

providers report coverage information for each technology deployed in their networks by reducing the number of categories from nine to four. The Order eliminates the requirement that facilities-based providers submit a list of census tracts in which the provider advertises its mobile wireless broadband service and in which the service is available to actual and potential subscribers. Finally, the Order removes the requirement that fixed providers offering business/enterprise/government services to report the maximum downstream and upstream contractual or guaranteed data throughput rate (committed information rate) available in each reported census block.

As part of these revisions to the Form 477 data collection, the Commission is requesting approval of certain changes to the form and the related instructions. These changes are necessary to streamline the filing process, implement revisions to the data collection, eliminate burdensome filings requirements, and increase the usefulness of the information to the Commission, Congress, the industry, and the public.
