to construct and operate a delivery lateral consisting of approximately 1.24 miles of 24-inch diameter pipeline located in St. Clair County, Michigan. Specifically, Vector proposes to construct the lateral to connect its existing system to a new 1,100 Megawatts natural gas-fired electric generating facility being constructed by DTE Electric Company in St. Clair County, Michigan. Vector states that is has designed the proposed facilities with up to a maximum capacity of 525,000 Dth/d to accommodate this load and a possible future expansion of the plant. The total cost of this Project is approximately $21.5 million, all as more fully set forth in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (866) 208–3676 or TTY, (202) 502–8659.

Any questions regarding this application should be directed Ms. Amy S. Bruhn, Manager, Regulatory and Administration, Vector Pipeline, LLC, the General Partner of Vector Pipeline L.P.; 38705 Seven Mile Road, Suite 490, Livonia, Michigan 48152, phone (734) 462–0237, fax (734) 462–0231, or email: *amy.bruhn@vector-pipeline.com.*

Any person may, within 60 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention. Any person filing to intervene or the Commission's staff may, pursuant to section 157.205 of the Commission's Regulations under the NGA (18 CFR 157.205) file a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the NGA.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's EA.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenter's will be placed on the Commission's environmental mailing list and will be notified of any meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission, and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the internet in lieu of paper. See 18 CFR 385.2001(a) (1) (iii) and the instructions on the Commission's website (*www.ferc.gov*) under the ''e-Filing'' link. Persons unable to file electronically should submit original and 3 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

Dated: October 25, 2019.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2960–006]

City of Gonzales, Texas; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for license for the Gonzales Project, and has prepared an Environmental Assessment (EA) for the project. The project is located on the Guadalupe River in Gonzales County, Texas. The project occupies no federal land.

The EA contains Commission staff's analysis of the potential environmental effects of the project. The EA concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room, or may be viewed on the Commission's website at *http://www.ferc.gov,* using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or 202–502–8659 (TTY).

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Any comments should be filed within 30 days from the date of this notice.

The Commission strongly encourages electronic filing. Please file comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support. In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. The first page of any filing should include docket number P–2960–006.

For further information, contact Rachel McNamara at 202–502–8340, or by email at *rachel.mcnamara@ferc.gov.*

Dated: October 25, 2019.

[Project No. 6661–006]

Falls Creek HP Limited Partnership; Eagle Creek Renewable Energy, LLC; Notice of Transfer of Exemption

1. On September 17, 2019, Falls Creek HP Limited Partnership, exemptee for the Falls Creek Hydroelectric Project No. 6661, filed a letter notifying the Commission that the project was transferred from Falls Creek HP Limited Partnership to Eagle Creek Renewable Energy, LLC. The exemption from licensing was originally issued on March 4, 1983.[1] The project is located on the Falls Creek, South Santiam River, Linn County, OR. The transfer of an exemption does not require Commission approval.

2. Eagle Creek Renewable Energy, LLC is now the exemptee of the Falls Creek Hydroelectric Project No. 6661. All correspondence must be forwarded to: Mr. Robert Gates, Eagle Creek Renewable Energy, LLC, 116 N State Street, P.O Box 167, Neshkoro, WI 54960–0167, Phone: 973–998–8403, Email: *bob.gates@eaglecreekre.com.*

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER20–195–000]

Diamond Leaf Energy, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Diamond Leaf Energy, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is November 18, 2019.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the website that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Federal Energy Regulatory Commission

[Docket Nos. AD19–20–000 and ER02–2001–000]

Electric Quarterly Report Users Group Meeting and Electric Quarterly Reports

On September 17, 2019, the Federal Energy Regulatory Commission (Commission) issued a notice that Commission staff will hold an Electric Quarterly Report (EQR) Users Group meeting on December 4, 2019. The meeting will take place from 1:00 p.m. to 5:00 p.m. (EST) in the Commission Meeting Room at 888 First Street NE, Washington, DC 20426. All interested persons are invited to attend. For those unable to attend in person, access to the meeting will be available via webcast.

Commission staff is hereby supplementing the September 17, 2019 notice with the agenda for discussion. During the meeting, Commission staff and EQR users will discuss potential improvements to the EQR program and the EQR filing process. While discussion topics are outlined in the agenda, suggestions for additional discussion topics may be emailed to *EQRUsersGroup@ferc.gov.*

Please note that matters pending before the Commission and subject to ex parte limitations cannot be discussed at this meeting.

Due to the nature of the discussion, those interested in participating are encouraged to attend in person. All interested persons (whether attending in person, via webcast, or telephone) are asked to register *http://www.ferc.gov/whats-new/registration/12-04-19-form.asp.* There is no registration fee. Anyone with internet access can listen to the meeting by navigating to the FERC website Calendar of Events (*https://www.ferc.gov/EventCalendar/EventsList.aspx?View=listview*), locating the EQR Users Group Meeting on the Calendar, and clicking on the link to the Event Details and selecting webcast. The webcast will allow persons to listen to the meeting. In the event you would also like to participate in the meeting dialogue by phone, please select the telephone option when registering.

Commission conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations, please send an email to *accessibility@ferc.gov* or call toll free 1–866–208–3372 (voice) or 202–502–8659 (TTY), or send a FAX to 202–208–2106 with the required accommodations.

For more information about the EQR Users Group meeting, please contact Jeff Sanders of the Commission's Office of Enforcement at (202) 502–6455 or send an email to *EQRUsersGroup@ferc.gov.*

Dated: October 25, 2019.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2018–0279; FRL–10001–31–OAR]

Release of Draft Policy Assessment for the Ozone National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: On or about October 31, 2019, the Environmental Protection Agency (EPA) will make available the document, *Policy Assessment for the Ozone National Ambient Air Quality Standards, External Review Draft* (draft PA). This draft document was prepared as part of the current review of the national ambient air quality standards

(NAAQS) for photochemical oxidants including ozone (O_3). The PA, when final, serves to ''bridge the gap'' between the currently available scientific and technical information and the judgments required of the Administrator in determining whether to retain or revise the existing O_3 NAAQS. The primary and secondary O_3 NAAQS are set to protect the public health and the public welfare from O_3 and other photochemical oxidants in ambient air.

DATES: Comments should be received on or before December 16, 2019.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2018–0279, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov* (our preferred method). Follow the online instructions for submitting comments.
- *Email: a-and-r-Docket@epa.gov.* Include the Docket ID No. EPA–HQ–OAR–2018–0279 in the subject line of the message.
- *Fax:* (202) 566–9744. Include the Docket ID No. EPA–HQ–OAR–2018–0279 in the subject line of the message.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Office of Air and Radiation Docket, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand Delivery/Courier:* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operations are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal Holidays).

Instructions: All submissions received must include the Docket ID No. for this notice. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments, see the **SUPPLEMENTARY INFORMATION** section of this document. This document will be available on the EPA's website at *https://www.epa.gov/naaqs/ozone-o3-air-quality-standards.* The document will be accessible under ''Policy Assessments'' from the current review.

FOR FURTHER INFORMATION CONTACT: Dr. Deirdre L. Murphy, Office of Air Quality Planning and Standards, (Mail Code C504–06), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711; telephone number: 919–541–0729, fax number: 919–541–027; or email: *murphy.deirdre@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

Written Comments

Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2018–0279, at *https://www.regulations.gov* (our preferred method), or the other methods identified in the **ADDRESSES** section. Once submitted, comments cannot be edited or removed from the docket. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written submission. The written submission is considered the official submission and should include discussion of all points you wish to make. The EPA will generally not consider submissions or submission content located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

II. Information About the Document

Two sections of the Clean Air Act (CAA or the Act) govern the establishment and revision of the NAAQS. Section 108 directs the Administrator to identify and list certain air pollutants and then issue ''air quality criteria'' for those pollutants. The air quality criteria are to ''accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of such pollutant in the ambient air . . .'' (CAA section 108(a)(2)). Under section 109 of the Act, the EPA is then to establish primary (health-based) and secondary (welfare-based) NAAQS for each pollutant for which the EPA has issued air quality criteria. Section 109(d)(1) of the Act requires periodic review and, if appropriate, revision of existing air quality criteria. Revised air quality criteria are to reflect advances in scientific knowledge on the effects of the pollutant on public health and welfare. Under the same provision, the EPA is also to periodically review and, if appropriate, revise the NAAQS, based on the revised air quality criteria.

The Act additionally requires appointment of an independent scientific review committee that is to periodically review the existing air quality criteria and NAAQS and to recommend any new standards and revisions of existing criteria and standards as may be appropriate (CAA section 109(d)(2)(A)–(B)). Since the early 1980s, the requirement for an independent scientific review committee has been fulfilled by the Clean Air Scientific Advisory Committee (CASAC).

Presently the EPA is reviewing the air quality criteria and NAAQS for photochemical oxidants and O_3.[1] The EPA's overall plan for this review is presented in the Integrated Review Plan for the Ozone NAAQS (IRP).[2] As described in the IRP, the EPA is preparing an Integrated Science Assessment for (ISA), a draft of which was released in September 2019 for public comment and review by the CASAC (84 FR 50836).[3] The PA, when final, serves to ''bridge the gap'' between the scientific and technical information in the final ISA and any air quality, exposure and risk analyses available in the review, and the judgments required of the Administrator in determining whether to retain or revise the existing ozone NAAQS. The draft PA builds upon information presented in the draft ISA and the draft exposure and risk analyses (presented in an appendix to the draft PA). The draft PA document will be available on or about October 31, 2019, on the EPA's website at *https://www.epa.gov/naaqs/ozone-o3-air-quality-standards.* The EPA is soliciting advice and recommendations from the CASAC by means of a review of this draft document at an upcoming public meeting of the CASAC. Information about this public meeting, including the dates and location, will be published as a separate notice in the **Federal Register**. Following the CASAC meeting, the EPA will consider comments received from the CASAC and the public in preparing revisions to these documents.

The draft document briefly described above does not represent and should not be construed to represent any final EPA policy, viewpoint, or determination. The EPA will consider any public comments submitted in response to this notice when revising the document.

[1] The EPA's call for information for this review was issued on June 26, 2018 (83 FR 29785).

[2] The IRP (EPA–452/R–19–002, August 2019) is available at *https://www.epa.gov/naaqs/ozone-o3-standards-planning-documents-current-review.*

[3] 3 The draft ISA is available at: *https://www.epa.gov/naaqs/ozone-o3-standards-integrated-science-assessments-current-review.*

Dated: October 28, 2019.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–10001–58–OA]

Notification of a Public Meeting of the Chartered Clean Air Scientific Advisory Committee (CASAC)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The EPA Science Advisory Board (SAB) Staff Office announces a public face-to-face meeting of the Chartered Clean Air Scientific Advisory Committee (CASAC). The CASAC will discuss its Draft Report on EPA's *Policy Assessment for the Review of the National Ambient Air Quality Standards (NAAQS) for Particulate Matter (External Review Draft—September 2019)* and will peer review EPA's *Integrated Science Assessment for Ozone and Related Photochemical Oxidants (External Review Draft—September 2019)* and EPA's *Policy Assessment for the Review of the Ozone National Ambient Air Quality Standards (External Review Draft).*

DATES: The public face-to-face meeting will be held on Tuesday, December 3, 2019, from 9:00 a.m. to 5:00 p.m. (ET), Wednesday, December 4, 2019, from 8:30 a.m. to 5:00 p.m. (ET), Thursday, December 5, 2019, from 8:30 a.m. to 5:00 p.m. (ET), and Friday, December 6, 2019, from 8:30 a.m. to 3:30 p.m. (ET).

ADDRESSES: The public face-to-face meeting will be held at the Embassy Suites by Hilton Raleigh Durham Research Triangle, 201 Harrison Oaks Boulevard, Cary, North Carolina 27513.

FOR FURTHER INFORMATION CONTACT: Any member of the public wishing to obtain information concerning these public meetings may contact Mr. Aaron Yeow, Designated Federal Officer (DFO), at (202) 564–2050 or at *yeow.aaron@epa.gov.* General information about the CASAC, as well as any updates concerning the meeting announced in this notice, may be found on the CASAC website at *http://www.epa.gov/casac.*

SUPPLEMENTARY INFORMATION:

Background: The Clean Air Scientific Advisory Committee (CASAC) was established under section 109(d)(2) of the Clean Air Act (CAA or Act) (42 U.S.C. 7409) as a scientific advisory committee. The CASAC provides independent advice, information and recommendations on the scientific and technical aspects of air quality criteria and the National Ambient Air Quality Standards (NAAQS). The CASAC shall also: Advise the EPA Administrator of areas in which additional knowledge is required to appraise the adequacy and basis of existing, new, or revised NAAQS; describe the research efforts necessary to provide the required information; advise the EPA Administrator on the relative contribution to air pollution concentrations of natural as well as anthropogenic activity; and advise the EPA Administrator of any adverse public health, welfare, social, economic, or energy effects which may result from various strategies for attainment and maintenance of such NAAQS. The CAA requires that the Agency, at five-year intervals, review and revise, as appropriate, the air quality criteria and the NAAQS for the six ''criteria'' air pollutants, including particulate matter and ozone. EPA is currently reviewing the NAAQS for particulate matter and the NAAQS for ozone.

The CASAC is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The Chartered CASAC will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies. Pursuant to FACA and EPA policy, notice is hereby given that the Chartered CASAC will hold a public face-to-face meeting to discuss its Draft Report on EPA's *Policy Assessment for the Review of the National Ambient Air Quality Standards (NAAQS) for Particulate Matter (External Review Draft—September 2019)* and to peer review

EPA's *Integrated Science Assessment for Ozone and Related Photochemical Oxidants (External Review Draft—September 2019)* and EPA's *Policy Assessment for the Review of the Ozone National Ambient Air Quality Standards (External Review Draft).*

Technical Contacts: Any technical questions concerning the *Policy Assessment for the Review of the National Ambient Air Quality Standards for Particulate Matter (External Review Draft—September 2019)* should be directed to Dr. Scott Jenkins (*jenkins.scott@epa.gov*). Any technical questions concerning the *Integrated Science Assessment for Ozone and Related Photochemical Oxidants (External Review Draft—September 2019)* should be directed to Dr. Tom Luben (*luben.tom@epa.gov*) and Dr. Meredith Lassiter (*lassiter.meredith@epa.gov*). Any technical questions concerning the *Policy Assessment for the Review of the Ozone National Ambient Air Quality Standards (External Review Draft)* should be directed to Dr. Deirdre Murphy (*murphy.deirde@epa.gov*).

Availability of Meeting Materials: Prior to the meeting, the review documents, agenda and other materials will be accessible through the calendar link on the blue navigation bar at *http://www.epa.gov/casac/.*

Procedures for Providing Public Input: Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office. Federal advisory committees and panels, including scientific advisory committees, provide independent advice to EPA. Members of the public can submit relevant comments on the topic of this advisory activity, including the charge to the CASAC and the EPA review documents, for the CASAC to consider as it develops advice for EPA. Input from the public to the CASAC will have the most impact if it provides specific scientific or technical information or analysis for CASAC to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide comment should follow the instructions below to submit comments.

Oral Statements: Individuals or groups requesting an oral presentation during the face-to-face meeting will be limited to five minutes. Each person making an oral statement should consider providing written comments as well as their oral statement so that the points presented orally can be expanded upon in writing. Interested parties should contact Mr. Aaron Yeow, DFO, in writing (preferably via email) at the contact information noted above by November 26, 2019, to be placed on the list of public speakers.

Written Statements: Written statements will be accepted throughout the advisory process; however, for timely consideration by CASAC members, statements should be supplied to the DFO (preferably via email) at the contact information noted above by November 26, 2019. It is the SAB Staff Office general policy to post written comments on the web page for the advisory meeting or teleconference. Submitters are requested to provide an unsigned version of each document because the SAB Staff Office does not publish documents with signatures on its websites. Members of the public should be aware that their personal contact information, if included in any written comments, may be posted to the CASAC website. Copyrighted material will not be posted without explicit permission of the copyright holder.

Accessibility: For information on access or services for individuals with disabilities, please contact Mr. Aaron Yeow at (202) 564–2050 or *yeow.aaron@epa.gov.* To request accommodation of a disability, please contact Mr. Yeow preferably at least ten days prior to each meeting to give EPA as much time as possible to process your request.

Dated: October 22, 2019.

Khanna Johnston,

Deputy Director, EPA Science Advisory Staff Office.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1163]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before December 31, 2019. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1163.

Title: Regulations Applicable to Broadcast, Common Carrier, and Aeronautical Radio Licensees Under Section 310(b) of the Communications Act of 1934, as amended.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 81 respondents; 81 responses.

Estimated Time per Response: 2 hours–46 hours.

Frequency of Response: On-occasion reporting requirement.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 47 U.S.C. 151, 152, 154(i), 154(j), 160, 303(r), 309, 310 and 403.

Total Annual Burden: 1,830 hours.

Total Annual Cost: $524,400.

Nature and Extent of Confidentiality: In submitting the information request, respondents may need to disclose confidential information to satisfy the requirements. However, covered entities would be free to request that such materials submitted to the Commission be withheld from public inspection (see 47 CFR 0.459 of the Commission's rules).

Privacy Impact Assessment: No impacts(s).

Needs and Uses: The Federal Communications Commission (''Commission'') is requesting a three-year extension of OMB Control No. 3060–1163 titled, Regulations Applicable to Broadcast, Common Carrier and Aeronautical Radio Licensees Under Section 310(b)(4) of the Communications Act of 1934, as amended.

Section 310(b)(4) of the Act requires that the Commission pass upon the propriety of foreign ownership of U.S. parent companies that control common carrier and aeronautical radio licensees before such ownership exceeds 25 percent. The Commission's section 310(b)(3) forbearance approach (applicable to common carrier licensees only) requires that the Commission pass upon the propriety of foreign ownership of common carrier radio licensees before such ownership exceeds 20 percent. The information collection will preserve the Commission's ability to disallow foreign investment that may pose a risk of harm to competition or national security, law enforcement, foreign policy, or trade policy.

If the information collection were not conducted or were conducted less frequently than proposed, the Commission would not be able to carry out its statutory mandate under section 310(b) of the Act, and its section 310(b)(3) forbearance policy, to disallow foreign investment that the Commission finds would be contrary to the U.S. public interest. In particular, the Commission would lack the information it needs to determine whether proposed foreign investment in U.S. broadcast, common carrier, and aeronautical radio licensees may pose a risk of harm to competition or national security, law enforcement, foreign policy, or trade policy.

Federal Communications Commission.

Katura Jackson,

Federal Register Liaison Officer.

[FR Doc. 2019–23942 Filed 10–31–19; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

Federal Advisory Committee Act; Technological Advisory Council

AGENCY: Federal Communications Commission.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice advises interested persons that the Federal Communications Commission's (FCC) Technological Advisory Council will hold a meeting on Wednesday December 4, 2019 in the Commission Meeting Room, from 10:00 a.m. to 3 p.m. at the Federal Communications Commission, 445 12th Street SW, Washington, DC 20554.

DATES: Wednesday December 4, 2019.

ADDRESSES: Federal Communications Commission, 445 12th Street SW, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Michael Ha, Deputy Chief, Policy and Rules Division 202–418–2099; *michael.ha@fcc.gov.*

SUPPLEMENTARY INFORMATION: At the December 4th meeting, the FCC Technological Advisory Council will discuss progress on work initiatives from the previous meeting and provide the final recommendations from each working group. The FCC will attempt to accommodate as many people as possible. However, admittance will be limited to seating availability. Meetings are also broadcast live with open captioning over the internet from the FCC Live web page at *http://www.fcc.gov/live/.* The public may submit written comments before the meeting to: Michael Ha, the FCC's Designated Federal Officer for Technological Advisory Council by email: *michael.ha@fcc.gov* or U.S. Postal Service Mail (Michael Ha, Federal Communications Commission, Room 2–A665, 445 12th Street SW, Washington, DC 20554). Open captioning will be provided for this event. Other reasonable accommodations for people with disabilities are available upon request. Requests for such accommodations should be submitted via email to *fcc504@fcc.gov* or by calling the Office of Engineering and Technology at 202–418–2470 (voice), (202) 418–1944 (fax). Such requests should include a detailed description of the accommodation needed. In addition, please include your contact information. Please allow at least five days advance notice; last minute requests will be accepted, but may not be possible to fill.

Federal Communications Commission.

Katura Jackson,

Federal Register Liaison Officer Office of the Secretary.

[FR Doc. 2019–23937 Filed 10–31–19; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1035]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before December 2, 2019. If you anticipate that you will be submitting comments but find it difficult to do so with the period of time allowed by this notice, you should advise the contacts listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, OMB, via email *Nicholas_A._Fraser@OMB.eop.gov;* and to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control No.: 3060–1035.

Title: Part 73, Subpart F International Broadcast Stations.

Form No.: FCC Forms 309, 310 and 311.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents/Responses: 225 respondents; 225 responses.

Estimated Time per Response: 2–720 hours.

Frequency of Response: Recordkeeping requirement; On occasion, semi-annual, weekly and annual reporting requirements.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in 47 U.S.C. 154, 303, 307, 334, 336 and 554.

Total Annual Burden: 20,096 hours.

Annual Cost Burden: $100,415.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general, there is no need for confidentiality with this collection of information.

Needs and Uses: The Federal Communications Commission (''Commission'') is requesting that the Office of Management and Budget (OMB) approve a three-year extension of the information collection titled ''Part 73, Subpart F International Broadcast Stations'' under OMB Control No. 3060–1035. This information collection is used by the Commission to assign frequencies for use by international broadcast stations, to grant authority to operate such stations and to determine if interference or adverse propagation conditions exist that may impact the operation of such stations. The Commission collects this information pursuant to 47 CFR part 73, subpart F. If the Commission did not collect this information, it would not be in a position to effectively coordinate spectrum for international broadcasters or to act for entities in times of frequency interference or adverse propagation conditions. Therefore, the information collection requirements are as follows:

FCC Form 309—Application for Authority to Construct or Make Changes in an International, Experimental Television, Experimental Facsimile, or a Developmental Broadcast Station—The FCC Form 309 is filed on occasion when the applicant is requesting authority to construct or make modifications to the international broadcast station.

FCC Form 310—Application for an International, Experimental Television, Experimental Facsimile, or a Developmental Broadcast Station License—The FCC Form 310 is filed on occasion when the applicant is submitting an application for a new international broadcast station.

FCC Form 311—Application for Renewal of an International or Experimental Broadcast Station License—The FCC Form 311 is filed by applicants who are requesting renewal of their international broadcast station licenses.

47 CFR 73.702(a) states that six months prior to the start of each season, licensees and permittees shall by informal written request, submitted to the Commission in triplicate, indicate for the season the frequency or frequencies desired for transmission to each zone or area of reception specified in the license or permit, the specific hours during which it desires to transmit to such zones or areas on each frequency, and the power, antenna gain, and antenna bearing it desires to use. Requests will be honored to the extent that interference and propagation conditions permit and that they are otherwise in accordance with the provisions of section 47 CFR 73.702(a).

47 CFR 73.702(b) states that two months before the start of each season, the licensee or permittee must inform the Commission in writing as to whether it plans to operate in accordance with the Commission's authorization or operate in another manner.

47 CFR 73.702(c) permits entities to file requests for changes to their original request for assignment and use of frequencies if they are able to show good cause. Because international broadcasters are assigned frequencies on a seasonal basis, as opposed to the full term of their eight-year license authorization, requests for changes need to be filed by entities on occasion.

47 CFR 73.702 (note) states that permittees who during the process of construction wish to engage in equipment tests shall by informal written request, submitted to the Commission in triplicate not less than 30 days before they desire to begin such testing, indicate the frequencies they desire to use for testing and the hours they desire to use those frequencies.

47 CFR 73.702(e) states within 14 days after the end of each season, each licensee or permittee must file a report with the Commission stating whether the licensee or permittee has operated the number of frequency hours authorized by the seasonal schedule to each of the zones or areas of reception specified in the schedule.

47 CFR 73.782 requires that licensees retain logs of international broadcast stations for two years. If it involves communications incident to a disaster, logs should be retained as long as required by the Commission.

47 CFR 73.759(d) states that the licensee or permittee must keep records of the time and results of each auxiliary transmitter test performed at least weekly.

47 CFR 73.762(b) requires that licensees notify the Commission in writing of any limitation or discontinuance of operation of not more than 10 days.

47 CFR 73.762(c) states that the licensee or permittee must request and receive specific authority from the Commission to discontinue operations for more than 10 days under extenuating circumstances.

47 CFR 1.1301–1.1319 cover certifications of compliance with the National Environmental Policy Act and how the public will be protected from radio frequency radiation hazards.

Federal Communications Commission.

Katura Jackson,

Federal Register Liaison Officer, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0357 and 3060–1029]

Information Collections Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before December 31, 2019. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–0357.

Title: Recognized Private Operating Agency (RPOA), 47 CFR 63.701.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 10 respondents; 10 responses.

Estimated Time per Response: 2–5 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 47 U.S.C. 154(j), 201, 214 and 403.

Total Annual Burden: 35 hours.

Annual Cost Burden: $19,450.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general, there is no need for confidentiality with this collection of information.

Needs and Uses: This collection will be submitted as an extension after the 60-day comment period to the Office of Management and Budget (OMB) in order to obtain the full three-year clearance.

The Commission requests this information in order to make recommendations to the U.S. Department of State for granting recognized private operating agency (RPOA) status to requesting entities. The Commission does not require entities to request RPOA status. Rather, this is a voluntary application process for use by companies that believe that obtaining RPOA status will be beneficial in persuading foreign governments to allow them to conduct business abroad. RPOA status also permits companies to join the International Telecommunication Union's (ITU's) Telecommunications Sector, which is the standards-setting body of the ITU.

The information furnished in RPOA requests is collected pursuant to 47 CFR 63.701 of the Commission's rules. Entities submit these applications on a voluntary basis. The collection of information is a one-time collection for each respondent. Without this information collection, the Commission's policies and objectives for assisting unregulated providers of enhanced services to enter the market for international enhanced services would be thwarted.

OMB Control No.: 3060–1029.

Title: Data Network Identification Code (DNIC).

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 5 respondents; 5 responses.

Estimated Time per Response: .25 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collections is contained in 47 U.S.C. 151, 154(i)–(j), 201–205, 211, 214, 219, 220, 303(r), 309 and 403.

Total Annual Burden: 1 hour.

Annual Cost Burden: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general, there is no need for confidentiality with this collection of information.

Needs and Uses: This collection will be submitted as an extension (no change in reporting or recordkeeping requirements) after this 60-day comment period to Office of Management and Budget (OMB) in order to obtain the full three-year clearance. A Data Network Identification Code (DNIC) is a unique, four-digit number designed to provide discrete identification of individual public data networks. The DNIC is intended to identify and permit automated switching of data traffic to particular networks. The FCC grants the DNICs to operators of public data networks on an international protocol. The operators of public data networks file an application for a DNIC on the internet-based, International Bureau Filing System (IBFS). The DNIC is obtained free of charge on a one-time only basis unless there is a change in ownership or the owner chooses to relinquish the code to the FCC. The Commission's lack of an assignment of DNICs to operators of public data networks would result in technical problems that prevent the identification and automated switching of data traffic to particular networks.

Federal Communications Commission.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) reapprove the proposed information collection project: ''*Medical Expenditure Panel Survey—Insurance Component.*''

This proposed information collection was previously published in the **Federal Register** on August 8, 2019, and allowed 60 days for public comment. AHRQ received no comments from members of the public. The purpose of this notice is to allow an additional 30 days for public comment.

DATES: Comments on this notice must be received by 30 days after date of publication.

ADDRESSES: Written comments should be submitted to: AHRQ's OMB Desk Officer by fax at (202) 395–6974 (attention: AHRQ's desk officer) or by email at *OIRA_submission@omb.eop.gov* (attention: AHRQ's desk officer).

FOR FURTHER INFORMATION CONTACT: Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427–1477, or by email at *doris.lefkowitz@AHRQ.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Proposed Project

Medical Expenditure Panel Survey—Insurance Component

Employer-sponsored health insurance is the source of coverage for 84.4 million current and former workers, plus many of their family members, and is a cornerstone of the U.S. health care system. The Medical Expenditure Panel Survey—Insurance Component (MEPS–IC) measures the extent, cost, and coverage of employer-sponsored health insurance on an annual basis. These statistics are produced at the National, State, and sub-State (metropolitan area) level for private industry. Statistics are also produced for State and Local governments.

This research has the following goals:

(1) To provide data for Federal policymakers evaluating the effects of National and State health care reforms.

(2) to provide descriptive data on the current employer-sponsored health insurance system and data for modeling the differential impacts of proposed health policy initiatives.

(3) to supply critical State and National estimates of health insurance spending for the National Health Accounts and Gross Domestic Product.

This study is being conducted by AHRQ through the Bureau of the Census, pursuant to AHRQ's statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the cost and use of health care services and with respect to health statistics and surveys. 42 U.S.C. 299a(a)(3) and (8); 42 U.S.C. 299b–2.

Method of Collection

To achieve the goals of this project the following data collections for both private sector and state and local government employers will be implemented:

(1) Prescreener Questionnaire—The purpose of the Prescreener Questionnaire, which is collected via telephone, varies depending on the insurance status of the establishment contacted (establishment is defined as a single, physical location in the private sector and a governmental unit in state and local governments). For establishments that do not offer health insurance to their employees, the prescreener is used to collect basic information such as number of employees. Collection is completed for these establishments through this telephone call. For establishments that do offer health insurance, contact name and address information is collected that is used for the mailout of the establishment and plan questionnaires. Obtaining this contact information helps ensure that the questionnaires are directed to the person in the establishment best equipped to complete them.

(2) Establishment Questionnaire—The purpose of the mailed Establishment Questionnaire is to obtain general information from employers that provide health insurance to their employees. Information such as total active enrollment in health insurance, other employee benefits, demographic

characteristics of employees, and retiree health insurance is collected through the establishment questionnaire.

(3) Plan Questionnaire—The purpose of the mailed Plan Questionnaire is to collect plan-specific information on each plan (up to four plans) offered by establishments that provide health insurance to their employees. This questionnaire obtains information on total premiums, employer and employee contributions to the premium, and plan enrollment for each type of coverage offered—single, employee-plus-one, and family—within a plan. It also asks for information on deductibles, copays, and other plan characteristics.

The primary objective of the MEPS–IC is to collect information on employer-sponsored health insurance. Such information is needed in order to provide the tools for Federal, State, and academic researchers to evaluate current and proposed health policies and to support the production of important statistical measures for other Federal agencies.

Estimated Annual Respondent Burden

Exhibit 1 shows the estimated annualized burden hours for the respondents' time to participate in the MEPS–IC. The Prescreener questionnaire will be completed by 29,931 respondents and takes about 5 minutes to complete. The Establishment questionnaire will be completed by 25,819 respondents and takes about 23 minutes to complete. The Plan questionnaire will be completed by 22,859 respondents and will require an average of 2.2 responses per respondent. Each Plan questionnaire takes about 11 minutes to complete. The total annualized burden hours are estimated to be 21,611 hours.

Exhibit 2 shows the estimated annualized cost burden associated with the respondents' time to participate in this data collection. The annualized cost burden is estimated to be $705,599.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS FOR THE 2020–2021 MEPS–IC

Form name	Number of respondents	Number of responses per respondent	Hours per response	Total burden hours
Prescreener Questionnaire	29,931	1	5/60	2,494
Establishment Questionnaire	25,819	1	* 23/60	9,897
Plan Questionnaire	22,859	2.2	11/60	9,220
Total	78,609	na	na	21,611

* The burden estimate printed on the establishment questionnaire is 45 minutes which includes the burden estimate for completing the establishment questionnaire and two plan questionnaires (on average, each establishment completes 2.2 plan questionnaires), plus the prescreener. The establishment and plan questionnaires are sent to the respondent as a package and are completed by the respondent at the same time.

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN FOR THE 2020–2021 MEPS–IC

Form name	Number of respondents	Total burden hours	Average hourly wage rate *	Total cost burden
Prescreener Questionnaire	29,931	2,494	32.65	$81,429
Establishment Questionnaire	25,819	9,897	32.65	323,137
Plan Questionnaire	22,859	9,220	32.65	301,033
Total	78,609	21,611	na	705,599

* Based upon the mean hourly wage for Compensation, Benefits, and Job Analysis Specialists occupation code 13–1141, at *https://www.bls.gov/oes/current/oes131141.htm* (U.S. Department of Labor, Bureau of Labor Statistics.)

Request for Comments

In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501–3521, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ health care research and health care information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Dated: October 28, 2019.

Virginia L. Mackay-Smith,

Associate Director.

BILLING CODE 4160–90–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Supplemental Evidence and Data Request on Interventions for Dyspnea in Patients With Advanced Cancer

AGENCY: Agency for Healthcare Research and Quality (AHRQ), HHS.

ACTION: Request for supplemental evidence and data submissions.

SUMMARY: The Agency for Healthcare Research and Quality (AHRQ) is seeking scientific information submissions from the public. Scientific information is being solicited to inform our review on *Interventions for Dyspnea in Patients with Advanced Cancer,* which is currently being conducted by the

AHRQ's Evidence-based Practice Centers (EPC) Program. Access to published and unpublished pertinent scientific information will improve the quality of this review.

DATES: *Submission Deadline* by 30 days after date of publication of this notice.

ADDRESSES: *Email submissions: epc@ahrq.hhs.gov.*

Print submissions:

Mailing Address: Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E53A, Rockville, MD 20857.

Shipping Address (FedEx, UPS, etc.): Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E77D, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Jenae Benns, Telephone: 301–427–1496 or email: *epc@ahrq.hhs.gov*.

SUPPLEMENTARY INFORMATION: The Agency for Healthcare Research and Quality has commissioned the Evidence-based Practice Centers (EPC) Program to complete a review of the evidence for *Interventions for Dyspnea in Patients with Advanced Cancer*. AHRQ is conducting this systematic review pursuant to Section 902(a) of the Public Health Service Act, 42 U.S.C. 299a(a).

The EPC Program is dedicated to identifying as many studies as possible that are relevant to the questions for each of its reviews. In order to do so, we are supplementing the usual manual and electronic database searches of the literature by requesting information from the public (*e.g.,* details of studies conducted). We are looking for studies that report on *Interventions for Dyspnea in Patients with Advanced Cancer,* including those that describe adverse events. The entire research protocol is available online at: *https://effectivehealthcare.ahrq.gov/products/dyspnea-advanced-cancer/protocol*.

This is to notify the public that the EPC Program would find the following information on Interventions for Dyspnea in Patients with Advanced Cancer helpful:

▪ A list of completed studies that your organization has sponsored for this indication. In the list, please *indicate whether results are available on ClinicalTrials.gov along with the ClinicalTrials.gov trial number.*

▪ *For completed studies that do not have results on ClinicalTrials.gov,* a summary, including the following elements: Study number, study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, primary and secondary outcomes, baseline characteristics, number of patients screened/eligible/enrolled/lost to follow-up/withdrawn/analyzed, effectiveness/efficacy, and safety results.

▪ *A list of ongoing studies that your organization has sponsored for this indication.* In the list, please provide the ClinicalTrials.gov trial number or, if the trial is not registered, the protocol for the study including a study number, the study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, and primary and secondary outcomes.

▪ Description of whether the above studies constitute *ALL Phase II and above clinical trials* sponsored by your organization for this indication and an index outlining the relevant information in each submitted file.

Your contribution is very beneficial to the Program. Materials submitted must be publicly available or able to be made public. Materials that are considered confidential; marketing materials; study types not included in the review; or information on indications not included in the review cannot be used by the EPC Program. This is a voluntary request for information, and all costs for complying with this request must be borne by the submitter.

The draft of this review will be posted on AHRQ's EPC Program website and available for public comment for a period of four (4) weeks. If you would like to be notified when the draft is posted, please sign up for the email list at: *https://www.effectivehealthcare.ahrq.gov/email-updates*.

The systematic review will answer the following questions. This information is provided as background. AHRQ is not requesting that the public provide answers to these questions.

Key Questions (KQ)

1. What are the comparative benefits of non-pharmacological interventions (either alone or in combination) for improving dyspnea in patients with advanced cancer?

2. What are the comparative benefits of pharmacological interventions (either alone or in combination) for improving dyspnea in patients with advanced cancer?

3. What are the comparative benefits of non-pharmacological, pharmacological, and multimodal interventions for improving dyspnea in patients with advanced cancer?

4. What are the harms of non-pharmacological and pharmacological interventions for improving dyspnea in patients with advanced cancer?

PICOTS (Populations, Interventions, Comparators, Outcomes, Timing, Settings)

Population(s)

Patients (age ≥ 18 years of age) with advanced cancer (unlikely to be cured or unlikely to be controlled with treatment) and dyspnea.

Interventions

Non-Pharmacological Interventions (KQ 1, 3, and 4)

Respiratory Interventions

a. *Airflow/cooling:* Fan therapy, water spray, changing the room environment (cooling the room/opening a window)
b. Compressed air
c. Supplemental oxygen therapy (for hypoxemic and non-hypoxemic patients)
d. *Breathing gas:* Heliox
e. Noninvasive Positive-Pressure Ventilation (Bilevel positive airway pressure (BiPAP)/Continuous positive airway pressure (CPAP))

Behavioral and Psychoeducational Interventions

a. Cognitive-behavioral therapy (CBT)
b. Other behavioral interventions (may include components such as other psychosocial interventions, teaching problem-solving or coping and adaptation strategies, relaxation/distraction techniques, biofeedback, energy conservation)

Activity and Rehabilitation Interventions

a. Walking aids/mobility aids
b. Exercise (healthcare professional-guided exercise, physical therapy, occupational therapy, aerobic exercise, non-aerobic exercise, isometric exercise, tai chi, qigong)
c. Respiratory training
d. Pulmonary rehabilitation
e. Chest wall vibration
f. Neuromuscular electrical stimulation (NMES)

Complementary and Alternate Medicine Interventions

a. Acupuncture
b. Acupressure
c. Reiki
d. Mindfulness
e. Yoga
f. Meditation
g. Music therapy

Combination of any of the above

Pharmacological interventions (drugs approved by the Food and Drug Administration (FDA) for any indication) (KQ 2, 3, and 4).

Any routes of administration for all drug classes are included.

- Bronchodilators
  a. *Beta-adrenergic receptor agonists:* Albuterol, arformoterol, formoterol, indaceterol, levalbuterol, olodaterol, terbutaline, vilanterol
  b. *Antimuscarinics:* Aclidinium, atropine, glycopyrrolate, ipratropium, scopolamine, tiotropium, umeclidinium
  c. *Methylxanthines:* Theophylline, aminophylline, caffeine
- Nebulized saline
- *Corticosteroids:* Beclomethasone, betamethasone, budesonide, ciclesonide, dexamethasone, flunisolide, fluticasone, hydrocortisone, methylprednisolone, mometasone, prednisone
- *Diuretics:* Amiloride, bumetanide, ethacrynic acid, furosemide, hydrochlorothiazide, indapinide, metolazone, spironolactone, torsemide, triamterine
- Lidocaine
- *Non-steroidal anti-inflammatory agents:* Celecoxib, diclofenac, diflusinal, etodolac, fenoprofen, flurbiprofen, ibuprofen, indomethacin, ketoprofen, ketorolac, meloxicam, nabumetone, naproxen, oxaprozin, piroxicam, salsalate, sulindac, tolmetin
- *Phenothiazines:* Promethazine, prochlorperazine, chlorpromazine, thioridazine
- *Atypical antipsychotics:* Aripiprazole, asenapine, brexpiprazole, cariprazine, clozapine, haloperidol, iloperidone, lurasidone, olanzapine, paliperidone, pimavanserin, quetiapine, risperidone, ziprasidone
- *Gamma-Aminobutyric acid (GABA) analog anticonvulsants:* Gabapentin, pregabalin
- *Opioids:* Buprenorphine, codeine, dihydrocodeine, fentanyl, hydrocodone, hydromorphone, methadone, morphine, oxycodone, oxymorphone, tapentadol, tramadol
- Anxiolytics
  a. *Benzodiazepines:* Alprazolam, clonazepam, diazepam, lorazepam, midazolam, oxazepam, temazepam
  b. *Serotonin-norepinephrine reuptake inhibitors (SNRIs)/Selective serotonin reuptake inhibitors (SSRIs):* Citalopram, desvenlafaxine, duloxetine, escitalopram, fluoxetine, fluvoxamine, levomilnacipran, milnacipran, paroxetine, sertraline, venlafaxine
  c. *Other:* Bupropion, buspirone, mirtazapine
- Combinations of any of the above

Combinations of Nonpharmacologic and Pharmacologic or Multimodal Interventions

Comparators

- KQ 1: Placebo, usual care, other non-pharmacological intervention or a combination of non-pharmacological interventions
- KQ 2: Placebo, usual care, other pharmacological intervention or dose or route, or a combination of pharmacological interventions
- KQ 3: Placebo, usual care, non-pharmacological interventions, pharmacologic interventions, or multimodal interventions (*e.g.,* opioids versus respiratory training, or acupuncture versus morphine versus combination acupuncture and morphine)
- KQ 4: Any of the comparators for KQ 1, KQ 2, or KQ 3

Outcomes

Patient- or Caregiver-Reported, or Observational Symptom-Related Outcomes (KQ1–3)

Caregiver-Reported or Observational Symptom-Related Only if Patients are Unable to Self-Report

- Dyspnea as measured by a validated tool, which must include *patient- or caregiver-reported or observational symptom-related measures* of breathing difficulty or discomfort
- Anxiety as measured by a validated tool. This tool must include *patient- or caregiver-reported* measures of anxiety
- Functional status (measured by validated *patient- or caregiver-reported tool*)
- Health-related quality of life (general or disease-specific, measured by a validated patient- or caregiver-reported tool)

Clinical or Utilization Health Outcomes (KQ1–4)

- Respiratory rate
- Oxygen or carbon dioxide/bicarbonate levels
- Heart rate
- Blood pressure
- Objective measure of functional capacity, *e.g.,* 6-minute walk test
- Level of sedation
- Utilization outcomes linked to dyspnea: hospitalizations, intensive care unit stays, emergency room visits

Patient-Centered Adverse Effects of Dyspnea Treatments (KQ4)

- Central nervous system (cognitive changes, dizziness, drowsiness, fatigue, headache, respiratory depression)
- Gastrointestinal (constipation, nausea, vomiting)
- Pruritus
- Urinary retention, dry mouth
- Opioid use disorder
- Discomfort or distress from equipment, *e.g.,* oxygen or masks
- Death
- Dropouts

Timing: Any Duration of Follow-up

Setting: Any Setting

Study Design: RCTs for all KQ

- For KQ1–3: RCTs, nonrandomized controlled trials, and observational studies with a concurrent comparison group, with at least 10 patients in each group
- For KQ 4: RCTs, nonrandomized controlled trials, observational studies with a concurrent comparison group, and prospective or retrospective cohort studies where the primary objective of the study is to evaluate harms from dyspnea treatments

Dated: October 28, 2019.

[Docket No. FDA–2012–N–0977]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Regulations Restricting the Sale and Distribution of Cigarettes and Smokeless Tobacco To Protect Children and Adolescents

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Fax written comments on the collection of information by December 2, 2019.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, Fax: 202–

395–7285, or emailed to *oira_submission@omb.eop.gov.* All comments should be identified with the OMB control number 0910–0312. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10 a.m.–12 p.m., 11601 Landsdown St., North Bethesda, MD 20852, 301–796–8867, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Regulations Restricting the Sale and Distribution of Cigarettes and Smokeless Tobacco To Protect Children and Adolescents—21 CFR 1140.30

OMB Control Number 0910–0312—Extension

This is a request for an extension of OMB approval for the information collection requirements contained in FDA's regulations for cigarettes and smokeless tobacco containing nicotine. The regulations that are codified at 21 CFR part 1140 are authorized by section 102 of the Family Smoking Prevention and Tobacco Control Act (Tobacco Control Act) (Pub. L. 111–31). Section 102 of the Tobacco Control Act required FDA to publish a final rule regarding cigarettes and smokeless tobacco identical in its provisions to the regulation issued by FDA in 1996 (61 FR 44396, August 28, 1996), with certain specified exceptions including that subpart C (which included 21 CFR 897.24) and 21 CFR 897.32(c) be removed from the reissued rule (section 102(a)(2)(B)). The reissued final rule was published in the **Federal Register** of March 19, 2010 (75 FR 13225).

This collection includes reporting information requirements for § 1140.30 (21 CFR 1140.30), which directs persons to notify FDA if they intend to use a form of advertising that is not addressed in the regulations and not originally described in the March 19, 2010, final rule. Section 1140.30 requires manufacturers, distributors, and retailers to (1) observe certain format and content requirements for labeling and advertising and (2) notify FDA if they intend to use an advertising medium that is not listed in the regulations. The concept of permitted advertising in § 1140.30 is sufficiently broad to encompass most forms of advertising.

In the **Federal Register** of May 17, 2019 (84 FR 22496), FDA published a 60-day notice requesting public comment on the proposed collection of information. One comment was received that was PRA related. The commenter stated that this program is ineffective and has no effect on whether Americans smoke. FDA disagrees. Section 1140.30 is intended to help protect children and adolescents by reducing the appeal of cigarettes and smokeless tobacco to them. Section 1140.30, in part, contains a comprehensive list of permissible forms of advertising and labeling; in the unlikely event that a person wishes to use a form of advertising or labeling that is not described in § 1140.30, the section directs respondents to notify FDA of the form of advertising or labeling they intend to use.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
1140.30—Scope of permissible forms of labeling and advertising	25	1	25	1	25

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

The burden hour estimates for this collection of information were based on industry-prepared data and information regarding cigarette and smokeless tobacco product advertising expenditures.

FDA estimates that approximately 25 respondents will submit an annual notice of alternative advertising, and the Agency has estimated it should take 1 hour to provide such notice. Therefore, FDA estimates that the total time required for this collection of information is 25 hours.

We have adjusted our burden estimate to approximately 25 notifications annually, which more accurately reflects the current number of submissions under this regulation. This is a decrease to the currently approved burden. The decrease in notifications is not unexpected given that the regulation applies to cigarettes and smokeless tobacco and many of the alternative media notifications have been made in previous years.

Dated: October 23, 2019.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2019–P–2982]

Determination That MEXITIL (Mexiletine Hydrochloride) Capsules, 150 Milligrams, 200 Milligrams, and 250 Milligrams, Were Not Withdrawn From Sale for Reasons of Safety or Effectiveness

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) has determined that MEXITIL (mexiletine hydrochloride) capsules, 150 milligrams (mg), 200 mg, and 250 mg, were not withdrawn from sale for reasons of safety or effectiveness. This determination will allow FDA to approve abbreviated new drug applications (ANDAs) for MEXITIL (mexiletine hydrochloride) capsules, 150 mg, 200 mg, and 250 mg, if all other legal and regulatory requirements are met.

FOR FURTHER INFORMATION CONTACT: Carlarease Hunter, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6213, Silver Spring, MD 20993–0002, 301–796–3702, *Carlarease.Hunter@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In 1984, Congress enacted the Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) (the 1984 amendments), which authorized the approval of duplicate versions of drug products under an

ANDA procedure. ANDA applicants must, with certain exceptions, show that the drug for which they are seeking approval contains the same active ingredient in the same strength and dosage form as the ''listed drug,'' which is a version of the drug that was previously approved. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA).

The 1984 amendments include what is now section 505(j)(7) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)(7)), which requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the ''Approved Drug Products With Therapeutic Equivalence Evaluations,'' which is known generally as the ''Orange Book.'' Under FDA regulations, drugs are removed from the list if the Agency withdraws or suspends approval of the drug's NDA or ANDA for reasons of safety or effectiveness or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

A person may petition the Agency to determine, or the Agency may determine on its own initiative, whether a listed drug was withdrawn from sale for reasons of safety or effectiveness. This determination may be made at any time after the drug has been withdrawn from sale but must be made prior to approving an ANDA that refers to the listed drug (§ 314.161 (21 CFR 314.161)). FDA may not approve an ANDA that does not refer to a listed drug.

MEXITIL (mexiletine hydrochloride) is the subject of NDA 018873, held by Boehringer Ingelheim Pharmaceuticals, Inc., and initially approved on December 30, 1985. MEXITIL (mexiletine hydrochloride) capsules, 150 mg, 200 mg, and 250 mg, are indicated for the treatment of documented ventricular arrhythmias, such as sustained ventricular tachycardia, that, in the judgment of the physician, are life-threatening.

MEXITIL (mexiletine hydrochloride) capsules, 150 mg, 200 mg, and 250 mg, are currently listed in the ''Discontinued Drug Product List'' section of the Orange Book.

Hetero Labs Limited submitted a citizen petition dated June 19, 2019 (Docket No. FDA–2019–P–2982), under 21 CFR 10.30, requesting that the Agency determine whether MEXITIL (mexiletine hydrochloride) capsules, 150 mg, 200 mg, and 250 mg, were withdrawn from sale for reasons of safety or effectiveness.

After considering the citizen petition and reviewing Agency records and based on the information we have at this time, FDA has determined under § 314.161 that MEXITIL (mexiletine hydrochloride) capsules, 150 mg, 200 mg, and 250 mg, were not withdrawn for reasons of safety or effectiveness.

The petitioner has identified no data or other information suggesting that MEXITIL (mexiletine hydrochloride) capsules, 150 mg, 200 mg, and 250 mg, were withdrawn for reasons of safety or effectiveness. We have carefully reviewed our files for records concerning the withdrawal of MEXITIL (mexiletine hydrochloride) capsules, 150 mg, 200 mg, and 250 mg, from sale. We have also independently evaluated relevant literature and data for possible postmarketing adverse events. We have reviewed the available evidence and determined that this drug product was not withdrawn from sale for reasons of safety or effectiveness.

Accordingly, the Agency will continue to list MEXITIL (mexiletine hydrochloride) capsules, 150 mg, 200 mg, and 250 mg, in the ''Discontinued Drug Product List'' section of the Orange Book. The ''Discontinued Drug Product List'' delineates, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness. ANDAs that refer to MEXITIL (mexiletine hydrochloride) capsules, 150 mg, 200 mg, and 250 mg, may be approved by the Agency as long as they meet all other legal and regulatory requirements for the approval of ANDAs. If FDA determines that labeling for this drug product should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

Dated: October 28, 2019.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2012–D–0880]

Assessing User Fees Under the Generic Drug User Fee Amendments of 2017; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''Assessing User Fees under the Generic Drug User Fee Amendments of 2017.'' This draft guidance provides stakeholders information regarding the implementation of the Generic Drug User Fee Amendments of 2017 (GDUFA II) and policies and procedures surrounding its application. This draft guidance revises and replaces FDA's draft guidance for industry entitled ''Assessing User Fees under the Generic Drug User Fee Amendments of 2017,'' published in October 2017.

DATES: Submit either electronic or written comments on the draft guidance by December 31, 2019 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for

information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2012–D–0880 for ''Assessing User Fees Under the Generic Drug User Fee Amendments of 2017; Draft Guidance for Industry.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of this draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Keith Verrett, Division of User Fee Management and Budget Formulation Staff, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, Rm. 2179, Silver Spring, MD 20993, 301–796–7900, *CDERCollections@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''Assessing User Fees under the Generic Drug User Fee Amendments of 2017.'' GDUFA II (Pub. L. 115–52, Title III), signed into law by the President on August 18, 2017, continues FDA's and industry's goal to improve public access to safe and effective generic drugs and to improve upon the predictability of the review process. GDUFA II extends FDA's authority to collect user fees from fiscal year (FY) 2018 to FY 2022 and introduces a number of technical revisions that affect what fees are collected and how some fees are collected.

The draft guidance announced in this notice revises and replaces the draft guidance for industry on ''Assessing User Fees under the Generic Drug User Fee Amendments of 2017.'' This draft guidance addresses changes in user fee assessments from GDUFA I, user fees incurred by industry under GDUFA II, payment procedures, reconsideration and appeals, and other additional information to assist industry in complying with GDUFA II. Clarifying language was added to the revised draft guidance based on the public comments submitted for the draft guidance.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Assessing User Fees Under the Generic Drug User Fee Amendments of 2017.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

This draft guidance contains information collection provisions that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The draft guidance refers to collections of information for filling out and submitting Form FDA 3913 (User Fee Payment Refund Request), previously approved under OMB control number 0910–0805, and Form FDA 3914 (User Fee Payment Transfer Request), previously approved under OMB control number 0910–0805.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at either *https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *https://www.regulations.gov.*

Dated: October 28, 2019.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2019–D–4042]

Chronic Hepatitis D Virus Infection: Developing Drugs for Treatment; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''Chronic Hepatitis D Virus Infection: Developing Drugs for Treatment.'' The purpose of this draft guidance is to assist sponsors in all phases of development of antiviral drugs for the treatment of chronic hepatitis D virus (HDV) infection. This guidance is intended to provide consistent FDA advice to stakeholders regarding HDV drug development strategies.

DATES: Submit either electronic or written comments on the draft guidance by December 31, 2019 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2019–D–4042 for ''Chronic Hepatitis D Virus Infection: Developing Drugs for Treatment.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Aimee Hodowanec, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 6341, Silver Spring, MD 20993–0002, 240–402–5752.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''Chronic Hepatitis D Virus Infection: Developing Drugs for Treatment.'' The purpose of this draft guidance for industry is to provide consistent recommendations for the development of antiviral drugs for the treatment of chronic HDV infection. The guidance addresses all phases of drug development, from nonclinical considerations to phase 3 trial design recommendations.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Chronic Hepatitis D Virus Infection: Developing Drugs for Treatment.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520). The collection of information in 21 CFR part 314 for the submission of new drug applications (NDAs) has been approved under OMB control number 0910–0001. The submission of biologics license applications (BLAs) has been approved under OMB control number 0910–0338. The collection of information in 21 CFR part 312, including submissions under subpart E, has been approved under OMB control number 0910–0014. The submission of prescription drug labeling under 21 CFR 201.56 and 201.57 has been approved under OMB control number 0910–0572. The submission of medication guides under 21 CFR part 208 has been approved under OMB control number 0910–0393. The submission of prescription drug advertisements under 21 CFR 202.1 has been approved under OMB control number 0910–0686.

The collection of information in the guidance for industry entitled ''Formal Meetings between the FDA and Sponsors or Applicants of PDUFA (Prescription Drug User Fee Act) Products'' (available at *https://www.fda.gov/media/109951/download*), including requests for pre-NDA and pre-BLA meetings and other meetings, has been approved under OMB control number 0910–0429. The collection of information in the guidance for industry entitled ''Expedited Programs for Serious Conditions—Drugs and Biologics'' (available at *https://www.fda.gov/media/86377/download*), including fast track designation, breakthrough therapy designation, accelerated approval, and priority review designation, has been approved under OMB control number 0910–0765.

In accordance with the PRA, prior to publication of any final guidance document, FDA intends to solicit public comment and obtain OMB approval for any information collections recommended in this guidance that are new or that would represent material modifications to those previously approved collections of information found in FDA regulations or guidances.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at either *https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *https://www.regulations.gov.*

Dated: October 29, 2019.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2019–N–0001]

Office of Minority Health and Health Equity Public Meeting on Strategies To Improve Health Equity Amidst the Opioid Crisis; Public Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public meeting.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing the following public meeting entitled ''Office of Minority Health and Health Equity Public Meeting on Strategies to Improve Health Equity Amidst the Opioid Crisis.'' The purpose of this public meeting is to share information and obtain the public's perspectives on the current opioid crisis and how it specifically affects racial and ethnic minority, underrepresented, and underserved populations across the country, approaches to prevent and treat opioid use disorder, and emerging research to improve care, and explore how FDA can support those efforts.

DATES: The public meeting will be held on November 21, 2019, from 9 a.m. to 4 p.m. See the **SUPPLEMENTARY INFORMATION** section for registration date and information.

ADDRESSES: Hilton Washington, DC/Rockville Hotel & Executive Meeting Center, 1750 Rockville Pike, Rockville, MD 20852, 301–468–1100.

FOR FURTHER INFORMATION CONTACT: Jovonni Spinner, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 2384, Silver Spring, MD 20993, 301–796–8729, *Jovonni.Spinner@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The Office of Minority Health and Health Equity's (OMHHE) mission is to ''promote and protect the health of diverse populations through research and communication that addresses health disparities.'' Racial and ethnic minorities have experienced an increase in opioid-involved overdose deaths over the past few years. For example, the rate of opioid-involved overdose death nearly doubled among Black/non-Hispanic populations between 2015 (6.6 per 100,000 population) and 2017 (12.9 per 100,000 population) (Ref. 1). It has also been shown that racial and ethnic minority populations suffer from chronic pain at higher rates than other populations and the evaluation and treatment for pain management may vary across ethnic groups (Ref. 2). The opioid crisis is a multifaceted issue and our aim is to convene diverse stakeholders to stimulate dialogue that will highlight and bring about solutions to improve the health of the communities we serve. Meeting discussions will inform future programming for the OMHHE.

II. Participating in the Public Meeting

Registration: To register for the public meeting, please visit the following website to register: *https://www.eventbrite.com/e/fda-omhhe-strategies-to-improve-health-equity-amidst-the-opioid-epidemic-tickets-70822278341.* Please provide complete contact information for each attendee, including name, title, affiliation, address, email, and telephone. Anonymous registration is available. Registration is free and based on space availability, with priority given to early registrants. Persons interested in attending this public meeting must register by 11:59 p.m. Eastern Time, November 15, 2019. Early registration is recommended because seating is limited; therefore, FDA may limit the number of participants from each organization. Registrants will receive confirmation when they have been accepted. If time and space permit, onsite registration on the day of the public meeting will be provided beginning at 8 a.m. We will let registrants know if registration closes before the day of the public meeting/public workshop.

If you need special accommodations due to a disability, please contact Jovonni Spinner at 301–796–8729 or *Jovonni.Spinner@fda.hhs.gov* no later than November 7, 2019.

Streaming Webcast of the Public Meeting: This public meeting will also be webcast: *https://www.eventbrite.com/e/fda-omhhe-strategies-to-improve-health-equity-amidst-the-opioid-epidemic-tickets-70822278341.*

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Current List of HHS-Certified Laboratories and Instrumented Initial Testing Facilities Which Meet Minimum Standards To Engage in Urine Drug Testing for Federal Agencies

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (HHS) notifies federal agencies of the laboratories and Instrumented Initial Testing Facilities (IITF) currently certified to meet the standards of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines).

A notice listing all currently HHS-certified laboratories and IITFs is published in the **Federal Register** during the first week of each month. If any laboratory or IITF certification is suspended or revoked, the laboratory or IITF will be omitted from subsequent lists until such time as it is restored to full certification under the Mandatory Guidelines.

If any laboratory or IITF has withdrawn from the HHS National Laboratory Certification Program (NLCP) during the past month, it will be listed at the end and will be omitted from the monthly listing thereafter.

This notice is also available on the internet at *http://www.samhsa.gov/workplace.*

FOR FURTHER INFORMATION CONTACT: Charles LoDico, Division of Workplace Programs, SAMHSA/CSAP, 5600 Fishers Lane, Room 16N02C, Rockville, Maryland 20857; 240–276–2600 (voice).

SUPPLEMENTARY INFORMATION: The Department of Health and Human Services (HHS) notifies federal agencies of the laboratories and Instrumented Initial Testing Facilities (IITF) currently certified to meet the standards of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines). The Mandatory Guidelines were first published in the **Federal Register** on April 11, 1988 (53 FR 11970), and subsequently revised in the **Federal Register** on June 9, 1994 (59 FR 29908); September 30, 1997 (62 FR 51118); April 13, 2004 (69 FR 19644); November 25, 2008 (73 FR 71858); December 10, 2008 (73 FR 75122); April 30, 2010 (75 FR 22809); and on January 23, 2017 (82 FR 7920).

The Mandatory Guidelines were initially developed in accordance with Executive Order 12564 and section 503 of Public Law 100–71. The ''Mandatory Guidelines for Federal Workplace Drug Testing Programs,'' as amended in the revisions listed above, requires strict standards that laboratories and IITFs must meet in order to conduct drug and specimen validity tests on urine specimens for federal agencies.

To become certified, an applicant laboratory or IITF must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification, a laboratory or IITF must participate in a quarterly performance testing program plus undergo periodic, on-site inspections.

Laboratories and IITFs in the applicant stage of certification are not to be considered as meeting the minimum requirements described in the HHS Mandatory Guidelines. A HHS-certified laboratory or IITF must have its letter of certification from HHS/SAMHSA (formerly: HHS/NIDA), which attests that it has met minimum standards.

In accordance with the Mandatory Guidelines dated January 23, 2017 (82 FR 7920), the following HHS-certified laboratories and IITFs meet the minimum standards to conduct drug and specimen validity tests on urine specimens:

HHS-Certified Instrumented Initial Testing Facilities

Dynacare, 6628 50th Street NW, Edmonton, AB Canada T6B 2N7, 780–784–1190 (Formerly: Gamma-Dynacare Medical Laboratories)

---

* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Pacific Toxicology Laboratories, 9348 DeSoto Ave., Chatsworth, CA 91311, 800–328–6942 (Formerly: Centinela Hospital Airport Toxicology Laboratory)

Pathology Associates Medical Laboratories, 110 West Cliff Dr., Spokane, WA 99204, 509–755–8991/800–541–7891x7

Phamatech, Inc., 15175 Innovation Drive, San Diego, CA 92128, 888–635–5840

Quest Diagnostics Incorporated, 1777 Montreal Circle, Tucker, GA 30084, 800–729–6432 (Formerly: SmithKline Beecham Clinical Laboratories; SmithKline Bio-Science Laboratories)

Quest Diagnostics Incorporated, 400 Egypt Road, Norristown, PA 19403, 610–631–4600/877–642–2216 (Formerly: SmithKline Beecham Clinical Laboratories; SmithKline Bio-Science Laboratories)

Redwood Toxicology Laboratory, 3700 Westwind Blvd., Santa Rosa, CA 95403, 800–255–2159

US Army Forensic Toxicology Drug Testing Laboratory, 2490 Wilson St., Fort George G. Meade, MD 20755–5235, 301–677–7085, Testing for Department of Defense (DoD) Employees Only

The following laboratory is voluntarily withdrawing from the National Laboratory Certification Program (NLCP) effective November 1, 2019 and November 7, 2019 respectively:

Baptist Medical Center-Toxicology Laboratory, 11401 I–30, Little Rock, AR 72209–7056, 501–202–2783 (Formerly: Forensic Toxicology Laboratory Baptist Medical Center), Withdrawing from NLCP effective November 1, 2019

ACM Medical Laboratory, Inc., 160 Elmgrove Park, Rochester, NY 14624, 844–486–9226, Withdrawing from NLCP effective November 7, 2019

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory (**Federal Register**, July 16, 1996) as meeting the minimum standards of the Mandatory Guidelines published in the **Federal Register** on January 23, 2017 (82 FR 7920). After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in the NLCP certification maintenance program.

Charles P. LoDico,

Chemist.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2019–0002; Internal Agency Docket No. FEMA–B–1968]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before January 30, 2020.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location *https://www.fema.gov/preliminaryfloodhazarddata* and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–1968, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *https://www.floodsrp.org/pdfs/srp_overview.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location *https://www.fema.gov/preliminaryfloodhazarddata* and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2019–0002; Internal Agency Docket No. FEMA–B–1971]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Federal Regulations. The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will be finalized on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Insurance and Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2008–0010]

Board of Visitors for the National Fire Academy

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Committee management; notice of open Federal Advisory Committee meeting.

SUMMARY: The Board of Visitors for the National Fire Academy (Board) will meet via teleconference on Wednesday, December 18, 2019. The meeting will be open to the public.

DATES: The meeting will take place on Wednesday, December 18, 2019, 9:30 a.m. to 11:30 a.m. Eastern Daylight Time (EDT). Please note that the meeting may close early if the Board has completed its business.

ADDRESSES: Members of the public who wish to participate in the teleconference should contact Deborah Gartrell-Kemp as listed in the **FOR FURTHER INFORMATION CONTACT** section by close of business December 10, 2019, to obtain the call-in number and access code for the December 18, 2019, meeting. For more information on services for individuals with disabilities or to request special assistance, contact Debbie Gartrell-Kemp as soon as possible.

To facilitate public participation, we are inviting public comment on the issues to be considered by the Board as listed in the **SUPPLEMENTARY INFORMATION** section. Participants seeking their comments to be considered during the meeting should submit them in advance or during the public comment segment. Comments submitted up to 30 days after the meeting will be included in the public record and may be considered at the next meeting. Comments submitted in advance must be identified by Docket ID FEMA–2008–0010 and may be submitted by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail/Hand Delivery:* Deborah Gartrell-Kemp, 16825 South Seton Avenue, Emmitsburg, Maryland 21727, post marked no later than December 1, 2019.

Instructions: All submissions received must include the words "Federal Emergency Management Agency" and the Docket ID for this action. Comments received will be posted without alteration at *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received by the National Fire Academy Board of Visitors, go to *http://www.regulations.gov,* click on "Advanced Search," then enter "FEMA–2008–0010" in the "By Docket ID" box, then select "FEMA" under "By Agency," and then click "Search."

FOR FURTHER INFORMATION CONTACT:

Alternate Designated Federal Officer: Kirby E. Kiefer, telephone (301) 447–1117, email *Kirby.Kiefer@fema.dhs.gov.*

Logistical Information: Deborah Gartrell-Kemp, telephone (301) 447–7230, email *Deborah.GartrellKemp@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. appendix.

Purpose of the Board

The purpose of the Board is to review annually the programs of the National Fire Academy (Academy) and advise the Administrator of the Federal Emergency Management Agency (FEMA), through the United States Fire Administrator, on the operation of the Academy and any improvements therein that the Board deems appropriate. In carrying out its responsibilities, the Board examines Academy programs to determine whether these programs further the basic missions that are approved by the Administrator of FEMA, examines the physical plant of the Academy to determine the adequacy of the Academy's facilities, and examines the funding levels for Academy programs. The Board submits a written annual report through the United States Fire Administrator to the Administrator of FEMA. The report provides detailed comments and recommendations regarding the operation of the Academy.

Agenda

On Wednesday, December 18, 2019, there will be four sessions, with deliberations and voting at the end of each session as necessary. The board will discuss the following:

1. United States Fire Administration Data, Research, Prevention and Response.
2. Deferred maintenance and capital improvements on the National Emergency Training Center campus and Fiscal Year 2020 Budget Request/Budget Planning.
3. Recommendations on Academy program activities to include

developments, deliveries, staffing, and admissions.

4. Updates on the Board of Visitors Subcommittee Groups for the Professional Development Initiative Update and the National Fire Incident Report System.

There will be a 10-minute comment period after each agenda item and each speaker will be given no more than 2 minutes to speak. Please note that the public comment period may end before the time indicated following the last call for comments. Contact Deborah Gartrell-Kemp to register as a speaker. Meeting materials will be posted at *https://www.usfa.fema.gov/training/nfa/about/bov.html* by December 10, 2019.

Tonya L. Hoover,

Superintendent, National Fire Academy, United States Fire Administration, Federal Emergency Management Agency.

Fish and Wildlife Service

[FWS–R8–ES–2019–N064; FXES11140800000–189–FF08EVEN00]

Draft Habitat Conservation Plan for Eight Species; Draft Environmental Impact Statement for the Habitat Conservation Plan for Fort Ord, Monterey County, California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have received an incidental take permit application under the Endangered Species Act of 1973, as amended. The permit would authorize take of the federally threatened California tiger salamander, California red-legged frog, and western snowy plover, and the federally endangered Smith's blue butterfly, incidental to otherwise lawful activities associated with commercial, residential and recreational development, recreational use, and habitat management within portions of the former Fort Ord Army base in the draft habitat conservation plan (HCP). We invite public comment on the applicant's draft HCP and the draft environmental impact statement, which the Service prepared in response to the application for an incidental take permit.

DATES: Written comments must be received on or before December 16, 2019.

ADDRESSES:

To obtain documents: You may download a copy of the draft habitat conservation plan and environmental impact statement at *http://www.fws.gov/ventura/,* or you may request copies of the documents by sending U.S. mail to our Ventura office (see below), or by phone (see **FOR FURTHER INFORMATION CONTACT**). For information on reviewing U.S. Environmental Protection Agency (EPA) comments on the draft EIS, see EPA's Role in the EIS Process under **SUPPLEMENTARY INFORMATION**.

To submit written comments: Please send us your written comments using one of the following methods:

- *U.S. mail:* Send your comments to Stephen P. Henry, Field Supervisor, Ventura Fish and Wildlife Office, U.S. Fish and Wildlife Service, 2493 Portola Road, Suite B, Ventura, CA 93003.
- *Facsimile:* Fax your comments to 805–644–3958.
- *Electronic Mail:* Send your comments to *fw8fortordhcp@fws.gov.*

FOR FURTHER INFORMATION CONTACT: Leilani Takano, Assistant Field Supervisor, by phone at 805–644–1766, at the Ventura address in **ADDRESSES**, or via the Federal Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), have received an application for an incidental take permit (ITP) pursuant to section 10(a)(1)(B) of the Endangered Species Act, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant has developed a draft habitat conservation plan (HCP) for the project that includes measures to mitigate and avoid/minimize impacts to the federally threatened California tiger salamander (*Ambystoma californiense*), California red-legged frog (*Rana draytonii*), western snowy plover (*Charadrius nivosus nivosus*), and Monterey spineflower (*Chorizanthe pungens* var. *pungens*); the federally endangered Smith's blue butterfly (*Euphilotes enoptes smithi*), Monterey (sand) gilia (*Gilia tenuiflora* ssp. *arenaria*), and Yadon's piperia (*Piperia yadonii*); and the State endangered seaside bird's beak (*Cordylanthus rigidus* ssp. *littoralis*). The permit would authorize take of the California tiger salamander, California red-legged frog, western snowy plover, and Smith's blue butterfly incidental to otherwise lawful activities associated with the Fort Ord HCP. We invite public comment on the application, the draft HCP, and draft environmental impact statement (EIS).

Background

The California tiger salamander was listed as threatened on August 4, 2004 (69 FR 47212); the California red-legged frog was listed as threatened on May 23, 1996 (61 FR 25813); the western snowy plover was listed as threatened on March 5, 1993 (58 FR 12864); the Monterey spineflower was listed as threatened on February 4, 1994 (59 FR 5499); the Smith's blue butterfly was listed as endangered on June 1, 1976 (41 FR 22041); the Monterey (sand) gilia was listed as endangered on June 22, 1992 (57 FR 27848); and the Yadon's piperia was listed as endangered on August 12, 1998 (63 FR 43100). The seaside bird's beak has no Federal status, but was listed as endangered by the State of California in 1982 (*https://www.dfg.ca.gov/wildlife/nongame/list.html*), and the applicant has chosen to address this species in the HCP to facilitate State permitting.

Section 9 of the ESA and its implementing regulations in effect at the time the above-referenced species were listed prohibited the take of fish or wildlife species listed as endangered or threatened. ''Take'' is defined under the ESA to include the following activities: ''[T]o harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct'' (16 U.S.C. 1532); however, under section 10(a)(1)(B) of the ESA, we may issue permits to authorize incidental take of listed fish or wildlife species. ''Incidental take'' is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Regulations governing incidental take permits for threatened and endangered species are in the Code of Federal Regulations (CFR) at 50 CFR 17.32 and 17.22, respectively. Under the ESA, protections for federally listed plants differ from the protections afforded to federally listed animals. Issuance of an incidental take permit also must not jeopardize the existence of federally listed fish, wildlife, or plant species. The permittees would receive assurances under our ''No Surprises'' regulations ((50 CFR 17.22(b)(5) and 17.32(b)(5)) regarding conservation activities for the California tiger salamander, California red-legged frog, western snowy plover, Monterey spineflower, Smith's blue butterfly, Monterey (sand) gilia, Yadon's piperia, and seaside bird's beak.

Applicant's Proposed Activities

The applicant has applied for a permit for incidental take of the California tiger salamander, California red-legged frog, western snowy plover, and Smith's blue butterfly. Take is likely to occur in association with activities necessary to develop and use commercial, residential, and recreational facilities on non-Federal portions of the former Fort Ord Army base and to manage habitats within conserved areas of the former base. The site contains 4 acres of aquatic breeding habitat and 5,718 acres of upland habitat for the California tiger salamander. The site contains 4 acres of aquatic breeding habitat and 3,494 acres of upland habitat for the California red-legged frog. The site contains 71 acres of breeding, foraging, and overwintering habitat for the western snowy plover, all of which is in critical habitat designated for the species. The site contains 110 acres of habitat (for all of the species' activities) for the Smith's blue butterfly. The HCP includes measures to minimize take of the California tiger salamander, California red-legged frog, western snowy plover, and Smith's blue butterfly in the forms of injury, mortality, and harm. Mitigation for unavoidable take of the species consists of preservation and management of existing habitat and restoration of areas of degraded habitat (primarily through restoration of aquatic breeding habitat for the two amphibian species and of upland habitat for all species).

National Environmental Policy Act Compliance

The Service has developed a draft EIS in response to the ITP application in accordance with the requirements of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*). The draft EIS analyzes three alternatives. The proposed action is issuance of a base-wide ITP, which would address development and use of the former Fort Ord in accordance with the HCP. This would include unrestricted development of some undisturbed habitat areas, redevelopment of areas developed by the Army during its use of the base, and limited development within areas otherwise conserved and managed as habitat. Under the ''no action'' alternative, a base-wide ITP would not be issued and the HCP would not be implemented. Development and use of the former base would likely continue under existing local and Army-prepared planning documents and the applicant would likely apply for future project-specific ITPs. Under the ''reduced take'' alternative, a base-wide ITP would be issued, but limited development within areas otherwise conserved and managed as habitat would be eliminated.

EPA's Role in the EIS Process

The EPA is charged with reviewing all Federal agencies' EISs and commenting on the adequacy and acceptability of the environmental impacts of proposed actions in EISs. Therefore, EPA is publishing a notice in the **Federal Register** announcing this draft EIS, as required under section 309 of the Clean Air Act. The publication date of EPA's notice of availability is the official beginning of the public comment period. EPA's notices are published on Fridays. EPA serves as the repository (EIS database) for EISs prepared by Federal agencies. All EISs must be filed with EPA. You may search for EPA comments on EISs, along with EISs themselves, at *https://cdxnodengn.epa.gov/cdx-enepa-public/action/eis/search.*

Public Comments

If you wish to comment on the permit application, draft HCP, draft EIS, and associated documents, you may submit comments by one of the methods in **ADDRESSES**. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public view, we cannot guarantee that we will be able to do so.

Authority

We provide this notice under section 10 of the ESA (16 U.S.C. 1531 *et seq.*) and NEPA and its implementing regulations (40 CFR 1506.6).

Michael Long,

Acting Assistant Regional Director, Pacific Southwest Region, Sacramento, California.

Endangered and Threatened Wildlife and Plants; Draft Recovery Plan for the Gunnison Sage-Grouse

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability for review and comment.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce the availability of a draft recovery plan for Gunnison sage-grouse, a bird species listed as threatened under the Endangered Species Act. We are requesting review and comment from the public on this draft plan. The draft recovery plan includes objective, measurable criteria, and site-specific management actions as may be necessary to remove the species from the Federal List of Endangered and Threatened Wildlife.

DATES: We must receive any comments on the draft recovery plan on or before December 31, 2019.

ADDRESSES:

Document availability: Copies of the draft recovery plan are available at *http://www.fws.gov/endangered/species/recovery-plans.html.* Alternatively, you may request a copy by U.S. mail from the Colorado Ecological Services Field Office, U.S. Fish and Wildlife Service, 445 West Gunnison Avenue, #240, Grand Junction, CO 81501–5711; or via telephone at 970–628–7181.

Submitting comments: If you wish to comment on the draft recovery plan, you may submit your comments in writing by email to *gusgrecoveryplan@fws.gov,* or by U.S. mail or hand-delivery to the Field Supervisor at the address above.

Viewing public comments: Comments and materials the Service receives will be available for public inspection by appointment during normal business hours at the address above.

FOR FURTHER INFORMATION CONTACT: Ann Timberman, Field Supervisor, Colorado Ecological Services Field Office, Grand Junction, at the above U.S. mail address or telephone number (see **ADDRESSES**).

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of a draft recovery plan for Gunnison sage-grouse (*Centrocercus minimus;* hereafter, GUSG), a bird species listed as threatened under the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*). We are requesting review and comment from the public on this draft recovery plan.

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the Service's endangered species program. Recovery means improving the status of a listed species to the point at which listing is no longer necessary according to the criteria specified under section 4(a)(1) of the Act. The Act requires recovery plans for listed species unless such a plan would not promote the conservation of a particular species. To help guide recovery efforts, we prepare recovery plans to promote the conservation of the species.

The purpose of a recovery plan is to provide a recommended framework for the recovery of a species so that protection of the Act is no longer necessary. Pursuant to section 4(f) of the Act, a recovery plan must, to the maximum extent possible, include: (1) A description of site-specific management actions as may be necessary to achieve the plan's goal for the conservation and survival of the species; (2) objective, measurable criteria which, when met, would support a determination under section 4(a)(1) of the Act that the species should be removed from the List of Endangered and Threatened Species; and (3) estimates of time and costs required to carry out those measures needed to achieve the plan's goal and to achieve intermediate steps toward that goal.

We used our new recovery planning and implementation (RPI) process to develop the draft recovery plan for Gunnison sage-grouse. The RPI process helps reduce the time needed to develop and implement recovery plans, increases the relevancy of the recovery plan over longer timeframes, and adds flexibility so that the recovery plan can be more easily adjusted to new information and circumstances. Under our RPI process, a recovery plan will include the three statutorily required elements for recovery plans—objective and measurable criteria, site-specific management actions, and estimates of time and cost—along with a concise introduction and our strategy for how we plan to achieve species recovery. The RPI recovery plan is supported by a separate species status assessment (SSA) report, which provides the scientific background information and threat assessment for the species, which are key to the development of the recovery plan. A third, separate working document, called the recovery implementation strategy (RIS), steps down the more general descriptions of actions in the recovery plan to detail the specifics needed to implement the recovery plan, which improves the flexibility of the recovery plan. The RIS will be adaptable, with new information on actions incorporated, as needed, without requiring a concurrent revision to the recovery plan, unless changes to the three statutory elements are required.

On November 20, 2014, we listed GUSG as a threated species (79 FR 69192) and concurrently designated critical habitat for the species (79 FR 69312). On April 25, 2018, we agreed to complete a recovery plan in order to receive a stay of litigation. We conducted a SSA for the species and documented our analysis in an SSA report (Service 2019), which is an in-depth, scientific review of the species' biology and threats, an evaluation of its biological status, and an assessment of the resources and conditions needed to support populations over time. The SSA report provides the scientific background and threats assessment for our draft recovery plan.

In accordance with our July 1, 1994, peer review policy (59 FR 34270; July 1, 1994); our August 22, 2016, Director's Memo on the Peer Review Process; and the Office of Management and Budget's December 16, 2004, Final Information Quality Bulletin for Peer Review (revised June 2012), we solicited independent scientific reviews of the information contained in the SSA report. Results of this structured peer review process can be found at *https://www.fws.gov/mountain-prairie/science/peerReview.php.* We also submitted our SSA report to our Federal, State, and Tribal partners for their scientific review. We incorporated the results of the peer and partner review in the SSA report, as appropriate. The SSA report is the scientific foundation for the draft recovery plan.

This notice opens the public review and comment period for our draft recovery plan for the GUSG. Section 4(f) of the Act requires that we notify the public and provide an opportunity for public review and comment during the development of recovery plans. We will consider all information we receive during a public comment period when preparing the recovery plan for approval, and particularly look for comments that provide scientific rationale or background. The Service and other Federal agencies will take these comments into consideration in the course of implementing an approved final recovery plan.

Species Information

Gunnison sage-grouse (or GUSG) is a small bird in the grouse family that lives exclusively in sagebrush steppe ecosystems of southwestern Colorado and southeastern Utah. GUSG are closely associated with sagebrush (*Artemisia* spp.) ecosystems in North America (Young *et al.* 2015, p. 1). GUSG rely on ecosystems with relatively contiguous and healthy sagebrush stands for food and shelter year round, while grasses and forbs in the understory provide cover and food during the nesting and early brood-rearing periods (Connelly *et al.* 2000, p. 971).

Since the 1900s, the GUSG's occupied range has contracted, due largely to habitat loss associated with the conversion of sagebrush habitats to agriculture and residential and commercial development. GUSG now occupies an estimated 10 percent of its historical range (Schroeder *et al.* 2004, p. 370). Currently, GUSG are found in eight small populations distributed across eight counties in Colorado and one county in Utah, with seven populations located in Colorado (Gunnison Basin, Poncha Pass, Crawford, Cerro Summit-Cimarron-Sims Mesa (CSCSM), Piñon Mesa, San Miguel, and Dove Creek) and one population in Utah (Monticello). These eight populations occupy six different ecoregions, or areas delineated by common geology, landforms, soils, vegetation, climate, land use, wildlife, and hydrology (EPA 2018), which represent distinct ecological differences in habitat between the populations.

A number of threats continue to affect GUSG populations, including: Habitat loss due to commercial and residential development; improperly managed grazing; encroachment by piñon-juniper; the effects of small population size; and regulatory mechanisms are inadequate to protect the species from these threats.

Recovery Strategy

Below, we summarize components from our draft recovery plan for GUSG. Please reference the draft recovery plan for full details (see **ADDRESSSES** above).

The draft recovery plan describes the recovery goal as the survival and conservation of GUSG. In general, GUSG need a sufficient number of resilient populations distributed across the overall range to maximize ecological and genetic diversity to withstand environmental stochasticity and catastrophes, and to adapt to environmental change. Recovery for GUSG will be signified by at least five resilient populations (Gunnison Basin, San Miguel Basin, Piñon Mesa, Crawford, and Monticello) and improved habitat in two populations (Dove Creek and CSCSM). These conditions provide sufficient representation and redundancy across the species' range through the occupancy of multiple ecoregions, the number of populations, and a broad distribution.

Recovery criteria in the draft plan include: (1) Maintaining sufficiently high male counts (HMCs) for at least 7 out of 9 years (specific targets are described in the draft recovery plan); and (2) reducing or ameliorating threats associated with habitat loss and degradation in all populations, via regulatory mechanisms or other conservation plans or programs. To help meet these criteria, the draft recovery plan identifies recovery actions from the following general categories: Translocating GUSG to augment populations; conserving and restoring habitat; managing motorized routes on Federal lands; and continued research and monitoring.

Request for Public Comments

The Service solicits public comments on the draft recovery plan. All comments we receive by the date specified (see **DATES**) will be considered prior to approval of the plan. Written comments and materials regarding the plan should be sent via the means in the **ADDRESSES** section.

We are specifically seeking comments and suggestions on the following questions:

- Understanding that the time and cost presented in the draft recovery plan will be fine-tuned when localized recovery implementation strategies are developed, are the estimated time and cost to recovery realistic? Is the estimate reflective of the time and cost of actions that may have already been implemented by Federal, State, county, or other agencies? Please provide suggestions or methods for determining a more accurate estimation.
- Do the draft recovery criteria provide clear direction to State partners on what is needed to recover the species? How could they be improved for clarity?
- Are the draft recovery criteria both objective and measurable given the information available for this species now and into the future? Please provide suggestions.
- Understanding that specific, detailed, and area-specific recovery actions will be developed in the RIS, do the draft recovery actions presented in the draft recovery plan generally cover the types of actions necessary to meet the recovery criteria? If not, what general actions are missing? And, are any of the draft recovery actions unnecessary for achieving recovery? Have we prioritized the actions appropriately?

Public Availability of Comments

We will summarize and respond to the issues raised by the public in an appendix to the approved final recovery plan. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. You may request at the top of your comment that we withhold this information from public review; however, we cannot guarantee that we will be able to do so.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: September 20, 2019.

Noreen Walsh,

Regional Director, Lakewood, Colorado.

DEPARTMENT OF INTERIOR

Bureau of Indian Affairs

[120A2100DD/AAKC001030/ A0A501010.999900253G]

Land Acquisitions; The Pawnee Nation of Oklahoma

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Assistant Secretary—Indian Affairs made a final agency determination to acquire 20.00 acres, more or less, of land near the City of Pawnee, Pawnee County, Oklahoma, (Site) in trust for the Pawnee Nation of Oklahoma for gaming and other purposes on October 7, 2019.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Bureau of Indian Affairs, MS–3657 MIB, 1849 C Street NW, Washington, DC 20240, telephone (202) 219–4066.

SUPPLEMENTARY INFORMATION: This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 Departmental Manual 8.1, and is published to comply with the requirements of 25 CFR 151.12(c)(2)(ii) that notice of the decision to acquire land in trust be promptly provided in the **Federal Register**.

On October 7, 2019, the Assistant Secretary—Indian Affairs made a final agency determination to transfer the Site, consisting of approximately 20.00 acres, more or less, into trust for the Pawnee Nation of Oklahoma (Nation) pursuant to the Indian Reorganization Act, 25 U.S.C. 5108. The Assistant Secretary—Indian Affairs also determined that the Site meets the requirements of the Indian Gaming Regulatory Act, see 25 U.S.C. 2719(a)(2)(A)(i).

The Assistant Secretary—Indian Affairs, on behalf of the Secretary of the Interior, will immediately acquire title to the Site in the name of the United States of America in trust for the Nation upon fulfillment of Departmental requirements.

The 20.00 acres, more or less, are located in Section 8, Township 20 North, Range 05 East, Pawnee County, Oklahoma, and are described as follows:

A part of the NE/4 of the NE/4 of Section 8, Township 20 North, Range 5 East, I.M., Pawnee County, Oklahoma; being more particularly described as follows:

Commencing at the Northeast corner of Section 8; Thence S89°24′00″ W along the North line of the NE/4 of the NE/4 a distance of 60.00 feet to the Northwest corner of a tract recorded in Book 67 Misc. Page 248 for a point of beginning; Thence S00°08′16″ E and parallel with the East line of the NE/4 of the NE/4 along the West line of the tract recorded in Book 67 Misc. Page 248 a distance of 983.03 feet to the Northeast corner of the highway easement recorded in Book 139 Page 270; Thence S89°37′23″ W along the North line of the highway easement recorded in Book 139 Page 270 a distance of 40.00 feet to the Northwest corner of the said highway easement; Thence S00°08′16″ E along the West line of the highway easement recorded in Book 139 Page 270 a distance of 350.00 feet to the Southwest corner of the said highway easement and on the South line of the NE/4 of the NE/4; Thence S89°37′23″ W along the South line of the NE/4 of the NE/4 a distance of 624.70 feet; Thence N00°08′16″ W and parallel with the East line of the NE/4 of the NE/4 a distance of 1330.44 feet to a point on the North line of the NE/4 of the NE/4; Thence N89°24′00″ E along the north line of the NE/4 of the NE/4 a distance of 664.72 feet to the point of beginning.

More particularly described as:

A tract of land located in the Northeast quarter of the Northeast quarter (NE/4–NE/4) of Section Eight (8), Township Twenty (20) North, Range Five (5) East of the Indian Meridian, Pawnee County, Oklahoma, with a geodetic basis of bearing of N89°24′26″ E along the North Section line and more particularly described as: Commencing at a 1/2″ iron pin at the Northeast corner (NE/C) of said NE/4 NE/4; Thence S89°24′26″ W along the North section line for a distance of 60.00 feet to the point of beginning; Thence S00°08′08″ E and parallel with the East line of the NE/4 of the NE/4 for a distance of 983.03 feet to the Northeast corner of the highway easement; Thence S89°37′31″ W for a distance of 40.00 feet to the Northwest corner of said highway easement; Thence S00°08′08″ E along the West side of said highway easement for a distance of 350.00

feet to the Southwest corner of said highway easement and to a point on the South line of the NE/4 of the NE/4; Thence S89°37′31″ W along the South line of the NE/4 of the NE/4 for a distance of 624.70 feet; Thence N00°08′08″ W and parallel with the East line of the NE/4 of the NE/4 for a distance of 1330.51 feet to a point on the North line of the NE/4 of the NE/4; Thence N89°24′26″ E along the North line of the NE/4 of the NE/4 for a distance of 664.72 feet to the point of beginning, containing 20.00 acres, more or less, as to surface rights only, Fee-to-Trust Case No. B–812–2016–0001.

Authority: This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 Departmental Manual 8.1, and is published to comply with the requirements of 25 CFR 151.12 (c)(2)(ii) that notice of the decision to acquire land in trust be promptly provided in the **Federal Register**.

Dated: October 7, 2019.

Tara Sweeney,

Assistant Secretary—Indian Affairs.

BILLING CODE 4337–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLWY921000, L712200000.EU0000, LVTFKX899040, 18X, WYW186936]

Notice of Realty Action: Non-Competitive (Direct) Sale of Public Land in Big Horn County, WY (Rageth, 60.96 Acres)

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The Bureau of Land Management (BLM) proposes a non-competitive (direct) sale of 60.96 acres of public lands in Big Horn County, Wyoming, to Brent and Sherri Rageth for the purpose of resolving an inadvertent unauthorized use. The sale will be subject to applicable provisions of the Federal Land Policy Management Act of 1976, as amended (FLPMA), and BLM regulations. The appraised Fair Market Value (FMV) for the sale parcels is $21,500.

DATES: Submit written comments regarding the sale parcel and associated Environmental Assessment until December 16, 2019.

ADDRESSES: Mail written comments concerning this direct sale to Field Manager, BLM, Cody Field Office, 1002 Blackburn Street, Cody, Wyoming 82414.

FOR FURTHER INFORMATION CONTACT: Cara Blank, Realty Specialist, BLM, Cody Field Office, at the above address or by telephone 307–578–5912. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The following public lands have been examined and found suitable for sale in accordance with the criteria in Section 203 of the FLPMA:

Sixth Principal Meridian, Wyoming

T. 56 N., R. 97 W.,
Sec. 20, parcel 1;
Sec. 21, parcels 1 and 2;
Sec. 22, parcel 1.

The areas described aggregate 60.96 acres.

The direct sale is in conformance with the BLM Cody Field Office Approved Resource Management Plan (September 18, 2015), which identifies these parcels of public lands as suitable for disposal on page 105 and management action 6011. FLPMA Section 203 allows for the disposal of public lands if they meet the following disposal criteria: (1), such tract, because of its location or other characteristics, is difficult and uneconomic to manage as part of the public lands and is not suitable for management by another Federal department or agency. The subject parcels meet this criteria because the existing structures and the change in the character of the lands associated with farming operations make the lands difficult to manage as public lands.

A parcel-specific Environmental Assessment (EA) document numbered DOI–BLM–WY–R020–2019–0007–EA was prepared in connection with this sale. A copy of the EA, Finding of No Significant Impact and Decision Record are available online at: *https://eplanning.blm.gov/epl-front-office/eplanning/projectSummary.do?methodName=renderDefaultProjectSummary&projectId=118368.*

Regulations at 43 CFR 2711.3–3(a) allow the direct sale of public lands (without competition), when a competitive sale is not appropriate and the public interest would best be served by a direct sale. In this case, a competitive sale is not appropriate because the subject lands contain improvements that directly support the adjoining farm property, owned by Brent and Sherri Rageth, rendering the land unusable by the public. The minimal acreage was considered to create a manageable boundary that included the lands surrounding a metal shop and all irrigation improvements. The public's interest would be best served by resolving the inadvertent unauthorized use and receiving payment at FMV for the public lands. Further, in conformance with Secretarial Order 3373, the BLM has determined that sale of this land will not impact public access for outdoor recreation. Upon publication of this Notice in the **Federal Register,** the public lands described will be segregated from all forms of appropriation under the public land laws, including the mining laws, except for the sale provisions of the FLPMA.

The temporary segregation will terminate upon, (1) issuance of a conveyance document, (2) publication in the **Federal Register** terminating the segregation, or (3) on November 1, 2021, unless extended by the BLM Wyoming State Director, in accordance with 43 CFR 2711.1–2(d). Upon publication of this Notice in the **Federal Register,** the BLM is no longer accepting land use applications affecting these public lands, except applications for the amendment of previously filed rights-of-way applications or existing authorizations to increase the term of the grants in accordance with 43 CFR 2807.15 and 43 CFR 2886.15.

The conveyance document, if issued, will contain the following reservations; excepting and reserving to the United States:

1. Rights-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945);

2. All the mineral deposits in the lands so patented pursuant to the Act of October 21, 1976 (43 U.S.C. 1719), including, without limitation, substances subject to disposition under the general mining laws, the general mineral leasing laws, the Materials Act and the Geothermal Steam Act, and to it, its permittees, licensees, lessees, and mining claimants, the right to prospect for, mine and remove the minerals owned by the United States under applicable law an such regulations as the Secretary of the Interior may prescribe. This reservation includes necessary access and exit rights and the right to conduct all necessary and incidental activities including, without limitation, all drilling, underground, open pit or surface mining operations, storage and transportation facilities deemed reasonably necessary.

Unless otherwise provided by separate agreement with the surface owner, mining claimants, permittees, licensees and lessees of the United States shall reclaim disturbed areas to the extent prescribed by regulations issued by the Secretary of the Interior.

All causes of action brought to enforce the rights of the surface owner under the regulations above referred to shall be instituted against mining claimants, permittees, licensees and lessees of the United States; and the United States shall not be liable for the acts or omissions of its mining claimants, permittees, licensees and lessees.

The conveyance document, if issued, will be subject to all valid existing rights.

The BLM will publish this Notice in the Lovell Chronicle newspaper once a week for three consecutive weeks. Only written comments submitted by postal service or overnight mail will be considered as properly filed. Electronic mail, facsimile, or telephone comments will not be considered.

Any adverse comments regarding the sale will be reviewed by the BLM Wyoming State Director or other authorized official of the Department of the Interior, who may sustain, vacate, or modify this realty action in response to such comments. In the absence of any timely filed objections, this realty action will become the final determination of the Department of the Interior.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Comments, including names and street addresses of respondents, will be available for public review at the BLM Cody Field Office during regular business hours, except holidays.

Authority: 43 CFR 2711.

Duane Spencer,

Acting State Director, Wyoming.

Bureau of Land Management

[(LLCAD06000.51010000.ER0000. LVRWB19B5120.19X5017AP) CACA51967 (MO# 4500135522)]

Notice of Availability of the Crimson Solar Project Draft Environmental Impact Statement and Environmental Impact Report and Draft Land Use Plan Amendment to the California Desert Conservation Area Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA) of 1969, as amended, and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) has prepared a Draft Environmental Impact Statement (EIS), Environmental Impact Report (EIR), and draft Land Use Plan Amendment to the California Desert Conservation Area Plan (CDCA) for the Crimson Solar Project (Project), and by this notice is announcing the opening of the 90-day public comment period.

DATES: To ensure that all comments will be considered, the BLM must receive written comments on the draft plan amendment and Draft EIS/EIR within 90 days following the date the Environmental Protection Agency (EPA) publishes its Notice of Availability in the **Federal Register**. The BLM will announce future meetings and any other public involvement activities at least 15 days in advance through public notices, news releases, the project website, and/ or mailings.

ADDRESSES: The public may submit comments related to the project during the public comment period by using any of the following methods:

- *Website: https://bit.ly/2xntD5u*
- *Email: blm_ca_crimsonsolar@blm.gov*
- *Mail:* Crimson Solar Project, Bureau of Land Management Palm Springs-South Coast Field Office, 1201 Bird Center Drive, Palm Springs, CA 92262

Copies of the Draft EIS/EIR and draft plan amendment are available at the BLM-Palm Springs-South Coast Field Office at the above address and at the BLM California Desert District Office, 22835 Calle San Juan De Los Lagos, Moreno Valley, CA 92553, and electronically on the project website referenced earlier.

FOR FURTHER INFORMATION CONTACT: Miriam Liberatore, BLM project manager, telephone: (541) 618–2412; email: *mliberat@blm.gov;* address Bureau of Land Management, 3040 Biddle Road, Medford, OR 97504.

Persons who use a telecommunication device for the deaf may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact Ms. Liberatore during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or questions. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Sonoran West Solar Holdings LLC (the Applicant), a wholly owned subsidiary of Recurrent Energy LLC, applied for a right-of-way (ROW) grant for a photovoltaic solar project with the BLM. The applicant proposes to construct, operate, maintain, and decommission a maximum 350-megawatt solar photovoltaic facility with integrated battery storage and necessary ancillary facilities, including project substations, access roads, operations and maintenance buildings, and lay down areas. The proposed project includes 2,500 acres of BLM-administered land in the Riverside East Solar Energy Zone.

The BLM is the lead NEPA agency and will make Federal decisions regarding the proposed plan amendment and the ROW for the Project. The U.S. Fish and Wildlife Service is a Cooperating Agency and will issue a Biological Opinion for the project. The EPA (Region 9) is a Cooperating Agency, but does not have a direct permitting role in the project. The California Department of Fish and Wildlife is the lead agency under the California Environmental Quality Act (CEQA) and will make State decisions on applications filed by the Applicant for an Incidental Take Permit and a Lake and Streambed Alteration Agreement. This Draft EIS/EIR was prepared as a joint Federal/State environmental document that analyzes the impacts of the project under both NEPA and CEQA.

In addition to the proposed action (Alternative A), the Draft EIS/EIR considers a no action alternative and two action alternatives. Alternative B, Alternative Design, would include one or more of three design elements to reduce grading, trenching, and vegetation removal during construction. Alternative C, Reduced Acreage Alternative, would be the same as described under Alternative A in the number and size of project-related facilities, but the project area would be reduced by about 300 acres. All alternatives would amend the CDCA plan to allow the project. Alternative C is the BLM preferred alternative.

Public input on these alternatives or other issues is important and will be considered in the Final EIR/EIS.

Please note that public comments and information submitted, including names, street addresses, and email addresses of persons who submit comments, will be available for public review and disclosure at the address listed in the **ADDRESSES** section during regular business hours (8:00 a.m. to 4:00 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10, 43 CFR 1610.2.

Danielle Chi,

Deputy State Director, Resources.

Notice of Availability of the Bakersfield Field Office Hydraulic Fracturing Final Supplemental Environmental Impact Statement, California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended (NEPA), the Bureau of Land Management (BLM) has prepared a Final Supplemental Environmental Impact Statement (EIS) analyzing the potential impacts of hydraulic fracturing on new oil and gas leases within the Bakersfield Field Office planning area, and by this notice the BLM is announcing its availability.

DATES: The BLM will not issue a final decision on the proposal for a minimum of 30 days after the date that the Environmental Protection Agency publishes its Notice of Availability in the **Federal Register.**

ADDRESSES: Copies of the Bakersfield Field Office Hydraulic Fracturing Final Supplemental EIS are available for public inspection during regular business hours at 3801 Pegasus Drive, Bakersfield, CA 93308. Interested persons may also review the Final Supplemental EIS online at *https://go.usa.gov/xE3Nw.*

FOR FURTHER INFORMATION CONTACT: Carly Summers, Supervisory Natural Resources Specialist; telephone: 661–391–6000; *email: csummers@blm.gov;* address Bureau of Land Management, 3801 Pegasus Drive, Bakersfield, CA 93308. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact Carly Summers during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The Bakersfield Field Office planning area is located in eastern Fresno, western Kern, Kings, Madera, San Luis Obispo, Santa Barbara, Tulare, and Ventura counties in California and encompasses approximately 1.2 million acres of Federal minerals and roughly 400,000 surface acres of BLM-managed public land.

The supplemental environmental analysis is being conducted in response to a May 2017, U.S. District Court Order. The U.S. District Court upheld the range of alternatives analyzed in the 2012 Proposed Resource Management Plan (RMP)/Final EIS. The five management alternatives analyzed in the Proposed RMP/Final EIS were:

- The No Action alternative (Alternative A)—continue current management under the existing 1997 Caliente RMP and 1984 Hollister RMP, as amended;
- The Proposed Plan (Alternative B)—balance resource conservation and ecosystem health with the production of commodities and public use of the land;
- Alternative C—emphasize conserving cultural and natural resources, maintaining functioning natural systems, and restoring degraded natural systems;
- Alternative D—same as Alternative C, except that Alternative D would eliminate livestock grazing from BLM-managed lands in the planning area; and
- Alternative E—emphasize the production of natural resources, commodities and public use opportunities.

The 2012 Proposed RMP/Final EIS identified public lands available to fluid-mineral leasing and no changes to those designations are proposed through the Final Supplemental EIS.

Preliminary resource issues were presented for public scoping review and comment in the August 8, 2018, **Federal Register** Notice of Intent (83 FR 39116). Issues identified by BLM personnel; Federal, State, and local agencies; and other stakeholders and analyzed in the Final Supplemental EIS include: Air and atmospheric values; water quality and quantity; seismicity; special status species; and mineral resources (oil and gas.)

The Draft Supplemental EIS was available for a 45-day public comment period initiated on April 26, 2019, **Federal Register** Notice of Availability (84 FR 17885). The BLM held public meetings on May 21, 22, and 23, 2019, in Bakersfield, San Luis Obispo, and Santa Barbara, respectively. Approximately 600 individuals attended the three meetings and approximately 16,000 written comments were received through ePlanning and standard mail.

Responses to substantive comments are presented in Appendix B: Public Comment Summary Report of the Final Supplemental EIS.

The results of this final supplemental analysis regarding the impacts of hydraulic fracturing, additive to those identified in the 2012 Final EIS, did not show a notable increase in total impacts. No conflicts were found between the estimated impacts of hydraulic fracturing and the resource or program management goals and objectives stated in the 2014 RMP. The range of alternatives has not changed between the approved 2014 RMP and its 2012 Final EIS and the Final Supplemental EIS. Therefore, no amendment to the 2014 RMP is necessary. In addition, no protest period is required because no changes are proposed to the 2014 RMP planning decisions. The BLM has fully analyzed the effects of hydraulic fracturing in accordance with the order of the court, and although the 2012 EIS has been supplemented, no changes are proposed to the 2014 RMP planning decisions. Because there are no changes to the RMP, no protest period is required and none is given.

The BLM has utilized and coordinated the NEPA process to help fulfill the public involvement process under the National Historic Preservation Act (54 U.S.C. 306108), as provided in 36 CFR 800.2(d)(3). The BLM will continue to consult with Indian tribes on a government-to-government basis, in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will continue to be given due consideration.

BLM review were considered and incorporated, as appropriate, into the Final Supplemental EIS. Public comments resulted in the addition of clarifying text and incorporation of new information, but did not require or suggest further supplementation or change proposed decisions.

Authority: Authority: 40 CFR 1506.6, 40 CFR 1506.10.

Danielle Chi,

Deputy State Director, Natural Resources.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Bureau of Land Management

[LLNM004400. L16100000.DO0000.LXSSG0690000 19XL1109AF]

Notice of Availability of the Oklahoma, Kansas, and Texas Final Joint Environmental Impact Statement, Bureau of Land Management Proposed Resource Management Plan and Bureau of Indian Affairs Proposed Integrated Resource Management Plan

AGENCY: Bureau of Land Management, Interior; and Bureau of Indian Affairs, Interior.

ACTION: Notice of Availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969 (NEPA), as amended, and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) and Bureau of Indian Affairs (BIA) have prepared a Final Joint Environmental Impact Statement (FJEIS) for the BLM Proposed Resource Management Plan (P–RMP), the Bureau of Indian Affairs (BIA) Proposed Integrated Resource Management Plan (P–IRMP) for the BLM Oklahoma Field Office, the BIA Eastern Oklahoma Regional Office, and the BIA Southern Plains Regional Office, and by this Notice is announcing the opening of the protest period.

DATES: Pursuant to the BLM planning regulations at 43 CFR 1610.5–2, any person who participated in the land use planning process associated with the development of these proposed land use plans and has an interest that could be adversely impacted by these management decisions can protest the management decisions within 30 days of the date the U.S. Environmental Protection Agency publishes the Notice of Availability of the Oklahoma, Kansas, and Texas FJEIS/BLM P–RMP/BIA P–IRMP.

ADDRESSES: The Oklahoma, Kansas, and Texas FJEIS/BLM P–RMP/BIA P–IRMP is available online in the Documents and Reports section of the BLM e-Planning project website at: *https://go.usa.gov/xVPk3.*

Protests must be made in writing (43 CFR 1610.5–2(a)(1)) and filed with the BLM Director, either as a hard copy or electronically via the BLM's e-Planning website listed above. To submit an electronic protest, go to the project website and select the ''Documents & Reports'' link at the left, then select ''Submit Protest'' next to the Final Joint Environmental Impact Statement (FJEIS). Upon selection of the ''Submit Protest'' button, a new window will open that will guide you through the submission process. Printed ''hard copy'' protest submissions must be mailed to one of the following addresses, and postmarked by the end of the protest period. Via mail: Director (210), *Attn:* Protest Coordinator, P.O. Box 71383, Washington, DC 20024–1383; *Via Overnight Delivery:* Director (210), Attn: Protest Coordinator, 20 M Street SE, Room 2134LM, Washington, DC 20003.

Copies of the Oklahoma, Kansas, and Texas FJEIS/BLM P–RMP/BIA P–IRMP are available upon request from:

- The Bureau of Land Management, Oklahoma Field Office, Attn.: Patrick Rich, RMP Team Lead, 201 Stephenson Parkway, Suite 1200, Norman, OK 73072.
- BIA Eastern Oklahoma Regional Office, Attn.: Mosby Halterman, P.O. Box 8002, Muskogee, Oklahoma 74402–8002.
- BIA Southern Plains Regional Office, Attn.: David Anderson, P.O. Box 368, Anadarko, Oklahoma 73005–0368.
- The Bureau of Land Management, New Mexico State Office, 301 Dinosaur Trail, Santa Fe, NM 87508.
- Copies of the Oklahoma, Kansas and Texas FJEIS/BLM P–RMP/BIA P–IRMP are also available for public inspection at the BLM New Mexico State Office, 301 Dinosaur Trail, Santa Fe, New Mexico 87508 and at the BLM Oklahoma Field Office, 201 Stephenson Parkway, Suite 1200, Norman, OK 73072.

FOR FURTHER INFORMATION CONTACT: Patrick Rich, RMP Team Lead, telephone (405) 579–7154; address 201 Stephenson Parkway, Suite 1200, Norman, OK 73072; email *BLM_NM_OKT_RMP@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at (800) 877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: In the Oklahoma, Kansas, and Texas FJEIS/BLM P–RMP/BIA P–IRMP, the BLM and BIA analyze the environmental consequences of four alternatives under consideration for managing Federal lands and minerals within the Oklahoma-Kansas-Texas planning area. The BLM Oklahoma Field Office administers approximately 15,100 acres of public surface estate, including approximately 11,833 acres at the Cross Bar Management Area near Amarillo, Texas; about 3,300 acres of small tracts scattered across the planning area; and Federal lands along the 116-mile stretch of the Red River between the North Fork of the Red River and the 98th Meridian. No exact acreages of Federal lands along the Red River are available at this time because the full 116-mile stretch of land has not been surveyed. The Oklahoma Field Office also administers approximately 4,810,900 acres of subsurface Federal mineral estate across the 269,650,000-acre planning area, to include approximately 4,012,400 acres underlying surface estate managed by other Federal surface management agencies, such as U.S. Fish and Wildlife Service, U.S. Forest Service, and National Park Service, and approximately 785,300 acres of split-estate, where Federal minerals underlie private surface estate.

The BIA decision area includes approximately 394,200 surface acres and 2,033,500 mineral estate acres for the BIA Eastern Oklahoma Regional Office. Approximately 1,474,500 acres of the BIA Eastern Oklahoma Regional Office jurisdictional area is limited to coal or other minerals in Osage County. The BIA decision area also includes approximately 457,500 surface acres and 632,000 mineral estate acres for the BIA Southern Plains Regional Office. This includes lands and mineral estate in Oklahoma, Kansas, Texas, and Richardson County, Nebraska.

The BLM is the lead agency for development of the land use plan, while the BIA Regional Offices are co-lead planning partners on this joint, integrated land use planning effort. The Oklahoma, Kansas, and Texas FJEIS/BLM P–RMP/BIA P–IRMP provides a comprehensive, integrated land use plan that will replace the BLM's current 1994 Oklahoma RMP, as amended; the 1991 Kansas RMP; and the 1996 Texas RMP, as amended. Land use plan revision and consolidation is necessary due to numerous changes, including renewable energy, recreation, special status species, visual resources, and wildlife habitat which have occurred across the Oklahoma, Kansas, and Texas planning area since previous plan publications. New resource data are available for consideration, and new policies, guidelines, and laws have been established.

The four alternatives analyzed in the Oklahoma, Kansas, and Texas FJEIS/ BLM P–RMP/BIA P–IRMP are as follows:

- Alternative A (No Action Plan) is a continuation of existing land use management actions under the current Kansas, Oklahoma, and Texas RMPs and associated amendments;
- Alternative B (Proposed Alternative) represents a mix of resource use and resource value conservation stewardship principles and management decisions that address current and reasonably foreseeable future land use management issues, including provisions for energy development, recreational opportunities, and conservation of natural resources;
- Alternative C (Environmental Focused Plan) represents a land use management strategy intended primarily to preserve and protect ecosystem health and resource values across the planning area; and
- Alternative D (Resource Use Focused Plan) represents a land use management strategy intended primarily to develop resources and promote economic development across the decision area, such as livestock grazing, energy and mineral development, and recreation.

This land use planning effort was initiated on July 26, 2013, through a Notice of Intent published in the **Federal Register** (78 FR 45266), notifying the public of a formal scoping period and soliciting public participation. The BLM and BIA held 17 scoping meetings between November 2013 and January 2014, throughout Kansas, Oklahoma, and Texas, with stakeholders, interest groups, and the public. During this external scoping period, the public provided the BLM Oklahoma Field Office with input on relevant issues to consider during the land use planning process. Additional information was collected during three additional workshops, one each in Kansas, Oklahoma, and Texas, with the public and cooperating agencies. Based on these issues, conflicts, information, and the BLM and BIA goals and objectives for this planning effort, the BLM–BIA Interdisciplinary Team formulated three action alternatives for consideration and analysis in the Draft Oklahoma, Kansas, and Texas FJEIS/ BLM P–RMP/BIA P–IRMP.

The public comment period for the Oklahoma, Kansas, and Texas FJEIS/ BLM P–RMP/BIA P–IRMP was initiated on November 19, 2018, through a **Federal Register** Notice of Availability (83 FR 58283), notifying the public of the release of the draft land use plan for an extended 125-day public comment period, which occurred from November 19, 2018, until March 24, 2019, and solicitation of public comments. Seventy-two cooperating agencies expressed interest in collaborating with the BLM and BIA during the NEPA process and signed a formal cooperating agency agreements.

The BLM and BIA held six public meetings between February 2019 and March 2019, throughout Oklahoma, Kansas, and Texas, with stakeholders, interest groups, and the public. Public meetings were hosted to solicit public input on the Draft Oklahoma, Kansas, and Texas FJEIS/BLM P–RMP/BIA P–IRMP as follows: Wichita, KS, on February 26, 2019; Muskogee, OK, on February 27, 2019; Norman, OK, on February 28, 2019; Amarillo, TX, on March 4, 2019; Fort Worth, TX, on March 5, 2019; and Corpus Christi, TX, on March 8, 2019. In total, 110 attendees participated in the six public meetings and offered oral and written comments to the BLM and BIA. Following the closing of the 125-day public comment period, the BLM and BIA held an internal 5-day conference at the BLM Oklahoma Field Office where an interdisciplinary team of resource management experts reviewed the 150 substantive comment submissions for potential revision of the Draft Oklahoma, Kansas, and Texas FJEIS/ BLM P–RMP/BIA P–IRMP in preparation for release of the OKT Final Joint EIS, BLM P–RMP and BIA P–IRMP. All comments on the Draft EIS/ RMP were given careful consideration, with necessary revisions incorporated into the FJEIS and plans, as appropriate. Public comments and BLM responses are available in Appendix O of the Final EIS.

At the close of the 30-day protest period, the BLM and BIA will resolve protests on the Oklahoma, Kansas, and Texas FJEIS/BLM P–RMP/BIA P–IRMP in preparation for the Approved BLM RMP, Approved BIA IRMP, three Records of Decision (ROD) to include one ROD for the BLM Oklahoma Field Office; one ROD for the BIA Eastern Oklahoma Regional Office; and one ROD for the BIA Southern Plains Regional Office.

Before including your address, phone number, email address, or other personal identifying information in your protest, you should be aware that your entire protest—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10, 43 CFR 1610.2.

Timothy R. Spisak,
BLM New Mexico State Director.

Eddie Streater,
BIA Eastern Oklahoma Regional Director.

Jim Schock,
BIA Southern Plains Regional Director.

National Park Service

[NPS–WASO–NRNHL–DTS#–29141; PPWOCRADI0, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting comments on the significance of properties nominated before October 12, 2019, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by November 18, 2019.

ADDRESSES: Comments may be sent via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C St. NW, MS 7228, Washington, DC 20240.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before October 12, 2019. Pursuant to Section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.

While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

INTERNATIONAL TRADE COMMISSION

[USITC SE–19–038]

Sunshine Act Meetings

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: November 8, 2019 at 11:00 a.m.

PLACE: Room 101, 500 E Street SW, Washington, DC 20436, Telephone: (202) 205–2000.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agendas for future meetings: None.
2. Minutes.
3. Ratification List.
4. Vote on Inv. Nos. 701–TA–630 and 731–TA–1462 (Preliminary) (Glass Containers from China). The Commission is currently scheduled to complete and file its determinations on November 12, 2019; views of the Commission are currently scheduled to be completed and filed on November 19, 2019.
5. Vote on Inv. Nos. 701–TA–623 and 731–TA–1449 (Final) (Vertical Metal File Cabinets from China). The Commission is currently scheduled to complete and file its determinations and views of the Commission by November 21, 2019.
6. Outstanding action jackets: None.

The Commission is holding the meeting under the Government in the Sunshine Act, 5 U.S.C. 552(b). In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

By order of the Commission.

Issued: October 29, 2019.

William Bishop,

Supervisory Hearings and Information Officer.

Non-Oriented Electrical Steel From China, Germany, Japan, Korea, Sweden, and Taiwan; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 (''the Act''), as amended, to determine whether revocation of the countervailing duty orders on non-oriented electrical steel (''NOES'') from China and Taiwan and revocation of the antidumping duty orders on NOES from China, Germany, Japan, Korea, Sweden, and Taiwan would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted November 1, 2019. To be assured of consideration, the deadline for responses is December 2, 2019. Comments on the adequacy of responses may be filed with the Commission by January 14, 2020.

FOR FURTHER INFORMATION CONTACT: Mary Messer (202–205–3193), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—On December 3, 2014, the Department of Commerce (''Commerce'') issued countervailing duty orders on imports of NOES from China and Taiwan (79 FR 71749) and antidumping duty orders on imports of NOES from China, Germany, Japan, Korea, Sweden, and Taiwan (79 FR 71741). The Commission is conducting reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR parts 201, subparts A and B and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are China, Germany, Japan, Korea, Sweden, and Taiwan.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise.* In its original determinations, the Commission defined a single *Domestic Like Product* that is coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product,* or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations, the Commission defined the *Domestic Industry* as AK Steel, the only known U.S. producer of NOES.

(5) The *Order Date* is the date that the antidumping and countervailing duty orders under review became effective. In these reviews, the *Order Date* is December 3, 2014.

(6) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to section 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to section 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is December 2, 2019. Pursuant to section 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is January 14, 2020. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings. Also, in accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

No response to this request for information is required if a currently valid Office of Management and Budget (''OMB'') number is not displayed; the OMB number is 3117 0016/USITC No. 19–5–444, expiration date June 30, 2020. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to section 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to section 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information to be provided in response to this notice of institution: If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject Merchandise* from more than one *Subject Country;* or produce *Subject Merchandise* in more than one *Subject Country,* you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country*. As used below, the term ''firm'' includes any related firms.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product,* a U.S. union or worker group, a U.S. importer of the *Subject Merchandise,* a foreign producer or exporter of the *Subject Merchandise,* a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping and countervailing duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry.*

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product.* Identify any known related parties and the nature of the relationship as defined in section 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries since the *Order Date.*

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product,* provide the following information on your firm's operations on that product during calendar year 2018, except as noted (report quantity data in short tons and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from any *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2018 (report quantity data in short tons and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country;* and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country.*

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2018 (report quantity data in short tons and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* since the *Order Date,* and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in each *Subject Country,* and such merchandise from other countries.

(13) (Optional) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry*; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of Title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.61 of the Commission's rules.

By order of the Commission.

Issued: October 28, 2019.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1163]

Certain Light-Emitting Diode Products, Systems, and Components Thereof (I); Commission Determination Not To Review an Initial Determination Terminating the Investigation in Its Entirety; Termination of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (''ID'') (Order No. 16) of the presiding Administrative Law Judge (''ALJ'') terminating the above-captioned investigation. The investigation is terminated.

FOR FURTHER INFORMATION CONTACT: Michael Liberman, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3115. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On June 25, 2019, the Commission instituted Inv. No. 337–TA–1163, *Certain Light-Emitting Diode Products, Systems, and Components Thereof* (I) under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), based on a complaint filed by Lighting Science Group Corporation of Cocoa Beach, Florida; Healthe, Inc. of Cocoa Beach, Florida; and Global Value Lighting, LLC of West Warwick, Rhode Island (collectively, ''Complainants''). 84 FR 29877–79 (June 25, 2019). The complaint, as amended, alleges a violation of section 337 by reason of infringement of certain claims of U.S. Patent Nos. 7,098,483; 7,095,053; 8,506,118 (''the '118 patent''); 7,528,421; 8,674,608; 8,201,968; and 8,967,844. The notice of investigation (''NOI'') names numerous respondents. The Commission's Office of Unfair Import Investigations was not named as a party. *Id.* at 29878. Subsequently, the complaint and NOI were amended to add allegations of infringement of claim 9 of the '118 patent against respondents MLS Co., Ltd. of Zhongshan City, China; LEDVANCE GmbH of Garching, Germany; LEDVANCE LLC of Wilmington, Massachusetts; Acuity Brands, Inc. of Atlanta, Georgia; and Acuity Brands Lighting, Inc. of Conyers, Georgia. 84 FR 55173–74 (Oct. 15, 2019). Furthermore, the investigation was terminated as to U.S. Patent No. 8,674,608 and respondents Leedarson Lighting Co., Ltd. and Leedarson America, Inc. Order No. 16 (*non-reviewed* October 28, 2019).

On October 8, 2019, Complainants filed an unopposed motion seeking to terminate this investigation in its entirety based on withdrawal of the complaint. *See* Mot. at 1–2.

On October 9, 2019, the ALJ issued the subject ID (Order No. 16) pursuant to 19 CFR 210.21(a), granting Complainants' motion. The ID finds that the motion for termination of this investigation based on withdrawal of the complaint complies with the Commission's Rules. ID at 1. The ID further finds that there are no extraordinary circumstances that warrant denying the motion. *Id.* at 2. No party petitioned for review of the ID, and the Commission has determined not to review the subject ID.

The investigation is terminated.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in Part 210 of the Commission's Rules of Practice and Procedure, 19 CFR part 210.

By order of the Commission.

Issued: October 29, 2019.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Meeting of the National Domestic Communications Assistance Center Executive Advisory Board

AGENCY: Justice Department.

ACTION: Meeting notice.

SUMMARY: The purpose of this notice is to announce the meeting of the Department of Justice's National Domestic Communications Assistance Center's (NDCAC) Executive Advisory Board (EAB). The meeting is being called to address the items identified in the Agenda detailed below. The NDCAC EAB is a federal advisory committee established pursuant to the Federal Advisory Committee Act (FACA).

DATES: The NDCAC EAB meeting is open to the public, subject to the registration requirements detailed below. The EAB will meet in open session from 10:00 a.m. until 1:00 p.m. on November 19, 2019.

ADDRESSES: The meeting will take place at 5000 Seminary Rd., Alexandria, VA 22311. Entry into the meeting room will begin at 9:00 a.m.

FOR FURTHER INFORMATION CONTACT: Inquiries may be addressed to Ms. Alice Bardney-Boose, Designated Federal Officer, National Domestic Communications Assistance Center, Department of Justice, by email at *NDCAC@fbi.gov* or by phone at (540) 361–4600.

SUPPLEMENTARY INFORMATION: Agenda: The meeting will be called to order at 10:00 a.m. by EAB Chairman Preston Grubbs. All EAB members will be introduced and EAB Chairman Grubbs will provide remarks. The EAB will: Receive an update and hold a discussion on the National Domestic Communications Assistance Center and support it provides to the law enforcement; be provided a presentation and hold a discussion on lawful access; be briefed on a recent Manhattan District Attorney's Office Report: ''Smartphone Encryption and Public Safety;'' discuss changes in EAB membership and leadership; and receive status reports from its Administrative and Technology Subcommittees. Note: Agenda items are subject to change.

The purpose of the EAB is to provide advice and recommendations to the Attorney General or designee, and to the Director of the NDCAC that promote public safety and national security by advancing the NDCAC's core functions: Law enforcement coordination with respect to technical capabilities and solutions, technology sharing, industry relations, and implementation of the

Communications Assistance for Law Enforcement Act (CALEA). The EAB consists of 15 voting members from Federal, State, local and tribal law enforcement agencies. Additionally, there are two non-voting members as follows: A federally-employed attorney assigned full time to the NDCAC to serve as a legal advisor to the EAB, and the DOJ Chief Privacy Officer or designee to ensure that privacy and civil rights and civil liberties issues are fully considered in the EAB's recommendations. The EAB is composed of eight State, local, and/or tribal representatives and seven federal representatives.

Written Comments: Any member of the public may submit written comments to the EAB. Written comments must be provided to Ms. Alice Bardney-Boose, DFO, at least seven (7) days in advance of the meeting so that the comments may be made available to EAB members for their consideration prior to the meeting. Written comments must be submitted to *NDCAC@fbi.gov* on or before November 12, 2019.

In accordance with the FACA, all comments shall be made available for public inspection.

Commenters are not required to submit personally identifiable information (such as name, address, etc.). Nevertheless, if commenters submit personally identifiable information as part of the comments, but do not want it made available for public inspection, the phrase ''Personally Identifiable Information'' must be included in the first paragraph of the comment. Commenters must place all personally identifiable information not to be made available for public inspection in the first paragraph and identify what information is to be redacted. Privacy Act Statement: Comments are being collected pursuant to the FACA. Any personally identifiable information included voluntarily within comments, without a request for redaction, will be used for the limited purpose of making all documents available to the public pursuant to FACA requirements.

Registration: Individuals and entities who wish to attend the public meeting are required to pre-register for the meeting on-line by clicking the registration link found at: *http://ndcac-eab.eventbee.com.* Registrations will be accepted on a space available basis. Attendees must bring registration confirmation (*i.e.,* email confirmation) to be admitted to the meeting. Privacy Act Statement: The information requested on the registration form and required at the meeting is being collected and used pursuant to the FACA for the limited purpose of ensuring accurate records of all persons present at the meeting, which records may be made publicly available. Providing information for registration purposes is voluntary; however, failure to provide the required information for registration purposes will prevent you from attending the meeting.

Online registration for the meeting must be completed on or before 5:00 p.m. (EST) November 8, 2019. Anyone requiring special accommodations should notify Ms. Bardney-Boose at least seven (7) days in advance of the meeting or indicate your requirements on the online registration form.

Alice Bardney-Boose,

Designated Federal Officer, National Domestic Communication Assistance Center, Executive Advisory Board.

BILLING CODE 4410–02–P

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Technical Advisory Committee; Notice of Meeting and Agenda

The Bureau of Labor Statistics Technical Advisory Committee will meet on Friday, November 22, 2019. The meeting will be held from 9:00 a.m. to 4:00 p.m. in the Postal Square Building, 2 Massachusetts Avenue NE, Washington, DC.

The Committee presents advice and makes recommendations to the Bureau of Labor Statistics (BLS) on technical aspects of data collection and the formulation of economic measures and makes recommendations on areas of research. The BLS presents issues and then draws on the expertise of Committee members representing specialized fields within the academic disciplines of economics, statistics, and survey design.

The meeting will be held in rooms 1, 2, and 3 of the Postal Square Building Janet Norwood Conference Center. The schedule and agenda for the meeting are as follows:

9:00 a.m. Commissioner's Welcome and Review of Agency Developments
9:30 a.m. The Future of the National Longitudinal Surveys
12:30 p.m. What is the Appropriate Index Formula to Estimate Producer Price Change?
2:30 p.m. Evaluate the Potential of Standardizing the Task Data in ORS
4:00 p.m. Approximate conclusion

The meeting is open to the public. Any questions concerning the meeting should be directed to Sarah Dale, Bureau of Labor Statistics Technical Advisory Committee, at 202–691–5643 or *dale.sarah@bls.gov.* Individuals who require special accommodations should contact Ms. Dale at least two days prior to the meeting date.

Signed at Washington, DC, this 25th day of October 2019.

Mark Staniorski,

Chief, Division of Management Systems, Bureau of Labor Statistics.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2012–0005]

Cadmium in General Industry Standard; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning the proposal to extend OMB approval of the information collection requirements specified in the Cadmium in General Industry Standard.

DATES: Comments must be submitted (postmarked, sent, or received) by December 31, 2019.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693–1648.

Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit a copy of your comments and attachments to the OSHA Docket Office, Docket No. OSHA–2012–0005, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3653, 200 Constitution Avenue NW, Washington, DC 20210. Deliveries (hand, express mail, messenger, and courier service) are accepted during the OSHA Docket Office's normal business hours, 10:00 a.m. to 3:00 p.m., ET.

Instructions: All submissions must include the agency name and the OSHA docket number (OSHA–2012–0005) for the Information Collection Request (ICR). All comments, including any personal information you provide, such as social security numbers and dates of birth, are placed in the public docket without change, and may be made available online at *http://www.regulations.gov*. For further information on submitting comments, see the ''Public Participation'' heading in the section of this notice titled **SUPPLEMENTARY INFORMATION**.

Docket: To read or download comments or other material in the docket, go to *http://www.regulations.gov* or the OSHA Docket Office at the above address. All documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through the website. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. You may also contact Theda Kenney at (202) 693–2222 to obtain a copy of the ICR.

FOR FURTHER INFORMATION CONTACT: Seleda Perryman or Theda Kenney, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of a continuing effort to reduce paperwork and respondent (*i.e.,* employer) burden, conducts a preclearance process to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, the reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act, or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (see 29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with a minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining said information (see 29 U.S.C. 657).

The collection of information specified in the Cadmium in General Industry Standard (29 CFR 1910.1027) protects workers from the adverse health effects that may result from their exposure to cadmium. The major collection of information of the standard include: Conducting worker exposure monitoring; notifying workers of their cadmium exposures; implementing a written compliance program; implementing medical surveillance of workers; providing examining physicians with specific information; ensuring that workers receive a copy of their medical surveillance results; maintaining workers' exposure monitoring and medical surveillance records for specific periods; and providing access to these records to the workers who are the subject of the records, the worker's representative, and other designated parties.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply—for example, by using automated or other technological information collection and transmission techniques.

The agency estimates decreases in the number of exposed workers in the cross-industry sectors as well as in the specific-industry sectors. As a result, OSHA is requesting an adjustment decrease of 2,602 burden hours (from 75,998 to 73,396 hours). This decrease was offset by a slight estimated increase in plants (employers). Also as a result, the operation and maintenance costs have also decreased from $5,407,985 to $5,176,416, a total decrease of $231,569. This decrease was offset by increases in estimated costs for exposure monitoring sampling and medical exams.

III. Proposed Actions

Type of Review: Extension of a currently approved collection.

Title: Cadmium in General Industry Standard (29 CFR 1910.1025).

OMB Control Number: 1218–0185.

Affected Public: Business or other for-profits.

Number of Respondents: 50,679.

Frequency: On occasion; Quarterly; Biennially; Semi-annually; Annually.

Average Time per Response: Various.

Estimated Number of Responses: 234,036.

Estimated Total Burden Hours: 73,396.

Estimated Cost (Operation and Maintenance): $5,176,416.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) Electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other material must identify the agency name and the OSHA docket number (Docket No. OSHA–2012–0005) for the ICR. You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify electronic comments by your name, date, and the docket number so that the agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350; TTY (877) 889–5627.

Comments and submissions are posted without change at *http://www.regulations.gov.* Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in the *http://www.regulations.gov* index, some information (*e.g.,* copyrighted material) is not publicly available to read or download through this website. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the *http://www.regulations.gov* website to submit comments and access the docket is available at the website's ''User Tips'' link. Contact the OSHA Docket Office for information about materials not available through the website, and for assistance in using the internet to locate docket submissions.

V. Authority and Signature

Loren Sweatt, Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 1–2012 (77 FR 3912).

Signed at Washington, DC, on October 24, 2019.

Loren Sweatt,

Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

POSTAL REGULATORY COMMISSION

[Docket Nos. CP2016–12; MC2020–16 and CP2020–15]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning negotiated service agreements. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* November 5, 2019.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Docketed Proceeding(s)

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3007.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3010, and 39 CFR part 3020, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* CP2016–12; *Filing Title:* USPS Notice of Amendment to Priority Mail Contract 150 and Motion for Temporary Relief; *Filing Acceptance Date:* October 25, 2019; *Filing Authority:* 39 CFR 3015.5; *Public Representative:* Kenneth R. Moeller; *Comments Due:* November 5, 2019.

2. *Docket No(s).:* MC2020–16 and CP2020–15; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & First-Class Package Service Contract 67 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* October 28, 2019; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3020.30 *et seq.,* and 39 CFR 3015.5; *Public Representative:* Curtis E. Kidd; *Comments Due:* November 5, 2019.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87410; File No. SR–NYSEArca–2019–33]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Amendment No. 2 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 2, Regarding Changes to Investments of the First Trust TCW Unconstrained Plus Bond ETF

October 28, 2019.

I. Introduction

On May 6, 2019, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to modify certain investments of the First Trust TCW Unconstrained Plus Bond ETF, the shares of which are currently listed and traded on the Exchange pursuant to NYSE Arca Rule 8.600–E. On May 16, 2019, the Exchange filed Amendment No. 1 to the proposed rule change. The proposed rule change, as modified by Amendment No. 1, was published for comment in the **Federal Register** on May 28, 2019.[3]

On July 3, 2019, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change.[5] On August 26, 2019, the Commission instituted proceedings under Section 19(b)(2)(B) of the Act [6] to determine whether to approve or disapprove the proposed rule change, as modified by Amendment No. 1.[7] On September 18, 2019, the Exchange filed Amendment No. 2 to the proposed rule change.[8] The Commission has received no comment letters on the proposal. The Commission is publishing this notice to solicit comments on Amendment No. 2 from interested persons, and is approving the proposed rule change, as modified by Amendment No. 2, on an accelerated basis.

II. The Exchange's Description of the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes certain changes, described below under ''Application of Generic Listing Requirements'', regarding investments of the First Trust TCW Unconstrained Plus Bond ETF (''Fund''), shares (''Shares'') of which are currently listed and traded on the Exchange under NYSE Arca Rule 8.600–E, which governs the listing and trading of Managed Fund Shares [9] on the Exchange. Shares of the Fund commenced trading on the Exchange on June 5, 2018 in accordance with the generic listing standards in Commentary .01 to NYSE Arca Rule 8.600–E.

The Shares are offered by First Trust Exchange-Traded Fund VIII (the ''Trust''), which is registered with the Commission as an open-end management investment company.[10] The Fund is a series of the Trust.

[8] In Amendment No. 2, which amended and replaced the proposed rule change, as modified by Amendment No. 1, in its entirety, the Exchange (i) modified its representation regarding holdings of the Fund (as defined herein) to align with revised Commentary .01(b)(5) to NYSE Arca Rule 8.600–E; (ii) conformed a requirement relating to certain investment restrictions from ''average loan maturity'' to ''weighted average loan age''; (iii) provided additional arguments in support of the proposed modifications to the Fund's investments; and (iv) made non-substantive and technical changes. Amendment No. 2 is available at: *https://www.sec.gov/comments/sr-nysearca-2019-33/srnysearca201933-6148204-192289.pdf.*

[9] A Managed Fund Share is a security that represents an interest in an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1) (''1940 Act'') organized as an open-end investment company or similar entity that invests in a portfolio of securities selected by its investment adviser consistent with its investment objectives and policies. In contrast, an open-end investment company that issues Investment Company Units, listed and traded on the Exchange under NYSE Arca Rule 5.2–E(j)(3), seeks to provide investment results that correspond generally to the price and yield performance of a specific foreign or domestic stock index, fixed income securities index or combination thereof.

[10] The Trust is registered under the 1940 Act. On May 29, 2018, the Trust filed with the Commission

First Trust Advisors L.P. is the investment adviser (''First Trust'' or ''Adviser'') to the Fund. TCW Investment Management Company LLC (''TCW'' or the ''Sub-Adviser''), serves as the Fund's investment sub-adviser. First Trust Portfolios L.P. is the distributor (''Distributor'') for the Fund's Shares. The Bank of New York Mellon acts as the administrator, custodian and transfer agent (''Custodian'' or ''Transfer Agent'') for the Fund.

Commentary .06 to Rule 8.600–E provides that, if the investment adviser to the investment company issuing Managed Fund Shares is affiliated with a broker-dealer, such investment adviser shall erect and maintain a ''fire wall'' between the investment adviser and the broker-dealer with respect to access to information concerning the composition and/or changes to such investment company portfolio.[11] In addition, Commentary .06 further requires that personnel who make decisions on the open-end fund's portfolio composition must be subject to procedures designed to prevent the use and dissemination of material nonpublic information regarding the open-end fund's portfolio. The Adviser and Sub-Adviser are not registered as broker-dealers. The Adviser is affiliated with First Trust Portfolios L.P., a broker-dealer, and has implemented and will maintain a fire wall with respect to its broker-dealer affiliate regarding access to information concerning the composition and/or changes to the portfolio. The Sub-Adviser is affiliated with multiple broker-dealers and has implemented and will maintain a fire wall with respect to its broker-dealer affiliates regarding access to information concerning the composition and/or changes to the portfolio. In the event (a) the Adviser or the Sub-Adviser becomes registered as a broker-dealer or newly affiliated with a broker-dealer, or (b) any new adviser or sub-adviser is a registered broker-dealer or becomes affiliated with a broker-dealer, it will implement and maintain a fire wall with respect to relevant personnel and any broker-dealer affiliate regarding access to information concerning the composition and/or changes to the portfolio, and will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding such portfolio.

First Trust TCW Unconstrained Plus Bond ETF

Principal Investments

According to the Registration Statement, the investment objective of the Fund is to seek to maximize long-term total return. Under normal market conditions,[12] the Fund intends to invest at least 80% of its net assets (including investment borrowings) in a portfolio of ''Fixed Income Securities'' (described below).

In managing the Fund's portfolio, TCW intends to employ a flexible approach that allocates the Fund's investments across a range of global investment opportunities and actively manage exposure to interest rates, credit sectors and currencies. TCW seeks to utilize independent, bottom-up research to identify securities that are undervalued and that offer a superior risk/return profile. Pursuant to this investment strategy, the Fund may invest in the following Fixed Income Securities, which may be represented by derivatives relating to such securities, as discussed below:

- Securities issued or guaranteed by the U.S. government or its agencies, instrumentalities or U.S. government-sponsored entities (''U.S. government securities'');
- Treasury Inflation Protected Securities (''TIPS'');
- the following non-agency, non-government-sponsored entity (''GSE'') and privately-issued mortgage-related and other asset-backed securities: Residential mortgage-backed securities (''RMBS''), commercial mortgage-backed securities (''CMBS''), asset-backed securities (''ABS''), and collateralized loan obligations (''CLOs'' and, together with such RMBS, CMBS and ABS, ''Private ABS/MBS''); [13]
- Agency RMBS, agency CMBS, and agency ABS;
- domestic corporate bonds;
- Fixed Income Securities issued by non-U.S. corporations and non-U.S. governments;
- bank loans, including first lien senior secured floating rate bank loans (''Senior Loans''), secured and unsecured loans, second lien or more junior loans, and bridge loans;
- fixed income convertible securities;
- fixed income preferred securities; and
- municipal bonds.

The Fund may invest in agency RMBS and CMBS by investing in to-be-announced transactions (''TBA Transactions'').

The Fund may hold cash and cash equivalents.[14] In addition, the Fund may hold the following short-term instruments with maturities of three months or more: Certificates of deposit; bankers' acceptances; repurchase agreements and reverse repurchase agreements; bank time deposits; and commercial paper.

The Fund may enter into short sales of any securities in which the Fund may invest.

The Fund may utilize exchange-listed and over-the-counter (''OTC'') traded derivatives instruments for duration/yield curve management and/or hedging

its registration statement on Form N–1A under the Securities Act of 1933 (15 U.S.C. 77a), and under the 1940 Act relating to the Fund (File Nos. 333–210186 and 811–23147) (''Registration Statement''). The description of the operation of the Trust and the Fund herein is based, in part, on the Registration Statement. In addition, the Commission has issued an order upon which the Trust may rely, granting certain exemptive relief under the 1940 Act. *See* Investment Company Act Release No. 30029 (April 10, 2012) (File No. 812–13795).

[11] An investment adviser to an open-end fund is required to be registered under the Investment Advisers Act of 1940 (the ''Advisers Act''). As a result, the Adviser and Sub-Adviser and their related personnel are subject to the provisions of Rule 204A–1 under the Advisers Act relating to codes of ethics. This Rule requires investment advisers to adopt a code of ethics that reflects the fiduciary nature of the relationship to clients as well as compliance with other applicable securities laws. Accordingly, procedures designed to prevent the communication and misuse of non-public information by an investment adviser must be consistent with Rule 204A–1 under the Advisers Act. In addition, Rule 206(4)–7 under the Advisers Act makes it unlawful for an investment adviser to provide investment advice to clients unless such investment adviser has (i) adopted and implemented written policies and procedures reasonably designed to prevent violation, by the investment adviser and its supervised persons, of the Advisers Act and the Commission rules adopted thereunder; (ii) implemented, at a minimum, an annual review regarding the adequacy of the policies and procedures established pursuant to subparagraph (i) above and the effectiveness of their implementation; and (iii) designated an individual (who is a supervised person) responsible for administering the policies and procedures adopted under subparagraph (i) above.

[12] The term ''normal market conditions'' is defined in NYSE Arca Rule 8.600–E(c)(5). On a temporary basis, including for defensive purposes, during the initial invest-up period (*i.e.,* the six-week period following the commencement of trading of Shares on the Exchange) and during periods of high cash inflows or outflows (*i.e.,* rolling periods of seven calendar days during which inflows or outflows of cash, in the aggregate, exceed 10% of the Fund's net assets as of the opening of business on the first day of such periods), the Fund may depart from its principal investment strategies; for example, it may hold a higher than normal proportion of its assets in cash. During such periods, the Fund may not be able to achieve its investment objective. The Fund may adopt a defensive strategy when the Adviser and/or the Sub-Adviser believes securities in which the Fund normally invests have elevated risks due to market, political or economic factors and in other extraordinary circumstances.

[13] For avoidance of doubt, ''Private ABS/MBS'' as referenced herein are non-agency, non-GSE and privately-issued mortgage-related and other asset-backed securities as stated in Commentary .01(b)(5) to NYSE Arca Rule 8.600–E.

[14] For purposes of this filing, cash equivalents are the short-term instruments with maturities of less than 3 months enumerated in Commentary .01(c) to Rule 8.600–E.

purposes, for risk management purposes or as part of its investment strategies. The Fund will use derivative instruments primarily to hedge interest rate risk, actively manage interest rate exposure, hedge foreign currency risk and actively manage foreign currency exposure. The Fund may also use derivative instruments to enhance returns, as a substitute for, or to gain exposure to, a position in an underlying asset, to reduce transaction costs, to maintain full market exposure, to manage cash flows or to preserve capital. Derivatives may also be used to hedge risks associated with the Fund's other portfolio investments. The Fund will not use derivative instruments to gain exposure to Private ABS/MBS, and derivative instruments linked to such securities will be used for hedging purposes only. Derivatives that the Fund may enter into are the following: Futures on interest rates, currencies, Fixed Income Securities and fixed income indices; exchange-traded and OTC options on interest rates, currencies, Fixed Income Securities and fixed income indices; swap agreements on interest rates, currencies, Fixed Income Securities and fixed income indices; credit default swaps (''CDX''); and currency forward contracts.

Other Investments

While the Fund, under normal market conditions, invests at least 80% of its net assets in the Principal Investments described above, the Fund may invest its remaining assets in the following ''Non-Principal Investments.''

The Fund may invest in exchange-traded common stock, exchange-traded preferred stock, and exchange-traded real estate investment trusts (''REITs'').

The Fund may invest in the securities of other investment companies registered under the 1940 Act, including money market funds, exchange-traded funds (''ETFs''), open-end funds (other than money market funds and other ETFs), and U.S. exchange-traded closed-end funds.[15]

The Fund may hold exchange-traded notes (''ETNs'').[16]

The Fund may hold exchange-traded or OTC ''Work Out Securities.''[17]

The Fund may hold exchange-traded or OTC equity securities issued upon conversion of fixed income convertible securities.

Investment Restrictions

The Fund may not invest more than 2% of its total assets in any one Fixed Income Security (excluding U.S. government securities and TIPS) on a per CUSIP basis. The Fund's holdings in derivative instruments for hedging purposes would be excluded from the determination of compliance with this 2% limitation. The total gross notional value of the Fund's holdings in derivative instruments used to gain exposure to a specific asset is limited to 2% of the Fund's total assets.

The Fund may invest up to 50% of its total assets in the aggregate in Private ABS/MBS, provided that the Fund (1) may not invest more than 30% of its total assets in non-agency RMBS; (2) may not invest more than 25% of its total assets in non-agency CMBS and CLOs; and (3) may not invest more than 25% of its total assets in non-agency ABS.

With respect to the Fund's investments in up to 30% of its total assets in Private ABS/MBS that exceed the 20% of the weight of the Fund's portfolio[18] that may be invested in Private ABS/MBS under Commentary .01(b)(5) to NYSE Arca Rule 8.600–E,[19] the following restrictions will apply:

- Non-agency RMBS shall have a weighted average loan age of 84 months or more;
- Non-agency CMBS and CLOs shall have a weighted average loan age of 60 months or more; and
- Non-agency ABS shall have a weighted average loan age of 12 months or more.[20]

The Exchange proposes that up to 25% of the Fund's assets may be invested in OTC derivatives that are used to reduce currency, interest rate or credit risk arising from the Fund's investments (that is, ''hedge''). The Fund's investments in OTC derivatives other than OTC derivatives used to hedge the Fund's portfolio against currency, interest rate or credit risk will be limited to 20% of the assets in the Fund's portfolio. For purposes of these percentage limitations on OTC derivatives, the weight of such OTC derivatives will be calculated as the aggregate gross notional value of such OTC derivatives.

The Fund's holdings of bank loans will not exceed 15% of the Fund's total assets, and the Fund's holdings of bank loans other than Senior Loans will not exceed 5% of the Fund's total assets.

The Fund's holdings in fixed income convertible securities and in equity securities issued upon conversion of such convertible securities will not exceed 10% of the Fund's total assets.

The Fund's holdings in Work Out Securities will not exceed 5% of the Fund's total assets.

The Fund will not invest in securities or other financial instruments that have not been described in this proposed rule change.

Other Restrictions

The Fund's investments, including derivatives, will be consistent with the Fund's investment objective and will not be used to enhance leverage (although certain derivatives and other investments may result in leverage). That is, the Fund's investments will not be used to seek performance that is the multiple or inverse multiple (*e.g.,* 2X or –3X) of the Fund's primary broad-based securities benchmark index (as defined in Form N–1A).[21]

Use of Derivatives by the Fund

The Fund may invest in the types of derivatives described in the ''Principal Investments'' section above for the purposes described in that section. Investments in derivative instruments will be made in accordance with the Fund's investment objective and policies.

[15] For purposes of this filing, the term ''ETFs'' are Investment Company Units (as described in NYSE Arca Rule 5.2–E(j)(3)); Portfolio Depositary Receipts (as described in NYSE Arca Rule 8.100–E); and Managed Fund Shares (as described in NYSE Arca Rule 8.600–E). All ETFs will be listed and traded in the U.S. on a national securities exchange. While the Fund may invest in inverse ETFs, the Fund will not invest in leveraged (*e.g.,* 2X, –2X, 3X or –3X) ETFs.

[16] ETNs are Index-Linked Securities (as described in NYSE Arca Rule 5.2–E(j)(6)). While the Fund may invest in inverse ETNs, the Fund will not invest in leveraged or inverse leveraged ETNs (*e.g.,* 2X or –3X).

[17] For purposes of this filing, Work Out Securities are U.S. or foreign equity securities of any type acquired in connection with restructurings related to issuers of Fixed Income Securities held by the Fund. Work Out Securities are generally traded OTC, but may be traded on a U.S. or foreign exchange.

[18] *See* Securities Exchange Act Release No. 86017 (June 3, 2019), 84 FR 26711 (June 7, 2019) (SR–NYSEArca–2019–06) (order approving an amendment to Commentary .01(b)(5) to Rule 8.600–E to delete the reference to the ''fixed income portion of the'' portfolio, such that non-agency, non-GSE, and privately-issued mortgage-related and other asset-backed securities components of a portfolio may not account, in the aggregate, for more than 20% of the weight of the whole portfolio).

[19] Commentary .01(b)(5) to NYSE Arca Rule 8.600–E provides that non-agency, non-GSE and privately-issued mortgage-related and other asset-backed securities components of a portfolio shall not account, in the aggregate, for more than 20% of the weight of the portfolio.

[20] Information relating to weighted average loan age for non-agency RMBS, non-agency CMBS, CLOs and non-agency ABS is widely available from major market data vendors such as Bloomberg.

[21] The Fund's broad-based securities benchmark index will be identified in a future amendment to the Registration Statement following the Fund's first full calendar year of performance.

To limit the potential risk associated with such transactions, the Fund will enter into offsetting transactions or segregate or ''earmark'' assets determined to be liquid by the Adviser in accordance with procedures established by the Trust's Board of Trustees (the ''Board''). In addition, the Fund has included appropriate risk disclosure in its offering documents, including leveraging risk. Leveraging risk is the risk that certain transactions of the Fund, including the Fund's use of derivatives, may give rise to leverage, causing the Fund to be more volatile than if it had not been leveraged. Because the markets for certain assets, or the assets themselves, may be unavailable or cost prohibitive as compared to derivative instruments, suitable derivative transactions may be an efficient alternative for the Fund to obtain the desired asset exposure.

Impact on Arbitrage Mechanism

The Adviser and the Sub-Adviser believe there will be minimal, if any, impact to the arbitrage mechanism as a result of the Fund's use of derivatives and Private ABS/MBS. The Adviser and the Sub-Adviser understand that market makers and participants should be able to value derivatives and Private ABS/MBS as long as the positions are disclosed with relevant information. The Adviser and the Sub-Adviser believe that the price at which Shares of the Fund trade will continue to be disciplined by arbitrage opportunities created by the ability to purchase or redeem Shares of the Fund at their net asset value (''NAV''), which should ensure that Shares of the Fund will not trade at a material discount or premium in relation to their NAV.

The Adviser and Sub-Adviser do not believe there will be any significant impacts to the settlement or operational aspects of the Fund's arbitrage mechanism due to the use of derivatives and Private ABS/MBS.

Creation and Redemption of Shares

The Fund will issue and redeem Shares on a continuous basis at NAV [22] only in large blocks of Shares (''Creation Units'') in transactions with authorized participants, generally including broker-dealers and large institutional investors (''Authorized Participants''). Creation Units generally will consist of 50,000 Shares. The size of a Creation Unit is subject to change. As described in the Registration Statement, the Fund will issue and redeem Creation Units in exchange for an in-kind portfolio of instruments and/or cash in lieu of such instruments (the ''Creation Basket'').[23] In addition, if there is a difference between the NAV attributable to a Creation Unit and the market value of the Creation Basket exchanged for the Creation Unit, the party conveying instruments (which may include cash-in-lieu amounts) with the lower value will pay to the other an amount in cash equal to the difference (referred to as the ''Cash Component'').

Creations and redemptions must be made by or through an Authorized Participant that has executed an agreement that has been agreed to by the Distributor and the Transfer Agent with respect to creations and redemptions of Creation Units. All standard orders to create Creation Units must be received by the Transfer Agent no later than the closing time of the regular trading session on the NYSE (ordinarily 4:00 p.m., E.T.) (the ''Closing Time'') in each case on the date such order is placed in order for the creation of Creation Units to be effected based on the NAV of Shares as next determined on such date after receipt of the order in proper form. Shares may be redeemed only in Creation Units at their NAV next determined after receipt not later than the Closing Time of a redemption request in proper form by the Fund through the Transfer Agent and only on a business day. The Custodian, through the National Securities Clearing Corporation (''NSCC''), will make available on each business day, prior to the opening of business of the Exchange, the list of the names and quantities of the instruments comprising the Creation Basket, as well as the estimated Cash Component (if any), for that day. The published Creation Basket will apply until a new Creation Basket is announced on the following business day prior to commencement of trading in the Shares.

Application of Generic Listing Requirements

The Exchange is submitting this proposed rule change because the portfolio for the Fund will not meet all of the ''generic'' listing requirements of Commentary .01 to NYSE Arca Rule 8.600–E applicable to the listing of Managed Fund Shares. The Fund's portfolio will meet all such requirements except for those set forth in Commentary .01(a)(1), (a)(2), (b)(1), (b)(4), (b)(5), and (e), as described below.

The Fund will not comply with the requirements set forth in Commentary .01(a)(1) [24] and (a)(2) [25] to NYSE Arca

[22] The NAV of the Fund's Shares generally will be calculated once daily Monday through Friday as of the close of regular trading on the New York Stock Exchange (''NYSE''), generally 4:00 p.m., Eastern Time (''E.T.''). NAV per Share will be calculated by dividing the Fund's net assets by the number of Fund Shares outstanding.

[23] It is expected that the Fund will typically issue and redeem Creation Units on a cash basis; however, at times, the Fund may issue and redeem Creation Units on an in-kind (or partially in-kind) (or partially cash) basis.

[24] Commentary .01(a)(1) to NYSE Arca Rule 8.600–E provides that the component stocks of the equity portion of a portfolio that are U.S. Component Stocks shall meet the following criteria initially and on a continuing basis: (A) Component stocks (excluding Derivative Securities Products and Index-Linked Securities) that in the aggregate account for at least 90% of the equity weight of the portfolio (excluding such Derivative Securities Products and Index-Linked Securities) each shall have a minimum market value of at least $75 million; (B) Component stocks (excluding Derivative Securities Products and Index-Linked Securities) that in the aggregate account for at least 70% of the equity weight of the portfolio (excluding such Derivative Securities Products and Index-Linked Securities) each shall have a minimum monthly trading volume of 250,000 shares, or minimum notional volume traded per month of $25,000,000, averaged over the last six months; (C) The most heavily weighted component stock (excluding Derivative Securities Products and Index-Linked Securities) shall not exceed 30% of the equity weight of the portfolio, and, to the extent applicable, the five most heavily weighted component stocks (excluding Derivative Securities Products and Index-Linked Securities) shall not exceed 65% of the equity weight of the portfolio; (D) Where the equity portion of the portfolio does not include Non-U.S. Component Stocks, the equity portion of the portfolio shall include a minimum of 13 component stocks; provided, however, that there shall be no minimum number of component stocks if (i) one or more series of Derivative Securities Products or Index-Linked Securities constitute, at least in part, components underlying a series of Managed Fund Shares, or (ii) one or more series of Derivative Securities Products or Index-Linked Securities account for 100% of the equity weight of the portfolio of a series of Managed Fund Shares; (E) Except as provided herein, equity securities in the portfolio shall be U.S. Component Stocks listed on a national securities exchange and shall be NMS Stocks as defined in Rule 600 of Regulation NMS under the Securities Exchange Act of 1934; and (F) American Depositary Receipts (''ADRs'') in a portfolio may be exchange-traded or non-exchange-traded. However, no more than 10% of the equity weight of a portfolio shall consist of non-exchange-traded ADRs.

[25] Commentary .01(a)(2) to NYSE Arca Rule 8.600–E provides that the component stocks of the equity portion of a portfolio that are Non-U.S. Component Stocks shall meet the following criteria initially and on a continuing basis: (A) Non-U.S. Component Stocks each shall have a minimum market value of at least $100 million; (B) Non-U.S. Component Stocks each shall have a minimum global monthly trading volume of 250,000 shares, or minimum global notional volume traded per month of $25,000,000, averaged over the last six months; (C) The most heavily weighted Non-U.S. Component stock shall not exceed 25% of the equity weight of the portfolio, and, to the extent applicable, the five most heavily weighted Non-U.S. Component Stocks shall not exceed 60% of the equity weight of the portfolio; (D) Where the equity portion of the portfolio includes Non-U.S. Component Stocks, the equity portion of the portfolio shall include a minimum of 20 component stocks; provided, however, that there shall be no minimum number of component stocks if (i) one or more series of Derivative Securities Products or Index-Linked Securities constitute, at least in part,

Continued

Rule 8.600–E with respect to the Fund's investments in equity securities.[26] Instead, the Exchange proposes that (i) the Fund's investments in equity securities will meet the requirements of Commentary .01(a) with the exception of Commentary .01(a)(1)(C) and .01(a)(1)(D) (with respect to U.S. Component Stocks) and Commentary .01(a)(2)(C) and .01(a)(2)(D) (with respect to Non-U.S. Component Stocks). Any Fund investment in exchange-traded common stocks, preferred stocks, REITS, ETFs, ETNs, exchange-traded equity securities issued upon conversion of fixed income convertible securities, exchange-traded Work Out Securities and U.S. exchange-traded closed-end funds would provide for enhanced diversification of the Fund's portfolio and, in any case, would be Non-Principal Investments and would not exceed 20% of the Fund's net assets in the aggregate. With respect to any Fund holdings of exchange-traded equity securities issued upon conversion of fixed income convertible securities and exchange-traded Work Out Securities, such securities will not exceed 10% and 5%, respectively, of the Fund's total assets. The Adviser and Sub-Adviser represent that the Fund generally will not actively invest in equity securities issued upon conversion of fixed income convertible securities or Work Out Securities, but may, at times, receive a distribution of such securities in connection with the Fund's holdings in other securities. Therefore, the Fund's holdings in equity securities issued upon conversion of fixed income convertible securities and Work Out Securities generally would not be acquired as the result of the Fund's voluntary investment decisions. The Adviser and Sub-Adviser represent that, under these circumstances, application of the weighting requirements of Commentary .01(a)(1)(C) and Commentary .01(a)(2)(C) and the minimum number of components requirements of Commentary .01(a)(1)(D) and Commentary .01(a)(2)(D) would impose an unnecessary burden on the Fund's ability to hold such equity securities.

The Fund will not comply with the requirement in Commentary .01(b)(1) to Rule 8.600–E that components that in the aggregate account for at least 75% of the fixed income weight of the portfolio each shall have a minimum original principal amount outstanding of $100 million or more. Instead, the Exchange proposes that components that in the aggregate account for at least 50% of the fixed income weight of the portfolio each shall have a minimum original principal amount outstanding of $50 million or more. As noted above, the Fund may not invest more than 2% of its total assets in any one Fixed Income Security (excluding U.S. government securities and TIPS) on a per CUSIP basis. In addition, at least 50% of the weight of the Fund's portfolio would continue to be subject to a substantial minimum (*i.e.,* $50 million) original principal amount outstanding. The Exchange believes this limitation would provide significant additional diversification to the Fund's investments in Fixed Income Securities, and reduce concerns that the Fund's investments in such securities would be readily susceptible to market manipulation.

The Fund will not comply with the requirements in Commentary .01(b)(4) to Rule 8.600–E that component securities that in the aggregate account for at least 90% of the fixed income weight of the portfolio meet one of the criteria specified in Commentary .01(b)(4), because certain Private ABS/MBS cannot satisfy the criteria in Commentary .01(b)(4).[27] Instead, the Exchange proposes that the Fund's investments in Fixed Income Securities other than Private ABS/MBS will be required to comply with the requirements of Commentary .01(b)(4). As noted above, the Fund may not invest more than 2% of its total assets in any one Fixed Income Security (excluding U.S. government securities and TIPS) on a per CUSIP basis. The Exchange believes this limitation would provide additional diversification to the Fund's investments in Private ABS/MBS, and reduce concerns that the Fund's investment in such securities would be readily susceptible to market manipulation.

The Exchange notes that the Commission has previously approved the listing of Managed Fund Shares with similar investment objectives and strategies without imposing requirements that a certain percentage of such funds' securities meet one of the criteria set forth in Commentary .01(b)(4).[28]

The Fund will not comply with the requirement in Commentary .01(b)(5) to Rule 8.600–E that Private ABS/MBS in the Fund's portfolio account, in the aggregate, for no more than 20% of the weight of the Fund's portfolio.[29] Instead, the Exchange proposes that, in order to enable the portfolio to be more diversified and provide the Fund with an opportunity to earn higher returns, the Fund may invest up to 50% of its total assets in the aggregate in Private ABS/MBS, provided that the Fund (1) may not invest more than 30% of its total assets in non-agency RMBS; (2) may not invest more than 25% of its total assets in non-agency CMBS and CLOs; and (3) may not invest more than 25% of its total assets in non-agency ABS.

With respect to the Fund's investments in up to 30% of its total assets in Private ABS/MBS that exceed the 20% of the weight of the Fund's portfolio that may be invested in Private ABS/MBS under Commentary .01(b)(5) to NYSE Arca Rule 8.600–E,[30] the following restrictions will apply:

- Non-agency RMBS shall have a weighted average loan age of 84 months or more;
- Non-agency CMBS and CLOs shall have a weighted average loan age of 60 months or more; and
- Non-agency ABS shall have a weighted average loan age of 12 months or more.

In addition, as noted above, the Fund may not invest more than 2% of its total assets in any one Fixed Income Security (excluding U.S. government securities and TIPS) on a per CUSIP basis.[31] The

components underlying a series of Managed Fund Shares, or (ii) one or more series of Derivative Securities Products or Index-Linked Securities account for 100% of the equity weight of the portfolio of a series of Managed Fund Shares; and (E) Each Non-U.S. Component Stock shall be listed and traded on an exchange that has last-sale reporting.

[26] For purposes of these exceptions, investments in equity securities that are OTC Work Out Securities, OTC equity securities issued upon conversion of fixed income convertible securities, or non-exchange-traded securities of other open-end investment companies (*e.g.,* mutual funds) are excluded and are discussed further below.

[27] Commentary .01(b)(4) provides that component securities that in the aggregate account for at least 90% of the fixed income weight of the portfolio must be either: (a) From issuers that are required to file reports pursuant to Sections 13 and 15(d) of the Act; (b) from issuers that have a worldwide market value of its outstanding common equity held by non-affiliates of $700 million or more; (c) from issuers that have outstanding securities that are notes, bonds debentures, or evidence of indebtedness having a total remaining principal amount of at least $1 billion; (d) exempted securities as defined in Section 3(a)(12) of the Act; or (e) from issuers that are a government of a foreign country or a political subdivision of a foreign country.

[28] *See, e.g.,* Exchange Act Release Nos. 67894 (September 20, 2012) 77 FR 59227 (September 26, 2012) (SR–BATS–2012–033) (order approving the listing and trading of shares of the iShares Short Maturity Bond Fund); 70342 (September 6, 2013), 78 FR 56256 (September 12, 2013) (SR–NYSEArca–2013–71) (order approving the listing and trading of shares of the SPDR SSgA Ultra Short Term Bond ETF, SPDR SSgA Conservative Ultra Short Term Bond ETF and SPDR SSgA Aggressive Ultra Short Term Bond ETF).

[29] *See* note 19, *supra.*

[30] *See* note 19, *supra.*

[31] As noted above, the Fund's holdings in derivative instruments for hedging purposes would

Exchange believes these limitations would provide additional diversification to the Fund's Private ABS/MBS investments and reduce concerns that the Fund's investment in such securities would be readily susceptible to market manipulation.

The Adviser and Sub-Adviser represent that the RMBS sector can be an important component of the Fund's investment strategy because of the potential for attractive risk-adjusted returns relative to other fixed income sectors and the potential to add significantly to the diversification in the Fund's portfolio. Similarly, the Private ABS/MBS sectors also have the potential for attractive risk-adjusted returns and added portfolio diversification.

The Fund's portfolio will not comply with the requirements set forth in Commentary .01(e) to NYSE Arca Rule 8.600–E.[32] Specifically, the Fund's investments in OTC derivatives may exceed 20% of Fund assets, calculated as the aggregate gross notional value of such OTC derivatives. The Exchange proposes that up to 25% of the Fund's assets (calculated as the aggregate gross notional value) may be invested in OTC derivatives that are used to reduce currency, interest rate or credit risk arising from the Fund's investments (that is, ''hedge''). The Fund's investments in OTC derivatives other than OTC derivatives used to hedge the Fund's portfolio against currency, interest rate or credit risk will be limited to 20% of the assets in the Fund's portfolio, calculated as the aggregate gross notional value of such OTC derivatives.

The Adviser and Sub-Adviser believe that it is important to provide the Fund with additional flexibility to manage risk associated with its investments. Depending on market conditions, it may be critical that the Fund be able to utilize available OTC derivatives for this purpose to attempt to reduce impact of currency, interest rate or credit fluctuations on Fund assets. Therefore, the Exchange believes it is appropriate to apply a limit of up to 25% of the Fund's assets to the Fund's investments in OTC derivatives (calculated as the aggregate gross notional value of such OTC derivatives), including forwards, options and swaps, that are used for hedging purposes, as described above.[33]

As noted above, the Fund may hold equity securities that are Work Out Securities, which generally are traded OTC (but that may be traded on a U.S. or foreign exchange), exchange-traded or OTC equity securities issued upon conversion of fixed income convertible securities, and non-exchange-traded securities of other open-end investment company securities (*e.g.,* mutual funds). The Exchange believes that it is appropriate and in the public interest to approve listing and trading of Shares of the Fund on the Exchange notwithstanding that the Fund would not meet the requirements of Commentary .01(a)(1)(A) through (E) to Rule 8.600–E with respect to the Fund's investments in non-exchange-traded securities of open-end investment company securities,[34] and notwithstanding that the Fund's holdings of OTC equity securities issued upon conversion of fixed income convertible securities and OTC Work Out Securities would not meet the requirements of Commentary .01(a)(1)(A) through (E) and Commentary .01(a)(2) (A) through (E) to Rule 8.600–E. Investments in non-exchange-traded securities of open-end investment company securities will not be principal investments of the Fund.[35] Such investments, which may include mutual funds that invest, for example, principally in fixed income securities, would be utilized to help the Fund meet its investment objective and to equitize cash in the short term. With respect to any Fund holdings of OTC equity securities issued upon conversion of fixed income convertible securities and OTC Work Out Securities, such securities will not exceed 10% and 5%, respectively, of the Fund's total assets. The Adviser and Sub-Adviser represent that the Fund generally will not actively invest in OTC equity securities issued upon conversion of fixed income convertible securities or OTC Work Out Securities, but may, at times, receive a distribution of such securities in connection with the Fund's holdings in other securities. Therefore, the Fund's holdings in equity securities issued upon conversion of fixed income convertible securities and Work Out Securities generally would not be acquired as the result of the Fund's voluntary investment decisions.

With respect to investments in non-exchange-traded investment company securities, because such securities have a net asset value based on the value of securities and financial assets the investment company holds, the Exchange believes it is both unnecessary and inappropriate to apply to such investment company securities the criteria in Commentary .01(a)(1).[36]

The Exchange notes that Commentary .01(a) through (d) to Rule 8.600–E exclude application of those provisions to certain ''Derivative Securities Products'' that are exchange-traded investment company securities, including Investment Company Units (as described in NYSE Arca Rule 5.2–E(j)(3)), Portfolio Depositary Receipts (as described in NYSE Arca Rule 8.100–E) and Managed Fund Shares (as described in NYSE Arca Rule 8.600–E).[37] In its

be excluded from the determination of compliance with this 2% limitation. The total gross notional value of the Fund's holdings in derivative instruments used to gain exposure to a specific asset is limited to 2% of the Fund's total assets.

[32] Commentary .01(e) to NYSE Arca Rule 8.600–E provides that the portfolio may hold OTC derivatives, including forwards, options and swaps on commodities, currencies and financial instruments (*e.g.,* stocks, fixed income, interest rates, and volatility) or a basket or index of any of the foregoing; however, on both an initial and continuing basis, no more than 20% of the assets in the portfolio may be invested in OTC derivatives. For purposes of calculating this limitation, a portfolio's investment in OTC derivatives will be calculated as the aggregate gross notional value of the OTC derivatives.

[33] The Commission has previously approved an exception from requirements set forth in Commentary .01(e) relating to investments in OTC derivatives similar to those proposed with respect to the Fund in Securities Exchange Act Release No. 80657 (May 11, 2017), 82 FR 22702 (May 17, 2017) (SR–NYSEArca–2017–09) (Notice of Filing of Amendment No. 2 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 2, Regarding Investments of the Janus Short Duration Income ETF Listed Under NYSE Arca Equities Rule 8.600).

[34] Commentary .01 (a) to Rule 8.600–E specifies the equity securities accommodated by the generic criteria in Commentary .01(a), namely, U.S. Component Stocks (as described in Rule 5.2–E(j)(3)); Non-U.S. Component Stocks (as described in Rule 5.2–E(j)(3)); Derivative Securities Products (*i.e.,* Investment Company Units and securities described in Section 2 of Rule 8–E); and Index-Linked Securities that qualify for Exchange listing and trading under Rule 5.2–E(j)(6).

[35] For purposes of this section of the filing, non-exchange-traded securities of other registered investment companies do not include money market funds, which are cash equivalents under Commentary .01(c) to Rule 8.600–E and for which there is no limitation in the percentage of the portfolio invested in such securities.

[36] The Commission has previously approved proposed rule changes under Section 19(b) of the Act for series of Managed Fund Shares that may invest in non-exchange traded investment company securities. *See, e.g.,* Securities Exchange Act Release No. 78414 (July 26, 2016), 81 FR 50576 (August 1, 2016) (SR–NYSEArca–2016–79) (order approving listing and trading of shares of the Virtus Japan Alpha ETF under NYSE Arca Equities Rule 8.600).

[37] The Commission initially approved the Exchange's proposed rule change to exclude ''Derivative Securities Products'' (*i.e.,* Investment Company Units and securities described in Section 2 of Rule 8) and ''Index-Linked Securities (as described in Rule 5.2–E (j)(6)) from Commentary .01(a)(A) (1) through (4) to Rule 5.2–E(j)(3) in Securities Exchange Act Release No. 57751 (May 1, 2008), 73 FR 25818 (May 7, 2008) (SR–NYSEArca–2008–29) (Order Granting Approval of a Proposed Rule Change, as Modified by Amendment No. 1 Thereto, to Amend the Eligibility Criteria for Components of an Index Underlying Investment Company Units) (''2008 Approval Order''). *See also,* Securities Exchange Act Release No. 57561 (March 26, 2008), 73 FR 17390 (April 1, 2008) (Notice of

Continued

2008 Approval Order approving amendments to Commentary .01(a) to Rule 5.2(j)(3) that exclude Derivative Securities Products from certain provisions of Commentary .01(a) (which exclusions are similar to those in Commentary .01(a)(1) to Rule 8.600–E), the Commission stated that ''based on the trading characteristics of Derivative Securities Products, it may be difficult for component Derivative Securities Products to satisfy certain quantitative index criteria, such as the minimum market value and trading volume limitations.'' The Exchange notes that it would be difficult or impossible to apply to non-exchange-traded investment company securities the generic quantitative criteria (*e.g.,* market capitalization, trading volume, or portfolio criteria) in Commentary .01 (a) through (d) applicable to U.S. Component Stocks. For example, the requirement for U.S. Component Stocks in Commentary .01(a)(1)(B) that there be minimum monthly trading volume of 250,000 shares, or minimum notional volume traded per month of $25,000,000, averaged over the last six months is tailored to exchange-traded securities (*e.g.,* U.S. Component Stocks) and not to mutual fund shares, which do not trade in the secondary market. Moreover, application of such criteria would not serve the purpose served with respect to U.S. Component Stocks, namely, to establish minimum liquidity and diversification criteria for U.S. Component Stocks held by series of Managed Fund Shares.

The Exchange notes that the Commission has previously approved listing and trading of an issue of Managed Fund Shares that may invest in equity securities that are non-exchange-traded securities of other open-end investment company securities notwithstanding that the fund would not meet the requirements of Commentary .01(a)(1)(A) through (E) to Rule 8.600–E with respect to such fund's investments in such securities.[38] Thus, the Exchange believes that it is appropriate to permit the Fund to invest in non-exchange-traded open-end management investment company securities, as described above.

Deviations from the generic requirements are necessary for the Fund to achieve its investment objective in a manner that is cost-effective and that maximizes investors' returns. Further, the proposed alternative requirements are narrowly tailored to allow the Fund to achieve its investment objective in manner that is consistent with the principles of Section 6(b)(5) of the Act. As a result, it is in the public interest to approve listing and trading of Shares of the Fund on the Exchange pursuant to the requirements set forth herein.

The Exchange notes that, other than Commentary .01(a)(1), (a)(2), (b)(1), (b)(4), (b)(5), and (e) to Rule 8.600–E, as described above, the Fund's portfolio will meet all other requirements of Rule 8.600–E.

Availability of Information

The Fund's website (*www.ftportfolios.com*) will include the prospectus for the Fund that may be downloaded. The Fund's website will include additional quantitative information updated on a daily basis including, for the Fund, (1) daily trading volume, the prior business day's reported closing price, NAV and midpoint of the bid/ask spread at the time of calculation of such NAV (the ''Bid/Ask Price''),[39] and a calculation of the premium and discount of the Bid/Ask Price against the NAV, and (2) data in chart format displaying the frequency distribution of discounts and premiums of the daily Bid/Ask Price against the NAV, within appropriate ranges, for each of the four previous calendar quarters. On each business day, before commencement of trading in Shares in the Core Trading Session on the Exchange, the Fund will disclose on its website the Disclosed Portfolio as defined in NYSE Arca Rule 8.600–E(c)(2) that forms the basis for the Fund's calculation of NAV at the end of the business day.[40]

On a daily basis, the Fund will disclose the information required under NYSE Arca Rule 8.600–E(c)(2) to the extent applicable. The website information will be publicly available at no charge.

In addition, a basket composition file, which includes the security names and share quantities, if applicable, required to be delivered in exchange for the Fund's Shares, together with estimates and actual cash components, will be publicly disseminated daily prior to the opening of the Exchange via the NSCC. The basket represents one Creation Unit of the Fund. Authorized Participants may refer to the basket composition file for information regarding Fixed Income Securities, and any other instrument that may comprise the Fund's basket on a given day.

Investors can also obtain the Trust's Statement of Additional Information (''SAI''), the Fund's Shareholder Reports, and the Fund's Forms N–CSR and Forms N–SAR, filed twice a year. The Fund's SAI and Shareholder Reports will be available free upon request from the Trust, and those documents and the Form N–CSR, Form N–PX and Form N–SAR may be viewed on-screen or downloaded from the Commission's website at *www.sec.gov.*

Intra-day and closing price information regarding exchange-traded options will be available from the exchange on which such instruments are traded. Intra-day and closing price information regarding Fixed Income Securities will be available from major market data vendors. Price information relating to OTC options, forwards and swaps will be available from major market data vendors. Intra-day price information for exchange-traded derivative instruments will be available from the applicable exchange and from major market data vendors. Intraday and other price information for the Fixed Income Securities in which the Fund will invest will be available through subscription services, such as Bloomberg, Markit and Thomson Reuters, which can be accessed by Authorized Participants and other market participants. Additionally, the Trade Reporting and Compliance Engine (''TRACE'') of the Financial Industry Regulatory Authority (''FINRA'') will be a source of price information for corporate bonds, and Private ABS/MBS, to the extent transactions in such securities are reported to TRACE.[41]

Filing of Proposed Rule Change and Amendment No. 1 Thereto to Amend the Eligibility Criteria for Components of an Index Underlying Investment Company Units). The Commission subsequently approved generic criteria applicable to listing and trading of Managed Fund Shares, including exclusions for Derivative Securities Products and Index-Linked Securities in Commentary .01(a)(1)(A) through (D), in Securities Exchange Act Release No. 78397 (July 22, 2016), 81 FR 49320 (July 27, 2016) (Order Granting Approval of Proposed Rule Change, as Modified by Amendment No. 7 Thereto, Amending NYSE Arca Equities Rule 8.600 To Adopt Generic Listing Standards for Managed Fund Shares). *See also,* Amendment No. 7 to SR–NYSEArca–2015–110, available at *https://www.sec.gov/comments/sr-nysearca-2015-110/nysearca2015110-9.pdf.*

[38] *See* Securities Exchange Act Release No. 83319 (May 24, 2018) (SR–NYSEArca–2018–15) (Order Approving a Proposed Rule Change, as Modified by Amendment No. 1 Thereto, to Continue Listing and Trading Shares of the PGIM Ultra Short Bond ETF Under NYSE Arca Rule 8.600–E).

[39] The Bid/Ask Price of the Fund's Shares will be determined using the mid-point of the highest bid and the lowest offer on the Exchange as of the time of calculation of the Fund's NAV. The records relating to Bid/Ask Prices will be retained by the Fund and its service providers.

[40] Under accounting procedures followed by the Fund, trades made on the prior business day (''T'') will be booked and reflected in NAV on the current business day (''T+1''). Accordingly, the Fund will be able to disclose at the beginning of the business day the portfolio that will form the basis for the NAV calculation at the end of the business day.

[41] Broker-dealers that are FINRA member firms have an obligation to report transactions in specified debt securities to TRACE to the extent

Trade price and other information relating to municipal bonds is available through the Municipal Securities Rulemaking Board's Electronic Municipal Market Access (''EMMA'') system. Non-exchange-traded open-end investment company securities are typically priced once each business day and their prices will be available through the applicable fund's website or from major market data vendors. Price information regarding U.S. government securities, bank loans, Private ABS/MBS, cash equivalents and short-term instruments with maturities of three months or more generally may be obtained from brokers and dealers who make markets in such securities or through nationally recognized pricing services through subscription agreements. Information relating to weighted average loan age for Private ABS/MBS is widely available from major market data vendors such as Bloomberg.

Information regarding market price and trading volume of the Shares, ETFs, ETNs, common stocks, preferred stocks, REITs, equity securities issued upon conversion of fixed income convertible securities, Work-Out Securities and closed-end funds will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services. Information regarding the previous day's closing price and trading volume information for the Shares will be published daily in the financial section of newspapers.

Quotation and last sale information for the Shares, ETFs, ETNs, closed-end funds, REITs, certain common stocks, certain preferred stocks, certain equity securities issued upon conversion of fixed income convertible securities, and certain Work-Out Securities will be available via the Consolidated Tape Association (''CTA'') high-speed line. Exchange-traded options quotation and last sale information for options cleared via the Options Clearing Corporation (''OCC'') are available via the Options Price Reporting Authority (''OPRA''). In addition, the Portfolio Indicative Value (''PIV''), as defined in NYSE Arca Rule 8.600–E(c)(3), will be widely disseminated by one or more major market data vendors at least every 15 seconds during the Core Trading Session.

Trading Halts

With respect to trading halts, the Exchange may consider all relevant factors in exercising its discretion to halt or suspend trading in the Shares of the Fund.[42] Trading in Shares of the Fund will be halted if the circuit breaker parameters in NYSE Arca Rule 7.12–E have been reached. Trading also may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. Trading in the Fund's Shares also will be subject to Rule 8.600–E(d)(2)(D) (''Trading Halts'').

Trading Rules

The Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange's existing rules governing the trading of equity securities. Shares will trade on the NYSE Arca Marketplace from 4 a.m. to 8 p.m., E.T. in accordance with NYSE Arca Rule 7.34–E (Early, Core, and Late Trading Sessions). The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions. As provided in NYSE Arca Rule 7.6–E, the minimum price variation (''MPV'') for quoting and entry of orders in equity securities traded on the NYSE Arca Marketplace is $0.01, with the exception of securities that are priced less than $1.00 for which the MPV for order entry is $0.0001.

With the exception of the requirements of Commentary .01(a)(1), (a)(2), (b)(1), (b)(4), (b)(5), and (e) to Rule 8.600–E as described above in ''Application of Generic Listing Requirements,'' the Shares of the Fund will conform to the initial and continued listing criteria under NYSE Arca Rule 8.600–E. Consistent with NYSE Arca Rule 8.600–E(d)(2)(B)(ii), the Adviser and Sub-Adviser will implement and maintain, or be subject to, procedures designed to prevent the use and dissemination of material non-public information regarding the actual components of the Fund's portfolio.

The Exchange represents that, for initial and continued listing, the Fund will be in compliance with Rule 10A–3 [43] under the Act, as provided by NYSE Arca Rule 5.3–E. The Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time. The Fund's investments will be consistent with its investment goal and will not be used to provide multiple returns of a benchmark or to produce leveraged returns.

Surveillance

The Exchange represents that trading in the Shares will be subject to the existing trading surveillances, administered by FINRA on behalf of the Exchange, or by regulatory staff of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws. The Exchange represents that these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and federal securities laws applicable to trading on the Exchange.[44]

The surveillances referred to above generally focus on detecting securities trading outside their normal patterns, which could be indicative of manipulative or other violative activity. When such situations are detected, surveillance analysis follows and investigations are opened, where appropriate, to review the behavior of all relevant parties for all relevant trading violations.

The Exchange or FINRA, on behalf of the Exchange, or both, will communicate as needed regarding trading in the Shares, certain exchange-traded options and certain exchange-traded futures, ETFs, ETNs, closed-end funds, certain common stocks, certain preferred stocks, certain REITs, certain equity securities issued upon conversion of fixed income convertible securities, certain Work-Out Securities with other markets and other entities that are members of the Intermarket Surveillance Group (''ISG''), and the Exchange or FINRA, on behalf of the Exchange, or both, may obtain trading information regarding trading in such securities and financial instruments from such markets and other entities.[45] In addition, the Exchange may obtain information regarding trading in such securities and financial instruments from markets and other entities that are members of ISG or with which the Exchange has in place a CSSA. In addition, FINRA, on behalf of the

required under applicable FINRA rules. Generally, such debt securities will have at issuance a maturity that exceeds one calendar year. For Fixed Income Securities that are not reported to TRACE, (i) intraday price quotations will generally be available from broker-dealers and trading platforms (as applicable) and (ii) price information will be available from feeds from market data vendors, published or other public sources, or online information services, as described above.

[42] *See* NYSE Arca Rule 7.12–E.

[43] 17 CFR 240.10A–3.

[44] FINRA conducts cross-market surveillances on behalf of the Exchange pursuant to a regulatory services agreement. The Exchange is responsible for FINRA's performance under this regulatory services agreement.

[45] For a list of the current members of ISG, *see www.isgportal.org.* The Exchange notes that not all components of the Disclosed Portfolio may trade on markets that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement (''CSSA'').

Exchange, is able to access, as needed, trade information for certain fixed income securities held by the Fund reported to FINRA's TRACE. FINRA also can access data obtained from the Municipal Securities Rulemaking Board relating to municipal bond trading activity for surveillance purposes in connection with trading in the Shares.

In addition, the Exchange also has a general policy prohibiting the distribution of material, non-public information by its employees.

All statements and representations made in this filing regarding (a) the description of the portfolio or reference asset, (b) limitations on portfolio holdings or reference assets, or (c) the applicability of Exchange listing rules specified in this rule filing shall constitute continued listing requirements for listing the Shares of the Fund on the Exchange.

The issuer must notify the Exchange of any failure by the Fund to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements. If the Fund is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under NYSE Arca Rule 5.5–E (m).

Information Bulletin

The Exchange will inform its Equity Trading Permit Holders in an Information Bulletin (''Bulletin'') of the special characteristics and risks associated with trading the Shares. Specifically, the Bulletin will discuss the following: (1) The procedures for purchases and redemptions of Shares in Creation Unit aggregations (and that Shares are not individually redeemable); (2) NYSE Arca Rule 9.2–E(a), which imposes a duty of due diligence on its Equity Trading Permit Holders to learn the essential facts relating to every customer prior to trading the Shares; (3) the risks involved in trading the Shares during the Early and Late Trading Sessions when an updated PIV will not be calculated or publicly disseminated; (4) how information regarding the PIV and the Disclosed Portfolio is disseminated; (5) the requirement that Equity Trading Permit Holders deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; and (6) trading information.

In addition, the Bulletin will reference that the Fund is subject to various fees and expenses described in the Registration Statement. The Bulletin will discuss any exemptive, no-action, and interpretive relief granted by the Commission from any rules under the Act. The Bulletin will also disclose that the NAV for the Shares will be calculated after 4:00 p.m., E.T. each trading day.

2. Statutory Basis

The basis under the Act for this proposed rule change is the requirement under Section 6(b)(5) [46] that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices in that the Shares are listed and traded on the Exchange pursuant to the initial and continued listing criteria in NYSE Arca Rule 8.600–E. The Exchange has in place surveillance procedures that are adequate to properly monitor trading in the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws. The Exchange or FINRA, on behalf of the Exchange, or both, will communicate as needed regarding trading in the Shares, certain exchange-traded options and certain exchange-traded futures, ETFs, ETNs, closed-end funds, certain common stocks, certain preferred stocks, certain REITs, certain equity securities issued upon conversion of fixed income convertible securities and certain Work-Out Securities with other markets and other entities that are members of the ISG, and the Exchange or FINRA, on behalf of the Exchange, or both, may obtain trading information regarding trading in such securities and financial instruments from such markets and other entities. The Exchange may obtain information regarding trading in such securities and financial instruments from markets and other entities that are members of ISG or with which the Exchange has in place a CSSA. In addition, FINRA, on behalf of the Exchange, is able to access, as needed, trade information for certain fixed income securities held by the Fund reported to TRACE. FINRA also can access data obtained from the Municipal Securities Rulemaking Board relating to municipal bond trading activity for surveillance purposes in connection with trading in the Shares. The Adviser and Sub-Adviser are not registered as broker-dealers. The Adviser is affiliated with First Trust Portfolios L.P., a broker-dealer, and has implemented and will maintain a fire wall with respect to its broker-dealer affiliate regarding access to information concerning the composition and/or changes to the portfolios. The Sub-Adviser is affiliated with multiple broker-dealers and has implemented and will maintain a fire wall with respect to its broker-dealer affiliates regarding access to information concerning the composition and/or changes to the portfolio.

The Exchange notes that, other than Commentary .01(a)(1), (a)(2), (b)(1), (b)(4), (b)(5), and (e) to Rule 8.600–E, as described above, the Fund's portfolio will meet all other requirements of Rule 8.600–E.

The proposed rule change is designed to promote just and equitable principles of trade and to protect investors and the public interest in that the Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time. In addition, a large amount of information will be publicly available regarding the Fund and the Shares, thereby promoting market transparency. Quotation and last sale information for the Shares, ETFs, ETNs, closed-end funds, certain REITs, certain common stocks, certain preferred stocks, certain equity securities issued upon conversion of fixed income convertible securities, and certain Work-Out Securities will be available via the CTA high-speed line. Exchange-traded options quotation and last sale information for options cleared via the OCC are available via OPRA. The Exchange will inform its Equity Trading Permit Holders in an Information Bulletin of the special characteristics and risks associated with trading the Shares. Trading in Shares of the Fund will be halted if the circuit breaker parameters in NYSE Arca Rule 7.12–E have been reached or because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. Trading in the Shares will be subject to NYSE Arca Rule 8.600–E(d)(2)(D), which sets forth circumstances under which Shares of the Fund may be halted. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, NAV, the PIV, the Disclosed Portfolio, and quotation and last sale information for the Shares.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest in that

[46] 15 U.S.C. 78f(b)(5).

it will facilitate the listing and trading of an additional type of actively-managed exchange-traded product that generally will principally hold fixed income securities and that will enhance competition among market participants, to the benefit of investors and the marketplace. As noted above, the Exchange has in place surveillance procedures relating to trading in the Shares and may obtain information via ISG from other exchanges that are members of ISG or with which the Exchange has entered into a CSSA. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, NAV, Disclosed Portfolio, and quotation and last sale information for the Shares.

Deviations from the generic requirements, as described above, are necessary for the Fund to achieve its investment objective in a manner that is cost-effective and that maximizes investors' returns. Further, the proposed alternative requirements are narrowly tailored to allow the Fund to achieve its investment objective in a manner that is consistent with the principles of Section 6(b)(5) of the Act. As a result, it is in the public interest to approve listing and trading of Shares of the Fund on the Exchange pursuant to the requirements set forth herein.

As noted above, the Fund will not comply with the requirements set forth in Commentary .01(a)(1) and (a)(2) to NYSE Arca Rule 8.600–E with respect to the Fund's investments in equity securities. Instead, the Exchange proposes that (i) the Fund's investments in equity securities will meet the requirements of Commentary .01(a) with the exception of Commentary .01(a)(1)(C) and .01(a)(1)(D) (with respect to U.S. Component Stocks) and Commentary .01(a)(2)(C) and .01(a)(2)(D) (with respect to Non-U.S. Component Stocks).[47] The Exchange believes it is appropriate and in the public interest to approve listing and trading of Shares of the Fund notwithstanding that the Fund's holdings in such equity securities do not comply with the requirements set forth in Commentary .01(a)(1) and (a)(2) to NYSE Arca Rule 8.600–E in that any Fund investment in exchange-traded common stocks, preferred stocks, REITS, ETFs, ETNs, U.S. exchange-traded closed-end funds, exchange-traded equity securities issued upon conversion of fixed income convertible securities, and exchange-traded Work Out Securities would provide for enhanced diversification of the Fund's portfolio. Such securities would be Non-Principal Investments, not exceeding 20% of the Fund's net assets in the aggregate.

The Fund will not comply with the requirement in Commentary .01(b)(1) to Rule 8.600–E that components that in the aggregate account for at least 75% of the fixed income weight of the portfolio each shall have a minimum original principal amount outstanding of $100 million or more. Instead, the Exchange proposes that components that in the aggregate account for at least 50% of the fixed income weight of the portfolio each shall have a minimum original principal amount outstanding of $50 million or more. As noted above, the Fund may not invest more than 2% of its total assets in any one Fixed Income Security (excluding U.S. government securities and TIPS) on a per CUSIP basis. In addition, at least 50% of the weight of the Fund's portfolio would continue to be subject to a substantial minimum (*i.e.,* $50 million) original principal amount outstanding. The Exchange believes this limitation would provide significant additional diversification to the Fund's investments in Fixed Income Securities, and reduce concerns that the Fund's investments in such securities would be readily susceptible to market manipulation.

The Exchange proposes that Private ABS/MBS will not be required to comply with the requirements of Commentary .01(b)(4) because certain Private ABS/MBS cannot satisfy the criteria in Commentary .01(b)(4). Instead, the Exchange proposes that the Fund's investments in Fixed Income Securities other than Private ABS/MBS will be required to comply with the requirements of Commentary .01(b)(4). The Exchange believes that this is appropriate because Commentary .01(b)(4) does not appear to be designed for structured finance vehicles such as Private ABS/MBS. As noted above, the Fund may not invest more than 2% of its total assets in any one Fixed Income Security (excluding U.S. government securities and TIPS) on a per CUSIP basis. The Exchange believes this limitation would provide additional diversification to the Fund's investments in Private ABS/MBS, and reduce concerns that the Fund's investment in such securities would be readily susceptible to market manipulation.

As noted above, the Fund will not comply with the requirement in Commentary .01(b)(5) to Rule 8.600–E that Private ABS/MBS in the Fund's portfolio account, in the aggregate, for no more than 20% of the weight of the Fund's portfolio. Instead, the Exchange proposes that, in order to enable the portfolio to be more diversified and provide the Fund with an opportunity to earn higher returns, the Fund may invest up to 50% of its total assets in the aggregate in Private ABS/MBS, provided that the Fund (1) may not invest more than 25% of its total assets in non-agency ABS; (2) may not invest more than 30% of its total assets in non-agency RMBS; and (3) may not invest more than 25% of its total assets in non-agency CMBS and CLOs. With respect to the Fund's investments in up to 30% of its total assets in Private ABS/MBS that exceed the 20% of the weight of the Fund's portfolio that may be invested in Private ABS/MBS under Commentary .01(b)(5) to NYSE Arca Rule 8.600–E, the Fund's holdings in Private ABS/MBS will be subject to minimum weighted average loan age restrictions described above.[48] In addition, as noted above, the Fund may not invest more than 2% of its total assets in any one Fixed Income Security (excluding U.S. government securities and TIPS) on a per CUSIP basis.[49] The Exchange believes these limitations would provide additional diversification to the Fund's Private ABS/MBS investments and reduce concerns that the Fund's investment in such securities would be readily susceptible to market manipulation.

The Exchange believes it is appropriate and in the public interest to approve listing and trading of Shares of the Fund notwithstanding that the Fund's holdings in such Private ABS/MBS do not comply with the requirements set forth in Commentary .01(b)(5) to NYSE Arca Rule 8.600–E in that the Fund's investment in Private ABS/MBS is expected to provide the Fund with benefits associated with increased diversification, as Private ABS/MBS investments tend to be less correlated to interest rates than many other fixed income securities. The Fund's investment in Private ABS/MBS will be subject to the Fund's liquidity procedures as adopted by the Board, and the Adviser and Sub-Adviser do not expect that investments in Private ABS/MBS of up to 50% of the total assets of the Fund will have any material impact on the liquidity of the Fund's investments.

The Adviser and Sub-Adviser represent that the RMBS sector can be an important component of the Fund's investment strategy because of the potential for attractive risk-adjusted returns relative to other fixed income sectors and the potential to add

[47] *See* notes 24 and 25, *supra.*

[48] *See* note 19 and accompanying text, *supra.*

[49] *See* note 31, *supra.*

significantly to the diversification in the Fund's portfolio. Similarly, the Private ABS/MBS sectors also have the potential for attractive risk-adjusted returns and added portfolio diversification.

The Exchange believes the loan age parameters described above are appropriate for the corresponding Private ABS/MBS; the 84, 60 and 12 month time frames take into account that the longer Private ABS/MBS continue to trade, the more price discovery has occurred in the market and the more opportunity there has been for market participants to perform due diligence in understanding and evaluating the underlying loans for such securities.

With respect to non-agency RMBS, a weighted average loan age of 84 months accommodates investment in well-seasoned securities that are continuing to trade with resilient pricing notwithstanding events during the market crisis of 2008–2010, during which loan defaults drastically impacted pricing in non-agency RMBS. Pricing in such securities is generally more reliable than RMBS with a lower loan age in that pricing is no longer reliant on market expectations but on actual post-crisis loan performance.

With respect to non-agency CMBS, a weighted average loan age of 60 months would include securities for which there is a known track record regarding cash flows and default rates for loans underlying real estate and other assets underlying CMBS. A five year loan age facilitates pricing based on actual loan performance rather than default projections. Similarly, for non-agency CLOs, a weighted average loan age of 60 months provides the opportunity for market participants to evaluate data regarding the bank loans underlying the CLOs and to assess how the loans are actually being used—for example, to implement corporate strategy or for capital usage—rather than relying on pro forma statements regarding the loans.

With respect to non-agency ABS, a weighted average loan age of 12 months provides an appropriately limited time frame for market participants to assess the likely trajectory of expected defaults (for example, for sub-prime auto loans). The loans underlying non-agency ABS are typically of much shorter duration than other Private ABS/MBS. Because such loans are more likely to default within a short time after issuance, a one-year minimum loan age can be expected to provide a sufficient time frame for market participants to assess the reliability of loan pricing for loans underlying non-agency ABS.

As noted above, the Fund's portfolio will not comply with the requirements set forth in Commentary .01(e) to NYSE Arca Rule 8.600–E. The Exchange proposes that up to 25% of the Fund's assets (calculated as the aggregate gross notional value) may be invested in OTC derivatives that are used to reduce currency, interest rate or credit risk arising from the Fund's investments (that is, ''hedge''), and that the Fund's investments in OTC derivatives other than OTC derivatives used to hedge the Fund's portfolio against currency, interest rate or credit risk will be limited to 20% of the assets in the Fund's portfolio, calculated as the aggregate gross notional value of such OTC derivatives. As noted above, the Fund will not use derivative instruments to gain exposure to Private ABS/MBS, and derivative instruments linked to such securities will be used for hedging purposes only.

The Exchange believes it is appropriate and in the public interest to approve listing and trading of Shares of the Fund notwithstanding that the Fund's holdings in OTC derivatives do not comply with the requirements set forth in Commentary .01(e) to NYSE Arca Rule 8.600–E in that, depending on market conditions, it may be critical that the Fund be able to utilize available OTC derivatives to attempt to reduce impact of currency, interest rate or credit fluctuations on Fund assets. Therefore, the Exchange believes it is appropriate to apply a limit of up to 25% of the Fund's assets to the Fund's investments in OTC derivatives (calculated as the aggregate gross notional value of such OTC derivatives), including forwards, options and swaps, that are used for hedging purposes, as described above.

The Adviser and Sub-Adviser represent that OTC derivatives can be tailored to hedge the specific risk arising from the Fund's investments and frequently may be a more efficient hedging vehicle than listed derivatives. For example, the Fund could obtain an OTC foreign currency derivative in a notional amount that exactly matches the notional amount of the Fund's investments. If the Fund were limited to investing up to 20% of assets in OTC derivatives, the Fund might have to ''over hedge'' or ''under hedge'' if round lot sizes in listed derivatives were not available. In addition, for example, an OTC CDX option can be structured to provide protection tailored to the Fund's credit exposure and can be a more efficient way to hedge credit risk with respect to specific exposures than listed derivatives. Similarly, OTC interest rate derivatives can be more effective hedges of interest rate exposure because they can be customized to match the basis risk arising from the term of the investments held by the Fund.

Because the Fund, in furtherance of its investment objective, may invest a substantial percentage of its investments in foreign currency denominated Fixed Income Securities, the 20% limit in Commentary .01(e) to Rule 8.600–E could result in the Fund being unable to fully pursue its investment objective while attempting to sufficiently mitigate investment risks. The inability of the Fund to adequately hedge its holdings would effectively limit the Fund's ability to invest in certain instruments, or could expose the Fund to additional investment risk. For example, if the Fund's assets (on a gross notional value basis) were $100 million and no listed derivative were suitable to hedge the Fund's risk, under the generic standards the Fund would be limited to holding up to $20 million gross notional value in OTC derivatives ($100 million * 20%). Accordingly, the maximum amount the Fund would be able to invest in foreign currency denominated Fixed Income Securities while remaining adequately hedged would be $20 million. The Fund then would hold $60 million in assets that could not be hedged, other than with listed derivatives, which, as noted above, might not be sufficiently tailored to the specific instruments to be hedged.

In addition, by applying the 20% limitation in Commentary .01(e) to Rule 8.600–E, the Fund would be less able to protect its holdings from more than one risk simultaneously. For example, if the Fund's assets (on a gross notional basis) were $100 million and the Fund held $20 million in foreign currency denominated Fixed Income Instruments with two types of risks (*e.g.,* currency and credit risk) which could not be hedged using listed derivatives, the Fund would be faced with the choice of either holding $20 million aggregate gross notional value in OTC derivatives to mitigate one of the risks while passing the other risk to its shareholders, or, for example, holding $10 million aggregate gross notional value in OTC derivatives on each of the risks while passing the remaining portion of each risk to the Fund's shareholders.

The Adviser and Sub-Adviser believe that it is in the best interests of the Fund's shareholders for the Fund to be allowed to reduce the currency, interest rate or credit risk arising from the Fund's investments using the most efficient financial instrument. While certain risks can be hedged via listed derivatives, OTC derivatives (such as forwards, options and swaps) can be customized to hedge against precise risks. Accordingly, the Adviser and Sub-Adviser believe that OTC derivatives may frequently be a more efficient hedging vehicle than listed derivatives. Therefore, the Exchange believes that increasing the percentage limit in Commentary .01(e), as described above, to the Fund's investments in OTC derivatives, including forwards, options and swaps, that are used specifically for hedging purposes would help protect investors and the public interest.

As noted above, the Fund's portfolio will not meet the requirements of Commentary .01(a)(1)(A) through (E) to Rule 8.600–E with respect to the Fund's investments in non-exchange-traded securities of open-end investment company securities, and, with respect to the Fund's holdings of OTC equity securities issued upon conversion of fixed income convertible securities and OTC Work Out Securities, would not meet the requirements of Commentary .01(a)(1)(A) through (E) and Commentary .01(a)(2)(A) through (E) to Rule 8.600–E. The Exchange believes that it is appropriate and in the public interest to approve listing and trading of Shares of the Fund on the Exchange notwithstanding that the Fund would not meet the requirements of Commentary .01(a)(1)(A) through (E) to Rule 8.600–E with respect to the Fund's investments in non-exchange-traded securities of open-end investment company securities,and notwithstanding that the Fund's holdings of OTC equity securities issued upon conversion of fixed income convertible securities and OTC Work Out Securities would not meet the requirements of Commentary .01(a)(1)(A) through (E) and Commentary .01(a)(2)(A) through (E) to Rule 8.600–E. Investments in non-exchange-traded securities of open-end investment company securities will not be principal investments of the Fund.[50] Such investments, which may include mutual funds that invest, for example, principally in fixed income securities, would be utilized to help the Fund meet its investment objective and to equitize cash in the short term.

With respect to any Fund holdings of exchange-traded or OTC equity securities issued upon conversion of fixed income convertible securities and Work Out Securities, such securities will not exceed 10% and 5%, respectively, of the Fund's total assets. The Adviser and Sub-Adviser represent that the Fund generally will not actively invest in equity securities issued upon conversion of fixed income convertible securities or Work Out Securities, but may, at times, receive a distribution of such securities in connection with the Fund's holdings in other securities. Therefore, the Fund's holdings in equity securities issued upon conversion of fixed income convertible securities and Work Out Securities generally would not be acquired as the result of the Fund's voluntary investment decisions.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest in that it will facilitate the listing and trading of shares of an additional type of actively-managed exchange-traded product that will enhance competition among market participants, to the benefit of investors and the marketplace.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act. The Exchange notes that the proposed rule change will facilitate the listing and trading of an additional type of actively-managed exchange-traded product that generally will principally hold fixed income securities and that will enhance competition among market participants, to the benefit of investors and the marketplace.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Discussion and Commission's Findings

After careful review, the Commission finds that the proposed rule change, as modified by Amendment No. 2, is consistent with the Act and the rules and regulations thereunder applicable to a national securities exchange.[51] In particular, the Commission finds that the proposed rule change, as modified by Amendment No. 2, is consistent with Section 6(b)(5) of the Act,[52] which requires, among other things, that the Exchange's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

Under the proposal, the Exchange represents that the Fund's investments in equity securities will not meet the requirements of Commentaries .01(a)(1)(C) and .01(a)(1)(D) (with respect to U.S. Component Stocks) and Commentaries .01(a)(2)(C) and .01(a)(2)(D) (with respect to Non-U.S. Component Stocks). The Exchange further represents that any Fund holdings of exchange-traded equity securities issued upon conversion of fixed income convertible securities and exchange-traded Work Out Securities will not exceed 10% and 5%, respectively, of the Fund's total assets. The Exchange also represents that the Fund generally will not actively invest in equity securities issued upon conversion of fixed income convertible securities or Work Out Securities or acquire such securities as a result of the Fund's voluntary investment decisions. The Commission believes that, because the Fund's investments in exchange-traded common stocks, preferred stocks, REITS, ETFs, ETNs, exchange-traded equity securities issued upon conversion of fixed income convertible securities, exchange-traded Work Out Securities, and U.S. exchange-traded closed-end fund securities would be Non-Principal Investments and therefore would not exceed 20% of the Fund's total assets, concerns related to these securities would be mitigated.

In addition, the Exchange represents that the Fund will not meet the requirements of Commentaries .01(a)(1)(A) through (E) to NYSE Arca Rule 8.600–E with respect to the Fund's investments in non-exchange-traded securities of open-end investment company securities. The Commission notes that such open-end investment company securities are required to be registered with the Commission and would be subject to all of the applicable requirements of the 1940 Act and the rules and regulations thereunder. The Commission further notes that it has approved the listing and trading of other series of Managed Fund Shares that may invest in non-exchange-traded open-end investment company securities notwithstanding that those series of Managed Fund Shares would not meet the requirements of Commentaries .01(a)(1)(A) through (E) to NYSE Arca

[50] *See* note 35, *supra.*

[51] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[52] 15 U.S.C. 78f(b)(5).

Rule 8.600–E with respect to investments in such securities.[53]

According to the Exchange, the Fund also will not comply with the requirement in Commentary .01(b)(1) to NYSE Arca Rule 8.600–E.[54] The Exchange proposes instead that components that in the aggregate account for at least 50% of the fixed income weight of the portfolio each shall have a minimum original principal amount outstanding of $50 million or more. In addition, the Fund may not invest more than 2% of its total assets in any one Fixed Income Security (excluding U.S. government securities and TIPS) on a per-CUSIP basis. In addition, the Exchange proposes that at least 50% of the weight of the Fund's portfolio would continue to be subject to a substantial minimum original principal amount outstanding (*i.e.,* $50 million). The Exchange believes this aspect of the proposal would provide additional diversification to the Fund's investments in Fixed Income Securities.

The Exchange further represents that the Fund will not comply with the requirements in Commentary .01(b)(4) to NYSE Arca Rule 8.600–E.[55] Instead, the Exchange proposes that the Fund's investments in Fixed Income Securities, except for Private ABS/MBS will comply with the requirements of Commentary .01(b)(4). As noted above, the Exchange proposes that the Fund may not invest more than 2% of its total assets in any one Fixed Income Security (excluding U.S. government securities and TIPS) on a per-CUSIP basis. The Commission notes that it has previously approved the listing of other series of Managed Fund Shares with similar investment objectives and strategies without imposing requirements that a certain percentage of such funds' securities meet one of the criteria set forth in Commentary .01(b)(4).[56]

Separately, the Exchange proposes to permit the Fund to invest up to 50% of its total assets in the aggregate in Private ABS/MBS, provided that the Fund would not be permitted to invest more than: (i) 30% of its total assets in non-agency RMBS, (ii) 25% of its total assets in non-agency CMBS and CLOs, and (iii) 25% of its total assets in non-agency ABS. Further, with respect to the Fund's investments in up to 30% of its total assets in Private ABS/MBS that exceed the 20% of the weight of the Fund's portfolio that may be invested in Private ABS/MBS, the Exchange represents that the Fund's holdings in Private ABS/MBS will be subject to certain weighted average loan age restrictions. The Exchange also represents that the Fund's investments in Private ABS/MBS will be subject to the Fund's liquidity procedures as adopted by the Board. The Commission also notes that it has previously approved proposals which permit other series of Managed Fund Shares to hold private asset-backed and mortgaged-backed securities in excess of the levels permitted under Commentary .01(b)(5).[57]

With respect to the Fund's proposed investments in OTC derivatives, the Fund's investments other than OTC derivatives used to hedge the Fund's portfolio against currency, interest rate or credit risk, will be limited to 20% of the Fund's portfolio. The Exchange proposes that up to 25% of the Fund's assets may be invested in OTC derivatives that are used to reduce currency, interest rate, or credit risk arising from the Fund's investments. The Commission notes that it has approved other proposals that permit a fund to invest in OTC derivatives in excess of the 20% limit in Commentary .01(e).[58]

The Exchange represents that information relating to the Fund's underlying assets, intra-day and closing price information regarding Fixed Income Securities will be available from major market data vendors, as well as through subscription services, such as Bloomberg, Markit, and Thomson Reuters, which can be accessed by Authorized Participants and other market participants.[59] Additionally, the Exchange represents that FINRA's TRACE will be a source of price information for corporate bonds and Private ABS/MBS, to the extent transactions in such securities are reported to TRACE.[60] According to the Exchange, information relating to weighted average loan age for Private ABS/MBS is widely available from major market data vendors such as Bloomberg. Trade price and other information relating to municipal bonds is available through the Municipal Securities Rulemaking Board's EMMA system. With respect to the Fund's holdings in derivatives, price information relating to OTC options, forwards, and swaps will be available from major market data vendors. Intra-day price information for exchange-traded derivative instruments, including exchange-traded options, will be available from the applicable exchange and from major market data vendors. Exchange-traded options quotation and last-sale information for options cleared via the OCC are available through OPRA. With respect to the Fund's holdings in equity securities, non-exchange-traded open-end investment company securities are typically priced once each business day and their prices are available through the applicable fund's website or from major market data vendors. Information regarding market price and trading volume of the underlying ETFs, ETNs, common stocks, preferred stocks, REITs, equity securities issued upon conversion of fixed income convertible securities, Work-Out Securities, and closed-end funds will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services. Quotation and last-sale information for the underlying ETFs, ETNs, closed-end funds, REITs, certain common stocks, certain preferred stocks, certain equity securities issued upon conversion of fixed income convertible securities, and certain Work-Out Securities will be available via the CTA high-speed line.

The Exchange further represents that, with respect to trading in the Shares, the Exchange or FINRA, on behalf of the Exchange, or both, will communicate with and may obtain information from, other markets and other entities that are members of the ISG, or with which the Exchange has in place a CSSA, and FINRA, on behalf of the Exchange, is able to access, trade information for certain fixed income securities held by the Fund reported to FINRA's TRACE. FINRA also can access data obtained from the Municipal Securities Rulemaking Board relating to municipal bond trading activity for surveillance

[53] *See supra* note 38.

[54] Commentary .01(b)(1) to NYSE Arca Rule 8.600–E states that components that in the aggregate account for at least 75% of the fixed income weight of the portfolio each shall have a minimum original principal amount outstanding of $100 million or more.

[55] *See supra* note 27.

[56] *See supra* note 28.

[57] *See, e.g.,* Securities Exchange Act Release Nos. 84047 (September 6, 2018), 83 FR 46200 (September 12, 2018) (SR–Nasdaq–2017–128) (approving the listing and trading of shares of the Western Asset Total Return ETF); and 84826 (December 14, 2018), 83 FR 65386 (December 20, 2018) (SR–NYSEArca–2018–25) (approving the continued listing and trading of shares of the Natixis Loomis Sayles Short Duration Income ETF).

[58] *See* Securities Exchange Act Release Nos. 86698 (August 16, 2019), 84 FR 43823 (August 22, 2019) (NYSEArca–2018–83) (order approving the listing and trading of shares of the iShares Bloomberg Roll Select Commodity Strategy ETF) and 86636 (August 12, 2019), 84 FR 42030 (August 16, 2019) (NYSEArca–2018–98) (order approving the listing and trading of the iShares Commodity Multi-Strategy ETF).

[59] The Exchange also states that price information regarding U.S. government securities, bank loans, Private ABS/MBS, cash equivalents, and short-term instruments with maturities of three months or more generally may be obtained from brokers and dealers who make markets in such securities or through nationally recognized pricing services through subscription agreements.

[60] *See supra* note 41.

purposes in connection with trading in the Shares. The Exchange also asserts that it has a general policy prohibiting the distribution of material, non-public information by its employees.

According to the Exchange, other than Commentaries .01(a)(1), (a)(2), (b)(1), (b)(4), (b)(5), and (e) to NYSE Arca Rule 8.600–E, as described above, the Fund's portfolio will meet all other requirements of NYSE Arca Rule 8.600–E. The Commission believes that, based on the representations of the Exchange with respect to the Fund's investment objective and proposed holdings and restrictions, the proposal is consistent with the requirements of Section 6(b)(5) of the Act. The Exchange represents that all statements and representations made in this filing regarding (a) the description of the portfolio or reference assets, (b) limitations on portfolio holdings or reference assets, and (c) the applicability of Exchange listing rules specified in this rule filing shall constitute continued listing requirements for listing the Shares. In addition, the Exchange represents that the issuer must notify the Exchange of any failure by the Fund to comply with the continued listing requirements and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor [61] for compliance with the continued listing requirements. If the Fund is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under NYSE Arca Rule 5.5–E(m).

For the foregoing reasons, the Commission finds that the proposed rule change, as modified by Amendment No. 2, is consistent with Section 6(b)(5) of the Act [62] and the rules and regulations thereunder applicable to a national securities exchange.

IV. Solicitation of Comments on Amendment No. 2 to the Proposed Rule Change

Interested persons are invited to submit written views, data, and arguments concerning whether Amendment No. 2 is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2019–33 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2019–33. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2019–33 and should be submitted on or before November 22, 2019.

V. Accelerated Approval of the Proposed Rule Change, as Modified by Amendment No. 2

The Commission finds good cause to approve the proposed rule change, as modified by Amendment No. 2, prior to the thirtieth day after the date of publication of notice of the filing of Amendment No. 2 in the **Federal Register**. The Commission notes that Amendment No. 2 clarified representations to reflect changes adopted in Commentary .01(b)(5) to NYSE Arca Rule 8.600–E; conformed a requirement relating to certain investment restrictions from ''average loan maturity'' to ''weighted average loan age''; and provided additional arguments in support of the Fund's proposed changes to its investments and investment restrictions. Amendment No. 2 also provided non-substantive clarifications and technical changes. The additional information in Amendment No. 2 assisted the Commission in evaluating the Exchange's proposal and in determining that the trading of the Shares under the proposal is consistent with the Act. Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Act,[63] to approve the proposed rule change, as modified by Amendment No. 2, on an accelerated basis.

VI. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[64] that the proposed rule change (SR–NYSEArca–2019–33), as modified by Amendment No. 2, be, and it hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[65]

Jill M. Peterson,

Assistant Secretary.

[FR Doc. 2019–23858 Filed 10–31–19; 8:45 am]

BILLING CODE 8011–01–P

[61] The Commission notes that certain proposals for the listing and trading of exchange-traded products include a representation that the exchange will ''surveil'' for compliance with the continued listing requirements. *See, e.g.,* Securities Exchange Act Release No. 77499 (April 1, 2016), 81 FR 20428, 20432 (April 7, 2016) (SR–BATS–2016–04). In the context of this representation, it is the Commission's view that ''monitor'' and ''surveil'' both mean ongoing oversight of compliance with the continued listing requirements. Therefore, the Commission does not view ''monitor'' as a more or less stringent obligation than ''surveil'' with respect to the continued listing requirements.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87409; File No. SR–NYSEArca–2019–73]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Permitting the Continued Listing and Trading of the WisdomTree Emerging Markets Multifactor Fund and the WisdomTree International Multifactor Fund

October 28, 2019.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 15, 2019, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

(''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to permit the continued listing and trading of the WisdomTree Emerging Markets Multifactor Fund and the WisdomTree International Multifactor Fund, under NYSE Arca Rule 8.600–E (''Managed Fund Shares''). The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

Pursuant to NYSE Arca Rule 8.600–E, the Exchange proposes to permit the continued listing and trading of the WisdomTree Emerging Markets Multifactor Fund (''Emerging Markets Fund'') and the WisdomTree International Multifactor Fund (''International Fund'') (each a Fund, and collectively, the ''Funds''), that do not otherwise meet the standards set forth in Rule 8.600–E, Commentary .01(e), as described below. The shares (''Shares'') of the Funds commenced trading on the Exchange on August 10, 2018 pursuant to the generic listing criteria in Commentary .01 to NYSE Arca Rule 8.600–E (''Managed Fund Shares'').[4]

The Shares are offered by the WisdomTree Trust (the ''Trust''). WisdomTree Asset Management, Inc. (the ''Adviser'') acts as adviser to the Funds. Mellon Investments Corporation acts as sub-adviser (the ''Sub-Adviser'') to the Funds. The Trust is registered with the Commission as an investment company and has most recently updated its registration statement on Form N–1A (''Registration Statement'') with the Commission on behalf of the Funds that includes disclosure described herein.[5]

Commentary .06 to Rule 8.600–E provides that, if the investment adviser to the investment company issuing Managed Fund Shares is affiliated with a broker-dealer, such investment adviser shall erect and maintain a ''fire wall'' between the investment adviser and the broker-dealer with respect to access to information concerning the composition and/or changes to such investment company portfolio.[6] In addition, Commentary .06 further requires that personnel who make decisions on the investment company's portfolio composition must be subject to procedures designed to prevent the use and dissemination of material nonpublic information regarding the applicable investment company portfolio. The Adviser is not registered as a broker-dealer and is not affiliated with a broker-dealer. The Sub-Adviser is affiliated with multiple broker-dealers and has implemented and will maintain a ''fire wall'' with respect to such broker-dealers and their personnel regarding access to information concerning the composition and/or changes to a Fund's portfolio. In addition, Sub-Adviser personnel who make decisions regarding a Fund's portfolio are subject to procedures designed to prevent the use and dissemination of material nonpublic information regarding such Fund's portfolio. In the event (a) the Adviser or Sub-Adviser becomes registered as a broker-dealer or newly affiliated with a broker-dealer, or (b) any new adviser or sub-adviser is a registered broker-dealer or becomes affiliated with a broker-dealer, it will implement and maintain a fire wall with respect to its relevant personnel or its broker-dealer affiliate regarding access to information concerning the composition and/or changes to the portfolio, and will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding such portfolio.

The Exchange submits this proposal in order to allow the Funds to hold OTC currency swaps and OTC currency forwards in a manner that may not comply with Commentary .01(e) to Rule 8.600–E.[7] Specifically, the aggregate gross notional value of each Fund's investments in OTC derivatives may exceed 20% of Fund assets, calculated as the aggregate gross notional value of such OTC derivatives.[8] The Exchange proposes that up to 50% of each Fund's assets (calculated as the aggregate gross notional value of the OTC derivatives) may be invested in OTC derivatives, that is, currency swaps and currency forwards, that are used to reduce (that is, ''hedge'') currency risk arising from each Fund's investments. Each Fund's investments in OTC derivatives, other

[4] A Managed Fund Share is a security that represents an interest in an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1) organized as an open-end investment company or similar entity that invests in a portfolio of securities selected by its investment adviser consistent with its investment objectives and policies. In contrast, an open-end investment company that issues Investment Company Units, listed and traded on the Exchange under NYSE Arca Rule 5.2–E(j)(3), seeks to provide investment results that correspond generally to the price and yield performance of a specific foreign or domestic stock index, fixed income securities index or combination thereof.

[5] *See* Registration Statement (File Nos. 333–132380 and 811–21864) and filings dated August 1, 2019. The description of the operation of the Trust and the Funds herein is based, in part, on the information in the Registration Statement.

[6] An investment adviser to an open-end fund is required to be registered under the Investment Advisers Act of 1940 (the ''Advisers Act''). As a result, the Adviser, Sub-Adviser and their related personnel are subject to the provisions of Rule 204A–1 under the Advisers Act relating to codes of ethics. This Rule requires investment advisers to adopt a code of ethics that reflects the fiduciary nature of the relationship to clients as well as compliance with other applicable securities laws. Accordingly, procedures designed to prevent the communication and misuse of non-public information by an investment adviser must be consistent with Rule 204A–1 under the Advisers Act. In addition, Rule 206(4)–7 under the Advisers Act makes it unlawful for an investment adviser to provide investment advice to clients unless such investment adviser has (i) adopted and implemented written policies and procedures reasonably designed to prevent violation, by the investment adviser and its supervised persons, of the Advisers Act and the Commission rules adopted thereunder; (ii) implemented, at a minimum, an annual review regarding the adequacy of the policies and procedures established pursuant to subparagraph (i) above and the effectiveness of their implementation; and (iii) designated an individual (who is a supervised person) responsible for administering the policies and procedures adopted under subparagraph (i) above.

[7] In particular, the Funds may not meet the requirement under Commentary .01(e) to Rule 8.600–E, which provides that a portfolio may hold OTC derivatives, including forwards, options and swaps on commodities, currencies and financial instruments (*e.g.,* stocks, fixed income, interest rates, and volatility) or a basket or index of any of the foregoing; however, on both an initial and continuing basis, no more than 20% of the assets in the portfolio may be invested in OTC derivatives. For purposes of calculating this limitation, a portfolio's investment in OTC derivatives will be calculated as the aggregate gross notional value of the OTC derivatives.

[8] The Adviser and Sub-Adviser monitor counterparty credit risk exposure (including for OTC derivatives) and evaluate counterparty credit quality on a continuous basis.

than OTC derivatives used to hedge each Fund's portfolio against currency risk, will be limited to 20% of the assets in each Fund's portfolio, calculated as the aggregate gross notional value of such OTC derivatives. The only OTC derivatives that each Fund may invest in are currency swaps and currency forwards.

Otherwise, the Funds comply with, and will continue to comply with, all other listing requirements on an initial and continued listing basis under Commentary .01(e) to Rule 8.600–E for Managed Fund Shares (''Generic Listing Standards'').

WisdomTree Emerging Markets Multifactor Fund

According to the Registration Statement, the Emerging Markets Fund seeks capital appreciation. The Emerging Markets Fund is actively managed using a model-based approach and seeks to achieve its investment objective by investing primarily in equity securities of emerging markets that exhibit certain characteristics that the Adviser believes to be indicative of positive future returns based on a model developed by the Adviser. The Adviser seeks to identify equity securities of emerging markets countries that have the highest potential for returns based on proprietary measures of fundamental factors, such as value and quality, and technical factors, such as momentum and correlation. The Adviser employs a quantitative model to identify which securities the Emerging Markets Fund might purchase and sell and opportune times for purchases and sales. At a minimum, the Emerging Markets Fund's portfolio will be rebalanced quarterly according to the Adviser's quantitative model, although a more active approach may be taken depending on such factors as market conditions and investment opportunities, and the number of holdings in the Emerging Markets Fund may vary. The Sub-Adviser, with oversight by the Adviser, is responsible for the day-to-day management of the Emerging Markets Fund's portfolio in implementing the foregoing models-based approach.

The Adviser's strategy, as implemented by the Sub-Adviser, seeks to manage the Emerging Markets Fund's currency risk by dynamically hedging currency fluctuations in the relative value of the applicable foreign currencies against the U.S. dollar (the ''Emerging Markets Currency Hedge''), ranging from a 0% to 100% hedge. The hedge ratios are adjusted as frequently as weekly utilizing signals such as interest rate differentials, momentum, and value.

Under normal market conditions,[9] the Emerging Markets Fund will hold only the following instruments: Non-U.S. Component Stocks,[10] U.S. Component Stocks [11] (in addition to U.S. exchange-listed exchange-traded funds (''ETFs'')),[12] American Depository Receipts (''ADRs''), cash and cash equivalents,[13] OTC currency forwards and OTC currency swaps. As noted above, all of the Emerging Markets Fund's holdings meet, and will continue to meet, the Generic Listing Standards with the exception of its holdings in OTC currency forwards and OTC currency swaps, which, following the effectiveness of this proposal, may exceed the requirement under Rule 8.600–E, Commentary .01(e), that prohibits the aggregate gross notional value of OTC derivatives from exceeding 20% of the weight of the portfolio (including gross notional exposures).

WisdomTree International Multifactor Fund

According to the Registration Statement, the International Fund seeks capital appreciation. The International Fund is actively managed using a model-based approach and seeks to achieve its investment objective by investing primarily in equity securities of developed markets, excluding the United States and Canada, that exhibit certain characteristics that the Adviser believes to be indicative of positive future returns based on a model developed by the Adviser. The Adviser seeks to identify equity securities of developed countries, excluding the United States and Canada, that have the highest potential for returns based on proprietary measures of fundamental factors, such as value and quality, and technical factors, such as momentum and correlation. The Adviser employs a quantitative model to identify which securities the International Fund might purchase and sell and opportune times for purchases and sales. At a minimum, the International Fund's portfolio will be rebalanced quarterly according to the Adviser's quantitative model, although a more active approach may be taken depending on such factors as market conditions and investment opportunities, and the number of holdings in the International Fund may vary. The Sub-Adviser, with oversight by the Adviser, is responsible for the day-to-day management of the International Fund's portfolio in implementing the foregoing models-based approach.

The Adviser's strategy, as implemented by the Sub-Adviser, seeks to manage the International Fund's currency risk by dynamically hedging currency fluctuations in the relative value of the applicable foreign currencies against the U.S. dollar (the ''International Multifactor Currency Hedge'' and collectively, with the Emerging Markets Currency Hedge, the ''Currency Hedge''), ranging from a 0% to 100% hedge. The hedge ratios are adjusted as frequently as weekly utilizing signals such as interest rate differentials, momentum, and value.

Under normal market conditions, the International Fund will hold only the following instruments: Non-U.S. Component Stocks, U.S. Component Stocks (in addition to U.S. exchange-listed ETFs), ADRs, cash and cash equivalents, and OTC currency forwards and OTC currency swaps. As noted above, the International Fund's holdings meet the Generic Listing Standards with the exception of its holdings in OTC currency forwards and OTC currency swaps, which may not meet the requirement under Rule 8.600–E, Commentary .01(e) that prevents the aggregate gross notional value of OTC derivatives from exceeding 20% of the weight of the portfolio (including gross notional exposures).[14]

The Trust is required to comply with Rule 10A–3 under the Act [15] for the initial and continued listing of the Shares of each Fund. In addition, the Exchange represents that the Shares of each Fund will meet and be subject to all other requirements of the Generic Listing Standards and continued listing requirements for Managed Fund Shares under Exchange Rule 8.600–E. All statements and representations made in this filing regarding the description of the portfolio or reference assets, limitations on portfolio holdings or reference assets, dissemination and availability of reference assets and portfolio indicative values, and the

[9] The term ''normal market conditions'' is defined in NYSE Arca Rule 8.600–E(c)(5).

[10] *See* Commentary .01(a)(2) to Rule 8.600–E.

[11] *See* Commentary .01(a)(1) to Rule 8.600–E.

[12] For purposes of this filing, the term ''ETFs'' includes Investment Company Units (as described in NYSE Arca Rule 5.2–E(j)(3)); Portfolio Depositary Receipts (as described in NYSE Arca Rule 8.100–E); and Managed Fund Shares (as described in NYSE Arca Rule 8.600–E). All ETFs will be listed and traded in the U.S. on a national securities exchange. The Fund will not invest in inverse or leveraged (*e.g.,* 2X, –2X, 3X or –3X) ETFs.

[13] For purposes of this filing, cash equivalents are the short-term instruments enumerated in Commentary .01(c) to Rule 8.600–E.

[14] Because the Fund is not in compliance with Rule 8.600–E, Commentary .01(e), the Exchange has commenced delisting proceedings pursuant to Rule 5.5–E(m), including issuing a deficiency notification.

[15] 17 CFR 240.10A–3.

applicability of Exchange listing rules specified in this filing shall constitute continued listing requirements for the Funds. The Trust, on behalf of the Funds, has represented to the Exchange that it will advise the Exchange of any failure by a Fund or the Shares to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will surveil for compliance with the continued listing requirements. If a Fund is not or the Shares are not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under Exchange Rule 5.5–E(m).

Application of Generic Listing Requirements

The Exchange is submitting this proposed rule change because the portfolios for the Funds will not meet all of the Generic Listing Standards of Commentary .01 to NYSE Arca Rule 8.600–E applicable to the listing of Managed Fund Shares. Each Fund's portfolio will meet all such requirements except for those set forth in Commentary .01(e) (with respect to OTC Derivatives), as described below.[16]

As described above, the Funds meet all of the Generic Listing Standards except with respect to their holdings in OTC currency forwards and OTC currency swaps, which would be used to achieve their respective Currency Hedge. The Exchange believes that this proposal does not raise any novel or substantive issues for the Commission to review because there are numerous filings that were either effective upon filing or that the Commission has approved for the listing and trading of series of Managed Fund Shares that employ similar hedging strategies.[17]

Further, the Exchange believes that, while the portfolios of the Funds may not meet Commentary .01(e) to Rule 8–600–E, the policy issues that the rule is intended to address are otherwise mitigated by the structure and purpose of the Currency Hedge within the Funds.[18] Specifically, the Exchange believes that the policy issues that Commentary .01(e) to Rule 8–600–E is intended to address are mitigated by the way that the Funds would use OTC currency forwards and OTC currency swaps. The rule is intended to mitigate concerns around the manipulability of a particular underlying reference asset or derivatives contract and to minimize counterparty risk. While the Currency Hedge positions taken by the Funds may not meet the Generic Listing Standards related to OTC derivatives holdings, the policy concerns about limiting exposure to potentially manipulable underlying reference assets that the Generic Listing Standards are intended to address are otherwise mitigated by the liquidity in the underlying spot currency market that prevents manipulation of the reference prices used by the Currency Hedge. The Funds will attempt to limit counterparty risk in OTC currency forwards and OTC currency swaps by: (i) Entering into such contracts only with counterparties that Adviser and/or Sub-Adviser believes are creditworthy; (ii) limiting a Fund's exposure to each counterparty; and (iii) monitoring the creditworthiness of each counterparty and the Fund's exposure to each counterparty on an ongoing basis.

Availability of Information

As noted above, the Funds will each comply with the requirements for Managed Fund Shares related to Disclosed Portfolio, Net Asset Value (''NAV''), and the Portfolio Indicative Value. Additionally, the intra-day, closing and settlement prices of Non-U.S. Component Stocks, U.S. Component Stocks, ADRs, and ETFs will be readily available from the securities exchanges on which such securities are traded, as well as published or other public sources, or online information services such as Bloomberg or Reuters. Intraday price quotations on OTC currency forwards and OTC currency swaps are available from major broker-dealer firms and from third-parties, which may provide prices free with a time delay or in real-time for a paid fee. Price information for cash equivalents will be available from major market data vendors. Each Fund's Disclosed Portfolio will be available on the issuer's website (*www.WisdomTree.com*) free of charge. Each Fund's website will include the prospectus for the applicable Fund and additional information related to NAV and other applicable quantitative information. Information regarding market price and trading volume of the Shares will be continuously available throughout the day on brokers' computer screens and other electronic services. Information regarding the previous day's closing price and trading volume for the Shares will be published daily in the financial section of newspapers. Trading in the Shares may be halted for market conditions or for reasons that, in the view of the Exchange, make trading inadvisable. The Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange's existing rules governing the trading of equity securities. The Exchange has appropriate rules to facilitate trading in the shares during all trading sessions.

Surveillance

The Exchange represents that trading in the Shares are subject to the existing trading surveillances, administered by FINRA on behalf of the Exchange, or by regulatory staff of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws. The Exchange represents that these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect

[18] Each Fund expects to invest in excess of 80% of its net assets in Non-U.S. Component Stocks in a manner that will comply with the Generic Listing Standards.

violations of Exchange rules and federal securities laws applicable to trading on the Exchange.[19]

The surveillances referred to above generally focus on detecting securities trading outside their normal patterns, which could be indicative of manipulative or other violative activity. When such situations are detected, surveillance analysis follows and investigations are opened, where appropriate, to review the behavior of all relevant parties for all relevant trading violations.

The Exchange or FINRA, on behalf of the Exchange, or both, will communicate as needed regarding trading in the Shares, U.S. Component Stocks, ETFs, ADRs and certain of the Non-U.S. Component Stocks that are held by each Fund with other markets and other entities that are members of the ISG, and the Exchange or FINRA, on behalf of the Exchange, or both, may obtain trading information regarding trading in such securities and financial instruments from such markets and other entities.[20] In addition, the Exchange may obtain information regarding trading in such securities and financial instruments from markets and other entities that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement. In addition, FINRA, on behalf of the Exchange, is able to access, as needed, trade information for certain fixed income securities held by the Fund reported to FINRA's TRACE.

In addition, the Exchange also has a general policy prohibiting the distribution of material, non-public information by its employees.

All statements and representations made in this filing regarding the description of the portfolio or reference assets, limitations on portfolio holdings or reference assets, dissemination and availability of reference assets and portfolio indicative values, and the applicability of Exchange listing rules specified in this filing shall constitute continued listing requirements for the Funds.

The issuer must notify the Exchange of any failure by a Fund to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements. If a Fund is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under NYSE Arca Rule 5.5–E(m).

2. Statutory Basis

The Exchange believes that the proposal is consistent with Section 6(b) of the Act[21] in general and Section 6(b)(5) of the Act[22] in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

Specifically, the Exchange believes that the proposal is consistent with Rule 6(b)(5) of the Act in that is designed to prevent fraudulent and manipulative acts and practices because the policy concerns about limiting exposure to potentially manipulable underlying reference assets that the Generic Listing Standards are intended to address, specifically Commentary .01(e) to Rule 8.600–E, related to OTC derivatives holdings, are otherwise mitigated by the liquidity in the underlying spot currency market that prevents manipulation of the reference prices used by the Currency Hedge. Specifically, the Exchange believes that the policy issues that Commentary .01(e) to Rule 8.600–E is intended to address are mitigated by the way that the Funds would use OTC currency forwards and OTC currency swaps. The rule is intended to mitigate concerns around the manipulability of a particular underlying reference asset or derivatives contract and to minimize counterparty risk. As noted above, while the Currency Hedge positions that might be taken by the Funds may not meet the Generic Listing Standards related to OTC derivatives holdings, the policy concerns about limiting exposure to potentially manipulable underlying reference assets that the Generic Listing Standards are intended to address are otherwise mitigated by the liquidity in the underlying spot currency market that prevents manipulation of the reference prices used by the Currency Hedge. The Funds will attempt to limit counterparty risk in OTC currency forwards and OTC currency swaps by: (i) Entering into such contracts only with counterparties the Adviser and/or Sub-Adviser believes are creditworthy; (ii) limiting a Fund's exposure to each counterparty; and (iii) monitoring the creditworthiness of each counterparty and the Fund's exposure to each counterparty on an ongoing basis.

The Exchange also notes that there are numerous filings that were either effective upon filing or that the Commission has approved for the listing and trading of series of Managed Fund Shares that employ similar hedging strategies.[23]

The Exchange believes that it is appropriate and in the public interest to allow the Funds, for hedging purposes only, to exceed the 20% limit in Commentary .01(e) to Rule 8.600–E of portfolio assets that may be invested in OTC derivatives to a maximum of 50% of Fund assets (calculated as the aggregate gross notional value of the OTC derivatives). Under Commentary .01(e), a series of Managed Fund Shares listed under the Generic Listing Standards may invest up to 20% of its assets (calculated as the aggregate gross notional value) in OTC derivatives. Because the Funds, in furtherance of their investment objective, may invest a substantial percentage of their investments in OTC currency forwards and OTC currency swaps, the 20% limit in Commentary .01(e) to Rule 8.600 could result in the Funds being unable to fully pursue their investment objective while attempting to sufficiently mitigate investment risks. The inability of the Funds to adequately hedge their holdings would effectively limit the Funds' ability to invest in certain instruments, or could expose the Funds to additional investment risk.

The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of the Funds on the Exchange during all trading sessions and to deter and detect violations of Exchange rules and the applicable federal securities laws.

Trading of the Funds through the Exchange will be subject to the Exchange's surveillance procedures for derivative products, including Managed Fund Shares. All statements and representations made in this filing regarding the description of the portfolio or reference assets, limitations on portfolio holdings or reference assets, dissemination and availability of reference assets and portfolio indicative values, and the applicability of Exchange listing rules specified in this filing shall constitute continued listing requirements for the Funds. The Trust,

[19] FINRA conducts cross-market surveillances on behalf of the Exchange pursuant to a regulatory services agreement. The Exchange is responsible for FINRA's performance under this regulatory services agreement.

[20] For a list of the current members of ISG, *see www.isgportal.org.* The Exchange notes that not all components of the Disclosed Portfolio may trade on markets that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement.

[21] 15 U.S.C. 78f.

[22] 15 U.S.C. 78f(b)(5).

[23] *See* note 17, *supra.*

on behalf of the Funds, has represented to the Exchange that it will advise the Exchange of any failure by a Fund or the Shares to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will surveil for compliance with the continued listing requirements. If a Fund or the Shares are not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under Exchange Rule 5.5–E(m).

As described above, all ADRs and ETFs will be listed on a U.S. national securities exchange, all of which are members of ISG or are exchanges with which the Exchange has in place a comprehensive surveillance sharing agreement. The Exchange may obtain information regarding trading in the Funds, U.S. Component Stocks, ETFs, ADRs, and certain Non-U.S. Component Stocks held by each Fund via the ISG, from other exchanges that are members or affiliates of the ISG, or with which the Exchange has entered into a comprehensive surveillance sharing agreement. Additionally, the Exchange or FINRA, on behalf of the Exchange, are able to access, as needed, trade information for certain fixed income instruments reported to TRACE.

For the above reasons, the Exchange believes that the proposed rule change is consistent with the requirements of Section 6(b)(5) of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act. The Exchange notes that the proposed rule change will facilitate the continued listing and trading of Managed Fund Shares that will enhance competition among market participants, to the benefit of investors and the marketplace.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [24] and Rule 19b–4(f)(6) thereunder.[25] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [26] and Rule 19b–4(f)(6)(iii) thereunder.[27]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [28] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii) [29] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposed rule change may become operative upon filing. The Commission notes that there are numerous filings that were either effective upon filing or that the Commission approved for the listing and trading of series of Managed Fund Shares that employ similar hedging strategies [30] and does not believe this proposal raises new or novel issues. The Commission also notes that, except for the changes in this proposed rule change, the Funds comply with, and will continue to comply with, all other listing requirements on an initial and continued listing basis under Commentary .01(e) to Rule 8.600–E. The Commission therefore believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest and hereby waives the operative delay and designates the proposed rule change operative upon filing.[31]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2019–73 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2019–73. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2019–73 and should be submitted on or before November 22, 2019.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 33678; 812–15060]

OSI ETF Trust and O'Shares Investment Advisers, LLC; Notice of Application

October 29, 2019.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from section 15(a) of the Act, as well as from certain disclosure requirements in rule 20a–1 under the Act, Item 19(a)(3) of Form N–1A, Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A under the Securities Exchange Act of 1934 (''1934 Act''), and sections 6–07(2)(a), (b), and (c) of Regulation S–X (''Disclosure Requirements'').

APPLICANTS: OSI ETF Trust (''Trust''), a Delaware statutory trust registered under the Act as an open-end management investment company with multiple series (each a ''Fund'') and O'Shares Investment Advisers, LLC (''Initial Adviser''), a Delaware limited liability company registered as an investment adviser under the Investment Advisers Act of 1940 (''Advisers Act'') that serves an investment adviser to the Funds (collectively with the Trust, the ''Applicants'').

SUMMARY OF APPLICATION: The requested exemption would permit Applicants to enter into and materially amend subadvisory agreements with subadvisers without shareholder approval and would grant relief from the Disclosure Requirements as they relate to fees paid to the subadvisers.

FILING DATES: The application was filed on August 20, 2019, and amended on October 4, 2019.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on November 25, 2019, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. Applicants: Louise Anne Poirier, O'Shares Investment Advisers, LLC, 1010 Sherbrooke Street W, Suite 2105, Montreal, QC H3A 2R7 Canada and Michael W. Mundt, Stradley Ronon Stevens & Young, LLP, 1250 Connecticut Avenue NW, Ste. 500, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Laura L. Solomon, Senior Counsel, at (202) 551–6915, or Kaitlin C. Bottock, Branch Chief, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's website by searching for the file number or an Applicant using the ''Company'' name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

I. Requested Exemptive Relief

1. Applicants request an order to permit the Adviser,[1] subject to the approval of the board of trustees of each Trust (collectively, the ''Board''),[2] including a majority of the trustees who are not ''interested persons'' of the Trust or the Adviser, as defined in section 2(a)(19) of the Act (the ''Independent Trustees''), without obtaining shareholder approval, to: (i) Select investment subadvisers (''Subadvisers'') for all or a portion of the assets of one or more of the Funds pursuant to an investment subadvisory agreement with each Subadviser (each a ''Subadvisory Agreement''); and (ii) materially amend Subadvisory Agreements with the Subadvisers.

2. Applicants also request an order exempting the Subadvised Funds (as defined below) from the Disclosure Requirements, which require each Fund to disclose fees paid to a Subadviser. Applicants seek relief to permit each Subadvised Fund to disclose (as a dollar amount and a percentage of the Fund's net assets): (i) The aggregate fees paid to the Adviser and any Wholly-Owned Subadvisers; and (ii) the aggregate fees paid to Affiliated and Non-Affiliated Subadvisers (''Aggregate Fee Disclosure'').[3] Applicants seek an exemption to permit a Subadvised Fund to include only the Aggregate Fee Disclosure.[4]

3. Applicants request that the relief apply to Applicants, as well as to any future Fund and any other existing or future registered open-end management investment company or series thereof that intends to rely on the requested order in the future and that: (i) Is advised by the Adviser; (ii) uses the multi-manager structure described in the application; and (iii) complies with the terms and conditions of the application (each, a ''Subadvised Fund'').[5]

II. Management of the Subadvised Funds

4. The Adviser serves or will serve as the investment adviser to each

[1] The term ''Adviser'' means (i) the Initial Adviser, (ii) its successors, and (iii) any entity controlling, controlled by or under common control with, the Initial Adviser or its successors that serves as the primary adviser to a Subadvised Fund. For the purposes of the requested order, ''successor'' is limited to an entity or entities that result from a reorganization into another jurisdiction or a change in the type of business organization. Any other Adviser also will be registered with the Commission as an investment adviser under the Advisers Act.

[2] The term ''Board'' also includes the board of trustees or directors of a future Subadvised Fund (as defined below), if different from the board of trustees (''Trustees'') of the Trust.

[3] A ''Wholly-Owned Subadviser'' is any investment adviser that is (1) an indirect or direct ''wholly-owned subsidiary'' (as such term is defined in the Act) of the Adviser, (2) a ''sister company'' of the Adviser that is an indirect or direct ''wholly-owned subsidiary'' of the same company that indirectly or directly wholly owns the Adviser (the Adviser's ''parent company''), or (3) a parent company of the Adviser. An ''Affiliated Subadviser'' is any investment subadviser that is not a Wholly-Owned Subadviser, but is an ''affiliated person'' (as defined in section 2(a)(3) of the Act) of a Subadvised Fund or the Adviser for reasons other than serving as investment subadviser to one or more Funds. A ''Non-Affiliated Subadviser'' is any investment adviser that is not an ''affiliated person'' (as defined in the Act) of a Fund or the Adviser, except to the extent that an affiliation arises solely because the Subadviser serves as a subadviser to one or more Funds.

[4] Applicants note that all other items required by sections 6–07(2)(a), (b) and (c) of Regulation S–X will be disclosed.

[5] All registered open-end investment companies that currently intend to rely on the requested order are named as Applicants. Any entity that relies on the requested order will do so only in accordance with the terms and conditions contained in the application.

Subadvised Fund pursuant to an investment advisory agreement with the Fund (each an ''Investment Advisory Agreement''). Each Investment Advisory Agreement has been or will be approved by the Board, including a majority of the Independent Trustees, and by the shareholders of the relevant Subadvised Fund in the manner required by sections 15(a) and 15(c) of the Act. The terms of these Investment Advisory Agreements comply or will comply with section 15(a) of the Act. Applicants are not seeking an exemption from the Act with respect to the Investment Advisory Agreements. Pursuant to the terms of each Investment Advisory Agreement, the Adviser, subject to the oversight of the Board, will provide continuous investment management for each Subadvised Fund. For its services to each Subadvised Fund, the Adviser receives or will receive an investment advisory fee from that Fund as specified in the applicable Investment Advisory Agreement.

5. Consistent with the terms of each Investment Advisory Agreement, the Adviser may, subject to the approval of the Board, including a majority of the Independent Trustees, and the shareholders of the applicable Subadvised Fund (if required by applicable law), delegate portfolio management responsibilities of all or a portion of the assets of a Subadvised Fund to a Subadviser. The Adviser will retain overall responsibility for the management and investment of the assets of each Subadvised Fund. This responsibility includes recommending the removal or replacement of Subadvisers, allocating the portion of that Subadvised Fund's assets to any given Subadviser and reallocating those assets as necessary from time to time.[6] The Subadvisers will be ''investment advisers'' to the Subadvised Funds within the meaning of Section 2(a)(20) of the Act and will provide investment management services to the Funds subject to, without limitation, the requirements of Sections 15(c) and 36(b) of the Act.[7] The Subadvisers, subject to the oversight of the Adviser and the Board, will determine the securities and other investments to be purchased, sold or entered into by a Subadvised Fund's portfolio or a portion thereof, and will place orders with brokers or dealers that they select.[8]

6. The Subadvisory Agreements will be approved by the Board, including a majority of the Independent Trustees, in accordance with sections 15(a) and 15(c) of the Act. In addition, the terms of each Subadvisory Agreement will comply fully with the requirements of section 15(a) of the Act. The Adviser may compensate the Subadvisers or the Subadvised Funds may compensate the Subadvisers directly.

7. Subadvised Funds will inform shareholders of the hiring of a new Subadviser pursuant to the following procedures (''Modified Notice and Access Procedures''): (a) Within 90 days after a new Subadviser is hired for any Subadvised Fund, that Fund will send its shareholders either a Multi-manager Notice or a Multi-manager Notice and Multi-manager Information Statement;[9] and (b) the Subadvised Fund will make the Multi-manager Information Statement available on the website identified in the Multi-manager Notice no later than when the Multi-manager Notice (or Multi-manager Notice and Multi-manager Information Statement) is first sent to shareholders, and will maintain it on that website for at least 90 days.[10]

III. Applicable Law

8. Section 15(a) of the Act states, in part, that it is unlawful for any person to act as an investment adviser to a registered investment company ''except pursuant to a written contract, which contract, whether with such registered company or with an investment adviser of such registered company, has been approved by the vote of a majority of the outstanding voting securities of such registered company.''

9. Form N–1A is the registration statement used by open-end investment companies. Item 19(a)(3) of Form N–1A requires a registered investment company to disclose in its statement of additional information the method of computing the ''advisory fee payable'' by the investment company with respect to each investment adviser, including the total dollar amounts that the investment company ''paid to the adviser (aggregated with amounts paid to affiliated advisers, if any), and any advisers who are not affiliated persons of the adviser, under the investment advisory contract for the last three fiscal years.''

10. Rule 20a–1 under the Act requires proxies solicited with respect to a registered investment company to comply with Schedule 14A under the 1934 Act. Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A, taken together, require a proxy statement for a shareholder meeting at which the advisory contract will be voted upon to include the ''rate of compensation of the investment adviser,'' the ''aggregate amount of the investment adviser's fee,'' a description of the ''terms of the contract to be acted upon,'' and, if a change in the advisory fee is proposed, the existing and proposed fees and the difference between the two fees.

11. Regulation S–X sets forth the requirements for financial statements required to be included as part of a registered investment company's registration statement and shareholder reports filed with the Commission. Sections 6–07(2)(a), (b), and (c) of Regulation S–X require a registered investment company to include in its financial statements information about investment advisory fees.

12. Section 6(c) of the Act provides that the Commission may exempt any person, security, or transaction or any class or classes of persons, securities, or transactions from any provisions of the Act, or any rule thereunder, if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy

---

[6] Applicants represent that if the name of any Subadvised Fund contains the name of a subadviser, the name of the Adviser that serves as the primary adviser to the Fund, or a trademark or trade name that is owned by or publicly used to identify the Adviser, will precede the name of the subadviser.

[7] The Subadvisers will be registered with the Commission as an investment adviser under the Advisers Act or not subject to such registration.

[8] A ''Subadviser'' also includes an investment subadviser that will provide the Adviser with a model portfolio reflecting a specific strategy, style or focus with respect to the investment of all or a portion of a Subadvised Fund's assets. The Adviser may use the model portfolio to determine the securities and other instruments to be purchased, sold or entered into by a Subadvised Fund's portfolio or a portion thereof, and place orders with brokers or dealers that it selects.

[9] A ''Multi-manager Notice'' will be modeled on a Notice of internet Availability as defined in Rule 14a–16 under the 1934 Act, and specifically will, among other things: (a) Summarize the relevant information regarding the new Subadviser (except as modified to permit Aggregate Fee Disclosure); (b) inform shareholders that the Multi-manager Information Statement is available on a website; (c) provide the website address; (d) state the time period during which the Multi-manager Information Statement will remain available on that website; (e) provide instructions for accessing and printing the Multi-manager Information Statement; and (f) instruct the shareholder that a paper or email copy of the Multi-manager Information Statement may be obtained, without charge, by contacting the Subadvised Fund. A ''Multi-manager Information Statement '' will meet the requirements of Regulation 14C, Schedule 14C and Item 22 of Schedule 14A under the 1934 Act for an information statement, except as modified by the requested order to permit Aggregate Fee Disclosure. Multi-manager Information Statements will be filed with the Commission via the EDGAR system.

[10] In addition, Applicants represent that whenever a Subadviser is hired or terminated, or a Subadvisory Agreement is materially amended, the Subadvised Fund's prospectus and statement of additional information will be supplemented promptly pursuant to rule 497(e) under the Securities Act of 1933.

and provisions of the Act. Applicants state that the requested relief meets this standard for the reasons discussed below.

IV. Arguments in Support of the Requested Relief

13. Applicants assert that, from the perspective of the shareholder, the role of the Subadvisers is substantially equivalent to the limited role of the individual portfolio managers employed by an investment adviser to a traditional investment company. Applicants also assert that the shareholders expect the Adviser, subject to review and approval of the Board, to select a Subadviser who is in the best position to achieve the Subadvised Fund's investment objective. Applicants believe that permitting the Adviser to perform the duties for which the shareholders of the Subadvised Fund are paying the Adviser—the selection, oversight and evaluation of the Subadviser—without incurring unnecessary delays or expenses of convening special meetings of shareholders is appropriate and in the interest of the Fund's shareholders, and will allow such Fund to operate more efficiently. Applicants state that each Investment Advisory Agreement will continue to be fully subject to section 15(a) of the Act and approved by the relevant Board, including a majority of the Independent Trustees, in the manner required by section 15(a) and 15(c) of the Act.

14. Applicants submit that the requested relief meets the standards for relief under section 6(c) of the Act. Applicants state that the operation of the Subadvised Fund in the manner described in the Application must be approved by shareholders of that Fund before it may rely on the requested relief. Applicants also state that the proposed conditions to the requested relief are designed to address any potential conflicts of interest or economic incentives, and provide that shareholders are informed when new Subadvisers are hired.

15. Applicants contend that, in the circumstances described in the application, a proxy solicitation to approve the appointment of new Subadvisers provides no more meaningful information to shareholders than the proposed Multi-manager Information Statement. Applicants state that, accordingly, they believe the requested relief is necessary or appropriate in the public interest, and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

16. With respect to the relief permitting Aggregate Fee Disclosure, Applicants assert that disclosure of the individual fees paid to the Subadvisers does not serve any meaningful purpose. Applicants contend that the primary reasons for requiring disclosure of individual fees paid to Subadvisers are to inform shareholders of expenses to be charged by a particular Subadvised Fund and to enable shareholders to compare the fees to those of other comparable investment companies. Applicants believe that the requested relief satisfies these objectives because the Subadvised Fund's overall advisory fee will be fully disclosed and, therefore, shareholders will know what the Subadvised Fund's fees and expenses are and will be able to compare the advisory fees a Subadvised Fund is charged to those of other investment companies. In addition, Applicants assert that the requested relief would benefit shareholders of the Subadvised Fund because it would improve the Adviser's ability to negotiate the fees paid to Subadvisers. In particular, Applicants state that if the Adviser is not required to disclose the Subadvisers' fees to the public, the Adviser may be able to negotiate rates that are below a Subadviser's ''posted'' amounts. Applicants assert that the relief will also encourage Subadvisers to negotiate lower subadvisory fees with the Adviser if the lower fees are not required to be made public.

V. Relief for Affiliated Subadvisers

17. The Commission has granted the requested relief with respect to Wholly-Owned and Non-Affiliated Subadvisers through numerous exemptive orders. The Commission also has extended the requested relief to Affiliated Subadvisers.[11] Applicants state that although the Adviser's judgment in recommending a Subadviser can be affected by certain conflicts, they do not warrant denying the extension of the requested relief to Affiliated Subadvisers. Specifically, the Adviser faces those conflicts in allocating fund assets between itself and a Subadviser, and across Subadvisers, as it has an interest in considering the benefit it will receive, directly or indirectly, from the fee the Subadvised Fund pays for the management of those assets. Applicants also state that to the extent the Adviser has a conflict of interest with respect to the selection of an Affiliated Subadviser, the proposed conditions are protective of shareholder interests by ensuring the Board's independence and providing the Board with the appropriate resources and information to monitor and address conflicts.

18. With respect to the relief permitting Aggregate Fee Disclosure, Applicants assert that it is appropriate to disclose only aggregate fees paid to Affiliated Subadvisers for the same reasons that similar relief has been granted previously with respect to Wholly-Owned and Non-Affiliated Subadvisers.

VI. Applicants' Conditions

Applicants agree that any order granting the requested relief will be subject to the following conditions:

1. Before a Subadvised Fund may rely on the order requested in the Application, the operation of the Subadvised Fund in the manner described in the Application will be, or has been, approved by a majority of the Subadvised Fund's outstanding voting securities as defined in the Act, or, in the case of a Subadvised Fund whose public shareholders purchase shares on the basis of a prospectus containing the disclosure contemplated by condition 2 below, by the initial shareholder before such Subadvised Fund's shares are offered to the public.

2. The prospectus for each Subadvised Fund will disclose the existence, substance and effect of any order granted pursuant to the Application. In addition, each Subadvised Fund will hold itself out to the public as employing the multi-manager structure described in the Application. The prospectus will prominently disclose that the Adviser has the ultimate responsibility, subject to oversight by the Board, to oversee the Subadvisers and recommend their hiring, termination, and replacement.

3. The Adviser will provide general management services to each Subadvised Fund, including overall supervisory responsibility for the general management and investment of the Subadvised Fund's assets, and subject to review and oversight of the Board, will (i) set the Subadvised Fund's overall investment strategies, (ii) evaluate, select, and recommend Subadvisers for all or a portion of the Subadvised Fund's assets, (iii) allocate and, when appropriate, reallocate the Subadvised Fund's assets among Subadvisers, (iv) monitor and evaluate the Subadvisers' performance, and (v) implement procedures reasonably designed to ensure that Subadvisers comply with the Subadvised Fund's investment objective, policies and restrictions.

[11] *Carillon Series Trust, et al.,* Investment Co. Act Rel. Nos. 33464 (May 2, 2019) (notice) and 33494 (May 29, 2019) (order).

4. Subadvised Funds will inform shareholders of the hiring of a new Subadviser within 90 days after the hiring of the new Subadviser pursuant to the Modified Notice and Access Procedures.

5. At all times, at least a majority of the Board will be Independent Trustees, and the selection and nomination of new or additional Independent Trustees will be placed within the discretion of the then-existing Independent Trustees.

6. Independent Legal Counsel, as defined in Rule 0–1(a)(6) under the Act, will be engaged to represent the Independent Trustees. The selection of such counsel will be within the discretion of the then-existing Independent Trustees.

7. Whenever a Subadviser is hired or terminated, the Adviser will provide the Board with information showing the expected impact on the profitability of the Adviser.

8. The Board must evaluate any material conflicts that may be present in a subadvisory arrangement. Specifically, whenever a subadviser change is proposed for a Subadvised Fund (''Subadviser Change'') or the Board considers an existing Subadvisory Agreement as part of its annual review process (''Subadviser Review''):

(a) The Adviser will provide the Board, to the extent not already being provided pursuant to section 15(c) of the Act, with all relevant information concerning:

(i) Any material interest in the proposed new Subadviser, in the case of a Subadviser Change, or the Subadviser in the case of a Subadviser Review, held directly or indirectly by the Adviser or a parent or sister company of the Adviser, and any material impact the proposed Subadvisory Agreement may have on that interest;

(ii) any arrangement or understanding in which the Adviser or any parent or sister company of the Adviser is a participant that (A) may have had a material effect on the proposed Subadviser Change or Subadviser Review, or (B) may be materially affected by the proposed Subadviser Change or Subadviser Review;

(iii) any material interest in a Subadviser held directly or indirectly by an officer or Trustee of the Subadvised Fund, or an officer or board member of the Adviser (other than through a pooled investment vehicle not controlled by such person); and

(iv) any other information that may be relevant to the Board in evaluating any potential material conflicts of interest in the proposed Subadviser Change or Subadviser Review.

(b) the Board, including a majority of the Independent Trustees, will make a separate finding, reflected in the Board minutes, that the Subadviser Change or continuation after Subadviser Review is in the best interests of the Subadvised Fund and its shareholders and, based on the information provided to the Board, does not involve a conflict of interest from which the Adviser, a Subadviser, any officer or Trustee of the Subadvised Fund, or any officer or board member of the Adviser derives an inappropriate advantage.

9. Each Subadvised Fund will disclose in its registration statement the Aggregate Fee Disclosure.

10. In the event that the Commission adopts a rule under the Act providing substantially similar relief to that in the order requested in the Application, the requested order will expire on the effective date of that rule.

11. Any new Subadvisory Agreement or any amendment to an existing Investment Advisory Agreement or Subadvisory Agreement that directly or indirectly results in an increase in the aggregate advisory fee rate payable by the Subadvised Fund will be submitted to the Subadvised Fund's shareholders for approval.

For the Commission, by the Division of Investment Management, under delegated authority.

Jill M. Peterson,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, the Securities and Exchange Commission will hold an Open Meeting on Tuesday, November 5, 2019 at 10:00 a.m.

PLACE: The meeting will be held in Auditorium LL–002 at the Commission's headquarters, 100 F Street NE, Washington, DC 20549.

STATUS: This meeting will begin at 10:00 a.m. (ET) and will be open to the public. Seating will be on a first-come, first-served basis. Visitors will be subject to security checks. The meeting will be webcast on the Commission's website at *www.sec.gov.*

MATTERS TO BE CONSIDERED: The subject matter of the Open Meeting will be the Commission's continued efforts to facilitate constructive shareholder engagement and enhance transparency, improve disclosures, and increase confidence in the proxy process. The specific matters to be considered are:

1. Whether to propose amendments to the proxy solicitation rules that would provide for disclosure of material conflicts of interest and set forth procedures to facilitate issuer and shareholder engagement, to provide clarity to market participants, and to improve the information provided to investors.

2. Whether to propose amendments to the shareholder proposal rules to modernize the submission and resubmission requirements and to update procedural requirements.

In addition, the subject matter of the Open Meeting will also include the Commission's continued efforts to modernize the regulatory framework for investment advisers and enhance information to investors. The specific matter to be considered is:

3. Whether to propose amendments under the Investment Advisers Act of 1940 to rules 206(4)–1 and 206(4)–3, the rules that prohibit certain investment adviser advertisements and payments to solicitors, respectively.

At times, changes in Commission priorities require alterations in the scheduling of meeting items.

CONTACT PERSON FOR MORE INFORMATION: For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact Vanessa A. Countryman, Office of the Secretary, at (202) 551–5400.

Dated: October 29, 2019.

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87404; File No. SR–NYSEAMER–2019–43]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Change To Amend the NYSE American Options Fee Schedule

October 28, 2019.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 15, 2019, NYSE American LLC (''NYSE

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE American Options Fee Schedule (''Fee Schedule''). The Exchange proposes to implement the fee change effective October 15, 2019. The proposed change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is modify the Fee Schedule to introduce two incentive programs that are designed to encourage increased Manual and Electronic order flow to the Exchange to the benefit of all market participants.

In brief, and as described further below, the first proposed change is designed to encourage Manual transactions by NYSE American Options Market Makers and Specialists/e-Specialists by offering these participants discounted rates on any portion of their monthly Manual volume (excluding Strategy Executions and QCC Transactions) that exceeds, by a specified percentage of Total Industry Customer equity and ETF option average daily volume (''TCADV''),[4] either the participants' August 2019 volume or, in the case of a new NYSE American Options Market Makers or and Specialists/e-Specialists, a base level of 15,000 ADV. The second proposed change is designed to encourage ATP Holders to increase their Electronic volume in the ''Professional'' range.[5] Specifically, the Exchange proposes to offer discounted rates on monthly Professional volume as well as certain credits on Customer Electronic volume, including for initiating CUBE volume, to ATP Holders that increase their Professional volume (excluding Strategy Executions, CUBE Auctions, and QCC Transactions) by specified percentages of TCADV over their August 2019 volume, or in the case of new ATP Holders, above a base level of 10,000 ADV. The Exchange believes that the baselines of 15,000 ADV Manual volumes for new NYSE American Options Market Makers and/or Specialists/e-Specialists and 10,000 ADV Professional volumes for new ATP Holders are appropriate because these volumes are comparable to trading volumes in August 2019 of active firms on the Exchange in the respective categories.

The Exchange proposes to implement the rule changes on October 15, 2019.

Background

The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [6]

There are currently 16 registered options exchanges competing for order flow. Based on publicly-available information, and excluding index-based options, no single exchange has more than 16% of the market share of executed volume of multiply-listed equity and ETF options trades.[7] Therefore, no exchange possesses significant pricing power in the execution of multiply-listed equity & ETF options order flow. More specifically, in the first quarter of 2019, the Exchange had less than 10% market share of executed volume of multiply-listed equity & ETF options trades.[8]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow, or discontinue or reduce use of certain categories of products, in response to fee changes. Accordingly, competitive forces constrain options exchange transaction fees.

In response to this competitive environment, the Exchange has established various pricing incentives designed to encourage increased Manual and Electronic volume executed on the Exchange, including (but not limited to) the American Customer Engagement (''ACE'') Program. While the ACE Program is limited to Electronic Customer volume, the Exchange proposes two new pricing incentives that focus on encouraging additional Manual volume and Professional Electronic volume. To the extent that these incentives succeed, the increased liquidity on the Exchange would result in enhanced market quality for all participants.

Proposed Rule Change

Manual Volume Incentive for MMs and Specialists

The Exchange proposes to offer NYSE American Options Market Makers (''MMs'') and Specialists/e-Specialists (''Specialists) discounted rates on Manual transactions that exceed a specified volume threshold. Currently, Manual transactions in both Penny and Non-Penny Pilot issues are subject to a per contract rate of $0.25 for MMs and $0.18 for Specialists.[9] As proposed, MMs or Specialists that increase their monthly Manual volumes by a specified percentage of TCADV over their August 2019 volume or, for new MMs or Specialists, that increase Manual

[4] The term ''TCADV'' is defined in the Key Terms and Definitions Section of the Preface of the Fee Schedule, *see infra* note 8 [sic]. TCADV includes Options Clearing Corporation (''OCC'') calculated Customer volume of all types, including Complex Order transactions and QCC transactions, in equity and ETF options.

[5] For purposes of this filing, ''Professional'' Electronic volume includes: Professional Customer, Broker Dealer, Non-NYSE American Options Market Maker, and Firm.

[6] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (S7–10–04) (''Reg NMS Adopting Release'').

[7] The OCC publishes options and futures volume in a variety of formats, including daily and monthly volume by exchange, *available here: https://www.theocc.com/market-data/volume/default.jsp.*

[8] Based on OCC data, *see id.,* the Exchange's market share in equity-based options declined from 9.82% for the month of January to 8.84% for the month of April.

[9] *See* Fee Schedule, Section I.A. (Options Transaction Fees and Credits, Rates for Options transactions), *available here: https://www.nyse.com/publicdocs/nyse/markets/american-options/NYSE_American_Options_Fee_Schedule.pdf.*

volume by a specified percentage of TCADV above a base level of 15,000 ADV (''Increased Manual Volume'') are eligible to receive a discounted rate solely on the Increased Manual Volume as set forth below. The Exchange will exclude any volumes attributable to QCC trades or Strategy Execution from monthly calculations of base level or Increased Manual Volume, as these transactions are subject to separate pricing described in Fee Schedule, Sections I.F., I.G. and I.J., respectively. As proposed:

- MMs with Increased Manual Volume of at least 0.15% TCADV will be charged $0.18 per contract for the Increased Manual Volume. (Specialists currently pay $0.18 per contract for all Manual transactions); and
- MMs and Specialists with an Increased Manual Volume of at least 0.30% TCADV will be charged $0.12 per contract for the Increased Manual Volume.[10]

For example, assume a MM executed 18,000 ADV Manual Volume in August, 2019. In October, the TCADV is 17,200,000. An increase of 0.15% of TCADV would be equal to 25,800 contracts. An increase of 0.30% of TCADV would be equal to 51,600 contracts.

Thus, if the MM executed 44,500 ADV in October, the MM would qualify for $0.18 per contract on the MM's volume above the 18,000 ADV (*i.e.,* the Increased Volume Amount of 26,500 contracts). The MM's billing would reflect $0.25 per contract on the MM's base amount of 18,000 ADV, and $0.18 per contact on the Increased Manual Volume of 26,500 ADV.

If the same MM executed 74,000 ADV in October, the MM would qualify for $0.12 per contract on the MM's volume above the 18,000 ADV (*i.e.,* the Increased Volume Amount of 56,000 contracts). The MM's billing would reflect $0.25 per contract on the MM's base amount of 18,000 ADV, and $0.12 per contract on the Increased Manual Volume of 56,000 ADV.

The Exchange believes this proposed incentive pricing is appropriate because Market Makers (Specialists) serve a crucial role in the options markets by providing liquidity to facilitate market efficiency and functioning. The Exchange's fees are constrained by intermarket competition, as Market Makers can register on any or all of the 16 options exchanges. Thus, ATP Holders that are also members of other exchanges have a choice of where they register and operate as Market Makers. The proposed pricing incentive for MMs and Specialists is therefore designed to encourage these participants to (continue to) conduct Manual (open outcry) trading on the Floor of the Exchange. The Exchange notes that all market participants stand to benefit from increased Manual transaction volume, which promotes market depth, facilitates tighter spreads and enhances price discovery, and may lead to a corresponding increase in (Manual or Electronic) order flow from other market participants.

The Exchange cannot predict with certainty whether any ATP Holders would avail themselves of this proposed fee change, particularly because the proposed pricing incentive is new. Assuming historical behavior can be predictive of future behavior, however, the Exchange believes that at present participation rates, between two and four firms may be able to qualify for discounted Manual rates.

Professional Step-Up Incentive

The Exchange also proposes to introduce an incentive for ATP Holders to increase (or ''step up'') their Electronic Professional[11] volume by offering lower rates and credits based on volume growth (*i.e.,* Tier A, Tier B, and Tier C). Specifically, an ATP Holder may qualify for discounted rates on its monthly Electronic Professional volume and receive credits on certain Electronic Customer volume, including initiating CUBE volume, provided the ATP Holder increases its monthly Electronic Professional volume by specified percentages of TCADV over their August 2019 volume or, for new ATP Holders, that increase Electronic Professional volume by a specified percentages of TCADV above a base level of 10,000 contracts ADV (the ''Qualifying Volume''), as set forth in the table below. The Exchange will exclude any volumes attributable to QCC trades, CUBE Auctions, or Strategy Execution from monthly calculations of base level or Qualifying Volume, as these transactions are subject to separate pricing described in Fee Schedule Sections I.F., I.G. and I.J., respectively.

PROFESSIONAL STEP-UP INCENTIVE

	Qualifying volume as a % of TCADV	Per contract penny pilot rate	Per contract non-penny pilot rate	ACE benefits
Tier A	0.04	$0.42	$0.65	N/A.
Tier B	0.07	0.35	0.55	Tier 1 Customer Credits only (per Section I.E.).
Tier C	0.09	0.25	0.50	Tier 1 Customer Credits (per Section I.E.), plus ACE Initiating Participant Rebate—All issues (per Section I.G.).

[10] *See* proposed Fee Schedule, Section I.A. (Options Transaction Fees and Credits, Rates for Options transactions), note 8 [sic].

[11] *See supra* note 5 (defining Professional volume).

As shown in the table above, the greater the increase in Qualifying Volume, the more benefits that accrue to the ATP Holder. To put in context, assume an ATP Holder executed Electronic Professional volume in August 2019 totaling 9,000 ADV and, in October, the TCADV is 17,200,000. To qualify for the Professional Step-Up Incentive program, that ATP Holder would need to execute Electronic Professional volume above its August 2019 that is at least 6,880 (*i.e.,* 0.04% of TCADV) for Tier A; 12,040 (*i.e.,* 0.07% of TCADV) for Tier B; or 15,480 (*i.e.,* 0.09% of TCADV) for Tier C. If that same ATP Holder did not have August 2019 volume, it would have to execute at least this much volume above the 10,000 ADV base level.

ATP Holders that qualify for Tier A—the lowest Professional volume growth threshold, would be charged reduced rates of $0.42 and $0.65 on Professional Electronic executions on Penny and Non-Penny issues, respectively.[12] ATP Holders that qualify for Tier B would be charged even further reduced rates—of $0.35 and $0.55 on Professional Electronic executions on Penny and Non-Penny issues, respectively,[13] and would also receive credits on Professional Electronic Customer executions that are the same as those available to ATP Holders that achieve Tier 1 of the ACE Program (the ''ACE Tier 1 Customer Credits'').[14] However, participants that qualify for Tier B of the Professional Step-Up Incentive do not receive any other benefits that inure to ATP Holders that qualify for ACE Tier 1. Finally, ATP Holders that qualify for Tier C would be charged the most reduced rates—$0.25 and $0.50 on Electronic Professional executions on Penny and Non-Penny issues, respectively; [15] would receive the ACE Tier 1 Customer Credits; and would receive the ''ACE Initiating Participant Rebate—All Issues'' (or ''ACE Rebate''), which applies rebates to certain volume that initiates a Customer Best Execution Auction or ''CUBE.[16]

The Exchange's fees are constrained by intermarket competition, as ATP Holders may direct their order flow to any of the 16 options exchanges, including those with similar incentive programs.[17] Thus, ATP Holders have a choice of where they direct their order flow. This proposed Professional Step-Up Incentive program is designed to encourage ATP Holders to increase the amount of Electronic Professional volume directed to and executed on the Exchange. The Exchange notes that all market participants stand to benefit from increased Electronic Professional volume, which promotes market depth, facilitates tighter spreads and enhances price discovery, and may lead to a corresponding increase in order flow from other market participants.

The Exchange cannot predict with certainty whether any ATP Holders would avail themselves of this proposed fee change, particularly because the proposed Professional Step-Up Incentive program is new. Assuming historical behavior can be predictive of future behavior, however, the Exchange believes that at present participation rates, between two and four firms may be able to qualify for Professional Step-Up Incentive program.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[18] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[19] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Rule Change Is Reasonable

The Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [20]

There are currently 16 registered options exchanges competing for order flow. Based on publicly-available information, and excluding index-based options, no single exchange has more than 16% of the market share of executed volume of multiply-listed equity and ETF options trades.[21] Therefore, no exchange possesses significant pricing power in the execution of multiply-listed equity & ETF options order flow. More specifically, in the first quarter of 2019, the Exchange had less than 10% market share of executed volume of multiply-listed equity & ETF options trades.[22]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow, or discontinue or reduce use of certain categories of products, in response to fee changes. Accordingly, competitive forces constrain options exchange transaction fees. Stated otherwise, changes to exchange transaction fees can have a direct effect on the ability of an exchange to compete for order flow.

Manual Volume Incentive for MMs and Specialists

The Exchange believes that the proposal to offer reduced rates for MMs and Specialists on Increased Manual Volume is reasonable because it is designed to incent these participants to increase the number and type of Manual executions sent to the Floor of the Exchange. Market Makers (and Specialists) serve a crucial role in the options markets by providing liquidity to facilitate market efficiency and functioning. The Exchange's fees are

---

[12] *See* Fee Schedule, Section I. A., *supra* note 9 (setting forth options transactions rates for Electronic Professional volume of $0.50 and $0.75 for Penny and Non-Penny issues respectively; except that Firm execution in Penny issues are charged $0.47 per contract).

[13] *See* proposed Fee Schedule, Section I.A. (Options Transaction Fees and Credits, Rates for Options transactions), note 8 [sic].

[14] *See id.; see also* Fee Schedule, Section I.E. (describing ACE Program).

[15] *See id.*

[16] *See* Fee Schedule, Section I.G. (describing CUBE Auctions Fees & Credits, for Single-Leg and Complex CUBE Auctions). In the case of a Single-Leg CUBE Auction, the pricing table (at note 2), states that the ACE Rebate ''is applied to each of the first 5,000 Customer contracts of a CUBE Order executed in a [Single-Leg] CUBE Auction,'' and is available to participants that qualify for ACE Tier 1. *See id.* In the case of a Complex CUBE Auction, the pricing table (at note 2), ACE ''is applied to each of the first 1,000 Customer contracts per leg of a Complex CUBE Order executed in a Complex CUBE Auction,'' and is available to participants that qualify for ACE Tier 1. *See id.*

[17] *See e.g.,* MIAX Options fee schedule, Section 1.a.iv, Professional Rebate Program, *available here, https://www.miaxoptions.com/sites/default/files/fee_schedule-files/MIAX_Options_Fee_Schedule_04012019.pdf* (setting forth per contract credits on volume submitted for the account of Public Customers that are not Priority Customers, Non-MIAX Market Makers, Non-Member Broker Dealers, and Firms (collectively, Professional for purposes of MIAX program), provided the Member achieves certain Professional volume increase percentage thresholds (set forth in the schedule) in the month relative to the fourth quarter of 2015).

[19] 15 U.S.C. 78f(b)(4) and (5).

[20] *See* Reg NMS Adopting Release, *supra* note 6, at 37499.

[21] *See supra* note 7.

[22] Based on OCC data, *see supra* note 8, in 2019, the Exchange's market share in equity-based options declined from 9.82% for the month of January to 7.86% for the month of September.

constrained by intermarket competition, as Market Makers can register on any or all of the 16 options exchanges. ATP Holders that are also members of other exchanges have a choice of where they register as Market Makers. Thus, the Exchange believes that this proposed rule change will provide an incentive for MMs and Specialists to (continue to) conduct (open outcry) Manual trading on the Exchange with increased volume. The Exchange notes that all market participants stand to benefit from increased Manual transaction volume, which promotes market depth, facilitates tighter spreads and enhances price discovery, and may lead to a corresponding increase in order flow from other market participants.

Professional Step-Up Incentive

The Exchange believes that the proposed Professional Step-Up Incentive is reasonable because it is designed to incent ATP Holders to increase the amount of Electronic Professional order flow directed to the Exchange. In addition, because the top two tiers (B and C) of this program allow qualifying ATP Holders to also receive credits on Electronic Customer volume (per Tier 1 of the ACE program) and, for Tier C only, to achieve rebates on certain initiating CUBE Auction order flow, the proposed program may encourage ATP Holders to direct both Professional and Customer Electronic order flow, including initiating CUBE volume to the Exchange. The Exchange notes that all market participants stand to benefit from increased Electronic transaction volume—whether Professional or Customer, as such increase promotes market depth, facilitates tighter spreads and enhances price discovery, and may lead to a corresponding increase in order flow from other market participants that do not participant in (or qualify for) the Professional Step-Up Incentive program.

The Exchange believes that the baselines of 15,000 ADV Manual volumes for new NYSE American Options Market Makers and/or Specialists/e-Specialists and 10,000 ADV Professional volumes for new ATP Holders are reasonable because these volumes are comparable to trading volumes in August 2019 of active firms on the Exchange in the respective categories.

Regarding both proposed pricing changes, the Exchange cannot predict with certainty whether any participants would avail themselves of the proposed fee changes, particularly because both of the proposed incentives are new. Assuming historical behavior can be predictive of future behavior, however, the Exchange believes that at present participation rates, between two and four firms may be able to qualify for the discounted Manual rates and between two and four firms may be able to qualify for the Professional Step-Up Inventive.[23]

Finally, to the extent the proposed pricing incentives attract greater volume and liquidity (to the Floor or otherwise), the Exchange believes the proposed changes would improve the Exchange's overall competitiveness and strengthen its market quality for all market participants. In the backdrop of the competitive environment in which the Exchange operates, the proposed rule changes are a reasonable attempt by the Exchange to increase the depth of its market and improve its market share relative to its competitors. The proposed rule changes are designed to incent ATP Holders to direct liquidity to the Exchange, in both Manual and Electronic executions, similar to other exchange programs with competitive pricing programs,[24] thereby promoting market depth, price discovery and improvement and enhancing order execution opportunities for market participants.

The Proposed Rule Change is an Equitable Allocation of Credits and Fees

The Exchange believes the proposed rule change is an equitable allocation of its fees and credits. The proposals—both for discounted rates on Increased Manual Volume for MMs and Specialists and the Professional Step-Up Incentive program—are based on the amount and type of business transacted on the Exchange and ATP Holders can opt to avail themselves of these incentive or not. Moreover, the proposals are designed to encourage MMs, Specialists, and ATP Holders to aggregate their executions—particularly Manual and Electronic Professional—at the Exchange as a primary execution venue. To the extent that the proposed changes attract more Manual and (Professional) Electronic volume to the Exchange, this increased order flow would continue to make the Exchange a more competitive venue for, among other things, order execution. Thus, the Exchange believes the proposed rule changes would improve market quality for all market participants on the Exchange and, as a consequence, attract more order flow to the Exchange thereby improving market-wide quality and price discovery.

The Exchange believes that the baselines of 15,000 ADV Manual volumes for new NYSE American Options Market Makers and/or Specialists/e-Specialists and 10,000 ADV Professional volumes for new ATP Holders are appropriate because these volumes are comparable to trading volumes in August 2019 of active firms on the Exchange in the respective categories.

The Proposed Rule Change is not Unfairly Discriminatory

The Exchange believes that the proposals—both for discounted rates on Increased Manual Volume for MMs and Specialists and the Professional Step-Up Incentive program—are not unfairly discriminatory because the proposed modifications would be available to all similarly-situated market participants on an equal and non-discriminatory basis.

The Exchange believes that the baselines of 15,000 ADV Manual volumes for new NYSE American Options Market Makers and/or Specialists/e-Specialists and 10,000 ADV Professional volumes for new ATP Holders are not unfairly discriminatory because these volumes are comparable to trading volumes in August 2019 of active firms on the Exchange in the respective categories.

The proposals are based on the amount and type of business transacted on the Exchange and MMs, Specialists, and ATP Holders are not obligated to try to achieve either of the incentive pricing options. Rather, the proposals are designed to encourage these participants to utilize the Exchange as a primary trading venue (if they have not done so previously) or increase (both Manual and Electronic) volume sent to the Exchange. To the extent that the proposed changes attract more executions to the Exchange, this increased order flow would continue to make the Exchange a more competitive venue for, among other things, order execution. Thus, the Exchange believes the proposed rule changes would improve market quality for all market participants on the Exchange and, as a consequence, attract more order flow to the Exchange thereby improving market-wide quality and price discovery. The resulting increased volume and liquidity would provide more trading opportunities and tighter spreads to all market participants and thus would promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market

[23] The Exchange notes that the "two and four" firms that may qualify for the different incentives proposed herein are not the same "two and four" firms.

[24] *See, e.g., supra* note 17 (regarding MIAX Professional Rebate Program).

system and, in general, to protect investors and the public interest.

With regard to the proposed discount rates on certain increases in Manual volume by MMs and Specialists, the Exchange notes that the Manual rates charged to these participants are already lower than the rates charged to other participants.[25] MMs (and Specialists) serve a crucial role in financial markets by providing liquidity to facilitate market efficiency and functioning. Market Makers, unlike other market participants, add value through continuous quoting and the commitment of capital. Because Market Makers have these obligations and regulatory requirements that normally do not apply to other market participants, the Exchange believes that offering the proposed reduced Manual rates is equitable and not unfairly discriminatory in light of their obligations and the costs associated therewith.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act, the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the Exchange believes that the proposed changes would encourage the submission of additional liquidity to a public exchange, thereby promoting market depth, price discovery and transparency and enhancing order execution opportunities for all market participants. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering integrated competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [26]

Intramarket Competition. The proposed changes are designed to attract additional order flow (both Manual and Electronic, particularly Professional volume) to the Exchange. The Exchange believes that the proposed pricing incentives would incent market participants to direct additional volume to the Exchange. Greater liquidity benefits all market participants on the Exchange and increased Manual and Electronic Professional volume would increase opportunities for execution of other trading interest. The proposed pricing incentives would be available to all similarly-situated market participants that incur transaction fees on Manual and Electronic executions, and, as such, the proposed change would not impose a disparate burden on competition among market participants on the Exchange.

Market Makers, unlike other market participants, add value through continuous quoting and the commitment of capital. Because Market Makers have these obligations and regulatory requirements that normally do not apply to other market participants, the Exchange believes that offering the proposed reduced rates, in light of their obligations and the costs associated therewith, does not create an undue burden on non-Market Makers.

Intermarket Competition. The Exchange operates in a highly competitive market in which market participants can readily favor one of the 16 competing option exchanges if they deem fee levels at a particular venue to be excessive. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and to attract order flow to the Exchange. Based on publicly-available information, and excluding index-based options, no single exchange has more than 16% of the market share of executed volume of multiply-listed equity and ETF options trades.[27] Therefore, no exchange possesses significant pricing power in the execution of multiply-listed equity & ETF options order flow. More specifically, in the first quarter of 2019, the Exchange had less than 10% market share of executed volume of multiply-listed equity & ETF options trades.[28]

The Exchange believes that the proposed rule change reflects this competitive environment because it modifies the Exchange's fees in a manner designed to encourage ATP Holders to direct trading interest (both Manual and Electronic) to the Exchange, to provide liquidity and to attract order flow. To the extent that this purpose is achieved, all the Exchange's market participants should benefit from the improved market quality and increased opportunities for price improvement.

The Exchange believes that the proposed change could promote competition between the Exchange and other execution venues, including those that currently offer similar pricing incentives, by encouraging additional orders to be sent to the Exchange for execution. The Exchange also believes that the proposed change is designed to provide the public and investors with a Fee Schedule that is clear and consistent, thereby reducing burdens on the marketplace and facilitating investor protection.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) [29] of the Act and subparagraph (f)(2) of Rule 19b–4 [30] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [31] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

[25] *See* Fee Schedule, Section I.A., *supra* note 9 (setting forth rates for Manual options transactions: MMs and Specialists are charged $0.18 per contract, while all other non-Customer participant (save for DOMMs) is charged $0.25 per contract).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87408; File No. SR–NYSECHX–2019–12]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fee Schedule of NYSE Chicago, Inc.

October 28, 2019.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 15, 2019 the NYSE Chicago, Inc. (''NYSE Chicago'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Fee Schedule of NYSE Chicago, Inc. to provide for co-location services and fees in connection with its expected migration to the NYSE Pillar platform in the fourth quarter of 2019. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule to provide for co-location services and fees in connection with its expected migration to the NYSE Pillar platform (''Pillar'') in the fourth quarter of 2019.[4] Pillar is an integrated trading technology platform designed to use a single specification for connecting to the equities and options markets operated by the Exchange's affiliates New York Stock Exchange LLC (''NYSE''), NYSE American LLC (''NYSE American''), NYSE Arca, Inc. (''NYSE Arca''), and NYSE National, Inc. (''NYSE National'' and, together, the ''Affiliate SROs'').[5] As detailed below, current Users [6] would not incur any new fees and no incremental co-location revenue is expected under this proposal.

The Affiliate SROs offer co-location services.[7] When a User purchases a co-

[4] Subject to rule approvals, the migration to Pillar is currently anticipated to be on November 4, 2019. *See* Exchange Act Release Nos. 85297 (March 12, 2019), 84 FR 9854 (March 18, 2019) (SR–CHX–2018–03), and 86709 (August 20, 2019), 84 FR 44654 (August 26, 2019) (SR–CHX–2019–08).

[5] In July 2018, the Exchange and its direct parent company were acquired by NYSE Group, Inc. As a result, the Exchange and the Affiliate SROs are direct or indirect subsidiaries of NYSE Group, Inc. and, indirectly, Intercontinental Exchange, Inc. *See* Exchange Act Release No. 83635 (July 13, 2018), 83 FR 34182 (July 19, 2018) (SR–CHX–2018–004); *see also* Exchange Act Release No. 83303 (May 22, 2018), 83 FR 24517 (May 29, 2018) (SR–CHX–2018–004).

[6] Consistent with the Affiliate SRO Price Lists, for purposes of the Exchange's co-location services, a ''User'' shall mean any market participant that requests to receive co-location services directly from the Exchange. *See* Securities Exchange Act Release Nos. 76008 (September 29, 2015), 80 FR 60190 (October 5, 2015) (SR–NYSE–2015–40); 76009 (September 29, 2015), 80 FR 60213 (October 5, 2015) (SR–NYSEMKT–2015–67); and 76010 (September 29, 2015), 80 FR 60197 (October 5, 2015) (SR–NYSEArca–2015–82); and 83351 (May 31, 2018), 83 FR 26314 (June 6, 2018) (SR–NYSENAT–2018–07) (''NYSE National Co-location Notice'').

[7] With the exception of NYSE National, the Affiliate SROs initially filed rule changes relating to their co-location services and related fees with the Commission in 2010. *See* Securities Exchange Act Release Nos. 62960 (September 21, 2010), 75 FR 59310 (September 27, 2010) (SR–NYSE–2010–56); 62961 (September 21, 2010), 75 FR 59299 (September 27, 2010) (SR–NYSEAmex–2010–80); and 63275 (November 8, 2010), 75 FR 70048 (November 16, 2010) (SR–NYSEArca–2010–100). NYSE National initially filed rule changes relating to its co-location services and related fees with the Commission on May 18, 2018. *See* NYSE National Co-location Notice, *supra* note 6. If any change to the Affiliate SROs' colocation services become operative after the present filing is made but before it becomes operative, the Exchange would make an additional rule filing implementing the change, with the intention that the Exchange would offer the same co-location services offered by the Affiliate SROs.

location service, it is charged once for the service, despite the service being offered by all the Affiliate SROs. Under this proposal, Users purchasing co-location services would continue to pay once, even though all four Affiliate SROs and the Exchange would offer co-location services, and would receive access to the Affiliate SROs and the Exchange in the Mahwah, New Jersey data center (the ''data center'').

The Exchange proposes that the additions to the Fee Schedule to provide for co-location services would become operative upon the Exchange's migration to Pillar.

Currently, the Exchange's trading and execution systems are not in the data center. Once the migration to Pillar is completed, the trading of all securities on the Exchange will have moved to the data center. As a result of the migration, Users will be able to have low latency connections to the Exchange over the Liquidity Center Network (''LCN''), a local area network available in the data center, and so would be able to co-locate in the data center by ''rent[ing] space on premises controlled by the Exchange in order that they may locate their electronic servers in close physical proximity to the Exchange's trading and execution systems.'' [8] Absent this proposal to offer co-location services, market participants' access to the Exchange would solely be available outside of co-location, even after the migration of the Exchange's trading and execution systems to Pillar, and so they would not be able to ''reduce latency in transmitting market data and order messages'' to the Exchange.[9]

The Exchange operates in a highly competitive environment. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation National Market System (''NMS''), the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [10]

[9] *See* Securities Exchange Act Release No. 61358 (January 14, 2010), 75 CFR 3594 (January 21, 2010), at 3598 (concept release on equity market structure).

[10] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

Proposed Services and Fees

The Exchange proposes the same services and fees set forth in the price lists and fee schedules of its Affiliate SROs (collectively, the ''Affiliate SRO Price Lists''),[11] with the non-substantive differences described below. No new or novel services or fees are proposed and, as described below, current Users of the Affiliate SROs' co-location services would not incur any new fees.

Definitions

The Exchange proposes to adopt the definitions of ''Affiliate,'' ''Aggregate Cabinet Footprint,'' ''Hosted Customer,'' ''Hosting User,'' and ''User'' as set forth in the Affiliate SRO Price Lists. Specifically, the Exchange proposes the following definitions:

- An ''Affiliate'' of a User is any other User or Hosted Customer that is under 50% or greater common ownership or control of the first User.
- ''Aggregate Cabinet Footprint'' of a User or Hosted Customer is (a) for a User, the total kW of the User's cabinets, including both partial and dedicated cabinets, and (b), for a Hosted Customer, the total kW of the portion of the Hosting User's cabinet, whether partial or dedicated, allocated to such Hosted Customer.
- A ''Hosted Customer'' means a customer of a Hosting User that is hosted in a Hosting User's co-location space.
- A ''Hosting User'' means a User of co-location services that hosts a Hosted Customer in the User's co-location space.
- A ''User'' means any market participant that requests to receive co-location services directly from the Exchange.

As in the Affiliate SRO Price Lists, the Exchange would specify that the definitions were for purposes of the co-location fees only.

[11] *See* ''Co-Location Fees'' in ''New York Stock Exchange Price List 2019'' (''NYSE Price List'') at *https://www.nyse.com/publicdocs/nyse/markets/nyse/NYSE_Price_List.pdf;* ''NYSE American Equities Price List'' (''NYSE American Equities Price List'') at *https://www.nyse.com/publicdocs/nyse/markets/nyse-american/NYSE_America_Equities_Price_List.pdf;* ''NYSE American Options Fee Schedule'' (''NYSE American Options Fee Schedule'') at *https://www.nyse.com/publicdocs/nyse/markets/american-options/NYSE_American_Options_Fee_Schedule.pdf;* ''NYSE Arca Equities Fees and Charges'' (''NYSE Arca Equities Fee Schedule'') at *https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf;* ''NYSE Arca Options Fees and Charges'' (''NYSE Arca Options Fee Schedule'') at *https://www.nyse.com/publicdocs/nyse/markets/arca-options/NYSE_Arca_Options_Fee_Schedule.pdf;* and ''NYSE National, Inc. Schedule of Fees and Rebates'' (''NYSE National Fee Schedule'') at *https://www.nyse.com/publicdocs/nyse/regulation/nyse/NYSE_National_Schedule_of_Fees.pdf.*

General Notes

The Exchange proposes to adopt General Notes 1 through 4 as set forth in the Affiliate SRO Price Lists, subject to the differences discussed below.

General Note 1: General Note 1 of the Affiliate SRO Price Lists provides that a User that incurs co-location fees for a particular co-location service would not be subject to co-location fees for the same co-location service charged by the other Affiliate SROs. The wording of General Note 1 differs among the Affiliate SRO Price Lists both where it references the relevant price list or fee schedule and where it lists the relevant exchange's affiliates.[12]

The Exchange proposes to adopt the following General Note 1: [13]

A User that incurs co-location fees for a particular co-location service pursuant to this Fee Schedule shall not be subject to co-location fees for the same co-location service charged by the Exchange's affiliates the New York Stock Exchange LLC (NYSE), NYSE American LLC (NYSE American), NYSE Arca, Inc. (NYSE Arca) and NYSE National (NYSE National).

General Note 2: The Exchange proposes the same General Note 2 as in the Affiliate SRO Price Lists, setting forth the requirements for qualifying for a ''Partial Cabinet Solution'' bundle.[14] The proposed text is as follows:

To qualify for a Partial Cabinet Solution bundle, a User must meet the following conditions: (1) It must purchase only one Partial Cabinet

[12] For example, the NYSE Arca Options Fee Schedule provides that ''[a] User that incurs co-location fees for a particular co-location service pursuant to this *Fee Schedule* shall not be subject to co-location fees for the same co-location service charged pursuant to the *NYSE Arca Equities Fee Schedule* or by the Exchange's affiliates *NYSE American LLC (NYSE American), New York Stock Exchange LLC (NYSE) and NYSE National, Inc. (NYSE National)*'' (emphasis added) while the NYSE Price List provides that ''[a] User that incurs co-location fees for a particular co-location service pursuant to this *Price List* shall not be subject to co-location fees for the same co-location service charged by the Exchange's affiliates *NYSE American LLC (NYSE American) and NYSE Arca, Inc. (NYSE Arca), and NYSE National, Inc. (NYSE National).*'' (emphasis added) The Exchange's proposed text for General Note 1 is consistent with the wording of General Note 1 in the NYSE Price List, with the exception that it will use ''this Fee Schedule'' instead of ''this Price List.''

[13] The Exchange expects that each Affiliate SRO will submit a proposed rule change to update General Note 1 to include NYSE Chicago as a provider of co-location services and to remove the definition of NYSE Chicago from General Note 4.

[14] *See* Securities Exchange Act Release Nos. 77072 (February 5, 2016), 81 FR 7394 (February 11, 2016) (SR–NYSE–2015–53); 77071 (February 5, 2016), 81 FR 7382 (February 11, 2016) (SR–NYSEMKT–2015–89); and 77070 (February 5, 2016), 81 FR 7401 (February 11, 2016) (SR–NYSEArca–2015–102); and NYSE National Co-location Notice, *supra* note 6, at 26315.

Solution bundle; (2) the User and its Affiliates must not currently have a Partial Cabinet Solution bundle; and (3) after the purchase of the Partial Cabinet Solution bundle, the User, together with its Affiliates, will have an Aggregate Cabinet Footprint of no more than 2 kW.

- A User requesting a Partial Cabinet Solution bundle will be required to certify to the Exchange (a) whether any other Users or Hosted Customers are Affiliates of the certificating User, and (b) that after the purchase of the Partial Cabinet Solution bundle, the User, together with its Affiliates, would have an Aggregate Cabinet Footprint of no more than 2 kW. The certificating User will be required to inform the Exchange immediately of any event that causes another User or Hosted Customer to become an Affiliate. The Exchange shall review available information regarding the entities and may request additional information to verify the Affiliate status of a User or Hosted Customer. The Exchange shall approve a request for a Partial Cabinet Solution bundle unless it determines that the certification is not accurate.
- If a User that has purchased a Partial Cabinet Solution bundle becomes affiliated with one or more other Users or Hosted Customers and thereby no longer meets the conditions for access to the Partial Cabinet Solution bundle, or if the User otherwise ceases to meet the conditions for access to the Partial Cabinet Solution bundle, the Exchange will no longer offer it to such User and the User will be charged for each of the services individually, at the price for each such service set out in the Fee Schedule. Such price change would be effective as of the date that the User ceased to meet the conditions.

In addition, a User that changes its Partial Cabinet Solution bundle from one option to another will not be subject to a second initial charge, but will be required to pay the difference, if any, between the bundles' initial charges.

General Note 3: The Exchange proposes the same General Note 3 as in the Affiliate SRO Price Lists, setting forth the provisions relating to the use of a waitlist.[15] The proposed text is as follows:

The initial and monthly charge for 2 bundles of 24 cross connects will be waived for a User that is waitlisted for a cage for the duration of the waitlist period, provided that the cross connects may only be used to connect the User's non-contiguous cabinets. The charge will no longer be waived once a User is removed from the waitlist.

- If a waitlist is created, a User seeking a new cage will be placed on the waitlist based on the date a signed order for the cage is received.
- A User that turns down a cage because it is not the correct size will remain on the waitlist. A User that requests to be removed or that turns down a cage that is the size that it requested will be removed from the waitlist.
- A User that is removed from the waitlist but subsequently requests a cage will be added back to the bottom of the waitlist, provided that, if the User was removed from the waitlist because it turned down a cage that is the size that it requested, it will not receive a second waiver of the charge.

General Note 4: Proposed General Note 4 would establish that, when a User purchases access to the Liquidity Center Network (''LCN'') or the internet protocol (''IP'') network, the two local area networks available in the data center,[16] a User would receive (a) the ability to access the trading and execution systems of the Exchange and Affiliate SROs (''Exchange Systems'') as well as of Global OTC (the ''Global OTC System'') and (b) connectivity to any of the listed data products (''Included Data Products'') that it selects. The proposed General Note 4 would be the same as the General Note 4 in the Affiliate SRO Price Lists.[17]

The Exchange proposes to adopt the following General Note 4:

When a User purchases access to the LCN or IP network, it receives the ability to access the trading and execution systems of the NYSE, NYSE American, NYSE Arca, NYSE Chicago, Inc. (NYSE Chicago), and NYSE National (together, the Exchange Systems) as well as of Global OTC (the ''Global OTC System''), subject, in each case, to authorization by the NYSE, NYSE American, NYSE Arca, NYSE Chicago, NYSE National or Global OTC, as applicable. Such access includes access to the customer gateways that provide for order entry, order receipt (*i.e.* confirmation that an order has been received), receipt of drop copies and trade reporting (*i.e.* whether a trade is executed or cancelled), as well as for sending information to shared data services for clearing and settlement. A User can change the access it receives at any time, subject to authorization by NYSE, NYSE American, NYSE Arca, NYSE Chicago, NYSE National or Global OTC. NYSE, NYSE American, NYSE Arca, NYSE Chicago and NYSE National also offer access to Exchange Systems to their members, such that a User does not have to purchase access to the LCN or IP network to obtain access to Exchange Systems. Global OTC offers access to the Global OTC System to its subscribers, such that a User does not have to purchase access to the LCN or IP network to obtain access to the Global OTC System.

When a User purchases access to the LCN or IP network it receives connectivity to any of the Included Data Products that it selects, subject to any technical provisioning requirements and authorization from the provider of the data feed. Market data fees for the Included Data Products are charged by the provider of the data feed. A User can change the Included Data Products to which it receives connectivity at any time, subject to authorization from the provider of the data feed. The Exchange is not the exclusive method to connect to the Included Data Products.

The Included Data Products are as follows:

Cabinet-Related Fees

The Exchange proposes the same services and fees set forth in the Affiliate SRO Price Lists under ''Initial Fee per Cabinet''; ''Monthly Fee per Cabinet''; ''Cabinet Upgrade Fee''; ''PNU Cabinet''; and ''Cage Fees'' (collectively, the ''Cabinet-Related Fees'').

Initial Fee per Cabinet and Monthly Fee per Cabinet: As in the Affiliate SRO Price Lists, the Exchange proposes that, to house its servers and other equipment in the data center, a User have the option of an entire cabinet dedicated solely to that User (''dedicated cabinet'') or a partial cabinet alternative (''partial cabinet'').[18] Partial cabinets would be made available in increments of eight-rack units of space. Users would pay an initial fee and a monthly fee based on the number of kilowatts (''kW'').

Cabinet Upgrade Fee: Users that require additional power allocation may prefer to maintain their hardware within one of their existing cabinets rather than add an additional cabinet. Specifically, Users may develop their hardware infrastructure within a particular cabinet in such a way that, if expansion of such hardware is needed, it can be accomplished within the space constraints of that particular cabinet. If this type of User requires additional power allocation, it would likely want to modify its existing cabinet in this manner, rather than taking an additional dedicated cabinet due to the expense of re-developing its infrastructure within such additional dedicated cabinet. Accordingly, as in the Affiliate SRO Price Lists, the Exchange would offer Users the option of a ''Cabinet Upgrade'' and related fee, pursuant to which the Exchange would accommodate requests for additional power allocation beyond the typical amount that the Exchange allocates per dedicated cabinet, at which point the Exchange must upgrade the cabinet's power capacity.[19]

The Exchange notes that the Cabinet Upgrade Fees in the Affiliate SRO Price Lists have a parenthetical setting forth lower fees for a User that submitted a written order for a Cabinet Upgrade by January 31, 2014, provided that the Cabinet Upgrade became fully operational by March 31, 2014. Because a User that incurs co-location fees for a particular co-location service would not be subject to co-location fees for the same co-location service charged by the Affiliate SROs and such Users may already be subject to this different charge based on the Price List of an Affiliate SRO, the Exchange proposes to maintain the information regarding the lower price on its Fee Schedule.

PNU Fee: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users the option of an unused cabinet for which power is not utilized (''PNU cabinet'') and charge a monthly fee.[20] A User may wish to have a PNU cabinet it reserves for future use. Although PNU cabinets do not use power, when the Exchange establishes a PNU cabinet, it would include wiring, circuitry, and hardware and allocate kWs of unused power capacity. This would allow the PNU cabinet to be powered and used promptly upon the User's request.

Cage Fee: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users the use of cages to house their cabinets within the data center, with initial and monthly charges based on the size of the cage.[21] A cage would typically be purchased by a User that has several cabinets within the data center and that wishes to enhance privacy around its cabinets, *e.g.,* so that other Users cannot see what type of hardware is being utilized.

The Exchange proposes to add the following fees and language to its Fee Schedule:

Initial Fee per Cabinet	
Dedicated Cabinet	$5,000
8-Rack Unit of a Partial Cabinet	$2,500
Monthly Fee per Cabinet	
Dedicated Cabinet:	
Number of kWs	Per kW Fee Monthly
4–8	$1,200
9–20	$1,050
21–40	$950
41+	$900
8-Rack Unit of a Partial Cabinet:	
Number of kWs	Total Fee Monthly
1	$1,500
2	$2,700
Cabinet Upgrade Fee	
Dedicated Cabinet	$9,200 ($4,600 for a User that submitted a written order for a Cabinet Upgrade by January 31, 2014, provided that the Cabinet Upgrade became fully operational by March 31, 2014).

[18] *See* Securities Exchange Act Release Nos. 71122 (December 18, 2013), 78 FR 77739 (December 24, 2013) (SR–NYSE–2013–81); 71131 (December 18, 2013), 78 FR 77750 (December 24, 2013) (SR–NYSEMKT–2013–103); and 71130 (December 18, 2013), 78 FR 77765 (December 24, 2013) (SR–NYSEArca–2013–143) and NYSE National Co-location Notice, *supra* note 6, at 26316.

[20] *See* Securities Exchange Act Release Nos. 70913 (November 21, 2013), 78 FR 70987 (November 27, 2013 (SR–NYSE–2013–74); 70914 (November 21, 2013), 78 FR 71000 (November 27, 2013) (SR–NYSEMKT–2013–93); and 70916 (November 21, 2013), 78 FR 70989 (November 21, 2013) (SR–NYSEArca–2013–124) and NYSE National Co-location Notice, *supra* note 6, at 26316.

[21] *See* Securities Exchange Act Release Nos. 67666 (August 15, 2012), 77 FR 50742 (August 22, 2012) (SR–NYSE–2012–18); 67665 (August 15, 2012), 77 FR 50734 (August 22, 2012) (SR–NYSEMKT–2012–11); 67669 (August 15, 2012), 77 FR 50746 (August 22, 2012) (SR–NYSEArca–2012–62); and 67667 (August 15, 2012), 77 FR 50743 (August 22, 2012) (SR–NYSEArca–2012–63); and NYSE National Co-location Notice, *supra* note 6, at 26316.

PNU Cabinet	monthly charge of $360 per kW allocated to PNU Cabinet.
Cage Fees	
2–14 Cabinets	$5,000 initial charge plus $2,700 monthly charge.
15–28 Cabinets	$10,000 initial charge plus $4,100 monthly charge.
29+ Cabinets	$15,000 initial charge plus $5,500 monthly charge.

Access and Service Fees

The Exchange proposes to adopt the same services and fees set forth in the Affiliate SRO Price Lists under ''LCN Access''; ''Bundled Network Access''; ''Partial Cabinet Solution bundles''; ''IP Network Access''; ''Testing and Certification IP Network Access''; ''Wireless Connections for Third Party Data''; ''Virtual Control Circuit between two Users''; ''Hosting Fee''; ''Data Center Fiber Cross Connect''; ''Connection to Time Protocol Feed'' and ''Expedite Fee'' (collectively, the ''Access and Service Fees'').

LCN Access: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users the option to purchase 1 Gb, 10 Gb, 40 Gb, and 10 Gb LX LCN circuits, with initial and monthly charges.[22] As in the Affiliate SRO Price Lists, the Exchange proposes that a User that purchases five 10 Gb LCN connections would only be charged the initial fee for a sixth 10 Gb LCN connection and would not be charged the monthly fee that would otherwise be applicable. This would apply to a User that purchases six 10 Gb LCN connections at one time as well as to a User that purchases six 10 Gb LCN connections at separate times.[23]

Bundled Network Access: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users two ''Bundled Network Access'' options, with initial and monthly charges.[24] Both bundles would include two LCN connections, two IP network connections, and two optic connections to outside access centers. One bundle would have 1 Gb connections, and the other 10 Gb connections.

Partial Cabinet Solution Bundles: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users four ''Partial Cabinet Solution'' bundles.[25] Each Partial Cabinet Solution bundle option would include a one or two kW partial cabinet, one LCN connection, one IP network connection, two fiber cross connections, and connectivity to either the Network Time Protocol (''NTP'') or Precision Timing Protocol (''PTP'') time feed. The power of the partial cabinet and Gb of the network connections would vary by bundle.[26] A User and its Affiliates would be limited to one Partial Cabinet Solution bundle at a time, and must have an Aggregate Cabinet Footprint of 2 kW or less to qualify. As noted above, such requirements would be set forth in General Note 2.[27] Finally, a User purchasing a Partial Cabinet Solution bundle would be subject to a 90-day minimum commitment, after which period it would be subject to the 60-day rolling time period.

IP Network Access: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users the option to purchase 1 Gb, 10 Gb, and 40 Gb IP network circuits, with initial and monthly charges.[28]

Testing and Certification IP Network Access: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users access to an IP network circuit for testing and certification at no charge.[29] The circuit could only be used for testing and certification, and the testing and certification period would be limited to three months.

Wireless Connections for Third Party Data: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users a means to receive market data feeds from third party markets (''Wireless Third Party Data'') through a wireless connection, for an initial and monthly fee.[30] Fees would be subject to a 30-day testing period, during which the monthly charge per connection would be waived. The wireless connections would include the use of one port for connectivity to the Wireless Third Party Data. If a User that has more than one wireless connection wishes to use more than one port to connect to the Wireless Third Party Data, the Exchange proposes to make such additional ports available for a monthly fee per port.[31]

Virtual Control Circuit between two Users: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users ''Virtual Control Circuits'' (''VCCs'') between two Users for a monthly charge based on the size of the VCC. [32] VCCs are connections between two points over dedicated bandwidth using the IP network. A VCC is a two-way connection which the two participants can use for any purpose. The Exchange would bill the User requesting the VCC, but would not set up a VCC until the other User confirmed that it wishes to have the VCC set up.

Hosting Fee: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users a hosting service for a monthly fee per cabinet per Hosted Customer for each cabinet in which such Hosted Customer is hosted.[33] ''Hosting'' would be a service offered by a User to another entity in the User's

[22] *See* note 16, *supra.*

[24] *See* note 16, *supra.*

[25] *See* note 14, *supra;* Securities Exchange Act Release Nos. 84893 (December 20, 2018), 83 FR 67455 (December 28, 2018) (SR–NYSE–2018–63); 84925 (December 21, 2018), 83 FR 67754 (December 31, 2018) (SR–NYSEAmer–2018–55); 84893 (December 20, 2018), 83 FR 67455 (December 28, 2018) (SR–NYSEArca–2018–93); and 84895 (December 20, 2018), 83 FR 67405 (December 28, 2018) (SR–NYSENat–2018–26).

[26] The Affiliate SROs have filed to amend two of the Partial Cabinet Solution bundles by replacing the 10 Gb LCN connection with a LCN 10 Gb LX connection. According to the Affiliate SROs, the change is expected to become operative during the fourth quarter of 2019, and the implementation date will be announced through a customer notice. *See* Securities Exchange Act Release Nos. 86550 (August 1, 2019), 84 FR 38696 (August 7, 2019) (SR–NYSE–2019–41); 86548 (August 1, 2019), 84 FR 38704 (August 7, 2019) (SR–NYSEAmer–2019–28); 86547 (August 1, 2019), 84 FR 38708 (August 7, 2019) (SR–NYSEArca–2019–54); and 86549 (August 1, 2019), 84 FR 38700 (August 7, 2019) (SR–NYSENat–2019–17). The Exchange proposes to include notes to the Partial Cabinet Solution bundles in the Fee Schedule indicating the expected change.

[32] *See* Securities Exchange Act Release Nos. 80311 (March 24, 2017), 82 FR 15749 (March 30, 2017) (SR–NYSE–2016–45); 80309 (March 24, 2017), 82 FR 15725 (March 30, 2017) (SR–NYSEMKT–2016–63); and 80310 (March 24, 2017), 82 FR 15763 (March 30, 2017) (SR–NYSEArca–2016–89); and NYSE National Co-location Notice, *supra* note 6, at 26318.

[33] *See* note 6, *supra.*

space within the data center and could include, for example, a User supporting such other entity's technology, whether hardware or software, through the User's co-location space. A Hosting User would be required to be a User pursuant to the definition of User proposed above. Since only Users could be Hosting Users, a Hosted Customer would not be able to provide hosting services to any other entities in the space in which it is hosted.

Data Center Fiber Cross Connect: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users fiber cross connects for an initial and monthly charge.[34] A User would be able to use cross connects between its cabinets or between its cabinet(s) and the cabinets of separate Users within the data center. A cross connect would be used to connect cabinets of separate Users when, for example, a User receives technical support, order routing, and/or market data delivery services from another User in the data center. Cross connects may be bundled (*i.e.,* multiple cross connects within a single sheath) such that a single sheath can hold either one cross connect or several cross connects in multiples of six (*e.g.,* six or 12 cross connects). The Exchange is proposing fees for bundled cross connects that correspond to the number of cross connects in the bundle.

Connection to Time Protocol Feed: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users the option to purchase connectivity to one or more of three time feeds, with monthly and initial charges.[35] Each proposed time feed would provide a feed with the current time of day using one of three different time protocols: GPS Time Source, the Network Time Protocol Feed (''NTP''), and the Precision Time Protocol (''PTP''). Users may make use of time feeds to receive time and to synchronize clocks between computer systems or throughout a computer network, and time feeds may assist Users in other functions, including record keeping or measuring response times. Only the NTP and PTP time feeds would be available to partial cabinet Users, whereas dedicated cabinet Users would have access to all three time feeds. The NTP feed would only be available on the LCN.

Expedite Fee: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users the option to expedite the completion of co-location services purchased or ordered by the User, for which the Exchange would charge an ''Expedite Fee.'' [36]

The Exchange proposes to add the following fees and language to its Fee Schedule:

Type of service	Description	Amount of charge
LCN Access	1 Gb Circuit	$6,000 per connection initial charge plus $5,000 monthly per connection.
LCN Access	10 Gb Circuit	$10,000 per connection initial charge plus $14,000 monthly per connection. A User that purchases 5 10 GB LCN Circuits will receive the 6th 10 GB LCN Circuit without an additional monthly charge.
LCN Access	10 Gb LX Circuit	$15,000 per connection initial charge plus $22,000 monthly per connection.
LCN Access	40 Gb Circuit	$15,000 per connection initial charge plus $22,000 monthly per connection.
Bundled Network Access (2 LCN connections, 2 IP network connections, and 2 optic connections to outside access center).	1 Gb Bundle	$25,000 initial charge plus $13,000 monthly charge.
	10 Gb Bundle	$50,000 initial charge plus $53,000 monthly charge.
Partial Cabinet Solution bundles Note: A User and its Affiliates are limited to one Partial Cabinet Solution bundle at a time. A User and its Affiliates must have an Aggregate Cabinet Footprint of 2 kW or less to qualify for a Partial Cabinet Solution bundle. See Note 2 under ''General Notes.''.	Option A: 1 kW partial cabinet, 1 LCN connection (1 Gb), 1 IP network connection (1 Gb), 2 fiber cross connections and either the Network Time Protocol Feed or Precision Timing Protocol.	$7,500 initial charge per bundle plus monthly charge per bundle as follows: • For Users that order on or before December 31, 2019: $3,000 monthly for first 24 months of service, and $6,000 monthly thereafter. • For Users that order after December 31, 2019: $6,000 monthly.
	Option B: 2 kW partial cabinet, 1 LCN connection (1 Gb), 1 IP network connection (1 Gb), 2 fiber cross connections and either the Network Time Protocol Feed or Precision Timing Protocol.	$7,500 initial charge per bundle plus monthly charge per bundle as follows: • For Users that order on or before December 31, 2019: $3,500 monthly for first 24 months of service, and $7,000 monthly thereafter. • For Users that order after December 31, 2019: $7,000 monthly.

[34] *See* note 21, *supra.*

[35] *See* note 14, *supra.*

[36] *See* note 21, *supra.*

Type of service	Description	Amount of charge
	Option C: 1 kW partial cabinet, 1 LCN connection (10 Gb),* 1 IP network connection (10 Gb), 2 fiber cross connections and either the Network Time Protocol Feed or Precision Timing Protocol. * The LCN connection (10 Gb) will be replaced with an LCN connection (10 Gb LX) on a date to be announced by customer notice, expected to be during the fourth quarter of 2019.	$10,000 initial charge per bundle plus monthly charge per bundle as follows: • For Users that order on or before December 31, 2019: $7,000 monthly for first 24 months of service, and $14,000 monthly thereafter. • For Users that order after December 31, 2019: $14,000 monthly. $10,000 initial charge per bundle plus monthly charge per bundle as follows: • For Users that order on or before December 31, 2019: $7,000 monthly for first 24 months of service, and $14,000 monthly thereafter. • For Users that order after December 31, 2019: $14,000 monthly.
	Option D: 2 kW partial cabinet, 1 LCN connection (10 Gb),* 1 IP network connection (10 Gb), 2 fiber cross connections and either the Network Time Protocol Feed or Precision Timing Protocol. * The LCN connection (10 Gb) will be replaced with an LCN connection (10 Gb LX) on a date to be announced by customer notice, expected to be during the fourth quarter of 2019.	$10,000 initial charge per bundle plus monthly charge per bundle as follows: • For Users that order on or before December 31, 2019: $7,500 monthly for first 24 months of service, and $15,000 monthly thereafter. • For Users that order after December 31, 2019: $15,000 monthly.
IP Network Access	1 Gb Circuit	$2,500 per connection initial charge plus $2,500 monthly per connection.
IP Network Access	10 Gb Circuit	$10,000 per connection initial charge plus $11,000 monthly per connection.
IP Network Access	40 Gb Circuit	$10,000 per connection initial charge plus $18,000 monthly per connection.
Testing and certification IP Network Access	IP network circuit for testing and certification. Circuit can only be used for testing and certification and testing and certification period is limited to three months.	No charge.
Wireless Connection for Third Party Data	Wireless connection of Cboe Pitch BZX Gig shaped data and Cboe Pitch BYX Gig shaped data.	$5,000 per connection initial charge plus monthly charge per connection of $6,000. Fees are subject to a 30-day testing period, during which the monthly charge per connection is waived.
Wireless Connection for Third Party Data	Wireless connection of Cboe EDGX Gig shaped data and Cboe EDGA Gig shaped data.	$5,000 per connection initial charge plus monthly charge per connection of $6,000. Fees are subject to a 30-day testing period, during which the monthly charge per connection is waived.
Wireless Connection for Third Party Data	Wireless connection of NASDAQ Totalview-ITCH data.	$5,000 per connection initial charge plus monthly charge per connection of $8,500. Fees are subject to a 30-day testing period, during which the monthly charge per connection is waived.
Wireless Connection for Third Party Data	Wireless connection of NASDAQ BX Totalview-ITCH data.	$5,000 per connection initial charge plus monthly charge per connection of $6,000. Fees are subject to a 30-day testing period, during which the monthly charge per connection is waived.
Wireless Connection for Third Party Data	Wireless connection of NASDAQ Totalview Ultra (FPGA).	$5,000 per connection initial charge plus monthly charge per connection of $11,000. Fees are subject to a 30-day testing period, during which the monthly charge per connection is waived.
Wireless Connection for Third Party Data	Wireless connection of NASDAQ Totalview-ITCH and BX Totalview-ITCH data.	$5,000 per connection initial charge plus monthly charge per connection of $12,000. Fees are subject to a 30-day testing period, during which the monthly charge per connection is waived.
Wireless Connection for Third Party Data	Wireless connection of NASDAQ Totalview Ultra (FPGA) and BX Totalview-ITCH data.	$5,000 per connection initial charge plus monthly charge per connection of $14,500. Fees are subject to a 30-day testing period, during which the monthly charge per connection is waived.
Wireless Connection for Third Party Data	Wireless connection of Toronto Stock Exchange (TSX).	$5,000 per connection initial charge plus monthly charge per connection of $8,500.

Type of service	Description	Amount of charge
		Fees are subject to a 30-day testing period, during which the monthly charge per connection is waived.
Wireless Connection for Third Party Data	Port for wireless connection	$3,000 monthly charge per port, excluding first port.
Virtual Control Circuit between two Users	1Mb	$200 monthly charge.
	3Mb	$400 monthly charge.
	5Mb	$500 monthly charge.
	10Mb	$800 monthly charge.
	25Mb	$1,200 monthly charge.
	50Mb	$1,800 monthly charge.
	100Mb	$2,500 monthly charge.
Hosting Fee		$1,000 monthly charge per cabinet per Hosted Customer for each cabinet in which such Hosted Customer is hosted.
Data Center Fiber Cross Connect	Furnish and install 1 cross connect	$500 initial charge plus $600 monthly charge.
	Furnish and install bundle of 6 cross connects	$500 initial charge plus $1,800 monthly charge.
	Furnish and install bundle of 12 cross connects.	$500 initial charge plus $3,000 monthly charge.
	Furnish and install bundle of 18 cross connects.	$500 initial charge plus $3,840 monthly charge.
	Furnish and install bundle of 24 cross connects.	$500 initial charge plus $4,680 monthly charge See General Note 3.
Connection to Time Protocol Feed	Network Time Protocol Feed (Note: LCN only)	$300 initial charge plus $100 monthly charge.
	Precision Time Protocol	$1,000 initial charge plus $250 monthly charge.
	GPS Time Source (Note: dedicated cabinets only).	$3,000 initial charge plus $400 monthly charge.
Expedite Fee	Expedited installation/completion of a User's co-location service.	$4,000 per request.

Service-Related Fees

The Exchange proposes to adopt the same services and fees set forth in the Affiliate SRO Price Lists under ''Change Fee''; ''Initial Install Services''; ''Hot Hands Service''; ''Shipping and Receiving''; ''Badge Request''; ''External Cabinet Cable Tray''; ''Custom External Cabinet Cable Tray'' and ''Visitor Security Escort'' (collectively, the ''Service-related Fees'') and related note, as follows.

Change Fee: As in the Affiliate SRO Price Lists, the Exchange proposes to charge a User a ''Change Fee'' if the User requests a change to one or more existing co-location services that the Exchange has already established or completed for the User.[37] The Change Fee would be charged per order. If a User ordered two or more services at one time (for example, through submitting an order form requesting multiple services) the User would be charged a one-time Change Fee, which would cover the multiple services.

Initial Install Services: As in the Affiliate SRO Price Lists, the Exchange proposes to charge a User an ''Initial Install Services'' fee for the installation of a dedicated or partial cabinet.[38] The proposed fee would be lower for a partial cabinet. The Initial Install Services fee would include initial racking of equipment in the cabinet, provision of cables and labor. The number of hours would depend on whether the cabinet was partial or dedicated.

Hot Hands Service: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users a ''Hot Hands'' service, which would allow Users to use on-site data center personnel to maintain User equipment, support network troubleshooting, rack and stack a server in a User's cabinet; power recycling; and install and document the fitting of cable in a User's cabinet(s).[39] The Hot Hands fee would be charged per half hour.

Shipping and Receiving: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users shipping and receiving services, with a per shipment fee for the receipt of one shipment of goods at the data center from the User or supplier.[40]

Badge Request: As in the Affiliate SRO Price Lists, the Exchange proposes to offer Users the option to obtain a permanent data center site access badge for a User representative. [41]

External Cabinet Cable Tray: As in the Affiliate SRO Price Lists, the Exchange proposes to offer to engineer, furnish and install a Rittal 5″H x 12″W cable tray on a cabinet for a flat fee per tray.[42]

Custom External Cabinet Cable Tray: As in the Affiliate SRO Price Lists, the Exchange proposes to offer to engineer, furnish and install 4″ H x 24″ W custom basket cable tray above a client's cabinet rows for a fee per linear foot. [43]

Visitor Security Escort: As in the Affiliate SRO Price Lists, the Exchange proposes that User representatives be required to be accompanied by a visitor security escort during visits to the data center, unless visiting the User's cage. A fee per visit would be charged.[44] The proposed requirement would include User representatives who have a permanent data center site access badge.

In order to be able to meet its obligation to accommodate demand, and in particular to make available more contiguous, larger spaces for new and existing Users, if necessary, the Exchange would exercise its right to move some Users' equipment within the

[42] *Id.*

[43] *Id.*

[44] *See* note 15, *supra.*

data center (''Migration''). To manage the process for a future Migration, the Exchange proposes to put the same Migration procedures in place as the Affiliate SROs, as follow:[45]

- First, the Exchange would identify Users that would be required to move in the Migration based on (a) the current location of the User and its current equipment and power requirements and (b) the availability of another location in the Data Center that would accommodate the equipment and power requirements for which such User currently subscribes. No User would be required to move more than once within any 12-month period.
- Second, the Exchange would notify a User in writing (the ''Notice'') that the User's equipment and network connections in the Data Center were to be moved as part of the Migration. The Notice would identify the 90-day period during which the User must move its equipment, which period would commence at least 60 days from the date of the Notice. The exact date or dates for the move for each User would be agreed upon between the User and the Exchange. If a move date or dates cannot be agreed on, the Exchange would schedule the move for a date or dates no later than 180 days after the date of the Notice.
- Third, each User's move would be facilitated by the Exchange in cooperation with the User, including the un-racking and re-racking of all of the User's equipment, and the re-installation of the User's networking connections, and the Exchange would make reasonable efforts to ensure that the moves take place outside of the Exchange's hours for business.
- Fourth, in connection with facilitating each User's move, the Exchange proposes to waive certain fees. Specifically, the Exchange proposes to waive:
  - The monthly recurring fees for the User's existing space, based on the rate of the monthly recurring fees that the User is paying as of the date of the Notice, for the month during which the User's move takes place. This waiver of the monthly recurring fees would mean that the User would not incur these fees for the period of overlapping use of the equipment and services in the old and the new locations, as long as the move is completed within one month.
  - all Service-Related Fees that the User would incur if such a move were to take place at a User's request with respect to the User's existing services and equipment.
  - for the month following the completion of a User's move, the monthly recurring charges for that User, based on the rate of the monthly recurring fees that the User is paying as of the date of the Notice, in consideration for the Migration.

The Exchange proposes to add a note to each Service-Related Fee outlining the Migration process, as in the Affiliate SRO Price Lists.[46] The Exchange proposes to add the following fees and note to its Fee Schedule:

Type of service	Description	Amount of charge
Change Fee ***	Change to a co-location service that has already been installed/completed for a User.	$950 per request.
Initial Install Services *** (Required per cabinet).	Dedicated Cabinet: Includes initial racking of equipment in cabinet and provision of cables (4 hrs)..	$800 per dedicated cabinet.
	Partial Cabinet: Includes initial racking of equipment in cabinet and provision of cables (2 hrs)..	$400 per eight-rack unit in a partial cabinet.
Hot Hands Service ***	Allows Users to use on-site data center personnel to maintain User equipment, support network troubleshooting, rack and stack, power recycling, and install and document cable..	$100 per half hour.
Shipping and Receiving ***	Receipt of one shipment of goods at data center from User/supplier. Includes coordination of shipping and receiving..	$100 per shipment.
Badge Request ***	Request for provision of a permanent data center site access badge for a User representative..	$50 per badge.
External Cabinet Cable Tray ***	Engineer, furnish and install Rittal 5''H x 12''W cable tray on cabinet.	$400 per tray.
Custom External Cabinet Cable Tray ***.	Engineer, furnish and install 4'' H x 24'' W custom basket cable tray above client's cabinet rows..	$100 per linear foot.
Visitor Security Escort ***	All User representatives are required to be accompanied by a visitor security escort during visits to the data center, unless visiting the User's cage. Requirement includes User representatives who have a permanent data center site access badge..	$75 per visit.

*** These fees are waived for the move of a User's equipment within the Data Center when incurred in connection with such a move required by the Exchange (''Migration Move''). A User selected by the Exchange for a Migration Move will receive written notice (the ''Notice''). The Notice will identify the 90-day period during which a User must move its equipment, which period would commence at least 60 days from the date of the Notice. Monthly recurring fees for the User's existing space based on the rate of the monthly recurring fees that the User was paying as of the date of the Notice are also waived for the month during which a User's Migration Move takes place, so the User would not incur these fees for the period of overlapping use of equipment and services in the old and new locations. In addition, the monthly recurring charges are waived for the month following the completion of a User's Migration Move, based on the rate of the monthly recurring fees that the User was paying as of the date of the Notice. No User will be required to move more than once within any 12-month period.

Connectivity to Third Party Systems, Data Feeds, Testing and Certification Feeds, and DTCC

The Exchange proposes to adopt the same services and fees set forth in the Affiliate SRO Price Lists under ''Connectivity to Third Party Systems, Data Feeds, Testing and Certification Feeds, and DTCC.''[47]

Connectivity to Third Party Systems: As in the Affiliate SRO Price Lists, the Exchange proposes to provide that Users may obtain access to the trading and execution services of Third Party markets and other content service providers (''Third Party Systems'') of multiple third party markets and other

[45] *See* Securities Exchange Act Release Nos. 76269 (October 26, 2015), 80 FR 66942 (October 30, 2015) (SR–NYSE–2015–42); 76268 (October 26, 2015), 80 FR 66944 (October 30, 2015) (SR–NYSEMKT–2015–70); and 76270 (October 26, 2015), 80 FR 66958 (October 30, 2015) (SR–NYSEArca–2015–85); and NYSE National Co-location Notice, *supra* note 6, at 26321.

[46] The Exchange notes that, while the other Affiliate SRO Price Lists use three asterisks to identify the Service-Related Fees and the corresponding note, the NYSE Amex Options Fee Schedule uses the numeral ''1''. The Exchange proposes to use three asterisks.

[47] *See* note 32, *supra.*

content service providers for a fee.[48] Users would connect to Third Party Systems over the IP network.

In order to obtain access to a Third Party System, a User would enter into an agreement with the relevant third party content service provider, pursuant to which the third party content service provider would charge the User for access to the Third Party System. The Exchange would then establish a unicast connection between the User and the relevant third party content service provider over the IP network. The Exchange would charge the User for the connectivity to the Third Party System. A User would only receive, and would only be charged for, access to Third Party Systems for which it enters into agreements with the third party content service provider.

With the exception of the ICE feed, the Exchange would have no ownership interest in the Third Party Systems. Establishing a User's access to a Third Party System would not give the Exchange any right to use the Third Party Systems. Connectivity to a Third Party System would not provide access or order entry to the Exchange's execution system, and a User's connection to a Third Party System would not be through the Exchange's execution system.

The Exchange would charge a monthly recurring fee for connectivity to a Third Party System. Specifically, when a User requested access to a Third Party System, it would identify the applicable third party market or other content service provider and what bandwidth connection it required.

The Exchange proposes to add the following fees and language to its Fee Schedule:

Connectivity to Third Party Systems

Pricing for access to the execution systems of third party markets and other service providers (Third Party Systems) is for connectivity only. Connectivity to Third Party Systems is subject to any technical provisioning requirements and authorization from the provider of the data feed. Connectivity to Third Party Systems is over the IP network. Any applicable fees are charged independently by the relevant third party content service provider. The Exchange is not the exclusive method to connect to Third Party Systems.

Connectivity to Third Party Data Feeds: As in the Affiliate SRO Price Lists, the Exchange proposes to provide that Users may obtain connectivity to data feeds from third party markets and other content service providers (''Third Party Data Feeds'') for a fee.[49] The Exchange would receive Third Party Data Feeds from multiple national securities exchanges and other content service providers at its data center. It would then provide connectivity to that data to Users for a fee. With the exceptions of Global OTC and ICE Data Global Index, Users would connect to Third Party Data Feeds over the IP network.

In order to connect to a Third Party Data Feed, a User would enter into a contract with the relevant third party market or other content service provider, pursuant to which the content service provider would charge the User for the Third Party Data Feed. The Exchange would receive the Third Party Data Feed over its fiber optic network and, after the data provider and User enter into the contract and the Exchange receives authorization from the data provider, the Exchange would re-transmit the data to the User over the User's port. The Exchange would charge the User for the connectivity to the Third Party Data Feed. A User would only receive, and would only be charged for, connectivity to the Third Party Data Feeds for which it entered into contracts.

[49] *Id.*

With the exception of the ICE Data Services, ICE and Global OTC feeds, the Exchange would have no affiliation with the sellers of the Third Party Data Feeds. It would have no right to use the Third Party Data Feeds other than as a redistributor of the data. The Third Party Data Feeds would not provide access or order entry to the Exchange's execution system. With the exception of the ICE feeds, the Third Party Data Feeds would not provide access or order entry to the execution systems of the third party generating the feed. The Exchange would receive Third Party Data Feeds via arms-length agreements and would have no inherent advantage over any other distributor of such data.

The Exchange would charge a monthly recurring fee for connectivity to each Third Party Data Feed. The monthly recurring fee would be per Third Party Data Feed, with the exception that the monthly recurring fee for the ICE Data Services Consolidated Feeds (including the ICE Data Services Consolidated FeedsShared Farm feeds), SR Labs–SuperFeeds and MSCI feeds would vary by the bandwidth of the connection. Depending on its needs and bandwidth, a User may opt to receive all or some of the feeds or services included in a Third Party Data Feed.

Third Party Data Feed providers may charge redistribution fees. The Exchange proposes that, when it receives a redistribution fee, it pass through the charge to the User, without change to the fee. The fee would be labeled as a pass-through of a redistribution fee on the User's invoice. As in the Affiliate SRO Price Lists, the Exchange proposes to add language to the Fee Schedule accordingly.

The Exchange proposes that it not charge Users that are third party markets or content providers for connectivity to their own feeds, as it understands that such parties generally receive their own feeds for purposes of diagnostics and testing. As in the Affiliate SRO Price Lists, the Exchange proposes to add language to the Fee Schedule accordingly.

The Exchange proposes to add the following fees and language to its Fee Schedule:

Connectivity to Third Party Data Feeds

Pricing for data feeds from third party markets and other content service providers (Third Party Data Feeds) is for connectivity only. Connectivity to Third Party Data Feeds is subject to any technical provisioning requirements and authorization from the provider of the data feed. Connectivity to Third Party Data Fees is over the IP network, with the exception that Users can connect to Global OTC and ICE Data Global Index over the IP network or LCN. Market data fees are charged independently by the relevant third party market or content service provider. The Exchange is not the exclusive method to connect to Third Party Data Feeds.

Third Party Data Feed providers may charge redistribution fees. When the Exchange receives a redistribution fee, it passes through the charge to the User, without change to the fee. The fee is labeled as a pass-through of a redistribution fee on the User's invoice. The Exchange does not charge third party markets or content providers for connectivity to their own feeds.

TMX Group	2,500

Connectivity to Third Party Testing and Certification Feeds: As in the Affiliate SRO Price Lists, the Exchange proposes to provide that Users may obtain connectivity to third party testing and certification feeds.[50] Certification feeds would be used to certify that a User conforms to any of the relevant content service provider's requirements for accessing Third Party Systems or receiving Third Party Data, while testing feeds would provide Users an environment in which to conduct tests with non-live data. Such feeds, which would solely be used for certification and testing and do not carry live production data, would be available over the IP network.

The Exchange proposes to add the following fees and language to its Fee Schedule:

[50] *Id.*

Connectivity to Third Party Testing and Certification Feeds

The Exchange provides connectivity to third party testing and certification feeds provided by third party markets and other content service providers. Pricing for third party testing and certification feeds is for connectivity only. Connectivity to third party testing and certification feeds is subject to any technical provisioning requirements and authorization from the provider of the data feed. Connectivity to third party testing and certification feeds is over the IP network. Any applicable fees are charged independently by the relevant third party market or content service provider. The Exchange is not the exclusive method to connect to third party testing and certification feeds.

Connectivity to third party certification and testing feeds.	$100 monthly recurring fee per feed.

Connectivity to DTCC: As in the Affiliate SRO Price Lists, the Exchange proposes to provide Users connectivity to Depository Trust & Clearing Corporation (''DTCC'') for clearing, fund transfer, insurance, and settlement services.[51]

In order to connect to DTCC, a User would enter into a contract with DTCC, pursuant to which DTCC would charge the User for the services provided. The Exchange would receive the DTCC feed over its fiber optic network and, after DTCC and the User entered into the services contract and the Exchange received authorization from DTCC, the Exchange would provide connectivity to DTCC to the User over the User's IP network port. The Exchange would charge the User for the connectivity to DTCC.

Connectivity to DTCC would not provide access or order entry to the Exchange's execution system, and a User's connection to DTCC would not be through the Exchange's execution system.

The Exchange proposes to add the following fees and language to its Fee Schedule:

Connectivity to DTCC

Pricing for connectivity to DTCC feeds is for connectivity only. Connectivity to DTCC feeds is subject to any technical provisioning requirements and authorization from DTCC. Connectivity to DTCC feeds is over the IP network. Any applicable fees are charged independently by DTCC. The Exchange is not the exclusive method to connect to DTCC feeds.

5 Mb connection to DTCC.	$500 monthly recurring fee.
50 Mb connection to DTCC.	$2,500 monthly recurring fee.

Application of Proposed Change

As noted above, none of the proposed services and fees are new or novel. Current Users would not incur any new fees and the Exchange does not expect to attract any new Users as a result of the proposed change, for the following reasons.

First, as stated in the proposed Fee Schedule, a User that incurs co-location fees for a particular co-location service would not be subject to fees for the same service charged by the Affiliate SROs.[52] In other words, even though all four Affiliate SROs and the Exchange would offer co-location services, a User that purchased services would only be charged once. This would be true irrespective of whether the User were a member of all, some, or none of the Affiliate SROs and the Exchange.

Second, the Exchange expects that a current User that starts to trade on the Exchange or connect to its market data as a result of the proposed change would not incur any new fees. Access to trade on the Exchange and connectivity to its data products comes with connections to the local area networks in the data center for no additional fee[53]—and Users that trade or connect to market data would already have a connection to the local area networks, either directly or through another User.

Third, the Exchange does not expect any market participants to become Users in order to connect to the Exchange's data feed. Under the proposed change any authorized User would be able to obtain a lower latency connection to the Exchange's data feeds. However, in the first eight months of 2019, the Exchange averaged less than 0.6% market share of executed volume of non-auction equity trading.[54] Given the small volume of trades on the Exchange and the fact that the NMS feeds include NYSE Chicago data, the Exchange does not believe that a lower latency connection to Exchange data would be sufficient reason for a firm to become a User.

Finally, the Exchange believes that, as a practical matter, only Participants[55] would be interested in becoming new Users in order to trade on the Exchange, as non-Participants cannot trade on the Exchange. The pool of relevant Participants is small: Only nine Participants are not also members of one or more of the Affiliate SROs.[56] Of those nine Participants, two are already Users, and therefore, as explained above, would not be subject to any new or different fees as a result of this filing. The Exchange does not expect that any of the remaining seven Participants would opt to become Users in order to trade on the Exchange.[57] Simply put, the Exchange does not expect that low latency access to such a small market would be sufficient reason for a firm to become a User.

The proposed change is not targeted at, or expected to be limited in applicability to, a specific segment of market participant, as co-location is available to any market participant that wishes to be a User. If, contrary to the Exchange's beliefs, a market participant elects to co-locate in response to the proposed change, that new User would be subject to the same fees as all other Users—the same fees it would be subject to today, irrespective of what type or size of market participant it is.

[51] *Id.*

[52] Co-location fees already work in this manner. *See* Securities Exchange Act Release Nos. 70206 (August 15, 2013), 78 FR 51765 (August 21, 2013) (SR–NYSE–2013–59); 70176 (August 13, 2013), 78 FR 50471 (August 19, 2013) (SR–NYSEMKT–2013–67); and 70173 (August 13, 2013), 78 FR 50459 (August 19, 2013) (SR–NYSEArca–2013–80); and NYSE National Co-location Notice, *supra* note 6, at 26314.

[53] *See* 84 FR 10152, 84 FR 10164, 84 FR 10159, and 84 FR 10154, *supra* note 17.

[54] Based on Cboe U.S. Equities Market Volume Summary, the Exchange's market share of intraday trading (excluding auctions) for the months of January 2019, February 2019, March 2019, April 2019, May 2019, June 2019, July 2019 and August 2019 was 0.52%, 0.52%, 0.56%, 0.50%, 0.50%, 0.48%, 0.46% and 0.43%, respectively. *See http://markets.cboe.com/us/equities/market_share/.*

[55] A ''Participant'' is, except as otherwise described in the Rules of the Exchange, ''any Participant Firm that holds a valid Trading Permit and any person associated with a Participant Firm who is registered with the Exchange under Articles 16 and 17 as a Market Maker Authorized Trader or Institutional Broker Representative, respectively.'' Article I, Rule 1(s). A Participant is considered a ''member'' of the Exchange for purposes of the Act. ''Institutional Broker'' means a member of the Exchange who is registered as an Institutional Broker pursuant to the provisions of Article 17 and has satisfied all Exchange requirements to operate as an Institutional Broker on the Exchange. Article 1, Rule 1(n). *See* 84 FR 44654, note 6, *supra,* at notes 7 and 11.

[56] The other Participants are a member of one or more of the Affiliate SROs. The Exchange believes that if such a Participant's business model required co-location, that Participant would already be co-located, given its membership in one or more Affiliate SROs.

[57] The seven Participants are all either Institutional Brokers or trade through a third party clearing firm. Institutional Brokers' usage of the Exchange is largely conducted in a non-automated fashion through manual tools such as the Exchange's Brokerplex interface. *See* Article 17, Rule 3, Interpretations and Policies .01 (''Institutional Brokers essentially are order-entry firms that act primarily as brokers for other broker-dealers or institutional customers''); and 84 FR 44654, note 6, *supra,* at 44661–44662 and 44666. The remaining Participants trade through a third party, which increases latency, suggesting that co-location is not a priority for their business model. For these reasons, the Exchange does not expect the seven Participants to opt to become Users in order to trade on the Exchange.

As with the Affiliate SROs' co-location services, Users that receive co-location services from the Exchange would not receive any means of access to the Exchange's trading and execution systems that is separate from or superior to that of Users that do not receive co-location services.[58] All orders sent to the Exchange would enter the Exchange's trading and execution systems through the same order gateway regardless of whether the sender is co-located in the Exchange's data center or not. In addition, co-located Users would not receive any market data or data service product that is not available to all Users. However, Users that receive co-location services normally would expect reduced latencies in sending orders to the Exchange and receiving market data from the Exchange.

As with the co-location services of the Affiliate SROs, (i) neither a User nor any of the User's customers would be permitted to submit orders directly to the Exchange unless such User or customer is a member organization, a Sponsored Participant or an agent thereof (*e.g.,* a service bureau providing order entry services); (ii) use of the proposed co-location services would be completely voluntary and available to all Users on a non-discriminatory basis; and (iii) a User would only incur one charge for the particular co-location service described herein, regardless of whether the User connects only to the Exchange or to the Exchange and one or more of the Affiliate SROs.[59]

The proposed changes are not otherwise intended to address any other issues, and the Exchange is not aware of any problems that member organizations would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[60] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[61] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. In addition, it is designed to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Proposed Rule Change Is Reasonable

The Exchange believes that the proposed rule change is reasonable for the following reasons.

As noted above, the Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [62]

With respect to co-location, the Exchange operates in a highly competitive market in which exchanges offer co-location services as a means to facilitate the trading and other market activities of those market participants who believe that co-location enhances the efficiency of their operations. Accordingly, fees charged for co-location services would be constrained by the active competition for the order flow of, and other business from, such market participants. If a particular exchange charges excessive fees for colocation services, affected market participants will opt to terminate their colocation arrangements with that exchange, and adopt a possible range of alternative strategies, including placing their servers in a physically proximate location outside the exchange's data center (which could be a competing exchange), or pursuing strategies less dependent upon the lower exchange-to-participant latency associated with co-location. Accordingly, the exchange charging excessive fees would stand to lose not only co-location revenues but also the liquidity of the formerly co-located trading firms, which could have additional follow-on effects on the market share and revenue of the affected exchange.

Importantly, with respect to co-location services and fees, all market participants can be Users, irrespective of whether or not they are Participants or members of any of the Affiliate SROs.[63] In addition, the proposed changes are neither new nor novel, as the Exchange proposes to adopt the same services and fees set forth in the Affiliate SRO Price Lists, with the non-substantive differences described above. As a result, the proposed rule change would simply offer market participants the same services and fees to which they already have access. The sole substantive change that would result from the Exchange offering co-location services would be that Users would be able to have low latency connections to the Exchange. In other words, the sole change would be a benefit to market participants, with no change in the related costs. If the proposed rule change is not operative, the Exchange will not offer co-location, and market participants will not be able to receive that benefit.

In addition, the Exchange believes that the proposed rule change is reasonable because, for the reasons discussed above, current Users would not incur any new fees and the Exchange does not expect to attract any new Users as a result of the proposed change. Even though all four Affiliate SROs and the Exchange would offer co-location services, a User that purchased services would only be charged once. This would be true irrespective of whether the User were a member of all, some, or none of the Affiliate SROs and the Exchange. As noted above, the Exchange expects that a current User that starts to trade on the Exchange or connects to its market data as a result of the proposed change would not incur any new fees. With respect to market participants that are not current Users, the Exchange does not expect any of them to become Users in order to connect to the Exchange's data feed or trade on the Exchange.

The Exchange believes that the proposed co-location services and fees are reasonable because under the proposed change the Exchange would provide market participants with the option to co-locate, but would not require it. The co-location services, including various options for cabinets, LCN and IP network access, connectivity to Included Data Products, Third Party Data Feeds, third party testing and certification feeds, DTCC and Wireless Third Party Data (collectively, ''Connectivity''), access to Exchange Systems and Third Party Systems (together, ''Access''), hosting, and services, would be provided as conveniences to Users.

[58] *See* note 52, *supra.*

[59] *Id.*

[60] 15 U.S.C. 78f(b).

[61] 15 U.S.C. 78f(b)(4) and (5).

[62] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

[63] *See* note 6, *supra.*

As is true now, use of any co-location service would be completely voluntary, and each market participant would be able to determine whether to use co-location services based on the requirements of its business operations. If it chose to co-locate, it would be able to determine what size of cabinet, form, and latency of network, would best suit its needs. Users would not be required to use any of their bandwidth for Access or Connectivity unless they wished to do so. Rather, a User would only receive the services it selected, and a User could change what services it receives at any time, subject, in the case of Access and Connectivity, to authorization from the relevant third party system or data provider, Affiliate SRO or the Exchange.

As alternatives to using co-location, a market participant would be able to access or connect to Exchange Systems, Third Party Systems, Included Data Products, Third Party Data Feeds, third party testing and certification feeds, DTCC and Wireless Third Party Data through a Hosting User or a connection to an Exchange access center outside the data center, third party access center, or third party vendor. The market participant could make such connection through a third party telecommunication provider, third party wireless network, the Secure Financial Transaction Infrastructure (''SFTI'') network, or a combination thereof.

The proposed Fee Schedule would set forth: (a) The relevant definitions and General Notes, including a detailed description of the Access and Connectivity Users receive with their purchase of access to the LCN or IP network; (b) the Cabinet-Related Fees; (c) the Access and Service Fees; (d) the Service-related Fees; (e) a description of the Migration; and (f) information regarding connectivity to Third Party Systems, Third Party Data Feeds, third party testing and certification feeds, and DTCC. Such Fee Schedule text would make the description of co-location services and fees accessible and transparent, providing market participants with clarity as to what services were offered within co-location and what the related fees would be.

The Exchange believes that charging distinct fees for different co-location services would be reasonable because not all Users would need, or wish, to utilize the same co-location services. The proposed variety of services would allow Users to select which co-location services to use, based on their business needs, and Users would only be charged for the services that they selected. By charging only those Users that utilize a co-location service the related fee, those Users that directly benefit from a service would support its cost.

Similarly, the Exchange believes the proposed fees are reasonable because they would allow the Exchange to defray or cover the costs associated with offering different co-location services while providing Users the benefit of such services, including the benefits of, among other things, choosing among the array of different options for cabinets, power, LCN and IP network access, Connectivity, Access, hosting and services; having an efficient connection to clearing, fund transfer, insurance, and settlement services; and having an environment in which to conduct tests with nonlive data and to certify conformance to any applicable technical requirements.

The Exchange believes that the proposed charges are reasonable because the Exchange would offer co-location services as conveniences to Users, but in order to do so would have to provide, maintain and operate the data center facility hardware and technology infrastructure. The Exchange would need to expand the network infrastructure to keep pace with the number of services available to Users, including any increasing demand for bandwidth, and to establish any additional administrative controls. The Exchange would have to handle the installation, administration, monitoring, support and maintenance of such services, including by responding to any production issues. In addition, in order to provide connectivity to Third Party Data Feeds, Third Party Systems, third party testing and certification feeds and DTCC, the Exchange would have to maintain multiple connections to each Third Party Data Feed, Third Party System, and DTCC, allowing the Exchange to provide resilient and redundant connections; adapt to any changes made by the relevant third party; and cover any applicable fees (other than redistribution fees) charged by the relevant third party, such as port fees.

The Exchange believes it is reasonable that redistribution fees charged by providers of Third Party Data Feeds would be passed through to the User, without change to the fee. If not passed through, the cost of the re-distribution fees would be factored into the proposed fees for connectivity to Third Party Data Feeds. The Exchange believes that passing through the fees makes them more transparent to the User, allowing the User to better assess the cost of the connectivity to a Third Party Data Feed by seeing the individual components of the cost, *i.e.,* the Exchange's fee and the redistribution fee.

The Exchange believes that it is reasonable to not charge third party markets or content providers for connectivity to their own Third Party Data Feeds, as the Exchange understands that such parties generally receive their own feeds for purposes of diagnostics and testing. The Exchange believes that facilitating such diagnostics and testing would remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, protect investors and the public interest.

The Proposed Rule Change Is Equitable

The Exchange believes the proposed rule change is an equitable allocation of its fees and credits for the following reasons.

The Exchange believes that the proposed co-location services and fees are reasonable because under the proposed change the Exchange would provide market participants with the option to co-locate, but would not require it. The co-location services, including various options for cabinets, LCN and IP network access, Connectivity, Access, hosting, and services, would be provided as conveniences to Users.

As is true now, use of any co-location service would be completely voluntary, and each market participant would be able to determine whether to use co-location services based on the requirements of its business operations. If it chose to co-locate, it would be able to determine what size of cabinet, form, and latency of network, would best suit its needs. Users would not be required to use any of their bandwidth for Access or Connectivity unless they wished to do so. Rather, a User would only receive the services it selected, and a User could change what services it receives at any time, subject, in the case of Access and Connectivity, to authorization from the relevant third party system or data provider, Affiliate SRO or the Exchange.

In addition to the co-location services being completely voluntary, they would be available to all Users on an equal basis (*i.e.,* the same co-location services would be available to all Users). All Users that voluntarily elected to receive a co-location service would be charged the same amount for the same service.

Further, by having the Fee Schedule set forth the same co-location services and fees offered by the Affiliate SROs, with only non-substantive differences from the Affiliate SRO Price Lists, Users would benefit from having consistent products and pricing across the

Exchange and the four Affiliate SROs. As is true for the Affiliate SROs and as specified in the proposed Fee Schedule, a User that incurred co-location fees for a particular co-location service pursuant thereto would not be subject to co-location fees for the same co-location service charged by the Affiliate SROs.

The Exchange believes that the proposal to establish procedures and waive certain fees in connection with the movement of equipment at the data center in a Migration would provide for the equitable allocation of reasonable fees because, pursuant to the proposed procedures for selecting which Users would be required to move within the data center, a User would be required to move only if the Exchange would be able to accommodate such User's current space and power requirements at the new location, so as to minimize the disruption to the User. The Exchange believes that the waiver of overlapping monthly recurring charges, the waiver of the Service-Related Fees, and the waiver of one month of monthly recurring charges in a Migration would be reasonable because Users would be moving at the Exchange's request and the waivers would help to alleviate the burden on the Users that are required to move.

The Proposed Rule Change Is Not Unfairly Discriminatory

The Exchange believes that the proposed change is not unfairly discriminatory for the following reasons.

As is true now, use of any co-location service would be completely voluntary, and each market participant would be able to determine whether to use co-location services based on the requirements of its business operations. In addition to the co-location services being completely voluntary, they would be available to all Users on an equal basis (*i.e.,* the same co-location services would be available to all Users). All Users that voluntarily elected to receive a co-location service would be charged the same amount for the same service.

The Exchange believes that charging distinct fees for different co-location services is not unfairly discriminatory because not all Users would need, or wish, to utilize the same co-location services. The proposed variety of services would allow Users to select which co-location services to use, based on their business needs, and Users would only be charged for the services that they selected. By charging only those Users that utilize a co-location service the related fee, those Users that directly benefit from a service would support its cost.

The Exchange believes that the proposed charges are not unfairly discriminatory because the Exchange would offer co-location services as conveniences to Users, but in order to do so would have to provide, maintain and operate the data center facility hardware and technology infrastructure. The Exchange would need to expand the network infrastructure to keep pace with the number of services available to Users, including any increasing demand for bandwidth, and to establish any additional administrative controls. The Exchange would have to handle the installation, administration, monitoring, support and maintenance of such services, including by responding to any production issues. In addition, in order to provide connectivity to Third Party Data Feeds, Third Party Systems, third party testing and certification feeds and DTCC, the Exchange would have to maintain multiple connections to each Third Party Data Feed, Third Party System, and DTCC, allowing the Exchange to provide resilient and redundant connections; adapt to any changes made by the relevant third party; and cover any applicable fees (other than redistribution fees) charged by the relevant third party, such as port fees.

The Proposed Rule Change Would Protect Investors and the Public Interest

The Exchange believes that the proposed rule change relating to co-location would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest for the following reasons.

The proposed Fee Schedule would set forth: (a) The relevant definitions and General Notes, including a detailed description of the Access and Connectivity Users receive with their purchase of access to the LCN or IP network; (b) the Cabinet-Related Fees; (c) the Access and Service Fees; (d) the Service-related Fees; (e) a description of the Migration; and (f) information regarding connectivity to Third Party Systems, Third Party Data Feeds, third party testing and certification feeds, and DTCC. Such Fee Schedule text would make the description of co-location services and fees accessible and transparent, providing market participants with clarity as to what services were offered within co-location and what the related fees would be.

Providing connectivity to testing and certification feeds would provide Users an environment in which to conduct tests with non-live data, including testing for upcoming releases and product enhancements or the User's own software development, and allow Users to certify conformance to any applicable technical requirements.

The Exchange believes that it is reasonable to not charge third party markets or content providers for connectivity to their own Third Party Data Feeds, as the Exchange understands that such parties generally receive their own feeds for purposes of diagnostics and testing. Similarly, providing connectivity to DTCC would provide efficient connection to clearing, fund transfer, insurance, and settlement services.

Finally, the Exchange believes that the proposal to establish procedures and waive certain fees in connection with the movement of equipment at the data center in a Migration would allow the Exchange to have sufficient space in the data center to accommodate demand on an equitable basis for the foreseeable future. The Exchange believes that the waiver of overlapping monthly recurring charges, the waiver of the Service-Related Fees, and the waiver of one month of monthly recurring charges in a Migration would be reasonable because Users would be moving at the Exchange's request and the waivers would help to alleviate the burden on the Users that are required to move.

* * * * *

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[64] the Exchange believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because all of the proposed services are completely voluntary.

In accordance with Section 6(b)(8) of the Act,[65] the Exchange believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange believes that the proposed rule change would not have an impact on intramarket competition because the proposed rule change would simply offer market participants the same services and fees to which they already have access. The sole substantive change that would result from the Exchange offering co-location services would be that Users would be

[64] 15 U.S.C. 78f(b)(8).

[65] 15 U.S.C. 78f(b)(8).

able to have low latency connections to the Exchange. In other words, the only change would be a benefit to market participants, with no change in the related costs. If the proposed rule change is not operative, the Exchange will not offer co-location, and market participants will not be able to receive that benefit.

Further, current Users would not incur any new fees and the Exchange does not expect to attract any new Users as a result of the proposed change. Accordingly, the proposed rule change would not have an impact on intramarket competition. Even though all four Affiliate SROs and the Exchange would offer co-location services, a User that purchased services would only be charged once. This would be true irrespective of whether the User were a member of all, some, or none of the Affiliate SROs and the Exchange. As noted above, the Exchange expects that a current User that starts to trade on the Exchange or connects to its market data as a result of the proposed change would not incur any new fees. With respect to market participants that are not current Users, the Exchange does not expect any of them to become Users in order to connect to the Exchange's data feed or trade on the Exchange. Finally, as noted above, the Exchange believes that, as a practical matter, only Participants would be interested in becoming new Users in order to trade on the Exchange, as non-Participants cannot trade on the Exchange. The pool of relevant Participants is small: Only nine Participants are not also members of one or more of the Affiliate SROs.[66] Of those nine Participants, two are already Users, and therefore, as explained above, would not be subject to any new or different fees as a result of this filing. The Exchange does not expect that any of the remaining seven Participants would opt to become Users in order to trade on the Exchange.[67] Simply put, the Exchange does not expect that low latency access to such a small market would be sufficient reason for a firm to become a User.

The proposed co-location services would be available to all Users on an equal basis. All Users that voluntarily selected to receive co-location services, including cabinets, LCN and IP network access, Connectivity, Access and other services, would be charged the same amount for the same services. In the case of a Migration, all Users would be subject to the same proposed procedures for selecting which Users would be required to move within the data center and what fees would be affected.

The proposed co-location services would provide market participants with the option to co-locate, but would not require it. Use of any co-location services would be completely voluntary, and each market participant would be able to determine whether to use co-location services based on the requirements of its business operations. In this way, the proposed changes would enhance competition by providing market participants with additional options for their business operations.

Intermarket Competition

As noted above, the proposed rule change would simply offer market participants the same services and fees to which they already have access, as currently a User that purchases access to the LCN or IP network receives the ability to access the trading and execution systems of the Exchange and connectivity to the Included Data Products of the Exchange. The sole substantive change that would result from the Exchange offering co-location services would be that Users would be able to have low latency connections to the Exchange. As a result, there would be no material burden on competition with respect to other national securities exchanges.

In addition, there would be no material burden on intermarket competition because, for the reasons discussed above, current Users would not incur any new fees and the Exchange does not expect to attract any new Users as a result of the proposed change. In the first eight months of 2019, the Exchange averaged less than 0.6% market share of executed volume of non-auction equity trading.[68] Given the small market share of the Exchange, it does not believe that the proposed rule change would affect the competitive landscape among the national securities exchanges.

The Exchange operates in a highly competitive market in which exchanges offer co-location services as a means to facilitate the trading and other market activities of those market participants who believe that co-location enhances the efficiency of their operations. Accordingly, fees charged for co-location services are constrained by the active competition for the order flow of, and other business from, such market participants. If a particular exchange charges excessive fees for co-location services, affected market participants will opt to terminate their co-location arrangements with that exchange, and adopt a possible range of alternative strategies, including placing their servers in a physically proximate location outside the exchange's data center (which could be a competing exchange), or pursuing strategies less dependent upon the lower exchange-to-participant latency associated with co-location. Accordingly, the exchange charging excessive fees would stand to lose not only co-location revenues but also the liquidity of the formerly co-located trading firms, which could have additional follow-on effects on the market share and revenue of the affected exchange.

For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[69] and Rule 19b–4(f)(6) thereunder.[70] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[71]

A proposed rule change filed under Rule 19b–4(f)(6)[72] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[73] the

[66] *See* note 56, *supra.*

[67] *See* note 57, *supra.*

[68] *See* note 54, *supra.*

[69] 15 U.S.C. 78s(b)(3)(A)(iii).

[70] 17 CFR 240.19b–4(f)(6).

[71] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[72] 17 CFR 240.19b–4(f)(6).

[73] 17 CFR 240.19b–4(f)(6)(iii).

Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay. The Exchange asserts that waiver of the operative delay would be consistent with the protection of investors and the public interest because it would allow the Exchange to provide the proposed co-location services immediately upon the Exchange's migration to Pillar. For the same reason, the Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change operative upon filing.[74]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [75] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSECHX–2019–12 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSECHX–2019–12. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSECHX–2019–12 and should be submitted on or before November 22, 2019.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[76]

Jill M. Peterson,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87407; File No. SR–FINRA–2019–012]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Amend FINRA Rule 5110 (Corporate Financing Rule—Underwriting Terms and Arrangements) To Make Substantive, Organizational and Terminology Changes, as Modified by Partial Amendment No. 1

October 28, 2019.

On April 11, 2019, Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend FINRA Rule 5110 (Corporate Financing Rule—Underwriting Terms and Arrangements) (''Rule'' or Rule 5110) to make substantive, organizational and terminology changes to the Rule.

The proposed rule change was published for comment in the **Federal Register** on May 1, 2019.[3] On June 12, 2019, the Commission extended to July 30, 2019, the time period in which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change.[4] The Commission received six comment letters on the proposal.[5]

Fields, Secretary, Commission, dated May 21, 2019; letter from Aseel Rabie, Managing Director and Associate General Counsel, Securities Industry and Financial Markets Association, to Vanessa Countryman, Acting Secretary, Commission, dated May 30, 2019 (''SIFMA''); letter from Robert E. Buckholz, Chair, Federal Regulation of Securities Committee, ABA Business Law Section, American Bar Association, to Vanessa Countryman, Acting Secretary, Commission, dated May 30, 2019; letter from Davis Polk & Wardwell LLP, to Vanessa Countryman, Acting Secretary, Commission, dated June 5, 2019.

On July 11, 2019, FINRA responded to the comments and filed Partial Amendment No. 1 to the proposal.[6] On July 29, 2019, the Commission instituted proceedings pursuant to Section 19(b)(2)(B) of the Exchange Act[7] to determine whether to approve or disapprove the proposed rule change.[8] The Commission received three comment letters in response to the Order Instituting Proceedings.[9]

Section 19(b)(2) of the Exchange Act[10] provides that, after initiating disapproval proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of the filing of the proposed rule change. The Commission may, however, extend the period for issuing an order approving or disapproving the proposed rule change by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The proposed rule change was published for notice and comment in the **Federal Register**.[11] The 180th day after publication of the notice of the filing of the proposed rule change in the **Federal Register** is October 28, 2019.

The Commission finds that it is appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change, as amended by Partial Amendment No.1, comment letters, and FINRA's submission.

Accordingly, the Commission, pursuant to Section 19(b)(2) of the Exchange Act, designates December 27, 2019, as the date by which the Commission shall approve or disapprove the proposed rule change.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: Notice is hereby given, pursuant to the provisions of the Government in Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission Investor Advisory Committee will hold a meeting on Thursday, November 7, 2019 at 9:30 a.m. (ET).

PLACE: The meeting will be held in Multi-Purpose Room LL–006 at the Commission's headquarters, 100 F Street NE, Washington, DC 20549.

STATUS: This meeting will begin at 9:30 a.m. (ET) and will be open to the public. Seating will be on a first-come, first-served basis. Doors will open at 9:00 a.m. Visitors will be subject to security checks. The meeting will be webcast on the Commission's website at *www.sec.gov.*

MATTERS TO BE CONSIDERED: On October 24, 2019, the Commission issued notice of the Committee meeting (Release No. 33–10721), indicating that the meeting is open to the public (except during that portion of the meeting reserved for an administrative work session during lunch), and inviting the public to submit written comments to the Committee. This Sunshine Act notice is being issued because a quorum of the Commission may attend the meeting.

The agenda for the meeting includes: Welcome remarks; a discussion regarding whether investors use environmental, social, and governance (ESG) data in investment/capital allocation decisions; a discussion regarding the SEC's Concept Release on Harmonization of Securities Offering Exemptions; subcommittee reports; and a nonpublic administrative work session during lunch.

CONTACT PERSON FOR MORE INFORMATION: For further information and to ascertain what, if any, matters have been added, deleted or postponed; please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551–5400.

Dated: October 29, 2019.

Vanessa A. Countryman,

Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #16131 and #16132; Illinois Disaster Number IL–00057]

Presidential Declaration Amendment of a Major Disaster for Public Assistance Only for the State of Illinois

AGENCY: U.S. Small Business Administration.

ACTION: Amendment 1.

SUMMARY: This is an amendment of the Presidential declaration of a major disaster for Public Assistance Only for the State of Illinois (FEMA–4461–DR), dated 09/19/2019.

Incident: Severe Storms and Flooding.

Incident Period: 02/24/2019 through 07/03/2019.

DATES: Issued on 10/24/2019.

Physical Loan Application Deadline Date: 11/18/2019.

Economic Injury (EIDL) Loan Application Deadline Date: 06/19/2020.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: The notice of the President's major disaster declaration for Private Non-Profit organizations in the State of Illinois, dated 09/19/2019, is hereby amended to include the following areas as adversely affected by the disaster.

Primary Counties: Lee

All other information in the original declaration remains unchanged.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #16165 and #16166; California Disaster Number CA–00309]

Administrative Declaration of a Disaster for the State of California

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Administrative declaration of a disaster for the State of California dated 10/25/2019.

Incident: Sandalwood Fire.

Incident Period: 10/10/2019 through 10/14/2019.

DATES: Issued on 10/25/2019.

Physical Loan Application Deadline Date: 12/24/2019.

Economic Injury (EIDL) Loan Application Deadline Date: 07/27/2020.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's disaster declaration, applications for disaster loans may be filed at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Riverside.

Contiguous Counties:

California: Imperial, Orange, San Bernardino, San Diego.

Arizona: La Paz.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	3.500
Homeowners without Credit Available Elsewhere	1.750
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Non-Profit Organizations with Credit Available Elsewhere	2.750
Non-Profit Organizations without Credit Available Elsewhere	2.750
For Economic Injury:	
Businesses & Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Non-Profit Organizations without Credit Available Elsewhere	2.750

The number assigned to this disaster for physical damage is 16165 5 and for economic injury is 16166 0.

The States which received an EIDL Declaration # are California, Arizona.

DEPARTMENT OF STATE

[Public Notice: 10937]

Overseas Schools Advisory Council Notice of Meeting

The Overseas Schools Advisory Council, Department of State, will hold its January Committee Meeting on Thursday, January 16, 2020, from 9:00 a.m. until approximately 4:00 p.m. in Conference Room 1482, Department of State, 2201 C Street NW Washington, DC. This meeting is open to the public.

The Overseas Schools Advisory Council works closely with the U.S. business community on improving those American-sponsored schools overseas that are assisted by the Department of State and attended by dependents of U.S. government employees, and the children of employees of U.S. corporations and foundations abroad.

This meeting will deal with issues related to the work and the support provided by the Overseas Schools Advisory Council to the American-sponsored overseas schools. There will be a report and discussion about the status of the Council-sponsored Child Protection Project and discussion on a possible project addressing school based mental health issues. The Council will also receive a report from a representative of the College Board. Moreover, the Regional Education Officers in the Office of Overseas Schools will make presentations on the activities and initiatives in the American-sponsored overseas schools.

Members of the public may attend the meeting and join in the discussion, subject to the instructions of the Chair. Admittance of public members will be limited to the seating available. Access to the Department of State is controlled, and individual building passes are required for all attendees. Persons who plan to attend should advise the office of Mr. Thomas Shearer, Department of State, Office of Overseas Schools, telephone 202–261–8200, prior to January 9, 2020. Each visitor to the Department of State meeting will be asked to provide his/her date of birth and either driver's license or passport number at the time of registration and attendance, and must carry a valid photo ID to the meeting.

Personal data is requested pursuant to Public Law 99–399 (Omnibus Diplomatic Security and Antiterrorism Act of 1986), as amended; Public Law 107–56 (USA PATRIOT Act); and Executive Order 13356. The purpose of the collection is to validate the identity of individuals who enter Department facilities. The data will be entered into the Visitor Access Control System (VACS–D) database. Please see the Security Records System of Records Notice (State-36) at *https://www.state.gov/wp-content/uploads/2019/05/Security-Records-STATE-36.pdf* for additional information.

Any requests for reasonable accommodation should be made at the time of registration. All such requests will be considered, however, requests made after January 9 might not be possible to fill. All attendees must use the 21st Street entrance to the building for Thursday's meeting.

Thomas P. Shearer,

Executive Secretary, Overseas Schools Advisory Council.

[FR Doc. 2019–23896 Filed 10–31–19; 8:45 am]

BILLING CODE 4710–24–P

SURFACE TRANSPORTATION BOARD

AAAHI Regional Acquisition LLC—Acquisition of Control—First Class Tours, Inc. and Sierra Stage Coaches, Inc.

AGENCY: Surface Transportation Board.

ACTION: Notice tentatively approving and authorizing finance transaction.

SUMMARY: On October 4, 2019, AAAHI Regional Acquisition LLC (ARA), a motor carrier, filed an application to acquire control of two interstate passenger motor carriers, First Class Tours, Inc. (First Class), and Sierra Stage Coaches, Inc. (Sierra), from their owners, Reta Jean (Jean) Rogers, Jeffrey Scott (Jeff) Rogers, and Gregory Bryan (Greg) Rogers (collectively, Sellers). The Board is tentatively approving and authorizing the transaction, and, if no opposing comments are timely filed, this notice will be the final Board action. Persons wishing to oppose the application must follow the rules.

DATES: Comments may be filed by December 16, 2019. ARA may file a reply by December 31, 2019. If no opposing comments are filed by December 16, 2019, this notice shall be effective on December 17, 2019.

ADDRESSES: Comments may be filed with the Board either via e-filing or in writing addressed to: Surface Transportation Board, Attn: Docket No. MCF 21087, 395 E Street SW, Washington, DC 20423–0001. In addition, send one copy of comments to: Andrew K. Light, Scopelitis, Garvin, Light, Hanson & Feary, P.C., 10 W Market Street, Suite 1400, Indianapolis, IN 46204.

FOR FURTHER INFORMATION CONTACT: Jonathon Binet at (202) 245–0368. Assistance for the hearing impaired is available through the Federal Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION: According to the application, ARA is a motor carrier organized under Delaware law and headquartered in Lakewood, Colo. (Appl. 2.) ARA represents that it obtained interstate operating authority on July 31, 2018, but has not yet conducted either interstate or intrastate operations, and that it does not have a U.S. Department of Transportation (USDOT) Safety Rating. (*Id.*) [1]

ARA states that it is indirectly controlled by Tensile Capital GP LLC (Tensile), a Delaware limited liability company and noncarrier.[2] (*Id.*) ARA states that, in addition to ARA, Tensile indirectly controls the following passenger motor carriers that hold interstate carrier authority (collectively, ARA Affiliated Carriers) (*id.* at 2–4): [3]

- Ace Express Coaches, LLC, which provides regional charter, contract, and casino passenger charter services in Colorado and surrounding areas;
- Hotard Coaches, Inc., which provides local and regional passenger charter services primarily within Louisiana and Mississippi;
- Industrial Bus Lines, Inc., d/b/a All Aboard America, which provides local and regional passenger charter services generally in the states of Arizona, New Mexico, and Texas;
- Lux Bus America Co., which provides local and regional passenger charter services primarily in California and Nevada;
- Sureride Charter Inc., d/b/a Sun Diego Charter Company and Sun Express Charter Co., which provides local and regional passenger charter, tour, and contract shuttle services in south California and surrounding areas; and
- McClintock Enterprises Inc., d/b/a Goldfield Stage & Co., which formerly provided local and regional passenger charter, tour, and contract shuttle services in south California and surrounding areas but is currently inactive.

The application states that First Class is a Texas corporation that provides interstate charter service between Texas and points throughout the United States, Texas intrastate charter service, and intrastate weekday park-and-ride commuter services between The Woodlands, Tex., and points in Houston, Tex. (*Id.* at 6.) The application further states that First Class has full-service maintenance facilities and two terminals in Houston that are used primarily in the operation of daily and overnight individual passenger roundtrips to and from casinos in Louisiana for pre-formed charter groups. (*Id.*) First Class holds interstate operating authority under FMCSA Docket No. MC–346969, it has a ''Satisfactory'' USDOT Safety Rating, and its USDOT number is 774995. (*Id.*) According to the application, First Class uses approximately 66 vehicles and 99 drivers in providing its services. (*Id.*) [4]

The application states that Sierra is a Texas corporation that provides interstate and intrastate passenger group charter motor coach and shuttle services in the Houston area and throughout the United States, as well as weekday park-and-ride commuter services between The Woodlands and points in Houston, and that Sierra often operates under subcontract with First Class. (*Id.* at 7, 10–11.) Sierra holds interstate operating authority under FMCSA Docket No. MC–166321, it has a ''Satisfactory'' USDOT Safety Rating, and its USDOT number is 229351. (*Id.* at 7.) According to the application, Sierra uses approximately 27 vehicles and 25 drivers in providing its services. (*Id.*) [5]

[1] According to ARA, it holds interstate operating authority from the Federal Motor Carrier Safety Administration (FMCSA) under FMCSA Docket No. MC–98597 and has been assigned USDOT Number 3140195. (Appl. 2.)

[2] The application states that ARA is wholly owned by All Aboard America! Holdings, Inc., which in turn is wholly owned by AAAHI Acquisition Corporation. (Appl. 2.) The application further states that AAAHI Acquisition Corporation is wholly owned by AAAHI Intermediate Holdings LLC, which is wholly owned by AAAHI TopCo Corporation, and AAAHI TopCo Corporation is wholly owned by AAAHI Holdings LLC. (*Id.*) According to the application, each of these entities is a noncarrier holding company. (*Id.*) AAAHI Holdings LLC is controlled by Tensile Capital Partners Master Fund LP, a limited partnership and noncarrier, which in turn is controlled by its general partner, Tensile. (*Id.*) According to ARA, none of these companies has motor carrier authority, a USDOT Number, or a USDOT Safety Rating. (*Id.*)

[3] Additional information about these motor carriers, including USDOT numbers, motor carrier numbers, and USDOT safety ratings, can be found in the application. (*See* Appl. 3–4 & Sched. A.)

[4] Additional information about First Class, including information about operations pursuant to state and tribal authority, can be found in the application. (*See* Appl. 6.)

[5] Additional information about Sierra, including information about operations pursuant to state

Continued

The application states that the Sellers collectively own all equity interests in First Class and that Greg Rogers has a 100% equity ownership interest in Sierra. (*Id.* at 5.) The application further states that Jean Rogers and Jeff Rogers have no direct or indirect ownership interests in any interstate passenger motor carrier other than First Class and that Greg Rogers has no direct or indirect ownership interest in any interstate passenger motor carriers other than First Class and Sierra. (*Id.*)

ARA represents that, through this transaction, it will acquire direct control of the interstate and intrastate passenger motor carrier assets and operations of First Class and Sierra. (*Id.* at 1; *see also id.* at 7.) [6]

Under 49 U.S.C. 4303(b), the Board must approve and authorize a transaction that it finds consistent with the public interest, taking into consideration at least: (1) The effect of the proposed transaction on the adequacy of transportation to the public; (2) the total fixed charges that result; and (3) the interest of affected carrier employees. ARA has submitted the information required by 49 CFR 1182.2, including information to demonstrate that the proposed transaction is consistent with the public interest under 49 U.S.C. 14303(b), *see* 49 CFR 1182.2(a)(7), and a jurisdictional statement under 49 U.S.C. 14303(g) that the aggregate gross operating revenues of the ARA Affiliated Carriers, First Class, and Sierra exceeded $2 million during the 12-month period immediately preceding the filing of the application, *see* 49 CFR 1182.2(a)(5).

ARA asserts that the proposed transaction is not expected to have a material, detrimental impact on the adequacy of transportation services available to the public. (Appl. 8.) ARA states that it anticipates that services to the public will be improved by using the business and financial management skills of Tensile, as well as its capital, to enhance and make operations more efficient for First Class and Sierra in their respective marketplaces, thereby ensuring the continued availability of adequate transportation service for the public. (*Id.* at 8, 11.) ARA further states that the continued use of the assets and work force of the Sellers will help maintain a strong competitive bus presence in the eastern Texas area; that the proposed transaction includes the right to use the ''First Class'' and ''Sierra'' names post-closing; and that due to these strong brand names, ARA may also seek approval from the FMCSA to change its name to more closely resemble First Class and/or Sierra. (*Id.* at 8–9.)

ARA claims that neither competition nor the public interest will be adversely affected by the proposed transaction. (*Id.* at 9–11.) ARA asserts that competition is keen in the markets in which First Class operates (*i.e.,* passenger group charter motor coach and shuttle services in the Houston area, including charter transportation between Houston and various Louisiana casinos, and weekday park-and-ride commuter services between The Woodlands and points in Houston). (*Id.* at 10.) Specifically, ARA states that the competition in the charter and shuttle services marketplaces consists of a large number of competitors, ranging from small charter operators to very large corporate charter organizations. ARA also states that special licensing is required to provide direct service to casinos located in Louisiana, and that at least two other carriers operating from within the Houston area have these special permits.[7] (*Id.*) According to ARA, the marketplace of Sierra, like First Class, is primarily passenger group charter motor coach and shuttle services in the Houston area. ARA explains that in many instances, Sierra's marketplace is nearly identical to the marketplace of First Class because Sierra often operates under subcontract with First Class, including charter transportation between Houston and Louisiana casinos and weekday park-and-ride commuter services between The Woodlands and Houston. (*Id.* at 10–11.) Additionally, ARA states that there is little, if any, overlap of market areas served by First Class and Sierra with those served the ARA Affiliated Carriers. (*Id.* at 11.)

ARA states that there are no significant fixed charges associated with the proposed transaction. (*Id.* at 9.) Regarding the interests of employees, ARA claims that the transaction will not have a material impact on employees or labor conditions, nor does ARA anticipate a measurable reduction in force or changes in compensation levels or benefits. (*Id.*) ARA states, however, that staffing redundancies could result in limited downsizing of back-office or managerial-level personnel. (*Id.*)

The Board finds that the acquisition as proposed in the application is consistent with the public interest and should be tentatively approved and authorized. If any opposing comments are timely filed, these findings will be deemed vacated, and, unless a final decision can be made on the record as developed, a procedural schedule will be adopted to reconsider the application. *See* 49 CFR 1182.6(c). If no opposing comments are filed by the expiration of the comment period, this notice will take effect automatically and will be the final Board action.

This action is categorically excluded from environmental review under 49 CFR 1105.6(c).

Board decisions and notices are available at *www.stb.gov.*

It is ordered:

1. The proposed transaction is approved and authorized, subject to the filing of opposing comments.

2. If opposing comments are timely filed, the findings made in this notice will be deemed vacated.

3. This notice will be effective December 17, 2019, unless opposing comments are filed by December 16, 2019.

4. A copy of this notice will be served on: (1) The U.S. Department of Transportation, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE, Washington, DC 20590; (2) the U.S. Department of Justice, Antitrust Division, 10th Street & Pennsylvania Avenue NW, Washington, DC 20530; and (3) the U.S. Department of Transportation, Office of the General Counsel, 1200 New Jersey Avenue SE, Washington, DC 20590.

Decided: October 28, 2019.

By the Board, Board Members Begeman, Fuchs, and Oberman.

Brendetta Jones,

Clearance Clerk.

[FR Doc. 2019–23901 Filed 10–31–19; 8:45 am]

BILLING CODE 4915–01–P

authority, can be found in the application. (*See* Appl. 7.)

[6] ARA also states that, as part of the proposed transaction, it will acquire the rolling stock assets of RJR Leasing LLC (RJR), which owns and leases vehicles to First Class and Sierra and is headquartered in Houston. According to the application, RJR, which is collectively owned by Jean Rogers and the Estate of Lanny Gerald Rogers, does not operate any motor coach or other ground transportation service. (App. 1, 7.) Because RJR does not engage in interstate transportation, RJR is not subject to the Board's jurisdiction, *see* 49 U.S.C. 13501, and the acquisition of RJR is not subject to the Board's acquisition authority, *see* 49 U.S.C. 14303.

[7] ARA also notes that the distance between Houston and these casinos is short enough that people may elect to drive themselves rather than use a bus service. (Appl. 10.)

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36326]

Brookfield Asset Management, Inc. and DJP XX, LLC—Control Exemption—Genesee & Wyoming Inc., et al.

Brookfield Asset Management, Inc. (Brookfield), and DJP XX, LLC (DJP) (collectively, Applicants),[1] filed a verified notice of exemption under 49 CFR 1180.2(d)(2) to allow Applicants to control Genesee & Wyoming Inc. (GWI) and the 106 rail carriers controlled by GWI that are subject to the jurisdiction of the Board (GWI Railroads).[2] As discussed further below, the Board will allow the exemption to become effective. However, Applicants will remain subject to the Board's July 22, 2019 direction to provide periodic updates regarding the status and outcome of the review being conducted by the Committee on Foreign Investment in the United States (CFIUS).

Background

On July 9, 2019, Applicants filed a verified notice of exemption under 49 CFR 1180.2(d)(2) to control GWI, a publicly traded noncarrier holding company that controls, through direct or indirect equity ownership, the GWI Railroads. (Verified Notice 2.) As a result of the proposed transaction, GWI would become a privately held company and a wholly owned subsidiary of DJP. (*Id.*) According to the verified notice, DJP would indirectly control the GWI Railroads through DJP's direct control of GWI, and Brookfield would indirectly control the GWI Railroads through Brookfield's control of DJP and DJP's control of GWI. (*Id.*) Applicants state that Brookfield and DJP are not rail carriers and do not own or control any rail carriers in the United States. (*Id.*) Applicants further state that they each require Board authority pursuant to 49 U.S.C. 11323(a)(4) to consummate the transaction. (*Id.*)

Applicants represent that, pursuant to 49 CFR 1180.2(d)(2): (i) The GWI Railroads do not connect with any rail line owned or controlled by DJP or Brookfield; (ii) the proposed transaction is not part of a series of anticipated transactions that would connect any railroad owned or controlled by DJP or Brookfield with any GWI Railroad, or that would connect any of the GWI Railroads with each other; and (iii) the proposed transaction does not involve a Class I carrier. (*Id.* at 2–3.) Applicants acknowledge that, under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. (*Id.* at 5.) Applicants further acknowledge that because the transaction involves the control of two Class II carriers and more than one Class III carrier, the transaction is subject to the labor protection requirements of 49 U.S.C. 11326(a) and *New York Dock Railway—Control—Brooklyn Eastern District Terminal,* 360 I.C.C. 60 (1979). (Verified Notice 5.)

By decision served on July 22, 2019, and published in the **Federal Register** on July 26, 2019 (84 FR 36157), the effectiveness of the exemption was postponed until further order of the Board to allow sufficient time to consider the issues presented. The decision also directed Brookfield and DJP to provide updates regarding CFIUS review and the outcome of such review, and it invited comments from the Applicants and the public.

In response to its July decision, the Board received numerous comments, including opening and reply comments from the Applicants. Most of the comments relate to the Providence and Worcester Railroad Company (P&W), a Class III railroad controlled by GWI[3] that operates passenger and excursion services between Rhode Island and Massachusetts.[4] The main interests of the P&W Commenters are the continuation of excursion service, completion of a multi-use path, and the need for strong communication and collaboration with Applicants as the prospective new owners of P&W. Some of the P&W Commenters request that the Board condition authorization of the transaction on the Applicants working cooperatively to accommodate completion of the multi-use path. (*See* BHC Comments 3; City of Woonsocket Comments 1–2; National Park Service Comments 1; Honorable Michael O. Moore Comments 1; Town of Grafton Comments 1; Town of Uxbridge Comments 1.)

A comment in opposition to the proposed transaction was received on August 20, 2019, from Victoria Dalrymple, who states that she is a shareholder of GWI. (Dalrymple Comments 1.) Dalrymple argues that the exemption at 49 CFR 1180.2(d)(2) is not applicable to the proposed transaction because Brookfield's management of railroads in other countries, its pyramid-controlled corporate structure, and evidence of its past decapitalization of rail assets suggest the possibility of anticompetitive outcomes. (*Id.* at 1–4, 6–7.) Dalrymple also raises concerns over the possibility of foreign entities—a ''Singapore sovereign wealth fund''[5] and Qatar, both of which have relationships with Brookfield—controlling key domestic infrastructure assets. (*Id.* at 6.)

The Transportation Division of the International Association of Sheet Metal, Air, Rail and Transportation Workers (SMART/TD) filed a notice of intent to participate, and on September 5, 2019, Samuel J. Nasca, for and on behalf of SMART/TD, New York State Legislative Board (SMART/TD–NY), filed reply comments asserting that the notice of exemption should be rejected or the exemption revoked because of, among other things, the magnitude and nature of the transportation involved. (SMART/TD–NY Reply 3–4.) SMART/TD–NY expresses concern regarding the role of GIC, which it argues is required to be an applicant in addition to Brookfield and DJP, (*id.* at 4–5); asserts that Brookfield controls rail investments in Brazil, a country that produces soybeans that compete globally with U.S. soybeans, (*id.* at 5); and states that GWI controls rail carriers that are located in other countries and are not subject to Board jurisdiction, (*id.* at 8). SMART/TD–NY further comments that SMART/TD employees may be adversely affected by Applicants' prospective management of GWI. (*Id.* at 6)

On September 5, 2019, Applicants filed reply comments. Applicants respond to the P&W Comments and state that they intend to continue to work with GWI, P&W, and the communities and reiterate that they do not plan to change the operations of GWI or the GWI Railroads after consummation of the proposed transaction. (Applicants Reply 3, Sept. 5, 2019.) They further respond that the imposition of conditions on the transaction unrelated to competition would be inappropriate in this case. (*Id.* at 4.) Applicants assert that Dalrymple's comments are inaccurate and argue, among other things, that the proposed transaction will not have anticompetitive impacts because there

[1] Brookfield controls DJP within the meaning of 49 U.S.C. 10102(3).

[2] Two of the GWI Railroads are Class II carriers, and the remainder are Class III carriers. (Verified Notice, Ex. 1.)

[3] *Genesee & Wyoming Inc.—Acquis. of Control Exemption—Providence & Worcester R.R.,* FD 36064 (STB served December 16, 2016).

[4] The following commenters focused on issues pertaining to P&W: Blackstone Valley Tourism Council; the Honorable Donald R. Grebien, Mayor of Pawtucket, R.I.; Northern Rhode Island Chamber of Commerce; Blackstone River Valley National Heritage Corridor, Inc. (BHC); Town of North Smithfield, R.I.; City of Woonsocket, R.I.; U.S. Department of the Interior, National Park Service (National Park Service); the Honorable Michael O. Moore, Massachusetts State Senator; the Honorable James A. Diossa, Mayor of City of Central Falls, R.I.; Town of Grafton, Mass.; and Town of Uxbridge, Mass. (collectively, P&W Commenters).

[5] Dalrymple appears to be referring to GIC Pte. Ltd. (GIC). According to Applicants, GIC is a global investment firm that manages Singapore's foreign reserves and, at closing of the proposed transaction, GIC would have an approximately 27% equity interest in DJP and the same percentage vote on the DJP board of directors. (*See* Applicants Response 2 n.3; 2 n.4 & Verification, Sept. 9, 2019.)

will be no change in relationships with carriers outside the GWI corporate family, or in patterns or types of service by the GWI Railroads. (*Id.* at 5–6.) Applicants argue that Dalrymple mischaracterized Brookfield's ownership of an Australian railroad company and that those claims have no relevance to the applicability of the class exemption process. (*Id.* at 7.) Applicants also respond that no investor in Brookfield's private institutional funds has the ability to exercise control over those funds, no foreign government has any influence over any Brookfield-controlled funds, and such concerns are outside the Board's purview in any event. (*Id.* at 7–8.)

Applicants also filed a response to SMART/TD–NY's September 5 reply comments on September 9, 2019, asserting that its claims are without merit.[6] (Applicants Response 2, Sept. 9, 2019.) Applicants argue that GIC need not obtain the Board's control authority because the proposed transaction will not result in GIC controlling any of the Applicants or GWI Railroads and that GWI's control of carriers in other countries is not relevant to whether Applicants qualify for the § 1180.2(d)(2) exemption. (*Id.*) They also generally assert that no valid competitive concerns have been raised that would warrant rejection of the notice or revocation of the exemption. (*Id.*)

On September 24, 2019, Applicants filed an update regarding the status of the CFIUS review and a motion for protective order.[7] On September 26, 2019, Applicants filed a further update regarding the status of the CFIUS review.

Discussion and Conclusions

Under 49 U.S.C. 11323(a)(4), the Board's approval and authorization is required for a transaction involving the acquisition of control of at least two rail carriers by a noncarrier. The class exemption set forth at 49 CFR 1180.2(d)(2) provides an expedited means of obtaining Board approval and authorization provided that certain required information is submitted and three criteria are met: (i) The railroads would not connect with each other or any railroads in their corporate family, (ii) the acquisition or continuance in control is not part of a series of anticipated transactions that would connect the railroads with each other or any railroad in their corporate family, and (iii) the transaction does not involve a Class I carrier.

After considering the comments and other information submitted into the record, the Board will allow the exemption to take effect. The comments submitted do not undermine the applicability of the 49 CFR 1180.2(d)(2) class exemption process.

The P&W Commenters express concerns regarding the excursion services,[8] and four of the P&W Commenters request that the Board impose a condition relating to development of the multi-use path, but none of the P&W Commenters oppose the proposed transaction. Nor do the P&W Commenters suggest that the proposed transaction is not appropriate for a notice of exemption or that it would have anticompetitive effects. The Board appreciates the information and perspective of the P&W Commenters. However, the P&W Comments have not described how the requested condition is relevant to the considerations under 49 CFR 1180.2(d)(2) nor have they provided any legal basis for imposing such a condition. The Board concludes that the requested condition is not warranted and, further, Applicants' September 5 reply comments have sufficiently addressed the concerns expressed by the P&W Commenters. (*See* Applicants Reply 2–4.)

Dalrymple asserts that § 1180.2(d)(2) is inapplicable and suggests that the proposed transaction would result in anticompetitive outcomes, but she does not explain how the assertions raised in her comments (*e.g.,* past decapitalization of an Australian railroad controlled by Brookfield and various negative financial impacts in that country, and concerns about Brookfield's corporate structure) demonstrate that the class exemption criteria are not met, or how the assertions would support a finding of anticompetitive effects. The proposed transaction would change the ownership of GWI, as opposed to changing relationships with carriers outside the GWI corporate family or increasing common control of railroads subject to the Board's jurisdiction.[9]

Similarly, SMART/TD–NY's comments about the magnitude and nature of the transportation at issue do not support rejection of the notice or revocation of the exemption. SMART/TD–NY asserts that the proposed transaction ''raises competitive questions,'' (SMART/TD–NY Reply 8–9), but does not otherwise explain this claim aside from a reference to transportation of soybeans in Brazil for sale in international markets. *But see* 49 U.S.C. 10501(a) (Board jurisdiction applies to transportation in the United States). Finally, except for an assertion that ''GIC is important'' to the proposed transaction, SMART/TD–NY does not state why GIC should be required to be an applicant.[10] (SMART/TD–NY Reply 4–5.)

Accordingly, Applicants' notice of exemption will become effective on the service date of this decision. Because the overall transaction is also subject to CFIUS approval,[11] Applicants will remain subject to the Board's previous direction to provide updates regarding the status of CFIUS review and to provide an update within seven days after they are notified of the outcome of such review.

It is ordered:

1. The exemption will become effective on the service date of this decision.

2. Notice of this decision will be published in the **Federal Register**.

3. This decision is effective on its service date.

Decided: October 28, 2019.

By the Board, Board Members Begeman, Fuchs, and Oberman. Board Member Oberman commented with a separate expression.

BOARD MEMBER OBERMAN, commenting:

Because this transaction meets the requirements of 49 CFR 1180.2(d), and because, as stated in the decision, the comments submitted have not undermined the applicability of the class exemption process, I join in approving the transaction's going forward as a class exemption. Nevertheless, I write separately to express my concerns with the use of the class exemption process for transactions of this magnitude.

[6] Under 49 CFR 1104.13(c), a reply to a reply is not permitted. However, in the interest of a more complete record, the Board will accept into the record Applicants' September 9 response, as well as a September 10, 2019 petition for leave to reply and reply to Applicants' response filed by SMART/TD–NY, and an October 2, 2019 petition for leave to reply and reply to Applicants' September 5, 2019 response filed by Dalrymple, regarding Brookfield's corporate structure.

[7] By decision served September 27, 2019, Applicants' motion for protective order was granted.

[8] The City of Woonsocket expressed interest in the return of commuter rail service on P&W lines but did not oppose the proposed transaction.

[9] Regarding the applicability of § 1180.2(d)(2), the control of another rail carrier outside the United States is not within the Board's jurisdiction and does not make an entity a rail carrier. *See* 49 U.S.C. 10501(a); 49 U.S.C. § 11323(a).

[10] As noted above, Applicants included in their September 9 response a verification from James Rickert, President of DJP, that, at closing of the proposed transaction, GIC would have an approximately 27% equity interest in DJP and same percentage vote on the DJP board of directors. (Applicants Response 2 n.4 & Verification, Sept. 9, 2019.)

[11] (*See* Applicants Comment 12, Aug. 16, 2019.)

GWI's North American operations, which will be acquired pursuant to the proposed transaction, include 106 short line and regional railroads subject to Board jurisdiction, (Verified Notice 1), and operations in 41 states with over 13,000 track miles. *See* Genesee & Wyoming Inc., About Us, *https://www.gwrr.com/about_us* (last visited Oct. 28, 2019). GWI's 2018 North American operating revenues totaled $1.36 billion. Genesee & Wyoming, Inc., 2018 Annual Report 7 (2019). GWI's railroads are essential to serving a large number of shippers and receivers and constitute essential links in the national rail network. Most or all of the country's Class I railroads could not serve many of their customers without the service provided by GWI's railroads. Indeed, if GWI were itself a rail carrier, its North American operations would clearly make it a Class I carrier.[1] As it is, GWI is a widespread presence throughout the national rail network, in which it plays an integral role. Thus, this is by far the largest and most geographically diverse collection of railroads impacting the U.S. freight network ever to be processed as a class exemption under the Board's existing regulations.[2]

For these reasons, in my opinion, this proceeding raises significant questions regarding whether transactions of this magnitude were contemplated when the class exemption regulations were adopted, and therefore raises questions as to whether it is appropriate for such major transactions to be eligible under those regulations in the first place. While I agree that, under existing regulations, this transaction may proceed as a class exemption, I do think the Board should consider in the future whether the exemption process should be applicable to transactions of such scale.

Jeffrey Herzig,

Clearance Clerk.

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36326]

Brookfield Asset Management, Inc. and DJP XX, LLC—Control Exemption—Genesee & Wyoming Inc., et al.

Brookfield Asset Management, Inc. (Brookfield) and DJP XX, LLC (DJP) (collectively, Applicants), filed a verified notice of exemption under 49 CFR 1180.2(d)(2) to allow Applicants to control Genesee & Wyoming Inc. (GWI) and the 106 rail carriers subject to the jurisdiction of the Board that GWI controls (GWI Railroads).[1]

According to the verified notice, GWI is currently a publicly traded noncarrier holding company that controls, through direct or indirect equity ownership, the GWI Railroads; Brookfield is an alternative asset manager; DJP is a limited liability company specially formed to acquire GWI; and Brookfield controls DJP within the meaning of 49 U.S.C. 10102(3). Applicants state that, at consummation of the proposed transaction, DJP's wholly owned subsidiary, MKM XXII Corp., will be merged with and into GWI, which will be the surviving corporation. As a result of the proposed transaction,[2] GWI would become a privately held company and a wholly owned subsidiary of DJP. Therefore, the proposed transaction would cause DJP to indirectly control the GWI Railroads through DJP's direct control of GWI. The proposed transaction would also cause Brookfield to indirectly control the GWI Railroads through Brookfield's control of DJP and DJP's control of GWI. Applicants state that Brookfield and DJP are not rail carriers and do not own or control any rail carriers in the United States. Applicants further certify that the proposed acquisition does not involve an interchange commitment.[3]

The verified notice states that the proposed transaction is expected to close by the end of 2019 or early 2020, subject to customary closing conditions. This exemption is now effective, consistent with the Board's decision served October 29, 2019 in this proceeding.

The verified notice states that: (i) The GWI Railroads do not connect with any rail line owned or controlled by DJP or Brookfield; (ii) the proposed transaction is not part of a series of anticipated transactions that would connect any railroad owned or controlled by Applicants with any GWI Railroad or connect any of the GWI Railroads with each other; and (iii) the proposed transaction does not involve a Class I carrier. Therefore, the transaction is exempt from the prior approval requirements of 49 U.S.C. 11323. *See* 49 CFR 1180.2(d)(2).

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. Because the proposed transaction involves the control of one or more Class III rail carriers and two Class II rail carriers, the transaction is subject to the labor protective requirements of 49 U.S.C. 11326(a) and *New York Dock Railway—Control—Brooklyn Eastern District Terminal,* 360 I.C.C 60 (1979).

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption.

All pleadings, referring to Docket No. FD 36326, must be filed with the Surface Transportation Board either via e-filing or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on Applicants' representatives, Anthony J. LaRocca and Peter W. Denton, Steptoe & Johnson LLP, 1330 Connecticut Avenue NW, Washington, DC 20036.

According to Applicants, this action is categorically excluded from

[1] According to Applicants, two of the GWI Railroads are Class II carriers, and the remainder are Class III carriers. The GWI Railroads are located in the following states: Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, Wisconsin, and Wyoming.

[2] A copy of the Agreement and Plan of Merger was filed with the verified notice as Exhibit 2.

[3] By decision served on July 22, 2019, and published in the **Federal Register** on July 26, 2019 (84 FR 36,157), the effectiveness of the exemption was postponed until further order of the Board to allow sufficient time to consider the issues presented. The decision also directed Brookfield and DJP to provide updates regarding review by the Committee on Foreign Investment in the United States (CFIUS) and the outcome of such review, and it invited comments from the Applicants and the public.

environmental review under 49 CFR 1105.6(c) and from historic preservation reporting requirements under 49 CFR 1105.8(b)(1).

Board decisions and notices are available at *www.stb.gov.*

Decided: October 28, 2019.

By the Board, Allison C. Davis, Director, Office of Proceedings.

Kenyatta Clay,

Clearance Clerk.

BILLING CODE 4915–01–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Agency Information Collection Activities; Request for the Office of Management and Budget To Approve Renewal of the Collection of Information Titled '301 Exclusion Requests'

AGENCY: Office of the United States Trade Representative.

ACTION: 30-day notice with a request for comments.

SUMMARY: The Office of the United States Trade Representative (USTR) is submitting a request to the Office of Management and Budget (OMB) to renew approval for three years of an existing information collection request (ICR) titled *301 Exclusion Requests* under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations.

DATES: Submit comments no later than December 2, 2019.

ADDRESSES: Submit comments about the ICR, including the title 301 Exclusion Requests, to the Office of Information and Regulatory Affairs at OMB, at *oira_submissions@omb.eop.gov,* or 725 Seventeenth Street NW, Washington DC 20503, Attention: USTR Desk Officer.

FOR FURTHER INFORMATION CONTACT: USTR Assistant General Counsels Philip Butler or Benjamin Allen at (202) 395–5725.

SUPPLEMENTARY INFORMATION:

A. Comments

Submit written comments and suggestions to OMB addressing one or more of the following four points:

(1) Whether the ICR is necessary for the proper performance of USTR's functions, including whether the information will have practical utility.

(2) The accuracy of USTR's estimate of the burden of the ICR, including the validity of the methodology and assumptions used.

(3) Ways to enhance the quality, utility, and clarity of the ICR.

(4) Ways to minimize the burden of the ICR on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

B. Overview of This Information Collection

Title: 301 Exclusion Requests.

OMB Control Number: 0350–0015, which expires on December 31, 2019.

Form Number(s): 301 Exclusion Request/Response/Reply Form; Exclusion Extension Comment Form.

Description: Following a comprehensive investigation, the U.S. Trade Representative determined that the Government of China's acts, policies, and practices related to technology transfer, intellectual property, and innovation were actionable under section 301(b) of the Trade Act of 1974 (19 U.S.C. 2411(b)). The U.S. Trade Representative determined that appropriate action to obtain the elimination of China's acts, policies, and practices related to technology transfer, intellectual property, and innovation included the imposition of additional *ad valorem* duties on products from China classified in certain enumerated subheadings of the Harmonized Tariff Schedule of the United States (HTSUS).

For background on the proceedings in this investigation, please see the prior notices issued in the investigation, including 82 FR 40213 (August 23, 2017), 83 FR 14906 (April 6, 2018), 83 FR 28710 (June 20, 2018), 83 FR 32181 (July 11, 2018), 83 FR 33608 (July 17, 2018), 83 FR 40823 (August 16, 2018), 83 FR 47236 (September 18, 2018), 83 FR 47974 (September 21, 2018), 83 FR 49153 (September 28, 2018), 83 FR 65198 (December 19, 2018), 83 FR 67463 (December 28, 2018), 84 FR 7966 (March 5, 2019), 84 FR 11152 (March 25, 2019), 84 FR 16310 (April 18, 2019), 84 FR 20459 (May 9, 2019), 84 FR 21389 (May 14, 2019), 84 FR 21892 (May 15, 2019), 84 FR 22564 (May 17, 2019), 84 FR 23145 (May 21, 2019), 84 FR 25895 (June 4, 2019), 84 FR 26930 (June 10, 2019), 84 FR 29576 (June 24, 2019), 84 FR 32821 (July 9, 2019), 84 FR 37381 (July 31, 2019), 84 FR 38717 (August 7, 2018), 84 FR 43304 (August 20, 2019), 84 FR 43853 (August 22, 2019), 84 FR 45821 (August 30, 2019), 84 FR 46212 (September 3, 2019), 84 FR 49591 (September 20, 2019), 84 FR 49564 (September 20, 2019), 84 FR 49600 (September 20, 2019), 84 FR 52567 (October 2, 2019), 84 FR 52553 (October 2, 2019), and 84 FR 57144 (October 24, 2019).

On May 15, 2019, USTR submitted a request to OMB for emergency processing of this ICR. OMB approved the emergency processing request on June 20, 2019, and assigned Control Number 0350–0015, which expires on December 31, 2019.

On June 24, 2019 (84 FR 29576), the U.S. Trade Representative established a process by which U.S. stakeholders could request the exclusion of particular products classified within a covered tariff subheading from the additional duties that went into effect as a result of this Section 301 investigation.

On June 30, 2019, USTR opened an electronic portal for submission of exclusion requests—*http://exclusions.ustr.gov*—using the approved ICR. Requests for exclusion have to identify a particular product and provide supporting data and the rationale for the requested exclusion. Within 14 days after USTR posts a request for exclusion, interested persons can provide a response with the reasons they support or oppose the request. Interested persons can reply to the response within 7 days after it is posted.

On August 22, 2019, USTR requested comments regarding its intent to seek a three-year renewal of the OMB control number for this ICR. *See* 84 FR 43853. As discussed further below, USTR received three submissions in response to the notice.

USTR also anticipates using the ICR to establish a process by which U.S. stakeholders can request and comment on the extension of particular exclusions granted under the December 2018 product exclusion notice.

As indicated above, USTR received three comments regarding the renewal of the ICR. Two comments requested that USTR add additional questions to the ICR; two comments requested the addition of clarifying language to certain questions; one comment identified a question as burdensome; one comment suggested improvements to the user experience for submitting the ICR through the online 301 exclusions portal; and one comment concerned the burden estimate.

USTR is revising the USTR after considering these comments and USTR's experience to date in administering the exclusion process. USTR added a new question (question 3) that asks if the product is subject to an antidumping or countervailing duty order issued by the U.S. Department of Commerce. USTR also added additional clarifying language to question 4, indicating that requestors, if necessary, may provide a range of unit values when describing the product at issue. In addition, USTR updates the 301 portal to reduce the burden on submitters and currently is working to improve the user experience by increasing the character limit for certain fields to allow requestors additional space for their comments.

USTR also has created a condensed version of the ICR—the Exclusion Extension Comment Form (Annex B)—that interested parties will use to comment on whether to extend particular exclusions granted in December 2018. The condensed ICR reduces the number of data points in the 301 Exclusion Request/Response/Reply Form (Annex A).

The condensed ICR is comprised of Part A, which collects information that USTR will post for public inspection via *regulations.gov*, and Part B, which collects business confidential information (BCI) via email and will not be publicly available. The condensed ICR updates the collecting period for specific data to the most recent relevant period (*i.e.,* 2018, the first half of 2018, and the first half of 2019 or since 2018).

Part A includes language clarifying that for questions 4 and 5 commenters should ''include information concerning any changes in the global supply chain since July 2018 with respect to the particular product.'' The condensed ICR includes three new questions in Part A. Question 2 asks commenters to provide information necessary to identify the exclusion at issue, including the date of the **Federal Register** notice containing the exclusion, the 10-digit subheading of the HTSUS applicable to the exclusion, and the full article description for the exclusion. Question 3 asks commenters whether they support extending the exclusion and asks that they provide a public version of their rationale. Question 6 asks commenters whether they will submit Part B of the questionnaire.

Part B adds two new questions, asking commenters to discuss whether Chinese suppliers have lowered their prices for products covered by the exclusion following the imposition of the duties and to provide any additional information in support of their comments taking into account the instructions provided in the **Federal Register** notice.

The revised ICR is included as Annex A to this notice. The condensed ICR for exclusion extension comments is included as Annex B.

Affected Public: U.S. stakeholders who want to request, or comment on a request, to exclude particular products from the additional duties on products from China classified in certain enumerated subheadings of the HTSUS and U.S. stakeholders who want to comment regarding the extension of the December 2018 product exclusions.

Frequency of Submission: One submission per request, response, reply, or comment.

Respondent Universe: U.S. stakeholders.

Reporting Burden:

Total Estimated Responses: 45,000 requests to exclude a particular product and/or comments to extend the December 2018 product exclusions; 5,250 responses to a product exclusion request; and 2,250 replies to a response.

Total Estimated Annual Burden: USTR estimates that preparing and submitting a request to exclude a particular product or commenting regarding an exclusion extension will take approximately 120 minutes and will cost about $200 per submission. The total time burden for requests is 90,000 hours and the estimated total cost is $9,000,000.

USTR estimates that preparing and submitting a response to a product exclusion request will take approximately 60 minutes, and will cost about $100 per submission. The total time burden for responses is approximately 5,250 hours at an estimated total cost of $525,000.

USTR estimates that preparing and submitting a reply will take approximately 30 minutes, and will cost about $50 per submission. The total time burden for replies is approximately 1,125 hours and the estimated total cost is $56,250.

USTR estimates that the cost to the Federal government to evaluate each request, and response or reply, if any, is 2.5 hours, for a total time burden of 112,500 hours at an estimated total cost of $6,200,000. The $6.2 million total cost estimate includes the average annual salary plus benefits, for the federal employees and contractors expected to work on the exclusion process. USTR estimates that it will take approximately one year to complete the process.

Status: Pursuant to the PRA and its implementing regulations, USTR is submitting a request to OMB to renew approval of this ICR for three years.

C. Requirements for Submissions

You must submit written comments by the deadline set forth in this notice. Submit comments about the ICR, including the title *301 Exclusion Requests,* to the Office of Information and Regulatory Affairs at OMB, at *oira_submissions@omb.eop.gov,* or 725 Seventeenth Street NW, Washington, DC 20503, Attention: USTR Desk Officer.

Janice Kaye,

Chief Counsel for Administrative Law.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. 2019–66]

Petition for Exemption; Summary of Petition Received; Florida Power & Light Company

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Federal Aviation Regulations. The purpose of this notice is to improve the public's awareness of, and participation in, the FAA's exemption process. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the

legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before November 21, 2019.

ADDRESSES: Send comments identified by docket number FAA–2019–0740 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jake Troutman, (202) 683–7788, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC, on October 28, 2019.

Forest Rawls,

Acting Deputy Executive Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2019–0740.

Petitioner: Florida Power & Light Company.

Section(s) of 14 CFR Affected: §§ 61.113(a) & (b); 91.7(a); 91.105(a)(2); 91.121; 91.403(b); 91.405(a); 91.407(a)(1); 91.409(a); & 91.417(a) & (b).

Description of Relief Sought: The proposed exemption, if granted, would allow the petitioner to operate the Teros, a medium altitude long endurance unmanned aircraft system in the 1,500 pound class, made by the NAVMAR Applied Sciences Corporation. The proposed operation is within line of sight of the pilot in command for the purposes of aerial data collection and training flights in the United States.

Federal Aviation Administration

[Docket No. FAA–2019–0896]

Agency Information Collection Activities: Requests for Comments; Clearance of New Approval of Information Collection: Flight Attendant Fatigue Risk Management Plan

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval for a new information collection. The collection involves submission of Fatigue Risk Management Plans (FRMP) for flight attendants of certificate holders operating under Title 14 of the Code of Federal Regulations (CFR) part 121. The certificate holders will submit the information to be collected to the FAA for review and acceptance as required by Section 335(b) of Public Law 115–254, the FAA Reauthorization Act of 2018.

DATES: Written comments should be submitted by December 31, 2019.

ADDRESSES: Please send written comments:

By Electronic Docket: www.regulations.gov (Enter docket number into search field).

By mail: Sandra Ray, Federal Aviation Administration, Policy Integration Branch AFS–270, 1187 Thorn Run Road, Suite 200, Coraopolis, PA 15108.

By fax: 412–239–3063.

FOR FURTHER INFORMATION CONTACT: Daniel T. Ronneberg by email at: *Dan.Ronneberg@faa.gov;* phone: 202–267–1612.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–XXXX.

Title: Flight Attendant Fatigue Risk Management Plan.

Form Numbers: There are no forms associated with this collection.

Type of Review: Clearance of a new information collection.

Background: On October 5, 2018, Congress enacted Public Law 115–254, the FAA Reauthorization Act of 2018 (''the Act''). Section 335(b) of the Act required each certificate holder operating under 14 CFR part 121 to submit to the FAA for review and acceptance a Fatigue Risk Management Plan (FRMP) for each certificate holder's flight attendants. Section 335(b) contains the required contents of the FRMP, including a rest scheme consistent with current flight time and duty period limitations and development and use of methodology to continually assess the effectiveness of the ability of the plan to improve alertness and mitigate performance errors. Section 335(b) requires that each certificate holder operating under 14 CFR part 121 shall update its FRMP every two years and submit the update to the FAA for review and acceptance. Further, section 335(b) of the Act requires each certificate holder operating under 14 CFR part 121 to comply with its FRMP that is accepted by the FAA.

Respondents: 70 Part 121 Air Carriers.

Frequency: Once for initial acceptance of the plan, then every two years for submission of an updated plan.

Estimated Average Burden per Response: 20 hours for air carriers submitting the initial plan for review and acceptance and 5 hours for air carriers submitting an updated plan.

Estimated Total Annual Burden: 20 hours per air carrier submitting the initial plan for review and acceptance, 5 hours every two years for update and resubmission of the plan.

Issued in Washington, DC, on October 29, 2019.

Sandra L. Ray,

Aviation Safety Inspector, FAA, Policy Integration Branch, AFS–270.

[FR Doc. 2019–23958 Filed 10–31–19; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on a Request To Release Surplus Property at the Daniel Field Airport, Augusta, Georgia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comment.

SUMMARY: Under the provisions of Title 49, U.S.C. Section 47151(d), notice is being given that the Federal Aviation Administration (FAA) is considering a request from the City of Augusta to waive the requirement that 0.13 acres of surplus property located at the Daniel Field Airport be used for aeronautical purposes. Currently, the ownership of the property provides for the protection of FAR Part 77 surfaces and compatible land use which would continue to be protected with deed restrictions required in the transfer of land ownership.

DATES: Comments must be received on or before December 2, 2019.

ADDRESSES: Comments on this application may be mailed or delivered to the FAA at the following address: Rob Rau, Federal Aviation Administration, Atlanta Airports District Office, 1701 Columbia Ave., Ste. 220, College Park, GA 30337.

In addition, one copy of any comments submitted to the FAA must be mailed to: David Fields, Chairman, General Aviation Commission, City of Augusta, 1775 Highland Avenue, Augusta, GA 30904.

FOR FURTHER INFORMATION CONTACT: Rob Rau, Federal Aviation Administration, Atlanta Airports District Office, 1701 Columbia Ave., Ste. 220, College Park, GA 30337, *robert.rau@faa.gov.* The request to release property may be reviewed, by appointment, in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA is reviewing a request to release 0.13 acres of surplus property at the Daniel Field Airport (DNL) under the provisions of 49 U.S.C. 47151(d). On October 11, 2019, the City of Augusta (with concurrence from Georgia Department of Transportation) requested the FAA release 0.13 acres of surplus property for a permanent utility easement. The FAA has determined that the proposed property release at the Daniel Field Airport, as submitted by the City of Augusta, meets the procedural requirements of the FAA and release of the property does not and will not impact future aviation needs at the airport. The FAA may approve the request, in whole or in part, no sooner than thirty days after the publication of this notice. In accordance with 49 U.S.C. 47107(c)(2)(B)(i) and (iii), the airport will receive fair market value for the easement, which will be subsequently reinvested in another eligible airport improvement project for aviation facilities at the Daniel Field Airport.

Any person may inspect, by appointment, the request in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**. In addition, any person may, upon appointment and request, inspect the application, notice and other documents determined by the FAA to be related to the application in person at the Daniel Field Airport.

Issued in Atlanta, GA, on October 23, 2019.

Larry F. Clark, Manager,

Atlanta Airports District Office.

Petition for Exemption

Docket No.: FAA–2019–0305.

Petitioner: Daniel Waghorne.

Section(s) of 14 CFR Affected: Part 21, subpart H §§ 61.113(a) & (b); 91.7(a); 91.9(b)(2); 91.103; 91.105; 91.109; 91.119; 91.121; 91.151(a); 91.203(a) & (b); 91.405(a); 91.407(a)(1); 91.401(a)(1) & (2); & 91.417(a) & (b).

Description of Relief Sought: The proposed exemption, if granted, would allow the petitioner to operate the Watts Innovation MFD–5000 unmanned aircraft system, with a maximum gross weight of up to 78 pounds, including payload, to conduct photography and videography within the United States of America. All operations will be conducted within visual line of sight and in class G airspace during the day. The operations will remain below 400 feet above ground level.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–XXXX.

Title: Employee Assault Prevention and Response Plan.

Form Numbers: There are no forms associated with this collection.

Type of Review: Clearance of a new information collection.

Background: On October 5, 2018, Congress enacted Public Law 115–254, the FAA Reauthorization Act of 2018 (''the Act''). Section 551 of the Act required air carriers operating under 14 CFR part 121 to submit to the FAA for review and acceptance an Employee Assault Prevention and Response Plan (EAPRP) related to the customer service agents of the air carrier that is developed in consultation with the labor union representing such agents. Section 551(b) of the Act contains the required contents of the EAPRP, including reporting protocols for air carrier customer service agents who have been the victim of a verbal or physical assault.

Respondents: 70 Part 121 Air Carriers.

Frequency: Once for submission of the plan.

Estimated Average Burden per Response: 20 hours for air carriers submitting the plan for review and acceptance.

Estimated Total Annual Burden: 20 hours per air carriers submitting the plan for review and acceptance.

Issued in Washington, DC, on October 29, 2019.

Sandra L. Ray,

Aviation Safety Inspector, FAA, Policy Integration Branch, AFS–270.

[FR Doc. 2019–23957 Filed 10–31–19; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2017–0975]

Agency Information Collection Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: Information Collection 2120–0768

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on August 7, 2019. The FAA proposes collecting information related to requests to operate Unmanned Aircraft Systems (UAS) in controlled airspace pursuant to regulations contained in the code of federal regulations. FAA will use the collected information to make determinations whether to authorize or deny the requested operation of UAS in controlled airspace. The proposed information collection is necessary to issue such authorizations or denials consistent with the FAA's mandate to ensure safe and efficient use of national airspace.

DATES: Written comments should be submitted by December 2, 2019.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the attention of the Desk Officer, Department of Transportation/FAA, and sent via electronic mail to *oira_submission@omb.eop.gov,* or faxed to (202) 395–6974, or mailed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Docket Library, Room 10102, 725 17th Street NW, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Casey Nair, FAA's Unmanned Aircraft Systems (UAS) Low Altitude Authorization and Notification Capability (LAANC) Program Manager, by email at *Casey.Nair@faa*.gov; phone: 202–267–0369.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–0768.

Title: Requests for Comments; Clearance of Renewed Approval of Information Collection: Information Collection 2120–0768, Part 107 Authorizations and Waivers under 14 CFR part 107.

Form Numbers: There are no forms associated with this collection.

Type of Review: Renewal of existing Information Collection.

Background: The **Federal Register** Notice with 60-day comment period soliciting comments on the following collection of information was published on August 7, 2019 (84 FR 38719). The FAA has seen increased operations of small Unmanned Aircraft Systems (UAS) flying under 14 CFR part 107. Section 107.41 states that ''no person may operate a small unmanned aircraft in Class B, Class C, or Class D airspace or within the lateral boundaries of the surface area of Class E airspace designated for an airport unless that person has prior authorization from Air Traffic Control (ATC).'' Such authorization may be obtained in the form of either an airspace authorization issued by the FAA or a waiver of the authorization requirements of 14 CFR 107.41 (airspace waiver). Additionally, operators may request waivers of the other operational requirements listed in § 107.205 (operational waivers).

In order to process authorization and airspace waiver requests, the FAA requires the operator's name, the operator's contact information, and information related to the date, place, and time of the requested small UAS operation. This information is necessary for the FAA to meet its statutory mandate of maintaining a safe and efficient national airspace. See 49 U.S.C. 40103 and 44701; 49 U.S.C. 44807.

Additionally, if the operator is seeking an operational waiver from one of the other regulations listed in 14 CFR 107.205, further information is required related to the proposed waiver and any necessary mitigations. The FAA will use the requested information to determine if the proposed UAS operation can be conducted safely.

The FAA proposes to use LAANC and a web portal to process authorization requests from the public to conduct Part 107 flight operations pursuant to § 107.41. The FAA also proposes to use the web portal to process requests from the public to conduct Part 107 flight operations that require an operational waiver or an airspace waiver.

The FAA received no public comments to the 60-day **Federal Register** Notice.

Respondents: Small UAS operators seeking to conduct flight operations under 14 CFR part 107 within controlled airspace or flight operations that require waiver from certain provisions of Part 107. Between 2020–2022, the FAA estimates that it will receive a total of 794,888 requests for airspace authorization. The FAA determines future estimated airspace authorization requests by the ratio of the number of received requests against the total number of registered Part 107 UAS. In the 60-day Notice published on August 7, 2019, the FAA estimated 346,917 airspace authorizations from 2020–2022. This number has increased to 794,888 for two reasons. First, since the 60-day Notice estimate on future airspace authorization requests was made, there have been nearly 30,000 new registrations of UAS, which exceeds all FAA expectations. The FAA has also received a corresponding increase in authorization requests since the 60-day Notice was published. The FAA now expects to see 18% more airspace authorization requests in 2019 than when the 60-day Notice was published, which increases the number of respondents the FAA expects over the next three years. Second, in its 60-day Notice the FAA calculated future UAS use based on the ratio of requests to registrations, but used a ratio based on requests from January 1—May 31, 2019 as opposed to the ratio for the full calendar year. This change reflects only that the FAA anticipates the total number of requests from all Part 107 respondents to be higher than what was estimated in the 60-day Notice. The time required for each individual request will remain the same as the average burden per response remains 5 minutes for respondents using LAANC and 30 minutes for respondents using the web portal as reported in the 60-day Notice.

In the 60-day Notice, the FAA estimated 27,831 requests for airspace waivers and 9,000 requests for operational waivers. When the FAA provided the estimates in the 60-day Notice it transposed the numbers for airspace waivers and operational waivers. The FAA estimates it will receive 8,458 requests for airspace waivers and 24,103 requests for operational waivers between 2020–2022 which reflects the correct burden estimate for compliance with sub-sections of 14 CFR 107.205.

Frequency: The requested information will need to be provided each time a respondent requests an airspace authorization to operate a small UAS under 14 CFR part 107 in controlled airspace. A respondent may reduce the frequency by seeking and obtaining an airspace waiver to conduct recurring operations. For requests for operational waivers, a respondent will need to provide the information once at the time of the request for the waiver. If granted, operational waivers may be valid for up to four (4) years.

Estimated Average Burden per Response: The FAA estimates the respondents using LAANC will take five (5) minutes per request and those using the web portal will take thirty (30) minutes per request. For those submitting requests for airspace or operational waivers through the web portal, the FAA estimates each request will take thirty (30) minutes.

Estimated Total Annual Burden: For airspace authorizations, the FAA estimates that the average annual burden will be 35,251 hours for respondents submitting requests. This includes 19,353 burden hours for 233,167 respondents using the automated LAANC capabilities and 15,898 hours for 31,796 web portal respondents. These revised numbers reflect corrections made as explained above.

For airspace waivers, the FAA estimates that the average annual burden will be 1,410 hours for respondents. For operational waivers, the FAA estimates that the average annual burden will be 5,222 hours for respondents. These revised numbers reflect corrections made as explained above.

Issued in Washington, DC, on October 29, 2019.

Casey Nair,

UAS LAANC Program Manager.

[FR Doc. 2019–23947 Filed 10–31–19; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Fiscal Year 2020 Competitive Funding Opportunity: Mobility for All Pilot Program

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of Funding Opportunity (NOFO).

SUMMARY: The Federal Transit Administration (FTA) announces the opportunity to apply for approximately $3.5 million in Fiscal Year (FY) 2020 funds under the Innovative Coordinated Access and Mobility (Mobility for All) pilot program; (Catalog of Federal Domestic Assistance number: 20.513). Funding under this pilot program is subject to the availability of a full-year

appropriation. This funding opportunity seeks to improve mobility options through employing innovative coordination of transportation strategies and building partnerships to enhance mobility and access to vital community services for older adults, individuals with disabilities, and people of low income. As required by Federal public transportation law, funds will be awarded competitively to finance innovative capital projects that will improve the coordination of transportation services and non-emergency medical transportation services. FTA may award additional funding that is made available to the program prior to the announcement of project selections.

DATES: Applicants must submit completed proposals for each funding opportunity through the *GRANTS.GOV* ''APPLY'' function by 11:59 p.m. Eastern Daylight Time on Monday, January 6, 2020. Prospective applicants should register as soon as possible on the *GRANTS.GOV* website to ensure they can complete the application process before the submission deadline. Application instructions are available on FTA's website at *http://transit.dot.gov/howtoapply* and in the ''FIND'' module of *GRANTS.GOV*. The *GRANTS.GOV* funding opportunity ID for the Mobility for All Coordination (MOAC) is FTA–2020–001–TPM. The FTA will not accept mail and fax submissions.

FOR FURTHER INFORMATION CONTACT: Kelly Tyler, FTA Office of Program Management; Phone: (202) 366–3102; Email: *Kelly.Tyler@dot.gov*; Fax: (202) 366–3475.

SUPPLEMENTARY INFORMATION:

Table of Contents

A. Program Description
B. Federal Award Information
C. Eligibility Information
D. Application and Submission Information
E. Application Review Information
F. Federal Award Administration Information
G. Federal Awarding Agency Contact

A. Program Description

Section 3006(b) of the Fixing America's Surface Transportation (FAST) Act (Pub. L. 114–94, Dec. 4, 2015) authorizes FTA to award grants for Innovative Coordinated Access and Mobility (Mobility for All) pilot projects for transportation disadvantaged populations that improve the coordination of transportation services and non-emergency medical transportation services. In FY 2020, FTA intends to target funds towards projects that support coordination amongst programs funded by the Coordinating Council on Access and Mobility (CCAM).

The CCAM consists of eleven Federal agencies and coordinates more than 120 Federal programs that may fund transportation. The CCAM's mission is to improve the availability, accessibility, and efficiency of transportation for people who are transportation disadvantaged. The benefits of successful coordinated transportation systems include providing greater access to funding and enabling more cost-effective use of resources, reducing duplication and overlap in human service agency transportation services; filling service gaps in a community or geographic area; serving additional individuals within existing budgets; and providing more centralized management of existing resources.

The Mobility for All pilot program will improve local coordination by encouraging cooperation among grantees of 122 Federal programs that fund human service transportation. A current list of these 122 Federal programs can be accessed at *https://www.transit.dot.gov/ccam/about/partner-agencies.* Successful projects will work collaboratively and leverage partnerships with grantees and constituents of the Federal agencies that are members of the CCAM, such as the Department of Health and Human Services' operating divisions such as the Administration for Community Living, the Health Resources and Services Administration, and the Centers for Medicare and Medicaid Services.

Successful applicants will demonstrate progress towards implementing single same-day, door-to-door service to improve mobility in their community, and increasing efficiency by using the same vehicles to transport passengers whose trips are funded via different Federal programs. Applicants will use innovative cost allocation technology (for example, the cost allocation model developed by the National Rural Transit Assistance Program) to demonstrate how costs can be shared equitably among participating local and regional organizations who receive funding from a variety of Federal agencies. Applicants should show support for coordination by providing letters of commitment from entities such as: Local community service organizations, medical providers and other Federal grantees interested in contracting for transportation trips with the Mobility for All service.

Projects may focus on serving rural areas, and populations affected by healthcare challenges—such as the opioid epidemic, veterans, Medicaid recipients, and/or any population that is currently underserved by non-emergency medical transportation (NEMT).

The Mobility for All pilot program grants will support capital projects that address the challenges the transportation disadvantaged face when accessing healthcare and other essential community services. The goals are to:

(1) Increase access to funding sources that can fund transportation;

(2) fill gaps in service and reduce duplication; and

(3) provide more efficient service to underserved populations in rural and small urban areas.

The Mobility for All grants will operate as pilots for up to 18 months.

Within the first year, projects must be able to demonstrate outcomes that are:

- Effective, in that they get people where they need to go;
- efficient, in that they use public dollars economically; and
- accessible, in that services are easy for travelers to navigate and use.

B. Federal Award Information

Section 3006(b) of the FAST Act (Pub. L. 114–94) authorizes $3,500,000 in FY 2020 for grants under the Mobility for All pilot program. FTA may cap the amount a single recipient or State may receive as part of the selection process. FTA will approve pre-award authority pursuant to 2 CFR 200.458 to incur costs for selected projects beginning on the date FTA announces recipients of the FY 2020 awards. Funds are only available for projects that have not incurred costs prior to the announcement of project selections.

C. Eligibility Information

1. Eligible Applicants

Eligible applicants for awards are States, tribes, designated or direct recipients under 49 U.S.C. 5307, 5310 or 5311.

Applicants must serve as the lead agency of a local consortium that includes stakeholders from the transportation, healthcare, human service or other sectors. Members of this consortium are eligible as subrecipients. Further, applicants must demonstrate that the proposed project was planned through an inclusive process with the involvement of the transportation, healthcare and human service sectors. An implementation plan and schedule must be submitted as part of the proposal.

ii. Cost Sharing or Matching

The maximum Federal share of project costs under the Mobility for All pilot program is 80 percent. The applicant must provide a local share of at least 20 percent of the project cost and must document the source of the local match in the grant application.

Eligible sources of local match include cash and in-kind contributions. In-kind contributions must be documented in the application.

iii. Eligible Projects

Eligible projects are capital projects, as defined in 49 U.S.C. 5302(3). FTA may make grants to assist in financing innovative projects for the transportation disadvantaged that improve the coordination of transportation services and non-emergency medical transportation services including: The deployment of coordination technology; projects that create or increase access to community one-call/one-click centers; and other innovative projects. FTA's goal for these pilot program grants is to identify and test promising, innovative, coordinated mobility strategies other communities can replicate. Only one project may be included in each application.

Funds under the Mobility for All pilot program may be used for capital expenditures only. Additionally, funds under this NOFO cannot be used to reimburse applicants for otherwise eligible expenses incurred prior to the selection of projects under this NOFO.

D. Application and Submission Information

1. Address To Request Application

Applications must be submitted through *GRANTS.GOV*. Applicants can find general information for submitting applications through *GRANTS.GOV* at *https://www.transit.dot.gov/funding/grants/applying/applying-fta-funding,* along with specific instructions for the forms and attachments required for submission. Mail and fax submissions will not be accepted. A complete proposal submission consists of two forms:

- The SF–424 Mandatory Form (downloadable from *GRANTS.GOV*); and
- Supplemental Form for the FY 2020 Mobility for All Coordination Pilot Program

at *https://www.transit.dot.gov/funding/grants/enhanced-mobility-seniors-individuals-disabilities-section-5310*). Applicants also may attach additional supporting information. Failure to submit the information as requested can delay or prevent review of the application.

2. Content and Form of Application Submission

i. Proposal Submission

A complete proposal submission consists of at least two forms, the SF–424 Mandatory Form, and the Supplemental Form for the FY 2020 Mobility for All Coordination Pilot Program. The application must include responses to all sections of the SF–424 mandatory form and the supplemental form unless a section is indicated as optional. FTA will use the information on the supplemental form to determine applicant and project eligibility for the program and to evaluate the proposal against the selection criteria described in part E of this notice. FTA will accept only one supplemental form per SF–424 submission. FTA encourages States and other applicants to consider submitting a single supplemental form that includes multiple activities to be evaluated as a consolidated proposal. If States or other applicants choose to submit separate proposals for individual consideration by FTA, they must submit each proposal with a separate SF–424 and supplemental form.

Applicants may attach additional supporting information to the SF–424 submission, including but not limited to letters of support, project budgets, fleet status reports, or excerpts from relevant planning documents. Supporting documentation must be described and referenced by file name in the appropriate response section of the supplemental form, or it may not be reviewed.

Information such as applicant name, Federal amount requested, local match amount, description of areas served, etc., may be requested in varying degrees of detail on both the SF–424 form and supplemental form. Applicants must fill in all fields unless stated otherwise on the forms. If applicants copy information into the supplemental form from another source, they should verify that the supplemental form has fully captured pasted text and that it has not truncated the text due to character limits built into the form. Applicants should use both the ''Check Package for Errors'' and the ''Validate Form'' buttons on both forms to check all required fields. Applicants should also ensure that the Federal and local amounts specified are consistent.

ii. Application Content

The SF–424 Mandatory Form and the supplemental form will prompt applicants for the required information, including:

a. Applicant Name
b. Dun and Bradstreet (D&B) Data Universal Numbering System (DUNS) number
c. Key contact information (including contact name, address, email address, and phone)
d. Congressional district(s) where project will take place
e. Indicate whether the project is in an Opportunity Zone
f. Project Information (including title, an executive summary, and type)
g. A detailed description of the need for the project
h. A detailed description of how the project will support the Mobility for All Coordination Pilot Program objectives
i. Evidence that the project is consistent with local and regional planning documents and/or that the project is consistent with local and regional Services Transportation Plans
j. Evidence that the applicant can provide the local cost share and details on the local matching funds
k. A description of the technical, legal, and financial capacity of the applicant
l. A detailed project budget (up to 18 months or less)
m. An explanation of the scalability of the project (if applicable)
n. A detailed project timeline

3. Unique Entity Identifier and System for Award Management (SAM)

Each applicant is required to: (1) Register in SAM before applying; (2) provide a valid unique entity identifier; and (3) to maintain an active SAM registration with current information during which the applicant has an active Federal award or an application or plan under consideration by FTA. These requirements do not apply if the applicant: (1) Is an individual; (2) is excepted from the requirements under 2 CFR 25.110(b) or (c); or (3) has an exception approved by FTA under 2 CFR 25.110(d). FTA may not make an award until the applicant has complied with all applicable unique entity identifier and SAM requirements. If an applicant has not fully complied with the requirements by the time FTA is ready to make an award, FTA may determine that the applicant is not qualified to receive an award and use that determination as a basis for making a Federal award to another applicant. Registration in SAM may take as little as 3–5 business days, but there can be unexpected steps or delays. For example, the applicant may need to obtain an Employer Identification Number. FTA recommends allowing ample time, up to several weeks, to complete all steps. For additional information on obtaining a unique entity identifier, please visit *www.sam.gov.*

The FTA will provide further instructions on registration through an introductory applicant training session. Dates and times for the training session will be posted on FTA's website at *https://www.transit.dot.gov/funding/grants/grant-programs/mobility-all-grants.*

4. Submission Dates and Times

Project proposals must be submitted electronically through *GRANTS.GOV* by 11:59 p.m. Eastern Daylight Time on Monday, January 6, 2020. Late applications will not be accepted. Mail and fax submissions will not be accepted.

FTA urges applicants to submit applications at least 72 hours prior to the due date to allow time to correct any problems that may have caused either *GRANTS.GOV* or FTA systems to reject the submission. Deadlines will not be extended due to scheduled website maintenance. *GRANTS.GOV* scheduled maintenance and outage times are announced on the *GRANTS.GOV* website.

Within 48 hours after submitting an electronic application, the applicant should receive two email messages from *GRANTS.GOV*: (1) Confirmation of successful transmission to *GRANTS.GOV*; and (2) confirmation of successful validation by *GRANTS.GOV*. If the applicant does not receive confirmation of successful validation or receives a notice of failed validation or incomplete materials, the applicant must address the reason for the failed validation, as described in the email notice, and resubmit before the submission deadline. If making a resubmission for any reason, applicants must include all original attachments regardless of which attachments were updated and check the box on the supplemental form indicating this is a resubmission.

Applicants are encouraged to begin the process of registration on the *GRANTS.GOV* site well in advance of the submission deadline. Registration is a multi-step process, which may take several weeks to complete before an application can be submitted. Registered applicants may still be required to update their registration before submitting an application. Registration in SAM is renewed annually and persons making submissions on behalf of the Authorized Organization Representative (AOR) must be authorized in *GRANTS.GOV* by the AOR to make submissions.

5. Funding Restrictions

Funds under the Mobility for All pilot program may be used for capital expenditures only that are tied to the locally developed Coordinated Public Transit-Human Services Transportation Plan or State Improvement Plan/Transportation Improvement Plan. Eligible projects are capital projects, as defined in 49 U.S.C. 5302(3).

6. Other Submission Requirements

FTA encourages applicants to identify scaled funding options in case insufficient funding is available to fund a project at the fully requested amount. If an applicant indicates that a project is scalable, the applicant must provide an appropriate minimum funding amount that will fund an eligible project that achieves the objectives of the program and meets all relevant program requirements. The applicant must provide a clear explanation of how a reduced award would affect the project budget. FTA may award a lesser amount regardless of whether the applicant provides a scalable option.

E. Application Review Information

1. Project Evaluation Criteria

Each application submitted for the Mobility for All pilot program must include: (1) A detailed description of the project; (2) an identification of all project partners and their specific role in the eligible project; (3) specific performance measures the project will use to quantify actual outcomes against expected outcomes; and (4) a description of how the project will:

- Increase access to funding sources that can fund transportation;
- fill gaps in service and reduce duplication; and
- provide more efficient service to underserved populations in rural and small urban areas.

FTA will evaluate proposals submitted according to the following criteria: (a) Demonstration of need; (b) demonstration of benefits; (c) planning and partnerships; (d) local financial commitment; (e) project readiness; and (f) technical, legal, and financial capacity. Each applicant is encouraged to provide a succinct, logical, and orderly response to all criteria referenced in this NOFO. Additional information may be provided to support the responses; however, any additional documentation must be directly referenced on the supplemental form, including the file name where the additional information can be found.

a. Demonstration of Need

FTA will evaluate proposals based on how the proposed project will address the need or challenges to improving coordination of transportation services serving rural or small urban areas, populations affected by healthcare challenges such as the opioid epidemic, veterans, Medicaid recipients, and/or any population that is currently underserved by NEMT. FTA will consider both the scope of the overall need or challenge, and the size of the specific segment of the population served by the proposed project.

b. Demonstration of Benefits

FTA will evaluate proposals on the benefits provided by the proposed project. Benefits will be tied to the Mobility for All pilot program goals of: (1) Increased access to funding sources that fund transportation; (2) filling gaps in service and reducing duplication of service; and (3) better serving underserved populations in rural and small urban areas. Proposals will be judged on the extent to which the proposed project demonstrates a benefit to the transportation need or challenge to mobility and access to services demonstrated above. Projects will be evaluated on the ability of the proposed project to yield data demonstrating impacts on the goals of FTA's Mobility for All pilot program. Proposals must show that the applicant will be able to provide impact data during and after the pilot project. FTA will conduct an independent evaluation of each pilot project. FTA requires each applicant to submit the performance data on a quarterly basis. This data will be used by FTA to produce the required Annual Report to Congress that contains detailed description of the activities carried out under the pilot program, and an evaluation of the program, including an evaluation of the performance measures described.

c. Planning and Partnerships

Applicants must describe the eligible project and outline project partners and their specific role in the project. Successful projects will work collaboratively and leverage partnerships with grantees and constituents of the Federal agencies that are members of the CCAM, such as the Department of Health and Human Services' Administration for Community Living, the Health Resources and Services Administration, and the Centers for Medicare and Medicaid Services. A list of CCAM partners may be accessed by going to *https://www.transit.dot.gov/ccam/*

about/partner-agencies. Partners also may include private and nonprofit entities involved in the coordination of nonemergency medical transportation services for the transportation disadvantaged. Applicants should provide evidence of strong commitment from key partners, including memoranda of agreement or letters of support from relevant local stakeholders and partner organizations. Any changes to the proposed partnerships will require FTA's advance approval and must be consistent with the scope of the approved project. Projects should be derived from a locally developed, coordinated public transit-human services transportation plan.

d. Local Financial Commitment

Applicants must identify the source of the local share and describe whether such funds are currently available for the project or will need to be secured if the project is selected for funding. FTA will consider the availability of the local share as evidence of local financial commitment to the project. In addition, an applicant may propose a local share that is greater than the minimum requirement or provide documentation of previous local investment in the project as evidence of local financial commitment.

e. Project Readiness

FTA will evaluate the project on the proposed schedule and the applicant's ability to implement it. Applicants should indicate the short-term, mid-range, and long-term goals for the project. Applicants also must describe how the project will help the transportation disadvantaged and improve the coordination of transportation services and non-emergency medical transportation services. Proposals must provide specific performance measures the eligible project will use to quantify actual outcomes against expected outcomes. FTA will evaluate the project on the extent to which it was developed inclusively, incorporating meaningful involvement from key stakeholders including consumer representatives of the target groups and providers from the healthcare, transportation, and human services sectors, among others. The applicant must show significant, ongoing involvement of the project's target population.

f. Technical, Legal and Financial Capacity

FTA will evaluate proposals on the capacity of the lead agency and any partners to successfully execute the pilot effort. The applicant should have no outstanding legal, technical, or financial issues that would make this a high-risk project. FTA will evaluate each proposal (including the business plan, financial projections, and other relevant data) for feasibility and longer-term sustainability of both the pilot project as well as the proposed project at full deployment. FTA intends to select projects with a high likelihood of long-term success and sustainability.

2. Review and Selection Process

A technical evaluation committee made up of FTA staff will evaluate proposals based on the published evaluation criteria. After applying the above criteria, the FTA Administrator will consider the following key Departmental objectives:

- Supporting economic vitality at the national and regional level;
- Utilizing alternative funding sources and innovative financing models to attract non-Federal sources of infrastructure investment;
- Accounting for the life-cycle costs of the project to promote a state of good repair;
- Using innovative approaches to improve safety and expedite project delivery; and
- Holding grant recipients accountable for their performance and achieving specific, measurable outcomes identified by grant applicants.

Prior to making an award, FTA is required to review and consider any information about the applicant that is in the Federal Awardee Performance and Integrity Information Systems (FAPIIS) accessible through SAM. An applicant may review and comment on information about itself that a Federal awarding agency previously entered. FTA will consider any comments by the applicant, in addition to the other information in FAPIIS, in making a judgment about the applicant's integrity, business ethics, and record of performance under Federal awards when completing the review of risk posed by applicants as described in 2 CFR 200.205, Federal Awarding Agency Review of Risk Posed by Applicants. In determining the allocation of program funds, FTA may consider geographic diversity, diversity in the size of the transit systems receiving funding, the applicant's receipt of other competitive awards, projects located in or that support public transportation service in a qualified opportunity zone designated pursuant to 26 U.S.C. 1400Z–1, and the percentage of local share provided.

F. Federal Award Administration Information

1. Federal Award Notices

FTA Administrator will announce the final project selections on the FTA website. Project recipients should contact their FTA Regional Office for additional information regarding allocations for projects under each program.

At the time FTA announces project selections, FTA will extend pre-award authority pursuant to 2 CFR 200.458 for the selected projects. There is no blanket pre-award authority for these projects before announcement.

2. Award Administration

There is no minimum or maximum grant award amount; however, FTA intends to fund as many meritorious projects as possible. FTA will only consider proposals from eligible recipients for eligible activities. Due to funding limitations, projects selected for funding may receive less than the amount originally requested. In those cases, applicants must be able to demonstrate that the proposed projects are still viable, meet all eligibility requirements, and can be completed with the amount awarded.

3. Administrative and National Policy Requirements

i. Pre-Award Authority

FTA will issue specific guidance to recipients regarding pre-award authority at the time of selection. FTA does not provide pre-award authority for competitive funds until projects are selected, and there are Federal requirements that must be met before costs are incurred. For more information about FTA's policy on pre-award authority, please see the FY 2019 Apportionments Notice published on July 3, 2019, at *https://www.govinfo.gov/content/pkg/FR-2019-07-03/pdf/2019-14248.pdf*

ii. Grant Requirements

Selected applicants will submit a grant application through FTA's electronic grant management system and adhere to FTA grant requirements. All competitive grants will be subject to the congressional notification and release process. FTA emphasizes that third-party procurement applies to all funding awards, as described in FTA Circular 4220.1F, ''Third Party Contracting Guidance.'' However, FTA may approve applications that include a specifically identified partnering organization(s) (2 CFR 200.302(f)). When included, the application, budget, and budget narrative should provide a clear understanding of how the selection of these organizations is critical for the project and give sufficient detail about the costs involved.

iii. Planning

FTA encourages applicants to engage the appropriate State Departments of Transportation, Regional Transportation Planning Organizations, or Metropolitan Planning Organizations in areas to be served by the project funds available under these programs.

iv. Standard Assurances

By submitting an application, the applicant assures that it will comply with all applicable Federal statutes, regulations, executive orders, FTA circulars, and other Federal administrative requirements in carrying out any project supported by the FTA grant. The applicant acknowledges that it is under a continuing obligation to comply with the terms and conditions of the grant agreement issued for its project with FTA. The applicant understands that Federal laws, regulations, policies, and administrative practices might be modified from time to time and may affect the implementation of the project. The applicant agrees that the most recent Federal requirements will apply to the project unless FTA issues a written determination otherwise. The applicant must submit the Certifications and Assurances before receiving a grant if it does not have current certifications on file.

v. Reporting

Post-award reporting requirements include submission of Federal Financial Reports and Milestone Progress Reports in FTA's electronic grants management system. An independent evaluation of the pilot program may occur at various points in the deployment process and at the end of the pilot project. In addition, FTA is responsible for producing an Annual Report to Congress that compiles evaluations of selected projects, including an evaluation of the performance measures identified by the applicants. All applicants must develop an evaluation plan to measure the success or failure of their projects and to describe any plans for broad-based implementation of successful projects. FTA may request data and reports to support the independent evaluation and annual report.

G. Federal Awarding Agency Contact

For questions about applying to the pilot program outlined in this notice, please contact the Program Manager, Kelly Tyler, at Federal Transit Administration, phone: (202) 366–3102, fax: (202) 366–3475, or email, *Kelly.Tyler@dot.gov.* A TDD is available at 1–800–877–8339 (TDDFIRS). Additionally, you may visit FTA's website for this program at *https://www.transit.dot.gov/funding/grants/grant-programs/mobility-all-grants.*

To ensure that applicants receive accurate information about eligibility or the program, applicants are encouraged to contact FTA directly with questions, rather than through intermediaries or third parties. FTA staff also may conduct briefings on the FY 2020 competitive grants selection and award process upon request.

K. Jane Williams,

Acting Administrator.

Address Name
Address Line 2
City, State, Zip
Dear Name:

Thank you for your letter supporting the application submitted by Applicant for funding under the U.S. Department of Transportation's Mobility for All pilot program.

The Federal Transit Administration (FTA) administers the Mobility for All pilot program, authorized by Section 3006(b) of the Fixing America's Surface Transportation Act. This program supports innovative coordinated access and mobility projects that improve the coordination of transportation services and non-emergency medical transportation services for the transportation disadvantaged populations.

All properly submitted applications will receive full and careful consideration. FTA will announce final project selections after the review process is complete.

Your interest in this program is appreciated.

Sincerely,

Signatory

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket Number MARAD–2019–0183]

Renewal of the Voluntary Tanker Agreement Program; Agreement Development Proposal

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice of availability; request for comments.

SUMMARY: The Maritime Administration (MARAD) is developing a voluntary agreement necessary to renew the Voluntary Tanker Agreement Program, pursuant to the authority contained in Section 708 of the Defense Production Act of 1950 (DPA), as amended. This notice invites comments on the draft proposed Voluntary Tanker Agreement (VTA). The proposed text is intended to replace the Agreement as it was last published in Volume 73 of the **Federal Register** at page 51692 (September 4, 2008). Because the proposed agreement will contain changes, both former and new participants must submit a new application once the final text is published. VTA applications are available from MARAD. The complete, draft text of the VTA is published below. Copies of the draft text are also available to the public upon request. MARAD will hold an open meeting for the purpose of developing the final text of the VTA at its headquarters located at 1200 New Jersey Avenue SE, Washington, DC 20590. MARAD will announce the open meeting by publication in the **Federal Register**.

DATES: Comments must be received on or before December 2, 2019. MARAD will consider comments filed after this date to the extent practicable.

ADDRESSES: You may submit comments identified by DOT Docket Number MARAD–2019- 0183 any one of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Search MARAD–2019–0183 and follow the instructions for submitting comments.
- *Mail or Hand Delivery:* Docket Management Facility is in the West Building, Ground Floor of the U.S. Department of Transportation. The Docket Management Facility location address is: U.S. Department of Transportation, MARAD–2019–0183, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Note: If you mail or hand-deliver your comments, we recommend that you include your name and a mailing address, an email address, or a telephone number in the body of your document so that we can contact you if we have questions regarding your submission.

Instructions: All submissions received must include the agency name and specific docket number. All comments received will be posted without change to the docket at *www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments, see the section entitled Public Participation.

FOR FURTHER INFORMATION CONTACT: William G. McDonald, Director, Office of Sealift Support, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE, Washington, DC 20590. Telephone (202) 366–0688; Fax (202) 366–5904, or *william.g.mcdonald@dot.gov.*

Preface

Pursuant to the authority contained in Section 708 of the Defense Production Act of 1950 (DPA), as amended (50 U.S.C. 4558), the Maritime Administrator (Administrator), after consultation with the Department of Defense (DoD) and representatives of the tanker industry, has developed this Voluntary Tanker Agreement (VTA). The Agreement establishes the terms, conditions, and procedures under which Participants agree voluntarily to make tankers available to DoD. The Agreement further affords Participants defenses to civil and criminal actions for violations of antitrust laws when carrying out the Agreement. The Agreement is designed to create a close working relationship among the Administrator, the Commander, U.S. Transportation Command (the DoD-designated representative for purposes of this Agreement), and the Participants through which DoD requirements and the needs of the civil economy can be met through cooperative action. The Agreement affords Participants flexibility to respond to defense requirements and adjust their commercial operations to minimize disruption whenever possible.

The Secretary of Defense (SecDef) has approved this Agreement as an Emergency Preparedness Program (EPP) pursuant to 46 U.S.C. 53107.

This Agreement replaces the VTA that was published in Volume 73 of the **Federal Register** at page 51692 (Sept. 4, 2008). Because this replacement contains new substantive provisions, those wishing to participate in the Agreement shall submit new applications.

Voluntary Tanker Agreement

I. Purpose

The Administrator has determined, in accordance with Section 708(c)(1) of the DPA, that conditions exist which may pose a direct threat to the national defense of the United States or its preparedness programs and, under the provisions of Section 708, has certified to the Attorney General of the United States (Attorney General) that a standby agreement for the utilization of tanker capacity is necessary for the national defense. The Attorney General, in consultation with the Chairman of the Federal Trade Commission (FTC), has issued a finding that tanker capacity to meet national defense requirements cannot be provided by the industry through a voluntary agreement having fewer anticompetitive effects or without a voluntary agreement.

The purpose of the Agreement is to provide a responsive transition from peace to contingency operations through procedures agreed upon in advance to provide tanker capacity to support DoD contingency requirements. The Agreement establishes procedures for the commitment of tanker capacity to satisfy such requirements. The Agreement is intended to promote and facilitate DoD's use of existing commercial tanker resources in a manner which minimizes disruption to commercial operations whenever possible.

The Agreement will change from standby to active status upon activation by appropriate authority as described in Section VI.

II. Authorities

A. Maritime Administration (MARAD)

1. Section 708, DPA (50 U.S.C. 4558); 46 U.S.C. 53107; Executive Order (E.O.) 13603, 77 FR 16651 (March 22, 2012); 49 CFR 1.93 (l).

2. Section 401 of E.O. 13603, delegated the authority of the President under Section 708 of the DPA to the Secretary of Transportation (SecTrans), among others. SecTrans delegated to the Administrator the authority under which the Voluntary Tanker Agreement is sponsored in 49 CFR 1.93(l).

B. U.S. Transportation Command (USTRANSCOM)

1. Sections 113, 161–169 of Title 10 of the United States Code.

2. DoD Directive 5158.4 designating Commander USTRANSCOM to provide air, land, and sea transportation for the DoD.

III. General

A. Participation

1. Operators of tanker vessels greater than 20,000 deadweight tons (DWT) may become Participants in this Agreement by submitting an executed copy of the form specified in Section VII of this Agreement that is approved by MARAD.

2. Operators of Integrated Tug-Barges (ITBs) and Articulated Tug-Barges (ATBs) greater than 20,000 DWT may become Participants in this Agreement by submitting an executed copy of the form specified in Section VII of this Agreement that is approved by MARAD.

3. Operators of tankers or ITB and ATB vessels of less than 20,000 deadweight tons may also submit an application and become Participants if such vessels are deemed to meet U.S. national security requirements or the needs of MARAD and the U.S. Transportation Command, and MARAD accepts the application.

4. For the purposes of this Agreement, ''Participant'' includes the corporate entity entering into this Agreement and all United States subsidiaries and affiliates of that entity which own or operate ships in the course of their regular business and in which that entity has more than fifty (50) percent control either by stock ownership or otherwise.

5. A list of Participants will be published annually in the **Federal Register**.

6. For the purposes of this Agreement, ''Operator'' shall mean a person that either owns and controls an eligible vessel or that charters and operates an eligible vessel through a demise charter that transfers virtually all the rights and obligations of the vessel owner to the demise charterer, such as that of crewing, supplying, maintaining, insuring, and navigating the vessel.

B. Effective Date and Duration of Participation

This Agreement is effective upon execution of the application form (see Section VII below) by the Participant and the Administrator or their authorized designees and shall remain in effect until terminated in accordance with 44 CFR 332.4.

C. Withdrawal From the Agreement

Participants may withdraw from this Agreement, subject to the fulfillment of obligations incurred under the Agreement prior to the date such withdrawal becomes effective, by giving written notice to the Administrator. Withdrawal from this Agreement will not deprive a Participant of an antitrust defense otherwise available to it in accordance with Section 708 of the DPA for the fulfillment of obligations incurred prior to withdrawal.

D. Rules and Regulations

Participants acknowledge and agree to abide by all provisions of Section 708 of the DPA, as amended, and regulations related thereto which are promulgated by the SecTrans, the Attorney General, the FTC, and the Federal Emergency Management Agency. Standards and procedures pertaining to voluntary agreements have been promulgated in 44 CFR part 332. The Administrator shall inform Participants of new rules and regulations as they are issued.

E. Amendment of the Agreement

1. The Attorney General may modify this Agreement, in writing, after consultation with the Chairman of the FTC, SecTrans, through her representative MARAD, and SecDef, through his representative, Commander USTRANSCOM. The Administrator, Commander USTRANSCOM, and Participants may modify this Agreement at any time by mutual agreement, but only in writing with the approval of the Attorney General and the Chairman of the FTC.

2. A Participant may propose amendments to the Agreement at any time.

F. Administrative Expenses

Administrative and out-of-pocket expenses incurred by Participants shall be borne solely by Participants.

G. Record Keeping

1. MARAD and the DoD have primary responsibility for maintaining records in accordance with 44 CFR part 332.

2. The Director, Office of Sealift Support, MARAD, shall be the official custodian of records related to the carrying out of this Agreement, except records of direct dealings between the DoD and Participants.

3. For direct dealings between the DoD and Participants, the designee of the SecDef shall be the official custodian of records, but the Director, Office of Sealift Support, MARAD shall have complete access thereto.

4. In accordance with 44 CFR 332.3(d), each Participant shall maintain for five years all minutes of meetings, transcripts, records, documents, and other data, including any communications with other Participants or with any other member of the industry, related to the carrying out of this Agreement. Each Participant agrees to make available to the Administrator, the Commander USTRANSCOM, the Attorney General, and the Chairman of the FTC for inspection and copying at reasonable times and upon reasonable notice any item that this section requires the Participant to maintain. Any record maintained under this section shall be available for public inspection and copying, unless exempted on the grounds specified in 5 U.S.C. 552(b)(1), (3) or (4) or identified as privileged and confidential information in accordance with Section 705(e) of the DPA, as amended, and 44 CFR part 332.5.

H. Requisition of Ships of Non-Participants

The Administrator, upon Presidential authorization, may requisition ships of non-Participants to supplement capacity made available for defense operations under this Agreement and to balance the economic burden of defense support among companies operating in U.S. trade. Non-Participant owners of requisitioned tankers shall not participate in the Tanker Requirements Committee and shall not enjoy the immunities provided by this Agreement.

I. Waivers

In situations where the activation of the Agreement deprives a Participant of all or a portion of its [U.S. coastwise qualified vessel capacity] and, at the same time, creates a general shortage of U.S. coastwise qualified vessel capacity on the market, the Administrator may request that the Assistant Commissioner, Office of Regulations and rulings, U.S. Customs and Border Protection, Department of Homeland Security, grant a temporary waiver pursuant to section 501 of title 46, to permit a Participant to charter or otherwise utilize non-U.S. coastwise qualified vessel capacity. The capacity for which such waivers are requested will be approximately equal to the U.S. coastwise qualified vessel capacity chartered to the DoD. Any waiver that may be granted pursuant to this paragraph shall be effective for the period that the U.S. coastwise qualified vessel capacity is on charter to the DoD plus a reasonable time for termination of the replacement capacity charters as determined by the Administrator.

J. Temporary Replacement Vessel

Notwithstanding 10 U.S.C. 2631, 46 U.S.C. 55304, 55305, 55312 or any other cargo preference law of the United States—

1. A Participant that is also a contractor under the Maritime Security Program, 46 U.S.C. 53101, *et seq.,* (MSP) may operate or employ in foreign commerce a foreign-flag vessel or foreign-flag vessel capacity as a temporary replacement for a United States-documented vessel or United States-documented vessel capacity that is activated by the SecDef under this Agreement.

2. Such replacement vessel or vessel capacity shall be eligible during the replacement period to transport preference cargoes subject to 10 U.S.C. 2631, and 46 U.S.C. 55304, 55305, or 55312 to the same extent as the eligibility of the vessel or vessel capacity replaced.

IV. Antitrust Defense

Under the provisions of Subsection 708(j) of the DPA, each Participant in this Agreement shall have available as a defense to any civil or criminal action brought for violation of the antitrust laws with respect to any act or omission to act to develop or carry out this Agreement, that such act or omission to act was taken by the Participant in the course of developing or carrying out this Agreement, that the Participant fully complied with the provisions of the DPA and the rules promulgated thereunder, and that the Participant acted in accordance with the terms of this Agreement. This defense shall not be available to the Participant for any act or omission occurring after the termination of this Agreement, nor shall it be available, upon the modification of this Agreement, with respect to any subsequent act or omission that is beyond the scope of the modified Agreement, except that no such termination or modification shall be accomplished in a way that will deprive Participants of this antitrust defense for the fulfillment of obligations incurred. This defense shall be available only if and to the extent that the Participants asserting it demonstrate that the action, which includes a discussion or agreement, was within the scope of the Agreement. The person asserting the defense bears the burden of proof. The defense shall not be available if the person against whom it is asserted shows that the action was taken for the purpose of violating the antitrust laws of the United States.

V. Terms and Conditions

A. Agreement by Participants

1. Each Participant agrees to contribute tanker capacity as requested by the Administrator in accordance with Section V. B. below at such times and in such amounts as the Administrator, as requested by DoD, shall determine to be necessary to meet the essential needs of the DoD for the transportation of DoD petroleum and petroleum products in bulk by sea.

2. Each Participant further agrees to make tankers and tanker capacity available to other Participants when requested by the Administrator, on the advice of the Tanker Requirements Committee, in order to ensure that contributions to meet DoD requirements are made on a proportionate basis whenever possible or to ensure that no participating tanker operator is disproportionately hampered in meeting the needs of the civil economy.

B. Proportionate Contribution of Capacity

1. Any entity receiving payments under the MSP shall become a Participant with respect to all tankers enrolled in the MSP at all times until the date the MSP operating agreement would have terminated according to 46 U.S.C. 53104(a). Such participation shall satisfy the requirement for an MSP participant to be enrolled in an emergency preparedness program approved by SecDef as provided in 46 U.S.C. 53107.

2. Participants hereto not receiving MSP payments under the MSP, agree to contribute tanker capacity under the Agreement in the proportion that its ''controlled tonnage'' bears to the total ''controlled tonnage'' of all Participants. Because exact proportions may not be feasible, each Participant agrees that variances are permissible at the discretion of the Administrator.

3. ''Clean Tankers'' and ''Clean Tonnage'' shall mean tankers that are inspected and approved by DLA Energy Quality Assurance Representatives (QAR), capable of meeting DoD quality standards, and able to carry refined petroleum products.

a. Chemical tankers and tankers in dirty trade may contribute Clean Tanker capacity only after being certified as being able to meet DoD quality standards to carry refined petroleum products to meet DoD requirements.

4. ''Controlled Tonnage'' shall mean tankers, ITBs, and ATBs of over 20,000 DWT capacity, which are:

a. Militarily useful in the transportation of refined DoD cargoes pursuant to the requirements of associated warplans;

b. Vessels in which, as of the effective date of the activation of this Agreement, the Participant or any of its U.S. subsidiaries or affiliates has a controlling interest and which are registered in any of the following countries: The United States, Liberia, Panama, Honduras, the Bahamas, or the Marshall Islands; and shall include:

i. Vessels on charter or under contract to such Participant for a period of six (6) months or more from the effective date of activation of the Agreement, regardless of flag of registry, exclusive of tonnage available to the Participant under contracts of affreightment and consecutive voyage charter; provided that, in the event an owner of a vessel terminates a time charter in accordance with a war clause, the affected tonnage will be excluded from the chartering Participant's Controlled Tonnage; and

ii. Any other non-U.S.-flag tonnage which a Participant may offer to designate as Controlled Tonnage and which the Tanker Requirements Committee accepts;

c. And shall not include:

i. Tankers described in subparagraph b. which are chartered out or under contract to others for a remaining period of six (6) months or more from the effective date of activation of this Agreement; or

ii. Certain vessels which are fitted with special gear and are on permanent station for the storage of crude oil from a production platform and vessels which may have a dual role of production storage and transportation use to a limited location.

5. This Agreement shall not be deemed to commit any vessel with respect to which the law of the country of registration requires the approval of the government before entering into this Agreement of furnishing such vessel under the terms of this Agreement until such time as the required approval has been obtained.

6. The obligations of Participants to contribute Clean Tanker capacity under the Agreement shall be calculated on a proportionate basis wherever possible among the Participants by the Tanker Requirements Committee.

7. A vessel on charter to a Participant shall not be subject to a relet to the DoD in the case where the period of the relet would be longer than the term of the Participant's charter or in the case where the relet would otherwise breach the terms of the charter, but such tonnage shall be included in the calculation of the Participant's Controlled Tonnage.

8. The Administrator retains the right under law to requisition ships of Participants. A Participant's ships which are directly requisitioned by the U.S. Government or which are called up pursuant to other U.S. Government voluntary arrangements shall be credited against the Participant's proportionate contribution under this Agreement. Ships on charter to the DoD when this Agreement is activated shall not be so credited.

C. Reports of Controlled Tonnage

Twice annually, or upon request of the Administrator and in such form as may be requested, each Participant shall submit information as to ''controlled tonnage'' necessary for the carrying out of this Agreement. Information which a Participant identifies as privileged and confidential shall be withheld from public disclosure in accordance with Sections 708(h)(3) (50 U.S.C. 4558) and 705(e) (50 U.S.C. 4555) of the DPA, as amended, and 44 CFR part 332.5.

D. Freight Rates Under the Agreement

1. The rate of charter hire applicable to each charter under this Agreement shall be the ''prevailing market rate'' effective at the time of the proposed loading of the vessel. The ''prevailing market rate'' shall be determined by the Military Sealift Command (MSC) Contracting Officer utilizing the price analysis techniques set forth in FAR Part 15.4 to determine that the negotiated rates are fair and reasonable, utilizing market or previous contract prices. Time charter hire rates, for either U.S. or foreign-flag tankers, shall be expressed in terms of a per diem rate(s).

2. The rate of charter hire fixed with respect to each charter shall apply for the entire period of the charter, except that:

a. For a consecutive voyage charter, the rate of charter shall be increased or decreased to reflect increases or decreases in the price of bunker fuel applicable in the area of the vessel's trade; and

b. Reimbursement for increased war risk insurance premiums will be made in accordance with Section V.E.

E. War Risk Insurance

1. Increased War risk insurance premiums for time chartered vessels will be paid by DoD, or MARAD war risk insurance policies will be implemented.

2. For voyage and consecutive voyage charters, the Participant shall be

reimbursed for increases in war risk insurance premiums that are applicable to the actual voyage but are announced after the charter rate is established by the broker panel.

3. For any ship chartered under this Agreement, the SecDef may procure from the SecTrans war risk insurance on hull and machinery, war risk protection and indemnity insurance, and Second Seaman's War Risk Insurance, subject to 46 U.S.C. 53905.

VI. Activation of the Agreement

A. Determination of Necessity

This Agreement may be activated at the request of the Commander USTRANSCOM, with the approval of SecDef, to support Contingency operations when there is a tanker capacity emergency. A tanker capacity emergency shall be deemed to exist when the Commander USTRANSCOM finds that tanker capacity required to support operations of U.S. forces outside the continental United States cannot be supplied through the commercial tanker charter market in accordance with applicable laws and regulations or other voluntary arrangements. The Administrator shall notify the Attorney General and the Chairman of the FTC when such a finding is made.

B. Tanker Requirements Committee

1. There is established a Tanker Requirements Committee (the ''Committee'') to provide USTRANSCOM, MARAD, and Participants a forum to:

a. Analyze DoD Contingency tanker requirements;

b. Identify commercial tanker capacity that may be used to meet DoD requirements related to Contingencies and, as requested by USTRANSCOM, exercises and special movements;

c. Develop and recommend Concepts of Operations (CONOPS) to meet DoD-approved Contingency requirements and, as requested by USTRANSCOM, exercises and special movements; and

d. Advise the Administrator on the tanker capacity that each Participant controls which is capable of meeting Contingency requirements.

2. The Committee will be co-chaired by MARAD and USTRANSCOM and will convene as jointly determined by the co-chairs.

3. The Committee will not be used for contract negotiations and/or contract discussions between carriers and DoD; such negotiations and/or discussions will be in accordance with applicable DoD contracting policies and procedures.

4. The Committee will consist of designated representatives from MARAD, USTRANSCOM, to include Military Sealift Command, Defense Logistics Agency-Energy, each Participant, and maritime labor. Other attendees may be invited at the discretion of the co-chairs. Representatives will provide technical advice and support to ensure maximum coordination, efficiency, and effectiveness in the use of Participants' resources. All Participants will be invited to open Committee meetings. For selected Committee meetings, attendance may be limited to designated Participants to meet specific operational requirements.

5. The Committee co-chairs shall:

a. Notify the Attorney General, the Chairman of the FTC, and all Participants of the time, place, and nature of each meeting and of the proposed agenda of each meeting to be held to carry out this Agreement;

b. Provide for publication in the **Federal Register** of a notice of the time, place, and nature of each meeting. If a meeting is open, a **Federal Register** notice will be published reasonably in advance of the meeting. If a meeting is closed, a **Federal Register** notice will be published within ten (10) days of the meeting and will include the reasons why the meeting is closed;

c. Establish the agenda for each meeting and be responsible for adherence to the agenda;

d. Provide for a written summary or other record of each meeting and provide copies of transcripts or other records to the Attorney General, the Chairman of the FTC, and all Participants; and

e. Take necessary actions to protect from public disclosure any data discussed with or obtained from Participants which a Participant has identified as privileged and confidential in accordance with Sections 708(h)(3) and 705(e) of the DPA, as amended, or which qualifies for withholding under 44 CFR part 332.5.

C. Tanker Charters

MSC, as designated by USTRANSCOM, will deal directly with tanker operators in the making of charter parties and other arrangements to meet the defense requirement, keeping the Administrator informed. To reduce risk to owners and to control cost to the government, all government charters shall be time charters, unless specifically designated as voyage charters by the Contracting Officer. If vessels are chartered between Participants, Participants shall keep the Administrator informed. The Administrator shall keep the Attorney General and the Chairman of the FTC informed of the actions taken under this Agreement.

D. Termination of Charters Under the Agreement

MSC, as the contracting officer, shall notify the Administrator as far as possible in advance of the prospective termination of the need for tanker capacity under this Agreement.

VII. Application and Agreement

The Administrator has adopted and makes available a form on which tanker operators may apply for and become Participants in this Agreement (''Application and Agreement to Participate in the Voluntary Tanker Agreement''). The form shall incorporate by reference the terms of this Agreement.

Application and Agreement To Participate in the Voluntary Tanker Agreement

The applicant identified below hereby applies to participate in the Maritime Administration's agreement entitled ''Voluntary Tanker Agreement.'' The text of said Agreement is published in ____ **Federal Register** ______, ______, 2018. This Agreement is authorized under Section 708 of the Defense Production Act of 1950, as amended. Regulations governing this Agreement appear at 44 CFR part 332 and as reflected at 49 CFR 1.93(l).

The applicant, if selected, hereby acknowledges and agrees to the incorporation by reference into this Application and Agreement of the entire text of the Voluntary Tanker Agreement published in ____ **Federal Register** ______, ______, 2019, as though said text were physically recited herein.

The applicant, as Participant, agrees to comply with the provisions of Section 708 of the Defense Production Act of 1950, as amended, the regulations of 44 CFR part 332 and as reflected at 49 CFR 1.93(l), and the terms of the Voluntary Tanker Agreement. Further, the applicant, if selected as a Participant, hereby agrees to contractually commit to make vessels or capacity available for use by the Department of Defense and to other Participants for the purpose of meeting national defense requirements.

How do I submit comments?

Please submit your comments, including the attachments, following the instructions provided under the above heading entitled **ADDRESSES**. Be advised that it may take a few hours or even days for your comment to be reflected on the docket. In addition, your comments must be written in English. We encourage you to provide concise comments and you may attach additional documents as necessary. There is no limit on the length of the attachments.

Please note that even after the comment period has closed, MARAD will continue to file relevant information in the Docket as it becomes available.

Where do I go to read public comments, and find supporting information?

Go to the docket online at *http://www.regulations.gov,* keyword search MARAD–2019–0183 or visit us in person at the Docket Management Facility (see **ADDRESSES** for hours of operation). We recommend that you periodically check the Docket for new submissions and supporting material.

Will my comments be made available to the public?

Yes. Be aware that your entire comment, including your personal identifying information, will be made publicly available.

May I submit comments confidentially?

If you wish to submit comments under a claim of confidentiality, you should submit three copies of your complete submission, including the information you claim to be confidential business information, to the Department of Transportation, Maritime Administration, Office of Legislation and Regulations, MAR–225, W24–302, 1200 New Jersey Avenue SE, Washington, DC 20590. Include a cover letter setting forth with specificity the basis for any such claim and, if possible, a summary of your submission that can be made available to the public.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to *www.regulations.gov,* as described in the system of records notice, DOT/ALL–14 FDMS, accessible through *www.dot.gov/privacy.* To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

Authority: 50 U.S.C. 4558, 49 CFR 1.93(a) and (l), 44 CFR 332.

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2019–0130; Notice No. 2019–07]

Hazardous Materials: Unapproved Foreign-Made DOT Cylinders

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT).

ACTION: Safety advisory notice.

SUMMARY: PHMSA is issuing this safety advisory notice to inform the public, industrial gas stakeholders, and relevant government officials of the risks associated with requalifying, filling, and transporting cylinders bearing the DOT specification markings ''DOT 4E'' or ''DOT 4BA'' that were produced by a company located in Thailand by the name of Metal Mate. Metal Mate does not have an approval from PHMSA to manufacture cylinders to DOT specifications; therefore, cylinders marked with the Metal Mate name are not DOT specification cylinders. They must not be used to transport hazardous materials in commerce to, from, or within the United States, or on a United States-registered aircraft. These cylinders may not perform to the marked DOT performance standard and may not be safe for commercial transportation or consumer use.

FOR FURTHER INFORMATION CONTACT: The Hazardous Materials Information Center, (202) 366–4488 or 1–800–467–4922; *infocntr@dot.gov.*

SUPPLEMENTARY INFORMATION: PHMSA has become aware that a company located in Thailand by the name of Metal Mate has been producing and selling propane cylinders that were marked as ''DOT 4E'' without an approval from PHMSA. PHMSA is aware of two cylinders found in Australia that were marked as ''DOT 4E 240'' with Metal Mate's name marked as the manufacturer. Third party testing revealed that the cylinders may not meet the DOT 4E standard. Additionally, another cylinder produced by Metal Mate and marked as ''DOT 4E'' has been found in Colombia. Metal Mate cylinders can be identified by the name ''Metal Mate'' and ''MM'' logo stamped into the cylinder collar adjacent to other cylinder markings (water capacity, test pressure, serial number, original test date).

PHMSA has also received information that Metal Mate is producing cylinders that are being marked as ''DOT 4BA 240.'' Evidence indicates that Metal Mate has shipped cylinders as marked to both Bangladesh and New Zealand.

Federal hazardous materials transportation law (49 U.S.C. 5101–5128) authorizes the Secretary of Transportation (Secretary) to establish regulations to safely transport hazardous materials in intrastate, interstate, and foreign commerce. It also authorizes the Secretary to apply these regulations to persons who manufacture or maintain a packaging or a component of a packaging that is represented, marked, certified, or sold as qualified for use in the transportation of a hazardous material in commerce (see 49 CFR 171.1). The Secretary delegated this authority to PHMSA in 49 CFR 1.97(b). As stated in 49 CFR 178.2(b), marking a packaging with a DOT specification, *e.g.*, ''DOT 4E 240,'' means that all requirements of the marked DOT specification have been met and each action performed by, or for, the person whose name or symbol appears on the cylinder marking meets the requirements specified in part 178. These requirements include multiple tests for DOT 4BA and DOT 4E cylinders. For DOT 4E cylinders, the specification also requires a chemical analysis (see 49 CFR 178.51 for the specification requirements for DOT 4BA cylinders, and § 178.68 for the specification requirements for DOT 4E cylinders).

Pursuant to 49 CFR 107.807(a), a foreign manufacturer who seeks to manufacture DOT specification cylinders must obtain an approval from PHMSA that permits that manufacturer to perform the required chemical analyses and tests outside the United States. Metal Mate does not possess any such approval from PHMSA, and is therefore not authorized to mark cylinders that it manufactures as complying with DOT specifications. Any cylinder produced by Metal Mate marked as meeting a DOT specification is not approved, is not a DOT specification cylinder, and may not meet DOT performance standards.

The PHMSA approval process [1] involves the careful review and onsite inspection of the applicant company's product documentation, cylinder manufacturing process, employee training records, and the presence and effectiveness of quality control measures at various stages during the cylinders' production. Since this review and inspection was not performed, DOT has no evidence that these cylinders are designed to withstand pressurization during filling and use and to safely contain hazardous materials transported in commerce. Improper design and manufacturing could potentially lead to a release of hazardous materials or failure of the cylinder.

Consequently, as a safety measure, PHMSA wants to inform consumers that cylinders manufactured by Metal Mate, even if bearing a DOT specification marking, must not be used to transport hazardous materials in commerce to, from, or within the United States, or on a United States-registered aircraft. These cylinders may not perform to DOT performance standards, and may not be safe to use as one would use a DOT specification cylinder.

Issued in Washington, DC, on October 28, 2019.

William S. Schoonover,

Associate Administrator for Hazardous Materials Safety, Pipeline and Hazardous Materials Safety Administration.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Docket No. DOT–OST–2015–0076]

Agency Information Collection Activities: Request for Comments; Clearance of a New Information Collection(s): U.S. Department of Transportation, Individual Complaint of Employment Discrimination Form

AGENCY: Office of the Secretary, U.S. Department of Transportation.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces that the U.S. Department of Transportation (DOT) will forward the Information Collection Request (ICR) abstracted below to the Office of Management and Budget (OMB) for renewal of a previously approved collection. The ICR describes the nature of the information collection and its expected cost and burden hours. The OMB approved the form in 2017 with its renewal required by January 31, 2020.

DATES: Comments on this notice must be received by December 31, 2019.

ADDRESSES: You may submit comments [identified by Docket No. DOT–OST–2015–0076] by any of the following methods:

Fax: 202–493–2064.

Mail: Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590.

Hand Delivery: Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Federal eRulemaking Portal: http://www.regulations.gov. Follow the online instructions for submitting comments.

Instructions: All submissions must include the Agency name (Office of the Secretary, DOT) and docket number for this rulemaking. You should provide two copies of your comments if you submit them by mail or hand delivery. Note that all comments received will be posted without change to *www.regulations.gov,* including any personal information provided, and will be available to internet users. You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477) or you may visit *http://DocketsInfo.dot.gov.*

Docket: For internet access to the docket to read background documents and comments received, go to *www.regulations.gov.* Background documents and comments received may also be viewed at DOT, 1200 New Jersey Avenue SE, Docket Operations, West Building, Room W12–140, Washington, DC 25090, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Beverly Onwubere, Associate Director, EEO Complaints and Investigations Division (S–34), U.S. Department of Transportation, Departmental Office of Civil Rights, W78–316, 1200 New Jersey Avenue SE, Washington, DC 20590, 202–366–5988 (office), *beverly.onwubere@dot.gov.*

SUPPLEMENTARY INFORMATION:

OMB Control Number: 2105–0556.

Title: Individual Compliant of Employment Discrimination Form.

Form Numbers: DOT–F 1050–8.

Type of Review: Extension of a Previously Approved Collection.

Abstract: The DOT will utilize the form to collect information necessary to process EEO discrimination complaints filed by individuals who are Federal employees, former employees or applicants for employment with the Department. These complaints are processed in accordance with the U.S. Equal Employment Opportunity Commission's regulations, Title 29, Code of Federal Regulations, Part 1614, as amended. The DOT will use the form to: (a) Request requisite information from the applicant for processing his/her EEO discrimination complaint; and (b) obtain information to identify an individual or his or her attorney or other representative, if appropriate. An applicant's filing of an EEO discrimination complaint is solely voluntary. The DOT estimates that it takes an applicant approximately one hour to complete the form.

Respondents: Federal employees, former employees or applicants for employment with the Department.

Estimated Number of Respondents: 100 per year.

Estimated Total Burden on Respondents: 100 hours per year.

Comments Are Invited on: (a) Whether the proposed collection of information is reasonable for the proper performance of the EEO functions of the Department, and (b) the accuracy of the Department's estimate of the burden of the proposed information collection. All responses to the notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Issued in Washington, DC, on October 23, 2019.

Beverly Onwubere,

Associate Director, EEO Complaints and Investigations Division Departmental Office of Civil Rights, U.S. Department of Transportation.

[FR Doc. 2019–23882 Filed 10–31–19; 8:45 am]

BILLING CODE 4910–9X–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–New]

Agency Information Collection Activity Under OMB Review: Clearance for A–11 Section 280 Improving Customer Experience Information Collection

AGENCY: Veterans Experience Office, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Experience Office, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Comments must be submitted on or before December 2, 2019.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov*, or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW, Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov.* Please refer to ''Clearance for A–11 Section 280 Improving Customer Experience Information Collection'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Danny S. Green, Enterprise Records Service (005R1B), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, (202) 421–1354 or email *danny.green2@va.gov.* Please refer to ''Clearance for A–11 Section 280 Improving Customer Experience Information Collection'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: OMB Circular A–11 (2018), Section 280.

Title: Clearance for A–11 Section 280 Improving Customer Experience Information Collection.

OMB Control Number: 2900–New.

Type of Review: New collection.

Abstract: Whether seeking a loan, Social Security benefits, veterans benefits, or other services provided by the Federal Government, individuals and businesses expect Government customer services to be efficient and intuitive, just like services from leading private-sector organizations. Yet the 2016 American Consumer Satisfaction Index and the 2017 Forrester Federal Customer Experience Index show that, on average, Government services lag nine percentage points behind the private sector. A modern, streamlined and responsive customer experience means: Raising government-wide customer experience to the average of the private sector service industry; developing indicators for high-impact Federal programs to monitor progress towards excellent customer experience and mature digital services; and providing the structure (including increasing transparency) and resources to ensure customer experience is a focal point for agency leadership. To support this, OMB Circular A–11 Section 280 established government-wide standards for mature customer experience organizations in government and measurement. To enable Federal programs to deliver the experience taxpayers deserve, they must undertake three general categories of activities: Conduct ongoing customer research, gather and share customer feedback, and test services and digital products.

These data collection efforts may be either qualitative or quantitative in nature or may consist of mixed methods. Additionally, data may be collected via a variety of means, including but not limited to electronic or social media, direct or indirect observation (*i.e.,* in person, video and audio collections), interviews, questionnaires, surveys, and focus groups. Veterans Experience Office will limit its inquiries to data collections that solicit strictly voluntary opinions or responses. Steps will be taken to ensure anonymity of respondents in each activity covered by this request.

The results of the data collected will be used to improve the delivery of Federal services and programs. It will include the creation of personas, customer journey maps, and reports and summaries of customer feedback data and user insights. Veterans Experience Office will collect this information by electronic means when possible, as well as by mail, fax, telephone, technical discussions, and in-person interviews. Veterans Experience Office may also utilize observational techniques to collect this information.

Collections will be targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future. For the purposes of this request, ''customers'' are individuals, businesses, and organizations that interact with a Federal Government agency or program, either directly or via a Federal contractor. This could include individuals or households; businesses or other for-profit organizations; not-for profit institutions; State, local or tribal governments; Federal government; and Universities.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 84 FR 149 on August 2, 2019, pages 37953 and 37954. No comments on this data collection request were submitted by the public.

Affected Public: Individuals or Households.

Estimated Annual Burden: 625,000.

Estimated Average Burden per Respondent: Varied, dependent upon the data collection method used. The possible response time to complete a questionnaire or survey may be 2 minutes or up to 2 hours to participate in an interview.

Frequency of Response: Varied, dependent upon the data collection method used.

Estimated Number of Respondents: 2,500,000.

By direction of the Secretary.

Danny S. Green,

Interim VA Clearance Officer, Office of Quality, Performance and Risk, Department of Veterans Affairs.

RIN 1840–AD36, 1840–AD37

[Docket ID ED–2018–OPE–0076]

Student Assistance General Provisions, The Secretary's Recognition of Accrediting Agencies, The Secretary's Recognition Procedures for State Agencies

AGENCY: Office of Postsecondary Education, Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations governing the recognition of accrediting agencies, certain student assistance general provisions, and institutional eligibility, as well as makes various technical corrections.

DATES: These regulations are effective July 1, 2020.

Implementation date: For the implementation dates of the included regulatory provisions, see the *Implementation Date of These Regulations* section of this document.

FOR FURTHER INFORMATION CONTACT: For further information related to recognition of accrediting agencies, Herman Bounds at *herman.bounds@ed.gov* or (202) 453–7615 or Elizabeth Daggett at *elizabeth.daggett@ed.gov* or (202) 453–6190. For further information related to State authorization, Scott Filter at *scott.filter@ed.gov* or (202) 453–7249 or Sophia McArdle at *sophia.mcardle@ed.gov* or (202) 453–6318. For all other information related to this document, Barbara Hoblitzell at *barbara.hoblitzell@ed.gov* or (202) 453–7583 or Annmarie Weisman at *annmarie.weisman@ed.gov* or (202) 453–6712. If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll-free, at (800) 877–8339.

SUPPLEMENTARY INFORMATION:

Executive Summary

Purpose of This Regulatory Action: Through this regulatory action, the Department of Education (Department or we): (1) Strengthens the regulatory triad by more clearly defining the roles and responsibilities of accrediting agencies, States, and the Department in oversight of institutions participating in the Federal Student Aid programs authorized under title IV of the Higher Education Act of 1965, as amended (title IV, HEA programs); (2) establishes ''substantial compliance'' with regard to recognition criteria as the standard for agency recognition; (3) increases academic and career mobility for students by eliminating artificial regulatory barriers to work in a profession; (4) provides greater flexibility for institutions to engage in innovative educational practices more expeditiously and meet local and national workforce needs; (5) protects institutional autonomy, honors individual campus missions, and affords institutions the opportunity to build campus communities based upon shared values; (6) modifies ''substantive change'' requirements to provide greater flexibility to institutions to innovate and respond to the needs of students and employers, while maintaining strict agency oversight in instances of more complicated or higher risk changes in institutional mission, program mix, or level of credential offered; (7) clarifies the Department's accrediting agency recognition process, including accurate recognition of the geographic area within which an agency conducts business; (8) encourages and enables accrediting agencies to support innovative practices, and provides support to accrediting agencies when they take adverse actions; and (9) modifies the requirements for State authorization to clarify the responsibilities of institutions and States regarding students enrolled in distance education programs and students enrolled in programs that lead to licensure and certification.

Summary of the Major Provisions of This Regulatory Action

These regulations—

- Revise the requirements for accrediting agencies in their oversight of member institutions and programs to be less prescriptive and provide greater autonomy and flexibility to facilitate agility and responsiveness and promote innovation;
- Revise the criteria used by the Secretary to recognize accrediting agencies to focus on education quality and allow competition;
- Revise the Department's process for recognition and review of accrediting agencies;
- Clarify the core oversight responsibilities among each entity in the regulatory triad—accrediting agencies, States, and the Department—to hold institutions accountable;
- Establish the roles and responsibilities of institutions and accrediting agencies in the teach-out process;
- Establish that the Department recognizes an institution's legal authorization to operate postsecondary educational programs when it is exempt from State authorization under the State constitution or by State law as a religious institution with a religious mission;
- Revise the State authorization requirements for institutions offering distance education or correspondence courses; and
- Remove the regulations related to the Robert C. Byrd Honors Scholarship Program, which has not received funding in many years.

Authority for this Regulatory Action: Section 410 of the General Education Provisions Act provides the Secretary with authority to make, promulgate, issue, rescind, and amend rules and regulations governing the manner of operations of, and governing the applicable programs administered by, the Department. 20 U.S.C. 1221e–3. Furthermore, under section 414 of the Department of Education Organization Act, the Secretary is authorized to prescribe such rules and regulations as the Secretary determines necessary or appropriate to administer and manage the functions of the Secretary or the Department. 20 U.S.C. 3474. These authorities, together with the provisions in the HEA, permit the Secretary to disclose information about title IV, HEA programs to students, prospective students, and their families, the public, taxpayers, the Government, and institutions. Further, section 431 of the Department of Education Organization Act provides authority to the Secretary, in relevant part, to inform the public about federally supported education programs and collect data and information on applicable programs for the purpose of obtaining objective measurements of the effectiveness of such programs in achieving their intended purposes. 20 U.S.C. 1231a.

Costs and Benefits: As further detailed in the Regulatory Impact Analysis, the benefits of these regulations include increasing transparency and improving institutional access for students, honoring the autonomy and independence of agencies and institutions, restoring focus and clarity to the Department's agency recognition process, integrating risk-based review into the recognition process, improving teach-outs for students at closed or closing institutions, allowing accrediting agencies to focus greater attention on student learning and the student experience, and restoring public trust in the rigor of the accreditation process and the value of postsecondary education. These regulations reduce regulatory burden on institutions that wish to develop and implement innovative programs and on accrediting agencies because of greater flexibility to make low-risk decisions at the staff level. In addition, these regulations significantly reduce the regulatory burden associated with preparing and submitting accrediting agency petitions for recognition or renewal of recognition since some of this review will now occur through a site visit, thereby eliminating the need to upload perhaps thousands of pages of documents.

The potential costs associated with the regulations include some burden associated with required disclosures and the need for accrediting agencies to develop new polices for accreditation decision-making, enforcement of standards, and substantive change reporting requirements. While not the anticipated or desired outcome, it is also possible that agencies would avail themselves of reduced regulatory burden without redeploying resources towards greater oversight of program quality, student learning, and the student experience at institutions and programs; or some agencies could lower their standards. It is, therefore, incumbent on the Department and National Advisory Committee on Institutional Quality and Integrity (NACIQI or Advisory Committee) to use new accountability and oversight tools provided for in these regulations to properly mitigate these risks and monitor agencies to ensure they are upholding their mission-based standards for educational quality.

Implementation Date of These Regulations: Section 482(c) of the HEA requires that we publish regulations affecting programs under title IV of the HEA in final form by November 1, prior to the start of the award year (July 1) to which they apply. However, that section also permits the Secretary to designate any regulation as one that an entity subject to the regulations may choose to implement earlier and the conditions for early implementation.

The Secretary is exercising her authority under section 482(c) of the HEA to designate the following new regulations at title 34 of the Code of Federal Regulations included in this document for early implementation beginning on November 1, 2019, at the discretion of each institution, or each agency, as appropriate:

(1) Section 600.2.
(2) Section 600.9.
(3) Section 668.43.
(4) Section 668.50.

The final regulations included in this document are effective July 1, 2020.

Public Comments: In response to our invitation in the notice of proposed rulemaking (NPRM) published in the **Federal Register** on June 12, 2019 (84 FR 27404), we received 195 comments on the proposed regulations. We do not discuss comments or recommendations that are beyond the scope of this regulatory action or that would require statutory change.

Analysis of Comments and Changes

We developed these regulations through negotiated rulemaking. Section 492 of the HEA requires that, before publishing any proposed regulations to implement programs under title IV of the HEA, the Secretary must obtain public involvement in the development of the proposed regulations. After obtaining advice and recommendations, the Secretary must conduct a negotiated rulemaking process to develop the proposed regulations. The negotiated rulemaking committee reached consensus on the proposed regulations that we published on June 12, 2019. The Secretary invited comments on the proposed regulations by July 12, 2019, and 195 parties submitted comments. An analysis of the comments and of the changes in the regulations since publication of the NPRM follows.

We group major issues according to subject, with appropriate sections of the regulations referenced in parentheses. We discuss other substantive issues under the sections of the regulations to which they pertain. Generally, we do not address minor, non-substantive changes, recommended changes that the law does not authorize the Secretary to make, or comments pertaining to operational processes. We also do not address comments pertaining to issues that were not within the scope of the NPRM.

General Comments

Comments: Several commenters supported the Department's proposals to amend the regulations governing the recognition of accrediting agencies, certain student assistance general provisions, and institutional eligibility. Specific support was conveyed regarding regulations that advance innovation, strengthen student protections through enhanced disclosures and teach-out requirements, preserve State reciprocity agreements, and mitigate the unjustified stigma that has been associated with attending nationally accredited institutions and the impact that has had on the transferability of credits students earned at these institutions. One commenter opined that trade schools, community colleges, apprenticeships, and other programs that are significantly shorter and less costly than a traditional bachelor's degree are alternative pathways for students' financial stability and success. The commenter stated that these programs deserve the same respect as programs at prestigious institutions, and that the proposed regulations would make dramatic steps forward for this often-overlooked form of higher education.

Discussion: We appreciate the commenters' support.

Changes: None.

Comments: Many commenters expressed general opposition to the proposed regulations, suggesting that the Department was weakening both its oversight of accrediting agencies and the accrediting agencies' oversight of institutions, reducing transparency, and putting students and taxpayers at risk. Others stated that we should withdraw the proposed regulations. The commenters were concerned that the proposed changes would erode the value of accreditation, make it difficult for prospective students to assess the quality of an institution of higher education, render postsecondary credentials and degrees meaningless, and negatively impact the competitiveness of the United States in the global economy.

Discussion: In response to the commenters requesting that the proposed regulations be strengthened, completely revised, or withdrawn, we believe these final regulations strike the right balance between our goals of encouraging innovation and ensuring accountability, transparency, clarity, and ease of administration, while providing sufficient oversight of accrediting agencies and institutions and, at the same time, protecting students, the Federal government, and taxpayers. These regulations enable accrediting agencies and institutions to be nimbler and more responsive to changing economic conditions and workforce demands, and they permit agencies to convey their intention to take negative action earlier by providing a period of time during which an institution may remain accredited and still participate in title IV programs in order to graduate students near the end of their programs or help students transfer to new institutions. The changes to the criteria used by the Secretary to recognize accrediting agencies by placing increased focus on education quality strengthen the value and effectiveness of accreditation. Additional tools available to accrediting agencies to hold institutions and programs accountable will also increase the value of accreditation. We believe that the regulations are in the best interest of students, consumers, and taxpayers, and will improve the quality of the education offered at institutions by ensuring that all institutions and programs meet a threshold of quality. Finally, we have taken heed of the Academy of Arts and Sciences recommendation in *The Future of Undergraduate Education,* that ''while the most vigorous critique of regulation has focused on federal rules, state agencies and accrediting bodies should also engage in a thoughtful review to identify regulations and other policy barriers that may impede the spread of innovation across colleges and universities. We should review and roll back, where possible, regulations that do not contribute to protecting students by insisting that providers meet rigorous quality standards. Conversely, we should direct greater regulatory attention and compliance at institutions that are chronically poor performers. A better relationship between important regulatory protections and the promotion of innovation can be achieved through thoughtful action at the State, Federal, accreditation, and institutional level.'' [1] This sentiment is endorsed by the Task Force on Federal Regulation of Higher Education, a group of college and university presidents and chancellors, created by a bipartisan group of U.S. Senators, who recently released an analysis recommending that regulation not related directly to institutional quality and improvement be identified and, where possible, eliminated.[2]

Changes: None.

Comments: Several commenters stated that the negotiated rulemaking process, by which we developed the proposed regulations, was flawed. Many commenters opined that condensing an expansive agenda with over a dozen topics into a single negotiated rulemaking provided inadequate time for the full negotiated rulemaking committee to meaningfully discuss the complete scope of regulatory changes. Some commenters objected to the Department's decision to use subcommittees, with some objecting specifically to the use of a subcommittee to develop definitions that informed the proposed changes to the accreditation regulations. Others objected to the simultaneous scheduling of subcommittee meetings, asserting that this made it impossible for negotiators to physically attend all meetings, and opined that the subcommittee meetings were not open to the public, as required by the HEA. Another commenter wrote in support of the Department's use of subcommittees, noting that they served to provide a foundation on the issues for which the negotiating committee was able to thoughtfully consider and develop the language found in the proposed regulations.

Discussion: We disagree with the commenters who said that the Department's rulemaking process was flawed. It is not uncommon for the Department to address multiple topics with a single negotiated rulemaking committee,[3] nor was this the first time that the Department utilized non-voting subcommittees to delve more deeply into a specific topic and provide recommendations to the main committee. The recommendations of the subcommittees were not binding on the members of the main committee who were free to discuss the issues in as much detail as they required to come to agreement. For example, the members of the main committee discussed in detail and made edits to the recommended definitions of terms provided to them by the subcommittee before reaching consensus.

Although the subcommittee meetings were scheduled simultaneously, the negotiators and the public were provided both live-streamed and recorded access to the subcommittees' deliberations, fulfilling the legal requirements of HEA section 492. Finally, we believe that there was enough time for the full negotiated rulemaking committee to meaningfully discuss the complete scope of regulatory changes. Specifically, the committee voted to extend the meeting times of each of the four days in the third session by two hours. The committee also voted to extend negotiations to include a fourth session of four additional days, which also included extended hours.

Changes: None.

Comments: Some commenters expressed concern that States lacked adequate representation on the negotiating committee, noting that a representative from the State Higher Education Executive Officers (SHEEO) was added following self-nomination, and that the Department cast the sole dissenting vote on the self-nomination of a representative of State attorneys general (AGs), suggesting that a critical consumer protection and State enforcement voice was omitted from the discussion. A group of commenters echoed this complaint, adding that the omission of State AGs prevented a critical voice for protecting students from being heard. Other commenters asserted that the interests of students, student veterans, and consumers were not adequately represented. Another commenter stated that no single member of the committee had expertise on all topics under consideration, asserting that section 492 of the HEA, 20 U.S.C. 1098a(b)(1), requires negotiators to have expertise in all subjects under negotiation.

Discussion: The negotiated rulemaking process ensures that we consider a broad range of interests in the development of regulations. Specifically, negotiated rulemaking is designed to enhance the rulemaking process through the involvement of all parties significantly affected by the topics for which we will develop the regulations. Accordingly, section 492(b)(1) of the HEA, 20 U.S.C. 1098a(b)(1), requires that the Department choose negotiators from groups representing many different constituencies. The Department selects individuals with demonstrated expertise or experience in the relevant subjects under negotiation, reflecting the diversity of higher education interests and stakeholder groups, large and small, national, State, and local. In addition, the Department selects negotiators with the goal of providing adequate representation for the affected parties while keeping the size of the committee manageable.

Students, student veterans, and consumers were all ably represented by non-Federal negotiators on the negotiating committee with primary and alternate representatives for each of these constituencies, as well as in the subcommittees.

The Department's decision to not include a representative of State AGs on the main committee was predicated on the fact that the topics for negotiation did not include issues that are specifically related to their work. In addition, several negotiators commented that adding a State AG to the full committee would have created conflicts and perhaps even silenced discussion, since some negotiators were the subject of one or more State AG inquiries or investigations. In fact, there were multiple members of the committee who rejected the idea of adding a State AG to the committee during the first two attempts to vote on the self-nomination of a State AG. In some prior rulemakings, the Department has determined that State AGs were an affected constituency. In those cases, the Department has included them as

[3] *www.federalregister.gov/documents/2013/11/20/2013-27850/negotiated-rulemaking-committee-negotiator-nominations-and-schedule-of-committee-meetings-title-iv* and *www.federalregister.gov/documents/2014/12/19/2014-29734/negotiated-rulemaking-committee-negotiator-nominations-and-schedule-of-committee-meetings-william-d.*

negotiators. However, the Department did not believe that State AGs were a particularly relevant constituency group for this rulemaking effort and determined that SHEEOs were the more appropriate representative of State interests, especially with regard to the topics negotiated. However, at the request of an AG who nominated himself and an additional AG, the committee voted to add a representative of State AGs to the Distance Education and Innovation subcommittee and provided the opportunity for that representative to contribute to the deliberations that informed the main committee's work.

It would be highly unusual for any individual negotiator to have expertise on all the topics under consideration in any negotiated rulemaking. The Department relies upon the collective expertise of the non-Federal negotiators to inform the discussions and deliberations, recognizing that some members of the committee will be more knowledgeable about certain topics or elements of topics than others based on their area of expertise and the constituency they represent. The HEA does not require the Department to select specific entities or individuals to be on the committee, nor does it require non-Federal negotiators be an expert in all areas under discussion, but rather, that they are ''individuals with demonstrated expertise or experience in the relevant subjects under negotiation, reflecting the diversity in the industry, representing both large and small participants, as well as individuals serving local areas and national markets.'' [4] Non-Federal negotiators representing students, student veterans, and consumers, for example, provide important perspectives on this and other negotiated rulemaking committees, but are unlikely to have the same kind of expertise as financial aid administrators. The Department agrees that it overlooked an important member of the triad by inadvertently neglecting to include a representative of the SHEEOs as one of the categories of negotiators required for this rulemaking. The Department appreciates the nomination of a representative of this constituency and the support of the other negotiators to include him as a non-Federal negotiator.

Changes: None.

Comments: A group of commenters stated that the negotiated rulemaking process failed to provide students and consumers with enough opportunity to be heard.

[4] HEA section 492, 20 U.S.C. 1098a(b)(1).

Discussion: We believe that the negotiated rulemaking process provided students and consumers with sufficient opportunity to be heard. The negotiated rulemaking committee included primary and alternate negotiators representing students, student veterans, and consumer advocates. Moreover, the Department conducted three public hearings before the negotiated rulemaking began and provided time for public comment on each of the 12 days the main committee met.

Changes: None.

Comments: Several commenters asserted that the Department failed to provide evidence to support the need for the proposed regulatory changes during the negotiated rulemaking. Several commenters objected to the proposed changes that affect religious institutions of higher education, asserting that the Department had failed to adequately substantiate the need for such changes. Another commenter stated that the Department failed to present enough evidence that accreditation is a barrier to innovation. One commenter petitioned for correction and disclosure under the Information Quality Act (IQA), arguing that the Department failed to disclose underlying sources or methodologies to support our policy proposals.

Discussion: We disagree with the commenters who stated that the Department failed to provide data or evidence to support the need for the proposed regulatory changes during the negotiated rulemaking. We acknowledge that the Department was unable to fulfill several of the specific data requests made by negotiators because they sought information that is not available. The changes to the regulations are based on many factors, including feedback we received from the public, studies conducted by higher education associations, and emerging trends in postsecondary education. Specifically, the Department developed a list of proposed regulatory provisions based on advice and recommendations submitted by individuals and organizations as testimony in a series of three public hearings in September of 2018, as well as written comments submitted directly to the Department. Department staff also identified topics for discussion and negotiation. We developed the proposed regulations that we negotiated during negotiated rulemaking with specific objectives for improvement, including updating the requirements for accrediting agencies in their oversight of member institutions or programs; establishing requirements for accrediting agencies to honor institutional mission; revising the criteria used by the Secretary to recognize accrediting agencies, emphasizing criteria that focus on educational quality; encouraging accrediting agencies and States that collect job placement data to do so using publicly available administrative datasets to increase their reliability and comparability; simplifying the Department's process for recognition and review of accrediting agencies; and promoting greater access for students to high-quality, innovative programs.

Changes: None.

Comments: An association and other commenters asserted that the decision to publish three separate NPRMs, rather than a single NPRM encompassing the entirety of the consensus language, made it impossible to submit informed comments on the partial provisions included because the public is unaware of other changes the Department intends to propose to related provisions on the agenda from this rulemaking. Another commenter asserted that there is no guarantee that the Department will propose the remaining regulations from the negotiation's consensus, suggesting that this would prevent the proposed regulations from functioning coherently.

Discussion: It is possible for members of the public to submit informed comments on the provisions that we included in the NPRM. We discussed and negotiated the topics in the proposed regulations included in the NPRM in their entirety during negotiated rulemaking. As the rulemaking sessions considered numerous topics, we separated the subject matter into groups. We included one set of topics in the first NPRM and plan to publish two additional NPRMs including the remaining topics within the next few months. Moreover, because the negotiated rulemaking committee reached consensus, the totality of the proposed regulatory changes was available to the public at the conclusion of the negotiations.

We appreciate commenters' concerns about how these regulations would function without the other regulatory pieces moving forward. However, since we achieved consensus on all topics included in negotiated rulemaking, we anticipate that the other regulations that were part of this rulemaking effort will similarly become final regulations soon.

The preparation of the NPRM included a review of other regulations in the consensus language that were dependent on the accreditation regulations, and those sections of the amended regulations were included in this regulatory package. These included any regulatory changes to definitions and regulations pertaining to State authorization of institutions and programs.

Changes: None.

Comments: One commenter noted that the final vote occurred with little time left to negotiate, rushing a consensus vote.

Discussion: The final vote in negotiated rulemaking frequently occurs at the end of the last day of negotiations. Negotiators who are not satisfied with the proposed regulations when the final vote occurs may vote against consensus or withhold their support.

Changes: None.

Comments: Some commenters alleged that negotiators who opposed the Department's proposed regulations were coerced into reaching consensus by other negotiators who suggested that, absent consensus, the Department would propose regulations that were less reflective of the negotiators' interests.

Discussion: The Department acknowledges that negotiated rulemaking can be a stressful endeavor, as each member of the committee works hard to represent the best interests of their constituency, and, by virtue of its design, consensus requires a give-and-take from all parties. However, primary committee members have independent authority to vote and should do so in keeping with their assessment of the proposed regulatory changes. Although it is true that, absent consensus, the Department may propose regulations that differ from the language developed by the negotiating committee, those proposed regulations would still be subject to public comment and could change based on that input.

Changes: None.

Comments: Some commenters opined that the public comment period was too short and did not permit a meaningful opportunity to comment, noting that when a proposed regulation—such as this one—is classified as ''economically significant'' and ''major'' by the Office of Information and Regulatory Affairs, section 6(a) of Executive Order 12866 requires the Department to ''afford the meaningful opportunity to comment on any proposed regulation, which in most cases should include a comment period of not less than 60 days.'' These commenters noted that the comment period included a Federal holiday and eight weekend days.

Discussion: We believe that the 30-day public comment period was an adequate time period for interested parties to submit comments. Because we reached consensus during negotiated rulemaking, the proposed regulatory language was available to the public at the conclusion of the final negotiating session, which afforded interested parties additional time to begin formulating their comments.

Prior to issuing the proposed regulations, the Department conducted two public hearings and four negotiated rulemaking sessions, where stakeholders and members of the public had an opportunity to weigh in on the development of much of the language reflected in the proposed regulations. In addition, we believe that the 30-day public comment period was necessary to allow us to meet the HEA's master calendar requirements. Under those requirements, the Department must publish final regulations by November 1, 2019, for them to be effective on July 1, 2020. The recognition process for accrediting agencies is lengthy and the changes to these regulations will require significant planning and coordination on the part of agencies and Department staff. Delaying the effective date of these regulations would unnecessarily delay the realization of the benefits associated with these changes.

Changes: None.

Institutional Eligibility

Definitions (§ 600.2)

Comments: Several commenters expressed support for the Department's proposed addition of a definition of ''additional location'' and its proposed revision of the term ''branch campus,'' indicating that the clarifications provided in those definitions resolved confusion regarding the two terms.

Several other commenters expressed support for the student protections included in the proposed definitions of ''teach-out'' and ''teach-out agreement,'' including prohibitions on misrepresentation of the nature of teach-out plans, teach-out agreements, and transfer of credit. The commenters also supported the proposed stipulation in the definition of ''teach-out'' that we should always permit a student to access a closed school discharge if the student chooses not to pursue the teach-out option.

Discussion: The Department thanks the commenters for their support. After further review, the Department is making minor clarifications to the definition of ''teach-out'' in § 600.2. First, we are clarifying that a teach-out is a process rather than a time period. Because teach-outs can continue for years to allow every enrolled student the opportunity to complete his or her program, it is important to clarify that it is the set of activities that define a teach-out, not necessarily the period of time.

We are also removing from the definition language that asserts that a student who chooses at the time of the teach-out announcement to leave the school and pursue a closed school loan discharge is able to do so, as this is not a definitional issue. Students who withdraw from a closing school may still be eligible for a closed school loan discharge when the formal teach-out is not completed until well after the 180 days generally associated with closed school loan forgiveness. Section 685.214(c) affirms that a borrower may be eligible for a closed school loan discharge when the borrower's school closes and the borrower does not complete the program of study or a comparable program through a teach-out at another school or by transferring academic credits or hours earned at the closed school to another school.

While not a change, we are emphasizing in § 668.26(e)(2) that an institution is prohibited from misrepresenting the nature of its teach-out plans, teach-out agreements, and transfer of credit, and that any such misrepresentation may provide the basis for a borrower's claim of defense to repayment.

Changes: We have modified the wording of the definition of ''teach-out'' in § 600.2 to clarify that it is an activity, rather than a period of time. The teach-out activity may be conducted by the closing institution in order to provide an opportunity to enrolled students to complete their programs or may be conducted by other institutions who permit students from the closing or closed institution to complete their programs at their institution.

Comments: Several commenters requested additional clarification regarding the definition of ''additional location,'' indicating that confusion remained regarding how to apply the definition to an urban campus where buildings are located close together, but not directly adjacent to one another. One commenter noted as an example that some buildings on an urban campus might be on the same city block, others might be nearby, while still others could be a 30-minute drive or more. The commenter offered another example of a location that was in a different State than the main campus yet separated from the main campus by only a few miles. The commenter stated that it was unclear whether the Department would consider any of those locations a ''facility that is geographically apart'' from the main campus.

Another commenter noted that the regulations did not require State authorizing agencies to adopt similar definitions of the terms ''branch campus'' and ''additional location'' and noted that any such requirements could have significant impacts on States' authorizing and approval processes.

Discussion: The Department relies upon the reasonable judgment of the institution and its accrediting agency to determine whether a facility is ''geographically apart'' from the institution's main campus. The Department agrees that its regulations do not require State authorizing agencies to define ''branch campus'' or ''additional location'' the same way the defines Department defines those terms. The Department does not have the authority to impose its definitions for these terms on States but encourages States to adopt conforming definitions to reduce confusion.

Changes: None.

Comments: One commenter requested that the Department explain the connection between an institution's main campus and a ''branch campus.'' The commenter noted that the definition contains many requirements that are characteristic of an independent institution, including an independent fundraising and corporate structure, and stated that it was therefore unclear what relationship such a campus should have with its parent institution.

Discussion: A ''branch campus'' is a type of additional location that meets specific criteria, including retaining permanence and autonomy with respect to faculty, administration, and budgetary and hiring authority. The Department does not require any specific type of connection between a main campus and a branch campus except that both campuses must be accredited as a single entity and both must share the fiduciary responsibility for administration of the title IV, HEA programs. We consider a campus that is separately accredited to be a standalone institution for purposes of eligibility for the title IV, HEA programs. Coordination between a main campus and a branch campus remains at the institution's discretion and is subject to any applicable standards set by its accrediting agency or State authorizing agency.

Changes: None.

Comments: One commenter objected to the proposed definitions of ''additional location'' and ''branch campus'' on the grounds that the Department has failed to provide any examples of ''occasional inconsistent usage,'' or any data about the problems caused by such usage that would warrant making these revisions to current regulations.

Discussion: As explained in the preamble to the NPRM (page 27411), the Department's reason for adding a definition of ''additional location'' and revising the definition of ''branch campus'' was to avoid confusion caused by inconsistent usage among the Department, States, and various accrediting agencies. Clear definitions of ''additional location'' and ''branch campus'' will promote consistency, improve the efficiency of Department, State, and accrediting agency review of applications to add additional locations or branch campuses, and ensure fair and equitable treatment of those applications.

Regarding the commenter's assertion that the Department should provide examples of where inconsistencies in the review of additional locations or branch campuses occurred, as well as other unspecified data, the Department does not characterize specific eligibility decisions related to additional locations and branch campuses as ''inconsistencies'' for inclusion on a database (or other list) that we could query for this purpose. However, we are aware of accrediting agencies that use the term ''branch campus'' for campuses that the Department considers to be additional locations, though we are not sure how many campuses this impacts. Notwithstanding the absence of such data, we do not believe a report such as the one requested by the commenter is necessary to justify these proposed revisions, which will codify long-established Department practices. We further seek to promote consistency in terminology, as accrediting agency use of these terms varies.

Changes: None.

Comments: One commenter recommended we revise the proposed definition of ''teach-out'' to limit access to a closed school discharge, as provided in § 685.214, to eligible borrowers who are not afforded the opportunity or are unable to avail themselves of teach-out options to complete their programs. The commenter argued that it is important for the Department to clarify that the best policy course when closing an institution is for the institution's leadership to take all appropriate steps to provide a student with a soft landing and clear path to completion. In the commenter's opinion, permitting borrowers who attended an institution that offered a proper teach-out to seek a closed school discharge disincentivizes institutions from offering teach-outs.

Discussion: We agree with the commenter that it is in the best interest of students for a closing institution to provide a well-designed teach-out structured to offer a clear path to program completion. However, while those borrowers who accept a teach-out are not then eligible for a closed school discharge under the provisions of § 685.214, the mere availability of a teach-out, however robust, is not a disqualifying factor for such a discharge. Although the Department is firmly committed to the concept of teach-outs as the best option for students affected by an impending school closure to complete their programs of study, we believe it is appropriate that the choice to accept a teach-out in lieu of a closed school discharge rest with each student and that our regulations make clear the availability of that choice. However, we also agree that when an institution commits the time and expense required to conduct an orderly teach-out, a student who chooses to participate in that teach-out is not also eligible for a closed school loan discharge unless the institution fails to provide a teach-out that is materially consistent with what is described in the teach-out plan.

Changes: None.

Comments: One commenter asserted that the Department has failed to explain the reasoning associated with proposed revisions to the definition of ''teach-out plan'' and ''teach-out agreement.''

Citing as an example in the current § 668.14(b)(31), requiring an institution to submit a ''teach-out plan'' to an accrediting agency in compliance with § 602.24(c) upon the occurrence of certain events, the commenter further contended that the Department has failed to explain how the modified definition of ''teach-out plan'' will impact other regulations that presently use that term. Finally, the commenter questioned whether the Department has considered the ramifications of amending the definition of ''teach-out plan,'' including whether it will have a positive, negative, or neutral impact on students and suggests that, taken together, this has deprived the public of a meaningful opportunity to comment on the Department's proposals.

Discussion: We disagree that the Department has failed to explain its proposal to revise the definitions of ''teach-out plan'' and ''teach-out agreements.'' In the preamble to the June 12, 2019 NPRM (page 27411) the Department explained its proposal to revise the definition of ''teach-out plan'' to clearly distinguish a teach-out plan from a teach-out agreement and to clarify that teach-outs can be conducted by the closing institution as well as another continuing institution. A teach-out agreement is a written contract between two or more institutions; a teach-out plan is developed by an institution and may or may not include agreements with other institutions. The Department also believes that the definition of ''teach-out plan'' should include plans for teaching-out students during orderly closures in which an institution plans to cease operating but has not yet closed.

We are uncertain of the commenter's point in suggesting that the Department has failed to explain how the modified definition of ''teach-out plan'' will impact other regulations that presently use that term. In the example cited by the commenter, per § 668.14(b)(31), where an institution must submit a ''teach-out plan'' to an accrediting agency in compliance with § 602.24(c) upon the occurrence of certain events, the teach-out plan submitted by the institution must, upon the effective date of these final regulations, meet the revised definition of ''teach-out plan.'' The same logic applies throughout the regulations wherever we reference the term ''teach-out plan.'' With regard to whether the Department considered the ramifications of amending the definition of ''teach-out plan,'' we carefully considered the potential ramifications, including the impact on students, and this was in the forefront both in the development stage of the proposed regulations and during negotiated rulemaking. We believe that students are best served when their institution engages in an orderly closure that permits students who are close to completing their programs an opportunity to do so. Students who are close to completing their programs may find it particularly challenging to transfer all of their credits to another institution because receiving institutions may require that a student completes a minimum number of credits at the institution awarding the credential. We also believe an orderly teach-out provides more opportunities for students to complete the term in which the teach-out announcement is made and receive assistance from the institution, the State, or the Department to find a new institution to attend.

Finally, we disagree with the commenter's conclusion that we failed to justify proposed revisions to the definitions in § 600.2 and, accordingly, deprived the public of a meaningful opportunity to comment on the Department's proposals. We have provided our rationale in the NPRM for all changes the Department proposed to part 600 of the current regulations.

Changes: None.

Comments: One commenter stated that the Department has failed to explain why it proposes to move the definitions of ''teach-out agreement'' and ''preaccreditation'' from the accreditation regulations in part 602 to § 600.2 rather than inserting a cross-reference to those definitions in parts 600 and 668. The commenter further noted that the Department failed to propose changes to the current cross-references to those definitions in part 602.

Discussion: The Department explained its proposal to move the definitions of ''teach-out agreement'' and ''preaccreditation'' to § 600.2 in the June 12, 2019 NPRM (page 27411) where we stated, ''The Department proposes to move the definitions of ''teach-out agreement'' and ''preaccreditation'' from the accreditation regulations in § 602.3 to the institutional eligibility regulations in § 600.2 for consistency, and because the use of those terms extends to regulations in §§ 600 and 668.''

With respect to the commenter's assertion that the Department failed to propose changes to the current cross-references in part 602, we note that the amendatory text in § 602.3 states, ''The following definitions are contained in the regulations for Institutional Eligibility under the Higher Education Act of 1965, as amended, 34 CFR part 600.'' ''Teach-out agreement'' and ''preaccreditation'' are included among the definitions listed in this section.

Changes: None.

Comments: Several commenters stated that the definition of ''religious mission'' is overly broad and would prohibit accrediting agencies from enforcing any provisions, including well-established standards and nondiscrimination protections, against religious institutions. Commenters indicated that the definition, in combination with other provisions in the regulations, would allow an institution to overcome barriers to accreditation by including a reference to religion in its mission statement. One commenter indicated that religious missions are no more important than secular missions and that we should not elevated them to a higher status under the law. Another commenter indicated that this definition will undermine the separation of religion and government. Several commenters speculated that these regulations will encourage secular institutions to adopt religious missions and for religious institutions to expand the religious components of their missions to avoid scrutiny by accrediting agencies. Commenters also indicated that institutions will be allowed to adopt discriminatory practices and policies, especially towards LGBTQ students and women, which are justified by the institution's religious mission, even if their accrediting agencies have standards barring such practices. Commenters noted that the Department failed to provide evidence of an institution denied accreditation because of its adherence to its religious mission, and that there is therefore no legitimate reason to include the proposed definition.

Discussion: In light of the United States Supreme Court decision in *Trinity Lutheran Church of Columbia, Inc.* v. *Comer,* and the United States Attorney General's October 7, 2017 Memorandum on Federal Law Protections for Religious Liberty pursuant to Executive Order 13798, the Department believes that it should provide protection for faith-based institutions in situations in which their ability to participate in Federal student aid programs may be curtailed due to their religious mission or policies, practices, and curricular decisions that enact or are consistent with the tenets of the faith. Allowing accrediting agencies to make negative decisions because of the institution's exercise of religion could violate the Free Exercise Clause of the United States Constitution. In addition, under the Religious Freedom Restoration Act of 1993 (RFRA) the government may only substantially burden a person's exercise of religion if the application of that burden to the person is the least restrictive means of furthering a compelling governmental interest. If access to Federal student aid depends upon accreditation decisions that do not respect the religious mission of an institution, the religious institution's exercise of religion could be substantially burdened, and removing Federal aid may not be the least restrictive means of furthering a compelling governmental interest. Thus, both the Constitution and RFRA protect religious activities in ways that they do not protect other institutional missions. Based on recent Supreme Court decisions, the Department believes that protections such as the ones in these regulations are advisable given the Free Exercise Clause and RFRA and that the Establishment Clause of the Constitution does not prohibit them. Institutions will continue to be subject to anti-discrimination laws, unless they are otherwise exempt. While we do not believe that institutions will change their missions to evade oversight by accrediting agencies, we believe that it would raise constitutional concerns if the Federal government were to decide whether a religious mission is legitimate or whether the reason that an institution decides to exercise its religious rights is appropriate.

Changes: None.

State Authorization Reciprocity Agreement (§ 600.2)

Comments: Commenters generally supported the Department's proposal to maintain the definition of a ''State authorization reciprocity agreement'' as promulgated in the Program Integrity and Improvement regulations published in the **Federal Register** on December 19, 2016 (81 FR 92232). However, commenters had differing views regarding the part of the definition that requires reciprocity agreements to permit a member State to enforce its own statutes and regulations, whether general or specifically directed at all or a subgroup of educational institutions. Some commenters felt that this language supports the States' consumer protection role in the triad and enables States to provide the same protections to online students in their States as they provide to students attending brick-and-mortar institutions. Commenters noted that allowing for reciprocity agreements that do not protect the State's authority would undermine the regulatory triad and create a race to the bottom in consumer protections and that the Department should stress that online institutions are subject to a State's consumer protection laws. Other commenters were concerned that the language undermines reciprocity agreements by allowing a State to enforce additional requirements regardless of an agreed-upon set of requirements established in a reciprocity agreement and that we should not allow States to override a reciprocity agreement's regulations. Some of these commenters recommended that the regulations provide that a State authorization reciprocity agreement may require a State to meet requirements and terms of that agreement so that the State could participate in that agreement. A couple of commenters stated that if the concern about a State authorization reciprocity agreement is that it could be interpreted to supplant all of a State's laws, then the most direct way to prevent this from happening would be to revise the definition of ''State authorization reciprocity agreement'' to provide that the agreement cannot prohibit any member State of the agreement from enforcing its own general-purpose State laws and regulations outside of the State authorization of distance education. Commenters suggested that their proposed definition of ''State authorization reciprocity agreement'' referencing ''general-purpose State laws and regulations'' should replace the language in the current definition that maintains a member State's authority to enforce its own statutes and regulations, whether general or specifically directed at all or a subgroup of educational institutions, while still maintaining a State's authority to enforce its other, non-State authorization related, statutes and regulations. The commenters stated that failure to streamline the definition in this way would continue to cause confusion about the definition, and since the Department has recognized State authorization reciprocity agreements as a method by which State authorization distance education requirements can be met, adjusting the definition in their proposed way is a needed clarification. In addition, the commenters said that, with respect to the concern that the scope of a State reciprocity agreement could be interpreted to extend beyond the scope of State authorization of distance education and impact a State's exercise of its other general oversight activities, by clarifying that States could continue to enforce their general purpose laws—those that do not relate to the State authorization of distance education programs—in addition to the reciprocity agreement, those concerns should be alleviated.

One commenter stated that there needs to be an appropriate due process in place when a State authorization reciprocity organization acts against an institution and this should be a factor that the Department considers regarding the acceptance of reciprocity agreements.

Discussion: The Department appreciates the comments in support of the proposal to maintain the definition of ''State authorization reciprocity agreement.'' However, we are persuaded by the commenters who suggested that we modify the definition to clarify that such an agreement cannot prohibit any member State of the agreement from enforcing its own general-purpose State laws and regulations outside of the State authorization of distance education. A reciprocity agreement may supersede a State's own requirements related to State authorization of distance education and may prohibit a State voluntarily participating in that agreement from adding additional requirements on institutions that also participate in the agreement. It would not be acceptable, for example, for a State to participate in a reciprocity agreement in order to advantage its own public institutions and yet apply additional or alternate requirements related to State authorization of distance education to institutions that participate in the reciprocity agreement but may be located in a different State. Adopting this suggestion will alleviate confusion about the definition, clarify that the scope of a State authorization reciprocity agreement cannot be interpreted to extend beyond the scope of State authorization of distance education or to impact a State's exercise of its other general oversight activities, and permit a member State of the agreement to enforce its own general-purpose State laws and regulations outside of the State authorization of distance education, while replacing the confusing and potentially conflicting language in the current definition that maintains a member State's authority to enforce its own statutes and regulations, whether general or specifically directed at all or a subgroup of educational institutions.

We decline the recommendation regarding due process when a State authorization reciprocity organization acts against an institution, as we believe that this is a function of the reciprocity agreement, and thus, the members of the reciprocity agreement should address it.

In addition, we note that the definition of ''State authorization reciprocity agreement'' was unintentionally omitted from the NPRM. At the time, this definition had not been added to the U.S. Code of Federal Regulations due to the delayed implementation of the Department's 2016 State Authorization regulations. However, the 2016 definition of a State reciprocity agreement was published in the **Federal Register** on July 29, 2019 (84 FR 36471) and was discussed during the negotiated rulemaking that led to this final regulation. The comments we received on this definition indicate that the public was aware of the proposed definition based on the consensus language made available to the public on the Department's website.

In the proposed regulations, as part of the amendments to the State authorization regulations under § 600.9(c), we removed the concept of a student's ''residence'' and replaced it with ''location'' (see discussion under State authorization in the preamble to the NPRM and under § 600.9(c) below). To ensure consistency between these amendments to § 600.9(c) and the definition of ''State authorization reciprocity agreement,'' which also refers to students ''residing'' in other States, we are making a conforming change to the ''State authorization reciprocity agreement'' definition and replacing the word ''residing'' with ''located.''

Changes: We revised the definition of ''State authorization reciprocity agreement'' in § 600.2 to define a State authorization reciprocity agreement to be an agreement between two or more States that authorizes an institution located and legally authorized in a State covered by the agreement to provide postsecondary education through distance education or correspondence courses to students located in other States covered by the agreement. We further revised this definition to provide that it does not prohibit any member State of the agreement from enforcing its own general-purpose State laws and regulations outside of the State authorization of distance education. Finally, we have replaced the word ''residing'' with the word ''located.''

Institution of Higher Education, Proprietary Institution of Higher Education, and Postsecondary Vocational Institution (§§ 600.4, 600.5, and 600.6)

Comments: One commenter supported the Department's proposed clarification of initial arbitration requirements but stipulated that, in the interest of transparency, arbitration proceedings should be public.

Discussion: We appreciate the support of the commenter. However, we do not agree that the Department should require that arbitration take place in public and such a requirement is not contained in HEA section 496(e), 20 U.S.C. 1099b(e), the statutory section to which this regulatory provision is closely tied. As we explained in the NPRM, although arbitration hearings are less transparent than court proceedings, the Department believes that existing and proposed requirements for notice to students and the public in §§ 602.26 and 668.43 will ensure both are timely made aware of accreditation disputes and their resolutions.

Changes: None.

Comments: Two commenters expressed opposition to proposed changes regarding initial arbitration. One of those commenters asserted that by relying on arbitration, the Department potentially ''extends the clock'' for a problem institution, because that arbitration may be followed by a likely costly lawsuit, and suggested that the Department has failed to show evidence either that institutions have routinely not followed the statutory requirement of initial arbitration prior to initiating any other legal action, or that initial arbitration, when used, has resulted in fewer lawsuits. The commenter expressed the opinion that it is incumbent upon the Department to present evidence based on data acquired from agencies on the frequency of arbitration in the event of adverse actions, the percentage of lawsuits that have occurred without first going through arbitration, the percentage of lawsuits that have occurred after arbitration, and the relative costs of both arbitration and lawsuits to agencies. Additionally, the commenter requested that the Department explain how the final rule will ensure that institutions and agencies are meeting the requirements under this section. Finally, the commenter asked that the Department protect students by placing restrictions on enrollment or receipt of Federal financial aid in the event of arbitration proceedings, since the accrediting agency has already ruled the institution should not be accredited at all.

Another commenter asserted that current initial arbitration requirements do not adequately account for issues and concerns raised by the United Negro College Fund (UNCF) about the fairness of the accreditation review process in a May 9, 2019 white paper (*Biases in Quality Assurance: A Position Paper on Historically Black Colleges and Universities and SACSCOC*).[5] Specifically, they noted the lack of black peer reviewers, the lack of transparent or unambiguous financial standards, a faulty peer reviewer selection process, and problems with inter-reviewer reliability and bias among peer reviewers. Arguing that proposed changes to §§ 600.4, 600.5, and 600.6 would exclude the litigation option as the only means of redress available to Historically Black Colleges and Universities (HBCUs) in the face of the bias inherent in the accreditation review process, the commenter asked that these changes not be made until such time as the issues identified in the UNCF white paper can be addressed.

Discussion: HEA section 496(e) provides that the Secretary may not recognize the accreditation of any institution of higher education unless it agrees to submit any dispute involving the final denial, withdrawal, or termination of accreditation to initial arbitration prior to any other legal action. As a result, the proposed changes need not be substantiated with data from accreditation agencies indicating the exact number of initial arbitration proceedings or the number of adverse actions that resulted in litigation without recourse to initial arbitration. We made these changes to align with statutory requirements. Current regulations in §§ 600.4(c), 600.5(d), and 600.6(d), consistent with the HEA, already require institutions to submit to initial arbitration before initiating any other legal action. The proposed regulations establish no additional requirements with respect to initial arbitration. As we explained in the NPRM, the statutory requirement has not changed; however, the Department's regulations heretofore have neglected to fully implement the statutory requirement, which we are correcting with these final regulations. Through the final regulations, the Department seeks to highlight the initial arbitration requirement to raise awareness of it and to clarify the current regulations.

Concerning the question of what additional measures the Department might take to ensure that institutions and agencies comply with the requirements of this section, the Department does not intend to establish a new compliance or enforcement protocol. As previously noted, the statute and current regulations already require institutions to enter initial arbitration with their accrediting agencies before taking additional legal action. We expect institutions and agencies to comply with those requirements. Certainly, when we know an institution or accrediting agency ignored or refused to comply with applicable statutory and regulatory guidelines relevant to initial arbitration, the Department will act under its current authority. We do not believe that restricting student enrollment at an institution involved in initial arbitration or limiting an institution's access to title IV, HEA funds is either appropriate or beneficial to students. Such measures would constitute an adverse action against the institution before it has had the benefit of due process with respect to the potential revocation of its accreditation.

In response to the commenter who expressed concerns over the fairness of the accreditation review process as it has been applied to HBCUs, the Department does not, in any way, dismiss the issues raised in the UNCF white paper on this matter cited by the commenter. We believe that where bias is shown to have been a factor in any aspect of the accreditation process, including initial arbitration, it should be brought to the Department's attention. Moreover, the use of arbitration could prove to be a lower-cost and quicker way for an institution that believes it was treated unfairly by its accrediting agency to seek and achieve resolution. However, the breadth of what the UNCF white paper addressed far exceeds the largely procedural issue of initial arbitration discussed among negotiators

[5] *uncf.org/wp-content/uploads/Biases-in-Quality-Assurance_UNCF-Accreditation-White-Paper-Updated.pdf.*

and clarified in these regulations. Finally, it is not the case, as suggested by the commenter, that the regulations would restrict or foreclose any of the legal options available to institutions in opposing adverse actions taken by an accrediting agency.

Changes: None.

Comments: Regarding the proposed changes to the definition of a ''program leading to a baccalaureate degree in liberal arts'' in § 600.5(e), one commenter expressed concern that the definition would allow the Department to bypass accrediting agencies, making it possible for institutions to designate as ''liberal arts programs'' those composed partially of courses that are not taught by faculty. Specifically, the commenter cited a Bachelor of General Studies program offered at a public four-year university, the requirements of which permit students to earn credits by passing College Level Examination (CLEP) or similar exams in lieu of attending classes taught by faculty. Another commenter contended that the Department has not offered adequate explanation or justification for the proposed changes, in violation of the Administrative Procedure Act (APA). The commenter elaborated that the Department proposes to substitute its own judgment, as well as remove a descriptive list of the categories of ''general instructional program[s]'' that typically qualify, including programs in the ''liberal arts subjects, the humanities disciplines, or the general curriculum.''

Discussion: One commenter may have misinterpreted the context and applicability of § 600.5(e). The commenter opposed the proposed changes to the definition of a ''program leading to a baccalaureate degree in liberal arts,'' based on concerns that the revised definition will facilitate the introduction of liberal arts programs at the baccalaureate level that permit alternative means of earning credits (including successful completion of a test). This definition applies only to the extent that a liberal arts program offered by a proprietary institution of higher education may potentially be an exception to the general requirement that all programs offered by this type of institution lead to gainful employment in a recognized occupation. The change does not expand the ability of proprietary institutions to offer liberal arts programs; rather, it more clearly defines the breadth of programs that a proprietary institution could not offer without first qualifying for the statutory exception. A program leading to a degree at a public or private not for profit institution, such as the one cited by the commenter, would not be subject to the definition of a ''program leading to a baccalaureate degree'' in current or proposed § 600.5(e). The applicability of § 600.5(e) notwithstanding, whether a student may earn credits through testing, life experience, or some other alternative means, or how many, is not subject to regulation by the Department.

We disagree with the commenter who believed the Department has violated the APA by failing to provide an adequate justification for proposing changes to § 600.5(e). As explained in the NPRM, in § 600.5(e), we propose to clarify the definition of ''program leading to a baccalaureate degree in liberal arts'' to establish the Department's responsibility for determining what types of programs qualify, and to tighten up the regulatory definition of the term, while maintaining and respecting the grandfathering requirements in the statute. The proposed changes meet this stated objective.

We further disagree with the commenter that in establishing its responsibility for determining what types of programs qualify, the Department is substituting its judgment for what is in the current regulations. The proposed regulations merely eliminate in this section the redundant requirement that an institution's accrediting agency determine a liberal arts program to fall within the generally accepted instructional categories. Contrary to the assertions of the commenter, we retained this requirement in proposed §§ 600.5(e)(1) through (4).

Changes: None.

State Authorization (§ 600.9)

State Authorization—Religious Institution (§ 600.9(b))

Comments: Some commenters agreed with the proposed changes to the definition of ''religious institution'' used for purposes of § 600.9(b). Others opined that the Department did not provide sufficient justification for removing the current definition. Commenters expressed concern that removing the Federal definition of ''religious institution'' would create an inconsistent standard and would leave each State to define the term independently, thus allowing institutions with very little religious connection to qualify for favored treatment under one State's definition while institutions in other States could be held to a stricter definition under which they might not qualify as a ''religious institution.'' In another vein, commenters expressed concern that classification as a religious institution in a State could allow the institution to evade consumer protection requirements. Other commenters believed that the Department should not eliminate the current regulations because they are limited enough in scope to safeguard the separation of church and State (First Amendment Establishment Clause), as well as prevent abuse of exemptions while protecting students.

Discussion: The Department appreciates all comments in support of the proposed regulations. We disagree, however, that we should maintain the current definition. With respect to concerns expressed by commenters who contended we should keep the current definition, the current Federal definition of a religious institution for State authorization purposes may conflict with a State's definition for the same, which is troubling because State authorization is the mechanism by which States oversee institutions and perform their role within the triad. This disconnect has further required such institutions to seek an alternative way to meet State authorization requirements. The Department believes that, if the institution is physically located in or operating in a given State, the State has the authority to determine, for the purpose of State authorization, how that institution will be authorized by the State. Furthermore, to meet State authorization requirements and be legally authorized by a State, a religious institution is subject to the requirements under 34 CFR 600.9(a)(1) that require the State to have a process to review and appropriately act on complaints concerning the institution, which would provide consumer protection. As States define ''religious institution'' in varied ways, we believe that the most effective approach to ensure our State authorization regulations are aligned with the First Amendment is to require States to meet the requirements based on their existing definitions, rather than create a new one. We believe that, for the purpose of State authorization, States have the right to make their own decisions regarding whether an institution is a religious institution or not. States continue to have an incentive to protect their students, and students will have access to a State complaint process.

Changes: None.

State Authorization (§ 600.9(c))

Student Location and Determinations of a Student's Location

Comments: Most commenters generally supported the proposed change that specifies that institutions should determine which State's authorization laws are applicable to an institution based on a student's location and not a student's residence. Commenters noted that using a student's location rather than residency was more appropriate because this framework matches the approach that States take. While residency requirements vary by State, a State's authorization jurisdiction is based upon the location of the educational activity. Commenters also felt that this change would allow students who have not established a legal or permanent residency in a State to benefit from State requirements for an institution to offer distance education in that State. Some commenters noted, however, that there is a risk that, because institutions already have to do more than the proposed regulations would require to meet State or National Council for State Authorization Reciprocity Agreements (NC–SARA) reporting requirements, an institution would solely follow the Federal standard, believing this standard supersedes State requirements, and could thus be found to be out of compliance in a State or with NC–SARA. On the other hand, other commenters felt that their existing process and procedures allow them to comply with State and NC–SARA reporting requirements.

Commenters generally supported the proposal to require institutions to have policies or procedures to make determinations about the States in which its students are located. Many commenters also agreed with having policies and procedures that set how the institution will determine a student's location at the time of initial enrollment, as well as for updating its records if a student's location changes, in order to ensure that the correct State authorization is obtained. Commenters believed the proposed requirements would reduce confusion about where the student is located for State authorization distance education purposes. Many commenters noted their appreciation that the proposed regulations allow institutions to develop the process for determining location that is best suited to their organization and the student population they serve. One commenter was concerned that the Department's proposal would grant institutions the authority to determine a student's location based on undefined policies or procedures, and that since there is no mechanism for students or States to learn how institutions determine which State laws apply, this could result in institutions minimizing their regulatory burdens. The commenter believed that the States alone should determine which State laws apply, rather than rely on institutions to do so. Another commenter believed that, instead of leaving it up to an institution's discretion, there should be a definition for the concept of ''location'' but did not propose what the definition should be. Yet another commenter felt the Department should require an institution to determine a location for all enrolled students not less than annually and that the institution update its determination of a student's location when the institution should reasonably know about the change.

Many commenters believed that the proposed regulations simplify the institutional processes needed to establish and document a student's location at the time of initial enrollment and later through a formal notification process for student change of address. Some commenters sought clarification on how to determine ''time of enrollment'' for determining a student's location because there could be a time lag between when a student enrolls at a location and where the student is located once the course begins. Other commenters also asked for clarification on what constitutes a ''formal receipt of information.'' One commenter asked for clarification about whether the Department would expect that institutions use a uniform location-reporting procedure in all instances across all individual units within a single institution.

Discussion: The Department appreciates the comments in support of the proposed regulations. Regarding the concern that, because institutions already have to do more than the proposed regulations would require to meet State or NC–SARA reporting requirements, an institution would solely follow the Federal standard, believing this standard supersedes State requirements, and could thus be found to be out of compliance in a State or with NC–SARA, these final regulations do not absolve institutions from complying with State laws nor do they require participation in reciprocity agreements or override the requirements of such agreements. Furthermore, we disagree with the comment that the States should determine which State laws apply rather than institutions. It is an institution's responsibility to determine in which State a student is located at the time of initial enrollment, and based on this information, the institution determines which State's authorization requirements apply.

We also disagree that an institution determines a student's location completely at its discretion. The institution determines the student's location at the time of initial enrollment based on the information provided by the student, and upon receipt of information from the student that their location has changed, in accordance with the institution's procedures. Institutions may, however, develop procedures for determining student location that are best suited to their organization and the student population they serve. For instance, institutions may make different determinations for different groups of students, such as undergraduate versus graduate students. We also do not believe it is necessary to determine location for all enrolled students annually, but rather believe that determination at the time of a student's initial enrollment and upon a formal notification by the student of his or her change of address to another State, in accordance with the institution's procedures, is sufficient to ensure that students will receive information they need while not being overly burdensome or costly to institutions. As discussed in the preamble to the NPRM, we believe that we should avoid subjecting an institution to unrealistic and burdensome expectations of investigating and acting upon any information about a student's whereabouts that might come into its possession. It is in the interest of both institutions and students to have understandable, explicit policies that pertain to the maintenance of student location determinations.

With respect to determining ''time of enrollment'' for determining a student's location, we specify in the NPRM that the location is determined at the time of a student's initial enrollment in a program (as opposed to the time of a student's initial application to the institution). We did not attach any further conditions to this determination. We also provided that, with respect to a ''formal receipt of information'' regarding change of location, this information would come from the student to the institution in accordance with the institution's procedures for changing their location to another State. The institution would need to establish or maintain and document the change of address process. Finally, as we discuss in the preamble to the NPRM, we expect institutions to consistently apply their policies and procedures regarding student location to all students, including students enrolled in ''brick-and-mortar'' programs.

Changes: None.

State Requirements

Comments: Many commenters supported the requirement that distance education programs should be required to meet any State authorization requirements in States where they do not maintain a physical presence but enroll students. Some commenters asked that the Department define what an institution must do to meet the requirement in § 600.9(c)(1)(i) that an institution must meet any of that State's requirements for it to be legally offering postsecondary distance education or correspondence courses in that State, as well as what documentation is required. A couple of commenters were concerned about the impact on the reciprocity agreement of the proposed requirement in § 600.9(c)(1)(ii), under which an institution would be ''subject to any limitations in that agreement and to any additional requirements of the State'' because, if States are able to require institutions to meet State requirements outside of the reciprocity agreement, these requirements could contradict or go beyond the scope of existing NC–SARA provisions and institutions would have to engage in research and fulfill any additional requirements, which would undermine a key purpose of the reciprocity agreement. One commenter felt that the Department should recognize a State's prerogative to establish exemptions from formal approval and to consider exempt institutions as authorized to offer distance education.

Discussion: The Department appreciates the comments in support of the proposed regulations. Institutions are required to know what State requirements exist for an educational program to be offered to a student in a particular State, and the required approvals that constitute what is needed for the program to be authorized by that State. Documentation should reflect that the institution has met these applicable State requirements, which could include evidence that a State waives direct authorization of the particular institution or institutions of its type. These requirements would not have any bearing on reciprocity agreements. As we stated in the preamble of the December 19, 2016, final regulations (81 FR 92232), each State in which an institution is offering distance education remains the ultimate authority for determining whether an institution is operating lawfully in that State, regardless of whether a non-State entity administers the agreement, including whether an institution in a reciprocity agreement is operating in that State outside the limitations of that agreement. The regulations further provide that an institution offering distance education in a State in which the institution is not physically located or in which the institution is otherwise subject to a State's jurisdiction, as determined by the State, must meet any of that State's requirements to be legally offering distance education in that State. However, even if the State does not have any specific approval requirements for an institution to be offering distance education in that State, § 600.9(a)(1) requires that, for an institution that has physical presence in a State, that State must offer a process to review and appropriately act on complaints concerning the institution, including enforcing applicable State laws, for the institution to meet the State authorization requirements. We agree with commenters that it is important to revise § 600.9(c)(1)(ii) for consistency with the revised definition of the term ''State authorization reciprocity agreement,'' in which we provide that a reciprocity agreement does not prohibit any member State of the agreement from enforcing its own general-purpose State laws and regulations outside of the State authorization of distance education. Accordingly, we have revised the provision to provide that, in the case of an institution covered by a reciprocity agreement, the institution is considered to meet State requirements for it to be legally offering postsecondary distance education or correspondence courses in the State, subject to any limitations in that agreement and to any additional requirements of the State not relating to authorization of distance education.

Changes: We have revised § 600.9(c)(1)(ii) to provide that, for an institution covered by a reciprocity agreement, the institution is considered to meet State requirements for it to be legally offering postsecondary distance education or correspondence courses in the State, subject to any limitations in that agreement and to any additional requirements of the State not relating to authorization of distance education.

State Complaint Process

Comments: Some commenters supported eliminating the State complaint process requirement to protect the eligibility of students who are located in States that do not offer a complaint process to receive title IV, HEA assistance to attend distance education programs, agreeing that § 600.9(a)(1) already addresses the State complaint process and that the State complaint process requirement under § 600.9(c)(2) is duplicative of the requirements under § 668.43(b). Other commenters believed that the State complaint process requirement is not redundant because, even though the Department states that eliminating the requirement would allow students to receive Federal student aid even if the State they are located in does not have a State complaint process, this change would conflict with the definition of ''State authorization'' under § 600.9(a)(1), which provides that State authorization requirements include that the State have ''a process to review and appropriately act on complaints concerning the institution, including enforcing applicable State laws.'' Since the only entity that can enforce a specific State's laws is that State, institutions would not be able to comply with the State authorization requirements if there is not a complaint process available to students in their own States. The commenter argued that the final regulations should reflect a State's authority to accept, investigate, and act on complaints both from students located in that State and from students enrolled at institutions physically located in that State. In a similar vein, another commenter opined that nothing in § 668.43(b) requires that, as a condition of State authorization, an institution only be permitted to operate in a jurisdiction in which there is a complaint process. The commenter also indicated that States should collect complaint records and make these publicly available in a central database. Another commenter recommended that the Department require States in which an institution is located to share a copy of complaints with other States whose residents are enrolled in that institution.

Discussion: The Department appreciates the comments in support of the proposed regulations. With respect to the other comments, nothing in the regulations prevents a State from providing a State complaint process that an institution offering distance education would have to comply with in order to operate in that State, unless the State and institution have joined a reciprocity agreement that provides an alternate means for addressing student complaints. Furthermore, with respect to the disclosures under § 668.43(b), it follows that for an institution to provide a student or a prospective student with contact information for filing complaints with its State approval or licensing entity and any other relevant State official or agency that would appropriately handle a student's complaint, the institution would need to have such information to provide or it would be out of compliance with the regulations. Regarding the suggestion that States collect complaint records and house them in a publicly available central database and that States in which an institution is located share a copy of complaints with other States whose residents are enrolled in that institution, we decline this suggestion. Such complaints generally fall under the jurisdiction of the States and the accrediting agencies. Additionally, the Federal Trade Commission maintains a database of consumer complaints. While the Department declines to take these recommendations, nothing in these regulations prevents States from taking these actions if they wish to do so.

The Department clarifies that the contact information provided may be for whichever entity or entities the State designates to receive and act upon student complaints. Contact information is not necessarily required for each of the following: A State approval entity, a State licensing entity, and another relevant State official or agency. If the State has only designated one of these types of entities, contact information for that one entity is sufficient.

Changes: We have included an amendatory instruction to remove the text of current § 600.9(c)(2). We also have redesignated proposed § 600.9(c)(1)(ii)(A), (B), and (C) as § 600.9(c)(2)(i), (ii), and (iii).

Special Rules Regarding Institutional Accreditation or Preaccreditation (§ 600.11)

Comments: One commenter expressed concern that the proposed changes to the regulations would permit institutions to more easily switch to a new accrediting agency or maintain a back-up agency, enabling them to skirt enforcement. The commenter opined that this change is inconsistent with the statutory requirement in HEA section 496(h), 20 U.S.C. 1099b(h), that the Secretary not recognize the accreditation of an institution seeking to change accrediting agencies, unless the institution can demonstrate reasonable cause and submits all relevant materials; as well as the statutory requirement in HEA section 496(i), 20 U.S.C. 1099b(i), that the Secretary not recognize the accreditation of an institution that maintains accreditation from more than one agency unless the institution demonstrates reasonable cause and submits all relevant materials, and designates one agency as its accrediting agency for title IV purposes.

Discussion: We disagree with the commenter that the changes to § 600.11 are inconsistent with the statutory requirements of HEA section 496(h) and (i).

HEA section 496(h) provides that ''The Secretary shall not recognize the accreditation of any otherwise eligible institution of higher education if the institution is in the process of changing its accrediting agency or association, unless the eligible institution submits to the Secretary all materials relating to the prior accreditation, including material demonstrating reasonable cause for changing the accrediting agency or association.'' The new regulations in § 600.11(a) continue to require an eligible institution to submit to the Secretary all materials related to its prior accreditation or preaccreditation. Moreover, the new regulations require additional documentation, including substantiation of reasonable cause for the change.

The ''dual accreditation rule'' provision in HEA section 496(i) states that ''The Secretary shall not recognize the accreditation of any otherwise eligible institution of higher education if the institution of higher education is accredited, as an institution, by more than one accrediting agency or association, unless the institution submits to each such agency and association and to the Secretary the reasons for accreditation by more than one such agency or association and demonstrates to the Secretary reasonable cause for its accreditation by more than one agency or association. If the institution is accredited, as an institution, by more than one accrediting agency or association, the institution shall designate which agency's accreditation shall be utilized in determining the institution's eligibility for programs under this chapter.'' The new regulations in § 600.11(b) continue to require the eligible institution to submit to the Secretary all materials related to its prior accreditation or preaccreditation, and clarify the conditions under which the Secretary would not determine the institution's cause for multiple accreditation to be reasonable, including when the institution has had its accreditation withdrawn, revoked, or otherwise terminated in the prior two-year period and when the institution has been subject to a probation or equivalent, show cause order, or suspension. The new regulation does provide that the Secretary may consider an institution's interest in obtaining multiple accreditation to be reasonable if it is based on geographic area, program-area focus, or mission, but the institution must provide evidence to explain or substantiate its request.

Changes: None.

Comments: Two commenters objected to the provisions in this section, arguing that they create a loophole in violation of the HEA and are contrary to law and in excess of the Department's statutory jurisdiction within the meaning of section 706 of the APA. The commenters note that under HEA section 496(j), an institution ''may not be certified or recertified'' for purposes of title IV if the institution has had its ''accreditation withdrawn, revoked, or otherwise terminated for cause,'' unless such action has been ''rescinded by the same accrediting agency.'' One commenter opined that the Department failed to provide sufficient evidence to support this change. One commenter suggested that, in the event an institution seeks multiple accreditations and has been subject to any kind of action, the Department should require that a problem raised by one agency should trigger automatic review by the other agency with a higher evidentiary bar to show why a similar sanction should not be applied.

Discussion: We disagree with commenters that § 600.11 creates a loophole that would violate the HEA and is contrary to law and in excess of the Department's statutory jurisdiction within the meaning of section 706 of the APA. As discussed above, the new provisions are consistent with HEA section 496(h) and (i). HEA section 496(j) addresses the impact on an institution from the loss of accreditation. Again, as described above, we continue to hold institutions to the limitations imposed when accreditation has been withdrawn, revoked, or otherwise terminated for cause during the preceding 24 months pursuant to § 600.11(a)(1)(ii)(B).

We further disagree with the commenter who asserted that the Department has failed to provide enough evidence to support this change. As explained in the NPRM (84 FR 27414), the proposed regulation seeks to maintain guardrails to ensure that struggling institutions cannot avoid the consequences of failing to meet their current accrediting agency's standards by attaining accreditation from another agency, while maintaining recourse for institutions that have been treated unfairly or have legitimate reasons for seeking multiple accreditation unrelated to findings or allegations of noncompliance with the quality standards of its current accrediting agency. The potential for an institution to face loss of its accreditation without being afforded its due process rights as defined in § 602.25, or as the result of an agency's failure to respect the institution's stated mission, supports the need for this change.

Regarding the suggestion from a commenter that, where an institution seeking multiple accreditations has been subject to any kind of action, the Department should require the problem raised by one to trigger an automatic review by the other agency to show why a similar sanction should not be applied, we believe such a requirement would be superfluous. The applicable amendatory language as proposed already stipulates that the Secretary will not determine the cause for seeking accreditation from a different or second accrediting agency to be reasonable if the institution has had its accreditation withdrawn, revoked, or otherwise terminated for cause during the preceding 24 months or has been subject to a probation or equivalent, show cause order, or suspension order during the preceding 24 months. Any action initiated by the institution's current agency would necessarily be reviewed by the Department and, unless found to be related lack of due process, inconsistently applied standards or criteria, or failure to respect the institution's stated mission not considered reasonable cause to seek additional accreditation. At that point, we would not recognize the additional accreditation.

We also disagree with the commenters who stated that the Department failed to provide data or evidence to support the need for the proposed regulatory changes during the negotiated rulemaking. As we stated previously in this preamble, the changes to the regulations are based on many factors, including feedback we received from the public, studies conducted by higher education associations, and emerging trends in postsecondary education. For example, concerns have been raised about the lack of innovation in accreditation, the challenges that new agencies have in gaining recognition, and the difficulties that new institutions have in becoming accredited and gaining access to title IV funds.[6] One challenge new accrediting agencies face in gaining recognition is the need to serve as a Federal gatekeeper for at least one institution or program. Accredited institutions or programs are unlikely to leave a well-established accrediting agency, thereby risking their access to title IV funds, even if a new agency may be more appropriate to the mission of the institution, support educational innovation at lower cost, have higher standards for academic excellence, or enable an institution to meet the needs of its students. This regulatory change to permit dual accreditation will allow institutions to have greater choice in selecting an accrediting agency that best aligns with the institution's mission, demonstrates educational excellence to potential students, peer institutions, or employers, and supports innovative pedagogical approaches. In addition, in order for new accrediting agencies to have the ability to become recognized, they need to be able to attract respected institutions to their membership, which is unlikely if an institution is required to abandon its current agency first. Finally, as we eliminated geography from an accrediting agency's scope, it is important to permit dual accreditation during the period in which an institution is undergoing review to change its agency.

Furthermore, the Department developed a list of proposed regulatory provisions based on advice and recommendations submitted by individuals and organizations as testimony in a series of three public hearings in September of 2018, as well as written comments submitted directly to the Department. Department staff also identified issues for discussion and negotiation. We developed the proposed regulations that we negotiated during negotiated rulemaking with specific objectives for improvement, including addressing the requirements for accrediting agencies in their oversight of member institutions or programs; establishing requirements for accrediting agencies to honor institutional mission; revising the criteria used by the Secretary to recognize accrediting agencies, emphasizing criteria that focus on educational quality; developing a single definition for purposes of measuring and reporting job placement rates; simplifying the Department's process for recognition and review of accrediting agencies; and promoting greater access for students to high-quality, innovative programs. We believe the changes to the regulations in this section align with these objectives.

We do not think it is appropriate for the Department to require that an action taken by one agency should trigger automatic review by another agency, with a higher evidentiary standard, to show why a similar sanction should not be applied, since our current regulations do not require this and an institution could be compliant with the standards of one agency even if not compliant with the standards of another. Currently, § 602.28 requires an agency to investigate an institution if another accrediting agency subjects it to any adverse action or places it on probation. A higher evidentiary standard is not appropriate.

Changes: None.

Comments: One commenter suggested that a provision be added to this section to permit an accrediting agency to prohibit its recognized institutions from maintaining accreditation by more than one recognized agency.

Discussion: We disagree with the commenter's suggestion to permit an accrediting agency to prohibit its recognized institutions from maintaining accreditation by more than one recognized agency as it could have an anticompetitive impact and prevent innovative changes in higher education delivery. We will serve institutions and students better when accrediting agency standards align with the institution's educational objectives and stated mission. In some cases, this may require an institution to seek accreditation from more than one accrediting agency or to change accrediting agencies.

Changes: None.

Special Rules Regarding Institutional Accreditation or Preaccreditation (§ 600.11)

Multiple Accreditation (§ 600.11(b))

Comments: One commenter opined that the changes to § 600.11(b) provide too much discretion to determine that an accrediting agency acted improperly and allows an institution to seek alternate accreditation when the institution does not meet its original accrediting agency's standards. The commenter agreed that we should permit an institution to select a comprehensive institutional accrediting agency as its title IV gatekeeper and seek mission-based institutional accreditation as well.

Discussion: We disagree with the commenter that the changes to § 600.11(b) provide too much discretion for the Department to determine that an accrediting agency acted improperly or to allow an institution to seek a new accrediting agency when the institution does not meet its original accrediting agency's standards. The institution seeking a change of accrediting agencies or multiple accreditation must demonstrate to the Secretary a good reason for seeking accreditation by a different or additional agency in order for that request to be approved. Moreover, the regulations limit the ability of institutions that have been subject to a probation or equivalent, show cause order, or suspension order or that have had their accreditation withdrawn, revoked, or otherwise terminated for cause during the preceding 24 months, from making such a change.

We thank the commenter for support of the provision that enables an

[6] *https://www.educationnext.org/college-accreditation-explained-ednext-guide-how-it-works-whos-responsible/.*

institution to select a comprehensive institutional accrediting agency as its title IV gatekeeper and seek accreditation from a mission-based institutional accrediting agency.

Changes: None.

Comments: Two commenters objected to the provisions of § 600.11(b)(2)(i)(B) that enable the Secretary to determine an institution's justification for seeking multiple accreditation or preaccreditation to be reasonable if the institution's primary interest in seeking multiple accreditation is based on its mission. The commenters asserted that this grants exemptions for institutions with a ''religious mission'' from rules preventing agency-shopping if the institution claims an accrediting agency was not respecting its religious mission.

Discussion: The proposed regulations provide latitude to the Secretary to determine that an institution's interest in seeking multiple accreditation is reasonable if it seeks accreditation by more than one accrediting agency as a result of its mission, geographic area, pedagogical focus, or program area focus. The Secretary will not be required to make such a determination. An institution seeking multiple accreditation would need to convince the Secretary of the reasonableness of its request. If an institution appears to be avoiding compliance with its current accrediting agency's standards by seeking accreditation from a new or additional accrediting agency, the Secretary could determine that the agency's request is not reasonable and deny that request.

Changes: None.

Severability (§ 600.12)

Comments: None.

Discussion: We have added § 600.12 to clarify that if a court holds any part of the regulations for part 600, subpart A, invalid, whether an individual section or language within a section, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have added § 600.12 to clarify that we designed the regulations to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

Change in Ownership Resulting in a Change in Control for Private Nonprofit, Private For-Profit, and Public Institutions (§ 600.31)

Comments: One commenter expressed support for the changes to § 600.31 that clarify the terms of a change of ownership or ownership interest. Another commenter suggested that we clarify that the term ''ownership'' is meant to include changes in management or control of public institutions.

Discussion: We thank the commenter who supported the changes to this section. Further, we agree with the commenter who suggested that the term ''ownership'' as defined in § 600.31 requires clarification with respect to public institutions. Accordingly, we clarify that ''change in ownership'' as applied in this section includes changes in management or control of public institutions. Such a change in management could include instances in which public institutions are merged into a new system or merged with another institution, or instances when boards of trustees are merged to provide joint oversight of more than one institution, among other things. This does not include instances when a new president or chancellor is hired or appointed, or when there is a change in the individual who holds the position of SHEEO.

Changes: None.

Eligibility of Additional Locations (§ 600.32)

Comments: Several commenters objected to the proposed change that would allow an entity acquiring a closing location to be liable only for improperly spent title IV funds and unpaid refunds from the prior and current academic years. Some argued that the Department is attempting to solve the problem of institutions closing without sufficient resources to repay outstanding liabilities by reducing the requirement for these institutions to make students, the Department, and taxpayers whole, rather than fulfilling its enforcement responsibility by requiring institutions to post letters of credit in certain circumstances to protect the Federal fisc. Others asserted that the change could result in students being duped into thinking they are being offered a new educational opportunity, while potentially losing access to closed school loan discharges in the process. The commenters requested that the Department require that purchasers accept all past liabilities for the locations they acquire, except as determined by the Secretary on the strength of the purchaser's change of ownership application with the Department,[7] arguing that such action would enable the Department to retain some discretion to prevent inappropriate or high-risk purchases.

Discussion: We disagree that § 600.32 should be amended to require purchasers to accept all past liabilities for the school locations they acquire, except as determined by the Secretary on the strength of the purchaser's application. We believe it is reasonable to require new owners to accept liability for all financial aid credit balances (See § 685.216 regarding unpaid refunds) owed to students who received title IV, HEA program funds and for all improperly expended or unspent title IV, HEA program funds received during the current academic year and up to one academic year prior by the institution that has closed or ceased to provide educational programs. This timeline mirrors the period of time during which the Department typically conducts program reviews, which includes the current year and the prior year. Program reviews focus on the current and prior year because they provide a more accurate picture of the institution's current administrative strength and function. This provision provides the same window to an outside entity to evaluate the extent to which potential liability exists due to the actions of a prior, unrelated owner, or to secure financing. There may be cases when the acquisition of a closing school by a new owner or entity serves the best interest of students, the local community, and taxpayers. Limiting the potential liability for which a new owner or entity is responsible does not relieve the past owner or entity of its liability for funds owed to the Department as a result of past actions, insufficiencies, or borrower defense to repayment claims.

We also disagree that the changes to this section would ''dupe'' students into thinking they are being offered a new educational opportunity and deprive them of a closed school loan discharge. While it is true that this regulatory change may precipitate fewer school closings and, as a result, fewer closed school loan discharges, students will have the option of completing their program or transferring to a new institution to do so, rather than losing the time and effort they have invested at one institution by starting over, repeating classes, or earning additional credits elsewhere. This regulation does not interfere with a borrower's right or

[7] Application for Approval to Participate in Federal Student Financial Aid Programs is available at *eligcert.ed.gov/ows-doc/eapp.htm.*

ability to submit a borrower defense to repayment claim and seek relief from the Department in the event that misrepresentations occurred under prior ownership; however, it does limit the liability that a new owner assumes for actions that the prior owners took or failed to take.

Changes: None.

Severability (§ 600.33)

Comments: None.

Discussion: We have added § 600.33 to clarify that if a court holds any part of the regulations for part 600, subpart C, invalid, whether an individual section or language within a section, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have added § 600.33 to make clear that the regulations are designed to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

Termination and Emergency Action Proceedings (§ 600.41)

Comments: Several commenters favored the changes to § 600.41. These commenters did not provide additional details other than to note their support.

Discussion: We thank the commenters for their support to delete an outdated reference formerly located in § 600.41(a)(1)(ii)(B) that allowed for termination of an institution's eligibility under a show-cause hearing, if the institution's loss of eligibility resulted from the institution's having previously qualified as eligible under the transfer of credit alternative to accreditation. This alternative has not been possible since its repeal in 1992.

We further thank the commenters for their support of updating the terminology in § 600.41(d) that changes the word ''certify'' to ''originate,'' which is used in the Direct Loan Program, the only program under which the Department currently makes loans.

Changes: None.

Severability (§ 600.42)

Comments: None.

Discussion: We have added § 600.42 to clarify that if a court holds any part of the regulations for part 600, subpart D, invalid, whether an individual section or language within a section, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have added § 600.42 to make clear that the regulations are designed to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

The Secretary's Recognition of Accrediting Agencies

What definitions apply to this part? (§ 602.3)

Comments: Two commenters opposed the proposed changes in § 602.3(b) that permit accrediting agencies to retain recognition if they meet a newly proposed definition of ''substantial compliance,'' rather than requiring them to be fully compliant with all applicable standards. The commenters asserted that this proposed definition is inconsistent with HEA section 496 and makes it virtually impossible for the Department to hold an agency accountable when it fails to perform.

Discussion: We disagree with the commenters that the proposed definition of ''substantial compliance'' is inconsistent with the statute and makes it virtually impossible for the Department to hold an agency accountable when it fails to perform. For many years the Department relied on the ''substantial compliance'' standard in making recognition determinations and, currently, some accrediting agencies already recognize ''substantial compliance'' in their own standards.[8] The statute requires the accrediting agency or association to demonstrate the ability and experience necessary to operate as an accrediting agency or association. It does not require that the accrediting agency demonstrate that it has applied each and every one of its standards, as evidenced by the fact that an accrediting agency must accredit or preaccredit only one institution prior to petitioning the Department for recognition. It also does not require the Department to deny recognition to an otherwise well-performing accrediting agency simply because of minor administrative omissions or errors, or because the agency had to make a minor exception to its regular policies in order to serve the needs of students. We see a significant difference between ''substantial compliance,'' which means that an agency is essentially compliant with the purpose or objective of the regulations, versus a finding of failing to perform or being noncompliant, for which the Department would make a finding of noncompliance.

In fact, by providing for ''substantial compliance'' and a process for monitoring institutional improvement, the Department may address minor concerns before they become major concerns and ensure that they are resolved quickly and appropriately. The monitoring report will afford accrediting agencies that are in substantial compliance with the criteria for recognition the opportunity to implement corrected policies or update policies to align with compliant practices. The monitoring report provides the Department with an additional oversight tool to ensure integrity in accreditation, in cases where the accrediting agency deficiency does not rise to the level of non-compliance or a full compliance report.

Changes: None.

Comments: One commenter suggested that we could improve the definition of ''programmatic accrediting agency'' by beginning with the word ''usually'' or adding the phrase, ''this does not include agencies which accredit freestanding institutions offering a specific educational program.'' The commenter asserted that the proposed definition does not address situations in which closely related educational programs enable students to enter a broad spectrum of graduate and professional schools, and to embark on a variety of careers. Another commenter remarking on the definition of ''programmatic accrediting agency'' encouraged the Department to ensure that programmatic accrediting agencies have the autonomy to focus on institutional quality.

Discussion: While we recognize that some programmatic agencies accredit schools with programs that prepare students to enter a broad spectrum of graduate and professional schools, and to embark on a variety of careers, we believe the definition does not preclude them from continuing to do so, nor does it require that a program lead to only one career pathway or option. The Department appreciates the commenter's request that we ensure programmatic accrediting agencies have the autonomy to focus on quality, especially when programmatic accrediting agencies also serve as institutional accrediting agencies at

[8] *www.wscuc.org/book/export/html/924.*

institutions that offer a single program or closely related programs that align with the programmatic accrediting agency's mission. We are confident that these regulations provide that autonomy.

Changes: None.

Comments: Several commenters requested additional time to come into compliance with the change from national and regional accreditation to institutional accreditation. The commenters did not object to this change but noted that entities that distinguish between national and regional accreditation in some of their policies will need to amend those policies. They cited, for example, some State laws and regulations that distinguish between national and regional accreditation and reported that those State regulators would need time to amend those laws and adjust the procedures in implementing those laws. Some commenters noted that the legislature in their State is not slated to meet again until 2021.

Discussion: We appreciate the commenters' support and believe the State policies referenced provide further evidence for the need to eliminate the artificial distinction between regional and national accreditation because some of those policies deny opportunities for successful students to enter certain fields, it is incumbent upon State regulators to ensure the laws pertaining to an academic institution's required accreditation to qualify graduates for licensure and the procedures used to implement those laws do not disadvantage students who enroll in and complete programs at institutionally accredited institutions. While we cannot compel a State to act, we hope that States will recognize the Department's revised accrediting agency designations and make the necessary changes in their own laws or regulations.

Changes: None.

Severability (§ 602.4)

Comments: None.

Discussion: We have added § 602.4 to clarify that if a court holds any part of the regulations for part 602, subpart A, invalid, whether an individual section or language within a section, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have added § 602.4 to clarify that we designed the regulations to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

Link to Federal Programs (§ 602.10)

Comments: One commenter objected to the change in this section, stating that the Department proposes to remove a requirement that accrediting agencies demonstrate their worth as gatekeepers to Federal aid and fails to explain or justify why it believes that simply sharing an institution with an accrediting agency recognized as a gatekeeper to Federal aid qualifies a brand-new accrediting agency to immediately gain access to full gatekeeping authority.

Discussion: Section 602.10 does not eliminate any requirements. Rather, it provides that if an agency accredits one or more institutions that participate in HEA programs and that could designate the agency as its link to HEA programs, the agency satisfies the Federal link requirement, even if the institution currently designates another institutional accrediting agency as its Federal link.

The significance of a Federal link is that it provides the basis for the Department's recognition of an accrediting agency. A Federal link, in and of itself, does not ensure recognition, nor does it ensure participation in title IV programs. A Federal link simply affirms that the agency's accreditation is a required element in enabling at least one of the institutions or programs it accredits to establish eligibility to participate in some other Federal program.

Changes: None.

Geographic Area of Accrediting Activities (§ 602.11)

Comments: Several commenters wrote in support of the Department's proposal, stating that it will ultimately relieve students of the burden to advocate for the quality of their education if their institution of record is nationally accredited. Another commenter agreed that it is problematic when students are treated disparately based on accrediting agency, especially since all agencies adhere to the same Department requirements. One commenter thanked the Department for clarifying that an agency must conduct its activities within a region or group of States, and for emphasizing that we would not require any institution or program to change to a different accrediting agency as a result of these regulatory changes.

Discussion: We appreciate the commenters' support. The Department continues to require accrediting agencies to clarify the geographic area in which they operate, including all branch campuses and additional locations.

Changes: None.

Comments: One commenter objected to the elimination of the distinction between national and regional accrediting agencies based on a belief that there are differences in their standards for general education and faculty quality.

Discussion: The change in nomenclature is intended specifically to counter this prevalent misconception. In fact, the Department applies the same standards for recognition to both national and regional accrediting agencies. Accrediting agencies, both regional and national, are often termed ''nationally recognized,'' including in the HEA and Department materials, which can also lead to confusion.[9] Accrediting agencies do establish their own standards for general education and faculty quality and there is some variation in the standards they have set. For example, many agencies already allow for instructors in applied or vocational programs to substitute years of experience for academic credentials, which may not exist in some fields. However, those standards do not differ based on the agency's geographic scope or prior classification as a national or regional accrediting agency.

Changes: None.

Comments: One commenter expressed concern that the Department's actions may interfere with academic freedom, while providing little or no relief to students whose academic credits are not accepted for transfer to another institution. The commenter asserted that State and Federal regulations create a floor in which an institution can operate, and an institution may choose to have a higher ceiling. The commenter remarked that institutions will still conduct their own evaluation of transfer credits, and the Department should not have a role in setting policy on academic determinations such as transfer credits. Other commenters echoed the position that the decision whether to accept credits for transfer falls on the institution based on its independent assessment of the quality of the prior learning.

Discussion: The Department agrees that the determination of whether to accept credits for transfer falls on the institution based on its independent assessment of the quality of the prior

[9] 20 U.S.C. 1001.

learning. The change to this regulation is designed not to interfere with academic freedom, but rather, to counter a detrimental myth that institutions that are regionally accredited are of higher academic quality than institutions that are nationally accredited. A recent review of regional accrediting standards points to a pervasive lack of focus on student learning and student outcomes among those agencies, although the same is not true among national accrediting agencies.[10] Therefore, it is hard to make the case that regional accrediting agencies do more to ensure academic quality or place higher demands upon the institutions they accredit than national accrediting agencies. That said, because many of the most selective institutions in the United States are accredited by regional accrediting agencies, these agencies benefit from the reputations of a small number of their member institutions that are highly competitive and serve only the most well-qualified applicants.

The Department believes that, regardless of the historical role that accrediting agencies have played, or the institutions that comprise the membership of a given accrediting agency, each student is entitled to an unbiased review of his or her academic record and learning accomplishments when applying for transfer, employment, or graduate school, and that no student should be disadvantaged because of the geographic scope of an institution's accrediting agency.

Changes: None.

Comments: One commenter asserted that the proposed regulatory change represents an unreasonable interpretation of HEA section 496(a)(1) and is, therefore, not in accordance with the APA, which prohibits arbitrary and capricious changes to regulations, and is in excess of statutory jurisdiction under 5 U.S.C. 706(2)(C). Another commenter agreed that the proposed change does not adhere to the statutory language and suggested that, if regional accrediting agencies are not truly regional because of the manner in which they operate, and are instead national, the Department should classify them as such.

Discussion: HEA section 496(a)(1) states that ''the accrediting agency or association shall be a State, regional, or national agency or association and shall demonstrate the ability and experience to operate as an accrediting agency or association within the State, region, or nationally, as appropriate.'' Section 602.11 specifies that the agency must demonstrate that it conducts accrediting activities within a State, if the agency is part of a State government; a region or group of States chosen by the agency in which an agency provides accreditation to a main campus, a branch campus, or an additional location of an institution; or the United States (*i.e.,* the agency has accrediting activities in every State). However, the HEA does not require the Department to consider the agency's historic footprint to be part of its scope, which the Department has previously done through regulation. Rather, the HEA refers to all accrediting agencies recognized by the Secretary as ''nationally recognized'' without reference to the number and location of States in which an agency accredits institutions. *See* HEA section 101(a)(5).

We disagree that this change is arbitrary and capricious. To the contrary, the Department believes this change is critically important given the expansion of distance learning, which allows students to attend an institution accredited by an agency whose geographic scope does not include the student's home State. This can often lead to confusion from students looking to contact their institution's accrediting agency, only to find out that the accrediting agency claims to not do business in their State. In addition, given the growth of institutions that have additional locations and branch campuses across the country, most accrediting agencies that originally accredited institutions only in a well-defined and geographically proximate group of States are now accrediting institutions in multiple States that are outside of their historic footprint. The Department recognizes that accrediting agencies previously described as ''regional'' are, in fact, conducting business across much of the country. Therefore, the Department seeks to realign its regulatory definitions with the statute to distinguish among agencies that have activities in one State, some or most States, and every State. As always, the Department uses the definition of ''State'' in § 600.2 for these purposes.

One non-Federal negotiator illustrated the need for this change with a map showing all of the States in which her agency has activities. The map (see Chart 2) revealed that the agency operates across most of the country, with activities in 48 States including the District of Columbia, as well as 163 ''international activities,'' even though the agency was historically classified as a regional agency with activities supposedly confined to 19 States. The Department's prior classifications inaccurately describe where that agency performs its work. To reduce confusion and to recognize that, in any given State, there may be schools accredited by more than one accrediting agency, the Department will require every accrediting agency to list the States in which it performs accrediting activities. This list could include one, some, most, or all States. However, the Department will align its nomenclature more closely with the HEA by referring to all of the agencies it recognizes as ''nationally recognized'' accrediting agencies.

Although the historic distinction between regional and national accrediting agencies is irrelevant given the expansion of many accrediting agencies' work to States outside of their historical footprint, there is a meaningful and clear distinction between institutional agencies and programmatic agencies. The Department will continue to recognize that distinction, including that a programmatic accrediting agency could also be considered an institutional accrediting agency if it accredits single-program institutions. We also disagree that this change is outside of the Department's statutory authority and believe instead that it is required of the Department to more accurately describe the changing nature of accrediting agencies' work. The Department will continue fulfilling its statutory responsibility under 20 U.S.C. 1099b to recognize accrediting agencies or associations and it will continue to require accrediting agencies to publish a list of the States in which they perform their work.

The negotiating committee considered reclassifying some regional accrediting agencies with broad geographic scope as national accrediting agencies but did not achieve consensus on this approach. Instead, consensus was achieved on relying upon statutory language that refers to all accrediting agencies recognized by the Secretary as nationally recognized agencies, and adhering to § 602.11 by requiring each accrediting agency to list the States in which it performs accrediting activities.

Changes: None.

Accrediting Experience (§ 602.12)

Comments: One commenter was generally supportive of the proposed changes in this section that provide additional flexibility to accrediting agencies to accredit main campuses in States in which they currently or may plan to accredit branch campuses or additional locations. However, this commenter requested the Department require an agency seeking an expansion of scope into an area where it does not

[10] *www.americanprogress.org/issues/education-postsecondary/reports/2018/04/25/449937/college-accreditors-miss-mark-student-outcomes/.*

have prior experience to demonstrate in the application process the ability and capacity necessary to justify and support such expanded scope. Another commenter who was generally supportive of the proposed changes in this section objected to the significant additional Federal oversight, as it pertains to the number of institutions or programs that a new agency or organization may accredit, and monitoring by the Department of the agency's accrediting decisions.

Discussion: We appreciate the commenters' support for the change. However, the Department will no longer consider the accrediting agency's historical geographic footprint to be part of its scope. Instead, the geographic area (*i.e.,* list of States) in which the agency performs its work must be reported to the Department and made available to the public.

In instances in which an agency applies for a change of scope, the regulations continue to require an agency to demonstrate in the application process that it has the ability and capacity necessary to carry out that expansion of scope. However, we also recognize that an agency is not permitted to perform accrediting activities that are not yet part of its scope, which makes it a violation of the Department's regulations for an agency to gain experience doing something it is not approved to do. Therefore, since an agency is unlikely to be able to demonstrate *experience* in making accreditation or preaccreditation decisions under the expanded scope at the time of its application or review for an expansion of scope, the application may be reviewed to determine the agency's *capacity* to make decisions under the expanded scope. This provides an opportunity for an agency to gain experience making accreditation decisions in the area of expanded scope, which the Department may wish to limit to a small number of institutions or programs until the agency can then demonstrate, through experience, that it has the capacity to make additional decisions under the expanded scope. The purpose of this regulatory change is to grant limited authority for an agency that has the capacity to make decisions under an expanded scope to make such decisions and acquire—and demonstrate that it has acquired—experience doing so. Without these changes, the Department's existing regulations could be interpreted to contain circular logic (*i.e.,* an agency cannot receive approval without prior experience, but cannot obtain that experience without the authority to do so). The Department will require monitoring reports to assure progress toward demonstrating the necessary experience.

We do not agree that these regulations impose significant additional Federal oversight pertaining to the number of institutions or programs that a new agency can accredit and the monitoring of accrediting decisions. It is the responsibility of the Department to ensure that accrediting agencies are able to successfully determine the quality of the institutions or programs it accredits, and it is wholly appropriate to limit any potential risk until such time as the Department is satisfied that the agency has demonstrated through experience that it is capable of making those determinations.

Changes: None.

Comments: Several commenters objected to the removal of the requirement that accrediting agencies seeking recognition demonstrate two years of prior experience conducting accrediting activities, and that they are trusted by peer organizations, practitioners, and other stakeholders.

The commenters argued that the proposed change to require the agency seeking recognition to cite at least one institution that uses the agency as a gatekeeper for Federal dollars is not an effective proxy for the current requirements. The commenters asserted that the Department failed to explain or justify why it believes that simply sharing an institution with an accrediting agency recognized as a gatekeeper to Federal aid qualifies a brand-new agency to immediately gain access to full gatekeeping authority.

One commenter wrote that the Department does not define what it means to be ''affiliated,'' nor does it propose any meaningful criteria to determine whether an accrediting agency is ''affiliated'' with a recognized agency. The commenter added that the Department provided no evidence of how difficult it has been for new accrediting agencies to meet the two-year rule in the past, nor how many agencies have been unable to obtain initial recognition as a result.

One commenter suggested changes to strengthen this provision, including: Placing restrictions on new agencies that gain recognition until they can demonstrate adequate experience and success in approving and reviewing programs or institutions and demonstrate financial stability, since an agency that is dependent on a small number of institutions as its revenue base creates a moral hazard wherein the agency has an incentive to maintain institutions among its membership that might not meet quality standards while also having an incentive to quickly approve new institutions to help build its financial base; a shortened recognition period instead of the full five years; limits on the number of institutions the agency can accredit; limits on growth in enrollment among the institutions it accredits; and restrictions on the ability to approve complex substantive changes such as change of ownership or control.

Discussion: We disagree with the commenters who expressed concern that requiring at least one institution that uses the agency as a gatekeeper for Federal dollars is not an effective proxy for the current requirements. This is the requirement of the current regulations, so no changes were made to that requirement. The effect of this regulation is to permit an accrediting agency that accredits an institution that is also accredited by another accrediting agency that serves as the Federal link for that agency to obtain recognition. This is necessary to allow new agencies to gain recognition since institutions that already have an established agency are unlikely to change to a new accrediting agency until we recognize that agency.

We also disagree with the commenters' assertion that the regulation would create a situation in which sharing an institution with an accrediting agency recognized as a gatekeeper to Federal aid would qualify a brand-new agency to immediately gain access to full gatekeeping authority. First, an agency would not be ''sharing'' an institution with another accrediting agency. Instead, an agency would be seeking dual accreditation, while identifying one agency to serve as its Federal gatekeeper, as our regulations require. As we explained in our response to comments in § 602.10, the significance of a Federal link is that it provides a threshold minimal criterion to enable the Department to consider recognizing an accrediting agency, but a Federal link, in and of itself, does not ensure recognition, nor does it guarantee that an institution may participate in title IV programs, since other requirements also apply to such institutions. A Federal link simply affirms that the agency's accreditation is, or could meet, a required element in enabling at least one of the institutions or programs it accredits to establish eligibility to participate in some other Federal program.

The Department believes that the term ''affiliated'' is not ambiguous and is commonly understood to mean closely associated with another entity, typically in a dependent or subordinate position. The Department interprets the term to mean an entity that is closely associated with the recognized accrediting agency seeking to establish a new accrediting agency.

As the Department noted during negotiated rulemaking, we do not have evidence to demonstrate how difficult it has been for new accrediting agencies to meet the two-year rule in the past, other than that there have been very few new institutional accrediting agencies recognized under the current regulations. New agencies face a difficult situation in that, under the current regulations, they need to convince an already-accredited institution to leave its established accrediting agency in the hope that the new agency gets recognized. This adds uncertainty that can harm students if their institution has any lapse in its accreditation. Alternatively, the new agency would need to identify institutions not already accredited to pursue accreditation with the new agency. That could be seen as a sign of the new agency's weakness since an institution new to accreditation is not likely to have the resources and experience of traditional institutions that have been accredited for many years. We cannot determine how many would-be agencies do not apply because they cannot identify institutions that are committed to using them for Federal gatekeeping purposes, as such an agency would never apply for recognition. Therefore, we do not have data to quantify how many agencies have been unable to obtain initial recognition as a result. We believe the dearth of new agencies shows that the barriers to entry for new accrediting agencies were so significant that they discouraged new entrants. We hope that by minimizing unnecessary barriers, new accrediting agencies will seek recognition from the Department.

We appreciate the commenter's suggestions to strengthen the regulation in this part. However, we believe that sufficient guardrails and oversight are provided throughout these regulations, and specifically within the procedures located at §§ 602.31 and 602.32, as to render these additional limitations unnecessary. The Department will continue to evaluate the agency's adherence to Federal requirements, including its financial strength, the quality and sufficiency of its staff, and its administrative capability.

Changes: None.

Comments: Many commenters expressed concern that the proposed changes that permit recognized accrediting agencies to re-organize or spin off a portion of their accrediting business by setting up a separate agency present too much risk to Federal student aid dollars. They recommended that the Department amend the proposed regulations to more narrowly define the term ''is affiliated with or is a division of'' as it is used in this section. One of these commenters suggested that the definition require the new agency to have the same policies, staff, and financial and administrative capability of the original agency, or otherwise meet the requirement of two years accrediting experience in its own right. Another commenter recommended that the Department prohibit any new agency from ''spinning off'' of a recognized agency if that recognized agency has had any compliance issues during the last review period.

Discussion: As we discussed previously in this preamble, we use the term ''affiliated'' to mean an entity that is closely associated with the recognized accrediting agency seeking to establish a new accrediting agency. We do not believe a narrower definition is required, as this establishes the appropriate conditions for consideration under this section.

We do not expect that permitting affiliated entities to leverage the recognition of an accrediting agency will generate unacceptable risk to Federal student aid. The affiliation provision only satisfies the Federal link requirement for the new agency and does not provide an accelerated path to recognition. The new agency would still be responsible for satisfying the remaining requirements imposed by the Department for recognition.

Similarly, we also do not believe it is necessary to prohibit any new agency from ''spinning off'' of a recognized agency if that recognized agency has had any compliance issues during the last review period, since the new agency is responsible for satisfying the requirements for recognition imposed by the Department.

We do not think it is appropriate to require an affiliated agency to have the same policies, staff, and financial and administrative capability. The reason for creating an affiliated agency is likely to be based on the need to establish policies that differ in important ways in order to meet the unique needs of a subset of postsecondary institutions. Moreover, it may be impractical to expect the new agency to use staff who are fully employed by another agency. The Department would fully review, including whether they have sufficient staff to fulfill their obligations.

The financial and administrative capability of the new agency is required as part of its determination of recognition; therefore, the new agency would be expected to be independently recognized as an accrediting agency, which is more important than relying upon the financial and administrative capability of the original agency. The only advantage being provided to affiliated agencies is the waiver of the requirement for two years of experience. All other standards for recognition must be met.

Changes: None.

Comments: One commenter disagreed with the proposal to eliminate the requirement that agencies seeking an expansion of scope provide documentation of their experience in accordance with § 602.12(b), noting that the Department's explanation that cross-referenced sections cover this is incorrect and not in compliance with the APA. Another commenter stated that the rule will impede transparency in the Department's recognition process. The commenter stated that if we only included documents viewed on-site in the record if there were issues of noncompliance, it would make it difficult for NACIQI to validate the Department's determinations and ensure that the Department is fulfilling its oversight responsibilities. This commenter also urged the Department to include an on-site visit in addition to the document production currently required and to make all document production, review, and feedback of each accrediting agency public including those held onsite.

Discussion: Section 602.32(j) requires agencies seeking an expansion of scope to provide documentation of their experience that satisfies the requirements of § 602.12(b). We, therefore, disagree with the commenter who opined that we eliminated these requirements and violated the APA. We also disagree with the commenter who concluded that excluding records that demonstrate compliance would make it difficult for NACIQI to validate the Department's determinations and ensure that the Department is fulfilling its oversight responsibilities. While the NACIQI relies, in part, on the Department staff's final analysis of the agency, it also considers other information provided under § 602.34(c). While under these regulations staff will not be required to upload every document they review, staff will be required to take notes regarding the review they conduct and provide a representative sample of evidence they identify to support their findings as part of their review. This evidence can be collected by making copies, saving images, or uploading a sample of documents reviewed.

Changes: None.

Comments: Several commenters opposed the proposed change to

§ 602.12(b)(2) that permits an agency that cannot demonstrate experience in making accreditation or preaccreditation decisions under the expanded scope at the time of its application or review for an expansion of scope to do so with limitations on the number of institutions or programs to which it may grant accreditation for a limited period of time. The commenters recognized that such agencies are also required under the proposed change to submit a monitoring report regarding accreditation decisions made under the expanded scope. One commenter requested that, if the Department proceeds with this change, that the regulation specify the agency ''will'' be subject to a limit of no more than five institutions or programs, within a specified volume of Federal financial dollars (*e.g.,* $10 million annually), until they have completed a full recognition cycle and demonstrated that they are effective assessors of quality. Another commenter suggested the regulations include a required evaluation of the outcomes and actions taken by the agency at other degree levels.

Discussion: We appreciate the commenters' input but believe that the regulations as written sufficiently ensure that an agency that demonstrates the capacity to administer an expanded scope, once authorized to make decisions under that expanded scope, is given time to also accumulate evidence of experience in doing so. The introduction of the monitoring report is an important element in support of this provision, as it provides the Department with an additional tool to detect and address any deficiencies that may arise as an agency begins to make decisions under the expanded scope. The regulation provides that the Department may limit the number of institutions or programs to which an accrediting agency may grant accreditation under the expanded scope for a designated period of time, and we believe it is appropriate to provide the Department with this discretion. The Department does not have the statutory authority to limit the amount of Federal financial aid dollars available to institutions or programs accredited by a specific agency if the students enrolled at an institution or in a program are qualified to receive Federal student aid.

We do not agree that it is necessary in this section of the regulation to add a specific requirement that the Department conduct an evaluation of the outcomes and actions taken by the agency at other degree levels since such a review will automatically be part of the Department's continuing oversight of the agency, including any subsequent review for renewal of recognition.

Changes: None.

Comments: Some commenters expressed concern that lowering the requirements for accrediting agencies to become recognized is likely to have the unintended consequence of some agencies lowering their standards in order to accredit more institutions and programs.

Discussion: We disagree that we have lowered the requirements for recognition of accrediting agencies. While changes have been made to allow for more competition and to address the need for innovation in higher education, these changes do not diminish the rigor with which the Department applies its standards during the recognition process, nor do they diminish the rigor agencies apply to their accreditation of institutions or programs. The Department does not anticipate recognized accrediting agencies will lower their standards in order to accredit more institutions and programs, as the reputation of an agency is critical to its members and their students. As noted earlier, it is still possible that an agency would lower standards to attract more institutions. The Department notes, however, that even under the current regulations an agency may lower its standards to attract or retain more members, so these new regulations do not create a new risk that does not already exist. Department staff and NACIQI monitor agencies to determine whether they maintain rigorous and appropriate standards that comply with the Department's regulations. The Department believes these regulations will give staff more capacity and means to do so. As many commenters have noted in response to our proposed regulations, accrediting agencies rely upon the trust and confidence of their peers and the community at large. The potential reputational damage that would result from lowered standards is an existential threat to an accrediting agency. In addition, if the standards no longer meet the Department's requirements, the accrediting agency will lose recognition by the Department.

Changes: None.

Comments: A couple of commenters objected to the Department's characterization of the growing practice of elevating the level of the credential required to satisfy occupational licensure requirements as credential inflation. They disagreed that professions that require graduate degrees may reduce opportunities for low-income students to pursue careers in those occupations.

Discussion: We appreciate the perspective of these commenters and acknowledge that, in many professions, the skills and knowledge required to be successful in an increasingly complex world necessitate graduate or professional education. However, we are also aware of situations where the elevation of degree requirements for licensure or employment is not predicated on a demonstrated inability for academic institutions to meet the education and training demands of employers at the current degree level, such as by modifying the curriculum, but on other unrelated and pecuniary factors. Finally, while Federal student aid fully supports graduate and professional education programs with student loans, the Department is keenly aware of the disparate debt burden some programs place on students whose personal circumstances require them to fully finance the cost of their graduate or professional education, without the assurance of commensurate wages to service that debt. Graduate students, who commonly obtain Graduate PLUS loans, are limited only to borrowing up to the cost of attendance less any other financial aid. Therefore, they can accumulate far more Federal student loan debt than undergraduate students. The Department is concerned that, when credential requirements for a specific occupation are elevated, employers will not necessarily increase wages to account for the added cost of pursuing a higher-level credential.

Changes: None.

Acceptance of the Agency by Others (§ 602.13)

Comments: Several commenters objected to the decision to remove and reserve this section, arguing that wide acceptance by one's peers is an important criterion to ensure adequate oversight of institutions of higher education. Commenters opined that this wide acceptance signals the new agency is trusted by peer organizations, practitioners, and other stakeholders.

Discussion: We appreciate the perspectives of these commenters; however, as noted in the NPRM, we believe that the current provisions of § 602.13 duplicate requirements in other sections of the regulations. Commenters should note that we incorporated elements of § 602.13 into the proposal for an initial application for recognition. Proposed § 602.32(b) requires an agency seeking initial recognition to submit letters of support from accredited institutions or programs, educators, or employers and practitioners, explaining the role for such an agency and the reasons why they believe the

Department should recognize the agency. The change effectively enhances the wide acceptance requirement under § 602.13 but applies it to only those accrediting agencies seeking initial recognition. In addition, under our current regulations, agencies are not required to provide letters from other accrediting agencies as evidence of wide acceptance. Some agencies have provided letters to demonstrate that programmatic accrediting agencies accept institutional accreditation by the agency as evidence of wide acceptance, but this is not required under our current regulations.

Changes: None.

Comments: One commenter expressed concern that the regulations in this section did not provide sufficient requirements for accrediting agencies that serve as financial stewards for Federal student aid. The commenter suggests that the Department impose, at a minimum, clear numerical caps on the number of institutions and programs that the agency may grant accreditation or preaccreditation for purposes of title IV.

Discussion: Under current and proposed § 602.36, the senior Department official (SDO) has the authority to limit, suspend, or terminate recognition of an agency if the NACIQI or Department staff demonstrate that deficiencies exist with the agency's compliance in meeting standards. For this reason, we do not believe it is necessary to impose a clear numerical cap on the number of institutions or programs that an agency may grant accreditation or preaccreditation for purposes of title IV aid. The senior Department official will determine if a limit is required and what that limit should be in the event that such a restriction is warranted by the recommendations of staff or NACIQI.

Changes: None.

Purpose and Organization (§ 602.14)

Comments: Two commenters expressed appreciation for the Department's recognition that the joint use of personnel, services, equipment, or facilities does not violate the ''separate and independent'' requirement.

Discussion: We thank the commenters for their support.

Changes: None.

Comments: One commenter expressed support for the Department's interest in ensuring compliance with the long-established statutory requirement that accrediting agencies be ''separate and independent'' from any other institution, organization, or association. The commenter noted that they have witnessed the influence of professional associations on the standards established by accrediting agencies and the impact of this influence on the creation of requirements established by State licensure boards that quash innovation and new professional entrants.

Discussion: We appreciate the commenter's support.

Changes: None.

Comments: One commenter recommended the Department revise this section to better address conflicts of interest and strengthen the role of public members. The commenter specifically suggested that we revise the definition to prevent newly retired administrators or professors from holding public commissioner positions; require all public commissioners to have a 10-year ''cooling off'' period from when they last worked primarily in higher education or owned equity in an institution of higher education; prohibit individuals who previously represented institutions on commissions from serving as public commissioners; and expand the ban on what constitutes employment connected to an institution in order to include individuals with any association to higher education institutions or organizations, not just individuals affiliated with the accrediting agency.

Discussion: We appreciate the commenter's concern that public members of accrediting agency decision-making bodies may have conflicts of interest that impede their ability to fully represent their constituency. However, our experience with the recognized accrediting agencies does not support the assertion that members of a decision-making body are unable to fulfill their duties because of prior employment or affiliation with a postsecondary institution. Indeed, the opportunity to meaningfully contribute while serving as a member of a decision-making body is enhanced with the specialized knowledge an individual may have acquired while working in postsecondary education, and each agency must establish and implement guidelines to avoid conflicts of interest.

Changes: None.

Administrative and Fiscal Responsibilities (§ 602.15)

Comments: Two commenters objected to the proposed changes in this section, suggesting that the changes to the required maintenance of records will impede transparency and accountability. These commenters argued that the absence of a record of the elements that informed the agency's final decision will hamper the Department in fulfilling its oversight responsibilities.

Discussion: We disagree that the absence of a record of the elements that informed the agency's final decision will hamper the Department in fulfilling its oversight responsibilities. The Department is satisfied that the final decision documentation will provide sufficient detail to assess the agency's actions.

Changes: None.

Comments: One commenter recommended revising § 602.15(a)(4) to provide for single-purpose institutions that prepare students for a wide variety of career and professions, to read, ''Educators, practitioners, and/or employers on its evaluation, policy, and decision-making bodies, if the agency accredits programs or single-purpose institutions that prepare students *primarily* for a specific profession.''

Discussion: We do not believe the suggested change substantively improves the regulatory language. Graduates of single-purpose institutions may pursue a variety of careers and professions.

We also recognize that, while some programmatic accrediting agencies may accredit programs that prepare individuals for particular jobs, others might accredit programs that focus on unique curricular requirements or pedagogical practices, or that are based upon a shared set of underlying philosophical or religious beliefs. Such an agency might also accredit programs based on a shared set of scientific principles or educational standards. As such, an employer or a practitioner may not be able to provide feedback based on the way the program prepares individuals to perform a specific job function, but instead on the way that the program impacts other aspects of the person's contributions to the workplace more generally, including how graduates approach their work and solve problems.

Changes: None.

Comments: Two commenters requested that we clarify that the inclusion of students on decision-making bodies and employers on evaluation, policy, and decision-making bodies is optional.

Discussion: Section 602.15(a)(4) provides that the agency will include ''Educators, practitioners, and/or employers on its evaluation, policy, and decision-making bodies, if the agency accredits programs or single-purpose institutions that prepare students for a specific profession.'' The agency may have one or more of these roles represented, but they are not required to have all of these roles represented on its evaluation, policy, and decision-making bodies.

Section 602.16(a)(5) provides that the agency will include ''Representatives of the public, which may include students, on all decision-making bodies.'' The agency may include a student or students as public representatives as members of their decision-making bodies, but we do not require them to do so.

Changes: None.

Comments: One commenter recommended that we delete the phrase ''which may include students'' from the provision of § 602.15(a)(5) that includes members of the public on decision-making bodies. The commenter recommended that we explicitly note the possible inclusion of students in these roles in the accompanying handbook or guidelines. The commenter noted that, if subsequent experience shows that problems have materialized as a result of the presence of students, we can more easily modify the handbook or guidelines.

Discussion: We appreciate the commenter's concern that students may not be well-suited to the work of an accrediting agency's decision-making body, but the regulation does not require an agency to include a student as a member of the public. The intention of this regulatory provision is to recognize that, as entities that serve the interests of students by assuring the quality of postsecondary institutions, student perspectives should be represented. However, we also recognize that many, if not all, members of accrediting agency decision-making bodies consistently consider the needs of students. We note that agencies are free to include (or not include) students both before and after the effectiveness of this regulation. Students, like all members of agency decision-making bodies, must avoid conflicts of interest and adhere to other Department and agency requirements.

Changes: None.

Comments: Two commenters requested that we modify § 602.15(b)(2) that requires the agency to maintain complete and accurate records of ''all decision letters issued by the agency regarding the accreditation and preaccreditation of any institution or program and any substantive changes.'' The commenters suggested that we add a sentence to provide that this requirement would not apply to decision letters sent to institutions that are no longer in existence or accredited by the agency.

Discussion: We appreciate the commenters' request, but note that, while it would likely be uncommon, a situation could arise that would necessitate the review of decision letters sent to institutions or programs that are no longer in existence or accredited by the agency.

Changes: None.

Accreditation and Preaccreditation Standards (§ 602.16)

Comments: One commenter stated that it would not be possible for an agency to effectively address the quality of an institution or program, as required by proposed § 602.16(a), if the agency were prohibited from considering the impact of religious-based policies. The commenter suggested that such a provision gives too much deference to institutions; a religious institution can violate almost any accreditation standard so long as it justifies it with its religious mission. The commenter noted that the HEA, 20 U.S.C. 1099b(a)(4)(A), requires respect of all missions throughout the accreditation process and opines that the regulation appears to single out institutions with religious missions for special treatment. Additionally, the commenter suggested that the proposed regulatory language ''does not treat as a negative factor'' appears to go further than the term ''respect'' used in the statute.

Discussion: We appreciate the comment. In light of the United States Supreme Court decision in *Trinity Lutheran Church of Columbia, Inc.* v. *Comer,* and the United States Attorney General's October 7, 2017 Memorandum on Federal Law Protections for Religious Liberty pursuant to Executive Order 13798, the Department believes that it must provide more robust protection for faith-based institutions in situations in which their ability to participate in Federal student aid programs may be curtailed due to their religious mission. Allowing accrediting agencies to make negative decisions because of the exercise of religion could easily violate the Free Exercise Clause of the United States Constitution. While the HEA requires accrediting agencies to respect the missions of all institutions, the HEA singled out the need for accrediting agencies to respect religious missions, thereby emphasizing the need for particular attention to be paid to the rights of faith-based institutions. In addition to the HEA, the Constitution protects religious missions in ways that other institutional missions are not protected. Simply requiring accrediting agencies to respect religious mission does not go far enough to ensure that faith-based institutions' Constitutional rights are protected. In addition, the Department feels the need to clarify that respecting a religious mission includes not considering an institution's policies or practices related to the tenets of its faith—which could include curricular requirements, hiring practices, conduct codes, and other aspects of student life and learning—as a negative factor in making an accreditation decision. In order to avoid Constitutional concerns or violations, the Department believes it is advisable to protect institutions' religious missions in the accreditation process, and that doing so includes not treating a policy or practice based on the religious mission as a negative factor, even if that policy or practice differs from particular points of view or priorities. The need to provide this protection has become apparent in several instances, including when the accreditation of faith-based universities has been publicly questioned by accrediting agencies due to their long-held institutional stances with a religious basis that have lost favor in academia and potentially the public at large.[11]

In addition, under RFRA the government may only substantially burden a person's exercise of religion if the application of that burden to the person is the least restrictive means of furthering a compelling governmental interest.

Where an accreditation decision does not respect the religious mission of an institution or uses as a negative factor an institution's religious mission-based policies, decisions, and practices in the areas covered by § 602.16(a)(1)(ii), (iii), (iv), (vi), and (vii), the religious institution's exercise of religion could be substantially burdened. Furthermore, removing Federal aid would not be the least restrictive means of furthering a compelling governmental interest, as long as the agency can require that the institution's or program's curricula include all core components required by the agency.

Thus, agencies must ensure that they do not use exercise of religion as a negative factor in their decision making.

Changes: None.

Comments: One commenter expressed concern that the inclusion of the phrase, ''consideration of State licensing examinations, course completion, and job placement rates'' in § 602.16(a)(1)(i) imposes a vocational or occupational goal on postsecondary education. The commenter noted that, without in any way minimizing the importance of postsecondary education which does

[11] *www.christianpost.com/news/christian-college-says-accrediting-agencys-proposed-guideline-change-may-harm-religious-schools.html; https://www.empirestatetribune.com/est/campus/celina-durgin/03/03/2015/gordon-college-faces-potential-loss-of-accreditation-due-to-homosexuality-policy.*

focus on vocational and occupational outcomes, it is important to preserve that aspect of higher education that is centered on the transformation of the individual, on scholarship, and the development of the mind. The commenter requested that we include an explicit statement in the regulations to the effect that accrediting agencies may use indicators and expectations that are appropriate to the field of study, and that need not be quantitative in nature.

Discussion: The language referenced by the commenter is part of the current regulations and makes clear that the use of these quantitative indicators is at the discretion of the agency, to be used only as appropriate. We did not propose changes to this language in the NPRM and are not making changes in these final regulations. We do not agree that we need an explicit statement in the regulations to the effect that accrediting agencies may use indicators and expectations that are appropriate to the field of study, as this is already permitted under the regulations. In addition, the regulations already permit an agency to rely upon qualitative indicators, or a mixture of qualitative and quantitative indicators, to evaluate an institution or program relative to its mission.

Changes: None.

Comments: Several commenters objected to this section of the regulations. One opined that only a well-rounded education, replete with the sciences, social sciences, humanities, and arts, can ensure that students are prepared not just to become members of the workforce, but also active and critical citizens of our Nation. Another offered that academic institutions need to have one set of consistent accreditation standards across all academic programs offered by the institution—arts, sciences, and humanities, as well as career-technical education. The commenter stated that individual employer training programs are outside the scope of an academic institution's core programs, and should be funded by employers, not title IV funds, adding that career and technical education is broader than an individual employer's training program and qualifies students for gainful employment with a variety of employers.

Discussion: We appreciate the commenters ideas on a well-rounded education; however, we do note that occupational programs are at the core of many traditional institutions. Occupational majors such as teacher education, nursing, and engineering continue to dominate student enrollments at many institutions. We disagree that our regulations imply that preparing for a specific occupation is the only goal of postsecondary education. Nonetheless, the Department of Education Organization Act of 1979 (Pub. L. 96–88 [12]) prohibits the Department from exercising any direction, supervision, or control over the curriculum, program of instruction, administration, or personnel of an educational institution, accrediting agency, or association.

Changes: None.

Comments: Several commenters requested that the Department provide clarifying examples of ''clear expectations'' as referenced in § 602.16(a)(1). One commenter opined that ''clear expectations'' is not equivalent to the concept of effective application of standards and, as such, is inconsistent with the requirement in HEA section 496, 20 U.S.C. 1099b, that the Secretary is responsible for determining that an accrediting agency or association has failed to apply effectively the criteria. Another commenter noted that, as written, the regulations could cause undue burden to the agency if it is interpreted to require the establishment of quantitative standards for faculty and fiscal capacity, among other elements, that would take away flexibility of the program and institution, depending on their mission and goals.

Discussion: ''Clear expectations'' means that an agency must be direct and precise in communicating what requirements an institution or program must meet in order for the agency to make the determination that the institution or program is of sufficient quality to become accredited or maintain its accredited status. This does not mean that an accrediting agency must establish bright-line standards or require all institutions or programs to achieve the same quantitative results. It also does not preclude the use of qualitative standards for evaluating quality. Instead, it means that an accrediting agency must explain the criteria upon which it will make a determination that an institution is or is not providing instruction of sufficient quality. We do not believe that the use of ''clear expectations'' is inconsistent with the HEA; rather, we think it is far more consistent with the requirement that agencies assess institutional quality by reviewing a number of specific factors related to program design, instructional resources, and educational facilities. We believe that the prior regulations were insufficient because it was not clear what it meant to ''address'' quality.

The Department does not agree that this provision increases burden on accrediting agencies, as the new regulations do not require the establishment of quantitative standards for faculty and fiscal capacity, nor do they disallow the use of qualitative measures to make a quality determination. While it is possible that an agency may wish to revise its policies and standards as a result of these regulatory changes and clarifications, which could impose a level of burden, it is not required. In some cases, accrediting agencies may wish to revise their standards to make them clearer, which may cause a short-term burden, but doing so may alleviate confusion that would, over the long run, be even more burdensome.

Changes: None.

Comments: One commenter expressed support for the proposed changes to § 602.16(a)(2), as they provide alternative pathways for institutional Federal financial aid eligibility. Another commenter expressed support for the provisions in § 602.16(a)(2)(ii) that make clear that, after the five-year limit on preaccreditation has expired, an agency must make a final accreditation action and must not place an institution or program on another type of temporary status. Two commenters expressed support for the regulations proposed at § 602.16(d)(1). One commenter noted that they provide alternative pathways for institutional Federal financial aid eligibility. One commenter appreciated that the regulations require accrediting agencies to clearly define ''direct assessment'' and be ready to evaluate it before they can accredit such programs.

Discussion: We appreciate the commenters' support.

Changes: None.

Comments: Two commenters objected to proposed § 602.16(d)(1). One commenter objected to the fact that the agency conducts an evaluation of the quality of institutions or programs. The commenter asserted that it is the faculty who have the expertise to make a judgment on the curriculum—and that expertise comes not only from within the discipline seeking to institute a new course, but inclusively from across the institution so that a wide perspective is provided for the quality and viability of the course or courses in question. The other commenter opined that the addition of direct assessment will increase credential inflation.

Discussion: We appreciate the first commenter's point of view; however,

[12] *https://legcounsel.house.gov/Comps/Department%20Of%20Education%20Organization%20Act.pdf.*

accrediting agencies are responsible for evaluating the academic quality of the programs or institutions they accredit. A key purpose of accreditation is to provide third-party verification of institutional or programmatic quality so, while the faculty may establish the curriculum, it is up to the accrediting agency to verify that it meets the standards put forth by the agency. In this section of the regulations, we are only amending the language to include a reference to direct assessment education, in addition to distance education and correspondence courses. We disagree with the commenter who opined that direct assessment programs would lead to credential inflation. Direct assessment programs directly measure student knowledge and learning, and have no direct bearing on the level of the credential a student earns. The credential associated with the program that considers direct assessment of student learning is determined by other factors.

Changes: None.

Comments: One commenter supported the provisions in § 602.16(f) that would permit accrediting agencies to establish alternative standards for approval of curriculum. The commenter noted that this change would enable institutions to better address the needs of employers and help students to meet the educational requirements of professional credentialing or licensing boards of their chosen profession.

Discussion: We appreciate the commenter's support.

Changes: None.

Comments: Two commenters objected to the provisions in § 602.16(f) that would permit accrediting agencies to establish alternative standards for approval of curriculum. One commenter argued that this would undermine faculty governance and is an unlawful incursion by the Department into matters of academic responsibility. Another commenter expressed concern about these provisions and requested clarification, noting it appeared that agencies would now be required to establish a standard to allow for institutions to have a separate curriculum approval process to support external entities (*e.g.,* industry advisory boards, credentialing/licensing boards, employers) making decisions in this process and provide documentation to meet this criterion. The commenter observed that we do not restrict agencies from allowing institutions to have a separate curriculum approval process but said that it was unclear if separate approvals for external entities (*e.g.,* employers) would now be required with this proposed provision. The commenter asked, if this was the case, what the expectations are for documenting the standards established for those external entities. The second commenter opined that the regulation would result in the emergence of low-level industry-based accrediting standards.

Discussion: The commenters correctly noted that § 602.16(f) would permit accrediting agencies to establish alternative standards for approval of curriculum. We would not require accrediting agencies to establish a standard to allow for institutions to have a separate curriculum approval process for a program that typically leads to a specific occupation; rather, these regulations allow for the development of such standards. The Department declines to establish new requirements for documenting alternative standards, because we believe that accrediting agencies are already required to document their standards and to retain documents supporting all final decisions.

We do not expect these regulations will result in the emergence of low-level, industry-based accrediting standards, as we have not diminished the rigor with which the Department applies its standards during the recognition process, nor have we diminished the rigor agencies must apply to their accreditation of institutions or programs. To the contrary, we believe that the involvement of employers could have the opposite impact of strengthening the curriculum and increasing program rigor. As many commenters noted in response to our proposed regulations, accrediting agencies rely upon the trust and confidence of their peers and the community at large. The potential reputational damage that would result from lowered standards is an existential threat to an accrediting agency.

Changes: None.

Comments: Several commenters objected to the provisions in § 602.16(f)(4) that would permit accrediting agencies to maintain separate faculty standards for dual enrollment programs. The commenters noted that parity between dual enrollment programs and college courses is very important in order to avoid the perception that dual enrollment programs are ''lesser versions'' of college courses and to facilitate the transfer of credit. One group of commenters representing a rural institution noted that they have always firmly used the same credentialing and qualification standards for faculty teaching ''regular'' courses and those teaching ''dual enrollment'' courses, as they believe that is important for maintaining quality and rigor.

Discussion: We appreciate the commenters' concerns; however, as noted in the NPRM, the Department does not believe an agency should have to choose between setting rigorous standards for faculty that may be appropriate, for example, at comprehensive or research institutions, and providing students with the best opportunities possible, including in rural locations where faculty with specific kinds of degrees are not plentiful.

In addition, the Department recognizes that, in many instances, high schools provide dual enrollment programs at their location due to unreasonable travel distances to a local college. In those instances, the high school teacher may have a different kind of academic credential but may have years of experience teaching college-level courses that are relevant to the dual enrollment opportunity. Also, the credential of choice may be very different for career and technical education instructors, where workforce experience may be far more important than the academic credential an instructor holds.

Changes: The amendatory language in the NPRM added a new paragraph (b), and we should have redesignated all of the paragraphs that followed. Current paragraphs (d), (e), and (f) should have been redesignated as paragraphs (e), (f), and (g). We have revised the amendatory language to contain the correct numbering. We also include in the amendatory language § 602.16(g)(4) that was inadvertently omitted from the NPRM. This paragraph provides that agencies are not prohibited from having separate faculty standards for instructors teaching courses within a dual or concurrent enrollment program, as defined in 20 U.S.C. 7801, or career and technical education courses, as long as the instructors, in the agency's judgment, are qualified by education or work experience for that role.

Application of Standards in Reaching an Accrediting Decision (§ 602.17)

Comments: One commenter opposed the changes to § 602.17, arguing that the Department has made the requirements an agency must meet when applying its standards to accreditation decisions less rigorous. The commenter argued that the Department has failed to provide adequate justification for the proposed changes.

Discussion: These regulations remain largely unchanged with respect to the requirements an agency must meet when applying its standards to accreditation decisions. We are revising the requirements of § 602.17(a)(3) to provide for the consideration of academic standards that are equivalent to those that are commonly accepted to facilitate the implementation and evaluation of pilot programs. The negotiators recognized that flexibility was required to allow agencies to consider their standards through a lens that fosters innovation, and we reiterate that this alternative approach is not a less rigorous approach.

Changes: None.

Comments: Two commenters expressed support for changes in § 602.17(a)(2) that require accrediting agencies to evaluate institutions at the institutional-level and at the individual program level. One of these commenters requested additional guidance concerning the Department's expectations for institutional accrediting agencies conducting evaluations at the program level. The commenter expressed concern that conflicts could arise due to competing interests if both an institutional accrediting agency and a programmatic or specialized accrediting agency review programs.

Several commenters objected to the proposed changes in § 602.17(a)(2), arguing that the individual review of programs is not within the purview of institutional accrediting agencies. One commenter noted that institutional accrediting agencies look at each institution as a whole on an array of measures, such as financial stability, planning, and academic and related programs, including program review policies and implementation. The commenter stated that these agencies generally do not review individual programs unless something is called to their attention that affects existing standards. Two commenters wrote that this requirement would duplicate and confuse the institutional accrediting agencies' work with that of programmatic and specialized accrediting agencies, increasing the regulatory burden on accrediting agencies and institutions. One commenter requested clarification of the requirements and expectations for each type of agency, especially when a program holds an accreditation status with a programmatic accrediting agency.

Discussion: We expect institutional accrediting agencies to demonstrate that they have established and use procedures for evaluating the quality of academic programs at an institution in accordance with these regulatory provisions. This is not a new requirement, as institutional accrediting agencies have always been responsible for evaluating the quality of the programs offered by the institutions it accredits. However, this does not mean that the agency must perform an in-depth review of every program offered by the institution. In general, an institutional accrediting agency should be aware of the programs offered by the institution and should make sure the institution has policies and practices in place to ensure that, in general, the academic programs offered meet the agency's quality standards. It is hard to imagine, in fact, how an accrediting agency could fulfill its obligation to ensure instructional or academic quality without engaging in a more detailed review of one or more of the institution's programs. Institutions are composed of academic programs and only through a review of those programs will an accrediting agency be able to determine whether an institution's policies regarding academic quality are effective in ensuring academic quality and rigor.

An accrediting agency may use sampling or other methods in the evaluation to comply with these requirements. An agency may also use the accreditation by a recognized programmatic accrediting agency to demonstrate the evaluation of the educational quality of such programs.

If conflicts arise between an institutional accrediting agency and a programmatic accrediting agency for a particular program, we would expect the institutional accrediting agency to consider the determination of quality made by the programmatic accrediting agency, as it possesses subject matter expertise. This reliance on programmatic accrediting agency's expertise mitigates duplication of effort, while providing an opportunity for collaboration and cohesion in an agency's independent assessment of program quality.

Changes: None.

Comments: One commenter suggested there is inconsistency between the requirements in § 602.17(a)(2) and (b). Section 602.17(a)(2) requires accrediting agencies to evaluate student achievement and program outcomes at the institutional and programmatic level, while § 602.17(b) permits accrediting agencies to use an institution's and program's self-study process to assess the institution's or program's education quality and success in meeting its mission and objectives, highlight opportunities for improvement, and include a plan for making those improvements. The commenter argued that there is significant research[13] that one can objectively measure student achievement and outcomes, and that metrics and rubrics can validate that an institution and its academic programs are high quality and that institutions are properly measuring student achievement.

Discussion: The Department disagrees that the requirements in § 602.17(a)(2) and (b) are inconsistent. The requirements are complementary, as they require an agency to evaluate whether an institution or, in the case of a programmatic accrediting agency, a program is achieving its stated objectives, *and* require the institution or program to conduct a self-study to assess its educational quality and success in meeting its mission and objectives, highlight its opportunities for improvement, and develop a plan for making those improvements. Nothing in the regulations precludes an agency, institution, or program from using objective measures.

Changes: None.

Comments: One commenter supported the changes in § 602.17(a)(3) that allow institutions to maintain requirements that ''at least conform to commonly accepted academic standards, or the equivalent, including pilot programs.'' The commenter noted that this provides institutions with the flexibility to pilot innovative, experimental programs while at the same time protecting consumers and maintaining educational quality.

Discussion: We appreciate the commenter's support.

Changes: None.

Comments: One commenter opposed the changes to § 602.17(a)(3) that would allow accreditation agencies to maintain degree and certificate requirements that at least conform to commonly accepted academic standards ''or the equivalent, including pilot programs in § 602.18(b).'' The commenter stated that the Department has not provided examples or data to support the claim that currently institutions are resisting meaningful innovations that could benefit students and their fields, or an analysis of what the actual barriers are to enacting innovations when they are supported by faculty who teach in those fields. Another commenter suggested the Department create a probationary process for those institutions that propose an innovation to produce

[13] Palomba, C., and Banta, T., ''The Essentials of Successful Assessment'' in Assessment Essentials: Planning, Implementing, and Improving Assessment in Higher Education, Jossey-Bass, 1999; Suskie, L., ''Assessing Student Learning: A Common Sense Guide,'' Anker Publishing, 2004; and *learningoutcomesassessment.org.*

outcomes more effectively or efficiently, during which they make a case for those innovations, try them out, and implement what works.

Discussion: The Department has received input from several institutions that support the claim that commonly accepted academic standards can be an impediment to innovation. For example, an institution interested in moving to three-year baccalaureate degree programs is concerned that, although the same learning objectives may be met as in a four-year degree program, the three-year degree is not a commonly accepted academic standard. As the commenter above stated, the changes to this section of the regulations provide institutions with the flexibility to pilot innovative, experimental programs while at the same time protecting consumers and maintaining educational quality.

The creation of a probationary process for institutions that propose an innovation to produce outcomes more effectively or efficiently, during which they make a case for those innovations, try them out, and implement what works falls within the purview of the accreditation agencies, and not the Department.

Changes: None.

Comments: One commenter objected to the phrase in § 602.17(b) that reads, ''highlights opportunities for improvement, and includes a plan for making these improvements.'' The commenter suggested that this proposal is highly unworkable, because improvement in teaching and learning at the postsecondary level is rare, and that we should remove this language from the regulation.

Discussion: We disagree with the commenter's assertion that improvement in teaching and learning at the postsecondary level is rare. The Academy of Arts & Sciences' report on *Policies and Practices to Support Undergraduate Teaching Improvement* [14] notes that ''advances in the learning sciences are providing new insights into how students learn, and the ways in which teaching can support that learning. The main challenges are putting that knowledge in the hands of the faculty who teach undergraduates and providing them with the incentives and necessary support to use it.'' We agree that improvements in teaching and learning are challenging but also note that colleges and universities across the Nation expend significant efforts in this area.[15] [16] [17] [18] These regulations seek to encourage continued progress.

Changes: None.

Comments: One commenter requested changes to § 602.17(e) to better emphasize congressional intent that third-party comments play an important role in the accreditation process, not just ''information substantiated'' by the accrediting associations. The commenter expressed concern that associations of colleges and universities are inclined to protect their members, and the interests of their members, rather than act on the interests of students, taxpayers, and the Federal government.

Discussion: We appreciate the commenter's request but note that we have revised § 602.17(e) only to ensure that the data the accrediting agency considers are valid. We made no changes to the third-party comment requirements in § 602.23(b). Third-party comments, along with any other information from other sources, will be used to determine whether the institution or program complies with the agency's standards. At the same time, we must ensure that institutions maintain their due process rights and that allegations of misconduct or illegal activity are not confused with proof of misconduct or illegal actions through a final judgment by the courts.

Changes: None.

Comments: Several commenters wrote in support of the changes to § 602.17(g) that require an accrediting agency to demonstrate that it requires institutions that offer distance education or correspondence education to have processes in place to establish that a student who registers for a distance education or correspondence education course or program is the same student who participates and completes the course or program and receives academic credit. The commenters noted that removing the list of options for confirming student identity provides institutions flexibility to find solutions that fit the modality and content of the course and avoids obsolescence due to outdated technology and processes. One commenter also supported the requirement for notification of students of any additional charges (fees, software, hardware) associated with identity verification at the time of registration or enrollment.

Discussion: We appreciate the commenters' support.

Changes: None.

Comments: Some commenters expressed concern that the requirements of § 602.17(g) may incentivize profit-seeking entities to say that they can accomplish verifying student identity for a fee. According to the commenters, some of these entities have already asserted that test proctoring as a means of verifying student identity would no longer be acceptable because we did not include it in the proposed regulatory language. The commenters noted that, while the proposed language is clear, an additional sentence would assist institutional personnel in understanding our intent: ''By removing the list of verification methods, the Department does not imply that those techniques are invalid or would not be acceptable in fulfilling the requirements of this section.''

Discussion: We are revising § 602.17, in part, to provide greater flexibility to agencies in establishing requirements for verifying student identity. We neither require nor encourage the use of profit-seeking entities to comply with this provision. Additionally, the regulations stand alone and do not require a comparison of previously included text.

We believe the regulations, as some commenters noted, clearly state the requirement and do not believe there is a need to state that the removal of the list of verification methods means that institutions could not continue to use such techniques. For example, while not included on our list of potential verification methods, test proctoring as a means of verifying student identity continues to be an acceptable method. While we agree with the commenters that removing the list of verification methods does not preclude an institution from continuing to use those methods, we do not typically include information in our regulations regarding what we are not regulating.

Changes: None.

Comments: One commenter requested that the Department revise § 602.17(g) to require accrediting agencies to prove they have robust systems to prevent what the commenter alleges to be widespread cheating in hybrid and online courses. Another commenter asserted that the proposed regulations are not sufficient to prevent student cheating, which they assert is very easy to do, especially online. The commenter stated that we should strengthen this

[18] *insidehighered.com/blogs/higher-ed-gamma/strategies-improving-student-success.*

section to better control credential inflation associated with online cheating.

Discussion: While we understand that many people assume that online and hybrid courses are more susceptible to student cheating than brick-and-mortar courses, a recent study [19] found that, ''contrary to the traditional views and the research literature, the surveyed students tend to engage less in AD [academic dishonesty] in online courses than in face-to-face courses.'' We do not believe there is a correlation between online cheating and credential inflation and the commenter provided no such evidence.

Changes: None.

Ensuring Consistency in Decision-Making (§ 602.18)

Comments: Two commenters supported the proposed changes in § 602.18, writing that they provide flexibility for agencies in their application and enforcement of accreditation standards, and strong support for innovation in curriculum and instructional methods at institutions that serve non-traditional students through online instructional modalities.

Discussion: We appreciate the commenters' support.

Changes: None.

Comments: One commenter asserted that the changes proposed in § 602.18 would weaken the expectation that accrediting agencies ensure quality, create loopholes in enforcement of standards, and diminish the Department's ability to take action against an agency that fails to act when necessary.

Discussion: We disagree that the changes proposed in § 602.18 would weaken the expectation that accrediting agencies ensure quality, create loopholes in enforcement of standards, and diminish the Department's ability to act against an agency that fails to provide oversight when necessary. Indeed, the requirements in the section explicitly state that agencies must consistently apply and enforce standards. Moreover, while this section of the regulation applies specifically to the actions of the agency, subparts C and D detail, respectively, the requirements of the application and review process for agency recognition by Department staff and Department responsibilities, which continue to be rigorous and evidence based.

[19] *researchgate.net/publication/325249542_Predictors_of_Academic_Dishonesty_among_undergraduate_students_in_online_and_face-to-face_courses.*

Changes: None.

Comments: One commenter requested that we revise § 602.18(a) to make explicit that ''consistent'' does not mean ''identical.''

Discussion: ''Consistent'' means free from variation or contradiction, accordant, coherent, compatible, concordant, conformable to, congruent, congruous, consonant, correspondent with or to, harmonious, or nonconflicting,[20] whereas ''identical'' means ''being the same.'' [21] We do not view these terms as interchangeable.

Changes: None.

Comments: Two commenters supported the proposed changes to § 602.18(c) that would allow for agencies to work with institutions and programs to determine alternative means of satisfying standards and procedures due to special circumstances or hardships. One commenter appreciated the flexibility to find creative ways to report and comply with expectations when under hardship. Another commenter appreciated the Department's acknowledgement of the flexibility required to address student hardships and support innovation without jeopardizing recognition from the Department. The commenter is concerned, however, that allowing a program to remain out of compliance for three years, without any threat to its accreditation status, may allow for substandard education and the potential for unfair treatment of students to continue for an unreasonably long time. The commenter noted that, given the wide range of examples of circumstances that are beyond the control of an institution, from natural disasters to faculty recruitment issues, the Department should ensure that this provision continues to protect the interests of students, one of the primary purposes of accreditation.

Discussion: We appreciate the commenters' support. We do not agree that the provisions of this part will lead to substandard education and the potential for unfair treatment of students to continue for an unreasonably long time. When curricular changes are needed for an institution to come into compliance with an agency's standards, it could take years for those changes to be developed, approved, and implemented, and for the positive effects of the new curriculum to be observed in the outcomes of program graduates. Nothing requires an accrediting agency to provide the full amount of time for an institution to come into compliance, and the Department expects that agencies would establish milestones that an institution must meet during the improvement period, as required in § 602.19(b). Under current regulations, agencies can provide more than 12 months for an institution to come into compliance by granting ''good cause'' extensions. The Department believes that accrediting agencies have the experience and expertise to determine a reasonable time for an institution to come into compliance based on the steps necessary to come into compliance and the risk to students who continue to enroll during the improvement period. The requirements in § 602.18(b) are precisely the guardrails necessary to protect students, even under unforeseen circumstances. The goals and metrics required by this provision under alternative standards must be equivalently rigorous to standards applied under normal circumstances.

[20] *merriam-webster.com/dictionary/consistent.*

[21] *merriam-webster.com/dictionary/identical.*

Changes: None.

Comments: One commenter contended that the changes proposed in § 602.18(b) would encourage credential inflation and education expansion.

Discussion: We do not agree that the changes proposed in § 602.18(b) would encourage credential inflation and education expansion. The commenter attributed this potential risk to innovation; while we hope that innovation increases access to education for students seeking alternative postsecondary pathways, we do not associate that increase with credential inflation.

Changes: None.

Comments: Several commenters objected to § 602.18(b)(3), which states that accrediting agencies may not use an institution's religious mission-based policies, decisions, and practices in certain areas—curricula; faculty; facilities, equipment, and supplies; student support services; and recruiting and admissions practices—as a ''negative factor'' in assessing the institution. The commenters asserted that this change elevates religious mission above other types of institutional mission, which the HEA similarly protects (20 U.S.C. 1099b(a)(4)(A)). Commenters also contended that the Department has not adequately justified these proposed changes. They noted that we reported that we have not received any formal complaints about an institution's negative treatment during the accreditation process because of its adherence to a religious mission, nor have we provided any data on the number of institutions and students these changes would impact. Several commenters opined that the regulation protects religious institutions that engage in discriminatory behavior.

Discussion: Section 602.18 currently requires that accrediting agencies consistently apply and enforce standards that respect the stated mission of the institution, including religious mission. In light of the United States Supreme Court decision in *Trinity Lutheran Church of Columbia, Inc.* v. *Comer,* and the United States Attorney General's October 7, 2017 Memorandum on Federal Law Protections for Religious Liberty pursuant to Executive Order 13798, the Department believes that it must provide more robust protection for faith-based institutions in situations in which their ability to participate in Federal student aid programs may be curtailed due to accrediting agency decisions related to an agency's disagreement with tenets of the institution's faith-based mission, rather than actual insufficiencies in the institution's quality or administrative capability. Allowing accrediting agencies to make negative decisions because of the exercise of religion could easily violate the Free Exercise Clause of the United States Constitution. While the HEA requires accrediting agencies to respect the missions of all institutions, the HEA particularly singled out religious missions as something that agencies must respect, which suggests that Congress had concerns that faith-based institutions would be particularly vulnerable to negative accrediting agency decisions based on philosophical differences rather than insufficiencies of institutional quality or administrative capability. In addition to the HEA, the Constitution protects religious missions in ways that it does not protect other institutional missions. In order to avoid Constitutional concerns or violations, the Department believes this level of protection is appropriate regardless of whether there is a history of formal, documented complaints. When institutions believe that they have been treated unfairly based on their religious mission, they may fear retribution for issuing a formal complaint to the agency or the Department. However, in meetings with institutional leaders and organizations that represent faith-based institutions, and in the case of a recent proposed change in one agency's standards, it is clear to us that there is a real threat of negative accrediting agency action based on a philosophical disagreement In addition, under RFRA the government may only substantially burden a person's exercise of religion if the application of that burden to the person is the least restrictive means of furthering a compelling governmental interest. Where an accreditation decision uses as a negative factor an institution's religious mission-based policies, decisions, and practices in the areas covered by § 602.16(a)(1)(ii), (iii), (iv), (vi), and (vii), the religious institution's exercise of religion could be substantially burdened. Furthermore, removing Federal aid would not be the least restrictive means of furthering a compelling governmental interest, as long as the agency can require that the institution's or program's curricula include all core components required by the agency. Thus, although the Department does not have data on the number of institutions that we would consider to have a religious mission under these regulations or know the number of students those institutions serve, National Center for Educational Statistics, Fall Enrollment and Number of Degree-Granting Postsecondary Institutions, by Control and Religious Affiliation of Institution: Selected Years, 1980 Through 2016 (Aug. 2018) indicates that there were 881 faith-based institutions in the fall of 2016 as reported by the institutions. Institutions will continue to be subject to laws prohibiting discrimination, unless they are otherwise exempt.

During rulemaking, one negotiator described the challenges that medical schools have faced when students, the institutions that provide medical education, or hospitals that provide medical residencies are unwilling to engage in practices that run counter to their religious beliefs or missions. Although agencies and institutions found a way to ensure that students could complete their medical training without violating their conscience or principles of their faith, there is no assurance that other agencies will come to a similar compromise or that other areas of conflict will be similarly resolved. These regulations ensure that popular opinion does not prevail when in opposition to tenets of faith at a faith-based institution, which is protected under the Constitution from being penalized for its religious mission.

Changes: None.

Comments: One commenter encouraged the Department to make more explicit that, when accrediting a program at a religiously affiliated institution, the agency ensures that the program's curricula include all core components required by the agency.

Discussion: We are confident that the regulations are sufficient to make clear that a programmatic accrediting agency would ensure the program's curricula includes all of the core components required by the agency and, as appropriate, the licensing body for the profession for which the program prepares graduates. However, in some instances a program might partner with another institution that provides instruction in areas that run counter to the principles of faith at a faith-based institution. In other instances, a program might instruct students about practices or beliefs without requiring that students adopt those practices or beliefs.

Changes: None.

Comments: One commenter expressed concern that the Department will be investigating accreditation practices as they relate to an institution's mission, including religious mission. The commenter wondered if, for example, this regulatory change is meant to ensure that the Department will enforce the right of an Islamic institution to seek accreditation from a Christian-based accrediting agency.

Discussion: The Secretary recognizes accrediting agencies to accredit institutions within an agency's individual approved scope of recognition. We do not require an accrediting agency to recognize an institution outside its approved scope, and the statute prohibits us from doing so for purposes of determining eligibility for Federal programs. If a Christian-based accrediting agency limits its scope to Christian institutions, we would not require it to accredit non-Christian institutions; thus, we do not anticipate investigating actions that are contrary to the defined scope of an agency.

Changes: None.

Comments: One commenter requested that we frame the change in § 602.18(b)(6) in a way so that the public can have confidence that an institution or program has met accreditation standards throughout the full period that it claims accredited status. The commenter is concerned that retroactive accreditation, as framed in the proposed regulations, appears to enable an institution or program to claim it was accredited at the beginning of candidacy or preaccreditation status, even if it has not received a final affirmative accreditation decision.

Discussion: We appreciate the commenter's concern and would not want the regulations to be interpreted to mean that an institution could claim retroactive accreditation effective at the point at which an institution submits an application for accreditation or preaccreditation status. It is our intention that the retroactivity would be limited to the point in the actual preaccreditation or accreditation process that resulted in an affirmative decision that the institution or program is likely to succeed in its pursuit of accreditation, which is what preaccreditation or candidacy is intended to indicate. Thus, § 602.18(b)(6)(ii) provides that retroactive accreditation may not predate the agency's formal approval of the institution or program for consideration in the agency's accreditation or preaccreditation process.

We refer to the July 25, 2018 Memorandum [22] that provides guidance regarding retroactive establishment of the date of accreditation. In accordance with a recommendation from the NACIQI, the Department agreed to permit the retroactive application of a date of accreditation, following an affirmative accreditation decision. Thus, we are codifying the current practices of many agencies, which the Department permitted prior to 2017 and once again permits.

We adopted this policy recognizing that some programmatic accrediting agencies establish student enrollment or graduation requirements that a program must achieve prior to rendering a final accreditation decision for that program. This action is necessary to ensure that students who enrolled during the accreditation review period would be eligible for certain credentialing opportunities or jobs upon completion of the program that was awarded accreditation based on the quality of the program and the accreditation review that took place during the time these students were enrolled. Without this policy, no institution would want to put students in the position of completing a program that will never enable those students to apply for licensure or work in the field.

Changes: None.

Comments: Two commenters supported the changes in § 602.18(c) that establish several conditions for alternative standards or extensions of time, including accrediting agency adoption, equivalent goals and metrics, a demonstrated need for the alternative, and assurance that it meets the intent of the original standard and does not harm students. One commenter noted that the proposed language includes enough guardrails and limitations to protect students, but also notes the importance for the Department to be rigorous in the oversight of any implementation of these provisions. One commenter suggested that the regulation would be more consistent with statute if we required agencies to report to the Department any actions involving alternative standards or extensions of time. The commenter noted that this could occur either at the time of recognition or annually, and in a format that would make clear to the public all such instances.

Discussion: We appreciate the commenters' support. The Department assures the commenters that it will be rigorous in the oversight of any implementation of these provisions, including through the initial and renewal of recognition review processes. As required by § 602.31, the Department will ensure that the agency complies with the criteria for recognition listed in subpart B of this part by, among other things, reviewing a copy of the agency's policies and procedures manual and its accreditation standards, including any alternative standards it has established. The agency will, in effect, provide the Department with information about its alternative standards or extensions of time through the documents it submits or that staff elect to review during the recognition process. The Department does not currently track the number of times agencies have provided good cause extensions under the current regulations and does not plan to add a separate reporting requirement as a result of these regulations. However, accrediting agency policies and standards, as well as an agency's final accreditation decisions and sanctions, are made available to the public, including on the accrediting agency's website.

Changes: None.

Comments: Several commenters expressed concern that the changes proposed in § 602.18(c) that allow accrediting agencies to establish ''alternative'' standards for programs identified as ''innovative'' have the potential to create a two-tiered system that likely would result in lower standards in certain programs. The commenters acknowledged that the Department's regulations must support learning innovations like competency-based education (CBE). One commenter noted that CBE enables their students to complete their credentials and degrees more quickly, affordably, and with greater relevancy to their career goals, inasmuch as they have a clearer identification of the knowledge and skills sought by employers. However, the commenter was concerned that, as written, the regulations would create conditions in which an accrediting agency's seal of approval would not be considered ''reliable'' or ''consistent'' as required by law, and students in some programs would be subjected to lower-quality curricula than students in other programs. The commenter opined that truly innovative programs do not need to be propped up by different agency standards in order to thrive; rather, this change could encourage accrediting agencies to lower their standards and allow programs out of compliance with the normal standards to still operate.

A group of commenters expressed concern that the changes to § 602.18(c) would reduce institutional accountability, exposing students and taxpayers to significant risk. The commenters recommended that the Department specify the circumstances under which the alternative standards may apply and create a process to verify that the alternative is equivalent to the original standard.

Another commenter suggested that the term ''monitoring'' is too vague to be meaningful.

Discussion: We do not believe that the ability to establish alternate standards, or to establish alternate criteria for meeting a standard or alternate metrics for evaluating compliance with a single standard, will incentivize accrediting agencies to create a two-tiered system that likely would result in lower standards in certain programs. In some instances, the agency may elect to maintain a single standard, but allow alternative ways for a particular institution or program to meet that standard. Not only does the law require accrediting agencies to be reliable and consistent, but as we stated previously, accrediting agencies rely upon the trust and confidence of their peers and the community at large. The potential reputational damage that would result from lowered standards is an existential threat to an accrediting agency. Moreover, the regulation requires the agency to apply equivalent standards, policies, and procedures; a two-tiered system would not fulfill this requirement.

The regulations include examples of the kinds of circumstances that could warrant the establishment of alternative standards. We do not believe it is reasonable for the Department to further specify the circumstances under which the alternative standards may apply, as the assumption is that some of these circumstances will be unanticipated and unprecedented. We also do not believe it is necessary to create a new process to verify that the alternative is equivalent to the original standard. When the Department conducts a review of an agency's standards, it will include any alternative standards that had been established and will ensure those standards are sufficient to ensure the quality of the institution.

[22] *www2.ed.gov/admins/finaid/accred/retroactiveestablishmentofthedateofaccreditation72518.pdf.*

We also disagree that the term ''monitoring'' is too vague to be meaningful. To ''monitor'' means to observe, record, or detect.[23] This is wholly consistent with the intention of the monitoring report.

Changes: None.

Comments: One commenter asserted that the proposed changes in § 602.18(c) violate the HEA and the APA. The commenter opined that the use of the word ''consistently'' in the HEA means that the accrediting agency must constantly adhere to the same standards and principles to ensure that courses or programs offered are of enough quality to achieve their stated objectives.

The commenter asserted that, because the regulations do not delineate what would constitute ''special circumstances,'' accrediting agencies are permitted to avoid statutory compliance. Similarly, the commenter stated that, because the regulations do not specify what ''innovative program delivery approaches'' or ''undue hardship on students'' mean, accrediting agencies would be able to avoid the statutorily required ''consistency.''

The commenter objected to the provision that the agency's process for establishing and applying the alternative standards, policies, and procedures be set forth in its published accreditation manuals rather than requiring the agency to publish its ''alternative'' standards or make them available to the Department, State authorizers, or students. The commenter concluded that these proposed changes are arbitrary and capricious, not in accordance with law, and in excess of the Department's statutory jurisdiction under section 706 of the APA.

Discussion: We agree with the commenter that the use of the word ''consistently'' in the HEA means that the accrediting agency must constantly adhere to the same standards and principles to ensure that courses or programs offered are of sufficient quality to achieve their stated objectives. However, we do not agree that the establishment of alternative standards, criteria, or metrics is inconsistent with the intent of the statute. Rather, the regulations provide that an accrediting agency can establish a second set of standards that it consistently applies under the circumstances identified that necessitated the creation of alternative standards. The agency would be expected to apply the alternate standards fully and consistently in each instance in which the alternate standard (or criterion or metric) is indicated.

We do not agree that because the regulations do not exhaustively enumerate what constitutes a ''special circumstance,'' ''innovative program delivery approaches,'' or ''undue hardship on students,'' accrediting agencies can avoid statutory compliance. Nothing in these regulations absolves an accrediting agency from its obligation to be a reliable authority as to the quality of education or training offered by the institutions it accredits.

We believe it is appropriate and adequate for the accrediting agency to document its process for establishing and applying the alternative standards, metrics, policies, and procedures in its published accreditation manuals. These agencies make these manuals available and they would, therefore, be available to the Department, State authorizing agencies, or students.

As we have stated previously, we do not agree that the changes in this part violate the HEA and the APA.

Changes: None.

Comments: One commenter requested that, in § 602.18(c)(2), we replace the word ''metrics'' with ''expectations.'' The commenter was concerned that ''metrics'' implies a quantitative measure.

Discussion: We do not believe that ''expectations'' captures the intention of word ''metrics'' in § 602.18(c)(2). ''Metrics'' is commonly understood to mean a standard for measuring or evaluating something,[24] while ''expectations'' generally refers to the act or state of looking forward or anticipating or the degree of probability that something will occur.[25] Indeed, because this section of the regulations refers to ''metrics'' in combination with ''goals,'' we feel comfortable that an accrediting agency could set and apply qualitative, quantitative, or a combination of qualitative and quantitative measures.

Changes: None.

Comments: One commenter requested that we clarify what ''undue hardship on students'' under § 602.18(d)(1)(v) means so that is it not a blanket exception. The commenter asserted that the ''normal application'' of an agency's standards should always be made in students' interests, and that current and prospective students deserve to know about any problems related to a provider's accreditation and should not be used as an excuse for noncompliance.

Discussion: We have intentionally not enumerated what might constitute ''undue hardship on students'' under § 602.18(d)(1)(v) in order to provide accrediting agencies latitude to apply their judgment in the event of unforeseen circumstances. Moreover, we strongly agree that an agency's standards should always be made in students' interests. It is in keeping with this principle that we determined students would be best served if accrediting agencies could be responsive to institutional circumstances that necessitate the application of alternative standards or metrics recognizing that these standards or metrics would not and could not release the agency from its duty to be a reliable authority as to the quality of education or training offered by the institutions it accredits.

Changes: None.

Comments: One commenter requested that we revise § 602.18(c)(4) to require institutions to ask students to provide written informed consent when they are participating in an innovative or alternative approach to their education.

Discussion: We appreciate the commenter's request but believe that it would be too burdensome to require institutions to ask students to provide written informed consent when they are participating in an innovative or alternative approach to their education. Moreover, § 602.18(c)(4) applies to actions the accrediting agency will take to ensure the institutions or programs seeking the application of alternative standards have ensured students will receive equivalent benefit and not be harmed through such application, so it is left to the agency's discretion to require the institutions they accredit to obtain consent from students to participate in an innovative or alternative approach.

Changes: None.

Comments: Two commenters supported § 602.18(d), noting that the regulation provides accrediting agencies additional flexibility in determining the length of time an institution or program may remain out of compliance in cases where circumstances are beyond the institution's or program's control. The commenters asserted that is a common-sense change and can help protect the interests of students, provided it is clear that these decisions are up to each accrediting agency and will not leave agencies vulnerable to legal action if they determine an extension is not appropriate. The commenters emphasized that it is up to the Department to ensure agencies use this

[23] *dictionary.com/browse/monitored.*

[24] *https://www.merriam-webster.com/dictionary/metrics?src=search-dict-box.*

[25] *https://www.merriam-webster.com/dictionary/expectations.*

flexibility judiciously and do not allow unwarranted extensions of accreditation without compelling reason.

Discussion: We appreciate the commenters' support and reassert our commitment to ensure agencies use this flexibility judiciously and do not allow unwarranted extensions of accreditation without compelling reason.

Changes: None.

Comments: Several commenters suggested that the changes proposed to § 602.18(d) will make it easier for failing institutions to remain out of compliance with accrediting agency standards for a much longer time without serious accountability, subjecting multiple cohorts of students to subpar education. One commenter argued that we did not provide clear evidence that necessitated the increase in the additional time and number of years colleges can be out of compliance with accrediting agency standards, and opined that this change would likely exacerbate many of the issues facing students at the institution before action is taken by the agency. The commenter suggests that, if the Department were to extend this time frame, there should be stringent consequences that would discourage an institution from continuing out of compliance.

Discussion: We disagree that the changes to § 602.18(d) will make it easier for failing institutions to remain out of compliance with accrediting agency standards for a much longer time without serious accountability. The extension of time continues to be based upon an accrediting agency's determination of good cause and requires exceptional circumstances beyond the institution's control be present that impede the institution's ability to come into compliance more expeditiously. Moreover, the extension of time requires approval from the agency's decision-making body, confidence on the part of the agency that the institution will successfully come into compliance within the defined time period, and, most importantly, that the decision will not negatively impact students. We are confident that these provisions appropriately balance the need for flexibility during unusual circumstances and accountability to students who rely upon the accrediting agencies' determination of educational quality. The Department has seen multiple examples in which agencies have provided extended time beyond 12 months for an institution or program to come into compliance, especially during the recent recession when college enrollments surged, and employment outcomes deteriorated. In some instances, more time was required to improve educational outcomes, either because new job opportunities had to open up, or the institution had to substantially reduce enrollments in subsequent classes to adjust to the reality that high unemployment rates reduced opportunities for new college graduates, regardless of which institution they attended. In other instances, colleges or universities facing economic hardships have been given more than 12 months to execute planned giving campaigns or to take other measures to control spending and balance their budget. Still other institutions have been provided good cause extensions beyond 12 months when significant issues of noncompliance or management capacity are identified, since repairing facilities and replacing management teams can require longer than 12 months to complete. In recognition of circumstances such as these, the Department provides additional regulatory flexibility, but expects agencies to use this flexibility within defined parameters to ensure institutions or programs come into compliance.

Changes: None.

Comments: Two commenters requested that we revise § 602.18(d) to address the expectations for how agencies must address noncompliance with standards, including timelines, in only one criterion to avoid confusion and conflicting terms. The commenters are seeking consistency with § 602.20(a)(2).

Discussion: We disagree that we should require consistency between the timelines in §§ 602.18(d) and 602.20(a)(2). The regulations intentionally provide latitude to the accrediting agencies to establish timelines that are reasonable and appropriate to their process and procedures. Accrediting agencies may, and we expect most will, align their timelines for addressing noncompliance with their standards, but it is at their discretion to do so. Moreover, § 602.18(d) contains optional timelines for implementation, whereas § 602.20(a)(2) contains required implementation timelines. We note that the timeline of three years used in § 602.18(d) can be used congruently with the enforcement timelines used in § 602.20, which must not exceed the lesser of four years or 150 percent of the length of the program (for a programmatic agency) or the length of the longest program (for an institutional agency). The timelines in § 602.20 are used when an agency finds an institution or program out of compliance with a standard; whereas the timelines in § 602.18 are used when an institution or program works with an agency to address a circumstance that precludes compliance with a specific standard.

Changes: None.

Comments: One commenter requested that we amend § 602.18(d)(1)(i) to list the death of an institutional leader as an example of a circumstance that would serve as a basis for a good cause extension.

Discussion: We disagree that the death of an institutional leader serves as an example of a circumstance that would serve as a basis for a good cause extension since institutional governance procedures require that an independent board of trustees make critical decisions regarding the institution. As a result, the death of an institution's leader should not result in an institution's inability to meet the requirements of its accrediting agencies. In fact, it would be inappropriate for an agency to opine on the appointment of senior leaders by an institution as long as the institution followed its policies and procedures for selecting a new leader, which could include the appointment of that leader by a State or other governmental entity, or potentially even the appointment of an institution's leader by election. The Department notes that there are no specific requirements in statute or regulations related to institutional governance. No particular model of governance, such as shared governance or faculty governance, is required. This is one model for administering an institution, but not the only acceptable model.

In the case of private institutions, the governing board of the institution is best able to make decisions about the appointment of senior leaders. At public institutions, elected or appointed State leaders often provide input into these decisions.

Changes: None.

Monitoring and Reevaluation of Accredited Institutions and Programs (§ 602.19)

Comments: One commenter agreed with the provision in § 602.19(e) that NACIQI should review an institution when that institution's enrollment increases by 50 percent through distance education or correspondence courses in one year. The commenter noted that any enrollment change of this magnitude can place a significant strain on an institution's administrative capability and ability to maintain academic quality and rigor. Another commenter suggested that the word ''effectively'' in § 602.19(b) is undefined and could result in the misapplication of this regulation. Another commenter opined that § 602.19(b) does not adequately address the problem of monitoring, asserting that the membership associations have consistently resisted taking full responsibility for monitoring and oversight.

Discussion: While we appreciate the commenters' input regarding these provisions, we note that the only changes made to the regulations in this section were to update cross-references in § 602.19(b) from § 602.16(f) to 602.16(g), and in § 602.19(e) from § 602.27(a)(5) to § 602.27(a). There were no changes made to this section regarding the review of institutions based on changes in enrollments.

Changes: None.

Enforcement of Standards (§ 602.20)

Comments: One commenter supported the changes proposed in this section, noting that, currently, § 602.20 sets forth a virtually inflexible process for agencies to address an institution or program that is not in compliance with a standard. The commenter observed that an agency must either immediately initiate adverse action or require the institution or program to bring itself into compliance in accordance with rigid deadlines. With the proposed changes, the commenter noted that agencies would be required to provide an out-of-compliance institution or program with a reasonable timeline to come into compliance, and the timeline for compliance would consider the institution's mission, the nature of the finding, and the educational objectives of the institution or program. Another commenter who supported these changes expressed appreciation for the added flexibility for accrediting agencies in setting the length of time institutions or programs must come into compliance if found to be in noncompliance. This commenter noted that the change reflects the reality that, in some circumstances, institutions are unable to come into compliance under the current ''two-year'' rule.

Discussion: We thank the commenters for their support and agree that in some instances, such as when an institution must undertake significant curriculum reform to improve student outcomes, it could take more than a year to implement the change. In particular, it can take significant time to obtain approval of the new curriculum through the faculty governance process. Once approved, the institution may need to enroll and graduate new cohorts of students under that new curriculum in order for the institution to fully demonstrate compliance.

Changes: None.

Comments: Several commenters objected to the changes proposed in this section, asserting that these changes would make it exceedingly difficult for the Department to ever hold an accrediting agency accountable. The commenters noted that current regulations already allow failing institutions to continue to operate out of compliance long past the current two-year deadline and few, if any, lose their accreditation. These commenters are concerned that the proposed flexibility to issue sanctions will make it almost impossible for accrediting agencies to hold an institution accountable in a timely manner. One commenter added that, when an institution is in the process of fixing deficiencies, we should prohibit access to any Federal financial aid programs until they are back in compliance. Another commenter asserted that the proposed regulation provides for an exceptionally long period of time to subject current and prospective students to uncertainty about the ultimate quality and value of that institution's credential. A group of commenters argued that the Department's reasoning ignores the reality that accrediting agencies often act far too slowly to protect students from predatory institutions and that students suffer when institutions continue to access title IV funds instead of closing. The commenters referenced recent high-profile closures of institutions that underscore the need for swifter action by accrediting agencies and the Department. The commenters asserted that expediency on the part of accrediting agencies could have protected tens of thousands of students from going further into debt by unknowingly continuing to attend failing institutions, and would have given those students an opportunity to transfer to higher-performing institutions or to have their Federal student loans discharged.

Discussion: Section 602.20 will not make it difficult for the Department to hold accrediting agencies accountable. The regulatory requirements for the enforcement of standards are extensive and include multiple elements that will inform the Department's oversight of the agencies' performance.

We also do not agree that the flexibility to issue sanctions will make it almost impossible for accrediting agencies to hold an institution accountable in a timely manner. In fact, the accrediting agency's decision-making body continues to have the authority to determine how long a program or institution has to come into full compliance, and it retains the right to establish milestones that an institution must meet in order to maintain its accreditation. Agencies will continue to be held accountable for enforcing their standards and ensuring that institutions and programs are operating in compliance with them.

It would be inappropriate to withhold title IV funds from an institution that is making timely and effective progress toward resolving a finding of noncompliance. Some findings of noncompliance are not directly related to educational quality or the student experience and may have no impact on the quality of education delivered. The intention is to provide programs and institutions with enough time and opportunity to comply with the accrediting agency's standards and minimize disruption to enrolled students' pursuit of their educational goals. Withdrawing title IV eligibility may have a devastating impact on students and may jeopardize an institution's financial viability over findings of noncompliance that do not indicate that a program or institution is failing. The Department does not believe that providing more time for institutions to come into compliance will support predatory practices, as the Department expects that an agency would take immediate action or require the institution to cease those practices immediately. For example, misleading advertisements should not be allowed to continue once discovered and errors in information on an institution's website would similarly need to be corrected immediately. The extended timeframe establishes a maximum period of time but does not assume that agencies will always provide the maximum time available for an institution to come into compliance.

We do not agree that the provisions in this part provide an exceptionally long period of time for the institution or program to come into compliance. As other commenters have reported, certain metrics will not show improvement in the short term and require multiple cohorts of students to benefit from the changes the institution or program has put in place before the outcome measures reflect those enhancements.

Finally, we do not agree that these regulations will cause accrediting agencies to act slowly or that students are better served by closing, rather than improving, an institution or program. Students are best served by an effective institution that affords the student the opportunity to achieve their educational goals in a program or at an institution that has been granted accreditation from a recognized accrediting agency. This regulation supports an accrediting agency to work closely with the institutions or programs it accredits to ensure compliance with the agency's standards and educational quality.

Changes: None.

Comments: One commenter expressed concern that providing an institution or academic program with a ''reasonable'' written timeline for coming into compliance based on the nature of the finding, the stated mission, and educational objectives will result in litigation on what is a ''reasonable'' timeline for establishing compliance. The commenter remarked that institutions will seek the longest time possible to become compliant, harming students in subpar programs, while the accrediting agency will not have clear guidelines to force improvement by a set time prior to taking adverse action. Another commenter stated that the Department did not provide evidence that the current timeline is too aggressive or overly prescriptive, and that extending the time for an institution to come into compliance will result in inadequate protections for students.

Discussion: We do not agree that the use of the term ''reasonable'' will result in litigation on what is a ''reasonable'' timeline for establishing compliance. While institutions or programs may seek to negotiate an extended period of time in which to come into compliance with the agency's standards, the accrediting agency's decision-making body will have made its determination of reasonableness based on the nature of the finding, the stated mission, and educational objectives of the institution or program. That determination will dictate the timeline to return to compliance, which can be less than, but must not exceed, the lesser of four years or 150 percent of the length of the program in the case of a programmatic accrediting agency, or 150 percent of the length of the longest program at the institution in the case of an institutional accrediting agency. Any extension of the timeline beyond that prescribed timeframe must be made for good cause and in accordance with the agency's written policies and procedures for granting a good cause extension. The assurance of educational quality and the protection of students is a primary factor in the accrediting agency's determination of a reasonable timeline for institutional improvement. Moreover, nothing in this regulation precludes the use of mandatory arbitration agreements by agencies to reduce the risk of frivolous litigation by institutions regarding the time limits imposed by the agency.

Changes: None.

Comments: One commenter supported the proposed changes to § 602.20(a)(2) that allow additional time to document compliance, noting that, for some issues, such as program completion, it can take more than two years to show the effects of changes.

Discussion: We thank the commenter for their support and agree that it can take more than two years to implement program improvements and see their impact on future graduating cohorts.

Changes: None.

Comments: One commenter objected to the provisions of § 602.20(a) that provide intermediate compliance checkpoints. The commenter asserted that these elements are confusing, and that each accrediting agency will handle this differently.

Discussion: We do not agree that the opportunity for an accrediting agency to include intermediate checkpoints during the timeframe when a program or institution is working to come into full compliance with the agency's standards is confusing. The Department already requires each agency to apply monitoring and evaluation approaches in § 602.19(b). In § 602.20, we do not prescribe how an agency will enforce its standards but require the agency to follow its Department-approved written policies and provide the institution with a reasonable timeline for coming into compliance.

We expect that accrediting agencies may utilize this provision differently, as they are not required to include intermediate checkpoints, and we anticipate they will do so in situations where it is important to gauge the progress toward compliance an institution or program is making. Intermediate checkpoints may be particularly useful to accrediting agencies when they have determined the timeframe for improvement is approaching or at the standard timeframe limit.

Changes: None.

Comments: One commenter expressed concern that we had removed a requirement from § 602.20(a)(1) that an agency immediately initiate adverse action.

Discussion: We continue to require accrediting agencies to initiate immediate adverse action when they have determined such action is warranted. We did not remove the requirement but relocated it to § 602.20(b).

Changes: None.

Comments: One commenter requested that we establish specific intervals for reviewing monitoring reports in § 602.20(a)(2). The commenter opined that, as written, it is not clear if the monitoring period is inclusive of, or in addition to, any good cause extension. Another commenter suggested that we clarify that changes that can be made expeditiously must be implemented more quickly. The commenter recommended that accrediting organizations develop explicit timeframes for these changes, noting that students are not protected when an institution or program is out of compliance for four years. Another commenter recommended that we require an institution to make direct disclosures of actions or sanctions to prospective and enrolled students at the start of the timeframe specified in the monitoring report.

Discussion: The changes to this section are designed to provide accrediting agencies with the flexibility to use monitoring reports and reasonable timelines for coming into compliance that are appropriate to the standard, the nature of the finding, the stated mission, and the educational objectives of the institution or program. It would not be effective to establish specific intervals for reviewing monitoring reports, as those intervals will and should vary based on the factors listed above. The Department intends the monitoring report process would be separate from the compliance report process that includes extensions for ''good cause.''

We do not agree that it is necessary to explicitly require that changes that can be made expeditiously must be implemented more quickly. Implementation requirements based solely on timeliness would undermine the ability of an institution to prioritize changes that may be less timely but have greater benefits to students. We are confident that the decision-making bodies of recognized accrediting agencies will ensure that the timelines they establish for coming into compliance will be reasonable and consider the speed with which a remedy could be implemented.

Finally, we do not agree that prospective and enrolled students would benefit from direct disclosures of monitoring activities. As we have stated in the NPRM and this preamble, we expect to use the monitoring report to address minor deviations from agency standards; alerting students each time a monitoring report is issued may undermine the effectiveness of student notifications for more serious findings of noncompliance subject to mandatory notification requirements.

Changes: None.

Comments: One commenter requested that we clarify in § 602.20(a)(4) what action would occur in response to a monitoring report. The commenter asserted that it is difficult to understand what it means to approve or disapprove a report.

Discussion: Accrediting agencies will develop a written policy that describes how they will evaluate monitoring and compliance reports. The Department requires the use of monitoring and evaluation approaches in § 602.19(b), which could include compliance or monitoring reports. We require agencies to describe the policies and procedures relating to such approaches currently, and that requirement would not change with the implementation of the new regulations.

Changes: None.

Comments: One commenter objected to the inclusion of ''immediate adverse action'' in § 602.20(b). The commenter argued that, while accrediting agency staff can take immediate action, the decision-making body may not meet for several months. The commenter suggested we modify the language to empower senior staff, in consultation with the Chair of the decision-making body (or similar), to take immediate adverse action.

Discussion: The requirement in § 602.20(b) for an agency to immediately initiate adverse action when an institution or program does not bring itself into compliance within the specified period is not new. The Department maintains that this is a reasonable and appropriate expectation for accrediting agencies to ensure compliance with its standards.

The decision-making body generates all accreditation decisions, except for the allowances in § 602.22 for the review and approval or denial of specific substantive changes. The current use of ''immediate adverse action'' in this section has been interpreted to mean as soon as the decision-making body first reviews and determines noncompliance. Nonetheless, many accrediting agencies have procedures in place for making accreditation decisions in between regularly scheduled meetings of the decision-making body.

Changes: None.

Comments: One commenter supported the provision in § 602.20(c) that allows an accrediting agency that takes adverse action against the institution or program to maintain the accreditation or preaccreditation of the program or institution until the institution or program has had time to complete the teach-out process. However, the commenter was concerned that a temporary hold on accreditation action could be problematic for students seeking a closed school loan discharge and that there will be programs and institutions that retain their accreditation, but the programs will not meet licensing requirements with licensing boards due to the original deficiencies that led the institution or program to enter into a teach-out.

Discussion: We appreciate the commenter's support. The regulation provides accrediting agencies with the latitude to maintain the institution's or program's accreditation or preaccreditation until the institution or program has had reasonable time to complete the activities in its teach-out plan, which could include assisting students in transferring or completing their programs, but it does not require them to do so. The intention of this provision is to ensure that students may successfully achieve their educational objectives. If the accrediting agency's finding would result in graduates of the program not meeting licensing requirements, we would expect the agency to take immediate adverse action. Many agencies already have similar policies or practices in place.

We understand that an extension of accreditation through the teach-out process would delay the availability of a closed school loan discharge for students who choose to interrupt, rather than complete, their academic program. However, a closed school loan discharge is available to students who leave a school up to 180 days prior to its closing, which should be ample time for the school to complete its teach-out. The Department has also clarified in its recently published Institutional Accountability regulations (84 FR 49788) that, in the event that a teach-out plan extends beyond 180 days, a student who elects at the time the teach-out is announced to pursue a closed-school loan discharge rather than participate in the teach-out will retain the right to receive a closed-school loan discharge. This is the case even if, under the terms and conditions of the teach-out plan, the institution does not close until more than 180 days after the announcement of the teach-out.

Changes: None.

Comments: Two commenters objected to the provision in § 602.20(d) that allows an agency that accredits institutions to limit the adverse or other action to specific programs at the institution or to specific additional locations of an institution, without taking action against the entire institution and all programs, provided the noncompliance was limited to a specific program or location. The commenters opined institutional accrediting agencies rarely evaluate individual programs, and that to do so may be prohibitively expensive and burdensome. The commenters further asked if the proposed changes could mean that an accrediting agency could sanction or withdraw accreditation from an institution based on a negative evaluation of a single program.

Another commenter expressed concern that these provisions could harm students who leave their program due to adverse action on their program when the rest of the institution remains open. Those students would be ineligible for a closed school discharge. The commenter suggested that an institution should be financially responsible to make these students whole and refund all tuition charges for that program when a program closes and not the institution.

Discussion: Under both the current regulations and these final regulations, an accrediting agency may sanction or withdraw accreditation from an institution based on the noncompliance with accrediting standards of a single program. However, the negotiating committee concurred that this could be an extreme reaction that could potentially harm many more students than are impacted by the deficiencies of a single program, and, accordingly, agreed to provide accrediting agencies with the ability to target their actions to noncompliant programs when an institution is otherwise compliant and serving its students.

We do not agree that institutional accrediting agencies rarely evaluate individual programs. We recognize that an institutional accrediting agency may use sampling or other methods in the evaluation to conduct their review, and that an agency may rely upon the accreditation by a recognized programmatic accrediting agency to demonstrate the evaluation of the educational quality of such programs. This does not mean that an institutional accrediting agency must separately review every academic program offered by an institution. However, if an institutional accrediting agency determines that a single program is not compliant with the agency's standards, the agency could determine that its accreditation does not extend to that program.

We acknowledge that the HEA does not provide a remedy for students who leave their program due to an adverse action by an accrediting agency against their program when the rest of the institution remains open. As a result, the Department does not have the legal authority to require institutions to refund tuition and fees to students whose programs the accrediting agency found to be out of compliance with its standards.

Changes: None.

Review of Standards (§ 602.21)

Comments: One commenter contended that § 602.21(a) imposes an undue burden on accrediting agencies and called for a review of standards only as circumstances dictate, noting the infrequency of changes in institutional and accreditation policies. The commenter further asserted the involvement of all relevant constituencies is an unrealistic requirement and suggested instead that we require accrediting agencies to invite participation from all relevant constituencies. They also requested that we define, or remove, the term ''systematic.''

One commenter supported the proposed changes to § 602.21(d)(3) requiring agencies to respond to comments by constituencies during the review of standards. This commenter noted the process would be consistent with the comment process at other Federal agencies.

A group of commenters noted concern that the regulations would allow institutions to establish alternate standards, making it more difficult for the Department to monitor accrediting agency performance. They noted risk of dilution of standards used to evaluate institutions, as well as concern that the Department would cease to require one set of evaluation standards. They further expressed concern that the regulations do not require transparency with respect to agencies' alternate standards, when or how the agencies may use alternate standards, or how the Department would assess compliance with agencies' alternate standards.

Discussion: The Department considered the above comments thoroughly and notes that the Federal and non-Federal negotiators discussed many of the above stakeholders' views and concerns during the negotiated rulemaking process for § 602.21. The Department believes that the proposed changes are consistent with HEA section 496(a)(4)(A), which requires that an agency's standards ensure that the institution's courses or programs are of sufficient quality to meet the stated objectives for which they are offered for the entire accreditation period.

The revisions to § 602.21 clarify that, when reviewing standards, agencies must maintain a comprehensive systematic program that involves all relevant constituencies and is responsive to comments received. Current regulations require an institution to complete the review of all of their standards at the same time. The Department believes it is reasonable for the agency to review different standards at different time intervals since doing so may be a more efficient way of completing the review and may allow the agency to be more responsive to the most important changes needed. Moreover, when the Department conducts a review of an agency's standards, it will include any alternative standards that an agency established and will ensure those standards sufficiently ensure the quality of the institution.

The Department believes the proposed language will continue to allow the Department to monitor accrediting agency performance and ensure an agency's system of review is comprehensive and responsive to all constituencies while allowing for more innovation in program delivery and flexibility in response to demonstrated need, without imposing an undue burden on any party. As is currently the case, an agency would not be found to be out of compliance with the Department's regulations if one or more relevant constituencies fails to offer comments once made aware through a public comment period that the agency is reviewing or modifying its standards.

Changes: None.

Substantive Change (§ 602.22)

Comments: Several commenters supported the proposed changes to § 602.22. One commenter specifically expressed support for the change that would allow an accrediting agency's senior staff to approve specific, substantive changes for institutions that are in good standing, without requiring the agency's decision-making body to approve these types of changes. Other commenters specifically supported the changes in § 602.22 that clarify the process accrediting agencies must use when reviewing substantive changes and provide agencies with more flexibility to focus on changes that are high impact and high risk. The commenters opined that the proposed language will also give agencies more flexibility to approve less risky changes by granting an agency's decision-making body the authority to designate senior agency staff to approve or disapprove the substantive change request in a timely, fair, and equitable manner. Another commenter noted that this change will allow institutions to open satellite or branch campuses that would be accredited after opening. The commenter suggested that this relatively minor regulatory change opens the door for greater access to higher education for underserved communities who may be limited to choosing an institution that enables them to stay close to home. The commenter noted that these changes will facilitate growth in the market for higher education, encourage competition, and ensure fewer students turn down a quality education because of location. Another commenter expressed appreciation for the provisions that require accrediting agencies to monitor rapid growth in enrollment. The commenter asserted that quick, unprecedented growth opens the door to predatory practices, and does not provide typical safeguards for quality assurance.

One commenter who opposed this change believed that it would allow political appointees to overturn long-standing Department policies. This commenter also expressed concern over potentially predatory practices and lower accrediting standards.

Discussion: We thank the commenters who supported the changes in this section. We believe these changes allow for greater flexibility for institutions to innovate and respond to the needs of students and employers, while maintaining strict agency oversight in more targeted areas, such as those associated with higher risk to students or the institution's financial stability, such as changes in institutional mission, types of program offered, or level of credential offered.

We disagree that the regulations will not provide safeguards for quality assurance. Accrediting agencies will continue to review substantive changes for quality assurance. Providing flexibility to accrediting agencies to allow senior staff to review and approve less risky changes enables accrediting agencies to focus their resources on issues that provide the highest level of risk to students and taxpayers. We disagree with the commenter who believed that this change invites predatory practices and lower standards. While it is possible that long-time policies could change, we believe that streamlining this process will not lead to a reduction in its rigor. Accrediting agencies do not employ political appointees; the commenter may be misunderstanding the fact that agencies, not the Department, are responsible for approving substantive change requests.

Changes: We have made a technical correction to § 602.22(a)(1) to make clear that the substantive changes subject to this regulation are not limited to changes to an institution's or program's mission, but rather, include all substantive changes addressed in § 602.22.

Comments: Several commenters objected to the provisions in this section, asserting that they would create a rushed review process for program outsourcing requests with less stringent standards and less accountability; increase the risk that low-quality schools will be approved to receive Federal student aid to administer poor academic programs, which will waste students' time and educational benefits in addition to taxpayer dollars; let colleges close campuses and move online with inadequate review of substantive changes; allow an existing agency to expand its scope into areas where it lacks experience; and reduce accountability among agency commissioners, shifting responsibility and potential consequences of poor decision-making onto staff.

Discussion: The changes in this section will provide flexibility to accrediting agencies while maintaining proper agency oversight of high-risk changes. While we designed these regulatory changes to reduce the cost and time required for institutions to obtain approval from their accrediting agencies, agencies will still be held accountable for making well-reasoned decisions. These changes will also allow accrediting agencies to focus their limited resources on the types of changes that pose the greatest risk to students and taxpayers. The changes will also enable the decision-making bodies at accrediting agencies to focus on the most significant and potentially risky changes. The Department believes that appropriate and adequate review processes will remain in place and that allowing agencies to focus on changes with the most associated risk will improve oversight of institutions and protection of student and taxpayer interests.

We do not agree that improved efficiency results in lax oversight. The foundation of this section of the regulations requires every agency to document adequate substantive change policies that ensure that any substantive change made after the agency has accredited or preaccredited the institution does not adversely affect the capacity of the institution to continue to meet the agency's standards.

Changes: None.

Comments: One commenter asked that we clarify whether § 602.22(a) pertains only to substantive changes in an institution's mission. The commenter suggested that the provisions in this section apply more broadly and that we remove the phrase ''change to the institution's or program's mission.''

Discussion: Section 602.22(a) is intended to pertain to all of the substantive changes as described in § 602.22(a)(1)(ii), and not just changes to an institution's or a program's mission. We agree with the commenter that the phrase ''change to the institution's or program's mission'' does not convey our intent to include all substantive changes as delineated in § 602.22(a)(1)(ii).

Changes: We are revising § 602.22(a) by removing the words ''to the institution's or program's mission'' to clarify that § 602.22 applies to all substantive changes as specified in § 602.22(a)(1)(ii), and not just substantive changes to an institution's or program's mission.

Comments: One commenter suggested that the regulations should allow accrediting agencies to designate future unknown innovations or changes as substantive, if those changes or innovations present a unique risk to students and taxpayers. Another commenter asked whether institutions must complete a substantive change application each time they would like to offer a program at the master's or doctoral level when the institution already offers the same area of study at the undergraduate or master's level.

Discussion: In response to the commenter who suggested that we add a provision allowing agencies to designate future unknown innovations or changes as substantive, if the innovations or changes present a unique risk to students and taxpayer, the regulations provide that agencies must require an institution to obtain the agency's approval of a substantive change before the agency includes the change in the scope of accreditation or preaccreditation it previously granted to the institution. This provision enables an institution and agency to consider applications for substantive change based on a proposed change or innovation.

We further clarify that an institution must submit a substantive change application whenever it seeks to increase its level of offering, including moving from the bachelor's level to a master's level and from a master's level to a doctoral level. An institution is not required to submit a substantive change application for each subsequent program at the same educational level.

Changes: None.

Comments: One commenter asked if we intend for § 602.22(a)(2)(ii) to provide that staff will decide the outcome, since there are accrediting agencies which do not meet every 90 days.

Discussion: Under § 602.22(a)(2)(ii), the Department intends to allow senior staff at accrediting agencies to make decisions regarding requests for approval of written arrangements, unless the agency or its senior staff determines significant related circumstances require a review of the request by the agency's decision-making body.

Changes: None.

Comments: One commenter asserted that the Department had interpreted in an overly broad way the statutory requirement in HEA section 496(c)(4) and (5) that accrediting agencies require that institutions establish a business plan prior to opening a branch campus, and that the agency will conduct an on-site visit of that branch campus within six months of its establishment. The commenter recommended that the regulations require approvals of all locations and site visits to all approved locations within six months of opening.

Discussion: The Department disagrees that we have interpreted the statutory requirement too broadly. As the commenter notes, the HEA requires that any institution of higher education subject to its jurisdiction which plans to establish a branch campus submit a business plan, including projected revenues and expenditures, prior to opening the branch campus, and that the institution's accrediting agency agrees to conduct, as soon as practicable, but within a period of not more than six months of the establishment of a new branch campus or a change of ownership of an institution of higher education, an on-site visit of that branch campus or of the institution after a change of ownership. The regulations in § 602.22 continue to require an accrediting agency to have an effective mechanism for conducting, at reasonable intervals, visits to a representative sample of additional locations. We do not believe it is necessary or practical to require an accrediting agency to require the approval of all locations or to visit all approved locations within six months of opening. While an accrediting agency may choose to require such approvals or site visits, we believe that the agency should have the flexibility to determine this rather than for us to regulate those actions.

Changes: None.

Comments: One commenter requested that the Department reconsider the provision in § 602.22(b) that creates new circumstances under which certain activities by provisionally certified institutions will require substantive change approval by their institutional accrediting agency. The commenter urged the Department to consider limiting this new burden of review to institutions that are on Heightened Cash Monitoring 2 (HCM2) or demonstrate some other more specific risk to students and title IV than just that the institutions are provisionally certified.

Discussion: We proposed only two additional substantive changes for which an institution placed on probation or equivalent status must receive prior approval and for which other institutions must provide notice to the accrediting agency in § 602.22(b). These include when the agency requires the institution to obtain the agency's approval of the substantive change before the agency includes the change in the scope of accreditation or preaccreditation it previously granted to the institution, and when the agency's definition of substantive change covers high-impact, high-risk changes.

We do not believe it would be helpful to limit this change to those institution who are on HCM2 or who demonstrate specific risks. We believe this provision offers an important review that would only rarely occur if we limited the use to those circumstances suggested by the commenter.

Changes: None.

Comments: Three commenters opposed the revisions to the substantive change regulations, arguing the Department failed to provide enough evidence to justify the changes and to specify how we would assess whether a change is ''high-impact and high risk.'' The commenters opined that the changes are incongruent with statutory requirements pertaining to the approval of branch campuses and direct assessment programs.

Discussion: The revisions to the substantive change regulations are designed to provide accrediting agencies more flexibility to focus on the most important changes. We believe that this targeted, risk-based approach focuses the agency's decision-making body's efforts on more relevant or risky issues in a changing educational landscape, while allowing an agency to delegate lower-risk decisions to staff. The Department considers a high-impact, high-risk change to include those changes provided as examples in the regulations (§ 602.22(a)(ii)(A)–(J)), such as substantial changes in the mission or objectives of the institution or program; a change in legal status or ownership; changes to program offerings or delivery methods that are substantively different from current status; a change to student progress measures; a substantial increase in completion requirements; the acquisition of another institution or program; the addition of a permanent site to conduct a teach-out for another institution; and the addition of a new location or branch campus.

We do not believe that the changes contradict the statutory requirements for the approval of branch campuses and direct assessment programs. HEA section 498 (20 U.S.C. 1099c(j)) provides the Secretary with the latitude to establish regulations that govern the certification of a branch of an eligible institution.

Changes: None.

Comments: One commenter asked that we clarify § 602.22(b)(2), which refers to ''A change of 25 percent or more of a program since the agency's most recent accreditation review.'' The commenter asked if this is in reference to a change in the number of credit hours associated with the program and, if so, whether we would consider all courses, only courses within the discipline, or only general education courses.

Discussion: When we referred to ''A change of 25 percent or more of a program since the agency's most recent accreditation review'' in § 602.22(b)(2), we meant a single change, or the sum total of the aggregate changes, to a program's curriculum, learning objectives, competencies, number of credits required, or required clinical experiences. This would include changes in the general education courses required for program completion and not merely the courses within the discipline, program, or major.

Changes: We have revised § 602.22(b)(2) to clarify that we would consider an aggregate change of 25 percent or more of the clock hours or credit hours or program content of a program since the agency's most recent accreditation review to be a substantive change requiring prior approval under § 602.22(b)).

Comments: One commenter requested that we add the acquisition of any other institution, program, or location to the required representative sample of site visits to additional locations in § 602.22(d).

Discussion: As stated earlier, the Department proposes revisions to the substantive change regulations to provide accrediting agencies more flexibility to focus on the most important changes. While an accrediting agency may choose to implement a policy such as what the commenter suggested, we do not believe it is appropriate to broadly regulate such activity.

Changes: None.

Comments: One commenter requested clarification as to when an institution must seek approval of a new location instead of reporting the change under § 602.22(a)(1)(ii)(J) and § 602.22(c).

Discussion: As stated in § 602.22(c), once an institution receives accrediting agency approval for two additional locations, it may report subsequent locations, rather than seeking additional approval, if it meets the conditions in § 602.22(c).

Changes: We have made a technical correction in § 602.22(c) to clarify that institutions that have successfully completed at least one cycle of accreditation and have received agency approval for the addition of at least two additional locations *must* report these changes to the accrediting agency within 30 days, if the institution has met criteria included in this section of the regulations.

Operating Procedures All Accrediting Agencies Must Have (§ 602.23)

Comments: Two commenters wrote in support of the requirements in § 602.23(a)(2) that an accrediting agency make written materials available describing the procedures that institutions or programs must follow regarding the approval of substantive changes.

Discussion: We appreciate the commenters' support.

Changes: None.

Comments: One commenter endorsed the change in § 602.23(a)(5) that requires the mandatory disclosure of names, academic and professional qualifications, and relevant employment and organizational affiliations of members of the agency's decision-making bodies and principal administrative staff.

Discussion: We appreciate the commenter's support.

Changes: None.

Comments: One commenter supported the change to § 602.23(d) that permits publishing address and telephone information as an alternate form of agency contact information.

Discussion: We appreciate the commenter's support.

Changes: None.

Comments: Two commenters agreed with the change to § 602.23(f) that reserves preaccreditation status for institutions and programs that are likely to succeed in obtaining accreditation. The commenters noted that this is an important requirement, as institutions may be in preaccreditation status for five years and then may not succeed in getting accreditation. Students may suffer if their school does not achieve accreditation, and, if the school closes, taxpayers will be responsible for closed school loan discharges. One of the commenters also supported requiring accrediting agencies to obtain a teach-out plan from all preaccredited institutions and recommended that they update the teach-out plans every six months if they include partner institutions, as those agreements and the regional education landscape change frequently.

Discussion: We appreciate the commenters' support. We do not believe it is practical or necessary to require accrediting agencies to obtain updated teach-out plans from pre-accredited institutions every six months, nor would it be reasonable to expect an institution to seek contractual teach-out agreements with other institutions simply because the institution or program is in a preaccredited status. If an accrediting agency determines that it is necessary for an institution to implement its teach-out plan, the agency can request that the institution seek or enter into one or more contractual teach-out agreements with partner institutions that offer the courses or programs needed by the closing institution's students.

Changes: None.

Comments: A group of commenters objected to § 602.23(f), asserting that it is unclear from the Department's reasoning exactly what risks, if any, the proposal to maintain preaccreditation status will mitigate. The commenters argued that the proposal increases risk by not removing title IV eligibility from a school that has demonstrated its inability to provide a quality education and allowing students to continue to attend that school for up to four months or longer. The commenters asserted that, if the Department agrees to then recognize those students' work as ''accredited,'' the students will still have to market themselves to other institutions and employers and will be ill equipped to effectively do so, having received such a poor education.

Discussion: We intend for this provision to ensure that students can successfully achieve their educational objectives at the institution where they chose to enroll. We do not agree with the commenters' assertion that the student will have received a poor education, as there are many factors, apart from the quality of the education provided, that can result in an institution not receiving accreditation after a period of preaccreditation. An accrediting agency, in awarding preaccreditation, must believe that the program or institution is likely to obtain accreditation, meaning that the educational quality must meet the agency's requirements. Students may use title IV funds to enroll in a preaccredited program. Therefore, the accrediting agency must believe that it is of appropriate quality to likely become accredited. It would be detrimental to students to allow them to enroll in a preaccredited program and subsequently determine that the credits they earned during that enrollment would likely not transfer to another institution if the program is not fully accredited. Without such a provision, an institution could not recruit students to a preaccredited program, and the Department could not allow those students to obtain title IV funds. This would reduce the likelihood of institutions starting new programs in areas where there may be significant workforce demand.

Changes: None.

Comments: One commenter supported the proposal in § 602.23(f)(ii) to require accrediting agencies to insist on a teach-out plan from preaccredited institutions. However, the commenter suggested this provision does not ensure adequate protection. The commenter recommended that the Department require a teach-out agreement and that adequate funds are set aside to implement the agreement if the school does not receive accreditation.

Discussion: We appreciate the commenter's support and suggestion. However, we believe it would be impractical to require preaccredited institutions to establish teach-out agreements, as these are contractual arrangements that are based on the number of students enrolled in a program (among other factors) and institutions would need to update them each term in order to accurately reflect the current status of the program. Also, an institution cannot force another institution to enter into a contractual agreement, especially since a teach-out agreement often includes financial arrangements between the two institutions. The Department cannot require any institution to enter into a contractual agreement with another institution and it would be difficult to know in advance what financial arrangements would be required by the receiving institution in the event of a teach-out, since this could change based on the number of students to be served at the time of the teach-out and other factors. The Department also lacks the authority to require institutions to post a letter of credit simply because they are in a preaccredited status.

Changes: None.

Comments: One commenter supported the proposed language in § 602.23(f)(2) that allows the Secretary to consider all credits and degrees earned and issued by an institution or program holding preaccreditation from a nationally recognized agency to be from an accredited institution or program. The commenter observed that this may help clarify what preaccreditation status means, prevent harm to students who attend preaccredited institutions or programs, and recognize that graduates of preaccredited programs are workforce-ready and, therefore, should be eligible for State or national credentials.

Discussion: We appreciate the commenter's support.

Changes: None.

Comments: One commenter objected to the provisions of § 602.23(f)(iv), stating that instead of adding protections for students in the event the institution does not obtain accreditation, the Department proposes to allow an institution to maintain its preaccredited status, continue serving students, and collect student and taxpayer money even when it is now guaranteed the institution or program will not gain accreditation. The commenter asserted that preaccreditation status and accredited status are fundamentally not the same and that we should not consider them to be equal.

Discussion: The Department has not proposed that a preaccredited program or institution continue to be able to operate in the rare instance that an agency makes a final decision not to award full accreditation. Instead, the Department seeks to protect students enrolled in preaccredited programs or institutions so that, in the event the program or institution does not receive full accreditation, the students are able to transfer credits and complete their program at another institution. The Department considers both preaccreditation and accreditation to be an accredited status. Since both accreditation and preaccreditation may allow a student to access title IV funds, the Department is committed to providing protections to students to ensure that the credits they earned using title IV funds can be transferred to other institutions. Several accrediting agencies require institutions or programs to graduate a cohort of students before they will grant full accreditation. However, the students who complete the program during a period of preaccreditation may not be eligible to sit for the licensure exam if the requirement to do so necessitates that they have graduated from an accredited program. Thus, it is important that these students be afforded the opportunity to fulfill their educational objective to be licensed in the profession for which they were prepared if the program or institution became accredited based on the agency's review of the institution or program that took place during the time in which the student was enrolled. Accrediting agencies have reported to us that preaccredited programs and institutions typically proceed to fully accredited status. The agencies noted that they grant preaccreditation status when the agency has confidence that the institution or program will ultimately become accredited, but some agencies will not award full accreditation until they review licensure exam pass rates or other employment outcomes dependent upon a student having attended an accredited institution.

Changes: None.

Additional Procedures Certain Institutional Accreditors Must Have (§ 602.24)

Comments: Several commenters supported the Department's proposed changes to § 602.24. Collectively, the commenters expressed appreciation for the flexibility afforded to institutions and accrediting agencies by the proposed rules, allowing them to focus more on innovating and providing students with a quality education.

Discussion: We appreciate the commenters' support for these proposed changes and the Department's efforts to facilitate innovation and reduce regulatory burden.

Changes: None.

Comments: One commenter objected to the elimination of the requirement in § 602.24(a) for an institution to include in its branch campus business plan submitted to the accrediting agency a description of the operation, management, and physical resources of the branch campus. The commenter asserted that the proposed changes fall short of what is required by statute—namely that "any institution of higher education subject to [an accreditor's jurisdiction] which plans to establish a branch campus submit a business plan, including projected revenues and expenditures, prior to opening a branch campus." The commenter further asserted that the proposed revisions fail to establish what is a reasonable period needed to judge the appropriateness of opening a branch campus, and that the Department failed to conduct any cost-benefit analysis or adequately justify the change.

Discussion: We disagree with the commenter that the changes to § 602.24(a) fail to meet the statutory requirements. We proposed amendments to this provision specifically to remove requirements that we believe go beyond the statutory requirements. Additionally, we believe the requirements in § 602.24(a) were either unnecessarily prescriptive or duplicated requirements in the revised § 602.22. Regarding what we consider a reasonable time period for an agency to judge the appropriateness of opening a branch campus, we do not believe a compelling reason exists for the Department to impose strict calendar timeframes around such determinations. The amendatory text requires, with respect to branch campuses, an agency to demonstrate that it has established and uses all of the procedures prescribed in § 602.24(a). We expect an agency's protocols to facilitate this being accomplished in a timely manner. The reasons for the proposed changes to § 602.24(a), removing the requirements for an institution to include in its branch campus business plan a description of the operation, management, and physical resources of the branch campus, and for an agency to extend accreditation to a branch campus only after the agency evaluates the business plan, are explained in the July 12, 2019 NPRM and reiterated above. We do not believe it is further necessary to conduct a cost-benefit analysis to support these changes or that such an analysis is germane to the discussion of whether they are needed.

As the Department noted during negotiated rulemaking, there are no data upon which to base the establishment of a reasonable period to judge the appropriateness of a branch campus. However, we believe the time required to obtain approval was, in many cases, so significant that it impeded institutional growth and student access. We hope with these changes that more closely align with the statute, we will enable institutions and accrediting agencies to be nimbler and more responsive to student demand. The regulations maintain important oversight protections by requiring the institution to submit a business plan and the accrediting agency to conduct a site visit within six months.

Changes: None.

Comments: Two commenters requested that the Department delete the reference in § 602.24(c)(2)(i) to institutions merely placed on the reimbursement payment method described in § 668.162(c)—commonly known as HCM. One of those commenters stressed that while we typically place institutions with composite scores of less than 1.5 on HCM1, this does not mean such institutions are in danger of closing. The commenter further noted that if no changes are made to the calculation of the composite score to reflect the recent change by the Financial Accounting Standards Board regarding leases, institutions will fail financial responsibility and be put on HCM1 when, economically, nothing has changed, and that institutions can be placed on HCM1 for various other reasons, including noncompliance with Clery Act standards or other regulatory matters. The commenter concluded the Department should revise § 602.24(c)(2)(i) to pertain only to instances where an institution has been placed on the reimbursement payment method under § 668.162(c) or the HCM payment method requiring the Secretary's review of the institution's supporting documentation under § 668.162(d)(2).

Discussion: We believe the commenters may have misinterpreted proposed § 602.24(c)(2)(i), which requires submission of a teach-out plan if the Secretary notifies the agency that it has placed the institution on the reimbursement payment method under § 668.162(c) or the HCM payment method requiring the Secretary's review of the institution's supporting documentation under § 668.162(d)(2). Under the reimbursement payment method, an institution must, in addition to identifying the students or parents for whom reimbursement is sought, credit a student's or parent's ledger account for the amount of title IV, HEA funds he or she is eligible to receive, submit documentation showing that each student or parent included in the request was eligible to receive the title IV, HEA program funds requested, and show that any title IV credit balances have been paid. HCM2, described in § 668.162(d)(2), mirrors the reimbursement payment method except that the Secretary may modify the documentation requirements and procedures used to approve the reimbursement request. HCM1, found in § 668.162(d)(1) and identified by the commenter as the cash monitoring payment method on which the Department commonly places institutions with low composite scores, does not require the submission of documentation establishing the eligibility of a student. Institutions on HCM1 are not subject to the provisions of proposed § 602.24(c)(2)(i).

Changes: None.

Comments: One commenter asked the Department to clarify the teach-out requirements in § 602.24(c) related to travel. The commenter questioned the standard that the teach-out arrangement should not require travel of substantial distances or durations, on the basis that it is vague and does not address situations where geographically convenient options for on-the-ground programs are limited due to being at capacity enrollment or capped enrollment. The commenter concluded that it is insufficient merely to name local institutions with similar programs, as those programs are frequently unable to assist with a teach-out.

The same commenter agreed with the Department that a teach-out by an alternative delivery modality is insufficient unless an option for a teach-out via the same delivery modality as the original educational program is also available. However, the commenter contended that the institution should also ensure there is a geographic limitation on this requirement, that is, an institution should not be permitted to have its own distance education program be offered as a teach-out when the on-ground offering is 200 miles away from the original on-ground location and there are significant transportation barriers.

Finally, the commenter agreed with the Department that an accrediting agency should be permitted to waive the requirements related to the percentage of credits that must be earned at the institution awarding the educational credential for students completing their program under a written teach-out agreement, but recommended that the waiver also apply to institutions allowing students to transfer to the institution in lieu of a written teach-out agreement.

Discussion: We agree that merely naming local institutions with similar programs does not constitute a teach-out agreement, yet we note that it may be appropriate in a teach-out plan.

We appreciate the commenter's support regarding the insufficiency of alternative delivery modes for a teach-out and agree that it may be an option available, but it cannot be the only option provided to students. We further agree that the teach-out needs to provide the same method of delivery as the original education program.

We do not, however, agree that we should prescribe a specific geographic limitation. The regulations require that the teach-out agreement provide students access to the program and services without requiring them to move or travel for substantial distances or durations. We believe that the accrediting agencies (and the States) should determine what is a reasonable distance or travel duration based on the circumstances of each location. For example, in some parts of the country, a 10-mile distance is the equivalent of more than an hour of driving time. In other parts of the country, it is unlikely that another institution would be available within a 10-mile radius and so it might be reasonable to expect students to travel farther to complete their program. The distance noted by the commenter would not be a reasonable distance. While we would support allowing the institution to offer its own distance education program as an option to its students, we would not allow that offering to supplant the requirement to provide a reasonable ''brick-and-mortar'' option to the students if the original education program was offered as an on-ground program.

We thank the commenter who supported the Department's waiver of requirements related to the percentage of credits earned at the institution for students completing their program under a written teach-out agreement. We also agree that the same waiver should be available to students who transfer credits following a school closure, even if that transfer is not part of a formal teach-out agreement. However, we do not agree that this requires a change to the regulatory language in this section, as it is within the accrediting agency's authority to grant this waiver when it is appropriate to do so.

Changes: None.

Comments: One commenter asserted that the Department should require any institution that closes, as a condition of closing, provide current transcripts to every student, past and present, as well as refund to students all amounts paid retroactive to the beginning of the current semester. The commenter stated that this would hold for-profit institutions to the same standard as State-funded institutions.

Discussion: We appreciate the commenter's concern for preservation of students' academic records and agree that closing institutions have an obligation to preserve those records and transfer them to the appropriate entity, as described in their teach-out plan. Teach-out plans must include arrangements for maintenance of records as well as instructions to students for how they can obtain those records. However, we do not have the authority to require a closing school to distribute transcripts to students. Additionally, most institutions require the submission of an official transcript directly from an institution for admission consideration. An institution might not consider a transcript submitted from an applicant to be an official transcript.

The Department does not have the authority to require institutions to refund students for non-title IV tuition payments made. We agree that closing schools should reimburse students if tuition was paid for classes that will no longer be offered, but we do not have the authority to require that of institutions. We applaud States that require a closing or closed public institution to refund students' tuition and fees for the final term. However, we are aware that some States operate tuition recovery funds to enable students to receive financial reimbursement for some or all of the non-title IV tuition payments made in the event that an institution closes.

Changes: None.

Comments: One commenter, while generally supportive of the proposed changes to § 602.24, suggested we prohibit closure of an institution based solely upon loss of accreditation. The commenter believed institutions should remain open for a period of one year or more after removal of accreditation to allow for students to determine whether they wish to complete their educational program at that institution. The commenter concluded that we should not allow the institution to solely determine the fate of students' academic careers.

Discussion: The Department appreciates the commenter's support on these changes. We note, however, that we cannot prevent an institution from closing when it loses accreditation since many students could not continue their enrollment without access to title IV funds. Also, loss of accreditation is a circumstance that enables students to seek and receive a closed school loan discharge. The Department does not determine whether an institution is open or closed. The Department determines an institution's eligibility to participate in the title IV programs and recognizes that, in many instances, the loss of title IV eligibility makes it impossible for an institution to continue educating students.

Changes: None.

Comments: One commenter noted with regard to the proposed revisions to § 602.24(c)(2)(iii) that a school that is on the verge of losing its recognition or intends to cease operations may not fully cooperate in carrying out teach-out mandates, assurances to students may not be implemented, and that expecting an orderly transition is not always realistic. The commenter believed the Department should conduct a careful review of previous terminations and closures to see if there are lessons to learn and apply.

Discussion: The Department agrees with the commenter that an orderly transition does not occur in all cases, yet we strive for a transition that is as smooth as possible. The Department has examined, and will continue to examine, school closures so that we and other triad partners can collectively assist students impacted by closures. Our experience suggests that students are best served when they have options to complete their program, including through an approved teach-out plan or teach-out agreement.

Changes: None.

Comments: One commenter recommended that the Department revisit proposed § 602.24(c), outlining the circumstances under which an accrediting agency must require an institution to submit a teach-out plan. The commenter urged the Department to not rely on provisional certification as an indicator of trouble—since that is not always the case—and instead consider identifying problem institutions as those the Department has placed on HCM2 or has taken action against under subpart G of the General Provisions.

Discussion: We agree with the commenter's position that provisional certification does not always indicate trouble. However, we believe that provisional certification imposes a higher level of risk to students and taxpayers and increases the likelihood that a school closure might ensue. Some accrediting agencies require all institutions to keep teach-out plans on file at all times. Teach-out plans do not require an institution to take any action, but instead to describe what the institution would do, and potential programs or institutions that could accept students, if the institution closes. Teach-out plans provide important information to the Department and States in the event of a school closure; thus, it protects students and taxpayers for institutions to have these plans on file when the institution is provisionally certified. The number of institutions on HCM2 or subject to an action under subpart G of the General Provisions consistently remains small compared with the number of provisionally certified institutions. Keeping in mind a teach-out plan acts as a preventive measure, we do not agree with the commenter that limiting the requirement to such a small number of institutions would help us achieve the desired outcome. We seek, instead, to identify institutions at risk for closure and ensure that a plan is in place so that the Department and States can assist students in transitioning to new programs and accessing their academic records if their institution closes.

Changes: None.

Comments: One commenter commended the Department for considering and including parts of a proposal submitted by negotiators strengthening teach-out requirements, securing teach-out agreements, and putting protections in place for students enrolled in schools at risk of closure, but stated the proposal in the consensus language does not go far enough in guaranteeing students will have high-quality teach-out options in the event their school closes. The commenter offered that the Department should require teach-out agreements, not make them optional, and we should clearly distinguish when an institution needs an agreement instead of just a plan. The commenter further asserted that the Department should require accrediting agencies to secure teach-out agreements when schools exhibit particular risk factors. The commenter suggested that, in the event of precipitous closure, accrediting agencies have routinely requested nothing more than teach-out plans when an institution exhibits warning signs, because under current regulations, securing a teach-out agreement is at the discretion of the agency and almost never results in the agency requesting a teach-out agreement.

Discussion: We appreciate the strong support from this commenter and the non-Federal negotiators who worked with us to create a more robust framework to protect students. While we seek to provide protections for students affected by a school closure and strive to assist with the transition to high-quality academic programs, we cannot guarantee students will have high-quality teach-out options in the event their school closes. However, teach-out plans can be helpful to students, States, and the Department when a school closes and we are trying to help students identify another institution where they can complete their program and obtain the records they need to document their attendance or prior degree completion at the closed school.

We do not believe it is possible for either the Department or the accrediting agencies to force an institution to engage in a teach-out agreement because such an agreement requires a contractual agreement between the closing school and a continuing school. Neither the Department nor an accrediting agency can require a continuing institution to enter into a teach-out agreement with a closing institution, and in some instances, the receiving institution in a teach-out agreement will accept students into some programs but cannot accommodate students in all programs or can accept some but not all students into a particular program. Teach-out agreements identify which students a continuing school will receive, how many credits it will receive in transfer, and any financial arrangements required to support the agreement. Neither the Department nor an accrediting agency can require an institution to accept students or credits from another institution. Moreover, the statute only requires that institutions have teach-out plans in place. We recently learned that some accrediting agencies will not review a teach-out agreement until the closing school has closed—at which point it may be too late to help students complete their program. We clarify in this regulation that agencies can and should request that an institution pursue teach-out agreements and review teach-out agreements prior to a school's closure. However, we cannot force an institution to enter into a contract with another institution, or to accept students into a program for which the receiving institution believes the transferring students are underprepared.

Changes: None.

Comments: One commenter expressed concern about the Department's proposal to remove the required agency review of institutional credit hour policies as well as the specifics of how an agency meets the requirements for such review in § 602.24(f).

Discussion: We continue to believe the agency review requirements are unnecessarily prescriptive and administratively burdensome without significantly improving accountability or protection for students or taxpayers. However, we note that the definition of ''credit hour'' in § 600.2 requires that the amount of student work determined by an institution to comprise a credit hour be approved by the institution's accrediting agency or State approval agency. Moreover, nothing precludes an accrediting agency or State approval agency from examining or questioning an institution's credit hour policies either as part of a routine evaluation of that institution's academic programs or as the result of specific concerns brought to the attention of the accrediting agency.

Changes: None.

Due Process (§ 602.25)

Comments: Several commenters questioned the reasoning behind the proposed change to due process, stating that the Department did not explain how the change helps institutions understand accreditation status decisions. Further, the commenters believed the proposed changes would not clarify decisions issued by the agency's decision-making body for institutions or programs. The commenters contended that the Department should not permit an agency to re-evaluate its original decision if an appeals panel reverses it but does not specifically remand the decision. In such a case, these commenters asserted, no further agency action should be allowed.

Discussion: We considered views on § 602.25 similar to the commenters during negotiated rulemaking. The Department believes that the changes sufficiently satisfy the intent of HEA section 496(a)(6), which provides that an agency must establish and apply review procedures throughout the accrediting process that comply with due process. The Department permits agencies to remand appeals panels' decisions to the original decision-making body for a final review. In the event that an agency does remand the decision to the original decision-making body, the Department believes it is important to require that the final decision issued by that body be consistent with the recommendations of the appeals panel.

However, an appeals panel maintains the option to amend an adverse action, which could involve reaching a different conclusion.

When the agency's appeals panel decides to remand the adverse action to the original decision-making body, the appeals panel must provide the institution or program with an explanation for any determination that differs from that of the original decision-making body. In the event that the decision is remanded, any decision issued by the original decision-making body must act in a manner consistent with the appeals panel's decisions or instructions.

These changes will ensure that institutions or programs receive full information regarding the decisions pertaining to their accreditation status, and that decisions remanded back to the original decision-making body reflect the appeals panel's decision or recommendation. Additionally, the changes will provide that the original decision-making body speaks for the agency in addressing concerns raised in a remand.

Changes: None.

Notification of Accrediting Decisions (§ 602.26)

Comments: Several commenters agreed with the proposal in § 602.26(b) to reduce the amount of time within which an accrediting agency must notify State agencies and the Department regarding any adverse action taken against an institution so that these entities are notified at the same time as the institution. One commenter asked for clarification of the ''same time'' language to ensure that accrediting agencies adhere to the spirit and intent of the provision.

Discussion: We appreciate the commenters' support of the reduced time to notify State agencies and the Department and note that the term ''at the same time'' would generally mean within one business day and is consistent with current regulations.

Changes: None.

Comments: Several commenters agreed with requiring an institution to disclose adverse actions to current and prospective students within seven days. However, one commenter noted that disclosures that are hidden, inaccurate, confusing, or misleading fail to provide students with the information they need to make informed decisions. The commenter urged the Department to take steps to ensure that disclosures required under these regulations provide actual, effective notice and information that is accurate, meaningful, and actionable to students who may be unfamiliar with the accreditation system and the meaning of accreditation decisions and terminology. The commenter also urged the Department to ensure that the disclosures continue for the duration of the suspension or other adverse action so that the disclosures are more likely to reach all relevant students and prospective students.

Discussion: We appreciate the support and suggestions of the commenters. We believe that providing initial notification within seven days provides transparency and protection to current and prospective students. Institutions are expected to maintain that disclosure until the suspension or adverse action is resolved. Beyond the Department's regulations, individual agencies often set additional requirements for how and where this information must be disclosed.

The Department's regulations refer to the requirement that the agency must disclose the action taken in a manner that is clear, factual, and timely.

Changes: None.

Comments: One commenter disagreed with the proposed requirement to reduce the amount of time an accrediting agency has available to inform State agencies and the Department when an institution voluntarily withdraws from accreditation or preaccreditation or allows either to lapse from 30 to 10 days. The commenter stated that 10 days is unreasonable and places an unnecessary burden on agencies.

Discussion: We appreciate the commenter's concerns; however, we believe that decreasing the notification timeframe to 10 days provides needed protections to students and taxpayers. The prompt notification of these changes is of critical importance to entities responsible for ensuring an institution's authority to operate or, in the case of the Department, to ensure that the institution continues to be able to participate in title IV programs.

Changes: None.

Other Information an Agency Must Provide the Department (§ 602.27)

Comments: One commenter disagreed with the proposed elimination of the requirement that an accrediting agency provide to the Department any annual report that it produces as well as the change to require an accrediting agency to consider any contact with the Department as confidential only where the Department determines a compelling need for confidentiality. The commenter stated that these changes lack a reasoned basis. Another commenter agreed with the Department making the determination regarding confidentiality as it would allow the Department to determine the appropriate classification under Federal law.

Discussion: The Department has created monitoring tools that provide it with more real-time data and information to evaluate an agency. By the time an agency publishes an annual report, the data is often stale and unhelpful to the Department. We believe that eliminating the requirement to provide an annual report does not affect the Department's ability to monitor agencies and will increase efficiency and reduce administrative burden.

Changes: None.

Severability (§ 602.29)

Comments: None.

Discussion: We have added § 602.29 to clarify that if a court holds any part of the regulations for part 602, subpart B invalid, whether an individual section or language within a section, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have added § 602.29 to make clear that the regulations are designed to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

Activities Covered by Recognition Procedures (§ 602.30)

Comments: One commenter objected to the Department's proposal to eliminate this provision. The commenter argued that, although the Department stated that the provisions in the current regulations in this section duplicate other regulatory provisions, we have failed to identify which sections in part 602 cover these activities. The commenter asserted that this is because these sections do not exist.

Discussion: The recognition activities procedures that we removed in § 602.30 duplicate provisions in §§ 602.31(a), 602.31(b), 602.31(c), 602.19(e), and 602.33. The sections are referenced within § 602.30 in the current regulations and are contained within these regulations at the same cited locations.

Changes: None.

Agency Submissions to the Department (§ 602.31)

Comments: Several commenters disagreed with proposed changes to § 602.31(a)(2). One commenter stated that the Department's proposal to eliminate a requirement that accrediting agencies submit not only documentation of compliance with the recognition criteria, but also evidence that the agency ''effectively applies those criteria'' conflicts with the statute as it requires that the Secretary limit, suspend, terminate, or require an agency to come into compliance if she determines that an accrediting agency or association has failed to effectively apply the criteria. Another commenter noted that this is a fundamental part of the application process.

Discussion: The changes to § 602.31(a)(2) continue to require the agency to provide documentation as evidence that the agency complies with the criteria for recognition listed in subpart B of this part, including a copy of its policies and procedures manual and its accreditation standards. The Department staff will analyze the information submitted, in accordance with the procedures described in § 602.32, which include the current requirement to assess observations from site visits to gauge the efficacy of the agency's application of the criteria, rather than a simple attestation of that fact in the documentation submitted by the agency. In keeping with the statutory requirement, if the Secretary determines that an accrediting agency or association has failed to effectively apply the criteria in this section, or is otherwise not in compliance with the requirements of this section, the Secretary will limit, suspend, or terminate the Department's recognition, or require an agency to come into compliance.

The regulations also recognize that, in some instances, an agency may not have the need to apply a particular policy, standard, or procedure during its recognition review period. In such instances, the agency should not be found to be noncompliant if it has the appropriate policy in place but has not yet had the need to implement it. For example, if no institution during the five-year review period has appealed a negative decision, the agency cannot prove that it follows its appeal procedures, but this does not indicate that the agency is noncompliant. However, if the agency has had occasion to implement a given policy, it must do so effectively.

Changes: None.

Comments: Commenters agreed that accrediting agencies should redact submissions of personally identifiable information (PII) and other sensitive information to prevent public disclosure of PII while facilitating access to documentation. One commenter stated that the Department should better identify what it means by PII before it requires agencies to perform the redaction.

Discussion: We thank the commenters for their support on this proposed change. We believe that those who work with ''personally identifiable information'' generally understand what it includes, which is any data that could potentially identify a specific individual.

PII is defined in 2 CFR 200.79 as information that can be used to distinguish or trace an individual's identity, either alone or when combined with other personal or identifying information that is linked or linkable to a specific individual. Some information that is considered to be PII is available in public sources such as telephone books, public websites, and university listings. This type of information is considered to be Public PII and includes, for example, first and last name, address, work telephone number, email address, home telephone number, and general educational credentials. The definition of PII is not anchored to any single category of information or technology. Rather, it requires a case-by-case assessment of the specific risk that an individual can be identified. Non-PII can become PII whenever additional information is made publicly available, in any medium and from any source, that, when combined with other available information, could be used to identify an individual. We do not believe that we need to further define PII.

Changes: None.

Comments: Another commenter stated that changing the timeframe to reapply for recognition to 24 months prior to the date on which the current recognition expires is unreasonable noting that in 24 months the information provided may be out of date. The commenter contended that the reason for the change likely has to do with understaffing at the Department.

Discussion: The Department disagrees with the commenter. To the contrary, the 24-month timeframe provides ample opportunity for an agency, if found deficient in its policies and procedures, to update them as necessary to meet the Department's requirements. It also affords Department staff the opportunity to follow an individual accreditation decision from beginning to end, meaning that staff can observe both the site visit and the final agency decision for a single institution.

The current timeframe makes it impossible for staff to observe the decision-making body considering the same institution for which the staff observed a site visit. Agencies will be able to provide the Department with information if updates occur during the 24-month period. Presently, there is no stated timeframe in the regulations, and providing 24 months allows the Department to perform a more thorough review of the agency and its activities. It also provides the agency sufficient time to make corrections to policies and procedures in order to come into compliance.

Changes: None.

Comments: One commenter noted that the Department proposes moving aspects of the recognition process to an on-site review, but it provides no explanation of how it will ensure adequate maintenance of records. The commenter asserted that this lack of records, which will impede NACIQI in its ability to review the record for its decision and shield the Department from accountability, violates the law.

Discussion: We appreciate the commenter's concerns. Department staff will document the on-site review, including a description of documents reviewed, an explanation of how those documents support the staff finding, and in the event of a negative finding, will require staff to make copies or upload a sample of documents that provide evidence to support a staff finding or recommendation. This will be included in the agency review and will be provided to NACIQI for their review of the agency.

The Department proposed this change in methodology in response to recommendations made by the Office of the Inspector General (OIG or IG) in its June 27, 2018 report, *U.S. Department of Education's Recognition and Oversight of Accrediting Agencies*.[26] The OIG report expressed concern that agencies are able to provide examples of their best work in deciding on their own which documents to include as evidence in their petition for recognition or renewal of recognition. Instead, OIG recommended a representative sample of documents that accurately reflect a complete picture of the agency's work. Moreover, the IG expressed concern that staff do not review an appropriate number of institutional or programmatic decisions relative to the number of institutions or programs the agency accredits.

The IG recommended that the accreditation group use risk-based procedures and readily available information to identify the specific institutions and an appropriate number of institutions that each agency must use as evidence to demonstrate that it had effective mechanisms for evaluating an institution's compliance with accreditation standards before reaching an accreditation decision.

The IG further recommended that the OPE accreditation group adopt written policies and procedures for evaluating agency recognition petitions that incorporate the elements of the recommendation described above and address specific documentation requirements to include each selected school's complete self-study report and the agency's site visit report and decision letter; and adopt a risk-based methodology, using readily available information, to identify high-risk agencies and prioritize its oversight of those agencies during the recognition period. These regulations and the June 2019 update to the Accreditation Handbook achieve these objectives.

The Department is concerned that already petitions include tens of thousands of pages and adding to the size of petitions creates a number of practical challenges including demands of agency and staff time. As a result, the Department has determined that by receiving lists of upcoming accreditation decisions 24 months in advance of the recognition decision, staff will have more opportunities to participate in site visits or observe agency decisions regarding institutions that have demonstrated risk characteristics. In addition, by performing an on-site review, staff can review sections or excerpts of more documents, meaning that their review will include consideration of a larger number of member institution or program files.

Changes: None.

Procedures for Department Review of Applications for Recognition or for Change of Scope, Compliance Reports, and Increases in Enrollment (§ 602.32)

Comments: Commenters stated that the Department should continue its practice of having career staff provide a draft report to agencies it reviews because the Department provides no reason to eliminate the practice.

Discussion: The regulations provide that, if an agency is required to be reviewed by the NACIQI under § 602.19(e), the Department will follow the process outlined in § 602.32(a) through (h) which includes a provision for a draft report to the agency. However, the regulations do not require staff to make a preliminary recommendation regarding an agency's recognition status at the time of issuing a draft report. Only after considering the agency's response to the draft staff report, including additional evidence provided by the agency, and performing its on-site review(s) should staff make a recommendation regarding an agency's recognition status.

Changes: None.

Comments: One commenter stated that under proposed § 602.32(b), the Department would only require that an accrediting agency provide letters from educators and institutions to show wide acceptance of the agency. However, the commenter suggested that both of those parties may have a conflict of interest in providing acceptance of the agency if they are an institution or work for an institution that is accredited by the agency. Further, the commenter stated that the requirement to show wide acceptance was not only applicable to initial approval, but also re-recognition. The commenter suggested that letters should not be used if all three come from the same institution and that the Department should justify why this provision should not apply to continued recognition.

Discussion: We appreciate the comments on this topic; however, once an agency has been recognized, the fact that it has member institutions serves as evidence that the agency is valued by institutions and educators. It is important to request support from educators and institutions during the review of an application for initial recognition since the Department needs to be sure that the agency is likely to maintain a healthy membership and is not being created for the purpose of accrediting a single institution. We believe the original widely accepted standard in § 602.13 was too subjective and was unclear about how many letters would be required to meet the standard. In some instances, agencies submitted multiple documents in support of their wide acceptance, yet staff found the agency to be out of compliance. In addition, this requirement could be used strategically by educators, licensing boards, and other agencies to block competition either among institutions or within the labor pool by narrowing available opportunities or the number of individuals who qualify for them. It is also possible that an agency that accredits a small number of programs or institutions could be a reliable authority on institutional quality, but because of the narrow scope of its work, lacks wide acceptance outside of the institutions for which it provides accreditation due to a lack of knowledge about the area by others, or due to philosophical differences in approach. The proposed change would streamline the current wide acceptance requirement while keeping guardrails for the initial recognition of an agency by ensuring they can demonstrate acceptance from the constituencies most relevant to them. The Department expects that letters of support reflect the wide variety of constituencies the agency serves but does not believe one-size-fits-all regulatory requirements align with statutory authority, nor would they improve accrediting agency quality. The Department believes this requirement is most appropriate during initial recognition because it helps validate that there is a need for a newly recognized agency.

Changes: None.

Comments: One commenter stated that the current § 602.32(d) specifies that final judgments on the merits by a court or administrative agency in complaints or legal actions against an accrediting agency are determinative of compliance. The commenter stated that the proposal to merely consider such final judgments is a significant change to the Department's procedures, and that the Department's explanation that the proposed change reflected the view of the Department and several committee members did not provide a justification that meets the burden of the APA.

Discussion: Current § 602.32(d) specifies that ''Department staff's evaluation of an agency may also include a review of information directly related to institutions or programs accredited or preaccredited by the

[26] *www2.ed.gov/about/offices/list/oig/auditreports/fy2018/a09r0003.pdf.*

agency relative to their compliance with the agency's standards, the effectiveness of the standards, and the agency's application of those standards.'' The proposed change in this section does not substantively change this requirement. Moreover, there is no mention of the results of a final judgment on the merits by a court or administrative agency anywhere in the current regulations in part 602. The language referenced in the new regulations at § 602.32(d)(2) states that complaints or legal actions against an accredited or preaccredited institution or programs accredited or preaccredited by the agency may be considered but are not necessarily determinative of compliance. This change was necessary to ensure that institutions and agencies have due process rights and benefit from the presumption of innocence such that allegations alone do not suffice as evidence of noncompliance.

Changes: None.

Comments: One commenter requested that the Department clarify what is meant, in § 602.32(e), by the statement: ''that the agency was part of a concerted effort to unnecessarily restrict the qualifications necessary for a student to sit for a licensure or certification examination or otherwise be eligible for entry into a profession.'' Another stated that the Department provided no evidence that unnecessary qualifications are being imposed on students to sit for licensure or for certification and that the Department is trying to link the changes in § 602.32(e) and (k) in order to prevent accrediting agencies from working with licensing bodies and States to prohibit discrimination.

Discussion: The purpose of the change is to limit symbiotic relationships between accrediting agencies, institutions, and licensing boards, which together may limit access to professions by increasing education requirements without regard for consumer cost to the benefit of agencies, institutions, and licensing boards.

The Department views such behavior as anticompetitive and contrary to the spirit, if not letter, of the ''separate and independent'' provisions in HEA section 496 as well as to basic fairness and the goals of the HEA, namely, to expand opportunity to Americans.

In other instances, accrediting agencies may have formed such a close relationship with licensing boards that there is no opportunity for a new agency to form. Licensing boards may require individuals to have graduated from an institution approved by a specific accrediting agency to qualify for licensure. As a result, institutions—who want their graduates to obtain licensure—would not choose an agency who could not fulfill that licensure obligation. It may be difficult to sanction an agency that is the only agency providing the programmatic accreditation necessary for a graduate's entry into the workforce. Again, the Department places far greater importance on the acquisition of knowledge and skills than on how such knowledge and skills were acquired.

Changes: None.

Comments: One commenter stated that the Department failed to give an example, in connection with proposed § 602.32(e), of how an accrediting agency deprived a faith-based institution of accreditation because of its religious mission. The commenter stated that proposed § 602.32(e) would allow faith-based institutions to have their own accrediting agency, questioned what quality controls would exist for such an agency, and asserted that faith-based institutions should be required to adhere to the same academic standards as secular schools. Another commenter stated that the proposed regulations were not clear as to when an institution could make a complaint to the Department that its mission had been a negative factor in an accrediting agency's decision which could lead to confusion for accrediting agencies.

Discussion: We believe the commenters may have intended to refer to § 602.18(b)(3) rather than § 602.32(e). Although the Department does not have evidence that faith-based institutions have been deprived of accreditation because of their religious missions, we have seen instances in which agencies have proposed changes to their standards that would have prevented those institutions from following the tenets of their faith. Faith-based institutions were successful in blocking those changes, but if the accrediting agency had not been responsive to the requests of its faith-based members, the change could have interfered with the mission of a number of faith-based institutions.

The Free Exercise clause of the Constitution requires the Department to ensure that faith-based institutions are not deprived of access to Federal programs because of the exercise of their religious rights. A number of faith-based institutions have expressed concern to the Department that, while accreditation has ultimately been granted, some agencies have used accreditation to force institutions to implement policies and practices that may align with popular opinion, but may not be consistent with the tenets of their faith. Likewise, RFRA requires that the Federal government not substantially burden religious exercise unless it is the least restrictive means of furthering a compelling government interest. We are taking proactive steps to ensure that discrimination does not occur against faith-based institutions because of their religious exercise. Agencies that accredit faith-based institutions must meet the same standards to obtain recognition from the Secretary that are applicable to all accrediting agencies seeking the Secretary's recognition. All institutions have access to an existing complaint process that provides an opportunity for institutions to raise their concerns, including concerns about respect for their missions, to the Department. These regulations do not change the existing complaint process.

Change: None.

Comments: One commenter stated that, because the regulations do not specify how many or which criteria the accrediting agency must meet to be substantially compliant, the proposed regulations may allow an agency to be out of compliance with multiple criteria and still be a gatekeeper for Federal aid. Two commenters agreed with allowing an agency to continue to be recognized if it was in ''substantial compliance'' because it would allow an agency a four-year grace period to resolve any regulatory lapse, and, as one commenter noted, the language also ensures the unfettered ability of Department staff to re-escalate an issue, should it prove more serious than initially determined. The commenter also noted that the Department would only use the designation in cases where an agency achieved compliance in all but a technical sense.

Discussion: The Department disagrees with the commenter who stated that the ''substantial compliance'' standard would allow a noncompliant agency to continue to be recognized. An agency that is out of compliance would not be found to be substantially compliant. However, in some instances an agency may have been acting in accordance with the Department's requirements but may have a written policy that does not clearly articulate every aspect of the agency's policies or procedures. In other instances, the agency may have the correct policy in place and mostly acted in accordance with the policy but may be found to have a limited number of instances when special circumstances or employee error resulted in the agency deviating from its written policy. In other instances, a missing signature or the use of language that is not precisely the same as the language in the Department's regulations could result in a finding of noncompliance although the agency's actions meet the Department's requirements.

As one commenter noted, the proposed language regarding the use of monitoring reports for agencies that are substantially compliant relates to situations where there were technical compliance issues, but the agencies were meeting the spirit of the requirements. Section 602.3 makes clear that a monitoring report is required to be submitted by an agency to Department staff when the agency is found to be substantially compliant but needs to make a minor correction to its policies or practices. The report must contain documentation to demonstrate that the agency is implementing its current or corrected policies, or that the agency, which is compliant in practice, has updated its policies to align with those compliant practices.

Changes: We have made no changes as a result of this comment. However, we have modified § 602.32 by condensing paragraphs (j) through (m), removing redundant language, including removing proposed § 602.32(k), which was identical to proposed § 602.32(e), and clarifying the process Department staff follow in their review of applications for recognition or for change of scope, compliance reports, and increases in enrollment.

Procedures for Review of Agencies During the Period of Recognition (§ 602.33)

Comments: Several commentators stated that the proposed rules regarding the application process would make it more difficult for the Department to remove ineffective accrediting agencies that serve as gatekeepers for title IV aid. One commenter stated that the concept of a monitoring report for accrediting agencies that are ''substantially in compliance'' rather than fully meeting all requirements was a broad term that had no basis in statute. The commenter stated that the process would allow Department staff to make decisions without full transparency and public accountability versus a ''typical full agency review.''

Discussion: The Department's intention in introducing the monitoring report is to enable accrediting agencies to more effectively resolve instances of minor exceptions to full compliance. Furthermore, we believe that the use of monitoring reports will increase the likelihood of identifying and correcting minor problems before they become larger problems.

An accrediting agency that is failing to meet the Department's criteria for recognition remains subject to withdrawal of recognition. The Department has not yielded its authority or forfeited its responsibility for assuring that accrediting agencies are qualified gatekeepers of title IV aid. While the statute does not specify ''substantial compliance'' as a status for accrediting agency recognition, it does not preclude the Secretary from making this designation and for many years substantial compliance was the standard used by the Department during recognition reviews. The introduction of the monitoring report and designation of substantial compliance provides the Department with more efficient and effective tools and methods to address minor deviations in process or procedures to ensure full compliance. It is also important to note that the monitoring report increases the level of transparency for recognition or accreditation decisions as it provides evidence that any minor omissions or inconsistencies are resolved, and that policies and procedures are put in place to prevent future inconsistencies. The monitoring report will be employed in situations where the accrediting agency is substantially compliant and requires only minor actions or sufficient time to come into full compliance.

Changes: None.

Comments: Regarding proposed changes to § 602.33(c), one commenter stated that an on-site ''spot check'' of records during a visit may not be sufficient to understand an agency's full body of work during a review period. The commenter also noted that the Department must also have sufficient staff to handle the workload should these rule changes increase the number of agencies that need to be reviewed and monitored. The commenter supported the provisions that require the Department, for issues that cannot be resolved by Department staff, to seek public comment, make a recommendation to NACIQI, and, ultimately, refer the issue for Secretarial action; however, the commenter felt that the Department's decision to continue or not continue monitoring should also be public. One commenter stated that the Department should do more to monitor competition between accrediting agencies.

Discussion: We disagree that the provisions of § 602.33(c) constitute a ''spot check.'' The regulations will require the Department staff to conduct a thorough review and analysis of identified areas of concern or inconsistency. The on-site review is designed to increase the quality and scope of documents staff review, based on institutions or actions selected by staff, while reducing the burden of uploading thousands of pages of documents that may not be responsive to staff's specific concerns or questions. We appreciate the commenter's support for the provisions that require escalation of unresolved issues to NACIQI and believe that this process affords sufficient and appropriate transparency to the public. In response to the commenter who believed the Department should make its decision regarding the continuation of monitoring public, we reiterate that we will use the monitoring report for minor omissions or inconsistencies that we do not believe are cause for public concern.

The Department seeks to acknowledge and correct even small deviations from standard practice to ensure that they are resolved before becoming larger problems, while at the same time not creating unnecessary work for the agency or taking time from a NACIQI meeting that would be better spent focusing on agencies with more serious compliance concerns.

With regard to the commenter's concern that these regulations will reduce the stringency of the Department's oversight, we believe instead that these new regulations provide greater opportunities for the Department to take necessary action against an accrediting agency. For example, when institutions were limited to selecting an agency based on their location, and entire regions of the country were accredited by a single accrediting agency, the Department would have been reluctant to withdraw recognition from a regional accrediting agency, leaving an entire region of the country without a comprehensive institutional accrediting agency. The Department believes there is always a small risk that some agencies may feel pressured to lower standards in order to attract more member institutions. However, the Department does not believe this risk will grow as a result of these regulations and, as always, will be vigilant in monitoring agencies that insufficiently monitor the quality of the institutions and programs they oversee. The Department believes that by reducing unnecessary administrative burden from the recognition process, accrediting agencies can devote more time and resources to their primary responsibility of overseeing institutional quality and the student experience.

The Department will perform risk-based analysis and review of agencies, including between official renewal of recognition activities, when we detect signs of risk through our various monitoring and program review activities. Through these revised processes, the Department believes it will be able to more effectively identify and act against agencies that may be at risk of reducing rigor and causing harm to students and taxpayers.

Changes: None.

Comments: One commenter stated that the Department proposes eliminating a requirement that it review an agency at any time at the request of the NACIQI and that it does not mention this change in the NPRM. The commenter stated that the Department provides no reasoning or justification and appears not to have discussed this change during the rulemaking. The commenter stated that it is particularly problematic given the proposal to conduct monitoring reports without input or review from NACIQI.

Discussion: The regulations do not eliminate an investigation at the request of NACIQI. This requirement is addressed in § 602.33(a)(2), which requires Department staff to act on information that appears credible and raises concerns relevant to the criteria for recognition. Thus, if NACIQI were to make a credible request, based on evidence of risk, the Department staff would act on this request and initiate a review or investigation.

Changes: None.

Senior Department Official's (SDO's) Decision (§ 602.36)

Comments: A few commenters opposed the additions to the types of decisions the SDO may make in § 602.36(e), such as approving agencies for recognition and approving recognition with a monitoring report. These commenters feared the change would impede the Department's ability to perform an appropriate oversight function over accrediting agencies. Additionally, these commenters believed this change would conceal important monitoring of agencies not only from NACIQI, but also from the public. These commenters requested that the Department abandon these changes and fully review and evaluate accrediting agency performance.

Discussion: The Department believes that creating required monitoring reports provides an additional tool to ensure accrediting agency compliance with recognition criteria. Under the current regulations, when the Department identifies minor omissions or inconsistencies in an agency's standards, policies, or procedures, the Department may not take action because the required action would be unjustifiably severe. On the other hand, the Department has sometimes determined a seasoned accrediting agency to be noncompliant because a single form was left unsigned or changes in board membership temporarily change the ratio of board participants. By adding the substantial compliance determination and a required monitoring report, the Department has the opportunity to award continuing recognition and continue to address minor irregularities or omissions. We will restrict the use of the monitoring report to instances when an agency has demonstrated substantial compliance and limit its use to low-risk situations. The monitoring report, for example, could include documentation to show that an agency has updated its written policies and procedures to align with its current practice, to ensure that controls have been put in place to make sure that all documents are properly signed, or to demonstrate that minor deviations that were made in order to accommodate students in unusual circumstances have not become standard practice.

The decisions of the SDO are predicated on demonstrated compliance or substantial compliance with the criteria for recognition listed in subpart B of this part. Those decisions do include a wide range of determinations including, but not limited to, approving for recognition; approving with a monitoring report; denying, limiting, suspending, or terminating recognition; granting or denying an application for an expansion of scope; revising or affirming the scope of the agency; or continuing recognition pending submission and review of a compliance report. These decisions are based on the SDO's assessment of the agency's petition for recognition, Accreditation Group staff analysis and agency response, and the NACIQI review.

Changes: None.

Comments: A few commenters also criticized the changes in § 602.36(e) and (f) that allow the SDO to determine that an agency is compliant or substantially compliant. These commenters expressed concern that a determination of substantial compliance represents a weakening of protections or the allowance of agency inaction.

A few commenters specifically disagreed with the change in § 602.36(e)(1)(i) allowing the SDO to determine that the agency has demonstrated compliance with a standard when an agency has required policies and procedures in place but has not had an opportunity to apply them. These commenters believed that this change violates the HEA, which they claimed requires the Department to act within 12 months or remove the agency's recognition if it does not comply or effectively apply required criteria. One commenter suggested that agencies could continually create new standards to avoid a Department finding for failure to follow their standards. Two commenters suggested that the Department withdraw this change.

Discussion: We disagree with the commenters who argued against allowing the SDO to determine an agency to be compliant or substantially compliant. The provision still requires that the SDO make a compliance determination. We do not believe that this weakens the standard. Instead, we believe it allows the SDO to raise concerns about even small irregularities or omissions, and require the agency to resolve them, while at the same time allowing NACIQI to focus their time on agencies with clear areas of noncompliance.

We also disagree with the commenters who opposed allowing the SDO to determine that an agency demonstrated compliance when the agency had the required policies and procedures in place but had not had the opportunity to apply them. We do not believe it is appropriate to penalize an accrediting agency that has the appropriate policies in place but has not had the need or opportunity to apply those policies during the review period. For example, a small accrediting agency may have policies in place to evaluate an expansion of scope at a member institution to include distance learning, but it may have no members that participate in distance learning or that add distance learning during the review period. Similarly, an agency may have a change-of-control policy in place, but it may not have had an institution that requested consideration of a change-of-control during the review period, and the agency would have had no need to implement the policy. Accrediting agencies with a small number of members may have few or even no institutions that go through an initial accreditation or renewal of accreditation review during the agency's five-year recognition review period since agencies typically accredit institutions every 10 years.

The Department believes that this is consistent with statute, which requires an agency to have accredited or preaccredited only one institution prior to being eligible for recognition. It is unlikely that an accrediting agency would be required to implement all of its policies in the course of accrediting or preaccrediting a single institution, which makes it clear that Congress did not expect that each agency would be required to implement every policy during each review cycle. This is not a change in policy because staff have considered these instances to meet the standard for compliance; however, the

Department seeks to codify this practice in these regulations.

To be clear, this policy does not ignore instances when an agency elected to ignore a problem and not implement its written policies, but instead takes into account that agencies may not need to exercise every one of its policies during a five-year review period, and that is not a violation of the requirements of the HEA. In such a case, the Department will review the policies and procedures in place to be sure they comply with the Department's requirements. In addition, as soon as the need to apply that policy arises, the agency will be required to notify the Department so that the Department has the opportunity to conduct an evaluation of the agency's application of the policy. The agency has not failed to comply if it has not had the need or opportunity to apply a particular policy, as long as it has a policy in place and implements it properly if and when the need arises.

Changes: None.

Severability (§ 602.39)

Comments: None.

Discussion: We have added § 602.39 to make clear that, if any part of the regulations for part 602, subpart C, whether an individual section or language within a section, is held invalid by a court, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have added § 602.39 to make clear that the regulations are designed to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

Secretary's Recognition Procedures for State Agencies

Criteria for State Agencies (§ 603.24)

Comments: One commenter supported the Department's removal of the requirement for State agencies that function as accrediting agencies to review and evaluate institutions' credit hour policies. This commenter agreed with the Department that the requirement adds burden without evidence of increased accountability, benefit to taxpayers, or assistance to students.

Discussion: We thank the commenter for the support of the removal of this provision. We believe that it is beneficial to reduce burden when it does not jeopardize accountability.

Changes: None.

Comments: One commenter challenged the Department's assertion that the requirements were ''overly prescriptive'' and did not agree that State agencies functioning as accrediting agencies needed fewer restrictions in this area.

Discussion: The Department maintains its position that the requirements in § 603.24(c) to review policies related to credit hours are overly prescriptive and that the State agency serving as an accrediting agency should have autonomy and flexibility to work with institutions in developing and applying credit-hour policies. This change does not, as some commenters suggested, remove all oversight of institutions in this area (see the discussion above related to § 602.24). Instead, it provides for more flexibility and treats State agencies that serve as accrediting agencies the same as other agencies.

Changes: None.

Severability (§ 603.25)

Comments: None.

Discussion: We have added § 603.25 to clarify that if a court holds any part of the regulations for part 603, subpart B, invalid, whether an individual section or language within a section, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have added § 603.25 to make clear that the regulations are designed to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

Standards for Participation in the Title IV, HEA Programs

End of an Institution's Participation (§ 668.26)

Comments: Several commenters supported allowing institutions to award and disburse title IV aid for up to 120 days following the end an institution's eligibility. These commenters noted that this would allow more students to complete their academic programs at the institution they selected without the disruption involved in relocating to another institution. One commenter also expressed that this change benefits closing institutions by providing continuity and strong operations through a closure.

Discussion: We thank the commenters who supported the provision allowing a school to allow students an opportunity to complete their academic program at their chosen institution if they can do so within 120 days. This minimizes disruption and allows for greater flexibility for students and for institutions—especially those who planned an orderly closure.

The Department realized that, as written, § 668.26(e)(1) could be read by some to permit an institution that no longer participates in title IV programs to continue receiving title IV aid. Instead, the Department's intent was a desire to enable the Secretary to allow an institution to continue participating in title IV programs for up to 120 days after a State, an accrediting agency, or the Department has made the decision to remove State authorization, accreditation, or title IV participation, but defers the effective date of that decision.

Comments: One commenter generally supported this provision but also expressed concern that the Department would not allow for more than 120 days of funding following the decision to end an institution's participation. This commenter suggested alternative language that outlined parameters for which an institution would retain funding. These suggestions included disbursing only to students who were already enrolled when the institution announced its closure, disbursing only to students who had already completed at least 50 percent of the academic program, allowing disbursements only for institutions that were voluntarily withdrawing from participation in the title IV programs, and requiring the accrediting agency to approve the teach-out. These conditions, in the commenter's opinion, provided for what the commenter believed was the Department's intent—allowing for students to receive funding during an orderly closure of an institution.

Discussion: We appreciate the support from the commenter and note that we have revised § 668.26 to more clearly articulate the need for the State authorizing agency, accrediting agency, and Department to all agree that the institution has the capacity to conduct an orderly teach-out based on the teach-out plan provided by the institution. We note that we had addressed most of the concerns expressed in the NPRM; however, we agree that additional assurances by each member of the triad are needed to provide an appropriate teach-out opportunity to students. To reiterate, in our proposal, we imposed numerous requirements on institutions that wish to avail themselves of the flexibility afforded by this provision. Most importantly, the Secretary may permit the institution to continue to originate, award, or disburse title IV, HEA program funds following a State authorizing agency or accrediting agency's decision to withdraw, suspend, or terminate State authorization or accreditation in circumstances when such a decision has a deferred effective date, and only if the State authorizing agency and accrediting agency agree that the cause of the probation or termination decision would not prevent the institution from engaging in an orderly teach-out. Note, however, that this is permissible only in certain circumstances and only with agreement from an institution's State authorizing agency and accrediting agency. In addition, the permission to originate, award, or disburse funds may not extend beyond the delayed effective date of the withdrawal, suspension, or termination decision, or 120 days following that decision, whichever is earlier.

We require the institution to notify the Secretary of its plans to conduct an orderly closure and teach-out in accordance with accrediting agency requirements. Additionally, we compel the institution to continue to follow the terms and conditions of the program participation agreement.

Finally, we limited the disbursements to enrolled students who could complete the program within the 120 days following the date of a final, non-appealable decision by State authorizing agency to remove State authorization, an accrediting agency to withdraw, suspend, or terminate accreditation, or the Secretary to end the institution's participation in title IV, HEA programs. Students would also be able to transfer to a new institution. To further protect both students and taxpayers, the Secretary together with the institution's State authorizing agency and accrediting agency must determine that with continuing title IV resources the institution is able to carry out a teach-out, and that the cause for the withdrawal, termination, or suspension of State authorization or accreditation would not prevent the institution from conducting a high-quality teach-out. For example, an accrediting agency could make the decision to withdraw accreditation because an institution does not meet the agency's requirements for long-term financial viability; however, the institution may still have sufficient resources if title IV participation continues to provide a teach-out that meets the requirements of the approved teach-out plan.

We did not limit the provision to those who voluntarily withdrew from participation in the title IV programs. We believe that in those instances institutions are already permitted to continue to participate in title IV programs until the end of the approved teach-out plan or until such time that the institution is no longer providing a teach-out opportunity that meets the requirements of the teach-out plan.

We agree that it is important for the State authorizing agency and the accrediting agency, not the institution itself, to determine regulatory requirements. We believe this adds additional assurances that the commenter thought were important.

We do not agree with the commenter who believed that we need to provide for additional time beyond the 120 days after a decision to end participation in the title IV programs. We note that an institution executing an orderly closure has not ended its participation in the title IV programs by announcing a future closure. As an example, if an institution announces in July that it will operate for one more academic year and close at the end of its spring semester (which ends the following May), the institution continues to participate in the title IV programs and continues to receive title IV funds without the possible extension that may be available under this provision.

Changes: The Department has added language to clarify that, in the event that the State authorizing agency or accrediting agency has made the decision to withdraw, suspend, or terminate accreditation or authorization, the Secretary may consider granting the institution the 120-day teach-out opportunity only if the institution's State authorizing agency and accrediting agency agree that the cause for that negative action would not prevent the institution from conducting an orderly teach-out.

Comments: Several other commenters opposed the Department providing title IV funds to students to allow them to complete a teach out for up to 120 days after a decision to end an institution's title IV eligibility. These commenters expressed serious concern about loosening standards for schools, expecting taxpayers to spend additional money to fund them, and preventing students from obtaining closed school discharges.

Discussion: We disagree with the commenters who believe that the goal of this provision is to avoid closed school discharges. The Department reiterates that the Secretary may—but is not required to—allow the use of this option in the event that the State authorizing agency makes the decision to end authorization, or the accrediting agency makes the decision to terminate, suspend, or withdraw accreditation, or the Department makes the decision to end the institution's title IV participation, but only with the agreement of the State authorizing agency and the institution's accrediting agency. This maximum 120-day extension of participation would be provided only when the institution demonstrates the capacity to administer title IV funds appropriately and provide a high-quality teach-out experience. Additionally, students who meet the closed school discharge requirements, and who did not opt to participate in the teach-out, would still be eligible for a closed school loan discharge as would students who agreed to participate in the teach-out in instances in which the institution does not fulfill the requirements of the teach-out plan and meet the other requirements. A student who elects to participate in a teach-out, and then fails to complete the courses that were part of the student's teach-out agreement due to no fault of the institution, would not be eligible for a closed school loan discharge. The Department will not permit an institution to continue to participate in title IV after a decision has been made by the State authorizing agency, the accrediting agency, or the Department to remove authorization, accreditation, or to end title IV participation, without first confirming with the institution's accrediting agency and State authorizing agency that the institution has the capacity to conduct the 120-day teach-out, and that the reason for the withdrawal, termination, or suspension of State authorization or accreditation does not prevent the institution from completing an orderly teach-out.

Only those students who are enrolled will be able to participate in the teach-out either to complete their program or to transfer to a new institution. The institution would not be permitted to advertise or enroll new students during the 120-day period, in accordance with § 668.26(e)(1)(iii).

Changes: We have revised § 668.26(e)(1) to clarify that the provision for continued participation in title IV, HEA programs, for up to 120 days must precede the point at which the Secretary terminates the institution's program participation agreement; to clarify that a student may take credits for the purpose of transferring to another institution; and to provide other clarifying and conforming edits.

In addition, we have modified § 668.26(e)(2) to cross-reference the regulations that address misrepresentation to students by the institution regarding the teach-out plan or teach-out agreement.

Severability (§ 668.29)

Comments: None.

Discussion: We have added § 668.29 to clarify that if a court holds any part of the regulations for part 668, subpart B, invalid, whether an individual section or language within a section, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have added § 668.29 to make clear that the regulations are designed to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

Reporting and Disclosure of Information (§ 668.41)

Comments: Multiple commenters opposed the proposed changes to the job placement rate disclosures. Many of those specifically opposed the change that would require an institution to disclose any placement rate it calculates. Those commenters also opposed the elimination of a requirement that institutions identify the source, timeframe, and methodology of the job placement rates they do disclose. One commenter suggested that by changing the requirements, an institution is likely to cherry pick the best calculations to disclose to students. Additionally, that commenter said that Federal funds should not support students in academic programs related to employment requiring licensure if the program does not meet the licensure requirements in a given State. Another commenter who opposed changes to the job placement disclosure requirements stated that placement rates are the most commonly inaccurate or misleading advertisements for academic programs. Another commenter stated that the Department did not justify why an institution is not required to disclose any job placement rate calculated at the behest of a State authorizer or accrediting agency.

Discussion: The Department does not believe that the changes to the job placement rate disclosures will weaken protections to students. The Department believes that, if an institution uses a job placement rate in its advertising for students, or if an institution's accrediting agency or State requires the calculation of a job placement rate, the institution should be required to disclose those rates publicly. However, the Department agrees with the commenter that job placement rates are subject to inaccuracies and inconsistencies due to the reliance on self-reported data and the myriad methods used to calculate these rates. The Department believes that requiring institutions to disclose any job placement rates they calculate may cause institutions to simply calculate such rates less often or publish rates based on flawed methodologies or surveys that have an insufficient survey response rate. Required disclosure of any calculated job placement rate may yield unintended consequences, including diminishing institutions' willingness to examine ways to improve their program's placement rates or requiring the disclosure of data to students and prospective students that could be incomplete, invalid, or unreliable. The Department believes institutions should have the right to utilize internal data to diagnose and address program weaknesses and that this flexibility will benefit students.

The Department disagrees with the commenter who claims institutions will disclose only positive calculations to students. The Department believes that institutions will work to improve their programs when job placement rates reflect poor results. Improving programs will help students, who will benefit from stronger programs and better job options after completion.

There are other regulations that prohibit misrepresentation in advertising, including any misrepresentation of job placement rates used by an institution in advertisements.

The Department believes that the regulations at § 668.41(d)(5)(ii) that require an institution to identify the source of the information provided in job placement rates is duplicative of the requirement in § 668.41(d)(5)(i) that informs institutions that they may provide this disclosure using the institution's placement rate for any program based on data from State data systems, alumni or student satisfaction surveys, or other relevant sources and, as a result, is unnecessary. The changes made to this regulation do not prohibit institutions from providing students the calculation method they used to determine their published job placement rates.

The Department also disagrees with the commenter who stated that programs that do not lead to licensure or certification should not be eligible to participate in the title IV programs. Students may wish to enroll in programs with no intention of attaining licensure or certification in that field and should retain the right to do so as long as they are aware of the limitations of the program. The Department also notes that, in § 668.43(a)(14), the regulations require the disclosure of any placement rates calculated and reported to the institution's accrediting agency or State, if the agency or the State requires them.

Changes: None.

Institutional Information (§ 668.43)

Comments: Many commenters encouraged the Department to maintain strong disclosure requirements for institutions to help level the information playing field between students and institutions.

One commenter recommended that the Department require institutions to share all disclosures through ''appropriate publications, mailings or electronic media,'' rather than having disclosures be ''readily available.'' That commenter continued by stating that the Department should develop requirements that preclude institutions from burying disclosures on a website with a lengthy list of other disclosures.

Discussion: The Department thanks those commenters that encouraged the Department to maintain strong disclosure requirements for institutions. The Department continues to believe that providing disclosures on all programs that lead to licensure or certification, regardless of instructional modality, is the best way to ensure that all students are aware of the program's ability to prepare the student to sit for licensure or certification exams or qualify for licensure or certification.

While the Department would applaud any institution that exceeds the requirement for making these required disclosures, the Department remains committed to requiring only that institutions have them ''readily available.'' This is consistent with the statutory requirements for information dissemination activities in HEA section 485(a)(1).

Changes: None.

Comments: Multiple commenters expressed support for a disclosure related to transfer credit policies, suggesting that this change may encourage institutions to discontinue the practice of awarding transfer credit solely on the source of accreditation or tax status of the sending program or institution. The commenters stated that having credit transfer policy disclosures will provide transparency for students and help to ensure that institutions do not deny students a fair and fulsome evaluation of their earned academic credits.

One commenter recommended that the Department also require this disclosure to be made to part-time students. Another commenter suggested that all accredited institutions' academic credits should be transferable because accredited institutions must meet established standards for course content, quality, and rigor.

Discussion: The Department thanks those commenters who supported the Department's inclusion of a transfer credit disclosure. The Department views this requirement as necessary to ensure transparency to institutional policies related to transfer credits. The Department agrees that part-time students should also receive this disclosure.

The Department does not have the authority to require institutions to accept academic credits earned at an accredited institution because the authority for that determination resides with the institution. The Department of Education Organization Act of 1979 (Pub. L. 96–88) prohibits the Department from dictating such matters.

Changes: None.

Comments: Multiple commenters opposed the inclusion of a transfer credit disclosure, including one commenter who stated that it would be duplicative and unnecessary for an institution to include in its transfer credit policy the disclosure of any types of institutions from which they will not accept credit. One commenter stated that this disclosure would interfere with academic review of credits by faculty members and would result in students receiving a poorer quality education from their programs. Another commenter stated that the disclosure would strip institutions of the autonomy to independently determine the transferability of credit and force institutions to accept credit from institutions that the accepting institution finds to be academically substandard.

Discussion: The Department does not believe it is duplicative to require institutions to list any types of institutions from which the institution will not accept credits when also providing a description of the transfer credit policies. It is in the best interest of students to receive information about whether their credits will or will not transfer prior to attempting to transfer. Providing transparency to students regarding an institution's transfer credit policies will improve their ability to make informed enrollment decisions. In some cases, these disclosures will reduce the instances of students having to retake coursework or take additional courses after transferring to an institution that will not accept their previously earned credits. This requirement will not interfere with the academic review of a student's transfer courses or result in students who are less prepared academically. The Department is not requiring institutions to adopt a particular policy but is requiring institutions to disclose their policies and practices; it is vitally important for students to know if an institution categorically rejects credits based on the accrediting agency or tax status of other institutions.

This disclosure has no impact on the academic review of credits by faculty members, or the autonomy to independently determine the transferability of credit. Moreover, it does not force institutions to accept credit from institutions that the accepting institution finds to be, as the commenter noted, academically "substandard." The disclosure simply requires institutions to inform prospective students of any institutions or types of institutions from which it will not consider the transferability of earned academic credits.

Comments: Multiple commenters expressed support for the inclusion of a requirement that institutions disclose to students whether their educational programs meet the requirements for licensure across States so that a student will know if their investment in an educational program will lead to the career the student intends to pursue. One commenter stated that this provision would encourage institutions to conduct research regarding whether their programs fulfill requirements for State licensure, and that it is vitally important for students to have as much information on State licensure as they can obtain. Another commenter called this a "common-sense requirement" that will help prospective students from wasting money on programs that will not lead to licensure.

Discussion: The Department thanks those commenters who expressed support for the inclusion of licensure and certification disclosures. The Department continues to encourage institutions to determine if their programs meet licensure requirements and hopes that these regulations will encourage institutions to conduct such research.

The Department acknowledges, however, that, in some instances, it can be difficult to ascertain the requirements for licensure or certification in certain States, and that States sometimes have conflicting requirements, which means that the institution may not be able to make the determination in every State or develop programs that meet the requirements of all States.

Changes: None.

Comments: Many commenters opposed the Department requiring institutions to disclose if a program meets a State's licensure or certification requirements. One commenter noted that students have as much access to State licensure requirements as institutions do. Another commenter opined that requiring institutions to assess whether a program meets the educational requirements for licensure or certification for employment in an occupation (§ 668.43(a)(5)(v)) should be removed because the disclosure is not required by the HEA and it places an undue burden on institutions.

One commenter who opposed the inclusion of licensure disclosures asserted that many students do not want licensure and to require an institution to disclose this information creates undue burden to them for a reason that is not always the case. The same commenter opined that to obtain information on licensure and certification is difficult because the appropriate agencies do not always respond timely to inquiries. This commenter expressed concern that this disclosure requirement may discourage institutions from offering programs that lead to a career that requires licensure or certification because of the extra work this disclosure requirement would cause.

Another commenter suggested that instead of requiring institutions to determine whether their program meets the requirements for State licensure or certification, the Department should require the States to make it easier to find and follow the State's licensure requirements.

One commenter noted that the Department should reconsider its use of the student's location in determining the correct location for a licensure disclosure because a student may not plan to obtain licensure in the same location that the student is taking their courses. Another commenter requested that the Department go beyond requiring disclosure of whether programs meet State licensure requirements and require that all programs meet State licensure requirements in all States where the institution offers the program.

One commenter asked whether the Department means to permit an institution to continue to advertise a program based on whether the program would fulfill educational requirements for licensure or certification, but allow the institution to only make a disclosure to students on whether the institution had not made such a determination. The commenter was concerned that this would allow an institution to advertise misleading or inaccurate information about whether a program meets licensure or certification requirements.

One commenter asked for advice on how to successfully comply with this requirement when many boards will not confirm whether the program meets licensure requirements until individuals apply for licensure or certification. Another commenter asked for clarification on what programs provide licensure or certification and would be bound by the licensure and certification disclosures. The commenter asked whether an accounting program that meets the requirements to sit for the Certified Public Accounting exam only in some States the program is offered in, but does not meet the qualifications to sit for that exam in other States, should be held to the licensure and certification disclosure.

Another commenter encouraged the Department to retain the requirement for an institution to provide direct disclosures, especially related to when a program does not meet the licensure and certification requirements for a State.

Discussion: The regulations do not require an institution to make an independent determination about whether the program it offers meets the licensure or certification requirements; the regulations provide that an institution may disclose that it has not made a determination as to whether a program's curriculum meets a State's educational requirements for licensure or certification. Including that option provides sufficient flexibility so that an institution need not incur any additional burden.

The Department agrees that students may have the same access to State licensure and certification requirements as an institution; however, students may not have access to the requisite information to determine whether the program meets those requirements without assistance from program experts at the institution.

The requirements in § 668.43(a)(2) are for all programs that lead to licensure or certification, or that should lead to licensure or certification, regardless of whether these programs are offered through distance learning, through correspondence courses, at brick-and-mortar institutions, or through another modality.

While the Department believes that students who enroll in programs that do not meet licensure and certification requirements for a State could still be title IV eligible, the Department also believes that an institution should disclose this information to all individuals who enroll in these programs so that they are making an informed enrollment choice. The Department does not believe that this disclosure will dissuade institutions from offering legitimate academic programs that may lead to State licensure or certification since, absent confirmation of the program's alignment with licensure requirements, the institution can simply notify a student that they have not determined whether its program meets those requirements. If an institution opts to not confirm whether a program meets the requirements for a State because it enrolls a small percentage of students in that State, the institution will remain compliant by disclosing that it has not made a determination.

The Department understands that students may not plan to obtain licensure where they have established their location of record with the institution. However, the institution has an obligation to make this disclosure to students based on the students' current location. Additionally, we believe the term ''located'' will minimize confusion related to State legal residence requirements and is the term most commonly used by States in policies related to distance education.

The Department requires institutions to only advertise true and factual statements about their programs. While the Department does not preclude an institution from advertising a program for which it has not made a determination regarding the program's alignment with State licensure or certification requirements, the Department expects that institutions will accurately and truthfully provide that information on the required disclosure.

Regarding the timing of these disclosures, the Department expects that the institution will provide this disclosure before a student signs an enrollment agreement or, in the event that an institution does not provide an enrollment agreement, before the student makes a financial commitment to the institution. The Department further expects that an institution will determine a student's ''location'' based on its published policies, and that the location may include the address provided by the student at the time of enrollment or at any point when the student notifies the institution in writing of a change in location to a new State.

The Department does not believe these regulations will limit the States in which an institution may recruit students since the institution can simply state that it has not determined whether the program meets State licensure or certification requirements in that State. However, the Department concedes that institutions that do make that determination may have a marketing advantage, since it might better inform student choice.

The Department notes that these regulations require direct disclosures to students regarding licensure and certification as described in § 668.43(c) and has not removed that requirement entirely; rather, the Department has clarified that this direct disclosure may be through email or other forms of electronic communication.

Changes: None.

Comments: Another commenter stated that they support this requirement but requested additional time for institutions to become compliant. Multiple commenters requested a delay of at least three years after the effective date of the regulations and contended that, since ''brick-and-mortar'' programs were not previously subject to this type of requirement, it would not be feasible to comply by July 1, 2020. Another commenter asked whether an institution must comply with both the current regulations, effective as of July 1, 2018, or the new regulations, which will become effective on July 1, 2020. The commenter argued that the creation of two different processes to comply with two separate regulations would be extremely burdensome to the institution.

Discussion: It is the Department's view that institutions do not require additional time to become compliant with the licensure or certification disclosure since an institution can comply with this disclosure requirement by informing students that it has not made a determination about whether its programs meet the licensure or certification requirements for a State. If the institution later makes a determination that its program does not meet a State's requirements for licensure or certification, it must disclose this fact. Therefore, the Department believes institutions can comply with this provision by July 1, 2020. Until July 1, 2020, an institution must comply with the disclosure requirements of the State

Authorization regulations published on December 19, 2016.

Changes: None.

Comments: Multiple commenters were supportive of the use of the term ''location'' when used for disclosures on licensure or certification, but asked for clarification on when, specifically, the Department considers an individual to be enrolled at the institution. One commenter also asked for clarification on what is meant by ''formal receipt of change of address by a student'' as it pertains to this disclosure. Another commenter stated that he supported the Department's willingness to allow institutions to use their own policies to determine a student's location.

Discussion: The institution determines the student's location at the time of initial enrollment based on the information provided by the student, and upon receipt of information from the student that their location has changed, in accordance with the institution's procedures. Institutions may, however, develop procedures for determining student location that are best suited to their organization and the student population they serve. For instance, institutions may make different determinations for different groups of students, such as undergraduate versus graduate students.

Changes: None.

Comments: One commenter strongly supported the Department's proposal to require an institution to disclose information about teach-out plans.

Discussion: The Department appreciates the support of the commenter and believes that requiring disclosures about an institution's teach-out plans and why an accrediting agency is requiring an institution to maintain one is an important disclosure for a student to receive.

Changes: None.

Comments: Multiple commenters raised concerns about the lack of specificity regarding what ''actions'' among the many actions that could be taken against an institution would require notification under the proposed rule, and what kind of ''notice'' would be sufficient to comply with this regulation.

In particular, one commenter stated that there are several types of notice, all of which might be legally sufficient depending on the circumstances, but nevertheless would reflect different approaches by institutions to meeting the standard.

Several other commenters, in addition to asking what constitutes sufficient notice, asked for greater clarity concerning which actions rise to the level of requiring notification. Another commenter pointed out that damage could be done to an institution as a result of a notification requirement, if the institution is required to supply notice of an investigation, action, or prosecution by a law enforcement agency before the investigation is complete and concerns are substantiated, and that such damage could be unjustified to the extent that the concerns are not ultimately substantiated. These commenters did not directly oppose the requirement that institutions disclose adverse actions against them, as proposed in § 668.43(a)(20), but instead sought clarification regarding which actions rise to the level that requires notice.

One commenter noted the general burden on institutions given the number of disclosures already required of institutions.

Other commenters supported the inclusion of disclosures related to investigations conducted by a law enforcement agency for issues related to academic quality, misrepresentation, or fraud. One commenter sought to ensure that the proposed rulemaking includes actions from law enforcement agencies, attorney general offices, or state authorization entities so that all investigations that could impact an institution's state authorization are included.

Discussion: As a matter of first principles, the Department believes a student is entitled to transparency and robust disclosure of pending legal actions by law enforcement agencies but realizes unwarranted allegations could impact the student's ability to complete their education or diminish the value of their education. The Department believes that legal actions that bear on an institution's accreditation, State authorization, or continuing participation under title IV are the types of legal actions that have the greatest potential to impact students. Therefore, by this rule, the Department seeks to ensure that these categories of legal actions are fully disclosed to students.

The Department recognizes, in light of comments that it received, that the disclosure language provided in this section of the NPRM lacks the necessary specificity to guide institutions as they grapple with the practical challenges of determining which actions should result in notification and how that disclosure should be made. The use of terms such as ''actions'' and ''other severe matter[s]'' would result in unnecessary and inappropriate ambiguity.

The Department agrees that it must more clearly define which categories of ''actions'' are subject to a notification requirement. The Department also agrees with commenters that notification requirements that sweep in unproven allegations could cause reputational and financial injury to an institution, prevent a current student from completing their education, deter new enrollments in or transfers to the institutions, or discourage students from enrolling in a program that could benefit them. Disclosure of a government investigation that might not even lead to allegations of misconduct against an institution could create significant negative consequences, including for students and alumni.

Therefore, we are revising the regulations to eliminate investigations from the notification requirement, and better define what types of legal actions do require disclosure. Our goal is to ensure that students have access to information about pending legal proceedings, including those resulting from allegations of fraud or misrepresentation. This information may have the greatest potential to impact a student's education—including on their ability to make an informed choice about which school to attend, to complete a degree or program at a school they have chosen, or to subsequently benefit from an earned credential, without its value being inappropriately undermined by as-yet-unproven allegations. To strike this balance, in the final rule we provide that institutions must disclose only pending enforcement actions or prosecutions by law enforcement agencies in which a final judgment against the institution, if rendered, would result in an adverse action by an accrediting agency, revocation of State authorization, or limitation, suspension, or termination of eligibility to participate in title IV.

Carving out the fact of investigations also protects students and graduates from having the value of their education or their chances of obtaining employment diminished merely because their educational institutions were subject to government investigations. While notification of pending enforcement actions or prosecution by a law enforcement agency could be useful to students to avoid enrolling at institutions that may be guilty of misrepresentation, the Department must balance this with damage that potential students could suffer if unfounded allegations against an institution deter students from enrolling in a program that would otherwise benefit them. In addition, the Department must balance the need to protect students against fraud and misrepresentation with the need to ensure that the value of a student's credential and their future employability are not unnecessarily diminished by false allegations against the institution.

This disclosure requirement, although it involves only disclosure to students and not reporting to the Secretary or a trigger for a letter of credit, mirrors the approach the Department took in its final 2019 Borrower Defense to Repayment (BD) rule. In the 2019 BD rule, in eliminating some mandatory triggers for letters of credit based on pending claims and non-final judgments, the Department recognized the inappropriateness of imposing sanctions upon an institution based on unproven allegations. The Department also learned, as a result of the 2016 BD rule, that requiring institutions to report to the Department all legal actions against them, without regard for materiality, created undue regulatory burden much larger than the level of burden estimated in the final 2016 BD rule. Relying on allegations or claims made against an institution to require an institution to provide a letter of credit also invites abuse and denies institutions due process by placing undue weight on unsubstantiated claims. Here, the Department is requiring institutions to focus on specific types of legal action—enforcement actions and prosecutions—by a specific set of governmental entities—law enforcement agencies—that could have the most significant negative impact on students, therefore enabling them to make informed enrollment decisions.

In this final regulation, disclosure is required only for enforcement actions and prosecutions, including those resulting from allegations of fraud or misrepresentation, where the institution can discern (based on the nature of the allegations and the progress of the case) that, if a final judgment is rendered against the institution, the institution's accreditor would take an adverse action against the institution, its State authorization would be revoked, or its title IV participation would be limited, suspended, or terminated. We have removed actions relating to ''academic quality'' from the list of actions requiring disclosure since accreditors and State authorizers are charged with making quality determinations, not State or Federal law enforcement agencies. Also, consistent with the 2019 BD rule, the Department is limiting the risks of abuse and denial of due process to institutions—by excluding the mere fact that an institution is under investigation from the disclosure requirement.

We appreciate those commenters who agreed with the Department's inclusion of a disclosure requirement but asked that we clarify what a legally sufficient disclosure would look like. The Department agrees that greater clarity is necessary; however, this provision is part of a long list of items that must be disclosed by the institution and made readily available to enrolled and prospective students. The Department provides no additional guidance regarding how it must make those disclosures. Many institutions meet these requirements by including these disclosures on their website or in their catalog.

Changes: In response to comments, we have revised § 668.43(a)(20) to provide that an institution must disclose enforcement actions or prosecutions by law enforcement agencies that, upon a final judgment, would result in an adverse action by an accrediting agency, revocation of State authorization, or suspension, limitation or termination of eligibility to participate in title IV. Investigations that have not progressed to pending enforcement actions or prosecutions need not be disclosed—regardless of their subject matter.

Comments: One commenter supported the Department's proposal to require institutions to disclose written arrangements in the program description in instances in which they are used to engage a non-accredited entity in providing portions of the program.

Two commenters supported the Department's proposal to disclose the criteria used by institutions when evaluating prior learning experience stating that it is important to ensure that credits awarded based on a prior learning assessment are based on academic quality, which benefits students and the public. Another commenter noted that this disclosure can help improve academic completion while reducing education costs.

Discussion: The Department thanks the commenter for their support for disclosing written arrangements included in a program's description, as proposed in § 668.43(a)(12). The Department continues to believe that standardizing the location of this disclosure will provide uniform information to all students and provide them with easily accessible and discernable information in which to make enrollment decisions.

The Department also thanks the commenters for their support for the requirement that institutions disclose their policies for evaluating and assigning credit based on a student's prior learning experience, as outlined in § 668.43(a)(11)(iii). The Department continues to believe that this information is important to inform student choice since students often learn only after enrolling at a new institution that credits they believed they would earn through prior learning assessment are no longer being considered or granted. In addition, institutions should publish their policies regarding the acceptance of credits in transfer that were awarded through prior learning assessment. The Department believes this will also encourage institutions to potentially save students and taxpayers time and money.

The Department disagrees with the characterization that it removed the requirements of disclosing a complaint process to students. To the contrary, the Department continues to require institutions to provide students with information about how to file a complaint against the institution with a relevant State agency. However, the regulations no longer require an institution to publish the complaint processes for both the State in which the student is located and the State in which the institution is located, as long as it discloses at least one point of contact for filing student complaints.

The Department's final regulations require institutions to provide students or prospective students with contact information for filing complaints with its accrediting agency and with at least one relevant State agency or official, either in the State in which the institution is located or in the State in which the student is located, or a third party identified by a State or a State reciprocity agreement, with whom the student can file a complaint.

Changes: None.

Institutional Disclosures for Distance or Correspondence Programs (§ 668.50)

Comments: Many commenters supported removing the requirements of § 668.50 and proposing similar requirements in § 668.43(b) because they supported providing disclosures to all students, regardless of the program's mode of delivery.

One commenter opposed removal of § 668.50 stating that the Department was deleting most of the disclosure requirements for distance education programs. They further claimed that we only moved two disclosure requirements to § 668.43.

One commenter disagreed with the explanation provided in the NPRM that the deletion of refund policies in § 668.50 eliminated a duplicative requirement already required under § 668.42(a)(2). The commenter stated that § 668.42(a)(2) does not require the disclosure of refund policies.

One commenter stated they disagreed with statements made regarding the requirements included in § 668.50. Specifically, they disagreed that the requirement to disclose adverse actions taken by a State or accrediting agency would be unnecessary. Instead, the commenter stated that these actions should be disclosed because those actions would generally lead to the program's ineligibility to participate in the title IV, HEA programs. The commenter stated that the definition of ''adverse actions'' differed depending on the accrediting agency and that some of those actions would be at the level of information gathering, or probation, which would not end in the loss of title IV eligibility. Another commenter provided similar thoughts by stating that an institution required to supply notice of an investigation, action, or prosecution may damage the institution if it must provide that notification prior to the completion of an investigation. However, another commenter recommended that the Department keep the required disclosure on adverse actions from accrediting agencies because they may directly affect a student's ability to obtain a professional license. One commenter opposed the removal of the requirement that an institution disclose adverse actions taken by an accrediting agency because there are often times when an accrediting agency takes an adverse action that stops short of stripping an institution of its title IV eligibility and that students deserve to know when an institution fails to meet the very standards that makes it eligible for title IV participation. That same commenter also requested that the Department define the term ''adverse action'' from a State rather than removing the requirement.

One commenter voiced support for a requirement to disclose adverse actions taken by a State or accrediting agency.

Discussion: The Department appreciates the support of those who supported removing § 668.50 and replacing those requirements with one that applies to all programs that lead to licensure or certification (or should lead to licensure or certification), regardless of the delivery modality of those programs. The Department believes this will provide all students with valuable information and necessary protections. However, the Department notes by moving disclosures from § 668.50, which only applied to distance education programs and correspondence courses, to § 668.43, which applies to all title IV eligible programs at institutions of higher education, the Department broadened the scope of these requirements so that more students can make informed enrollment decisions.

The Department agrees with and thanks the commenter that noted it made an incorrect reference to current regulations requiring an institution to disclose refund policies. The Department meant to cite § 668.43(a)(2) instead of § 668.42(a)(2) as the section which requires institutions to disclose their refund policies. Section 668.43(a)(2) requires that institutions make readily available to enrolled and prospective students any refund policy with which the institution must comply for the return of unearned tuition and fees, or other refundable portions of costs paid to the institution. This covers the requirements of § 668.50(b)(6), which required institutions to disclose refund policies for the return of unearned tuition and fees with which the institution must comply under the laws of any State in which enrolled students reside.

The Department also notes that disclosures related to adverse actions are now described at § 668.43(a)(20), which requires an institution that an institution must disclose enforcement actions or prosecutions by law enforcement agencies that, upon a final judgment, would result in an adverse action by an accrediting agency, revocation of State authorization, or suspension, limitation or termination of eligibility to participate in title IV. Investigations that have not progressed to pending enforcement actions or prosecutions need not be disclosed—regardless of their subject matter. We respond to further comments about adverse actions in that section.

The Department has retained the language in § 602.24(c)(8)(ii) that an agency must not permit an institution to serve as a teach-out institution, if it is under investigation relating to academic quality, misrepresentation, fraud, or other severe matters by a law enforcement agency. We would consider an allegation or finding of criminal conduct, for example, to constitute a severe matter. The Department retains this language because of the contractual relationship between the closing institution and the teach-out institution, as well as the fact that the teach-out agreement must be approved by the accrediting agency, all of which give the teach-out institution the appearance of a preferred and streamlined option for students, and the teach-out institution benefits from an influx of new students. The Department has determined that to enjoy that benefit, the teach-out institution must not be subject to any ongoing investigation, as described in § 602.24(c)(8)(ii). The Department believes that teach-out agreements constitute a unique and limited circumstance and, accordingly, has retained the consensus language excluding institutions that are subject to investigation as teach-out institutions.[27]

The Department stands by its assessment that disclosures of adverse actions taken by accrediting agencies often came too late to inform student enrollment decisions. As such, the final regulations at § 668.43(a)(19) require that if an accrediting agency requires an institution to maintain a teach-out plan, the institution must disclose the reason that the accrediting agency required such a plan. The Department believes this will assist students who are considering enrollment in programs where institutions may be in danger of closing or losing accreditation by informing them of this risk. On the other hand, some students may find teach-out plans to be reassuring on the basis that, should an institution close, there are options available to them to complete their programs.

The institution is not precluded, as is also the case in the 2016 State authorization regulations, from providing information to students about any investigation, action, or prosecution and any disagreement that the institution has with the validity of these allegations. While the Department understands that adverse actions from an accrediting agency may impact a student's ability to obtain professional licensure, the Department believes the proposed disclosure in § 668.43(a)(19) addresses this concern and broadens it to accommodate all programs, not just those offered through distance or correspondence education. The Department emphasizes that, similar to requiring a letter of credit, requiring a teach-out plan does not necessarily mean that an institution will close, lose its accreditation, or lose its title IV eligibility; however, the teach-out plan will provide additional protections to students and taxpayers in the event that the institution does lose accreditation, State authorization, or title IV eligibility. The Department believes that § 668.43(a)(20) provides appropriate protection to students when the institution's or program's accrediting agency takes negative action, and provides clarifying details about the kinds of adverse actions that must be disclosed. However, in moving the requirement to § 668.43, the Department requires institutions to provide the

[27] *Note:* Nothing in § 602.24(c)(8)(ii) or anything in this document burdens, limits, or impedes the Department's determinations in, or interpretations of, the Institutional Accountability regulations at 84 FR 49788.

disclosure to students enrolled in all programs, not just distance education or correspondence programs.

The Department thanks the commenter that supported the Department's changes to § 668.50.

Finally, we note that the amendatory instruction to remove § 668.50 was unintentionally omitted from the NPRM.

Changes:

Comments: None.

Discussion: As described above, we believe that the substance of current § 668.50 should be removed. In its place, we have added language to clarify that, if any part of the regulations for part 668, subpart D, whether an individual section or language within a section, is held invalid by a court, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have revised § 668.50 to remove the current text and added, in its place, text that clarified that the regulations are designed to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

Severability (§ 668.198)

Comments: None.

Discussion: We have added § 668.198 to clarify that if a court holds any part of the regulations for part 668, subpart M, invalid, whether an individual section or language within a section, the remainder would still be in effect. We believe that each of the provisions discussed in this preamble serve one or more important, related, but distinct, purposes. Each provision provides a distinct value to the Department, the public, taxpayers, the Federal government, and institutions separate from, and in addition to, the value provided by the other provisions.

Changes: We have added § 668.198 to make clear that the regulations are designed to operate independently of each other and to convey the Department's intent that the potential invalidity of one provision should not affect the remainder of the provisions.

Executive Orders 12866, 13563, and 13771

Regulatory Impact Analysis

Under Executive Order 12866, it must be determined whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities in a material way (also referred to as an ''economically significant'' rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in the Executive order.

This final rule is an economically significant action and will have an annual effect on the economy of more than $100 million because the proposed changes to the accreditation process could increase student access, improve student mobility, and allow for the establishment of more innovative programs, including direct assessment programs, that may attract new students. According to the Department's FY 2020 Budget Summary, Federal Direct Loans and Pell Grants accounted for almost $124 billion in new aid available in 2018. Given this scale of Federal student aid amounts disbursed yearly, even small percentage changes could produce transfers between the Federal government and students of more than $100 million on an annualized basis.

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as a ''major rule,'' as defined by 5 U.S.C. 804(2).

This final rule is considered an E.O. 13771 deregulatory action. We estimate that this rule will generate approximately $16.0 million in annualized net PRA costs at a 7 percent discount rate, discounted to a 2016 equivalent, over a perpetual time horizon. While there will be some PRA burden increase, we believe the greater effect of this regulation is to allow for additional entrants or enhanced competition in the postsecondary accreditation market and to promote innovation in higher education and it is deregulatory.

As required by Executive Order 13563, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action, and we are issuing these final regulations only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that the regulations are consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, or Tribal governments in the exercise of their governmental functions.

In accordance with the Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs associated with this regulatory action are those resulting from statutory requirements and those we have determined as necessary for administering the Department's programs and activities.

In this regulatory impact analysis, we discuss the need for regulatory action, the potential costs and benefits, net budget impacts, assumptions, limitations, and data sources, as well as regulatory alternatives we considered.

Elsewhere in this section, under *Paperwork Reduction Act of 1995,* we identify and explain burdens specifically associated with information collection requirements.

Need for Regulatory Action

These final regulations address several topics, primarily related to accreditation and innovation. The Department issues these regulations primarily to update the Department's accreditation recognition process to reflect only those requirements that are critical to assessing the quality of an institution and its programs and to protect student and taxpayer investments in order to reduce unnecessary burden on institutions and accrediting agencies and allow for greater innovation and educational choice for students.

In addition, these final regulations are needed to strengthen the regulatory triad by more clearly defining the roles and responsibilities of accrediting agencies, States, and the Department in oversight of institutions participating in title IV, HEA programs. These final regulations revise the definition of ''State authorization reciprocity agreement'' to clarify that such agreements cannot prohibit any member State of the agreement from enforcing its own general-purpose State laws and regulations outside of the State authorization of distance education.

Another area addressed in these final regulations is the definition of ''religious mission'' as a published institutional mission that is approved by the governing body of an institution of postsecondary education and that includes, refers to, or is predicated upon religious tenets, beliefs, or teachings. These final regulations require accrediting agencies to consistently apply and enforce standards that respect the stated mission of the institution, including religious mission, and to not use not use as a negative factor the institution's religious mission-based policies, decisions, and practices in the areas covered by § 602.16(a)(1)(ii), (iii), (iv), (vi), and (vii).

Summary of Comments on the RIA

A number of commenters raised points about the analysis of these regulations in the NPRM. The Department summarizes and responds to comments related to the RIA here.

Comments: One commenter noted that the expense incurred by their accrediting agency to submit a recognition application was not unreasonable under the current regulations and while they agreed generally with the review process changes, they did not see the proposed changes as entirely justified.

Discussion: The Department thanks the commenter and welcomes the feedback. The Department believes the changes are justified for the numerous reasons outlined in the NPRM and elsewhere in this document. While the Department appreciates that some accrediting agencies can manage the existing burden, other agencies are struggling to do so or, at the very least, could redirect resources away from paperwork burden and towards direct work with the institutions or programs the agency oversees. The Department has received petitions for renewal of recognition that exceed 60,000 pages. Also, these new regulations provide staff the opportunity to randomly select files to review, and to perform oversight that includes a more representative sample and variety of documents—and not only those that an agency decides to submit.

The Department also, as stated elsewhere, believes that a number of the current regulations prevent competition, create unnecessarily high barriers to entry for new accrediting agency, and make it difficult for institutions to effect the radical changes necessary to reduce cost and improve outcomes through educational innovations. The current regulations similarly do not differentiate between high-risk activities that demand greater attention, and low-risk activities that do not justify distracting agency decision-making bodies from more critical concerns related to ensuring educational quality. In addition, these regulations seek to reduce unnecessary delays in developing and implementing curricular and other changes in order to meet employer needs. These regulations also encourage institutions to participate in orderly teach-outs, thus providing more students with the opportunity to complete their program or transition to a new institution should their current institution close. Finally, these regulations eliminate the distinction between students enrolled in distance learning programs that lead to licensure and ground-based programs focused on the same by ensuring that all students—regardless of instructional modality—understand whether the institution's programs will meet educational requirements for a graduate to become licensed and work in their field in a given State.

Changes: None.

Comments: One commenter stated that the Department failed to provide any legal, policy, factual, or cost-benefit analysis for the new definition of ''religious mission'' or the exemptions to accrediting agency standards. They point out that the definition is not mentioned in the RIA and no potential costs are cited if an institution claims exemption from any of a wide range of accreditation standards. Furthermore, there is no estimate of how many institutions may assert exemptions from accrediting standards based on the definition or from what types of standards they may assert exemptions.

Discussion: The Department appreciates the commenter pointing out the need for discussion of the definition of religious mission and the associated impacts.

Changes: We have added discussion of the definition of ''religious mission'' in the Costs, Benefits, and Transfers section.

Comments: One commenter contended that the Department did not present any evidence that the current regulations have created any substantive barriers to innovation and noted that, in fact, as an example, distance education enrollment has grown significantly over the past two decades under the oversight of accrediting agencies. The commenter also contended that it may be desirable to have certain barriers in place to promote quality and protect students.

The same commenter stated that the Department is greatly underestimating the cost of these final regulations, citing the $3.8 billion estimate, with the reported range of estimated Pell Grant increases from $3.1 billion to $4.5 billion as too low and the increase in loan volume and Pell Grant recipients of at most two percent by 2029 as also too low. The commenter alluded to historical evidence regarding the cost of innovation, citing the change from 1997 to 1998—prior to passage of a demonstration project that allowed institutions to move entirely online—to Fall 2017, after the law changed to permit online-only institutions. The commenter stated that according to NCES data, enrollment in distance education programs during this period increased tremendously, from 1.3 million to over 6.5 million students.

The commenter claimed that the estimated two percent increase reflected in the NPRM is likely a ''significant underestimate'' given the potential for new accrediting agencies, new providers, and new programs eligible for Federal funding. Also, according to the commenter, the Department failed to adequately consider costs associated with reduced oversight. The commenter stated that these final regulations are likely to greatly increase borrower defense claims that would arise from institutions operating without strong oversight from accrediting agencies and continuing to operate under new ownership after closure, and that, because the Department has not yet issued new final borrower defense regulations, it must estimate these costs based on the 2016 borrower defense regulations currently in effect. The commenter further noted that the added costs from borrower defense claims would be partially offset by fewer closed school discharges resulting from fewer institutions closing.

The commenter stated that under these final regulations the bar would be lower for entry to new accrediting bodies and therefore the Department should assume an increase in new accrediting agencies.

The commenter provided Department of Labor (DOL) data showing that DOL proposed to create ''standards recognition entities'' (SREs) that would act like accrediting agencies to approve apprenticeship programs. DOL estimates that it would receive 300 applications of which 100 would be totally new applicants without any experience in the area. The commenter believed the Department should assume a more significant increase in applicants for Department recognition than it does as well as institutions that would be seeking sources of funding such as Title IV.

The commenter stated that the Department's estimate of $3.8 billion for regulatory changes that affect the entire higher education landscape is less than the $6.2 billion it projects from rescinding gainful employment regulations that affect proprietary school programs and non-degree programs at public and nonprofit institutions that represent only a portion of the higher education landscape.

The commenter asserted that the Department should revise its estimates substantially upwards.

Discussion: The Department believes that the final regulations strike the right balance between the goals of encouraging innovation and ensuring accountability while providing sufficient oversight of accrediting agencies and institutions and protecting students, taxpayers, and the Federal government.

With respect to the increase in distance education dating back to 1997, the Department acknowledges that the impact of the expansion of distance education on total number of enrollments was significant as technological advances reduced barriers to entry for students who could not otherwise participate in opportunities offered by traditional ground campuses. The Great Recession further contributed to enrollment growth as high unemployment drove more individuals to participate in postsecondary education. In addition, regulatory changes that eliminated policies that once limited growth on line by the growth of programs on the ground also contributed to significant growth of enrollments in online education. While the proportion of enrolled students who take some or all classes online is increasing, the total number of students enrolled is shrinking. This suggests that how students receive education may continue to change, and this regulation could encourage even greater shifting of students to online modalities. Enrollments are shrinking at many institutions, including most online institutions.[28] [29] The Department also notes that the internet itself and the world wide web were only becoming popular in the mid-1990s and, according to many sources, including the National Science Foundation,[30] by 1995, the internet was fully commercialized in the United States when the National Science Foundation Network was decommissioned, removing the last restrictions on use of the internet to carry commercial traffic.

In fact, according to a research article published in the journal *Science,* ''The internet's takeover of the global communication landscape was almost instant in historical terms: It only communicated 1% of the information flowing through two-way telecommunications networks in the year 1993, already 51% by 2000, and more than 97% of the telecommunicated information by 2007.'' [31] So, a substantial amount of growth in all online activity in the 1990s is attributable to the new internet and world wide web activity taking place in the mid-1990s. Therefore, a comparison between the vast innovation taking place in the online technology arena over a 20-year period with any innovation evolving as a result of these regulations is not an ''apples-to-apples'' comparison.

The Department believes that its financial aid estimates related to these regulations are not ''greatly underestimated'' as the commenter asserts. In fact, the Department realizes that any cost estimates relating to regulations of this type carry a strong element of speculation since many other variables are at play over the budget window from 2020 to 2029. And the Department also was cognizant of the lower estimate made concerning the lifting of the 50 percent rule related to institutional online courses, which, among other issues, underestimated the number of adult learners who wanted to enroll in postsecondary education if they could do so without quitting their jobs or enrolling in campus-based programs.

Therefore, the Department provided three scenarios incorporating low, medium, and high assumptions consistent with regulatory guidelines. And, the Department does estimate that under the high scenario, additional higher educational costs of $4.5 billion are possible. While there is no definitive way to test these assumptions in the future, the Department does not accept the commenter's assertion that the Department is reducing accrediting agency oversight and weakening agency oversight of institutions which will result in significantly higher costs. The Department does not accept the premise that it is lowering the bar to accrediting oversight and reducing Federal responsibility. Given this different prediction about the outcome of these final regulations compared to the commenter, we do not anticipate a significant increase in borrower defense claims from these final regulations. The subsidy cost associated with the estimated increase in volume for these final regulations was based on the President's Budget FY 2020 baseline which included the implementation of the 2016 Borrower Defense rule and we do not believe these final regulations will necessarily lead to an increase in bad actors or conduct that would give rise to borrower defense claims under any version of that regulation. We also do not expect a substantial difference in the number of closed schools from these final regulations, so we do not estimate any savings from reduced closures tied to fewer accrediting agency actions at this time.

Rather, as discussed earlier in the preamble, the Department views these regulations as enabling accrediting agencies and institutions to be nimbler and more responsive to changing economic conditions and workforce demands. The Department believes that the regulations are in the best interests of both students and taxpayers and will enable institutions to improve the quality of education.

The Department appreciates the comments regarding DOL's recent NPRM to establish new Standards Recognition Agencies (SRAs). While there are similarities between SRAs and accrediting agencies, those similarities are limited to the need to evaluate quality based on a set of published standards or metrics. It is also important to note that SRAs are likely to include industry trade associations and other private-sector entities that may pay higher salaries or have higher costs of operating and decision-making based on the structure of these entities and salary trends in certain industries. DOL's cost estimates for establishing SRAs have no bearing on the Department's cost estimates related to reducing unnecessary regulatory burden, encouraging institutions to close in orderly fashions rather than precipitously, or allowing new agencies to enter a field that has a well-established history and a large number of existing participants. The Department believes it would be inappropriate to apply DOL's assumptions for the cost of creating a new quality assurance system to our regulations, which are designed

[30] *www.nsf.gov/news/special_reports/cyber/internet.jsp.*

[31] ''The World's Technological Capacity to Store, Communicate, and Compute Information,'' Martin Hilbert and Priscila López (2011), *Science,* 332(6025), pp. 60–65, available at: *martinhilbert.net/WorldInfoCapacity.html.*

to increase competition and refocus accrediting agency activities on educational quality and the student experience.

The estimates for these regulations do not assume loan performance will decline due to the rescission of the gainful employment rule. Although the gainful employment regulations primarily affect a limited number of institutions, their impact could have been significant, as they tied ineligibility to the debt-to-earnings metric. However, with only one year of GE data available, it is hard to speculate on the long-term impact of the GE regulations and whether program closures would have reduced the total number of students enrolled, or simply shifted where these students enrolled or which programs they pursued. On the other hand, although these regulations will affect all sectors, we believe their impact will be more limited.

Changes: None.

Costs, Benefits, and Transfers

As discussed in the NPRM, the Department is amending the regulations governing the recognition of accrediting agencies and institutional eligibility and certain student assistance general provisions, as well as making various technical corrections. A number of clarifying changes were made in these final regulations, including updates to the definitions of terms including State authorization reciprocity agreements, teach-out, and compliance report; noting that prior approval is required for an aggregate change of 25 percent or more of the clock hours, credit hours, or content of a program since the agency's most recent accreditation review; and requiring disclosure of negative actions taken by an accrediting agency, provided that an institution need not disclose allegations, lawsuits, or legal actions taken against it unless the institution has admitted guilt or there has been a final judgment on the merits. Additionally, we have made it clear that title IV participation may be extended for 120 days only after a decision to end participation has been made, but prior to the termination of accreditation, State authorization, or the program participation agreement. All of these changes are detailed in the Analysis of Comments and Changes section of this preamble and none are expected to significantly change the net budget impact or cost and benefits of the final regulations to students, institutions, or accrediting agencies.

These final regulations will affect students, institutions of higher education, accrediting agencies, and the Federal government. The Department expects students, institutions, accrediting agencies, and the Federal government will benefit as these final regulations will provide transparency and increased autonomy and independence of agencies and institutions. We also intend for these final regulations to increase student access to postsecondary education, improve teach-outs for students at closed or closing institutions, restore focus and clarity to the Department's agency recognition process, and integrate risk-based review into the accreditation recognition process.

The Department of Education Organization Act of 1979 (Pub. L. 96–88) prohibits the Department from intervening in institutional decisions regarding curriculum, faculty, administration, or academic programs of an institution of higher education. Instead, Congress assigned accrediting agencies the role of overseeing the quality of institutions and academic sufficiency of instructional programs. The Secretary recognized 53 accrediting agencies as of April 2019 as shown on the Department's financial aid accreditation websites.[32] In addition, there were four State approval agencies that are also identified as title IV gatekeepers for the approval of postsecondary vocational education and five State approval agencies for the approval of nurse education (for non-title IV, HEA purposes).

The 53 accrediting agencies are independent, membership-based organizations that oversee students' access to qualified faculty, appropriate curriculum, and other support services. Of the 53 accrediting agencies recognized by the Secretary, 36 accredit institutions for title IV, HEA purposes and 17 solely accredit programs. While postsecondary accreditation is voluntary, accreditation from either a nationally recognized accrediting agency or State approval agency is required for an institution to participate in the title IV, HEA programs. One goal of our negotiated rulemaking was to examine the Department's accreditation regulations and processes to determine which are critical to assessing the quality of an institution and its programs and to protecting student and taxpayer investments. In negotiating these regulations, negotiators reached consensus on the processes that accrediting agencies should follow and understood that certain tradeoffs would be inevitable. Providing greater flexibility in how agencies approach the accrediting process and promoting innovative practices while reducing administrative burden and streamlining operations are key objectives of these final regulations.

[32] *https://ope.ed.gov/dapip/#/home.*

The regulatory impact on the economy of these final regulations centers on the benefits of, and the tradeoffs associated with, (1) streamlining and improving the Department's process for recognition and review of accrediting agencies and (2) enabling accrediting agencies to exercise greater autonomy and flexibility in their oversight of member institutions and programs in order to facilitate agility and responsiveness and promote innovation. Although we estimate here the marketplace reaction by accrediting agencies, students, institutions, and governmental entities to such regulatory changes, generally, there is little critical data published on which to base estimates of how these final regulations, which primarily promote flexibility in accrediting processes, will impact various market segments.

Accrediting Agencies

These final regulations will allow accrediting agencies the opportunity to exercise a greater degree of choice in how they operate. One key change in these final regulations pertains to the concept of not limiting an agency's accrediting activities to a particular geographic region. These final regulations remove the "geographic area of accrediting activities" from the definition of "scope of recognition or scope." The current practice of recognizing geographic scope of an accrediting agency may discourage multiple agencies from also including the same State in their geographic scope. By removing this potential obstacle and acknowledging that many agencies already operate outside their recognized geographic scope, the Department seeks to provide increased transparency and introduce greater competition and innovation that could allow an institution or program to select an accrediting agency that best aligns with the institution's mission, program offerings, and student population.

Under these final regulations, we will no longer require accrediting agencies to apply to the Department to change the geographic region in which the agencies accredit institutions, which occurs about once a year. However, we will require accrediting agencies to include in public disclosures the States ("geographic area") in which they conduct their accrediting activities. This includes not only those States in which they accredit main campuses, but also the States in which the agencies accredit branch campuses or additional locations. This will promote greater transparency and clarity for students while eliminating burden on agencies and the Department of recognition proceedings focusing on geographic scope as well as the anticompetitive impact of the Department appearing to endorse allocation among individual agencies of discrete geographic regions.

In general, these final regulations will simplify the labeling of accrediting agencies to better reflect their focus. Therefore, the Department will no longer categorize agencies as regional or national; we will instead include them under a combined umbrella identified as ''institutional'' or ''nationally recognized.'' The terms ''regionally accredited'' and ''nationally accredited'' related to institutional accreditation will no longer be used or recognized the Department. We will, however, allow agencies to market themselves as they deem appropriate. Programmatic agencies that currently accredit particular programs will retain that distinction under these final regulations.

As a result of these changes, the Department expects that the landscape of institutional accrediting agencies may change over time from one where some agencies only accredit institutions headquartered in particular regions (as shown on the map in Chart 1) to one where institutional accrediting agencies accredit institutions throughout many areas of the United States based on factors such as institutional mission rather than geography. As indicated in Chart 2, provided by the Higher Learning Commission during the negotiated rulemaking sessions for this regulation, many of the institutions accredited by regional accrediting agencies engage in activities outside of their region so geographic distinctions in accreditation are less meaningful than they once might have been. As a result of these regulations, some accrediting agencies may capture a larger share of the market while agencies that specialize in niche areas may enjoy strong demand. However, we will not require any institution or program to change to a different accrediting agency as a result of these regulatory changes, nor will we require an agency to accept a new institution or program for which it did not have capacity or interest to accredit.

BILLING CODE 4000–01–C

Under these final regulations, accrediting agencies may realize burden reduction, streamlined operations, and an increase in autonomous control. For example, under the current regulations, an agency found to have a minor deficiency (such as a missing document) would be required to submit a compliance report, of which there were 17 submitted between 2014 and 2018. Agencies required to prepare compliance reports need to invest a significant amount of time and resources. Additionally, compliance reports require extensive review by Department staff, NACIQI, and the senior Department official (SDO), at a minimum. Under these final regulations, the Department may find an agency to be substantially compliant and require it to submit a less burdensome monitoring report to address the concern without requiring NACIQI or SDO review, saving the agency and the Department time and money while maintaining ample oversight and preserving the same

opportunity to require the more extensive review if the agency's shortcomings prove to be not as readily remediated as anticipated. The final regulations will also reduce burden by allowing accrediting agencies to use senior staff instead of the agency's accrediting commission to approve substantive changes proposed by accredited institutions or programs. This allows accrediting agencies to structure their work more efficiently and permit the accredited entities to obtain agency approval more expeditiously where appropriate.

Under these final regulations, for institutions to receive recognition of preaccreditation or accreditation by the Secretary, they must agree to submit any dispute with the accrediting agency to arbitration before bringing any other legal action. This requirement highlights the existing statutory requirement, enables agencies to pursue adverse actions without an immediate threat of a lawsuit, and potentially minimizes litigation costs for accrediting agencies and institutions. The relative costs of litigation and arbitration can vary depending upon the nature of the dispute, the parties involved, varied costs in different States, and several other factors. According to the Forum, previously known as the National Arbitration Forum, total arbitration costs can amount to only 25 percent of the cost to bring the same action to court.[35] Another article entitled ''The Iceberg: The True Cost of Litigation Versus Arbitration'' cites the average cost of arbitration for a business as approximately $70,000 while the average litigation costs for a given business total over $120,000.[36]

The Department does not receive information about the number of disputes between accrediting agencies and institutions that go to litigation or arbitration or data about the costs associated with both those actions. An initial review of legal news sources indicates a range of lawsuits and outcomes involving accrediting agencies and institutions.[37(14)]

The likelihood is that, from a cost perspective, arbitration will be considerably less expensive for the accrediting agencies and institutions than litigation in the first instance and the assumption is outcomes will not vary greatly according to the process pursued. We note, however, that the final regulations do not preclude an institution from pursuing a legal remedy—as provided for in statute—after going to arbitration. Therefore, the arbitration requirement may not ultimately change institutional behavior.

Under these final regulations, accrediting agencies are required to report a number of items to the Department, institutions, or the public, as shown in the *Paperwork Reduction Act* section of this preamble. Accrediting agencies must, among other things: (1) Notify the Department of, and publish on their websites, any changes to the geographic scope of recognition; (2) publish policies for any retroactive application of an accreditation decision; (3) provide institutions with written timelines for compliance and a policy for immediate adverse action when warranted; (4) provide notice to the Department and students of the initiation of an adverse action; (5) update and publish requirements related to teach-out plans and teach-out agreements; and (6) redact personally identifiable and other sensitive information prior to sending documents to the Department.

We estimate the burden for all accrediting agencies will be 6,562 hours and $297,652 annually at a $45.36 wage rate. There are also some provisions expected to reduce burden on accrediting agencies, including: (1) Allowing decisions to be made by a senior staff member; (2) using SDO determination and monitoring reports and reducing preparation and attendance at NACIQI meetings; and (3) removing existing requirements related to evaluating credit hours. We estimate that these changes will reduce burden for all accrediting agencies by 2,655 hours and $120,431 at a $45.36 wage rate. We estimate the net annual burden for all accrediting agencies to be 3,907 hours and $177,222. We based these estimates on the 2018 median hourly wage for postsecondary education administrators in the Bureau of Labor Statistics Occupational Outlook handbook.[38]

Institutions

These final regulations will also affect institutions. Institutions may benefit from a more efficient process to establish new programs and the opportunity to seek out alternate accrediting agencies that specialize in evaluating their type of institution. Institutions may also benefit from having the option to use alternative standards for accreditation under § 602.18, provided that the institution demonstrates the need for such an alternative and that it will not harm students. Institutions will also benefit from accrediting agencies having the authority to permit the institution to be out of compliance with policies, standards, and procedures otherwise required by the regulations, for a period of up to three years, and longer for good cause shown, where there are circumstances beyond the institution's or program's control requiring this exception. This gives institutions flexibility in the event of a natural disaster, a teach-out of another institution's students, significant documented local or national economic changes, changes in licensure requirements, undue hardship on students, and the availability of instructors who do not meet the agency's faculty standards but are qualified by education or work experience to teach courses within a dual or concurrent enrollment program.

In making decisions about changing accrediting agencies, institutions will have to balance the expense of maintaining existing accreditation while working with new agencies and the possible reputational effects of appearing to shop for accreditation. On the other hand, if accrediting agencies do realign over time, some institutions may need to seek out alternate accreditation as their current agency may elect to specialize in a different market segment.

The following table, based on Federal Student Aid (FSA) information as of April 2019, summarizes data related to title IV eligible institutions and their distribution according to type of primary accrediting agency, also known as the title IV gatekeeper accrediting agency.

As currently configured, both public and private non-profit institutions overwhelmingly use regional accrediting agencies as their primary agency for title IV participation, whereas proprietary institutions almost exclusively use national agencies. We do not require foreign schools to report accreditation information, although they may do so. We show foreign schools simply to provide context for how many are participating.

Table 1: Summary of Title IV Gatekeeper Agencies by Type and Institutional Sector

Primary Agency Type	Public	Private, Non-profit	Proprietary	Foreign	Total
Regional	1,554	1,230	91	0	2,875
National	306	474	1,692	0	2,472
N/A				396	396
Total	1,860	1,704	1,783	396	5,743

As stated earlier, under these final regulations, the Department considers regional and national accrediting agencies under one overall ''institutional'' umbrella. One objective of this policy is to increase students' academic and career mobility, by making it easier for students to transfer credits to continue or attain an additional degree at a new institution, by eliminating artificial boundaries between institutions due in part to reliance on a reputation associated with certain types of accrediting agencies. While this change would primarily result in some realignment of accrediting agencies and institutions, there is potential that certain postsecondary students could benefit and be enabled to transfer and continue their education at four-year institutions where previously they could not do so. This may result in greater access and increased educational mobility for students coming from proprietary institutions that use national accrediting agencies. It also may result in the award of increased financial aid, such as Federal Direct Student Loans and Pell Grants, on behalf of students pursuing additional higher education.

From an impact perspective, there may be several outcomes. The likelihood in the near term is that the status quo—under which institutions, especially four-year institutions, maintain their distinction under institutional accreditation—prevails, and the impact is essentially zero or neutral. The Department is prohibited from dictating an institution's credit transfer or acceptance policy, though it strongly discourages anticompetitive practices or those that deny students the ability to continue their education without an evaluation of that student's academic ability or prior achievement. The Department is hopeful that changes in these regulations will make it easier for institutions to voluntarily set policies that promote competition, support strong academic rigor, and allow qualified credits to transfer. Nevertheless, we do not prohibit other practices in these final regulations, and certain institutions may initially resist the changes intended by these final regulations.

A shift from strictly geographic orientation may occur over time, probably measured in years, as the characterization of ''institutional'' in terms of accreditation becomes more prevalent and greater competition occurs, spurring an evolving dynamic marketplace. Accrediting agencies may align in different combinations that coalesce around specific institutional dimensions or specialties, such as institution size, specialized degrees, or employment opportunities. If access to higher-level educational programs by students improves, the Department anticipates some modest increase in financial aid, through Federal sources such as Direct Loans and Pell Grants.

The Department approaches estimates for increased financial aid in terms of a range of low, medium, and high impacts based on student risk groups and institution sectors. This analysis appears in the section on *Net Budget Impacts.* A factor that could increase the Federal aid received by institutions is the proposed extension of time for achieving compliance in § 602.20, which may reduce the likelihood an accrediting agency will drop an institution.

Institutions with a religious mission would benefit from the requirement that accrediting agencies do not hold positions and policies resulting from that religious mission that do not interfere with the institution's or program's curricula including all core components required by the agency against the institution in its review. As of June 14, 2018, 277 institutions participating in title IV programs hold a religious exemption from some part of the regulations applicable to postsecondary institutions. These institutions, and others that may have similar religious missions, will be able to pursue such exemptions without concern that it will harm their accreditation status.

Additionally, some institutions would benefit from the changes related to State authorization in § 600.9 that generally maintain State reciprocity agreements for distance education and correspondence programs as an important method by which institutions may comply with State requirements and reduce the burden on institutions that would otherwise be subject to numerous sets of varying requirements established by individual States. These final regulations allow religious institutions exempt from State authorization under § 600.9(b) to comply with requirements for distance education or correspondence courses by States in which the institution is not physically located through State authorization reciprocity agreements. The final regulations also make the administration of distance education programs more efficient by replacing the concept of a student's residence with that of the student's location. As noted in the State Authorization section of this preamble, residency requirements may differ within States for purposes of voting, paying in-State tuition, and other rights and responsibilities. By using a student's location instead of residence, the Department intends to make its regulations more consistent with existing State requirements, make it easier for institutions to administer, and ensure that students who have not established legal or permanent residence in a State benefit from State requirements for an institution to offer distance education and correspondence courses in that State. Finally, these final regulations remove the duplicative student complaint process requirements under current § 600.9(c)(2) as the regulations under § 668.43(b) already require institutions to disclose the complaint process in each of the States where its enrolled students are located.

Under the final regulations, institutions must make some new or revised disclosures to students and the Department, as shown in the *Paperwork Reduction Act* section of this preamble. Institutions will be required to (1) update their policies and procedures to ensure consistent determination of a student's location for distance education and correspondence course students, and, upon request, to provide written documentation from the policies and procedure manual of its method and basis for such determinations to the Secretary; (2) inform the Secretary of the establishment of direct assessment programs after the first; (3) inform the Secretary of written arrangements for an ineligible program to provide more than 25 percent of a program; and (4) provide disclosures to students about whether programs meet licensure requirements, acceptance of transfer credits, policies on prior learning assessment, and written arrangements for another entity to provide all or part of a program. We estimate the cost of these disclosures to institutions will be a burden increase of 581,980 hours annually, totaling $26,398,613 (581,980 * $45.36). This wage is based on the 2018 median hourly wage for postsecondary education administrators in the Bureau of Labor Statistics Occupational Outlook handbook.[39]

While institutions will incur some increased costs for these disclosures and notifications, we do think there will be time and cost savings from the consolidation of reporting requirements and several provisions in these final regulations. The final regulatory package will remove the current regulatory requirements in § 668.50. This removes seven public disclosures that institutions offering distance education or correspondence courses were required to provide to students enrolled or seeking enrollment in such programs. Several of these disclosures will be required under § 668.43 and are included in the $26 million in burden described previously.

As detailed in the *Paperwork Reduction Act* section of this preamble, we expect these consolidations to save 152,405 hours for a total estimated reduction in burden of $6,913,091 at the hourly wage of $45.36 described above. Together, we estimate the expected net impact of the changes to disclosures to be an increase of 429,575 hours totaling $19,485,522 at the hourly wage of $45.36. The changes to the substantive change requirements may reduce the time and expense to institutions by streamlining approval of institutional or programmatic changes by dividing them into those that the agency must approve and those the institution must simply report to the agency, and also by permitting some changes to be approved by accrediting agency senior staff rather than by the entire accrediting commission, as well as by setting deadlines for agency approvals of written arrangements.

Students

As discussed earlier, these final regulations will provide various benefits to students by improving access to higher education and mobility and promoting innovative ways for employers to partner with accrediting agencies in establishing appropriate quality standards that focus on clear expectations for success. The final regulations may make it easier for students to transfer credits to continue, or attain an additional degree, at a new institution, including students from proprietary institutions seeking additional education at four-year public or private nonprofit institutions. If institutions are better able to work with employers or communities to set up programs that efficiently respond to local needs, students could benefit from programs designed for specific in-demand skills. Students would have to consider if choosing a program in a preaccreditation status or one that takes an innovative approach provides a high-quality opportunity. The Department believes programs added in response to these final regulations will maintain the quality of current offerings because institutions are still required to obtain accrediting agency approval when they want to add programs that represent a significant departure from the existing offerings or educational programs, or method of delivery, from those that were offered when the agency last evaluated the institution and when they want to add graduate programs. Lower-level programs that are related to what they are already offering are expected to leverage the strengths of the existing programs.

The Department does not believe many students rely on the distinction between regional and national accrediting agencies when deciding between programs or institutions but instead base their choice on other factors such as location, cost, programs offerings, campus, and career opportunities. Therefore, we do not think there are costs to students from the change to institutional versus regional accreditation, especially since institutions will be allowed to use whatever terms accurately reflect their accreditation to the extent it is useful for informing the audience of particular communications.

Additionally, if the accreditation market transforms over time and certain agencies develop strong reputations in specialized areas over time, that may be more informative for students interested in those outcomes.

Students may also be affected by the provisions related to the definition of a religious mission and the ability of institutions to have policies that support their religious mission without it being a negative factor in the institution's accreditation review. Institutions should be clear in their religious mission statements and students should evaluate if that mission is consistent with their beliefs or if they are willing to attend an institution with those policies and perspectives. For some students, this may limit the options in a given commuting range or lead them to attend an institution whose religious mission they do not share.

[39] Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook,* Postsecondary Education Administrators, available at *www.bls.gov/ooh/management/postsecondary-education-administrators.htm* (visited May 21, 2019).

The changes to the institutional disclosures in these final regulations are also aimed at simplifying the disclosures and providing students more useful information. As detailed in the Disclosures section of the NPRM, these final regulations require disclosures to ensure that an institution provides adequate information for students to understand its transfer-of-credit policy, especially when that policy excludes credits from certain types of institutions. The Department also believes that disclosures relating to an institution's prior learning assessment policies are important to students, especially those who have not attended college before or who are returning to college after many years of experience or training in other fields. Students will also receive information about any written arrangements under which an entity other than the institution itself provides all or part of a program. Another key disclosure is whether the program meets educational requirements for licensure in the State in which the student is located. These final regulations about teach-out plans required by accrediting agencies and State actions are intended to ensure that students have clear information about serious problems at their institutions, and this is most likely to occur when those institutions are required to have a teach-out plan in place or are under investigation by a State or other agency.

Under these final regulations, in certain circumstances, such as when an accrediting agency places an institution on probation, the Department changes the institution to reimbursement payment method, or the institution receives an auditor's adverse opinion, an accrediting agency must require a teach-out plan to facilitate the opportunity for students to complete their academic program. A closing institution will also trigger a required teach-out opportunity. For students, this could enable them to complete a credential with less burden associated with transferring credits and finding a new program. Alternatively, they will have the option to choose a closed school discharge if it makes sense for their situation. The additional flexibility under these final regulations for accrediting agencies to sanction programs instead of entire institutions potentially creates a trade-off as the students in programs that close are not eligible for closed school discharges. However, by focusing on problematic programs, fewer institutions may close precipitously, and fewer students would have their programs disrupted.

Federal Government

Under these final regulations, the Federal government would incur some additional administrative costs.

We do not expect the costs associated with processing post-participation disbursements to be significant, as the disbursement system is well-established and designed to accommodate fluctuations in disbursements. A file review at the agency would be incorporated into the review of agency applications. Currently, the Department reviews approximately 10 accrediting agencies for initial or renewal applications annually and we expect a file review will take Department staff 6 hours at a GS–14 Step 1 hourly wage rate of $43.42. The potential increase in the number of reviews due to these final regulations is uncertain, but we estimate a cost of $261 per review (6 hours * $43.42). Additional costs may also arise from increased senior Department official reviews under proposed § 602.36(g), which provides an agency subject to a determination that a decision to deny, limit, or suspend recognition may be warranted with an opportunity to submit a written response and documentation addressing the finding, and the staff with an opportunity to present its analysis in writing. The Department has reviewed 17 compliance reports between 2014 and 2018; we do not expect the administrative burden on the Department from this provision to be significant.

The Federal government will benefit from savings due to a reduced number of closed school loan discharges as a result of an expected increase in students completing teach-outs, but it may also incur annual costs to fund more Pell Grants and some title IV loans for students participating in teach-outs and increased volume from new programs or extension of existing programs, as discussed in the *Net Budget Impacts* section.

Net Budget Impacts

We estimate that these final regulations will have a net Federal budget impact over the 2020–2029 loan cohorts of $35 million in outlays in the primary estimate scenario and an increase in Pell Grant outlays of $3,744 million over 10 years, for a total net impact of $3,779 million. A cohort reflects all loans originated in a given fiscal year. Consistent with the requirements of the Credit Reform Act of 1990, budget cost estimates for the student loan programs reflect the estimated net present value of all future non-administrative Federal costs associated with a cohort of loans. The Net Budget Impact is compared to a modified version of the 2020 President's Budget baseline (PB2020) that adjusts for the recent publication of the final Borrower Defense rule.

As the Department recognizes that the market transformations that could occur in connection with these final regulations are uncertain and we have limited data on which to base estimates of accrediting agency, institutional, and student responses to the regulatory changes, we present alternative scenarios to capture the potential range of impacts on Federal student aid transfers. An additional complicating factor in developing these estimates are the related regulatory changes on which the committee reached consensus in this negotiated rulemaking that we will propose in separate notices of proposed rulemaking. For example, we will address the potential expansion of distance education or direct assessment programs because of significant proposed changes in the regulations governing such programs in a separate notice of proposed rulemaking. In this analysis, we address the impact of the accreditation changes and other changes in these final regulations but recognize that attributing future changes in the Federal student aid disbursements to provisions that have overlapping effects is an inexact process. Therefore, in future proposed regulations, as appropriate, we will consider interactive effects related to the changes in these regulations.

The main budget impacts estimated from these final regulations come from changes in loan volumes and Pell Grants disbursed to students as establishing a program becomes less burdensome and additional students receive title IV, HEA funds for teach-outs. Changes that could allow volume increases include making it easier for the Department to recognize new accrediting agencies and reducing the experience requirement for expanding an agency's scope to new degree levels. Agencies will also be able to establish alternative standards that require the institution or program to demonstrate a need for the alternative approach, as long as the alternative will not harm students and that they will receive equivalent benefit. The alternative standard could allow for the faster introduction of innovative programs. The possibility of additional accrediting agencies would increase the chances for institutions to find an agency. Institutions' liability associated with acquiring additional locations and expanded time to come into compliance could also keep programs operating longer than they otherwise might. The tables below present the assumed grant and loan volume changes used in estimating the net budget impact of these final regulations for the primary scenario, with discussion about the assumptions following the tables.

TABLE 2A—ASSUMPTIONS ABOUT CHANGE IN PELL GRANTS BY AWARD YEAR
[Additional Pell recipients]

	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029
4-year public	0	8,845	15,075	30,789	39,292	48,153	57,375	66,980	68,903	70,333
2-year public	0	6,790	11,624	17,891	24,469	31,395	38,633	46,219	47,710	48,933
4-year private	0	3,252	5,514	11,215	14,272	17,456	20,806	24,230	24,869	25,369
2-year private	0	163	281	433	597	772	956	1,155	1,193	1,235
Proprietary	0	4,988	10,266	15,832	21,691	25,102	28,679	32,454	33,612	34,570
Total	....	24,038	42,760	76,161	100,321	122,879	146,450	171,037	176,288	180,441

Estimated program costs for Pell Grants range from $30.1 billion in AY 2021–22 to $37.2 billion in AY 2029–30, with a 10-year total estimate of $333.8 billion. On average, the FY 2020 President's Budget projects a baseline increase in Pell Grant recipients from 2020 to 2029 of approximately 200,000 annually. The increase in Pell Grant recipients estimated due to these final regulations ranges from about 12 percent in 2021 to approximately 90 percent by 2029 of the projected average annual increase that would otherwise occur. However, even the additional 180,441 recipients estimated for 2029 would account for approximately 2 percent of all estimated Pell recipients in 2029 and results in an increase in program costs of approximately $4,427 million, a 1.3 percent increase in estimated 10-year Pell Grant program costs of $333.8 billion.

TABLE 2B—ASSUMPTIONS ABOUT CHANGE IN LOAN VOLUME FROM FINAL REGULATIONS BY COHORT AND RISK-GROUP

As seen from the approximately $100 billion annual loan volume, even small changes will result in a significant amount of additional loan transfers. We update loan volume estimates regularly; for PB2020 the total non-consolidated loan volume estimates between FY2020 and FY2029 range from $100.2 billion to $116.1 billion. The additional high and low scenarios represent a 20 percent increase or decrease from the assumptions presented in the table. The Department does not anticipate that the changes in the final regulations will lead to widely different scenarios for volume growth and therefore believes the 20 percent range captures the likeliest outcomes. For the provisions aimed at reducing closed school discharges by enhancing teach-outs, the main assumption is that closed school discharges will decrease by 10 percent, with a 20 percent decrease in the high scenario and a 5 percent decrease in the low scenario. With some exceptions, the Department has limited information about teach-outs and what motivates students to pursue them versus a closed school discharge, but we assume proximity to completion, convenience, and perception of the quality of the teach-out option have a substantial effect. Absent any evidence of the effect of the proposed changes on student response to teach-out plans, the Department has made a conservative assumption about the decrease in closed school discharges and the potential savings from the proposed changes may be higher.

However, since the publication of the NPRM describing the accreditation changes, the final Borrower Defense rule was published on September 23, 2019 [40] and reduced expected discharges as the elimination of automatic closed school discharges generated more savings than the extension of the closed school window to 180 days increased discharges. In order to avoid attributing savings in these final regulations for reductions in closed school discharges that would occur because of the borrower defense changes, the Department re-estimated the savings from this provision against the PB2020 baseline with the borrower defense closed school changes incorporated in it. Evaluated against this reduced level of expected future closed school discharges, the estimated savings from the closed school provision decreased

[40] 84 FR 49788 published September 23, 2019. Available at *https://www.govinfo.gov/content/pkg/FR-2019-09-23/pdf/2019-19309.pdf.*

from $120 million in the main 10 percent reduction scenario to $79 million.

The assumed changes in loan volume would result in a small cost that represents the net impact of offsetting subsidy changes by loan type and risk group due to positive subsidy rates for Subsidized and Unsubsidized Stafford loans and negative subsidy rates for Parent PLUS Loans and the interaction of the potential reduction in closed school discharges and increases in loan volume. The costs of the volume increase do differ from the NPRM as a result of the modified baseline that takes the final Borrower Defense rule into account as reduced discharge rates reduce subsidy costs. We do not assume any changes in subsidy rates from the potential creation of new programs or the other changes reflected in these final regulations. Depending on how programs are configured, the market demand for them, and their quality, key subsidy components such as defaults, prepayments, and repayment plan choice may vary and affect the costs estimates. For example, if institutions with less favorable program outcomes find more lenient accrediting agencies or if they take advantage of the substantive change policy revisions to expand their program offerings, there could be an increase in default rates or other repayment issues. On the other hand, institutions with strong programs may take advantage of the flexibility allowed by the substantive change policy revisions to expand their program offerings, possibly by adding certificate programs. We do not have information at this point to assume that new programs established under these provisions would have a different range of performance from current programs or to estimate how performance could vary.

Table 3 summarizes the Pell and loan effects for the Low, Main, and High impact scenarios over a 10-year period with years 2022 through 2029 showing amounts of over $100 million in outlays per year. Each column reflects a low impact, medium impact, or high impact scenario showing estimated changes to Pell Grants and Direct Loans under those low, medium, and high conditions. Therefore, the overall amounts reflect the sum of outlay changes occurring under each scenario for Pell Grants and Direct Loans when combined. The loan amounts reflect the combined change in the volumes and closed school discharges, which do have interactive and offsetting effects. For example, the closed school changes had estimated savings ranging from $41 million to $164 million when evaluated without the volume changes, and the volume changes had costs of $81 million to $139 million when estimated without the closed school changes.

TABLE 3—ESTIMATED NET IMPACT OF PELL GRANT AND LOAN CHANGES—2020–2029 OUTLAYS

[$mns]

	Low	Main	High
Pell Grants	2,981	3,744	4,463
Loans	40	35	−25
Overall	3,021	3,779	4,438

When considering the impact of these final regulations on Federal student aid programs, a key question is the extent to which the changes will expand the pool of students who will receive grants or borrow loans compared to the potential shifting of students and associated aid to different programs that may arise because of the changes in accreditation. The Department believes many of the final regulatory provisions that clarify definitions or reflect current practice will not lead to significant expansion of program offerings that would not otherwise occur for reasons related to institutions' business plans or academic mission. We believe these provisions may ease the burden of setting up new programs and accelerate the timeframe for offering them. Accreditation is a significant consideration when establishing a program because of the expense and work involved in seeking and maintaining it, but institutions make decisions about programs to offer based on employment needs, student demand, availability of faculty, and several other factors. Therefore, the Department does not expect these final regulations to increase total loan volumes more than 2 percent or Pell Grant recipients more than 2 percent by 2029 compared to the FY 2020 President's Budget baseline.

Another factor reflected in Table 3 is that we do not expect the impacts of these final regulations to occur immediately upon implementation, but to be the result of changes in postsecondary education over time. Institutions generally undergo accreditation review every 7 to 10 years, depending upon the accrediting agency and their status. Additionally, accrediting agencies may develop a new focus area or geographic scope over time as they increase resources to expand their operations. To the extent that there is a change in the institutional accreditation landscape, we would not expect institutions to change agencies until their next review point, so the impacts of these final regulations will be gradual.

The changes to the substantive change requirements, which will allow institutions to respond quickly to market demand and create undergraduate programs at different credential levels and focus agency attention on the creation of graduate certificate and masters level programs where many loan dollars are directed, could lead to expansion in Federal aid disbursed. The increased volume change of the high scenario reflects uncertainty about the extent of this potential expansion, as well as the fact that much of the expansion may involve online programs subject to forthcoming proposed regulatory changes that would interact with these final regulations. The number of graduate programs awarding credentials has increased substantially since the introduction of graduate PLUS loans in 2006, as has the volume of loans disbursed to graduate borrowers, as shown in Table 5. These final regulations will not change the substantive change requirements for graduate programs. This emphasis reflects the Department's concern about the growing practice of elevating the level of the credential required to satisfy occupational licensure requirements. Focusing accrediting agency attention on graduate programs may slow down or prevent the creation of some new programs, which we reflect in the slight reduction in graduate loan volume in Table 2.

Note: Unsubsidized loans to graduate students not included as not split in volume reports until 2010–11.

These final regulations also aim to bring greater clarity to the nature of teach-outs and to create a more orderly process for students and institutions when institutions are closing precipitously. We seek through these final regulations to provide students with the opportunity to finish their program of study and attain their credential and keep closed school discharges to a minimum to reduce taxpayer cost.

These final regulations will permit an accrediting agency to sanction a specific program or location within an institution without acting against the entire institution if the agency found that only that program or location was noncompliant. The Department recognizes that this situation would preclude a student from obtaining a closed school discharge, since only a program was subject to closure and not the entire institution. However, accrediting agency actions have rarely been the sole cause of institutional closure, so the potential application of this more limited response may not change the level of closed school discharges significantly.

Nevertheless, students would be entitled to teach-outs that facilitate program completion and degree attainment. In turn, the expansion of teach-outs could have budgetary impacts related to financial aid amounts as students take out loans or grants to complete their programs. When participating in a teach-out, the receiving institution may not charge students more than what the closing or closed institution would have charged for the same courses. If teach-outs increase significantly, this could result in some increase in loan volume and Pell Grants to such students. Closed school discharges are a very small percent of cohort volume, so we do not expect the potential volume increase associated with increased teach-outs ranges to be substantial or to contribute to the volume increases presented in Table 2.

Accounting Statement

As required by OMB Circular A–4 (available at *www.whitehouse.gov/sites/default/files/omb/assets/omb/circulars/a004/a-4.pdf*), in the following table we have prepared an accounting statement showing the classification of the expenditures associated with the provisions of these final regulations. This table provides our best estimate of the changes in annual monetized transfers as a result of these final regulations. Expenditures are classified as transfers from the Federal Government to affected student loan borrowers and Pell Grant recipients.

TABLE 6—ACCOUNTING STATEMENT: CLASSIFICATION OF ESTIMATED EXPENDITURES

[In millions]

Category	Benefits	
Restored focus and clarity for accrediting agency recognition process	Not Quantified	
	Not Quantified	
Category	**Costs**	
	7%	3%
Cost of compliance with paperwork requirements	$20.1	$20.1
Category	**Transfers**	
	7%	3%
Increased Pell Grants transferred to students who enter postsecondary education because of programs established or that remain open because of accreditation changes or who participate in teach-outs	$323.2	$351.9
Change in transfers from increased Federal student loans transferred to students who enter postsecondary education because of programs established or that remain open because of accreditation changes or who participate in teach-outs and reduced closed school discharges from the Federal Government to affected borrowers	1.9	2.2

Regulatory Alternatives Considered

In the interest of ensuring that these final regulations produce the best possible outcome, we considered a broad range of proposals from internal sources as well as from non-Federal negotiators and members of the public as part of the negotiated rulemaking process. We reviewed these alternatives in detail in the preamble to the NPRM under the ''Reasons'' sections accompanying the discussion of each proposed regulatory provision. Among the items discussed was removing or revising the limit on how much of a program a non-accredited entity may offer, which could allow faster expansion of programs but raised concerns about maintaining program quality. Also, a variety of alternatives to the proposed elimination of the requirement that an agency must have conducted accrediting activities for at least two years prior to seeking recognition when the agency is affiliated with, or is a division of, a recognized agency were considered by the negotiating committee. The committee did not agree to a proposal to make all regional accrediting agencies national but did agree to using the institutional designation for Department business. The committee also considered stricter requirements for obtaining approval of graduate programs. These proposals would likely have had a stronger negative effect on graduate program creation than these final regulations.

Paperwork Reduction Act of 1995

As part of its continuing effort to reduce paperwork and respondent burden, the Department provides the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This helps ensure that: The public understands the Department's collection instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

Sections 600, 602, and 668 contain information collection requirements. Under the PRA the Department has submitted a copy of these sections to OMB for its review.

A Federal agency may not conduct or sponsor a collection of information unless OMB approves the collection under the PRA and the corresponding information collection instrument displays a currently valid OMB control number.

Notwithstanding any other provision of law, no person is required to comply with, or is subject to penalty for failure to comply with, a collection of information if the collection instrument does not display a currently valid OMB control number.

In these final regulations, we display the control numbers assigned by OMB to any information collection requirements adopted in the final regulations. In the case of a new information collection, the OMB control number will be issued upon the information collection request approval.

Discussion

The goal of accreditation is to ensure that institutions of higher education meet acceptable levels of quality. Accreditation in the United States involves non-governmental entities as well as Federal and State government agencies. Accreditation's quality assurance function is one of the three main elements of oversight governing the HEA's Federal student aid programs. In order for students to receive Federal student aid from the Department for postsecondary study, the institution must be accredited by a ''nationally recognized'' accrediting agency (or, for certain vocational institutions, approved by a recognized State approval agency), be authorized by the State in which the institution is located, and receive approval from the Department through a program participation agreement.

Accrediting agencies, which are private educational associations operating in multiple states or with national scope, develop evaluation criteria and conduct peer evaluations to assess whether institutions and programs meet those criteria. Institutions and programs that request an accrediting agency's evaluation and that meet that agency's criteria are then ''accredited.''

As of April 2019, the Secretary recognized 53 accrediting agencies that are independent, membership-based organizations designed to ensure students have access to qualified faculty, appropriate curriculum, and other support services. Of these 53 accrediting agencies recognized by the Secretary, 36 are institutional for title IV HEA purposes and 18 are solely programmatic. Institutional accrediting agencies accredit institutions of higher education, and programmatic accrediting agencies accredit specific educational programs that prepare students for entry into a profession, occupation, or vocation. The PRA section will use these figures in assessing burden. Additionally, we use the number of title IV eligible institutions noted in the Regulatory Impact Analysis (1,860 public institutions, 1,704 private institutions, and 1,783 proprietary institutions) as the basis for assessing institutional burden in the PRA.

Through this process we identified areas where cost savings will likely occur under the final regulations; however, many of the associated criteria do not have existing information collection requests and consequently we did not then assign OMB numbers for data collection purposes. Instead, we included them in the collections table in a column titled: ''Estimated savings absent ICR requirement,'' and they are sometimes referred to as ''hours saved.'' We did not include these areas of anticipated costs savings in the total burden calculations.

Section 600.9—State Authorization

Requirements

Under § 600.9(c)(2)(i), the institution must determine in which State a student is located while enrolled in a distance education or correspondence course when the institution participates in a State authorization reciprocity agreement under which it is covered in accordance with the institution's policies and procedures. The institution must make such determinations consistently and apply them to all students.

Under § 600.9(c)(2)(ii), the institution must, upon request, provide the Secretary with written documentation of its determination of a student's location, including the basis for such determination.

Burden Calculation

We estimate that, on average, an institution will need 30 minutes to update its policies and procedures manual to ensure consistent location determinations for distance education and correspondence course students. Additionally, we estimate that it will take an institution 30 minutes to provide the Secretary, upon request, with written documentation from its policies and procedures manual of its method of determination of a student's location, including the basis for such determination.

TABLE 7—§ 600.9(c)(2)(i)

Entity	Responses	Time per response	Total hours
Public	1,860	.5 hours (30 min.)	= 930
Private	1,704	.5 hours (30 min.)	= 852
Proprietary	1,783	.5 hours (30 min.)	= 892
	....	....	= 2,674

We estimate that no more than five percent of institutions will be required to provide written documentation to the Secretary regarding the basis for the institutions' determinations of a State location for a student. We estimate that 93 public institutions will require 47 hours to provide written documentation of their basis for a location determination for a student as requested by the Secretary. We estimate that 85 private institutions will require 43 hours to provide written documentation of their basis for a location determination for a student as requested by the Secretary. We estimate that 89 proprietary institutions will require 45 hours to provide written documentation of their basis for a location determination for a student as requested by the Secretary.

TABLE 8—§ 600.9(c)(2)(ii)

Entity	Responses	Time per response	Total hours
Public	1,860	5% × .5 hours (30 min.)	= 47
Private	1,704	5% × .5 hours (30 min.)	= 43
Proprietary	1,783	5% × .5 hours (30 min.)	= 45
	....	....	= 135

The estimated burden for § 600.9 is 2,809 hours under OMB Control Number 1845–0144. The estimated institutional cost is $127,416 based on $45.36 per hour for Postsecondary Education Administrators, from the 2019 Bureau of Labor Statistics Occupational Outlook Handbook.

Section 602.12—Accrediting Experience

Requirements

The Department will require under § 602.12(b)(1) that an accrediting agency notify the Department of its geographic expansion and to publicly disclose it on its website.

Burden Calculation

Under § 602.12(b)(1), we estimate that, on average, it will take an agency 1 hour to inform the Department that it has expanded its geographic scope and to disclose the information publicly on its website. However, overall burden will decrease because an agency will no longer need to request approval of such an expansion by the Department, which takes, on average, 20 hours. The Department has received, on average, one such request annually.

The estimated burden under § 602.12 will increase by 1 hour [1 × 1] under OMB Control Number 1840–0788. In addition, in absence of an ICR for expansion of scope, we estimate, on average, burden reduction under § 602.12 will be 19 hours [1 × (20 − 1)] under OMB Control Number 1840–0788. The estimated institutional cost is $45.36 based on $45.36 per hour for Postsecondary Education Administrators, from the 2019 Bureau of Labor Statistics Occupational Outlook Handbook.

Section 602.18—Ensuring Consistency in Decision-Making; Section 602.20—Enforcement of Standards; Section 602.22—Substantive Changes and Other Reporting; Section 602.23—Operating Procedures All Agencies Must Have; Section 602.24—Additional Procedures Certain Institutional Agencies Must Have; and Section 602.26—Notifications of Accrediting Decisions: All Related to Final Accreditation Agency Policy Changes

Requirements

Under § 602.18(a)(6), we will require that accrediting agencies publish any policies for retroactive application of an accreditation decision. The policies must not provide for an effective date that predates an earlier denial by the agency of accreditation or preaccreditation to the institution or program or the agency's formal approval of the institution or program for consideration in the agency's accreditation or preaccreditation process.

Under § 602.20(a)(2), we will require that accrediting agencies provide institutions or programs with written timelines for coming into compliance, which may include intermediate checkpoints as the institutions progress to full compliance.

Under § 602.20(b), we will require that accrediting agencies have a policy for taking immediate adverse action when warranted. We will require both changes to remove overly prescriptive timelines for accrediting agencies that will emphasize acting in the best interest of students rather than merely acting swiftly.

Under § 602.20(d), we will add that accrediting agencies could limit adverse actions to specific programs or additional locations without taking action against the entire institution. This change will provide accrediting agencies with more tools to hold programs or locations within institutions accountable.

The Department will revise substantive change regulations to provide accrediting agencies more flexibility to focus on the most important changes. Under § 602.22(a)(3)(i), we will allow accrediting agencies' decision-making bodies to designate agency senior staff members to approve or disapprove certain substantive changes. Under § 602.22(a)(3)(ii), we will allow a 90-day timeframe (180 days for those with significant circumstances) for accrediting agencies to make final decisions about substantive changes involving written arrangements for provision of 25 to 50 percent of a program by a non-eligible entity. Under § 602.22(b), we will add two additional substantive changes for which an institution placed on probation or equivalent status must receive prior approval and for which other institutions must provide notice to the accrediting agency. Under § 602.23(f)(1)(ii), agencies must require that all preaccredited institutions have a teach-out plan that ensures students completing the teach-out will meet curricular requirements for professional licensure or certification, if any. Further, the teach-out plan must include a list of academic programs offered by the institution, as well as the names of other institutions that offer similar programs and that could potentially enter into a teach-out agreement with the institution.

Under final § 602.24(a), agencies are no longer required to use an institution's business plan, submitted to the Department, to describe the operation, management, and physical resources of the branch campus and remove the requirement that an agency may only extend accreditation to a branch campus after the agency evaluates the business plan and takes whatever other actions it deems necessary to determine that the branch campus has enough educational, financial, operational, management, and physical resources to meet the agency's standards.

Under § 602.24(c), we will require new requirements for teach-out plans and teach-out agreements. These changes will add additional specificity and clarity to teach-out plans and agreements and new provisions regarding when they will be required, what they must include, and what accrediting agencies must consider before approving them.

Under § 602.24(f), we will require that agencies adopt and apply the definitions of ''branch campus'' and ''additional location'' in 34 CFR 600.2, and on the Secretary's request, conform its designations of an institution's branch campuses and additional locations with the Secretary's if it learns its designations diverge. This change will standardize the use of these terms and alleviate misunderstandings.

Under § 602.26(b), we will require that accrediting agencies provide written notice of a final decision of a probation or equivalent status, or an initiated adverse action to the Secretary, the appropriate State licensing or authorizing agency, and the appropriate accrediting agencies at the same time it notifies the institution or program of the decision.

Further, we will require the institution or program to disclose such an action within seven business days of receipt to all current and prospective students.

Burden Calculation

Under § 602.18(a)(6), § 602.20(a)(2), § 602.20(b), § 602.20(d), § 602.22(a)(3)(i), § 602.22(a)(3)(ii), § 602.22(b), § 602.23(f)(1)(ii), § 602.24(a), § 602.24(c), § 602.24(f), and § 602.26(b), we estimate that, on average, an agency will need 12 hours to develop policies regarding submitting written documentation to the Secretary, which includes obtaining approval from its decision-making bodies, updating its policies and procedures manual, distributing the new policies to its institutions, and training agency volunteers on the changes.

Collectively, the one-time estimated burden for § 602.18(a)(6), § 602.20(a)(2), § 602.20(b), § 602.20(d), § 602.22(a)(3)(i), § 602.22(a)(3)(ii), § 602.22(b), § 602.23(f)(1)(ii), § 602.24(a), § 602.24(c), § 602.24(f), and § 602.26(b), is 636 hours (53 × 12) under OMB Control Number 1840–0788. The estimated institutional cost is $28,849 based on $45.36 per hour for Postsecondary Education Administrators, from the 2019 Bureau of Labor Statistics Occupational Outlook Handbook.

TABLE 9—SUMMARY OF ACCREDITING AGENCY POLICY MANUAL CHANGES

Requirements	Hours	Number of agencies	Total burden
Write Policies	4	53	212
Obtain Approval	2	53	106
Update Manual	2	53	106
Distribute Policies	1	53	53
Train Volunteers	3	53	159
Total	12	53	636

Section 602.22—Substantive Changes and Other Reporting Requirements

Requirements

Under 602.22(a)(3)(i), for certain substantive changes, the agency's decision-making body may designate agency senior staff to approve or disapprove the request.

Burden Calculation

Although a formal ICR does not exist under §§ 602.22(a)(3)(i), we estimate that we will save time, on average, by 6 hours given that a designated agency staff member could approve or disapprove certain substantive changes in place of decision-making bodies.

The estimated amount of time saved under § 602.22(a)(3)(i) is 318 hours [53 × (−6)] under OMB Control Number 1840–0788. There is no estimated institutional cost under § 602.22(a)(3)(i), but we believe that there will be an overall savings of $14,424.48 for agencies.

Section 602.23—Operating Procedures All Agencies Must Have

Requirements

Under § 602.23(a)(2), we will require that accrediting agencies make publicly available the procedures that institutions or programs must follow in applying for substantive changes. While we are aware that some agencies voluntarily make such procedures publicly available, we will now require it. Further, we will require that the agencies make publicly available the sequencing of steps relative to any applications or decisions required by States or the Department relative to the agency's preaccreditation, accreditation or substantive change decisions.

Burden Calculation

Under § 602.23(a)(2), we estimate that, on average, it will take an agency a one-time effort of 2 hours to make its application procedures publicly available. We anticipate that accrediting agencies will use their websites to comply, but any reasonable method is acceptable if the information is available to the public.

The estimated one-time burden for § 602.23 is 106 hours (53 × 2) under OMB Control Number 1840–0788. The estimated institutional cost is $4,808 based on $45.36 per hour for Postsecondary Education Administrators, from the 2019 Bureau of Labor Statistics Occupational Outlook Handbook.

Section 602.24—Additional Procedures Certain Institutional Agencies Must Have

Requirements

Under final § 602.24(a), agencies will not have to require an institution's business plan, submitted to the Department, to describe the operation, management, and physical resources of the branch campus and we will remove the requirement that an agency may only extend accreditation to a branch campus after the agency evaluates the business plan and takes whatever other actions it deems necessary to determine that the branch campus has enough educational, financial, operational, management, and physical resources to meet the agency's standards. Final § 602.24(c) will establish new requirements for teach-out plans and teach-out agreements, including when an agency must require them and what elements the agency must include.

Final § 602.24(f) will remove the requirement that an agency conduct an effective review and evaluation of the reliability and accuracy of the institution's assignment of credit hours.

Burden Calculation

We believe the requirements under § 602.24 that we are deleting are unnecessarily prescriptive and administratively burdensome without adding significant assurance that the agency review will result in improved accountability or protection for students or taxpayers.

Institutional accrediting agencies reviewed and extended accreditation to 53 branch campuses in 2018; and 26 to date in 2019. Given these figures, we estimate that under final § 602.24(a), an agency will save, on average, three hours ([2 hours × 53 business plans = 106]/36 institutional accrediting agencies = 3 hours) not reviewing business plans for branch campus applications. Under § 602.24(c), we estimate that an agency will need, on average, an additional hour to review the extra requirements for teach-out plans and teach-out agreements of their Title IV gatekeeping institutions (1 hour × 5,347 institutions).

Accrediting agencies review their institutions at different intervals with a maximum of 10 years. Using a five-year interval as a "mean," agencies will review and evaluate credit hours of 5,347 Title IV gatekeeping institutions every five years. Under § 602.24(f), we estimate that accrediting agencies have conducted the one-time review and evaluation of 80 percent (4,277) of their institutions' credit hours given the requirement became effective eight years ago (2011) leaving, no more than likely, 20 percent (1,070) of institutions' credit hours to be reviewed and evaluated.

Collectively, under § 602.24(a), (c), and (f), we estimate, on average, added burden of 5,347 hours (1 × 5,347); and 2,246 saved hours (106 + 2,140) if an ICR was associated with the final changes to lift required review of institutions' business plans and credit hours.
