Building on lessons learned from previous state implementations of modernized Unemployment Insurance (UI) Information Technology (IT) systems, ETA facilitated the development of a UI IT Modernization Pre-Implementation Planning Checklist for states to use prior to "going live" with a new system. In 2017, ETA implemented the Pre-Implementation Planning Checklist for State UI IT Modernization Projects, ETA 9177 report. Subsequently, ETA received comments from State Workforce Agencies (SWAs) and other entities recommending additional items to be included in the checklist and seeking clarification on the instructions for using the report. In addition, the Bureau of Labor Statistics recommended an eleventh project category to address labor market information (LMI) Federal reporting functions. ETA has enhanced the ETA 9177 report and the accompanying instructions to address these comments. This enhanced version of the ETA 9177 report improves the

document's structure, provides additional clarity on the verification steps for the ten existing project categories, and adds a new category to address verification steps for LMI Federal reporting functions. Like the original 2017 implementation, the updated checklist will validate that all necessary system functions are available and/or that alternative workarounds are developed prior to the production launch of a new UI IT system to help states avoid major disruption of services to UI customers and to prevent delays in making UI benefit payments when due.

This comprehensive checklist denotes critical functional areas that states must verify prior to launching new UI IT systems including, but not limited to, technical IT functions and UI business processes that interface with the new system.

The list of critical areas identified in the checklist includes:

- Functionality and Workarounds;
- External Alternate Access Options and Usability Issues Addressed;
- Policies and Procedures;
- Technical Preparation for System Implementation;
- Call Center/Customer Service Operations;
- Business Process;
- Help Desk;
- Management Oversight;
- Vendor Support/Communications;
- Communication Processes and Procedures; and
- Labor Market Information Federal Reporting Functions.

This information will include the UI IT Modernization project title (e.g. State project or Consortium name) and the associated report on Pre-Implementation Planning Checklist results. For each sub-element identified in the ETA 9177 report, the SWA is to provide:

- An overall status report;
 - A brief report explaining the status of the project as it relates to the particular sub-element;
 - Attached explanations of any workarounds concerning the processes in the sub-element;
 - Attached explanations if implementation of the new system concerning specific processes for the sub-element will be delayed or deferred;
 - Attached explanations for added clarity and/or to support a narrative;
 - Mitigation proposals for addressing any problems;
 - New project timelines if applicable; and/or
 - Any discussion of identified technical assistance needs for the successful completion of the project.
- ETA requires the use of this checklist report to help SWAs ensure the
