

to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements for estimated antidumping duties will be effective upon publication of the notice of final results of this review for all shipments of ESB rubber from Brazil entered, or withdrawn from warehouse, for consumption on or after the date of publication as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for company subject to this review will be equal to the weighted-average dumping margin established in the final results of the review; (2) for merchandise exported by companies not covered in this review but covered in a prior segment of this proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation but the producer is, the cash deposit rate will be the rate established for the most recently completed segment for the producer of the merchandise; (4) the cash deposit rate for all other producers or exporters will continue to be 19.61 percent, the all-others rate established in the less-than-fair-value investigation.¹³ These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this period of review. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

Commerce is issuing and publishing these results in accordance with sections 751(a)(1) and 777(i) of the Act and 19 CFR 351.221(b)(4).

Dated: November 7, 2019.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix—List of Topics Discussed in the Preliminary Decision Memorandum

- I. Summary
- II. Background
- III. Scope of the Order
- IV. Discussion of the Methodology
- V. Recommendation

National Oceanic and Atmospheric Administration

Public Comment for the Four Draft NOAA Science and Technology Strategies: NOAA Unmanned Systems, Artificial Intelligence, 'Omics, and Cloud Strategies

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public comment.

SUMMARY: This notice announces the availability for public comment of the NOAA *Unmanned Systems, Artificial Intelligence, 'Omics, and Cloud draft strategies*. These strategies are intended to dramatically expand our application of these four emerging science and technology focus areas by improving the efficiency, effectiveness and coordination of their development and usage across the agency.

DATES: Comments must be received by December 16, 2019.

ADDRESSES: Copies of the draft strategies may be downloaded or viewed on the internet at <https://nrc.noaa.gov/NOAA-Science-Technology-Focus-Areas>. The documents are also available by sending a written request to the point of contact identified below (see **FOR FURTHER INFORMATION**). You may submit public comments via email to oar.rc.execsec@noaa.gov. Please include "Public Comment on NOAA Draft Science and Technology Strategies" in the subject line of the message. You may also submit public comments via mail to Emma Kelley, Office of Labs and Cooperative Institutes, NOAA Research, 1315 East-West Highway, Silver Spring, MD 20910. All comments received are part of the public record. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender is publicly accessible. NOAA will accept anonymous comments.

FOR FURTHER INFORMATION CONTACT:

Emma Kelley, Research Council Executive Secretariat, Office of Labs and Cooperative Institutes, NOAA Research, Rm. 11319, 1315 East-West Highway, Silver Spring, Maryland 20910. (Phone: 301-734-1179, email: emma.kelley@noaa.gov).

SUPPLEMENTARY INFORMATION: In recent years, individual NOAA programs and its multisector partners have worked to advance successful *unmanned systems, artificial intelligence, 'omics, and cloud solutions* that improve the delivery of their respective missions.

The draft strategies NOAA developed for each of these science and technology focus areas directly follow guidance from the Administration and Congress, including the Office of Science and Technology Policy FY21 Research and Development Priorities letter, the National Science and Technology Council report "Science and Technology for America's Oceans: a Decadal Vision", the Executive Order on Maintaining American Leadership in Artificial Intelligence, the Weather Research and Forecasting Innovation Act, and the Commercial Engagement Through Ocean Technology (CENOTE) Act.

The draft strategies will ensure robust agency-wide coordination and strong institutional support from NOAA senior leadership for these emerging science and technology focus areas to guide transformational advances in the quality and efficiency of NOAA's science, products, and services.

Summary of the Four Draft Strategies Unmanned Systems Strategy: In recognition of the opportunities unmanned systems presents for addressing NOAA's mission priorities, the NOAA *Unmanned Systems Strategy* provides a framework to: (1) Efficiently provide requirements-driven, safe, cost-effective, and compliant Unmanned Systems services across the agency; (2) prioritize strategic investments in Unmanned Systems applications and technologies that fuel innovation and strengthen operations, and (3) accelerate and enhance capabilities through partnerships.

Artificial Intelligence Strategy: The overarching goal of the NOAA *Artificial Intelligence (AI) Strategy* is to utilize AI to advance NOAA's requirements-driven mission priorities. Through this strategy, NOAA seeks to reduce the cost of data processing, and provide higher quality and more timely scientific products and services for societal benefits.

'Omics Strategy: In recognition of the opportunities and challenges presented

¹³ See *Emulsion Styrene-Butadiene Rubber From Brazil: Final Affirmative Determination of Sales at Less Than Fair Value and Final Negative Determination of Critical Circumstances*, 82 FR 33048 (July 19, 2019).

by the advent of 'omics tools (a suite of advanced methods used to analyze material such as DNA, RNA, or proteins), the NOAA *'Omics Strategy* provides a framework to advance the application of 'omics to address mission priorities. The strategy leverages NOAA's current organizational structure to more effectively implement 'omics through improvements in computational and analytical capacities, targeted research, technology transition, workforce proficiency, and partnerships across NOAA's lines, federal agencies, and extramural research and commercial communities.

Cloud Strategy: NOAA's robust experience with cloud applications are already beginning to demonstrate significant improvements in performance and skill in areas such as satellite data products and services, numerical weather prediction, ocean models, and big data analysis, storage and dissemination. Cloud services will be further leveraged to expand benefits, such as: (1) Accelerated timeline to acquire new computing resources, (2) increased security posture, (3) more accessible and monetizable NOAA data to customers, such as academia and industry, (4) reduced transition time from research to operations, (5) scalable infrastructure that supports scientific and high performance computing requirements, and (6) a more agile and innovative culture.

After completion of these strategies, NOAA will develop corresponding Strategic Implementation Plans (or "Roadmaps") that define detailed action items, deadlines, and responsibilities. In the meantime, these NOAA S&T focus areas are already improving performance in our economically impactful missions and setting the course to strengthen our renowned environmental science and technology leadership for the coming decades. Through the four strategies, NOAA will be better positioned to achieve our top agency priorities to regain global leadership in numerical weather prediction and sustainably expand the American Blue Economy.

Dated: November 8, 2019.

David Holst,

Chief Financial Officer/Administrative Officer, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Seabird Research Activities in Central California

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; incidental harassment authorization; request for comments on proposed Renewal.

SUMMARY: NMFS received a request from Point Blue Conservation Science (Point Blue) for the Renewal of their currently active incidental harassment authorization (IHA) to take marine mammals incidental to seabird and pinniped research activities in central California. These activities are identical to those covered in the current authorization. Pursuant to the Marine Mammal Protection Act, prior to issuing the currently active IHA, NMFS requested comments on both the proposed IHA and the potential for renewing the initial authorization if certain requirements were satisfied. The Renewal requirements have been satisfied, and NMFS is now providing an additional 15-day comment period to allow for any additional comments on the proposed Renewal not previously provided during the initial 30-day comment period.

DATES: Comments and information must be received no later than November 29, 2019.

ADDRESSES: Comments should be addressed to Jolie Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service. Physical comments should be sent to 1315 East-West Highway, Silver Spring, MD 20910 and electronic comments should be sent to ITP.Fowler@noaa.gov.

Instructions: NMFS is not responsible for comments sent by any other method, to any other address or individual, or received after the end of the comment period. Comments received electronically, including all attachments, must not exceed a 25-megabyte file size. Attachments to electronic comments will be accepted in Microsoft Word or Excel or Adobe PDF file formats only. All comments received are a part of the public record and will generally be posted online at

<https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act> without change. All personal identifying information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT:

Amy Fowler, Office of Protected Resources, NMFS, (301) 427–8401. Electronic copies of the original application, Renewal request, and supporting documents (including NMFS **Federal Register** notices of the original proposed and final authorizations, and the previous IHA), as well as a list of the references cited in this document, may be obtained online at: <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act>. In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The Marine Mammal Protection Act (MMPA) prohibits the "take" of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed incidental take authorization is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other "means of effecting the least practicable adverse impact" on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stocks for taking for certain subsistence uses (referred to here as "mitigation measures"). Monitoring and reporting of such takings are also required. The meaning of key terms such as "take," "harassment," and "negligible impact"
