FEDERAL REGISTER

Vol. 84 Thursday,
No. 220 November 14, 2019

Pages 61819–62430

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 84 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2019–0861]

Special Local Regulations; Mission Bay Parade of Lights, San Diego, CA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the Mission Bay Parade of Lights special local regulations on the waters of Mission Bay, California on December 14, 2019. These special local regulations are necessary to provide for the safety of the participants, crew, spectators, sponsor vessels, and general users of the waterway. During the enforcement period, persons and vessels are prohibited from anchoring, blocking, loitering, or impeding within this regulated area unless authorized by the Captain of the Port, or his designated representative.

DATES: The regulations in 33 CFR 100.1101 will be enforced from 6 p.m. through 8 p.m. on December 14, 2019, for Item 6 in Table 1 of Section 100.1101.

FOR FURTHER INFORMATION CONTACT: If you have questions about this publication of enforcement, call or email Lieutenant Briana Biagas, Waterways Management, U.S. Coast Guard Sector San Diego, CA; telephone (619) 278–7656, email *D11MarineEventsSD@uscg.mil*.

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the special local regulations in 33 CFR 100.1101 for the Mission Bay Parade of Lights in Mission Bay, San Diego, CA in 33 CFR 100.1101, Table 1, Item 6 of that section from 6 p.m. until 8 p.m. on December 14, 2019. This enforcement action is being taken to provide for the safety of life on navigable waterways during the event. The Coast Guard's regulation for recurring marine events in the San Diego Captain of the Port Zone identifies the regulated entities and area for this event. During the enforcement periods and under the provisions of 33 CFR 100.1101, persons and vessels are prohibited from anchoring, blocking, loitering, or impeding within this regulated area, unless authorized by the Captain of the Port, or his designated representative. The Coast Guard may be assisted by other Federal, State, or local law enforcement agencies in enforcing this regulation.

In addition to this document in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of this enforcement period via the Local Notice to Mariners, marine information broadcasts, and local advertising by the event sponsor.

If the Captain of the Port Sector San Diego or his designated representative determines that the regulated area need not be enforced for the full duration stated on this document, he or she may use a Broadcast Notice to Mariners or other communications coordinated with the event sponsor to grant general permission to enter the regulated area.

Dated: November 6, 2019.

D.P. Montoro,

Captain, U.S. Coast Guard, Alternate Captain of the Port San Diego.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2019–0272; FRL–10002–12–Region 9]

Air Plan Approval; California; South Coast Air Quality Management District; Stationary Source Permits; Withdrawal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is withdrawing a direct final rule published on September 20, 2019 because relevant adverse comments were received. The rule pertained to EPA approval of a revision to the South Coast Air Quality Management District (SCAQMD) portion of the California State Implementation Plan (SIP). EPA will take a final action on the proposed action in a separate subsequent final rulemaking.

DATES: Effective November 14, 2019, the EPA withdraws the direct final rule published at 84 FR 49465, on September 20, 2019.

FOR FURTHER INFORMATION CONTACT: Laura Yannayon, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 972–3534 or by email at *yannayon.laura@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, "we," "us," and "our" refer to the EPA. On September 20, 2019 we published a direct final rule to approve a revision to the SCAQMD portion of the California SIP. Specifically, the revision pertains to SCAQMD Rule 1325 "Federal $PM_{2.5}$ New Source Review Program." The direct final rule was published without prior proposal because we anticipated no adverse comments. We stated in the direct final rule that if we received relevant adverse comments by October 21, 2019, we would publish a timely withdrawal in the **Federal Register**. We received a relevant adverse comment and accordingly are withdrawing the direct final rule. In a separate subsequent final rulemaking, we will address the comments received.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur Oxides, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: November 4, 2019.

Deborah Jordan,

Acting Regional Administrator, Region IX.

DEPARTMENT OF THE INTERIOR

Office of the Solicitor

43 CFR Part 2

[Docket No. DOI–2018–0017]

RIN 1093–AA26

Freedom of Information Act Regulations

AGENCY: Office of the Solicitor, Interior.

ACTION: Final rule.

SUMMARY: This rule revises the regulations applicable to all of the components, bureaus and offices of the Department of the Interior (Department) that process requests for records under the Freedom of Information Act. The revisions clarify and update procedures for requesting records from the Department and procedures that the Department follows in responding to requests from the public.

DATES: This rule is effective on December 16, 2019.

FOR FURTHER INFORMATION CONTACT: Cindy Cafaro, Departmental FOIA Office, Office of the Solicitor, Department of the Interior: 202–208–5342.

SUPPLEMENTARY INFORMATION:

I. Why We Are Publishing This Rule and What it Does

The Department's Freedom of Information Act (FOIA) offices have been overwhelmed by an exponential increase in the volume and complexity of incoming FOIA requests. Between Fiscal Year (FY) 2016 and FY 2018, the number of FOIA requests received by the Department's bureaus and offices increased 30 percent overall while the number of requests received by the Office of the Secretary FOIA office (OS FOIA) increased 210 percent. During that time, the number of particularly time-consuming complex requests also increased by 55 percent for the Department overall and 355 percent for OS FOIA. The Department's effort to respond in a timely and effective manner to the increased number of requests has been further hindered by a significant increase in FOIA lawsuits, primarily brought by requesters that have not received timely responses to their requests. At the close of FY 2018, the Department was defending 129 FOIA cases compared to just 6 cases at the close of FY 2015 and 30 cases at the close of FY 2016. The lawsuits further impair the ability of the FOIA processors to do their work in an orderly and equitable manner because they impose extra duties on the FOIA processors and the litigated requests typically jump the processing queue ahead of the non-litigated requests.

To address this challenge, the Department has begun a comprehensive effort to improve the quality and capacity of the work performed by its FOIA offices that includes better organization and governance, training, technology, and staffing as set out in *Secretary's Order No. 3371.* This rule is part of that larger effort. It amends the Department's FOIA regulations to increase the capacity of the Department's FOIA offices to respond to FOIA requests in an effective, transparent, and timely manner by making the procedures for processing FOIA requests more efficient and focused on meeting the Department's statutory obligations under the FOIA.

The Final Rule also amends section 2.31(a) of the Department's regulations to conform with the decision issued by the United States Supreme Court, in *Food Marketing Institute* v. *Argus Leader Media,* 588 U.S. __(2019) on June 24, 2019 (slip opinion) (''*Argus Leader*''). The amendment strikes the criteria expressly rejected by the Supreme Court in *Argus Leader* and replaces it with the criteria articulated by the Supreme Court in that case. With respect to this one amendment, the Department is invoking the ''good cause'' exemption of the Administrative Procedure Act that provides ''when an agency finds that for good cause that public notice and comment procedures are impractical, unnecessary, or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment.'' *See* 5 U.S.C. 553(b)(3)(B). The Department has determined that notice and comment is unnecessary with respect to this one amendment because the Department has no discretion to apply criteria other than that articulated by the Supreme Court in *Argus Leader.*

II. Comments to the Proposed Rule

On December 28, 2018, the Department published a proposed rule in the **Federal Register** (83 FR 67175) requesting comments over a 30-day period ending on January 29, 2019. Due to a technical problem with *www.regulations.gov* that occurred in mid-January, we extended the comment period an additional day to ensure interested parties had the full 30 days to submit their responses. The Department received over 65,000 submittals from industry organizations, non-governmental organizations, representatives of state governments, and private citizens that addressed virtually every change in the proposed rule. Some entities submitted comments multiple times. More than 55,000 of the comments were variations on form letters and contained similar comments. Other comments were substantive and detailed. The comments are posted at the *Federal eRulemaking* portal: *http://www.regulations.gov* and may be accessed at that website by entering DOI–2018–0017 in the search box. The Department also received comments from the Office of Government Information Services at the National Archives and Records Administration, the Office of Information Policy at the Department of Justice, and Members of Congress. After careful consideration of these comments, the Department modified the proposed changes to sections 2.3, 2.4, 2.5, 2.12, 2.13, 2.15, 2.19, 2.20, 2.24, 2.29, 2.37, 2.45, 2.48, 2.54, 2.66, and 2.70 and withdrew the proposed changes to sections 2.16, 2.17, 2.18, 2.28, 2.51, 2.57, 2.58, 2.59, and 2.62. The comments and the Department's responses are summarized below.

1. General Opposition to the Proposed Rule

A large majority of the comments submitted by non-governmental organizations, members of the public, and academia expressed general opposition to the proposed rule and many of its major proposals.

2. General Support of the Proposed Rule

Some comments generally supported the proposed rule or components of it.

3. More Time To Comment

Some comments requested additional time to comment. The Department received a large number of comments, many of which were substantive and detailed. As a result, the Department is confident that it has had the benefit of sufficient public input. We declined to extend the comment period further because the public as well as the Department will benefit from implementing the regulations as soon as possible.

4. Executive Orders and Statutory Requirements

Some comments questioned whether the rule constitutes a major federal action significantly affecting the quality of the human environment that requires a detailed statement under the National Environmental Policy Act of 1969 (NEPA). It does not. The rule amends the administrative process by which the Department receives and processes requests under the FOIA. The rule does not have a ''reasonably close causal connection'' to effects on natural or cultural resources in the environment, as required for NEPA analysis.

A comment also recommended the Department correct the citation to 43 CFR 46.210(i) for the list of categorical exclusions and extraordinary circumstances in the NEPA compliance section and the Department has done so. The rule is also subject, in part, to the exclusion at 43 CFR 46.210(b) for the category of actions, ''Internal organizational changes and facility and bureau reductions and closings,'' as it restructures the Department's FOIA program by reassigning roles among different personnel. The Department has reviewed this rule against the Department's list of extraordinary circumstances at 43 CFR 46.215, as required by 43 CFR 46.205, and has determined (as documented below) that none apply.

Comments also questioned whether this rule would increase burdens and reduce flexibility and freedom of choice for the public under Executive Order (E.O.) 13563. It will not. The rule streamlines existing regulations to increase the Department's capacity to process requests under the FOIA and provide more records to more requesters in a timely manner. Comments also noted that E.O. 13563 encourages agencies to provide comment periods of at least 60 days. This is true, but it is a suggestion, not a requirement and the 30-day comment period utilized for this rule is legally sufficient. Additionally, as discussed above, the Department received a large number of comments, many of which are substantive and detailed, indicating that the comment period was adequate. Comments questioned whether the rule violates the FOIA. The Office of the Solicitor carefully reviewed the final rule and we are confident the rule is consistent with the provisions of FOIA. Comments also questioned whether our consultation with American Indian Tribes under E.O. 13175 was sufficient. This rule does not have tribal implications that impose substantial direct compliance costs on Indian Tribal governments under the criteria in E.O. 13175. Although it not required, the Department nevertheless sought consultation with the Indian Tribe that requested it and have added a more specific discussion of our compliance with E.O. 13175 below. Other comments asked us to note that the rule does not affect our trust responsibility to tribes. We agree that it does not.

5. Federal Vacancies Reform Act and Appointments Clause

Some comments expressed concern that the proposed rule was signed by the Department's Principal Deputy Solicitor, Exercising the Authority of the Solicitor. They asserted that the Principal Deputy Solicitor does not have the authority to sign a proposed or final rule. They also asserted that he was the Acting Solicitor for an unlawfully long period of time and/or if he had not been the Acting Solicitor, he did not have authority to sign the proposed rule. The Department's Principal Deputy Solicitor, Exercising the Authority of the Solicitor is not the Acting Solicitor. Instead, he is a non-principal officer exercising a valid, non-expired delegation of the non-exclusive functions and duties of the Solicitor. As such, no timeline was exceeded and the Federal Vacancies Reform Act and Appointments Clause have not been violated. Additionally, the Principal Deputy Solicitor has the full authority to sign proposed and final rules.

6. Specific Comments on Provisions of the Proposed Rule

The following is a discussion of the substantive comments on specific provisions of the proposed rule and the Department's responses:

Section 2.2. In this section of the proposed rule, the Department updated who would provide prior approval for law enforcement exclusions, when necessary, transferring this responsibility from the Office of the Solicitor generally to the Deputy Chief FOIA Officer (DCFO) specifically. Comments expressed concern that this change would politicize access to information. This reflects a misunderstanding of the position and role of the DCFO. The DCFO is a recently created position in the Office of the Solicitor filled by a career Senior Executive Service employee to evaluate, improve, and oversee the Department's FOIA program. The rule, therefore, has not been changed based on these comments.

Sections 2.3(d), 2.5(c), 2.19(b)(2), 2.21(a), 2.37(i), 2.49(e), and 2.66. In these sections of the proposed rule, the Department updated provisions pertaining to Public Liaison functions and/or FOIA Requester Centers. These changes were driven by the 2018 Department of Justice guidance entitled *The Importance of Quality Requester Services: Roles and Responsibilities of FOIA Requester Service Centers and FOIA Public Liaisons* and reflect the changing structure of the Department's FOIA program. Comments expressed concern that the intention of the changes was to make it more complex/difficult for requesters to obtain assistance from the Department in making FOIA requests and/or to politicize the FOIA process. This is neither the intention nor the effect of the changes. The changes are intended to improve the Department's assistance to FOIA requesters by providing one level of support for routine matters (FOIA Requester Centers) and a centralized, higher level of support for matters requiring more assistance (the Public Liaison). In addition, the FOIA Requester Center and Public Liaison functions will continue to be performed by career employees. The rule, therefore, was not changed based on these comments. Some comments sought more detail in these sections, particularly section 2.66. We agree that providing additional detail and clarification in section 2.66 would be helpful and have modified the rule accordingly.

Section 2.3. In this section of the proposed rule, the Department amended paragraph (b) to require that electronic submissions of FOIA requests be made via the electronic portals listed on the Department's FOIA website rather than by email and remove the option to submit requests via facsimile. The Department also deleted the previous paragraph (c), which alerted requesters to a FOIA website that is now discussed in the amended paragraph (b). The change to paragraph (b) will enable the Department to modernize its FOIA request tracking system. The Department expects this will reduce the amount of time the bureau FOIA offices spend on data entry, reduce the number of inadvertent errors made by retyping data from one format to another, and enable staff to apply more of their time to processing requests. Comments expressed concern that this change was intended to prohibit the electronic submission of FOIA requests or hinder the submission of FOIA requests. This reflects a misunderstanding of FOIA portals as well as the intent of the Department. Requesters will still be able to submit their requests electronically and, because requesters will be required to fill in certain data fields in the portals, will be less likely to omit necessary information that must be clarified before the request can be processed. Other comments expressed concern that rural and tribal communities with limited internet access should be able to submit requests via facsimile. In response to the comments, we have modified paragraph (b) to permit all requesters to continue faxing in requests. Other comments raised concerns about the functionality of the portals, for example, whether they provide confirmation receipts and allow requesters to upload documents. We do not believe it is appropriate to include such technical specifications in the regulations, but we are in the process of upgrading our portal system and will keep this concern in mind. We will also keep in mind the importance of informing requesters of, and redirecting them to, the portals. One comment suggested adding a reference to the Department of Justice portal at *FOIA.gov* to the regulations. Accordingly, we have added this portal to our FOIA website.

Section 2.4. In this section of the proposed rule, we amended paragraph (a) and deleted paragraphs (e) and (f) to provide that we would not forward requests submitted to a particular bureau or bureau component to another bureau or component. These changes were intended to help the FOIA offices focus on meeting the Department's statutory obligations under the FOIA. Comments expressed concern that these changes would be unduly limiting and inappropriate under the FOIA. After considering those comments, we have further amended paragraph (a) to make it clear that when a bureau receives a request that is clearly intended for another bureau, the bureau will forward the request. This is consistent with 2008 Department of Justice guidance entitled *New Requirement to Route Misdirected FOIA Requests.* Additionally, the section has been amended to advise requesters that they may seek help from the appropriate FOIA contact, as discussed in section 2.3 of the regulations, or FOIA Requester Center to assist them in determining where to direct their requests. Comments also requested that we consider continuing to forward requests that are not clearly misdirected to provide requesters with excellent customer service. While we wish to provide excellent customer service to requesters, this change would thwart our goal of focusing the efforts of the Department's FOIA offices on meeting our statutory obligations to provide timely and accurate responses to FOIA requesters. We, therefore, decline to require forwarding unless a request has clearly been misdirected, but believe the addition of a reminder of the services offered by FOIA contacts and FOIA Requester Centers will help requesters obtain needed assistance in directing their requests.

Section 2.5. This section of the rule concerns how requesters describe the records they are seeking. We proposed adding language to paragraph (a) requiring requesters to identify the discrete, identifiable agency activity, operation, or program in which they are interested. The purpose of this change was to assist requesters in formulating proper requests for records reflecting the activities and functions of the Department. Comments expressed concern that this change was unclear and could unreasonably burden requesters. Upon consideration of the comments, we have withdrawn this proposed change. Paragraph (d) was also amended to notify requesters that we would not honor a request that ''requires the bureau to locate, review, redact, or arrange for inspection of a vast quantity of material.'' The purpose of this change was to encourage requesters to formulate better-targeted requests. Comments expressed concern that these changes were too inflexible, created a new standard for the description of records, might confuse FOIA processors, and were impermissible under the FOIA. We recognize that our proposed language created confusion. We have therefore withdrawn the proposed change. Also in this section, we added paragraph (e) to clarify how the Department will address requests that do not reasonably describe the records sought. Some comments stated changes to the original paragraph (d) were unnecessary. Others stated that the changes were vague, too broad, or confusing. We therefore have withdrawn this new paragraph. A comment suggested that requesters should have 60 workdays to respond when asked by the bureau FOIA offices to clarify their requests. The 20 workday standard is unchanged from our current regulations. It provides sufficient time for requesters to respond to such requests and allows the Department to close requests that requesters are not interested in clarifying within a reasonable amount of time. The rule therefore has not been changed based on this comment.

Section 2.6. In this section of the proposed rule, we amended paragraph (f) to provide refunds to requesters that overpaid fees because the bureau placed their request in the wrong fee category. A comment expressed concern that this change was arbitrary and capricious or could price requesters ''out of the market.'' As this change increases the ability of requesters to obtain refunds for incorrectly charged fees, it was not been changed based on this comment.

Section 2.12. In this section of the proposed rule, we amended paragraph (d) to clarify when the Department will engage in consultations and/or referrals as described in the proposed changes to section 2.13. The purpose of this change was to make the language of section 2.12 consistent with section 2.13. Comments expressed concern that the purpose of this change was unclear and it may prevent the Department from working with other agencies that are the ''repositories of records.'' This comment appears to misunderstand the consultation and referral process, suggesting that it is a means to collect records from entities outside the Department. As this is not the case, we did not change the rule based on this comment.

Section 2.13. In this section of the proposed rule, we amended each paragraph to clarify and simplify when and how the Department will engage in consultations and referrals. The purpose of this change was to eliminate unnecessary consultations and referrals that may delay the production of records to requesters. Comments expressed concern that we were eliminating ''common-sense requirements'' to work with other agencies to answer requests or creating exemptions to referrals and the changes may prevent the Department from working with other agencies that are the repositories of records. These comments misapprehend the purpose and impact of the change. We are not eliminating requirements to work with other agencies; rather, we are clarifying when we will engage in referrals and consultations. Additionally, as noted above, consultations and referrals are not a means to collect records from other agencies. The rule therefore was not been changed based on these comments. We did, however, clarify paragraph (b)(2) concerning records that are classified or may be appropriate for classification. Another comment suggested that this section include a protocol for exchanging information with state governments without making the records subject to disclosure under the FOIA. We do not believe records provided to the Department by state governments may be protected from disclosure under the FOIA absent statutory authority to do so and, therefore, the rule has not been changed based on this comment. Another comment suggested that when notifying a requester of a referral, we explicitly note whether the referral is for all or part of the request. We have updated and clarified paragraph (b)(3) in accordance with this comment. Another comment expressed concern about the discussion in paragraph (b)(4) concerning when a referral would be inappropriate, stating that it would allow the Department ''not to respond to citizen inquiries.'' This reflects a misunderstanding of the provision.

Eliminating unnecessary referrals will reduce unnecessary delay and enable the Department to respond more quickly to requests. Nevertheless, to address any confusion on this point, the Department has clarified this provision by replacing the word ''consult'' with ''coordinate.''

Section 2.14. In this section of the proposed rule, we added a sentence expressly providing that the bureau may modify the ordinary practice of processing requests within a given processing track on a first-in, first-out basis by imposing monthly processing limits in order to treat FOIA requesters equitably by responding to a greater number of FOIA requests each month. The proposed language was intended to allow the bureau to utilize an approach similar to that of the Federal Bureau of Investigation that was favorably acknowledged by the United States Court of Appeals for the D.C. Circuit in *National Security Counselors* v. *United States Department of Justice,* 848 F.3d 467, 471–72 (D.C. Cir. 2017). Comments expressed concern this change would limit the number of FOIA requests a requester may submit in a given month, monthly processing limits are not authorized by the FOIA, and the approach is unprecedented. Although we do not believe the proposed change would have limited the number of requests that may be submitted in a given month or that it is not authorized under the FOIA, we recognize that the proposed language created confusion and have therefore withdrawn it.

Section 2.15. In this section of the proposed rule, we amended paragraph (c) to clarify the Department's multitrack processing provisions. The purpose of these changes was to clarify how multitrack processing works in the Department and to re-name the ''Exceptional/Voluminous'' track as that name was two words long and had created some confusion. Some comments objected to the premise of multitrack processing, stating the amendments attempted to the change the statutory timelines of the FOIA. Some comments questioned wording choices and/or sought clarification. As multitrack processing is expressly authorized by the FOIA (5 U.S.C. 552(a)(6)(D)(i)), the comments challenging the premise of multitrack processing did not result in a change to the rule. However, based on the comments, we added an introductory phrase to provide additional clarity and transparency as to how we assign particular requests to particular tracks. The additional language clarifies we place requests in processing tracks based on how long it would generally take to process them, not based on how long it will actually take to process them due to other factors, such as existing backlogs.

Sections 2.16, 2.18, 2.19, 2.28, 2.37, 2.51, 2.57, 2.58, 2.59, and 2.62. In these sections of the proposed rule, we proposed changing the phrase ''time limit'' to ''time frame.'' The purpose of this change was to address concerns that this language confused requesters about timing issues. Comments suggested the change would create more confusion about timing issues and was perceived as inconsistent with the language of the FOIA (for example, 5 U.S.C. 552(a)(4)(A)(viii)(II)(aa)). Upon consideration of the comments, we found the changes were not consistent with our purpose and have withdrawn them.

Section 2.17. In the proposed rule, we removed this section to be consistent with proposed changes to section 2.4. Upon consideration of the comments and in light of the final changes to section 2.4, (discussed above), this change is no longer required and we have withdrawn it.

Section 2.20. In this section of the proposed rule, we amended paragraphs (a), (b), and (c) to clarify when and how the Department will grant expedited processing consistent with the statutory requirements in the FOIA. Comments raised concerns that the changes would harm the FOIA requester community by improperly raising the bar for expedited processing. These comments misapprehend the purpose or effect of the proposed changes. The changes underscore the legal standard for expedited processing established by the United States Court of Appeals for the D.C. Circuit in *Al-Fayed* v. *Central Intelligence Agency.,* 254 F.3d 300 (D.C. Cir. 2001) to assist the FOIA requester community to craft appropriate expedited processing requests. The changes will also help ensure requesters do not receive processing ahead of all other non-expedited requesters unless they qualify under the legal standard. We therefore have not changed the rule based on these comments. However, we further revised paragraph (c) to address what happens when only a portion of a request qualifies for expedited processing. Comments also raised concerns that the change to paragraph (a)(2)(iii), removing a phrase concerning breaking news, would harm transparency, lead to attempts to limit media requests, and was contrary to the public interest. Upon consideration of the comments, we are revising rather than removing this phrase to clarify that we will process expedited processing requests in accordance with the caselaw noted above and the legislative history of the FOIA. Comments also raised concerns about the requirement to consult with the Office of the Solicitor on grants of expedited processing, suggesting that it will allow political interference. This concern is misguided. Attorneys in the Office of the Solicitor are in the best position to apply the legal standard for expedited processing based on their legal expertise. Accordingly, this section was not been changed based on these comments.

Section 2.23. In this section of the proposed rule, we added a phrase to paragraph (c) to allow bureaus to make certain routine withholdings without consulting the Office of the Solicitor. Comments raised concerns this was an attempt at political interference and that this provision could prevent the FOIA offices from seeking attorney guidance on non-routine matters. We believe this reflects a misunderstanding of both the role of the Office of the Solicitor and the purpose of the proposed change. Currently, the Office of the Solicitor must approve all withholdings to ensure that they are legally justified. The amendments would permit the Office of the Solicitor to pre-approve routine withholdings such as the redaction of social security numbers pursuant to Exemption 6, rather than requiring legal review of those withholdings. This change will enable the FOIA processors and the Department's attorneys to use their time more efficiently and process records that contain routine withholdings more quickly. The rule therefore has not been changed based on these comments. One comment suggested that we issue preapprovals in the form of memoranda that are readily available to the public and cited in response letters. While we decline to include this suggested process in the regulations, we are considering how best to make information concerning the preapproval of routine withholdings available to the public.

Section 2.24. In this section of the proposed rule, we added a phrase to paragraph (b)(4) noting that a bureau will not provide an estimate of the volume of records withheld when it does not have or could not locate any responsive records. The purpose of this change is to acknowledge that we cannot provide an estimate of volume when we do not locate responsive records. Comments suggested this change was awkward and/or unnecessary. Although it may seem obvious that the bureaus cannot provide an estimate of volume when they do not have or cannot locate responsive records, confusion has arisen on this point in the past. The rule therefore has not been changed based on these comments. We also added a phrase to paragraph (b)(5) stating that the name and title of the attorney consulted would not be included in a denial notification when the withholding was made pursuant to a preapproval authorized in section 2.23(c). Comments expressed concern that this change favored secrecy over transparency. Upon consideration of the comments, we have withdrawn this proposed change as inconsistent with our purpose for the rule.

Section 2.27. In this section of the proposed rule, we added the term ''due diligence'' to paragraph (a), to provide that bureaus must exercise due diligence to promptly notify submitters when we receive a FOIA request for submitter information that may be confidential. This change is necessary because it is not always possible to notify the submitter. For example, an individual submitter may have died or a business submitter may have closed since submitting the records. The Department's current regulations require without exception that the Department notify submitters. Inserting a due diligence standard permits the Department to discontinue its efforts to notify submitters when such efforts are futile. We believe the FOIA community will benefit from this change because it will allow the Department to move forward with processing requests after it has exercised due diligence in seeking to contact submitters. A comment asked for a definition of due diligence in this context. What constitutes due diligence will vary based on the circumstances. The rule therefore was not been changed based on this comment. Another comment recommended amending the provision to permit the Office of the Solicitor to preapprove the withholding of certain categories of information under Exemption 4 without consulting with the submitter of the information. Another comment requested we communicate with submitters only through email (particularly when we must contact a voluminous number of submitters). These comments concern parts of the section and rule that we are not proposing to amend. The rule therefore was not changed based on these comments.

Section 2.29. In this section of the proposed rule, we added a new paragraph (c) to provide that a bureau will not notify a submitter of a request for their possibly confidential information when the bureau has exercised due diligence to do so, but was unsuccessful. One comment suggested we add language to the section providing that we will not notify the submitter under specific circumstances (for example, when the submitter has provided ''false contact information''). We believe our existing language is sufficiently broad and it is unnecessary to list specific circumstances, as recommend by this comment.

Section 2.45. In this section of the proposed rule, we replaced a phrase in paragraph (a) and removed paragraph (f) to clarify and streamline the factors we consider when evaluating fee waiver requests. Comments raised concerns that the changes were ''pointlessly specific,'' arbitrary, disadvantageous to requesters, could price requesters ''out of the market,'' were contrary to the FOIA, and/or were unduly restrictive. Upon consideration of the comments, we have concluded that the change concerning verification in paragraph (a) was not helpful and have withdrawn it. We have also concluded that removing paragraph (f) would lead to confusion rather than useful streamlining and have withdrawn that proposed change. The remaining change in paragraph (a) clarifies the factors we consider when evaluating fee waiver requests. As this information will assist requesters to formulate better fee waiver justifications, we are not changing this aspect of the rule.

Section 2.48. In this section of the proposed rule, we amended and/or redesignated a number of paragraphs in an effort to clarify how we evaluate fee waiver requests. Comments raised concerns that the changes reflected an attempt to create increased requirements for eligibility, an undue burden, unduly restrict the granting of fee waivers to requesters, and/or could price requesters ''out of the market.'' The purpose of this change was to clarify when the Department will grant fee waivers consistent with the statutory requirement in the FOIA. This clarification will help the FOIA requester community by helping them effectively prepare fee waiver requests. The rule therefore was not been changed based on these comments. Comments raised concerns that the addition of the word ''significantly'' to paragraph (a)(2) was unreasonably burdensome. This change mirrors the language of the FOIA (5 U.S.C. 552(a)(4)(A)(iii)) and, therefore, the rule has not been changed based on these comments. Comments raised concerns that changes to paragraph (a)(2)(i) were inaccurate, arbitrary, and imposed an unlawful burden upon requesters. Some of these comments raised particular concerns about the phrase ''public domain,'' stating it was unclear and unhelpful. Based on these comments, we have removed this phrase and amended the paragraph to clearly state the factors we consider when deciding whether the content of a record is meaningfully informative. A comment raised concerns that changes to paragraph (a)(2)(iv) might only allow subject matter experts to be eligible for a fee waiver. While subject matter expertise is a longstanding factor in receiving a fee waiver, it is not dispositive. The rule therefore has not been changed based on this comment. Comments expressed concern that the changes to paragraph (b) allow the Department to speculate about the commercial interest or activities of a requester rather than focusing on the intended use of the information. Comments also suggested this paragraph is confusing. After considering these comments, we revised the proposed language to make it clear that the bureaus consider the intended use of the information. A comment to paragraph (b)(5)(ii) recommended that the Department expand the circumstances in which a requester must demonstrate the intended use of the information to make various decisions and notifications required by Exemption 4 of the FOIA. As we do not generally use the fee waiver information discussed in this section to inform our Exemption 4 decisions and notifications, the rule was not changed based on this comment.

Section 2.49. In this section of the proposed rule, we added a new paragraph (a)(3). The purpose of this change was to clarify that requesters will not receive fee estimates until their requests are perfected. A comment stated this change would allow the Department to forgo providing notice to requesters of anticipated fees. We believe this comment reflects a misapprehension of the proposed change. Paragraph (a) simply clarifies that the bureaus will not provide fee notices to requesters until the requests are perfected. Another comment stated that the amendment could potentially price requesters ''out of the market.'' As the change will not impact fees or other costs incurred by requesters, the rule has not been changed based on this comment. Another comment asked if the current (a)(3) would be replaced with the new (a)(3). It will not, the old (a)(3) is becoming the new (a)(4).

Section 2.54. In this section of the proposed rule, we modified language in paragraph (a) to streamline and clarify our aggregation procedures. Comments expressed concerns that the changes were confusing, arbitrary, could price requesters ''out of the market,'' would permit the Department to make value judgments, and/or could conflict with existing fee guidelines on aggregation issued by the Office of Management and Budget (OMB) in 1987. Based upon these comments, we revised the changes to paragraph (a) and added a new paragraph (c) to make it clear when we will aggregate requests for administrative purposes (such as placement in processing tracks) versus when we will do so for fee purposes in accordance with the OMB Fee Guidelines.

Section 2.70. In this section of the proposed rule, we modified the definition of ''Educational Institution'' to allow more requesters to qualify for this advantaged fee category consistent with *Sack* v. *Department of Defense,* 823 F.3d 687 (D.C. Cir. 2016). A comment expressed concern that this change was arbitrary and capricious or could price requesters ''out of the market.'' This comment reflects a misunderstanding of the change as it will enable additional requesters to qualify for this advantaged fee category. Additionally, this classification is just one of many elements of our determination to charge fees to a particular requester for a particular request. The rule therefore has not been changed based on this comment. We also added a phrase to the definition of ''Multitrack Processing,'' to provide more information to requesters about how the multitrack process works. A comment stated the change ''appears to codify Interior's problematic practice of delaying responses to FOIA requests until a requester files a complaint in court.'' This reflects a misunderstanding of the proposed change as well as the concept of multitrack processing. Multitrack processing is expressly authorized by the FOIA (5 U.S.C. 552(a)(6)(D)(i)) and is not a means of delaying responses to FOIA requests until litigation is filed. This comment therefore did not result in a change to the rule. We also proposed modifying the definition of ''Record'' to track recent Federal court decisions and the 2017 Department of Justice guidance entitled *Defining a ''Record'' under the FOIA.* The change was intended to enable the Department to target the records requesters are seeking and avoid unnecessary processing of non-responsive material. Comments suggested the new wording was unclear or circular, was contrary to the FOIA, could hinder requesters from obtaining information sought, and/or mirrored Privacy Act language. The purpose of the change was to inform the public that the Department would apply the Department of Justice guidance as well as pertinent case law, but we have withdrawn the language as it was unnecessary and created confusion. We also modified the definition of ''Representative of the News Media,'' by adding a sentence to clarify when employing editorial skills will be a requirement. Comments expressed concern that this change was unduly narrowing, noting that legitimate news outlets often disseminate raw data as part of larger editorial projects. Based upon these comments, we have modified the definition to address that circumstance. A comment expressed concern that this change was arbitrary and capricious or could price requesters ''out of the market.'' This comment is misguided, as the change in the definition simply clarifies a preexisting legal requirement. Accordingly, the rule was not changed based on this comment.

7. Comments Outside the Scope of This Rulemaking

Some comments concerned sections of the regulations or issues that we did not raise in the proposed rule. Those comments did not lead to changes to the rule with the exception of one comment discussed in the Technical and Procedural Comments section below.

C. Technical and Procedural Comments

Sections 2.6(b), 2.12(d), 2.13(c), 2.17, and 2.29(c) have received minor technical amendments to fix typographical errors and/or make clarifications.

III. Compliance With Laws and Executive Orders

1. Regulatory Planning and Review (Executive Orders 12866 and 13563)

E.O. 12866 provides that the Office of Information and Regulatory Affairs will review all significant rules. The Office of Information and Regulatory Affairs has waived its review of the final rule and therefore has not made a significance determination.

E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The Executive Order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this rule in a manner consistent with these requirements.

2. Regulatory Flexibility Act

The Department of the Interior certifies that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

3. Small Business Regulatory Enforcement Fairness Act

This is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:

a. Does not have an annual effect on the economy of $100 million or more.

b. Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

c. Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

4. Unfunded Mandates Reform Act

This rule does not impose an unfunded mandate on State, local, or tribal governments or the private sector of more than $100 million per year. This rule does not have a significant or unique effect on State, local, or tribal governments or the private sector. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

5. Takings (E.O. 12630)

In accordance with E.O. 12630, this rule does not have significant takings implications. A takings implication assessment is not required.

6. Federalism (E.O. 13132)

In accordance with E.O. 13132, this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. It would not substantially and directly affect the relationship between the Federal and state governments. A federalism summary impact statement is not required.

7. Civil Justice Reform (E.O. 12988)

In accordance with E.O. 12988, the Office of the Solicitor has determined that this rule does not unduly burden the judicial system and meets the requirements of sections 3(a) and 3(b)(2) of the Executive Order.

8. Consultation With Indian Tribes (E.O. 13175)

Under the criteria in E.O. 13175, we have evaluated this rule and determined that it would not have substantial direct effects on one or more Indian tribes, the relationship between the Federal government and Indian Tribes or the distribution of power and responsibilities between the Federal government and Indian Tribes (Executive Order 13175, 65 FR 67429, 67429 (Nov. 6, 2000)). While the rule would simplify the rulemaking process, we do not foresee that it will create any obstacles to Tribes that wish to comment on future Department rulemakings.

9. Paperwork Reduction Act

This rule does not contain information collection requirements, and a submission to the Office of Management and Budget under the Paperwork Reduction Act is not required.

10. National Environmental Policy Act

This rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 (NEPA) is not required. Pursuant to Department Manual 516 DM 2.3A(2), Section 1.10 of 516 DM 2, Appendix 1 excludes from documentation in an environmental assessment or impact statement ''policies, directives, regulations and guidelines of an administrative, financial, legal, technical or procedural nature; or the environmental effects of which are too broad, speculative or conjectural to lend themselves to meaningful analysis and will be subject late to the NEPA process, either collectively or case-by-case.''

11. Effects on the Energy Supply (E.O. 13211)

This rule is not a significant energy action under the definition in E.O. 13211. A Statement of Energy Effects is not required. This rule will not have a significant effect on the nation's energy supply, distribution, or use.

12. Clarity of This Regulation

We are required by E.O.s 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(a) Be logically organized;

(b) Use the active voice to address readers directly;

(c) Use clear language rather than jargon;

(d) Be divided into short sections and sentences; and

(e) Use lists and tables wherever possible.

List of Subjects in 43 CFR Part 2

Administrative practice and procedure, Classified information, Courts, Freedom of information Government employees; Privacy.

For the reasons stated in the preamble, the Department of the Interior amends part 2 of title 43 of the Code of Federal Regulations as follows:

PART 2—FREEDOM OF INFORMATION ACT; RECORDS AND TESTIMONY

■ 1. The authority citation for part 2 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 553; 31 U.S.C. 3717; 43 U.S.C. 1460, 1461.

Subpart A—Introduction

§ 2.2 [Amended]

■ 2. In § 2.2, remove the words ''Office of the Solicitor'' and add in their place ''Deputy Chief FOIA Officer''.

Subpart B—How To Make a Request

■ 3. Amend § 2.3 by:
■ a. Revising paragraph (b) to read as set out below.
■ b. Removing paragraph (c).
■ c. Redesignating paragraph (d) as paragraph (c).
■ d. In newly redesignated paragraph (c), removing the words ''FOIA Public Liaison'' and adding in its place ''FOIA Requester Center''.

The revision reads as follows:

§ 2.3 Where should you send a FOIA request?

* * * * *

(b) To make a request for Department records, you must write directly to the bureau that you believe maintains those records by utilizing the written forms of submission listed on the Department's FOIA website, *https://www.doi.gov/foia*, or utilizing physical or facsimile addresses of an appropriate FOIA contact, located at *http://www.doi.gov/foia/contacts.*

* * * * *

■ 4. Amend § 2.4 by:
■ a. Revising paragraph (a) t, and
■ b. Removing paragraphs (e) and (f).

The revision reads as follows:

§ 2.4 Does where you send your request affect its processing?

(a) A request to a particular bureau or a bureau component (for example, a request addressed to a regional or field office) will be presumed to seek only records from that particular bureau or component. A request will not be forwarded to another bureau or component unless it is clear on the face of your request that it was misdirected. For example, if you address your request to an appropriate FOIA contact in the National Park Service and ask for records concerning a specific park, but your request is delivered to the Fish and Wildlife Service, your request was clearly misdirected. In such a case, a FOIA contact in the receiving bureau or component will route the request to a FOIA contact in the proper bureau or component. If you need assistance determining where to send a request, you may seek assistance from the bureau's designated FOIA contact or FOIA Requester Center (see § 2.66 of this part).

* * * * *

§ 2.5 [Amended]

■ 5. In § 2.5 (c), remove the words ''FOIA Public Liaison'' and add in its place the words ''FOIA Requester Center''.

■ 6. Amend § 2.6 by:
■ a. Revising (b) introductory text, and
■ b. In paragraph (f) add the words ''or placement in a different fee category'' after ''partial fee waiver''.

The revision reads as follows:

§ 2.6 How will fee information affect the processing of your request?

* * * * *

(b) If, after taking into consideration your fee category entitlements (see § 2.39 of this part), the bureau anticipates processing costs will exceed $50.00 (see § 2.37(g) of this part) and these processing costs exceed the amount you have agreed to pay or you did not agree in writing to pay processing fees or request a fee waiver, the bureau will notify you:

* * * * *

Subpart C—Processing Requests

§ 2.12 [Amended]

■ 7. In paragraph (d), remove the words ''it did not create or that another bureau or a Federal agency is substantially concerned with'' and add in their place ''primarily concern another bureau or Federal Government agency that is subject to FOIA''.

■ 8. Revise § 2.13 to read as follows:

§ 2.13 How do consultations and referrals work?

(a) When a bureau (other than the Office of Inspector General) locates responsive records that primarily concern another bureau or Federal Government agency that is subject to FOIA, the bureau will determine whether that bureau or agency would be better able to determine whether the record is exempt from disclosure.

(b) If the bureau processing the request believes that another bureau or agency would be better able to determine whether the record is exempt from disclosure, the bureau will contact that bureau or agency to determine whether it should refer the record to that bureau or agency or consult with that bureau or agency.

(1) If the bureau processing the request refers a record to another bureau or agency, that other bureau or agency will respond to you directly about that record. If the bureau processing the request consults with another bureau or agency, the bureau processing the request will respond to you directly.

(2) If the bureau receives a request for records that another agency has classified under any applicable executive order concerning record classification, or that the bureau believes may be appropriate for classification by another agency, it will refer the request for those records to that agency for response.

(3) Whenever a bureau refers any part of the responsibility for responding to a request to another bureau or agency, it will:

(i) Document the referral;

(ii) Maintain a copy of the referred record; and

(iii) Notify you in writing of the referral, including whether all or part of your request has been referred, the name of the bureau or agency to which the record was referred, and that bureau or agency's FOIA contact information.

(4) If disclosure of the identity of the agency to which the referral would be made could harm an interest protected by an applicable exemption, such as the exemption that protects ongoing law enforcement investigations, a referral would be inappropriate and the bureau will coordinate with the agency instead.

(c) When a bureau receives a referral, the bureau will assign the referral to the appropriate processing track as described in § 2.15 of this part and process it according to the date that the consulting or referring bureau or agency received your request as described in § 2.14 of this part.

(d) Bureaus may establish written agreements with other bureaus or agencies to eliminate the need for consultations or referrals for particular types of records.

Subpart D—Timing of Responses to Requests

§ 2.15 [Amended]

■ 10. Amend § 2.15 by:

■ a. In paragraph (c), add the following words ''assigned according to the expected complexity of the collection/review/production process of each request and'' after the words ''tracks are'';

■ b. In paragraphs (c)(1), (2), (3), and (4) remove the word ''will'' and add in its place the words ''would generally''; and

■ c. In paragraph (c)(4), remove the words ''Exceptional/Voluminous'' and add in their place the word ''Extraordinary''.

§ 2.17 [Amended]

■ 11. In § 2.17, remove ''(e)'' and add in its place ''(a)''.

§ 2.19 [Amended]

■ 12. In § 2.19, amend paragraph (b)(2) by removing the words ''its FOIA Public Liaison'', and adding in their place the words ''the FOIA Public Liaison''.

■ 13. Revise § 2.20 to read as follows:

§ 2.20 When will expedited processing be provided and how will it affect your request?

(a) The bureau will provide expedited processing upon request if you demonstrate to the satisfaction of the bureau that there is a compelling need for the records. The following circumstances demonstrate a compelling need:

(1) Failure to expedite the request could reasonably be expected to pose an imminent threat to the life or physical safety of an individual; or

(2) There is an urgency to inform the public about an actual or alleged Federal Government activity and the request is made by a person primarily engaged in disseminating information.

(i) In most situations, a person primarily engaged in disseminating information will be a representative of the news media.

(ii) If you are not a full time member of the news media, to qualify for expedited processing here, you must establish that your main professional activity or occupation is information dissemination, although it need not be your sole occupation.

(iii) The requested information must be the type of information that has particular value that will be lost if not disseminated quickly; this ordinarily refers to a breaking news story that concerns a matter of public exigency.

(iv) Information of historical interest only or information sought for litigation or commercial activities would not qualify, nor would a news media deadline unrelated to breaking news.

(b) If you seek expedited processing, you must submit a statement that:

(1) Explains in detail how all elements and subcomponents of your request meets each element of one or both of the criteria in paragraph (a) of this section; and

(2) Certifies that your explanation is true and correct to the best of your knowledge and belief.

(c) You may ask for expedited processing of your request by writing to the appropriate FOIA contact in the bureau that maintains the records requested any time before the bureau issues its final response to your request. Bureaus will consult with the Office of the Solicitor before granting expedited processing requests and responses to you will include the name and title of the Office of the Solicitor or Office of General Counsel attorney consulted. If only a portion of your request would qualify for expedited processing, we will:

(1) Assign the portion of the request that qualifies for expedited processing a new processing number and place it in the expedited processing track as described in § 2.15;

(2) Place the remainder of the request that does not qualify for expedited processing into the appropriate processing track as described in § 2.15; and

(3) Inform you of the basis for the partial denial of expedited processing and your right to file an appeal as set forth in § 2.20(g) of this subpart.

(d) When making a request for expedited processing of an administrative appeal, submit the request to the appropriate deciding official for FOIA appeals.

(e) The bureau must notify you of its decision to grant or deny expedited processing within 10 calendar days of receiving an expedited processing request.

(f) If expedited processing is granted, the request will be given priority, placed in the processing track for expedited requests, and be processed as soon as practicable.

(g) If expedited processing is denied, the bureau will:

(1) Inform you of the basis for the denial, including an explanation of why the expedited processing request does not meet the Department's expedited processing criteria under this section; and

(2) Notify you of the right to appeal the decision on expedited processing in accordance with the procedures in subpart H of this part.

(h) If you appeal the bureau's expedited processing decision, that portion of your appeal (if it is properly formatted under § 2.59) will be processed before appeals that do not challenge expedited processing decisions.

(i) If the bureau has not responded to the request for expedited processing within 10 calendar days, you may file an appeal (for nonresponse in accordance with § 2.57(a)(8)).

Subpart E—Responses to Requests

§ 2.21 [Amended]

■ 14. In § 2.21(a), remove the words ''its FOIA Public Liaison'' and add in their place the words ''the FOIA Public Liaison''.

§ 2.23 [Amended]

■ 15. In § 2.23(c), remove the word ''record'' and add in its place the words ''record (unless the Office of the Solicitor has expressly preapproved such a withholding)''.

§ 2.24 [Amended]

■ 16. In § 2.24(b)(4), after the word ''unless'' add the words ''the bureau notes that it does not have or could not locate responsive records or that including''.

Subpart F—Handling Confidential Information

§ 2.27 [Amended]

■ 17. In § 2.27(a), add the words ''exercise due diligence to'' following the word ''must''.

■ 18. Amend § 2.29 by:

■ a. In paragraph (a), removing the word ''or'' after the '';''.

■ b. In paragraph (b), adding the words ''or prohibited'' after the word ''required'' and change the existing period to ''; or''.

■ c. Adding a new paragraph (c).

The addition reads as follows:

§ 2.29 When will the bureau not notify a submitter of a request for their possibly confidential information?

* * * * *

(c) The bureau has exercised due diligence to notify the submitter, but its efforts were unsuccessful.

§ 2.31 [Amended]

■ 19. In § 2.31, revise paragraph (a) to read as set out below.

§ 2.31 What must a submitter include in a detailed Exemption 4 objection statement?

(a) To rely on Exemption 4 as a basis for nondisclosure, the submitter must explain why the information is confidential information. To do this, the submitter must provide a detailed written statement that explains why the information is a trade secret or, if the information is not a trade secret, certification that the information is both customarily and actually treated as private by the owner of the information. The statement must also include any available background on whether the information was provided to the government under an assurance that the government would keep it private.

* * * * *

Subpart G—Fees

§ 2.37 [Amended]

■ 20. In paragraph (i), remove the words ''FOIA Public Liaison'' and add in their place the words ''FOIA Requester Center''.

§ 2.45 [Amended]

■ 21. In § 2.45 paragraph (a), remove the words ''based on all available information'' and add in their place the words ''considering the information you have provided''.

§ 2.47 [Amended]

■ 22. In § 2.47 paragraph (d), remove the number ''30'' and add in its place the number ''90''.

■ 23. Revise § 2.48 to read as follows:

§ 2.48 How will the bureau evaluate your fee waiver request?

(a) In deciding whether your fee waiver request meets the requirements of § 2.45(a)(1) of this subpart, the bureau will consider the criteria listed in paragraphs (a)(1) through (a)(4) of this section. You must address and meet each of these criteria in order to demonstrate that you are entitled to a fee waiver.

(1) How the records concern the operations or activities of the Federal government. The subject of the request must concern discrete, identifiable agency activities, operations, or programs with a connection that is direct and clear, not remote or attenuated.

(2) How disclosure is likely to contribute significantly to public understanding of those operations or activities, including:

(i) How the contents of the records are meaningfully informative. The disclosure of information that is already readily available to you from other sources or easily accessible to the public, in either the same or a substantially identical form, would not be meaningfully informative if nothing new would be added to the public's understanding and the bureau informs you of where the requested information is already available;

(ii) What the logical connection is between the content of the records and the operations or activities of the Federal government;

(iii) How disclosure will contribute to the understanding of a reasonably broad audience of persons interested in the subject, as opposed to your individual understanding;

(iv) Your expertise in the subject area as well as your identity, vocation, qualifications, and your plan to disclose the information in a manner that will be informative to the understanding of a reasonably broad audience of persons interested in the subject, as opposed to furthering your individual understanding;

(v) Your ability and intent to disseminate the information to a reasonably broad audience of persons interested in the subject (for example, how and to whom you intend to disseminate the information). If we have categorized you as a representative of the news media under § 2.38, we will presume you have this ability and intent;

(vi) Whether the records would confirm or clarify data that has been released previously; and

(vii) How the public's understanding of the subject in question will be enhanced to a significant extent by the disclosure.

(b) In deciding whether the fee waiver request meets the requirements in § 2.45(a)(2) of this subpart, the bureau will consider any commercial interest of yours that would be furthered by the requested disclosure. To determine whether disclosure of the requested records is primarily in your commercial interest (based on your intended use of the information), the bureau will consider:

(1) Whether the requested disclosure would further any commercial interest of yours.

(2) If you have a commercial interest, the bureau must determine whether that is the primary interest furthered by the request by balancing the commercial interest against the public interest in disclosure of the records. When the requirements of paragraph (a) are satisfied and any commercial interest is not the primary interest furthered by the request, this balancing test shows a waiver or reduction of fees is justified. Bureaus ordinarily will presume that, when a news media requester has satisfied paragraph (a) above, the request is not primarily in the commercial interest of the requester.

(3) You are encouraged to provide explanatory information regarding these considerations.

(4) The bureau will not find that disclosing the requested records will be primarily in your commercial interest where the public interest is greater than any identified commercial interest in disclosure.

(5) If you have a commercial interest that would be furthered by disclosure, explain how the public interest in disclosure would be greater than any commercial interest you may have in the documents.

(i) Your identity, vocation, and intended use of the requested records are all factors to be considered in determining whether disclosure would be primarily in your commercial interest.

(ii) If you are a representative of a news media organization seeking records as part of the news gathering process, we will ordinarily presume that the public interest outweighs your commercial interest. Disclosure to data brokers or others who merely compile and market government information for direct economic return will not be presumed to primarily serve the public interest.

(iii) If you represent a business/corporation/association or you are an attorney representing such an organization, we will presume that your commercial interest outweighs the public interest unless you demonstrate otherwise.

■ 24. Amend § 2.49 by:

■ a. Removing the word ''or'' from paragraph (a)(2);

■ b. Redesignating paragraph (a)(3) as (4);

■ c. Adding a new paragraph (a)(3);

■ d. In the newly redesignated paragraph (a)(4), removing the word ''previously'' and adding in its place the word ''already''; and

■ e. In paragraph (e), removing the words ''FOIA Public Liaison'' and adding in their place the words ''FOIA Requester Center''.

The addition reads as follows:

§ 2.49 When will you be notified of anticipated fees?

(a) * * *

(3)Your request does not reasonably describe the records sought and/or does not explicitly state that you will pay all fees associated with the processing of the request, that you will pay fees up to a specified amount, and/or that you are seeking a fee waiver; or

* * * * *

■ 25. In § 2.54, add paragraph (c) to read as set out below:

§ 2.54 When will the bureau combine or aggregate requests?

* * * * *

(c) The bureau may administratively aggregate requests without charging fees accordingly when it reasonably believes you, or a group of requesters acting in concert with you, are dividing a single request into a series of requests on a single subject or related subjects.

(1) The bureau may presume that multiple requests on a single subject or related subjects made within a 30-day period are dividing a single request into a series of requests.

(2) The bureau may administratively aggregate requests separated by a longer period only where there is a reasonable basis for determining that aggregation is warranted in view of all the circumstances involved.

Subpart I—General Information

■ 26. Revise § 2.66 as follows:

§ 2.66 What are FOIA Requester Centers and the FOIA Public Liaison?

(a) FOIA Requester Centers typically serve as your first point of contact for questions about how the FOIA works. Before and after you make a request, FOIA Requester Centers can assist you by:

(1) Identifying information that is already posted and available;

(2) Informing you about the types of records maintained by the bureau;

(3) Providing guidance on formulating effective requests;

(4) Describing the Department's various processing tracks and the average processing times for the various tracks;

(5) Answering questions about expedited processing standards and the FOIA's fee provisions; and

(6) Answering questions about the status of an existing request.

(b) The FOIA Public Liaison is responsible for:

(1) Assisting in reducing delays;

(2) Increasing transparency and understanding of the status of requests; and

(3) Assisting in the resolution of disputes between you and the agency.

(c) If you need further information or assistance after contacting the applicable FOIA Requester Center and the FOIA Public Liaison, you may wish to seek dispute resolution services from the Office of Government Information Services.

(d) Contact information for the FOIA Requester Centers and FOIA Public Liaison is available at *https://www.doi.gov/foia/foiacenters.*

■ 27. Amend § 2.70 by:

■ a. In the definition of ''Educational institution'', add a new sentence after the first sentence;

■ b. In the definition of ''Multitrack processing'', after the words ''first-in/first-out basis'' add the words '', but other factors, such as litigation, may affect the sequence and/or timing of processing''; and

■ c. In the definition of ''Representative of the news media'', add a new sentence after the first sentence.

§ 2.70 What definitions apply to subparts A through I of this part?

* * * * *

Educational institution * * * Teachers (if they demonstrate how the requested records will further their teaching, scholarly research, or production of scholarly works) and students (if they demonstrate how the requested records will further their coursework or other school-sponsored activities) may also qualify as an educational institution for the purposes of this definition. * * *

* * * * *

Representative of the news media * * * Simply distributing copies of released records, electronically or otherwise, does not qualify as using editorial skills to turn the raw materials into a distinct work. * * *

* * * * *

Dated: October 24, 2019.

Rachel Spector,

Deputy Chief Freedom of Information Act Officer.

[FR Doc. 2019–23783 Filed 11–13–19; 8:45 am]

BILLING CODE 4310–10–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 54

[WC Docket No. 10–90; FCC 18–176]

Connect America Fund

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: In this document, the Federal Communications Commission (Commission) announces that the Office of Management and Budget (OMB) has approved, for a period of three years, an information collection associated with the rules for the Connect America Fund contained in the Commission's *Connect America Fund Order,* FCC 18–176. This document is consistent with the *Connect America Fund Order,* which stated that the Commission would publish a document in the **Federal Register** announcing the effective date of the revised information collection requirement.

DATES: The amendment to § 54.316 published at 84 FR 4711, February 19, 2019, is effective November 14, 2019.

FOR FURTHER INFORMATION CONTACT: Alexander Minard, Wireline

Competition Bureau at (202) 418–7400 or TTY (202) 418–0484. For additional information concerning the Paperwork Reduction Act information collection requirements contact Nicole Ongele at (202) 418–2991 or via email at *Nicole.Ongele@fcc.gov*.

SUPPLEMENTARY INFORMATION: The Commission submitted revised information collection requirements for review and approval by OMB, as required by the Paperwork Reduction Act (PRA) of 1995, on August 20, 2019. OMB approved the revised information collection requirements on November 5, 2019. The information collection requirements are contained in the Commission's *Connect America Fund Order,* FCC 18–176, published at 84 FR 4711, February 19, 2019. The OMB Control Number is 3060–1228. The Commission publishes this document as an announcement of the effective date of the rules published on February 19, 2019. If you have any comments on the burden estimates listed in the following, or how the Commission can improve the collections and reduce any burdens caused thereby, please contact Nicole Ongele, Federal Communications Commission, Room 1–A620, 445 12th Street SW, Washington, DC 20554. Please include the OMB Control Number, 3060–1228, in your correspondence. The Commission will also accept your comments via email at *PRA@fcc.gov*. To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the Commission is notifying the public that it received OMB approval on November 5, 2019, for the amendment to 47 CFR 54.316 published at 84 FR 4711, February 19, 2019. Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number is 3060–1228. The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060–1228.

OMB Approval Date: November 5, 2019.

OMB Expiration Date: November 30, 2022.

Title: Connect America Fund—High Cost Portal Filing.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities, not-for-profit institutions.

Number of Respondents and Responses: 1,599 unique respondents; 3,730 responses.

Estimated Time per Response: 8 hours–60 hours.

Frequency of Response: On occasion, quarterly reporting requirements, annual reporting requirements, one-time reporting requirement and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151–154, 155, 201–206, 214, 218–220, 251, 252, 254, 256, 303(r), 332, 403, 405, 410, and 1302.

Total Annual Burden: 68,607 hours.

Total Annual Cost(s): No Cost.

Nature and Extent of Confidentiality: We note that USAC must preserve the confidentiality of certain data obtained from respondents; must not use the data except for purposes of administering the universal service programs or other purposes specified by the Commission; and must not disclose data in company-specific form unless directed to do so by the Commission. Respondents may request materials or information submitted to the Commission or the Administrator believed confidential to be withheld from public inspection under 47 CFR 0.459 of the FCC's rules.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: The Commission will use the information collected under this information collection to address the requirement that certain carriers now have increased broadband deployment reporting obligations about their locations which meet their broadband deployment public interest obligations via an electronic portal (''portal''). This collection also addresses additional offers of model-based support. With the new additional offers, there will be more carriers subject to the model-based deployment milestones and fewer carriers remaining on legacy support.

In March 2016, the Commission adopted an order reforming its universal service support program in areas served by rate-of-return carriers. Connect America Fund et al., WC Docket Nos. 10–90 et al., Report and Order, Order and Order on Reconsideration, and Further Notice of Proposed Rulemaking, FCC 16–33 (*2016 Rate-of-Return Order*). In May 2016, the Commission adopted rules to implement a competitive bidding process for Phase II of the Connect America Fund. Connect America Fund et al., WC Docket Nos. 10–90 et al., Report and Order and Further Notice of Proposed Rulemaking, FCC 16–64 (*Phase II Auction Order*). In August 2016, the Commission adopted a plan tailored to certain carriers, both fixed and mobile, serving Alaska. Connect America Fund et al., WC Docket No. 10–90 et al., Report and Order and Further Notice of Proposed Rulemaking, FCC 16–115 (*Alaska Plan Order*). In January 2017 the Commission adopted an order which granted New York State waiver of the Connect America Phase II auction program rules, subject to certain conditions. Connect America Fund et al., WC Docket Nos. 10–90 et al., FCC 17–2 (*New York Auction Order*). Also, in December 2018, the Commission adopted reforms that included additional offers of model-based support and increased broadband deployment obligations. Connect America Fund et al., WC Docket No. 10–90 et al., Report and Order, Further Notice of Proposed Rulemaking and Order on Reconsideration, FCC 18–176 (*2018 Rate-of-Return Order*).

The *2016 Rate-of-Return Order* required that the Universal Service Administrative Company (USAC) establish the portal so that carriers could file their location data with the portal starting in 2017. The *2016 Rate-of-Return Order* required all recipients of Phase II model-based support and rate-of-return carriers to submit geocoded location data and related certifications to the portal. Recipients of Phase II model-based support had been required to file such information in their annual reports due by July 1. The *Phase II Auction Order, Alaska Plan Order,* and *New York Auction Order* require carriers to build-out networks capable of meeting their public interest obligations and report, to an online portal, locations to which auction winners had deployed such networks. The *Alaska Plan Order* also made portal reporting requirements for carriers to submit fiber/microwave middle-mile network maps.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[WT Docket No. 02–55]

Improving Public Safety Communications in the 800 MHZ Band

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) streamlines our rules and procedures to accelerate the successful conclusion of the Commission's 800 MHz band reconfiguration program, or rebanding. The 800 MHz rebanding initiative is a 14-year, $3.6 billion program, involving Sprint Corporation (Sprint) and 800 MHz licensees. At the conclusion of this initiative, public safety, critical infrastructure and other 800 MHz licensees will operate in a reconfigured 800 MHz band free of the interference that plagued first responders' mission-critical communications before the Commission instituted rebanding in the 800 MHz Report and Order.

DATES: Effective December 16, 2019.

FOR FURTHER INFORMATION CONTACT: Roberto Mussenden, Policy and Licensing Division, Public Safety and Homeland Security Bureau, (202) 418–1428.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking in WT Docket No. 02–55, FCC 19–108, released on October 28, 2019. The document is available for download at *http://fjallfoss.fcc.gov/edocs_public/*. The complete text of this document is also available for inspection and copying during normal business hours in the FCC Reference Information Center, Portals II, 445 12th Street, SW, Room CY–A257, Washington, DC 20554. To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *FCC504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

1. In the Order, the Commission directs the 800 MHz Transition Administrator to streamline its closing process going forward to provide that, when Sprint and an individual licensee have completed physical reconfiguration and there are no unresolved disputes between them, closing of the band reconfiguration process for that licensee will be deemed final upon Sprint's delivery of the executed completion certification to the Transition Administrator and the Transition Administrator acknowledging receipt by letter to the licensee. Upon completion of these steps, the licensee will have no further rebanding obligations to Sprint, the Transition Administrator, or the Commission, and will no longer have recourse to Transition Administrator mediation or the Commission's processes for rebanding-related matters.

2. To promote facilitation of the dispute resolution process established in the 800 MHz Report and Order, we direct licensees to provide notice of any unresolved dispute to the Transition Administrator and Sprint within 20 business days of the effective date of this Order. Thereafter, the licensee and Sprint must enter mediation as directed by the Transition Administrator, pursuant to the Commissions' rules. We direct the Transition Administrator to hold mediation sessions each weekday, except for federal holidays. If agreement is not reached after 10 mediation sessions, the designated mediator, within 5 business days, will forward the mediation record to the Bureau for decision. On notification to the parties by the Transition Administrator that the record has been submitted, the parties have 5 business days to submit statements of position. No responsive pleadings will be accepted. If a licensee does not participate in mediation, does not submit a timely statement of position to the Bureau, or does not file a timely petition for reconsideration, application for review, or petition for a de novo hearing following a Bureau order adjudicating the dispute, the licensee will be deemed by the Bureau to have completed rebanding, and all of its rights under the Commission's 800 MHz rebanding orders, including, without limitation, the right to the Transition Administrator's dispute resolution process and reimbursement of costs, will be terminated.

3. Licensees that have completed physical reconfiguration as of the effective date of this Order, have no unresolved dispute with Sprint, but have not provided a completion certification to Sprint must submit an executed completion certification to Sprint within 20 business days of the effective date of this Order. Upon verification from Sprint that, despite the completion of physical reconfiguration and the absence of any disputes related to costs and expenditures, a licensee has not timely provided a completion certification as required, the Bureau will deem the licensee to have completed rebanding and all of its rights under the Commission's 800 MHz rebanding orders, including, without limitation, the right to the Transition Administrator's dispute resolution process and reimbursement of costs, will be terminated.

4. Finally, consistent with the streamlining steps taken above, we adopt an expedited closing process applicable to those licensees that have not completed physical reconfiguration as of the effective date of the instant Order. Upon completion of physical reconfiguration, such licensees will have 45 calendar days to either, (1) complete cost reconciliation and submit an executed completion certification to Sprint, or (2) notify the Transition Administrator of any unresolved dispute with Sprint regarding their reconfiguration. Licensees will then be subject to the expedited closing or dispute resolution procedures described above, as applicable.

5. We direct the Transition Administrator to revise its processes and documentation in accordance with the foregoing and we modify our procedures accordingly. Notice and comment are not necessary here because the changes that streamline the filings required of the parties to rebanding agreements and the process by which we direct the Transition Administrator to review those filings are ''rules of agency organization, procedure, or practice.''

Procedural Matters

A. Paperwork Reduction Act of 1995 Analysis

6. The Order document does not contains new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13.

B. Report to Congress

7. The Commission will not send a copy of this Report and Order to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A), because the Commission did not adopt any rules of particular applicability.

Ordering Clause

8. Accordingly, *It is ordered* that, pursuant to sections 4(i), 4(j), 301, 303, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 301, 303, and 403, the Order *is hereby adopted*.

Federal Communications Commission.

AGENCY FOR INTERNATIONAL DEVELOPMENT

48 CFR Chapter 7

RIN 0412–AA93

Agency for International Development Acquisition Regulation (AIDAR): Revisions to the Incentive Awards Program for Personal Services Contractors (PSCs)

AGENCY: U.S. Agency for International Development.

ACTION: Final rule.

SUMMARY: The rule amends the AIDAR's provisions that pertain to incentive awards for personal services contracts with individuals.

DATES: *Effective Date:* December 16, 2019.

FOR FURTHER INFORMATION CONTACT: Richard E. Spencer, Procurement Analyst, Telephone: (202) 567–4781 or email: *rspencer@usaid.gov* for clarification of content or information pertaining to status or publication schedules. All communications regarding this rule must cite AIDAR RIN No. 0412–AA93.

SUPPLEMENTARY INFORMATION:

A. Proposed Rule and Requests for Comment

USAID published a proposed rule in the **Federal Register** at 84 FR 9739 on March 18, 2019. The public comment period ended May 17, 2019, and the Agency received no comments on the proposed rule. Therefore, USAID is publishing this final rule without change.

B. Background

Over the last 27 years, USAID has awarded personal services contracts to individuals as necessary for the Agency to carry out its mission in the United States and overseas. USAID awards PSCs with individuals based on multiple authorities: (1) Section 636(a)(3) of the Foreign Assistance Act of 1961, as amended (FAA, Section 2396 of Title 22 of the United States Code [U.S.C.]), for personal services abroad; (2) annual appropriations for Foreign Operations for a maximum number of PSCs in the United States (*e.g.,* Section 7057(g) of Division K of Pub. L. 114–113 for Fiscal Year 2016); or (3) program-specific provisions of the FAA, the Food for Peace Act, or an appropriations act that authorizes the use of a broad range of implementation authorities toward those programmatic purposes ''notwithstanding any other provision of law'' (*e.g.,* FAA Section 491, Section 2292 of Title 22 of the U.S.C., which authorizes international assistance ''to alleviate human suffering caused by natural and manmade disasters . . .'').

As of September 2015, approximately eight (8) percent of USAID's total workforce were U.S. PSCs, and 47 percent were cooperating-country or third-country national (CCN or TCN) PSCs. The Agency's overseas local staff are CCNPSCs, with the exception of a very few remaining Foreign Service National (FSN) direct-hire employees.

Since the Agency depends on PSCs as part of its workforce for its operations, USAID seeks to recognize and motivate excellence in the performance of their contracts. Because PSCs are not authorized to participate in programs administered by the Office of Personnel Management (OPM), in May 2004, then-Administrator Andrew Natsios used the Agency's discretionary authority to establish a separate incentive-awards program for PSCs, distinct from the Agency's incentive awards program authorized by OPM for the Agency's U.S. Direct-Hire (USDH) employees (see 5 U.S.C. 4501 *et seq.* regarding incentive-awards programs for ''superior accomplishment'' by employees within the definitions of 5 U.S.C. 2105 and 5 CFR part 451). The Administrator approved a deviation from Appendix D of the AIDAR to expand the non-monetary incentive-awards program for PSCs to include limited monetary awards such as ''On The Spot'' or Special Act cash and Time-Off awards. The Agency implemented the revised monetary incentive-awards program for PSCs under USAID Acquisition and Assistance Policy Directive (AAPD 04–15) issued on October 15, 2004, which authorized USPSCs, and certain TCNPSCs on an exceptional basis, to be eligible for these three types of monetary incentive awards under programs managed by USAID's Missions, Bureaus, or Independent Offices (M/B/IOs).

In March 2015, USAID's Special Awards Committee (SAC) conducted a review of the Agency's awards program for its USDH employees. Following that review, on December 22, 2015, then-Acting Administrator Alfonso Lenhardt approved a deviation to further expand the Agency's PSC Incentive Awards program to include additional types of monetary and non-monetary awards similar to those provided to USAID's USDH employees.

To implement the incentive-awards programs for PSCs as approved by the Agency in 2004 and 2015, this final rule revises Appendices D and J of the AIDAR to replace the deviations approved in 2004 and 2015 and make them permanent.

C. Discussion

This final rule amends the AIDAR to establish a separate monetary and non-monetary incentive-awards program to recognize and reward individual PSCs for their contributions to the accomplishment of USAID's mission, goals, and objectives.

Based on Statute—Section 636(a)(3) of the FAA, as amended; and by regulation—Appendices D and J of the AIDAR, PSCs are not allowed to participate in any program administered by OPM. Recognition of individual accomplishments by PSCs has been limited to non-monetary incentive awards and certificates of appreciation. However, based on deviations and policy directives signed by the Administrator and Acting Administrator in 2004 and 2015, respectively, USAID established an interim, separate incentive-awards program to make PSCs eligible to receive incentive awards similar to those available under the Agency's incentive-awards program for USDH employees.

USAID implements its incentive-awards program for USDH employees under parameters set in Chapter 491 of the Agency's Automated Directives System (ADS). The Agency will incorporate the new PSC incentive-awards program authorized by this final rule into Appendices D and J of the AIDAR and implement it as described in USAID's PSC policy in ADS Chapter 309. Where appropriate, this incentive-awards program will closely parallel the program for USDH employees. The Agency will make any incentive award payments from the same source of funding used for each individual PSC's contract, and in all cases separately from the pool of funds maintained for incentive awards for USAID USDH employees. Recognizing that PSCs receive an annual pay-comparability adjustment similar to what U.S. Direct-Hires receive, as well as an annual within-grade salary increase for work evaluated at the ''satisfactory performance'' level, Agency policy requires that these incentive awards be for performance or a special act that goes above and beyond the minimum satisfactory performance required under a contract. USAID will recognize and encourage exceptional performance by

PSCs when they perform special acts or create innovations that contribute to efficiency, economy, or other improvements in U.S. Government operations, in the same way USAID recognizes superior performance by its USDH employees. The proportion of PSCs who receive cash awards at a M/B/IO or at the Agency level, and the total amount of the incentive awards, will be consistent with, and will not exceed, the Agency's existing policy for incentive awards to USDH employees, as set by USAID's Senior Management.

The Agency's internal policies in ADS Chapter 309 describe the criteria for each incentive award, any cash or other limitations associated with each incentive award, how a PSC's supervisor(s) or others may nominate individuals, and how such nominations are reviewed and recommended for approval. Nominations for the annual Agency-level incentive awards generally follow the same procedures, and use the same documentation, as currently required for USAID's USDH employees.

Regulatory Basis

Since the Agency depends on PSCs and their contributions, and as the statute, Section 636(a)(3) of the FAA of 1961, as amended, and the regulation, Appendix D of the AIDAR, do not permit PSCs to participate in OPM-administered programs, the Administrator has decided to use the Agency's discretionary authority to establish a separate monetary incentive-awards program for its PSCs. This incentive-awards program is distinct and separate from the Agency's incentive-awards program for USDH employees described in ADS Chapter 491. Additionally, this final AIDAR rule establishes an incentive-awards program that is different from FAR Subpart 16.4 (Incentive Contracts), as the Agency's PSC contracts are with individuals, and these contracts do not provide profit or fees. The details of this incentive award program are available in a Mandatory Reference to ADS Chapter 309, 309mab—''Incentive Awards Program for Personal Services Contracts with Individuals,'' accessible on the Agency website.

D. Impact Assessment

(1) Regulatory Planning and Review. Under Executive Order (E.O.) 12866, the Office of Information and Regulatory Affairs (OIRA) has designated the final rule ''not significant,'' and therefore it is not subject to review by the Office of Management and Budget (OMB). OMB/OIRA has determined that this Rule is not an ''economically significant regulatory action'' under Section 3(f)(1) of E.O. 12866. This final rule is not a major rule under Section 804 of Title 5 of the U.S.C.

This rule codifies the Agency's deviations to date from the current rule in the Code of Federal Regulations (CFR). The costs calculated in this section are based on upper-end estimates to illustrate the potential impact of this final rule from the baseline costs of the current rule. Under this final rule, incentive awards paid to USPSCs at the level of USAID's Missions, Bureaus, and Independent Offices (M/B/IO), and TCNPSCs with exceptions to be paid on the General Schedule (GS) scale (*i.e.,* ''excepted TCNPSCs'') for FY 2014–2015 averaged $86,158 per year based on historical data provided by the Office of the Chief Financial Officer (M/CFO) in the Bureau for Management. The administrative and processing costs for these awards averaged $47,865. Therefore, the total estimated cost for M/B/IO awards is estimated at $134,023 per Fiscal Year.

For ''Agency-level'' incentive awards issued from USAID headquarters, the total estimated amount that could be paid to all selected PSCs (U.S., TCN, and CCN) is $160,000 per Fiscal Year, assuming nominations are approved for every incentive award. This figure is based on an estimated payout for all of 31 possible cash-award amounts listed in ADS 309mab.

As the Agency-level headquarters incentive awards program is new, and there are no historical data for such incentive awards paid to PSCs, USAID used historical data for incentive awards to U.S. Direct-Hires, as provided by USAID's Office of Human Capital and Talent-Management (HCTM) for estimating the administrative and processing costs. On that basis, administrative and processing costs are estimated at $118,525 per Fiscal Year labor for nominations, selection panels, and the processing of incentive awards, plus the costs of ceremony events for a volume of PSC incentive awards equivalent to those given to USDH employees. Also, as PSCs are eligible for fewer categories of Agency-level incentive awards than are USDH staff, the Agency pro-rated the costs accordingly. Therefore, the total estimated cost for Agency-level incentive awards from headquarters is $278,525 per Fiscal Year.

Based on the above, the M/B/IO awards and Agency-level incentive award issues at headquarters are estimated together estimated to cost $412,547 per Fiscal Year.

Note that for incentive awards at the Mission level for CCN and TCN PSCs, AIDAR Appendix J authorizes such awards in accordance with the local compensation plan at each USAID Mission overseas through the ''Joint Special Embassy'' awards program. While this final rule revises the title of the Mission incentive-awards program by using current terminology, this rule does not otherwise affect the authority for this long-established incentive awards program for CCN and TCN PSCs. Therefore, there are no increased cost implications for such incentive awards under this rule, as it only updates the title of the program under AIDAR Appendix J.

Overall, USAID's awards program affects approximately 5,200 individual PSCs based on USAID's staffing numbers for FY2015 (*i.e.,* 775 PSCs and more than 4,470 CCNand TCN PSCs). The costs to implement this rule are justified, as the Agency depends on PSCs as large part of its workforce. Given that USAID PSCs are an important and flexible supplement for the Agency's dynamic operations, this rule provides the Agency the ability to recognize and motivate excellence in the performance of its contractors. Additionally, because these incentives were previously approved at the highest levels of Agency management, USAID deemed the costs to implement this rule as a necessary business decision to promote excellent performance by PSCs.

As a regulatory matter, the cost of the rule-making process to incorporate this final rule into the regulation is also justified. The AIDAR appendices include all the compensation and benefits available under personal services contracts. Therefore, the Agency needs this rule to keep the regulation consistent, complete, and transparent to industry, other U.S. Government Departments and Agencies, and the general public.

(2) Regulatory Flexibility Act. This final rule will not have an impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, Section 601 of Title 5 of the U.S.C., *et seq.* Therefore, USAID has not performed an Initial Regulatory Flexibility Analysis.

(3) Paperwork Reduction Act. This final rule does not establish a new collection of information that requires the approval of OMB under the Paperwork Reduction Act (Chapter 35 of Title 44 of the U.S.C.).

List of Subjects in Appendices D and J of Chapter 7 of Title 48 of the CFR

Government procurement.

For the reasons discussed in the preamble, USAID amends Chapter 7 of Title 48 of the CFR under the authority of Section 621 of Public Law 87–195, 75

Stat. 445, (Section 2381 of Title 22 of the U.S.C.), as amended; E.O. 12163, Sept. 29, 1979, 44 *Federal Reg*ister 56673; and Title 3 of the CFR, 1979 Comp., p. 435, as follows:

CHAPTER 7—AGENCY FOR INTERNATIONAL DEVELOPMENT

■ 1. Appendix D is amended as follows:

■ a. In Section 4, by revising paragraph (f);

■ b. In Section 10 entitled, ''Form USAID 1420–36, ''Cover Page'' and ''Schedule'', in the Table of Contents under the heading General Provisions, reserve numbers 27 and 28, and add 29 to the list of provisions;

■ c. In Section 11 entitled, ''Optional Schedule With a U.S. Citizen or U.S. Resident Alien'', in the Table of Contents, under the heading General Provisions, reserve numbers 27 and 28, and add 29 to the list of provisions;

■ d. In Section 12:

■ i. Revise the heading, ''General Provisions'';

■ ii. Remove the heading, ''Contract with a U.S. Citizen or a U.S. Resident Alien for Personal Services Abroad'';

■ iii. Amend the Index of Clauses by reserving clause numbers 27 and 28, and add clause 29, ''Incentive Awards''; and

■ e. By adding a parenthetical authority citation at the end of the appendix.

The revision and addition read as follows:

Appendix D to Chapter 7—Direct USAID Contracts With a U.S. Citizen or a U.S. Resident Alien for Personal Services Abroad

* * * * *

4. Policy

* * * * *

(f) *Incentive awards.* U.S. personal services contractors are not eligible to participate in, or be funded under, the incentive-awards program administered by the Office of Personnel Management (OPM) for USAID U.S. direct-hire employees in accordance with section 636(a) of the Foreign Assistance Act of 1961, as amended. U.S. personal services contractors are eligible to receive certain monetary and non-monetary incentive awards as authorized under this section. All nominations for incentive awards must be approved by a U.S. direct-hire employee, who is either the contractor's supervisor or is at the next higher level within the Mission/Bureau/Independent Office (M/B/IO). The list of incentive awards and detailed eligibility, nomination, and approval processes are specified in internal Agency policies in Chapter 309 of Automated Directive System (ADS), available on the USAID website. These awards will be funded from the authorizations used to fund the specific contract.

27. [Reserved]
28. [Reserved]
29. Incentive Awards

* * * * *

29. Incentive Awards

[Insert the following clause in all USPSC contracts.]

Incentive Awards (Date)

The contractor is eligible to receive certain monetary and non-monetary USAID incentive awards in accordance with the AIDAR and USAID internal policy.

* * * * *

(Authority: Section 621 of Public Law. 87–195, 75 Stat. 445, (Section 2381 of Title 22 of the U.S.C.), as amended; E.O. 12163, Sept. 29, 1979, 44 **Federal Register** 56673; and Title 3 of the CFR, 1979 Comp., p. 435)

■ 2. Appendix J is amended as follows:

■ a. In section 4:

■ i. By revising paragraph (c)(1);

■ ii. In paragraph (c)(2)(i), by removing ''TCN or CCN'' and adding in its place ''CCN or TCN'' and removing the reference ''4c(2)(ii)'' and adding in its place the reference ''4(c)(2)(ii)'';

■ iii. In paragraph (c)(2)(ii) introductory text, by removing the words ''FSNs which includes CCNs and TCNs,'' adding in their place ''CCNs and TCNs,'' and revising the second sentence.

■ iv. In paragraph (c)(2)(ii)(A), by removing the words ''foreign national employee'' and adding in its place the words ''CCN or TCN personal services contractor'';

■ v. In paragraph (c)(2)(ii)(B), by revising the first sentence;

■ vi. In paragraph (c)(2)(iii), by removing the words ''compensation plan for each'' and adding in its place the words ''local compensation plan for each Mission'';

■ vii. By revising paragraphs (c)(2)(v) and (vii) and (c)(3); and

■ viii. In Paragraph (c)(4), by removing ''CCN and TCN PSCs'' and adding in its place ''CCN and TCN personal services contractors,'' removing the words ''Contracting Officer,'' and adding in their place the words ''contracting officer.''

■ b. In section 12, General Provisions for a Contract with a Cooperating Country National or with a Third-Country National for Personal Services, revise item 19.

■ c. By adding a parenthetical authority citation at the end of the appendix.

The revisions and addition read as follows:

Appendix J—Direct USAID Contracts With a Cooperating Country National and With a Third-Country National for Personal Services Abroad

* * * * *

4. Policy

* * * * *

(c) * * *

(1) *General.* For the purpose of any law administered by the U.S. Office of Personnel Management (OPM), USAID personal services contractors are not to be regarded as employees of the U.S. Government, are not included under any retirement or pension program of the U.S. Government, and are not eligible for the Incentive-Awards Program covered by Uniform Department of State/USAID regulations. Each USAID Mission is expected to participate in an interagency Mission incentive awards program. Additionally, CCN and TCN personal services contractors are eligible to receive certain USAID monetary and non-monetary incentive awards as authorized under this section. See paragraph (3) of this section for incentive awards.

(2) * * *

(ii) * * * The plan is each post's official system of position classification and pay, which consists of the local salary schedule including salary rates, statements that authorize fringe benefit payments, and other pertinent facets of compensation for CCNs and TCNs. * * *

* * * * *

(B) Section 4 of Appendix D of this chapter, entitled, ''Policy,'' sections (c) ''Withholdings and Fringe Benefits,'' (d) ''Resident Hire U.S. Personal Services Contractors,'' (e) ''Determining Salary for Personal Services Contractors,'' (f) ''Incentive Awards,'' (g) ''Annual Salary Increase,'' (h) ''Pay Comparability Adjustment,'' and (i) ''Subcontracting.'' * * *

* * * * *

(v) CCN and TCN personal services contractors are eligible for allowances and differentials as provided under the post's local compensation plan.

* * * * *

(vii) CCNs and TCNs retired from the U.S. Government may be awarded personal services contracts without any reduction in, or offset against, their U.S. Government annuity.

(3) *Incentive Awards.* (i) All CCN and TCN personal services contractors of the Foreign

Affairs Community are eligible for an interagency Mission incentive awards program. The Joint Country Awards Committee administers each post's (Embassy) awards program, including the establishment of procedures for submission, review, and approval of proposed awards.

(ii) CCN and TCN personal services contractors are also eligible to receive certain monetary and non-monetary USAID incentive awards. The list of incentive awards, eligibility, nomination, and approval processes are specified in internal Agency policies in ADS Chapter 309, available on the USAID website. These awards will be funded from the authorizations used to fund the PSC contract, and not from funds allocated for the OPM-administered awards program for USAID U.S. direct-hire employees.

(iii) Meritorious step increases for USAID CCN and TCN personal services contractors may be authorized provided the granting of such increases is the general practice locally.

* * * * *

12. General Provisions for a Contract With a Cooperating Country National or With a Third Country National for Personal Services

* * * * *

19. Incentive Awards

[Insert the following clause in all CCN and TCN contracts paid under the local compensation plan.]

Incentive Awards (Date)

(a) CCN and TCN personal services contractors of the Foreign Affairs Community are eligible for an interagency Mission incentive awards program. The program is administered by each post's (Embassy) Joint Country Awards Committee.

(b) CCN and TCN personal services contractors are also eligible to receive certain monetary and non-monetary USAID incentive awards in accordance with the AIDAR and USAID internal policy.

(c) Meritorious Step Increases.

CCNs and TCN personal services contractors paid under the local compensation plan are eligible to receive meritorious step increases provided the granting of such increases is the general practice locally.

* * * * *

(Authority: Section 621 of, Public Law. 87–195, 75 Stat. 445, (Section 2381 of Title 22 of the U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979, 44 **Federal Register** 56673; and Title 3 of the CFR, 1979 Comp., p. 435)

Thursday, November 14, 2019

DEPARTMENT OF ENERGY

10 CFR Part 430

[EERE–2017–BT–TP–0024]

RIN 1904–AE01

Energy Conservation Program: Test Procedure for Microwave Ovens

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of proposed rulemaking and announcement of public meeting.

SUMMARY: The U.S. Department of Energy (''DOE'') proposes to amend the existing test procedure for microwave ovens to provide additional specification for the test conditions related to microwave oven clock displays and microwave ovens with network functions. DOE is also proposing editorial changes to add a section title inadvertently omitted and to revise two incorrect cross-references. As part of this proposal, DOE is announcing a public meeting to collect comments and data on its proposal.

DATES:

Meeting: DOE will hold a webinar on November 14, 2019, from 10:00 a.m. to 1:00 p.m. See section V, ''Public Participation,'' for webinar registration information, participant instructions, and information about the capabilities available to webinar participants. If no participants register for the webinar then it will be cancelled.

Comments: Written comments and information are requested and will be accepted before and after the public meeting, but no later than January 13, 2020. See section V, ''Public Participation,'' for details.

ADDRESSES: Interested persons are encouraged to submit comments using the Federal eRulemaking Portal at *http://www.regulations.gov.* Follow the instructions for submitting comments. Alternatively, interested persons may submit comments, identified by docket number EERE–2017–BT–TP–0024, by any of the following methods:

(1) *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

(2) *Email: MWO2017TP0024@ee.doe.gov.* Include the docket number and/or RIN in the subject line of the message.

I. Authority and Background

Microwave ovens are included in the list of ''covered products'' for which DOE is authorized to establish and amend energy conservation standards and test procedures. (42 U.S.C. 6292(a)(10)) DOE's energy conservation standards for microwave ovens are currently prescribed at Title 10 of the Code of Federal Regulations (''CFR'') part 430.32(j). DOE's test procedures for microwave ovens are prescribed at 10 CFR 430.23(i) and appendix I to subpart B of 10 CFR part 430 (''Appendix I''). The following sections discuss DOE's authority to establish test procedures for microwave ovens and relevant background information regarding DOE's consideration of test procedures for this product.

A. Authority

The Energy Policy and Conservation Act, as amended (''EPCA''),[1] among other things, authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. (42 U.S.C. 6291–6317) Title III, Part B [2] of EPCA established the Energy Conservation Program for Consumer Products Other Than Automobiles, which sets forth a variety of provisions designed to improve energy efficiency. These products include microwave ovens, the subject of this document. (42 U.S.C. 6292(a)(10))

The energy conservation program under EPCA consists essentially of four parts: (1) Testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of EPCA include definitions (42 U.S.C. 6291), energy conservation standards (42 U.S.C. 6295), test procedures (42 U.S.C. 6293), labeling provisions (42 U.S.C. 6294), and the authority to require information and reports from manufacturers (42 U.S.C. 6296).

The Federal testing requirements consist of test procedures that manufacturers of covered products must use as the basis for: (1) Certifying to DOE that their products comply with the applicable energy conservation standards adopted pursuant to EPCA (42 U.S.C. 6295(s)), and (2) making representations about the efficiency of those consumer products (42 U.S.C. 6293(c)). Similarly, DOE must use these test procedures to determine whether the products comply with relevant standards promulgated under EPCA. (42 U.S.C. 6295(s))

Federal energy efficiency requirements for covered products established under EPCA generally supersede State laws and regulations concerning energy conservation testing, labeling, and standards. (42 U.S.C. 6297) DOE may, however, grant waivers of Federal preemption for particular State laws or regulations, in accordance with the procedures and other provisions of EPCA. (42 U.S.C. 6297(d))

Under 42 U.S.C. 6293, EPCA sets forth the criteria and procedures DOE must follow when prescribing or amending test procedures for covered products. EPCA requires that any test procedures prescribed or amended under this section be reasonably designed to produce test results which measure energy efficiency, energy use or estimated annual operating cost of a covered product during a representative average use cycle or period of use and not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3))

In addition, EPCA requires that DOE amend its test procedures for all covered products to integrate measures of standby mode and off mode energy consumption. (42 U.S.C. 6295(gg)(2)(A)) Standby mode and off mode energy consumption must be incorporated into the overall energy efficiency, energy consumption, or other energy descriptor for each covered product unless the current test procedures already account for and incorporate standby and off mode energy consumption or such integration is technically infeasible. If an integrated test procedure is technically infeasible, DOE must prescribe a separate standby mode and off mode energy use test procedure for the covered product, if technically feasible. (42 U.S.C. 6295(gg)(2)(A)(ii)) Any such amendment must consider the most current versions of the International Electrotechnical Commission (''IEC'') Standard 62301 [3] and IEC Standard 62087 [4] as applicable. (42 U.S.C. 6295(gg)(2)(A))

If DOE determines that a test procedure amendment is warranted, it must publish proposed test procedures and offer the public an opportunity to present oral and written comments on them. (42 U.S.C. 6293(b)(2)) EPCA also requires that, at least once every 7 years, DOE evaluate test procedures for each type of covered product, including microwave ovens, to determine whether amended test procedures would more accurately or fully comply with the requirements for the test procedures not to be unduly burdensome to conduct and be reasonably designed to produce test results that reflect energy efficiency, energy use, and estimated operating costs during a representative average use cycle or period of use. (42 U.S.C. 6293(b)(1)(A)) If the Secretary determines, on his own behalf or in response to a petition by any interested person, that a test procedure should be prescribed or amended, the Secretary shall promptly publish in the **Federal Register** proposed test procedures and afford interested persons an opportunity to present oral and written data, views, and arguments with respect to such procedures. The comment period on a proposed rule to amend a test procedure shall be at least 60 days and may not exceed 270 days. In prescribing or amending a test procedure, the Secretary shall take into account such information as the Secretary determines relevant to such procedure, including technological developments relating to energy use or energy efficiency of the type (or class) of covered products involved. (42 U.S.C. 6293(b)(2)) If DOE determines that test procedure revisions are not appropriate, DOE must publish its determination not to amend the test procedures. DOE is publishing this notice of proposed rulemaking (''NOPR'') in satisfaction of the 7-year review requirement specified in EPCA. (42 U.S.C. 6293(b)(1)(A))

B. Background

DOE's existing test procedure for microwave ovens appears at Appendix I, titled ''Uniform Test Method for Measuring the Energy Consumption of Cooking Products''. For reasons discussed in the following sections, the current microwave oven test procedure does not include active mode and measures energy use only in standby mode and off mode. Before today, DOE issued four documents related to possible amendments to the test procedure: A NOPR in 2013, two requests for information (in 2011 and 2018), and a notice of data availability in 2012.

1. Active Mode Amendments

DOE originally established the test procedure for microwave ovens on May 10, 1978, based on a 1975 version of the industry standard developed by the IEC. 43 FR 20120. DOE amended the original test procedure in an October 3, 1997

[1] All references to EPCA in this document refer to the statute as amended through America's Water Infrastructure Act of 2018, Public Law 115–270 (Oct. 23, 2018).

[2] For editorial reasons, upon codification in the U.S. Code, Part B was redesignated Part A.

[3] IEC 62301, ''Household electrical appliances—Measurement of standby power'' (Edition 2.0, 2011–01).

[4] IEC 62087, ''Methods of measurement for the power consumption of audio, video, and related equipment'' (Edition 3.0, 2011–04).

final rule that measured active mode energy use only and was based on an updated version of IEC Standard 705—Second Edition 1988 and Amendment 2—1993, ''Methods for Measuring the Performance of Microwave Ovens for Households and Similar Purposes'' (''IEC 705''). 62 FR 51976. On July 22, 2010, DOE published a final rule in which it repealed the regulatory test procedure for measuring the cooking efficiency of microwave ovens. 75 FR 42579 (''July 2010 Repeal Final Rule''). In the July 2010 Repeal Final Rule, DOE determined that the existing microwave oven test procedure did not produce representative and repeatable test results. 75 FR 42579, 42580. DOE stated at that time that it was unaware of any test procedures that had been developed that addressed these concerns. 75 FR 42579, 42581.

On October 24, 2011, DOE published a request for information (''RFI'') to inform its consideration of active mode testing methodologies for microwave ovens (''October 2011 RFI''). 76 FR 65631. DOE specifically sought information, data, and comments regarding representative and repeatable methods for measuring the energy use of microwave ovens in active mode, particularly for the microwave-only and convection-microwave cooking (*i.e.,* microwave plus convection and any other means of cooking) modes.

To inform its consideration of a test procedure for the microwave oven active mode, DOE conducted testing to evaluate potential methods for measuring the active mode energy use for these products, including the microwave-only, convection-only, and convection-microwave cooking modes. On June 5, 2012, DOE published a notice of data availability (''June 2012 NODA'') to present test results and analytical approaches that DOE was considering for potential amendments to the microwave oven test procedure and to request additional comment and information on these results. 77 FR 33106. In the June 2012 NODA, DOE presented test results from microwave-only, convection-only, and convection-microwave cooking mode testing using water loads, food simulation mixtures, and real food loads. DOE also presented test results from testing of the convection-only cooking mode using the aluminum test block specified in the DOE conventional oven test procedure then in effect.[5]

On February 4, 2013, DOE published a NOPR (''February 2013 NOPR'') in which it proposed adding provisions to measure active mode energy use for microwave ovens, including microwave-only ovens and convection microwave ovens. 78 FR 7940. For measuring the energy use in microwave-only cooking mode, DOE proposed test methods based on the November 2011 draft version of IEC 60705, ''Household microwave ovens—Methods for measuring performance.'' 78 FR 7940, 7942. DOE also proposed provisions for measuring the energy use of convection microwave ovens in convection-only cooking mode based on the test procedure for conventional ovens in Appendix I. *Id.* DOE further proposed to calculate the energy use of convection-microwave cooking mode for convection microwave ovens by apportioning the microwave-only cooking mode and convection-only cooking mode energy consumption measurements based on typical consumer use. *Id.*

The IEC issued an updated version of IEC 60705, ''Household microwave ovens—Methods for measuring performance'' Edition 4.1 on June 30, 2014 (''IEC 60705 Ed. 4.1'').

On January 18, 2018, DOE published an RFI (''January 2018 RFI'') describing the current requirements for the microwave oven test procedure and requesting information on several topics including the feasibility of pursuing active cooking mode and fan-only mode test methods for microwave-only ovens and convection microwave ovens. 83 FR 2566. DOE discussed the previous active mode test procedure proposal from the February 2013 NOPR and requested interested parties to provide updated data and information. This NOPR addresses the comments received in response to the January 2018 RFI regarding active mode for microwave ovens. DOE is not proposing an active mode test procedure.

The interested parties that submitted relevant comments to DOE in response to the January 2018 RFI are listed in Table I–1.[6]

TABLE I–1—JANUARY 2018 RFI WRITTEN COMMENTS

Organization(s)	Reference in this NOPR	Organization type

On May 30, 2018, the IEC issued an additional amendment to IEC 60705, which it consolidated into a version entitled Edition 4.2. The changes in this amendment related to the definition of rounding and the determination of usable and overall volume of the microwave oven.

2. Standby Mode Amendments

As discussed, DOE is required to amend the test procedures for covered products to address standby mode and off mode energy consumption and to integrate such energy consumption into the energy descriptor for that product unless the current test procedure already fully account for such consumption. (42 U.S.C. 6295(gg)(2)(A)) If integration is technically infeasible, DOE must prescribe a separate standby mode and off mode energy use test procedure, if technically feasible. *Id.* Any such amendment must consider the most current versions of IEC 62301

[5] The DOE conventional oven test procedure in Appendix I was later repealed in a final rule published on December 16, 2016. 81 FR 91418. DOE determined that the conventional oven test procedure did not accurately represent consumer use, as it favored conventional ovens with low thermal mass and did not capture cooking performance-related benefits due to increased thermal mass of the oven cavity. 81 FR 91418, 91423–91424.

[6] In addition to the five commenters listed in the table, DOE received two comments that were submitted anonymously and not relevant to the microwave oven test procedure. These comments will not be addressed.

''Household electrical appliances—Measurement of standby power,'' and IEC 62087 ''Methods of measurement for the power consumption of audio, video, and related equipment.'' *Id.*

On March 9, 2011, DOE published an interim final rule (''March 2011 Interim Final Rule'') amending the test procedure for microwave ovens. 76 FR 12825. The March 2011 Interim Final Rule incorporated by reference IEC 62301 First Edition 2005–06 (''IEC 62301 (First Edition)'') to establish test conditions and testing procedures for measuring the average standby mode and average off mode power consumption. 76 FR 12825, 12828. As authorized by EPCA, DOE also added definitions of ''active mode,'' ''standby mode,'' and ''off mode'' based on the definitions provided in IEC 62301 Edition 2.0 2011–01 (''IEC 62301 (Second Edition)''). 76 FR 12825, 12836. In addition, DOE adopted language to clarify the application of IEC 62301 (First Edition) to measuring standby mode and off mode power. Specifically, DOE defined the test duration for units under test in which the measured standby mode power consumption of the microwave oven displays varies depending on the time-of-day displayed on the clock. 76 FR 12825, 12828.

The amendments adopted in the March 2011 Interim Final Rule became effective on April 8, 2011. 76 FR 12825, 12925. However, DOE noted that to ensure that the amended test procedure adequately addresses the EPCA requirement to consider the most recent version of IEC 62301, and recognizing that the IEC issued IEC 62301 (Second Edition) in January of 2011, DOE issued the microwave oven test procedure as an interim final rule and offered an additional 180-day comment period to consider whether any changes should be made to the interim final rule in light of publication of IEC 62301 (Second Edition). 76 FR 12825, 12830–12831. DOE stated that it would consider these comments and, to the extent necessary, publish a final rulemaking incorporating any changes. *Id.*

Based in part on public comment, DOE further analyzed IEC 62301 (Second Edition). DOE subsequently published a final rule on January 18, 2013 (''January 2013 Final Rule''), amending the test procedure for microwave ovens to reference certain provisions of IEC 62301 (Second Edition), along with clarifying language, for the measurement of standby mode and off mode energy use. 78 FR 4015. For only those microwave oven basic models with power consumption that varies as a function of the time displayed, DOE maintained the existing use of IEC 62301 (First Edition) for measuring standby mode power to minimize manufacturer burden. 78 FR 4015, 4021. DOE also determined that microwave ovens combined with other appliance functionality satisfy the definition of ''microwave oven'' at 10 CFR 430.2, but due to a lack of data and other information, did not adopt provisions to measure the standby mode and off mode energy use of the microwave oven component of these combined cooking products.[7] 78 FR 4015, 4022.

In the January 2018 RFI, DOE requested information on the current status of technology for network functions in microwave ovens, which may affect the standby mode energy consumption. This NOPR addresses the comments received in response to the January 2018 RFI regarding standby mode for microwave ovens and proposes minor amendments to the standby mode test procedures.

II. Synopsis of the Notice of Proposed Rulemaking

In this NOPR, DOE proposes to update Appendix I with (1) requirements for both the clock display and network functionality when testing standby and off mode and (2) technical corrections. DOE does not propose adding an active mode measurement.

In particular, for the standby and off mode test procedure, DOE proposes requiring that (1) any clock display is turned on and remains on during testing, unless the clock display powers down automatically and the product provides no option for the consumer to prevent the display from powering down automatically; and (2) any network function is disabled during testing, if it is possible to do so by means provided in the manufacturer's user manual. If disabling is not possible, the energy use associated with network functionality should not be reported to DOE and will not be used to determine compliance with DOE energy conservation standards. DOE also proposes editorial changes to add a section title inadvertently left out of the test procedure and to revise two incorrect cross-references.

DOE has tentatively determined that the proposed test procedure would not be unduly burdensome. DOE's proposed actions are summarized in Table II–1 and addressed in detail in section III of this document.

TABLE II–1—SUMMARY OF CHANGES IN PROPOSED TEST PROCEDURE RELATIVE TO CURRENT TEST PROCEDURE

Current DOE test procedure	Proposed test procedure	Attribution
References paragraph 5.2 of IEC 62301 (Second Edition), which specifies that the product must be tested in accordance with manufacturer's instructions or using default settings if no instructions are available. If there are no instructions and if default settings are not indicated, then the microwave oven is tested as supplied.	Specifies that the microwave oven must be tested with the clock display on, regardless of the manufacturer's instruction or default setting or supplied setting, unless the clock display powers down automatically and the product provides no setting that allows the consumer to prevent such automatic power down.	To improve representativeness.

[7] Appendix I defines ''combined cooking product'' as a household cooking appliance that combines a cooking product with other appliance functionality, which may or may not include another cooking product. Combined cooking products include the following products: Conventional range, microwave/conventional cooking top, microwave/conventional oven, and microwave/conventional range.

TABLE II–1—SUMMARY OF CHANGES IN PROPOSED TEST PROCEDURE RELATIVE TO CURRENT TEST PROCEDURE—Continued

Current DOE test procedure	Proposed test procedure	Attribution
Does not explicitly specify configuration of a network function, if present. References paragraph 5.2 of IEC 62301 (Second Edition), which specifies that the product must be tested in accordance with manufacturer's instructions or using default settings if no instructions are available. If there are no instructions and if default settings are not indicated, then the microwave oven is tested as supplied. In DOE's previous test procedures for microwaves, however, DOE determined that it would not measure network functionality energy use. In particular, DOE specifically determined in its 2012 test procedure not to include provisions for measuring energy use in network functionality (77 FR 65942, 65953–54 (Oct. 31, 2012), and DOE's most recent test procedure for microwaves did not address network functionality (81 FR 91418; Dec. 16, 2016).	Specifies that if present, the network function must be disabled.	To improve repeatability and comparability of results.
Section title inadvertently left out and two cross-references are incorrect.	Section title added, and cross-references corrected	To improve readability.

III. Discussion

In the January 2018 RFI, DOE sought feedback on several topics such as the feasibility of pursuing an active mode test method for microwave ovens, industry trends for connected appliances, and microwave oven standby mode setup. 83 FR 2566. DOE received several comments in response to the January 2018 RFI. In the following sections, DOE discusses the issues identified in previous rulemakings, comments received from stakeholders in response to specific topics in the January 2018 RFI, and DOE's responses to these comments.

DOE also received general comments in response to the January 2018 RFI. AHAM stated that the current test procedure is accurate, repeatable, and reproducible, and is not unduly burdensome to conduct, and therefore urged DOE to issue a determination that the test procedure does not need to be amended. (AHAM, No. 4 at p. 2)[8] GE and Whirlpool supported AHAM's comments in their entirety. (GE, No. 3 at p. 1; Whirlpool, No. 5 at p. 1) Whirlpool additionally commented that the current microwave oven test procedure is clear, with no major issues identified with repeatability, reproducibility, representativeness, or test burden. (Whirlpool, No. 5 at p. 1)

As discussed in the following sections, DOE has identified several amendments that it has initially determined are warranted to ensure the repeatability of the test procedure and the representativeness of the results.

AHAM commented that if DOE determines that amendments to the existing test procedure are warranted, any final rule for an amended test procedure should be issued before DOE initiates any standards rulemaking. According to AHAM, engineering analysis and sound policy conclusions can only be based on a known, final test procedure that all stakeholders have had the opportunity to use to evaluate design options and proposed standard levels. (AHAM, No. 4 at p. 2) AHAM further requested that DOE not publish a standards RFI or framework document until at least 180 days after a test procedure final rule publishes that would be used to determine compliance with any final standards. (AHAM, No. 4 at p. 2)

DOE recognizes that a finalized test procedure allows interested parties to provide more effective comments on proposed standards. Further, if the test procedure is finalized sufficiently in advance of the issuance of proposed standards, manufacturers will have experience using the new test procedure, which may provide additional insights into the proposed standards. As discussed, this NOPR is proposing amendments to the microwave oven test procedure, not the energy conservation standard, which is outside the scope of this rulemaking.

A. Scope of Coverage

This rulemaking applies to microwave ovens, which DOE defines as a category of cooking products which is a household cooking appliance consisting of a compartment designed to cook or heat food by means of microwave energy, including microwave ovens with or without thermal elements designed for surface browning of food and convection microwave ovens. This includes any microwave oven(s) component of a combined cooking product. 10 CFR 430.2. DOE is not proposing to amend the scope of the current microwave oven test procedure.

B. Active Mode Test Methods

As discussed in section I.B.1 of this document, in the July 2010 Repeal Final Rule, DOE repealed the active mode test provisions originally established in Appendix I because they did not produce representative and repeatable measurements of microwave oven energy use in active mode. 75 FR 42579. DOE proposed in the February 2013 NOPR to add provisions to the microwave oven test procedure in Appendix I for measuring energy use in microwave-only cooking mode based on the November 2011 draft version of IEC 60705. 78 FR 7940, 7946. AHAM commented on the February 2013 NOPR that it "fully supports harmonization with IEC 60705. But DOE should not base the U.S. test procedure on a draft of that standard. Instead, DOE should wait to harmonize with the final IEC 60705." (AHAM, EERE–2010–BT–TP–0023, No. 18 at p. 4) On June 30, 2014, IEC published IEC 60705 Ed. 4.1. Therefore, in the January 2018 RFI, DOE sought additional feedback on active mode test methods, including data and information that may not have been available at the time of the previous rulemaking. 83 FR 2566, 2570–2572 (Jan. 18, 2018)

In response to the January 2018 RFI, AHAM commented that adding an active mode measurement would

[8] A notation in the form "AHAM, No. 4 at p. 2" identifies a written comment: (1) Made AHAM; (2) recorded in document number 4 that is filed in the docket of this test procedure rulemaking (Docket No. EERE–2017–BT–TP–0024, available for review at *http://www.regulations.gov*); and (3) which appears on page 2 of document number 4.

significantly increase test burden, contrary to the EPCA requirement that the test procedure not be unduly burdensome to conduct. AHAM explained that adding an active mode measurement would increase the test time by as much as five to six times the current test time of about 2 hours, an increase which AHAM believes is significant. AHAM estimated that each active mode test would likely require 2 hours, and because three beaker sizes would each be tested twice, the total test time would be about 12 hours. Further, AHAM stated that an active mode measurement would require new laboratory equipment and could require new or updated facilities due to the additional test time and test requirements. According to AHAM, for example, manufacturer and third-party laboratories would likely need to build new laboratories to be able to maintain the current capacity, given the longer test time. AHAM also commented that it is not aware of companies currently conducting an active mode test procedure, so by requiring such methodology, DOE would be imposing new burden on companies. Therefore, AHAM stated that DOE should not amend the test procedure at this time. (AHAM, No. 4 at pp. 2–3) GE commented that the energy costs associated with active mode functionalities do not justify the burden and cost imposed on manufacturers to perform an active mode test. (GE, No. 3 at p. 1) GE commented that, based on a U.S. average electricity kilowatt-hour price of about 12 cents, a typical consumer using microwave-only cooking mode would consume energy costing less than 75 cents per month. (GE, No. 3 at p. 2)

AHAM also commented that an active mode test procedure would de-harmonize the United States with the rest of the world. Even though IEC 60705 Ed. 4.1 measures active mode, no country requires active mode testing for regulatory purposes to AHAM's knowledge. AHAM stated that this was particularly problematic because microwave ovens, perhaps more than any other home appliance, are global products. (AHAM, No. 4 at pp. 1, 3)

Further, AHAM commented that standards for active mode would not be economically justified. AHAM, referencing an April 8, 2009 final rule (''April 2009 Standards Final Rule'', 74 FR 16040), stated that DOE has previously found that the energy savings and emissions reductions would be outweighed by the large decrease in the net present value of consumer impacts (with almost all consumers experiencing net cost), the economic burden on many consumers, and the large capital conversion costs that could result in a reduction in industry net present value. AHAM does not believe this analysis would produce different results now. (AHAM, No. 4 at p. 3) AHAM further added that to its knowledge, no technology is currently available to reduce energy use in the active mode for either microwave-only ovens or convection microwave ovens. (AHAM, No. 4 at pp. 3–4)

Conversely, the Joint Advocates supported an active mode test procedure, stating that DOE's analysis from the February 2013 NOPR showed that, on average, active mode energy consumption is almost 90 percent of microwave oven energy use. (Joint Advocates, No. 8 at pp.1–2) These commenters stated that an active mode test procedure would provide valuable consumer purchasing information, allowing manufacturers to distinguish efficient products, some of which may contain features that increase consumer utility. (Joint Advocates, No. 8 at pp. 1–2) The Joint Advocates believe that technologies may be available to significantly improve efficiency in active mode, specifically solid-state radio-frequency (''RF'') components, which may also provide greater consumer utility in terms of more even heating and longer lifetimes. Without a test procedure, the Joint Advocates believe that manufacturers do not have a way to distinguish the potential improved performance. (Joint Advocates, No. 8 at p. 2)

To measure the energy consumption of microwave ovens in the microwave-only cooking mode, the Joint Advocates supported the use of IEC 60705 Ed. 4.1. (Joint Advocates, No. 8 at p. 2) They cited results that DOE presented in the February 2013 NOPR, which were based on a draft version of the IEC 60705 standard, showing minimal test-to-test variation for each water load size.[9] Further, the Joint Advocates stated that the European Committee for Electrotechnical Standardization's (''CENELEC'') round robin testing that evaluated the IEC 60705 standard found it to be repeatable and reproducible as well. (Joint Advocates, No. 8 at pp. 2–3) Karla Quezada supported harmonizing with the IEC 60705 Ed. 4.1 standard unless it would delay a test that may be useful with current technology and devices. (Karla Quezada, No. 2 at p. 2)

In this document, DOE is not proposing any updates to Appendix I to measure microwave oven energy use in active mode. As stated, EPCA requires that test procedures for microwave ovens be reasonably designed to produce test results which measure energy efficiency or energy use during a representative average use cycle or period of use, and not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3)) DOE has initially determined that an active mode measurement for microwave ovens would be unduly burdensome at this time. DOE finds at this point that the expected increase in testing cost resulting from increased testing time and the potential need for new laboratory equipment and facility upgrades would not be justified especially because DOE previously determined in the April 2009 Standards Final Rule that an energy conservation standard for microwave oven active mode would not be technologically feasible and economically justified. 74 FR 16040, 16087. In the context of evaluating the microwave test procedure, the circumstances that led to the determination in the April 2009 Final Rule have not changed substantially at this time.

Regarding the potential use of solid-state Radio Frequency (''RF'') technologies, based on a review of the current state of the technology, this is still a new technology that is not commercially available in the United States. At present, it is unclear whether IEC 60705 Ed. 4.2 would provide results that are representative of an average use cycle, in a repeatable manner, for microwave ovens using solid-state RF technologies.

C. Standby Mode and Off Mode Test Methods

1. Displays and Clocks

In the January 2018 RFI, DOE requested feedback on certain topics related to microwave oven displays and clocks. DOE requested information about whether the standby mode and off mode test procedure should be amended, specifically for microwave ovens with an option to turn the display on or off. DOE also requested data on the difference in standby power consumption with the display turned on and off, as well as consumer usage data on how frequently consumers power off the clock display when this option is available, and how much consumers value a microwave oven clock display

[9] IEC 60705 requires that the active mode energy consumption of a microwave oven be evaluated by heating three distinct known quantities of water (275g, 350g and 1000g, also called water loads) through multiple temperature gradients and measuring the cumulative energy required for the water to attain the final temperature. The resulting data is used to generate an energy consumption metric for microwave ovens.

that is capable of remaining powered on at all times. DOE also requested information regarding how manufacturer instructions for the initial setup of the microwave oven differ from the default as-shipped settings, and the merits of requiring initial setup in accordance with manufacturer instructions versus requiring testing using the default settings. 83 FR 2566, 2572.

AHAM commented that the existing standby mode and off mode test procedure is repeatable, reproducible, representative, not unduly burdensome to conduct, and does not need to be amended at this time. AHAM believes that without available data suggesting the standby mode and off mode test procedure should be amended, DOE should not change it. (AHAM, No. 4 at pp. 1, 8) AHAM further stated that the current standby and off mode test is consistent with how other products are tested (*i.e.,* the test unit is set up consistent with manufacturer instructions, and if no instructions are available, the default settings are used). AHAM urged DOE not to deviate from this approach, especially without supporting data. (AHAM, No. 4 at pp. 8–9) Karla Quezada commented that although manufacturers contend that the energy consumption of the microwave oven clock display is negligible, the aggregate of such small individual energy consumptions may result in meaningful cost to the consumer. (Karla Quezada, No. 2 at pp. 2–3) For the reasons discussed in the remainder of this section, DOE is proposing additional direction to the standby mode and off mode test procedure for microwave ovens, which it has initially determined will improve the representativeness and reproducibility of the test results.

For microwave ovens that provide an option to turn the display on or off, the existing requirements in section 2.1.3 of Appendix I specify that these ovens are to be tested in accordance with manufacturer's instructions, and if no instructions are available, using the factory or ''default'' settings, or if such settings are not indicated, testing the microwave oven as supplied. Section 3.1.3.1 of Appendix I further specifies that for microwave ovens in which power varies as a function of displayed time in standby mode (*e.g.,* as with microwave ovens with a clock that uses seven-segment light emitting diode (''LED'') displays), the clock time must be set to 3:23 prior to taking measurements. However, to ensure that testing is more representative of microwave ovens that display the clock time, DOE is proposing to explicitly specify that the clock display must be on during testing unless the clock display powers down automatically and the product provides no option for the consumer to prevent the display from powering down automatically. In a prior energy conservation standard proposed rulemaking, manufacturers stated that consumers expect that a microwave oven equipped with a display should show clock time while in standby mode. 73 FR 62034, 62080 (Oct. 17, 2008). Accordingly, DOE proposes that for microwave ovens that provide consumers the ability to turn the clock on or off, the unit must be set up such that the clock display remains on at all times during testing, unless the clock powers down automatically and the product provides no available setting for the consumer to prevent the automatic powering-down of the clock. The requirement to set up the clock and for the clock to remain on would apply regardless of manufacturer instruction, the default setting, or the supplied setting (as specified in paragraph 5.2 of IEC 62301 (Second Edition), which is referenced in section 2.1.3 of Appendix I for setup instructions).

DOE requests comment on the proposed updates to keep the clock display on during testing, unless the clock powers down automatically with no setting to allow the consumer to override this feature, and whether these updates would result in additional test burden. DOE also requests comment on consumer habits regarding the use of clock displays that can be optionally turned on or off.

2. Connected Functions

In the January 2018 RFI, DOE requested information on whether to amend the standby mode and off mode test procedure to address microwave ovens that have network functions, such as Bluetooth® technology, including information for suitable test methods.[10] DOE also requested information on whether any microwave ovens currently on the market include internet connections to allow for additional control functions, including the utility of this functionality, potential energy impacts, and the appropriate energy-related settings to use for testing. 83 FR 2566, 2573 (Jan. 18, 2018)

AHAM asserted that the current microwave oven test procedure does not require measuring network functionality. According to AHAM, these features are still developing, as are consumers' use and understanding of them, and regulating them now would likely stifle innovation and could, in some cases, prevent manufacturers from including such features. It stated that connected appliances and the market for them are in the early stages of development. AHAM stated that meaningful data on consumer use are unavailable due to limited market penetration. (AHAM, No. 4 at p. 9) AHAM further stated that it opposes amending the test procedure to account for newly developing features such as connected functions without national, statistically significant field data on consumer use. In order to avoid stifling this new area of innovation and its potential energy savings benefits, and to reduce the cumulative regulatory burden already experienced by the appliance industry, AHAM urged DOE not to revise the test procedure to account for the energy use of connected functions. (AHAM, No. 4 at p. 9) According to AHAM, connected features operate with different capabilities and may have energy saving benefits to consumers. It stated that connected appliances can play a critical role in increasing the energy efficiency of the grid and can be used by utilities to increase demand response by peak load shifting as well as facilitate increased penetration of renewable sources of power. (AHAM, No. 4 at p. 9) GE commented that DOE's regulation of network functionality or other modes involving networked features would impede technology advances in microwave cooking products and the ''Internet of Things.'' (GE, No. 3 at p. 3)

The Joint Advocates commented that as connected products are introduced to the market, the energy use of these features should be captured to encourage manufacturers to provide these features with low power consumption, which would benefit consumers. (Joint Advocates, No. 8 at p. 1) These commenters recommended that DOE require the measurement of energy use associated with Bluetooth® or internet connections. If the energy use of connected features is not captured in the test procedure, the Joint Advocates asserted that consumers will not have information about these features' energy use, and manufacturers that develop ways to provide these features with low power consumption will not be able to distinguish their products in the market. (Joint Advocates, No. 8 at p. 3) The Joint Advocates stated that at least one manufacturer offers a unit that uses Bluetooth® technology, and multiple manufacturers have plans to introduce ''connected microwave ovens.'' (Joint Advocates, No. 8 at p. 3)

[10] A ''network'' in this context includes communication between two or more separate independently powered devices or products.

DOE recently published an RFI on the emerging smart technology appliance and equipment market. 83 FR 46886 (Sept. 17, 2018). In that RFI, DOE sought information to better understand market trends and issues in the emerging market for appliances and commercial equipment that incorporate smart technology. DOE's intent in issuing the RFI was to ensure that DOE did not inadvertently impede such innovation in fulfilling its statutory obligations in setting efficiency standards for covered products and equipment. In this NOPR, DOE seeks comment on the same issues presented in the RFI as they may be applicable to microwave ovens.

DOE is aware of microwave ovens with connected functionality that use either Bluetooth® or Wi-Fi to communicate with other cooking products, such as a range, or with a consumer, either via voice commands or a smartphone or tablet. Under DOE's current regulations, the standby energy use of a microwave oven would be affected by whether the network function is active. Section 2.1.3 of Appendix I generally specifies that a microwave oven must be installed in accordance with paragraph 5.2 of IEC 62301 (Second Edition), which states that the product must be prepared and setup in accordance with manufacturer's instructions, and if no instructions for use are available, then factory or default settings must be used, or if such settings are not indicated, the product must be tested as supplied. However, the current microwave oven test procedure does not state how to configure a network function, regardless of whether such instructions are provided in the manufacturer's instructions. For a unit that is connected to the internet, the speed and configuration of an internet connection could also impact the energy consumed by the device. Also, based on a review of manufacturer websites and user manuals of various appliances, as well as testing conducted at DOE and third-party laboratories, connected features are implemented in a variety of ways across different brands. Further, the design and operation of these features is continuously evolving as the nascent market begins to grow for these products.

To further ensure the repeatability and comparability of test results between models, and consistent with the 2018 ''smart products'' RFI, DOE is proposing that connected features be disabled during testing. Because these features are relatively new and their presence in the market and use in field is limited, DOE does not have enough information to indicate what would constitute a representative configuration. Without this information, requiring testing with the network function enabled would be inappropriate. Specifically, in this NOPR, DOE proposes that microwave ovens that are equipped with a network function, such as Bluetooth® technology or the capability for internet connectivity (*i.e.,* ''connected microwave ovens''), are to be tested with the network function disabled during testing. If a network function cannot be disabled per manufacturer's instructions in the owner's manual (*e.g.,* by pressing a button on the microwave oven's control panel), DOE proposes that the energy use of such network functions need not be reported to DOE nor used in determining compliance with the applicable energy conservation standard. However, DOE recognizes there are alternative approaches to address the issue of microwaves that cannot turn the network functionality off. One such approach would be to require the energy use of the network feature be measured and subtracted from the standby mode energy measurement. DOE additionally requests comment on this alternative approach.

DOE proposes to clarify that section 2.1.3 of Appendix I, which specifies that a microwave oven must be installed in accordance with paragraph 5.2 of IEC 62301 (Second Edition), does not apply with respect to measuring the energy use of network functions. Paragraph 5.2 states, in part, that the product must be prepared and setup in accordance with manufacturer's instructions, and if no instructions for use are available, then factory or default settings must be used, or if such settings are not indicated, the product must be tested as supplied. In DOE's previous test procedures for microwaves, however, DOE determined that it would not measure network functionality energy use. In particular, DOE specifically determined in its 2012 test procedure not to include provisions for measuring energy use in network functionality (77 FR 65942, 65953–54 (Oct. 31, 2012), and DOE's most recent test procedure for microwaves did not address network functionality (81 FR 91418; Dec. 16, 2016).

DOE requests comment on the proposed requirements for testing microwave ovens with network functions disabled, including its alternative approach of subtracting the energy used by the network functions from the standby mode energy consumption measurement, where network functions cannot be disabled.

D. Integrated Annual Energy Consumption Metric

EPCA requires DOE to incorporate the active mode, standby mode, and off mode energy use values into a single energy use metric, unless it is technically infeasible to do so. (42 U.S.C. 6295(gg)(2)(A)) Accordingly, in the January 2018 RFI, DOE requested input on methods for calculating an integrated annual energy use metric for microwave ovens. DOE also requested data on the consumer usage habits for each available operating mode for microwave ovens. 83 FR 2566, 2569–2570, 2573 (Jan. 18, 2018)

AHAM commented that because it opposes including active mode measurements in the microwave oven test procedure, it did not have feedback at this time on an integrated metric. AHAM also commented that it is not aware of any updated consumer usage data for microwave oven active modes. (AHAM, No. 4 at p. 10)

As discussed, DOE is not proposing an active mode test method for microwave ovens in this NOPR. As such, consideration of an integrated metric is moot, and DOE is not proposing to make any changes to the existing metric for microwave oven energy consumption.

DOE requests comment on maintaining the current metric for microwave oven energy consumption.

E. Section Title and Cross-Reference

DOE is proposing to add a title to distinguish test procedure provisions regarding the power supply and to correct two cross-references. DOE is proposing to insert ''2.2.2 Gas supply'' in Appendix I prior to general energy supply specifications for cooking products related to gas burner adjustments, natural gas, propane, and test gas. This title would provide parallel organization with the electrical supply provisions in section 2.2.1 of Appendix I and would improve readability. Additionally, in two places the current test procedure cites section 1.15 of Appendix I for the definition of ''inactive mode.'' The definition for ''inactive mode'' is at section 1.14. DOE is proposing to correct these cross-references to avoid potential confusion. [Update this section if section 2.2.2.1–4 is removed prior to this NOPR being published]

F. Test Procedure Costs, Harmonization, and Other Topics

1. Test Procedure Costs and Impact

EPCA requires that test procedures proposed by DOE not be unduly burdensome to conduct. In this NOPR, DOE proposes that a microwave oven clock display be turned on, notwithstanding the requirements in section 2.1.3 of Appendix I, which references paragraph 5.2 of IEC 62301 (Second Edition). That is, DOE proposes the following changes from the current requirements of section 2.1.3 of Appendix I: The unit would not be installed according to manufacturer instructions, default setting, or supplied setting if necessary to ensure that the clock display remains on unless the microwave oven automatically powers down the clock display and the product provides no setting that allows the consumer to prevent the clock display from powering down automatically. DOE also proposes to clarify that a unit with a network function be tested with the network function disabled during testing. DOE has tentatively determined that these proposed amendments would not be unduly burdensome for manufacturers to conduct.

The proposed amendments would not impact the scope of the test procedure (*i.e.,* the proposal would not require manufacturers to test microwave ovens that are not already required to be tested). DOE has tentatively determined that the proposed amendments would not alter the measured energy efficiency/energy use of microwave ovens.

To evaluate whether any microwave oven would require retesting if DOE finalized the direction to keep the clock display on at all times during testing, if possible, DOE sought to identify whether any microwave ovens that are currently required to be tested with the clock display off would be tested with the clock display on under the proposal in this document. DOE reviewed all microwave ovens that are currently certified as having standby power less than 0.5 watts in DOE's Compliance Certification Database.[11] DOE selected 0.5 watts as the threshold value to investigate because during testing and investigation conducted during the previous microwave oven energy conservation standards final rule (78 FR 36316; published on June 17, 2013), DOE observed that a standby power consumption of 0.5 watts or less typically indicates that the microwave oven uses more efficient components or that the microwave oven clock display is off.

DOE identified 50 models of microwave ovens with standby power less than 0.5 watts. Of those identified microwave ovens that had user manuals available online or that DOE tested in-house (comprising a total of 35 of the 50 initially identified models), DOE reviewed the user manuals of these models to determine the status of the microwave oven clock display required under the current test procedure as compared to the status of the microwave oven clock display if tested under the proposed procedure. For the models with manuals available online, 31 user manuals either specify that the microwave oven has an LED display or describe one of the features of the display screen as the capability to display the clock time when the microwave oven is not in use. The manuals also include instructions to setup the clock time.

Given that these 31 models of microwave ovens have LED clock displays and/or instructions for setup of the clock time in the user manuals, both the current test procedure and the test procedure as proposed in this NOPR would require the microwave oven clock display to be on during testing. As noted, section 3.1.3.1 of Appendix I requires setting the clock to 3:23 before testing any unit with a power draw that varies based on the displayed time. The current procedure also requires setting up each unit according to manufacturer instructions prior to testing. Section 2.1.3 of Appendix I. These 31 models of microwave ovens are currently required to be tested with the microwave oven display clock on during testing, which would not change if DOE adopted the proposal in this NOPR.

For the remaining four models of microwave ovens that have online user manuals, the user manual did not contain instructions to set up the clock time, nor any image indicating a means on the microwave oven's control panel to configure the clock. In these instances, the user manuals identified the microwave ovens as having an auto-power down feature that shuts off the display, and the product provides no option to disable this feature; thus, these units would continue to be tested with the clock display off under the proposed direction in this document.

Based on this review of the 35 models of microwave ovens with available user manuals, DOE did not identify any microwave oven that would require retesting under the proposed requirement to always keep the clock display on during testing unless the clock display powers down automatically and the product provides no option for the consumer to prevent the display from powering down automatically. Therefore, based on this review of 35 microwave ovens, DOE has tentatively determined that this proposal would not have any cost burden associated with it. DOE requests comment on its analysis that the proposal to keep the clock display on at all times, if possible, would not impact manufacturers because no microwave ovens would require retesting or recertification. DOE also requests information on microwave ovens that allow the consumer to turn the clock on and off, and the manufacturer instructions provided and/or default conditions in such instances.

Similarly, the proposed additional direction for testing microwave ovens equipped with a network function with the function disabled would not affect any measured standby power for current products. In DOE's previous test procedures for microwaves, DOE determined that it would not measure network functionality energy use. As additional information, DOE reviewed the user manuals of microwave ovens that have network functions and are currently available in the market. For the microwave oven that operates on Bluetooth®, DOE observed that this function is ''off'' as shipped, and a user would need to turn it on manually to use it. Similarly, for microwave ovens that connect via Wi-Fi, users needed to manually enable the Wi-Fi connection after setting up the unit. Therefore, the proposal would not change the requirements for testing any of these microwave ovens with a network function.

DOE requests comment on its understanding of the impact and associated costs of the proposed test procedure.

2. Harmonization With Industry Test Methods

The test procedure for microwave ovens at Appendix I incorporates by reference certain provisions of IEC 62301 (Second Edition) regarding test conditions, equipment, setup, and methods for measuring standby mode and off mode power consumption. DOE seeks comment on the degree to which the DOE test procedure should consider and be harmonized further with IEC 62301 (Second Edition).

DOE also notes, as discussed, the IEC issued IEC 60705 Ed. 4.2, but DOE is not proposing to incorporate it either in whole or in part. DOE seeks comment on whether and to what degree DOE should consider and harmonize the Federal test procedure for microwaves with IEC 60705 Ed. 4.2.

DOE also requests comment on the benefits and burdens of adopting any other industry/voluntary consensus-

[11] U.S. Department of Energy's Compliance Certification Database. Last accessed December 26, 2018. *https://www.regulations.doe.gov/certification-data/products.html#q=Product_Group_s%3A**.

based or other appropriate test method, without modification.

3. Other Test Procedure Topics

In addition to the issues identified earlier in this document, DOE also welcomes comment on any other aspect of the existing test procedure for microwave ovens not already addressed by the specific areas identified in this document. DOE particularly seeks information that would improve the representativeness of the test procedure, as well as information that would help DOE create a procedure that would limit manufacturer test burden through streamlining or simplifying testing requirements. Comments regarding repeatability and reproducibility are also welcome.

DOE notes that under Executive Order 13771, ''Reducing Regulation and Controlling Regulatory Costs,'' Executive Branch agencies such as DOE must manage the costs associated with the imposition of expenditures required to comply with Federal regulations. See 82 FR 9339 (Feb. 3, 2017). Consistent with that Executive Order, DOE encourages the public to provide input on measures DOE could take to lower the cost of its regulations applicable to microwave ovens consistent with the requirements of EPCA.

G. Compliance Date and Waivers

EPCA prescribes that all representations of energy efficiency and energy use, including those made on marketing materials and product labels, must be made in accordance with an amended test procedure, beginning 180 days after publication of such a test procedure final rule in the **Federal Register**. (42 U.S.C. 6293(c)(2)) If DOE were to publish an amended test procedure, EPCA provides an allowance for individual manufacturers to petition DOE for an extension of the 180-day period if the manufacturer may experience undue hardship in meeting the deadline. (42 U.S.C. 6293(c)(3)) To receive such an extension, petitions must be filed with DOE no later than 60 days before the end of the 180-day period and must detail how the manufacturer will experience undue hardship. *Id.*

Upon the compliance date of an amended test procedure, should DOE issue such an amendment, any waivers that had been previously issued and are in effect that pertain to issues addressed by the amended test procedure are terminated. 10 CFR 430.27(h)(2). Recipients of any such waivers would be required to test the products subject to the waiver according to the amended test procedure as of the compliance date of the amended test procedure. At present, there are no waivers that address test procedure issues that would be addressed by the amendments proposed in this document.

DOE proposes to remove the introductory note in Appendix I. The introductory note references the June 14, 2017 date after which any representations related to energy or power consumption of cooking products must be based upon results generated under the test procedure. As this date has passed, the introductory note is no longer needed.

IV. Procedural Issues and Regulatory Review

A. Review Under Executive Order 12866

The Office of Management and Budget (''OMB'') has determined that test procedure rulemakings do not constitute ''significant regulatory actions'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, 58 FR 51735 (Oct. 4, 1993). Accordingly, this action was not subject to review under the Executive Order by the Office of Information and Regulatory Affairs (''OIRA'') in the OMB.

B. Review Under Executive Orders 13771 and 13777

On January 30, 2017, the President issued Executive Order (''E.O.'') 13771, ''Reducing Regulation and Controlling Regulatory Costs.'' E.O. 13771 stated the policy of the executive branch is to be prudent and financially responsible in the expenditure of funds, from both public and private sources. E.O. 13771 stated it is essential to manage the costs associated with the governmental imposition of private expenditures required to comply with Federal regulations.

Additionally, on February 24, 2017, the President issued E.O. 13777, ''Enforcing the Regulatory Reform Agenda.'' E.O. 13777 required the head of each agency designate an agency official as its Regulatory Reform Officer (''RRO''). Each RRO oversees the implementation of regulatory reform initiatives and policies to ensure that agencies effectively carry out regulatory reforms, consistent with applicable law. Further, E.O. 13777 requires the establishment of a regulatory task force at each agency. The regulatory task force is required to make recommendations to the agency head regarding the repeal, replacement, or modification of existing regulations, consistent with applicable law. At a minimum, each regulatory reform task force must attempt to identify regulations that:

(i) Eliminate jobs, or inhibit job creation;

(ii) Are outdated, unnecessary, or ineffective;

(iii) Impose costs that exceed benefits;

(iv) Create a serious inconsistency or otherwise interfere with regulatory reform initiatives and policies;

(v) Are inconsistent with the requirements of Information Quality Act, or the guidance issued pursuant to that Act, in particular those regulations that rely in whole or in part on data, information, or methods that are not publicly available or that are insufficiently transparent to meet the standard for reproducibility; or

(vi) Derive from or implement Executive Orders or other Presidential directives that have been subsequently rescinded or substantially modified.

DOE initially concludes that this rulemaking is consistent with the directives set forth in these executive orders. This proposed rule is estimated to result in no costs. Therefore, if finalized as proposed, this rule is expected to be an E.O. 13771 other action.

C. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (''IRFA'') for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As required by Executive Order 13272, ''Proper Consideration of Small Entities in Agency Rulemaking,'' 67 FR 53461 (Aug. 16, 2002), DOE published procedures and policies on February 19, 2003, to ensure that the potential impacts of its rules on small entities are properly considered during the DOE rulemaking process. 68 FR 7990. DOE has made its procedures and policies available on the Office of the General Counsel's website: *http://energy.gov/gc/office-general-counsel.*

DOE reviewed this proposed rule to amend the test procedures for microwave ovens under the provisions of the Regulatory Flexibility Act and the procedures and policies published on February 19, 2003. DOE has tentatively determined that this proposed test procedure, if adopted, would not significantly increase the costs to microwave oven manufacturers.

DOE uses the Small Business Administration's (''SBA'') small business size standards to determine whether manufacturers qualify as small businesses, which are listed by the

North American Industry Classification System (''NAICS''). The SBA considers a business entity to be a small business, if, together with its affiliates, it employs less than a threshold number of workers specified in 13 CFR part 121. The 2017 NAICS code for microwave ovens is 335220, major household appliance manufacturing. The threshold number for NAICS code 335220 is 1,500 employees. This employee threshold includes all employees in a business's parent company and any other subsidiaries.

Most of the manufacturers supplying microwave ovens are either large multinational corporations or overseas microwave original equipment manufacturers (''OEMs'') that manufacture microwave ovens sold under another company's brand. DOE conducted a focused inquiry into small business manufacturers of products covered by this rulemaking. DOE primarily used DOE's Compliance Certification Database for microwave ovens to create a list of companies that sell microwave ovens covered by this rulemaking in the United States. DOE also used the California Energy Commission's database, Modernized Appliance Efficiency Database System, to correlate brands with OEMs. DOE identified a total of 48 distinct companies that manufacture or import microwave ovens in the United States.

DOE then reviewed these companies to determine whether the entities met the SBA's definition of ''small business'' and screened out any companies that do not manufacture products covered by this rulemaking, do not meet the definition of a ''small business,'' or are foreign-owned and operated. Based on this review, DOE has identified one potential small business that manufactures microwave ovens in the United States. Through this analysis, DOE has determined the expected effects of this rulemaking on this covered small business and whether an IRFA was needed (*i.e.,* whether DOE could certify that this rulemaking would not have a significant impact).

As previously stated, the proposal to amend the test procedure for microwave ovens by requiring that the clock display be on at all times during testing, unless the product provides no available setting to allow the consumer to prevent the clock display from powering down automatically, should not impact any of the microwave oven models with available user manuals identified by DOE. Further, the proposed additional direction for testing microwave ovens equipped with a network function with any connected functionality disabled would not affect the small business manufacturer because they do not make microwave ovens with network functions.

Therefore, DOE concludes that the impacts of the test procedure amendments proposed in this NOPR would not have a ''significant economic impact on a substantial number of small entities,'' and that the preparation of an IRFA is not warranted. DOE will transmit the certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

DOE seeks comment on its conclusion that one small business manufactured microwave ovens in the United States, with fewer than 1,500 total employees. Additionally, DOE requests comment on its determination that the proposed amendments would not have a significant economic impact on this small business.

D. Review Under the Paperwork Reduction Act of 1995

Manufacturers of microwave ovens must certify to DOE that their products comply with any applicable energy conservation standards. To certify compliance, manufacturers must first obtain test data for their products according to the DOE test procedures, including any amendments adopted for those test procedures. DOE has established regulations for the certification and recordkeeping requirements for all covered consumer products and commercial equipment, including microwave ovens. (See generally 10 CFR part 429.) The collection-of-information requirement for the certification and recordkeeping is subject to review and approval by OMB under the Paperwork Reduction Act (''PRA''). This requirement has been approved by OMB under OMB control number 1910–1400. Public reporting burden for the certification is estimated to average 35 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

E. Review Under the National Environmental Policy Act of 1969

DOE is analyzing this proposed regulation in accordance with the National Environmental Policy Act (NEPA) and DOE's NEPA implementing regulations (10 CFR part 1021). DOE's regulations include a categorical exclusion for rulemakings interpreting or amending an existing rule or regulation that does not change the environmental effect of the rule or regulation being amended. 10 CFR part 1021, subpart D, Appendix A5. DOE anticipates that this rulemaking qualifies for categorical exclusion A5 because it is an interpretive rulemaking that does not change the environmental effect of the rule and otherwise meets the requirements for application of a categorical exclusion. See 10 CFR 1021.410. DOE will complete its NEPA review before issuing the final rule.

F. Review Under Executive Order 13132

Executive Order 13132, ''Federalism,'' 64 FR 43255 (Aug. 4, 1999) imposes certain requirements on agencies formulating and implementing policies or regulations that preempt State law or that have Federalism implications. The Executive Order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive Order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have Federalism implications. On March 14, 2000, DOE published a statement of policy describing the intergovernmental consultation process it will follow in the development of such regulations. 65 FR 13735. DOE has examined this proposed rule and has determined that it would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. EPCA governs and prescribes Federal preemption of State regulations as to energy conservation for the products that are the subject of this proposed rule. States can petition DOE for exemption from such preemption to the extent, and based on criteria, set forth in EPCA. (42 U.S.C. 6297(d)) No further action is required by Executive Order 13132.

G. Review Under Executive Order 12988

Regarding the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, ''Civil Justice Reform,'' 61 FR 4729 (Feb. 7, 1996), imposes on Federal agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. Section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in sections 3(a) and 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, the proposed rule meets the relevant standards of Executive Order 12988.

H. Review Under the Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (''UMRA'') requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a proposed regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of $100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. (2 U.S.C. 1532(a), (b)) The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a proposed ''significant intergovernmental mandate,'' and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect small governments. On March 18, 1997, DOE published a statement of policy on its process for intergovernmental consultation under UMRA. 62 FR 12820; also available at *http://energy.gov/gc/office-general-counsel*. DOE examined this proposed rule according to UMRA and its statement of policy and determined that the rule contains neither an intergovernmental mandate, nor a mandate that may result in the expenditure of $100 million or more in any year, so these requirements do not apply.

I. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This proposed rule would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment.

J. Review Under Executive Order 12630

DOE has determined, under Executive Order 12630, ''Governmental Actions and Interference with Constitutionally Protected Property Rights'' 53 FR 8859 (March 18, 1988) that this proposed regulation would not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

K. Review Under Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516 note) provides for agencies to review most disseminations of information to the public under guidelines established by each agency pursuant to general guidelines issued by OMB. OMB's guidelines were published at 67 FR 8452 (Feb. 22, 2002), and DOE's guidelines were published at 67 FR 62446 (Oct. 7, 2002). DOE has reviewed this proposed rule under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

L. Review Under Executive Order 13211

Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare and submit to OMB, a Statement of Energy Effects for any proposed significant energy action. A ''significant energy action'' is defined as any action by an agency that promulgated or is expected to lead to promulgation of a final rule, and that (1) is a significant regulatory action under Executive Order 12866, or any successor order; and (2) is likely to have a significant adverse effect on the supply, distribution, or use of energy; or (3) is designated by the Administrator of OIRA as a significant energy action. For any proposed significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution, or use should the proposal be implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution, and use.

The proposed regulatory action to amend the test procedure for measuring the energy efficiency of microwave ovens is not a significant regulatory action under Executive Order 12866. Moreover, it would not have a significant adverse effect on the supply, distribution, or use of energy, nor has it been designated as a significant energy action by the Administrator of OIRA. Therefore, it is not a significant energy action, and, accordingly, DOE has not prepared a Statement of Energy Effects.

M. Review Under Section 32 of the Federal Energy Administration Act of 1974

Under section 301 of the Department of Energy Organization Act (Public Law 95–91; 42 U.S.C. 7101), DOE must comply with section 32 of the Federal Energy Administration Act of 1974, as amended by the Federal Energy Administration Authorization Act of 1977. (15 U.S.C. 788; FEAA) Section 32 essentially provides in relevant part that, where a proposed rule authorizes or requires use of commercial standards, the notice of proposed rulemaking must inform the public of the use and background of such standards. In addition, section 32(c) requires DOE to consult with the Attorney General and the Chairman of the Federal Trade Commission (''FTC'') concerning the impact of the commercial or industry standards on competition.

The proposed modifications to the test procedure for microwave ovens in this NOPR do not incorporate any new commercial standard.

N. Description of Materials Incorporated by Reference

In this NOPR, DOE is not proposing to incorporate by reference any new industry standard. The incorporation by reference of IEC 62301 (Second Edition) in appendix I to subpart B has already been approved by the Director of the

Federal Register and there are no proposed changes in the NOPR.

V. Public Participation

A. Participating in the Webinar

The time and date of the webinar are listed in the **DATES** section at the beginning of this document. If no participants register for the webinar then it will be cancelled. Webinar registration information, participant instructions, and information about the capabilities available to webinar participants will be published on DOE's website: [*https://energy.gov/eere/buildings/public-meetings-and-comment-deadlines*]. Participants are responsible for ensuring their systems are compatible with the webinar software.

Additionally, you may request an in-person meeting to be held prior to the close of the request period provided in the **DATES** section of this document. Requests for an in-person meeting may be made by contacting Appliance and Equipment Standards Program staff at (202) 287–1445 or by email: *Appliance_Standards_Public_Meetings@ee.doe.gov*.

B. Procedure for Submitting Prepared General Statements for Distribution

Any person who has plans to present a prepared general statement may request that copies of his or her statement be made available at the public meeting. Such persons may submit requests, along with an advance electronic copy of their statement in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format, to the appropriate address shown in the **ADDRESSES** section at the beginning of this notice. The request and advance copy of statements must be received at least one week before the public meeting and may be emailed, hand-delivered, or sent by mail. DOE prefers to receive requests and advance copies via email. Please include a telephone number to enable DOE staff to make a follow-up contact, if needed.

C. Conduct of Public Meeting

DOE will designate a DOE official to preside at the public meeting and may also use a professional facilitator to aid discussion. The meeting will not be a judicial or evidentiary-type public hearing, but DOE will conduct it in accordance with section 336 of EPCA (42 U.S.C. 6306). A court reporter will be present to record the proceedings and prepare a transcript. DOE reserves the right to schedule the order of presentations and to establish the procedures governing the conduct of the public meeting. After the public meeting and until the end of the comment period, interested parties may submit further comments on the proceedings and any aspect of the rulemaking.

The public meeting will be conducted in an informal, conference style. DOE will present summaries of comments received before the public meeting, allow time for prepared general statements by participants, and encourage all interested parties to share their views on issues affecting this rulemaking. Each participant will be allowed to make a general statement (within time limits determined by DOE), before the discussion of specific topics. DOE will permit, as time permits, other participants to comment briefly on any general statements.

At the end of all prepared statements on a topic, DOE will permit participants to clarify their statements briefly and comment on statements made by others. Participants should be prepared to answer questions by DOE and by other participants concerning these issues. DOE representatives may also ask questions of participants concerning other matters relevant to this rulemaking. The official conducting the public meeting will accept additional comments or questions from those attending, as time permits. The presiding official will announce any further procedural rules or modification of the above procedures that may be needed for the proper conduct of the public meeting.

A transcript of the public meeting will be included in the docket, which can be viewed as described in the *Docket* section at the beginning of this notice. In addition, any person may buy a copy of the transcript from the transcribing reporter.

D. Submission of Comments

DOE will accept comments, data, and information regarding this proposed rule before or after the public meeting, but no later than the date provided in the **DATES** section at the beginning of this proposed rule. Interested parties may submit comments using any of the methods described in the **ADDRESSES** section at the beginning of this proposed rule.

Submitting comments via *http://www.regulations.gov*. The *http://www.regulations.gov* web page will require you to provide your name and contact information. Your contact information will be viewable to DOE Building Technologies staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment.

However, your contact information will be publicly viewable if you include it in the comment or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. Persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to *http://www.regulations.gov* information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (''CBI'')). Comments submitted through *http://www.regulations.gov* cannot be claimed as CBI. Comments received through the website will waive any CBI claims for the information submitted. For information on submitting CBI, see the Confidential Business Information section.

DOE processes submissions made through *http://www.regulations.gov* before posting. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that *http://www.regulations.gov* provides after you have successfully uploaded your comment.

Submitting comments via email, hand delivery, or postal mail. Comments and documents submitted via email, hand delivery, or mail also will be posted to *http://www.regulations.gov*. If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information on a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. If you submit via mail or hand delivery, please provide all items on a CD, if feasible. It is not necessary to submit printed copies. No facsimiles (faxes) will be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, written in English and free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Campaign form letters. Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters' names compiled into one or more PDFs. This reduces comment processing and posting time.

Confidential Business Information. According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email, postal mail, or hand delivery two well-marked copies: One copy of the document marked confidential including all the information believed to be confidential, and one copy of the document marked non-confidential with the information believed to be confidential deleted. Submit these documents via email or on a CD, if feasible. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

E. Issues on Which DOE Seeks Comment

Although DOE welcomes comments on any aspect of this proposal, DOE is particularly interested in receiving comments and views of interested parties concerning the following issues:

(1) DOE requests comment on the proposed updates related to keeping the microwave oven clock display on during standby mode testing, unless the product provides no available setting to allow the consumer to prevent the clock display from powering down automatically, and whether these updates would result in additional test burden. DOE also requests comment on consumer habits regarding the use of clock displays that can be optionally turned on or off. See section III.C.1 of this document.

(2) DOE requests comment on the proposed requirements for testing microwave ovens with network function. See section III.C.2 of this document.

(3) DOE requests comment on maintaining the current metric for microwave oven energy consumption. See section III.D of this document.

(4) DOE requests comment on its analysis that the proposal to keep the clock display on at all times, if possible, would not impact manufacturers because no microwave ovens would require retesting or recertification. DOE also requests information on microwave ovens that allow the consumer to turn the clock on and off, the manufacturer instructions provided and/or default conditions in such instances, and how such models are currently tested. See section III.F.1 of this document.

(5) DOE requests comment on its understanding of the impact and associated costs of the proposed test procedure. See section III.F.1 of this document.

(6) DOE seeks comment on whether and to what degree DOE should consider and harmonize the Federal test procedure for microwaves with IEC 60705 Ed. 4.2. DOE also requests comment on the benefits and burdens of adopting any industry/voluntary consensus-based or other appropriate test procedure, without modification. See section III.F.2 of this document.

(7) DOE seeks comment on its conclusion that one small business manufactures microwave ovens in the United States, with fewer than 1,500 total employees. Additionally, DOE requests comment on its determination that the proposed amendments would not have a significant economic impact on this small business. See section IV.C of this document.

VI. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this proposed rule.

List of Subjects in 10 CFR Part 430

Administrative practice and procedure, Confidential business information, Energy conservation, Household appliances, Imports, Incorporation by reference, Intergovernmental relations, Small businesses.

Signed in Washington, DC, on October 17, 2019.

Alexander N. Fitzsimmons,

Acting Deputy Assistant Secretary for Energy Efficiency, nergy Efficiency and Renewable Energy.

For the reasons stated in the preamble, DOE is proposing to amend part 430 of Chapter II of Title 10, Code of Federal Regulations as set forth below:

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

■ 1. The authority citation for part 430 continues to read as follows:

Authority: 42 U.S.C. 6291–6309; 28 U.S.C. 2461 note.

■ 2. Appendix I to Subpart B of Part 430 is amended by:

■ a. Removing the introductory note;

■ b. Revising section 2.1.3;

■ c. Adding section 2.2.2; and

■ d. Revising sections 3.2.1.2 and 3.2.2.

The revisions and addition read as follows:

Appendix I to Subpart B of Part 430—Uniform Test Method for Measuring the Energy Consumption of Cooking Products

* * * * *

2.1.3 *Microwave ovens, excluding any microwave oven component of a combined cooking product.* Install the microwave oven in accordance with the manufacturer's instructions and connect to an electrical supply circuit with voltage as specified in section 2.2.1 of this appendix. Install the microwave oven in accordance with Section 5, Paragraph 5.2 of IEC 62301 (Second Edition) (incorporated by reference; see § 430.3), disregarding the provisions regarding batteries and the determination, classification, and testing of relevant modes. If the microwave oven can communicate through a network (*e.g.,* Bluetooth® or internet connection), disable the network function, if it is possible to disable it by means provided in the manufacturer's user manual, for the duration of testing. If disabling is not possible, the energy use associated with such network functions should not be reported to DOE and will not be used to determine compliance with DOE energy conservation standards. The clock display must be on, regardless of manufacturer's instructions or default setting or supplied setting. The clock display must remain on during testing, unless the clock display powers down automatically with no option for the consumer to override this function. Install a watt meter in the circuit that meets the requirements of section 2.8.1.2 of this appendix.

* * * * *

2.2.2 *Gas supply.*

* * * * *

3.2.1.2 *Conventional cooking top standby mode and off mode power except for any conventional cooking top component of a combined cooking product.* Make measurements as specified in section 3.1.1.1 of this appendix. If the conventional cooking top is capable of operating in inactive mode, as defined in section 1.14 of this appendix, measure the average inactive mode power of the conventional cooking top, P_{IA}, in watts as specified in section 3.1.1.1.1 of this appendix. If the conventional cooking top is capable of operating in off mode, as defined in section 1.17 of this appendix, measure the average off mode power of the conventional cooking top, P_{OM}, in watts as specified in section 3.1.1.1.2 of this appendix.

3.2.2 *Combined cooking product standby mode and off mode power.* Make measurements as specified in section 3.1.2 of this appendix. If the combined cooking product is capable of operating in inactive mode, as defined in section 1.14 of this appendix, measure the average inactive mode power of the combined cooking product, P_{IA}, in watts as specified in section 3.1.2.1 of this appendix. If the combined cooking product is capable of operating in off mode, as defined in section 1.17 of this appendix, measure the average off mode power of the combined cooking product, P_{OM}, in watts as specified in section 3.1.2.2 of this appendix.

[FR Doc. 2019–24331 Filed 11–13–19; 8:45 am]

BILLING CODE 6450–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 97

[EPA–R06–OAR–2016–0611; FRL–10001–85–Region 6]

Promulgation of Air Quality Implementation Plans; State of Texas; Regional Haze and Interstate Visibility Transport Federal Implementation Plan: Proposal of Best Available Retrofit Technology (BART) and Interstate Visibility Transport Provisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: In this supplemental notice of proposed rulemaking (SNPRM), the Environmental Protection Agency (EPA) is supplementing the proposal published on August 27, 2018 to affirm the Agency's October 2017 Federal Implementation Plan (FIP), which partially approved the 2009 Texas Regional Haze State Implementation Plan (SIP) submission and promulgated a Federal Implementation Plan (FIP) for Texas to address certain outstanding Clean Air Act (CAA) regional haze requirements. The October 2017 FIP established the Texas SO_2 Trading Program, an intrastate trading program for certain electric generating units (EGUs) in Texas, as a Best Available Retrofit Technology (BART) alternative for sulfur dioxide (SO_2). In response to certain comments received on the August 2018 proposal to affirm the October 2017 FIP, we are proposing revisions to the Texas SO_2 Trading Program, including provisions for penalties on the total annual SO_2 emissions from sources covered by the rule exceeding a proposed assurance level.

DATES: Comments must be received on or before January 13, 2020.

Public Hearing: A public hearing, if requested, will be held in Room 5220, 1201 Elm Street, Suite 500, Dallas, Texas 75270 on December 9, 2019 beginning at 1:00 p.m. If you wish to request a hearing and present testimony or attend the hearing, you should notify, on or before November 27, 2019, Ms. Jennifer Huser, Air and Radiation Division (ARSH), Environmental Protection Agency Region 6, 1201 Elm Street, Suite 500; telephone number: (214) 665–7347; email address: *huser.jennifer@epa.gov.* Oral testimony will be limited to 5 minutes each. The hearing will be strictly limited to the subject matter of the proposal, the scope of which is discussed below. Any member of the public may file a written statement by the close of the comment period. Written statements (duplicate copies preferred) should be submitted to Docket ID No. EPA–R06–OAR–2016–0611, at the address listed above for submitted comments. The hearing location and schedule will be posted on EPA's web page at *https://www.epa.gov/publicnotices/notices-search/location/Texas.* Verbatim English—language transcripts of the hearing and written statements will be included in the rulemaking docket. If no requests for a public hearing are received by close of business on November 27, 2019, a hearing will not be held, and this announcement will be made on the web page at the address shown above.

For additional logistical information regarding the public hearing please see the **SUPPLEMENTARY INFORMATION** section of this action.

ADDRESSES: Submit your comments, identified by Docket No. EPA–R06–OAR–2016–0611, at *http://www.regulations.gov* or via email to *R6_TX-BART@epa.gov.*

Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

Docket: The index to the docket for this action is available electronically at *http://www.regulations.gov* and in hard copy at the EPA Region 6, 1201 Elm Street, Suite 500, Dallas, Texas 75270. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (*e.g.,* copyrighted material), and some may not be publicly available at either location (*e.g.,* CBI).

FOR FURTHER INFORMATION CONTACT: Jennifer Huser, Air and Radiation Division, Environmental Protection Agency, Region 6, 1201 Elm Street, Suite 500, Dallas, Texas 75270, telephone 214–665–7347; email address *Huser.Jennifer@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document wherever "we," "us," or "our" is used, we mean the EPA.

A public hearing, if requested, will provide interested parties the opportunity to present information and opinions to us concerning our proposal. Interested parties may also submit written comments, as discussed in the proposal. Written statements and supporting information submitted during the comment period will be considered with the same weight as any oral comments and supporting information presented at the public hearing. We will not respond to comments during the public hearing. When we publish our final action, we will provide written responses to all significant oral and written comments received on our proposal.

At the public hearing, the hearing officer may limit the time available for each commenter to address the proposal to three minutes or less if the hearing officer determines it to be appropriate. We will not be providing equipment for commenters to show overhead slides or make computerized slide presentations. Any person may provide written or oral comments and data pertaining to our proposal at the public hearing. Verbatim English—language transcripts of the hearing and written statements will be included in the rulemaking docket.

I. Background

On August 27, 2018, we proposed to affirm our October 2017 FIP and provided an opportunity to comment on relevant aspects of the rule, as well as other specified related issues.[1] To address the SO_2 BART requirements for EGUs, we proposed to affirm our October 2017 FIP, which relied on an intrastate SO_2 trading program as a BART alternative for certain EGUs in Texas (''Texas SO_2 Trading Program''). We proposed to affirm our approval of the portion of the 2009 Texas Regional Haze SIP that addresses the BART requirement for EGUs for particulate matter (PM). We also proposed to affirm our determination that the BART alternatives addressing SO_2 and nitrogen oxides (NO_X) BART at Texas' EGUs were adequate to satisfy the interstate visibility transport requirements for the following national ambient air quality standards (NAAQS): (1) 1997 8-hour ozone; (2) 1997 $PM_{2.5}$ (annual and 24-hour); (3) 2006 $PM_{2.5}$ (24-hour); (4) 2008 8-hour ozone; (5) 2010 1-hour NO_2; and (6) 2010 1-hour SO_2. The August 2018 proposal contains more detailed discussion of previous EPA actions on Texas Regional Haze and the rationale for our proposed action to affirm.

The comment period on the August 2018 proposal closed on October 26, 2018. We received timely comments on the proposal, and we will address all comments received on the original proposal and on this supplemental proposal in our final action.

II. Public Comment

We are reopening the public comment period with respect to the specific proposed changes in this notice. Comments are due January 13, 2020. EPA is not reopening the comment period for any other aspects of our August 2018 proposal. Comments should be limited to the items discussed in this supplemental proposal.

III. Texas SO_2 BART Alternative Trading Program

A. Proposed Changes to Specific Texas SO_2 Trading Program Features

In this supplemental proposal, EPA proposes to make four sets of amendments to the Texas SO_2 Trading Program: (1) The addition of assurance provisions; (2) revisions to the Supplemental Allowance Pool allocation provisions; (3) termination of the opt-in provisions; and (4) revision of the allowance recordation provisions. The four subsections of this section discuss each of these proposed sets of amendments in turn, along with the associated rationales. In general, these proposed changes, if finalized, would strengthen our finding in October 2017,[2] which we proposed to affirm in August 2018, that the Texas SO_2 Trading Program will result in SO_2 emission levels from Texas EGUs that are similar to or less than the emission levels from Texas EGUs that would have been realized had Texas continued to participate in the SO_2 trading program under the Cross-State Air Pollution Rule (CSAPR).[3]

The proposed changes to the Texas SO_2 Trading Program would be implemented through revisions to the existing regulations at 40 CFR part 97, subpart FFFFF. A redline/strike-out document showing subpart FFFFF with the proposed revisions has been added to the docket for this proposed action.

1. Addition of Assurance Provisions

In the August 2018 proposal, EPA proposed to affirm that the Texas SO_2 Trading Program is an appropriate SO_2 BART alternative for EGUs in Texas on the basis that the program ''will achieve greater reasonable progress than BART towards restoring visibility, consistent with the June 2012 'CSAPR better than BART' and September 2017 'CSAPR still better than BART' determinations.''[4] (Further background on those determinations is set forth in the August 2018 proposal.) In support, EPA explained that the Texas SO_2 Trading Program, despite some difference in the scope of coverage of EGUs, would be comparable in stringency to, if not more stringent than, the CSAPR SO_2 trading program as applied to Texas sources.[5] EPA further explained that its analysis of the stringency of the CSAPR program was premised on the CSAPR program's structure of state emission budgets plus ''assurance levels.''[6]

In each of the CSAPR trading programs, EPA set an assurance level for each state in order to ensure that, despite the broad, interstate trading region, emissions reductions would be achieved appropriately in a geographically distributed way commensurate with states' ''good neighbor'' obligations as determined by EPA through its analysis under CAA section 110(a)(2)(D)(i)(I).[7] EPA set these assurance levels for states by first establishing a ''variability limit'' as a percentage of each state's total emission budget in order to account for year-to-year variability in the amount of fossil fuel combusted to produce electricity required to meet customer demand. EPA then set the amount of each state's assurance level as the sum of the state's budget and its variability limit.[8] If a state's sources' emissions exceed the statewide assurance level, the emissions above that level are ''penalized'' through a three-to-one allowance surrender ratio.[9] The CSAPR assurance levels are thus designed to provide the sources in each state with a strong incentive not to exceed a state-specific target in any compliance period, consistent with the state-specific nature of the good neighbor obligations, while providing

[1] 83 FR 43586 (August 27, 2018). Additional information regarding the regulatory background of the CAA and regional haze requirements can be found in the October 2017 FIP, 82 FR 48324 (Oct. 17, 2017), and our January 2017 notice of proposed rulemaking for Texas Regional Haze, 82 FR 912 (Jan. 4, 2017).

flexibility to respond to year-to-year variability in electricity demand.[10]

The Texas SO_2 Trading Program, as promulgated in October 2017, does not include an assurance level. In contrast to CSAPR, the Texas SO_2 Trading Program does not allow for sources to purchase allowances from sources in other states. Therefore, the number of allowances available to the Texas sources is limited by the total number of allowances allocated under the program. While this limits the average annual emissions under the program, we recognize, as discussed in further detail below, that the potential use of banked allowances and allowances allocated from the Supplemental Allowance Pool could result in potentially significant year-to-year variability in emissions. Therefore, the EPA is proposing to add an assurance level provision to the Texas SO_2 Trading Program in order to maintain consistency with the CSAPR program and to provide additional support for our determination that SO_2 emissions under the Texas SO_2 Trading Program will remain below the requisite level on an annual basis. In order to explain our proposed determination of the appropriate stringency at which to set the assurance level, in this supplemental proposal we will first review our prior analysis of the stringency of the Texas SO_2 Trading Program in the August 27, 2018 notice. We will then summarize the relevant public comments EPA received on this issue in response to that notice, and propose an appropriate assurance level based on our review of the information.

In the August 2018 proposal, we summarized relevant Texas-related aspects of the 2011 proposed and 2012 final ''CSAPR better than BART'' rulemaking.[11] We described how, for purposes of comparing the impacts of CSAPR and BART nationwide in the 2011 proposed rule, EPA initially used a model projection of 266,600 tons for Texas EGUs' annual SO_2 emissions under the CSAPR program.[12] We then explained that because of intervening increases in some CSAPR emissions budgets—including an increase of 50,517 tons in the CSAPR SO_2 budget for Texas—EPA conducted a sensitivity analysis for the 2012 final rule to assess the effects of the CSAPR budget adjustments, making a conservative assumption that SO_2 emissions from Texas EGUs under CSAPR could potentially increase by the full amount of the Texas budget increase, or up to 317,100 tons per year (266,600 + 50,517).[13] Finally, we noted the results of that sensitivity analysis, namely that CSAPR was expected to provide for greater reasonable progress than BART nationwide even with potential SO_2 emissions from Texas EGUs under CSAPR as high as 317,100 tons.[14]

In our August 2018 proposal, EPA used this benchmark (317,100 tons of SO_2 emissions per year) to gauge whether the Texas SO_2 Trading Program was sufficiently stringent for EPA to continue to rely on the BART-alternative analysis we conducted in the 2012 ''CSAPR better than BART'' rulemaking. EPA found that the ''annual average emissions'' under the Texas SO_2 Trading Program would remain below the 317,100 tons-per-year benchmark relied upon in the 2012 sensitivity analysis, because the yearly allocation to Texas EGUs under the Texas SO_2 Trading Program was 238,393 tons of allowances, plus 10,000 tons allocated to the Supplemental Allowance Pool.[15] Although there may be some year-to-year variability in emissions, EPA reasoned that variability for units within the Texas program would be constrained by the number of banked allowances and the number of allowances that can be allocated in a control period from the Supplemental Allowance Pool. (Annual allocations from the Supplemental Allowance Pool are limited to 54,711 tons.) The total number of allowances that can be allocated in a single year is therefore 293,104, which is the sum of the 238,393-ton budget for existing units plus 54,711. EPA further explained that certain sources that had been subject to the CSAPR program, but which are not covered by the Texas SO_2 Trading Program, emitted less than 27,500 tons of SO_2 in 2016 and their emissions were not projected to significantly increase from this level. Taking into account these figures, as well as recent emissions data, EPA concluded that ''annual average EGU emissions'' under the Texas SO_2 Trading Program were anticipated to remain ''well below'' the 317,100 ton per year benchmark and would be similar to emissions anticipated under CSAPR. Relying on this information, EPA concluded that the weight of evidence supported the conclusion that the Texas SO_2 Trading Program met the requirements of a BART alternative.[16]

Commenters on the August 2018 proposal identified several specific concerns with the Texas SO_2 Trading Program. EPA has considered these comments, and they inform this supplemental proposal. Stated broadly, these commenters are concerned that the Texas SO_2 Trading Program is insufficiently stringent to meet the requirements for a BART alternative under 40 CFR 51.308(e)(2). Commenters specifically questioned EPA's reliance on the 317,100-ton benchmark and argued that the Texas SO_2 Trading Program would, unlike source-specific BART control requirements, allow for emissions to increase compared to recent emission levels. Commenters also identified the availability of supplemental allowances, the issuance of allocations to already-retired units, the general method of allocating allowances, and the availability of unlimited allowance banking as features which, according to them, undermine the stringency of the Texas SO_2 Trading Program.

EPA proposes to reaffirm its finding that the current Texas SO_2 Trading Program budget, in general, compares favorably in stringency to the CSAPR SO_2 trading program. Further, certain features of the Texas SO_2 Trading Program that were raised as concerns by commenters, such as allocations to retired units and use of allowance banking, are consistent with elements of the CSAPR trading programs. However, EPA recognizes that the current Texas SO_2 Trading Program, unlike CSAPR, does not impose an ''assurance level''—a total level of annual emissions above which units in the program would be penalized with a higher allowance surrender ratio (*i.e.,* a three-to-one rate) than the one-to-one ratio that applies to emissions below the assurance level. In EPA's analysis summarized above, EPA relied on the number of allowances allocated annually to indicate ''average'' annual emission levels. This analysis did not account for the variability in emissions due to the availability of banking or the build-up of allowances through allocations to retired units. Although these features are available to sources participating in the CSAPR programs, their effect on emissions in

[10] For more information on assurance levels in the CSAPR program, see U.S. EPA, Cross-State Air Pollution Rule (CSAPR) Fact Sheet—Assurance Provisions, available at *https://www.epa.gov/sites/production/files/2016-05/documents/fact_sheet_assurance_provisions_0.pdf* and in the docket for this action.

that program is significantly constrained by the program's assurance provisions.

Although assurance levels in the CSAPR program were, as discussed above, originally implemented to meet requirements relevant to interstate transport under the good neighbor provision, this feature of the program was also relevant to the BART-alternative analysis for CSAPR because the presence of the three-for-one penalty provision established a practical upper bound on each state's emissions in each year of the program. This informed the level of emissions EPA could project with confidence under the CSAPR program when determining whether it could serve as a BART alternative. EPA recognizes that, in the absence of an assurance level for the Texas SO_2 Trading Program, there are no analogous means of guaranteeing that emissions would remain below a certain amount on an annual basis. The resulting growth in the number of allowances available for use in future years, without some constraint on annual emissions, could in theory impact the stringency of the program in terms of annual emissions for purposes of the BART-alternative analysis.

Therefore, EPA is proposing to add an assurance level to the Texas SO_2 Trading Program. EPA is proposing to set the assurance level using the same methodology applied in the original CSAPR rulemaking.[17] There, for each state covered by a given CSAPR program, EPA analyzed the historical year-to-year variability in the total annual quantity of fossil fuel consumed to generate electricity in the state. From this analysis, EPA developed for each state a statistical percentage measure representing, at a 95% confidence level, the maximum expected one-year deviation from average annual fossil fuel consumption for electricity generation. EPA used the highest of these state-specific statistical percentage measures for any state covered by a given CSAPR program to define ''variability limits'' for all the states covered by the program, where each state's variability limit was computed as that specific state's emissions budget multiplied by the highest of the state-specific statistical percentage measures for all the states in the program. EPA proposes here to set the assurance level for the Texas SO_2 Trading Program by relying on the same analysis and methodology that were used to set assurance levels in the original CSAPR rulemaking. This approach maintains consistency with the methodology used for the CSAPR programs while accounting for the fact that the Texas SO_2 Trading Program is intrastate-only (*i.e.,* does not permit interstate trading). On a state-specific basis for Texas, EPA determined in the CSAPR rulemaking that the statistical percentage measure representing the maximum expected one-year deviation from the state's average annual fossil fuel consumption for electricity generation was seven percent.[18] Applying that same percentage to the current Texas SO_2 Trading Program budget, EPA proposes to set the variability limit for Texas at 16,688 tons, which is seven percent of the trading budget of 238,393 tons. The proposed assurance level is the sum of the budget and the variability limit, or 255,081 tons. EPA proposes to amend the Texas SO_2 Trading Program's regulations to impose a penalty surrender ratio of three allowances for each ton of emissions in any year in excess of the 255,081-ton assurance level, and to impose the penalty proportionately to emissions from those groups of sources represented by a common designated representative that emit in excess of the groups' annual allocations of allowances. These requirements are in nearly all respects identical to the CSAPR program's assurance provisions. The specific amendments to the regulatory text are described in more detail below.

In addition to being consistent with the original CSAPR methodology for setting assurance levels, EPA also believes that an assurance level set at 255,081 is appropriate for the Texas SO_2 Trading Program because, if finalized, it will provide further support for our October 2017 finding that the Texas SO_2 Trading Program will result in SO_2 emission levels from Texas EGUs that are similar to or less than the emission levels from Texas EGUs that would have been realized from participation in the SO_2 trading program under CSAPR. At an assurance level of 255,081 tons of emissions annually, EPA has high confidence that emissions will be below the amount assumed in the BART-alternative sensitivity analysis utilized for the 2012 CSAPR-better-than-BART determination (*i.e.,* 317,100 tons), and thus visibility levels at Class I areas impacted by sources in Texas are anticipated to be at least as good as the levels projected in the 2012 analysis that assumed Texas would be in the larger CSAPR SO_2 trading program.[19] In reaching that conclusion, EPA includes in its analysis a reasonable estimate of projected emissions from units that would have been in the CSAPR program, but are not in the Texas SO_2 Trading Program. EPA proposes to use a more conservative (*i.e.,* higher) estimate of these emissions than in its August 2018 proposal. We propose to assume that these units will emit 35,000 tons of SO_2 annually based on a maximum annual emission level of 34,129 tons over the past five years (2014–2018) and considering that several of these units have recently shut down or have been announced for shutdown in the near future.[20] Adding that amount to the assurance level of 255,081 tons yields 290,081 tons. Assuming this figure represents a firm upper bound on annual SO_2 emissions from the relevant EGUs in Texas, this is less than the 317,100 ton figure EPA had demonstrated was acceptable in the original 2012 CSAPR analysis, as discussed above and in the August 2018 proposal.[21] We note that, as demonstrated in Table 1, SO_2 emissions from power plants in Texas are currently well below the Texas SO_2 Trading Program budget of 238,293 tons (as well as the proposed assurance level of 255,081 tons) and are anticipated to continue to decrease due to the low cost of natural gas and increasing renewable energy production.[22]

[18] *Id.*

[19] Two organizations have filed a petition for reconsideration of EPA's September 29, 2017 determination that CSAPR continues to satisfy the BART-alternative analysis under 40 CFR 51.308(e)(4) notwithstanding certain changes to the geographic scope of the program, including the removal of Texas from the CSAPR program for annual SO_2 and NOx emissions. *See* Sierra Club and National Parks Conservation Association, Petition for Partial Reconsideration of Interstate Transport of Fine Particulate Matter: Revision of Federal Implementation Plan Requirements for Texas, 82 FR 45481 (Sept. 29, 2017); EPA–HQ–OAR–2016–0598; FRL09968–46–OAR (dated Nov. 28, 2017). EPA is not proposing to address that determination through this action, and EPA is not addressing or revisiting the larger reaffirmation of the BART-alternative analysis for CSAPR at issue in that separate action taken in September 2017. EPA intends to take action at a later date responding to the petition for reconsideration in that matter.

[20] *See* ''Texas EGU SO_2 emissions, 2014–2018.xlsx'', available in the docket for this action. Sandow Station units 5A and 5B have been permanently retired. AEP has announced retirement of Oklaunion by September 2020. Gibbons Creek is currently not operating although it has not been officially retired.

TABLE 1—RECENT SO_2 EMISSIONS TRENDS IN TEXAS
[Tons]

	2014	2015	2016	2017	2018
Texas total EGU emissions	343,425	260,138	245,799	275,993	211,025
Participating sources' emissions	309,296	236,754	218,291	245,870	179,628
Non-participating sources' emissions	34,129	23,384	27,509	30,124	31,397

EPA also notes that the addition of an assurance level guaranteeing that SO_2 emissions can be expected to remain below a certain level each year has the effect of also addressing a number of other specific concerns about the Texas SO_2 Trading Program raised by commenters. In particular, to the extent that commenters claimed the program would be inadequately stringent due to the allowance allocation methodology, including allocations to retired units, or due to the Supplemental Allowance Pool or allowance banking, these concerns are effectively rendered moot by the addition of the assurance level. This is because when a mass-based trading program includes a ''cap'' on overall annual emissions, as the Texas SO_2 Trading Program would with the addition of the proposed assurance provisions, that overall ''cap'' on emissions set by the program (here, the assurance level) effectively determines the stringency of the program in each year. How allowances to emit are allocated annually within that overall cap, and whether allowances may be banked across years by certain market participants, will not impact the annual stringency of the program as a whole. Allocations to retired units and the availability of banking are important to ensure market stability, avoid perverse incentives, and potentially aid in sources' operational planning.[23] With the addition of an assurance level, the potential risk of an undue relaxation of the annual stringency in the program is minimized, because sources will remain strongly incentivized to keep annual emissions below the level at which the three-for-one surrender penalty is imposed. The effectiveness of assurance levels in guaranteeing the stringency of trading programs has been borne out in CSAPR, where no state's sources' emissions have exceeded a state's assurance level to-date.[24]

EPA requests comment on its proposal to add assurance provisions to the Texas SO_2 Trading Program. EPA also requests comment on its proposal to set the assurance level at 255,081 tons. The specific mechanics for the addition of this feature to the program are discussed in more detail below.

EPA proposes to make the assurance level effective beginning with the 2021 compliance period and for each period thereafter. The proposed assurance provisions would be implemented through the addition of new provisions at multiple locations in the Texas SO_2 Trading Program regulations at 40 CFR part 97, subpart FFFFF (40 CFR 97.901 through 97.935). In § 97.902, new definitions of several terms used in the assurance provisions (''assurance account,'' ''common designated representative,'' ''common designated representative's assurance level,'' and ''common designated representative's share'') would be added. New § 97.906(c)(2) and (c)(3)(ii) would set forth the central requirement of the assurance provisions—namely, that if SO_2 emissions from all covered sources in 2021 or any subsequent year collectively exceed the program's assurance level, then the owners and operators of the groups of sources determined to be responsible for the collective exceedance would be required to surrender allowances totaling twice the amount of the exceedance by a specified deadline, in addition to the allowances surrendered to account for the sources' total emissions. New § 97.910(b) and (c) would establish the variability limit that would be added to the trading program budget to determine the amount of the assurance level. New § 97.920(b) would provide for the establishment of assurance accounts, when appropriate, to hold the additional allowances to be surrendered. New § 97.925 would set forth additional procedures for EPA's administration of and sources' compliance with the assurance provisions.

Besides the addition of the new provisions just described, in §§ 97.906 and 97.920, several existing paragraphs would be renumbered and internal cross-references would be updated to reflect the added and renumbered paragraphs. Finally, revisions would be made to existing language at §§ 97.902 (definitions of ''general account'' and ''Texas SO_2 Trading Program allowance deduction''), 97.906(b)(2), 97.913(c), 97.926(b), 97.928(b), and renumbered 97.906(c)(4)(ii) to integrate the new assurance provisions with various existing provisions of the Texas program regulations.

The language of the proposed revisions to the Texas SO_2 Trading Program regulations would generally parallel the analogous language from the CSAPR regulations at 40 CFR part 97, subparts AAAAA through EEEEE, streamlined to reflect the Texas program's narrower applicability (*i.e.,* specific units located only in Texas, excluding any new units built either in Texas or in Indian country within Texas' borders). The only substantive differences from the analogous CSAPR assurance provisions concern the approach used to impute allocation amounts—for use in apportioning responsibility for any collective exceedance of the assurance level—to any units that do not receive actual allowance allocations from the trading program budget. Under CSAPR, the only units potentially in this situation are new units that do not receive allowance allocations from the CSAPR new unit set-asides, and the CSAPR regulations include a methodology for computing unit-specific imputed allocation amounts based on several data elements relating to the new units' design and potential operation.[25] In contrast, under the Texas SO_2 Trading Program, the only units potentially in this situation would be existing units that have ceased operation for an extended period, thereby losing their allocations from the trading budget under § 97.911(a), and that subsequently resume operation.[26]

[23] *See* CSAPR Update Final Rule, 81 FR 74506, 74559, 74566 (Oct. 26, 2016) (discussing rationales for these features in the context of the CSAPR Update ozone season NO_X trading program).

[24] *See* 2017 and 2018 CSAPR Budgets Emissions and Assurance Levels Spreadsheets, *available at* U.S. EPA, CSAPR Assurance Provision, *https://www.epa.gov/csapr/csapr-assurance-provision.* Copies of the spreadsheets, fact sheet, and web page are also provided in the docket for this action.

[25] *See, e.g.,* paragraph (3) of the definition of ''common designated representative's share'' at 40 CFR 97.702.

[26] Although the owners and operators of a unit in this situation might receive an allocation of allowances from the Supplemental Allowance Pool under § 97.912 based in part on the unit's emissions following resumption of operations, under the Texas program assurance provisions as proposed, any allocations of allowances from the Supplemental Allowance Pool would not be

Because the Texas SO_2 Trading Program regulations already identify the unit-specific allowance allocations that these units would formerly have received from the trading budget, the proposed Texas SO_2 Trading Program assurance provisions would use these previously established amounts for purposes of assurance provision calculations instead of requiring new imputed allocation amounts to be computed according to the more complex methodology in the CSAPR assurance provisions. The simpler approach proposed for the Texas SO_2 Trading Program assurance provisions appears at paragraph (2) of the proposed new definition of ''common designated representative's assurance level'' in § 97.902.

The simpler approach we are proposing for determining any imputed allocation amounts allows for some additional simplifications elsewhere in the proposed Texas SO_2 Trading Program assurance provisions. The CSAPR assurance provisions include regulatory text addressing the submission of data required to compute the imputed allocation amounts and the consequences of appeals relating to EPA's use of the data; the CSAPR provisions also call for issuance of an initial notice in advance of the required data submissions. Because under the proposed Texas SO_2 Trading Program assurance provisions the specific imputed allocation amounts would already be stated in the regulations, analogous provisions addressing data submissions and appeals are unnecessary and the contents of the initial notice can be consolidated into a later notice. Consequently, the corresponding paragraphs of the proposed Texas SO_2 Trading Program assurance provisions at proposed new § 97.925(b)(1)(ii), (b)(2)(i), and (b)(6)(ii) would contain no regulatory language and instead appear as ''reserved.''

2. Revision of Supplemental Allowance Pool Allocation Provisions

Section 97.912 of the existing Texas SO_2 Trading Program regulations establishes how allowances are allocated from the Supplemental Allowance Pool to sources (collections of participating units at a facility) that have reported total emissions for that control period exceeding the total amounts of allowances allocated to the participating units at the source for that control period (before any allocation from the Supplemental Allowance Pool). While all other sources required to participate in the trading program have flexibility to transfer allowances among multiple participating units under the same owner/operator when planning operations, Coleto Creek consists of only one coal-fired unit, and at the time of our October 2017 FIP, was the only coal-fired unit in Texas owned and operated by Dynegy. To provide this source additional flexibility, under the current program, Coleto Creek is allocated its maximum supplemental allocation from the Supplemental Allowance Pool as long as there are sufficient allowances in the Supplemental Allowance Pool available for allocation, and its actual allocation will not be reduced in proportion with any reductions made to the supplemental allocations to other sources. In our August 2018 proposal, we noted that Dynegy has merged with Vistra, which owns other units that are subject to the trading program. In the August 2018 proposal, we solicited comment on eliminating this additional flexibility for Coleto Creek in light of the recent change in ownership, and we received no adverse comments on such a change. In this SNPRM, we propose to make this change to the regulations.

Some commenters on the August 2018 proposal supported an analogous further change to the methodology for allocating allowances from the Supplemental Allowance Pool. These commenters observed that any owner with multiple sources has the ability to use surplus allowances allocated to one source to cover emissions from its other sources that exceed those other sources' base allowance allocations. Based on this observation, the commenters expressed the view that it would be more equitable to make allocations from the Supplemental Allowance Pool in proportion to each owner's total emissions in excess of the owner's total base allowance allocations instead of in proportion to each individual source's emissions in excess of the individual source's base allowance allocation. EPA agrees that this change would be equitable and notes that it would also be consistent with the rationale for eliminating the special flexibility in the existing regulations for Coleto Creek. Accordingly, EPA proposes to amend the Supplemental Allowance Pool allocation provisions to reflect this further change in the allocation methodology.

The proposed modifications to the methodology for allocating allowances from the Supplemental Allowance Pool would be implemented through several revisions to §§ 97.911 and 97.912. In § 97.912, paragraph (a) would be edited to limit applicability of the current allocation methodology to the 2019 and 2020 control periods, and a new paragraph (b) would be added setting forth the revised allocation methodology proposed for the control periods in 2021 and subsequent years. Two existing paragraphs of the section would be renumbered to accommodate the new paragraph (b), and internal cross-references would be updated to reflect the renumbering and to integrate the provisions of the revised allocation methodology with other existing provisions.

Proposed new § 97.912(b)(1) of the revised allocation methodology sets forth a procedure for assigning units into groups under common ownership called ''affiliated ownership groups.'' Under the proposed procedure, the group assignments would remain constant unless and until revised by EPA to reflect an ownership transfer. The proposed initial group assignments for all covered units are specified in a proposed new column that would be added to the existing allowance allocation table in § 97.911(a)(1).

Finally, consistent with the existing language in renumbered § 97.912(d) capping the number of allowances that can be allocated from the Supplemental Allowance Pool for any given control period, non-substantive revisions to §§ 97.911(a)(2) and (c)(5) would clarify that allowances from the trading budget that are transferred to the Supplemental Allowance Pool are not necessarily ''allocated under'' § 97.912, but instead are made available for ''potential allocation in accordance with'' § 97.912.

EPA requests comment on the proposed revisions to the Supplemental Allowance Pool allocation provisions.

3. Termination of Opt-In Provisions

Under § 97.904(b) of the existing Texas SO_2 Trading Program regulations, the EPA provided an opportunity for any other unit in the State of Texas that was previously subject to the CSAPR SO_2 Group 2 Trading Program and would have received an allowance allocation under that program to opt into the Texas SO_2 Trading Program. Under § 97.911(b), a unit that opts into the Texas SO_2 Trading Program would receive the same allowance allocation that it would have received under the CSAPR SO_2 Group 2 Trading Program. These allowance allocations would be in addition to the allocations to other units from the Texas SO_2 Trading Program budget and would therefore increase the total number of allowances available under the program. As of the date of this supplemental proposal, no source has notified EPA of intent to opt into the Texas SO_2 Trading Program.

considered when apportioning responsibility for a collective exceedance of the assurance level.

A commenter on the August 2018 proposal asserted that the opt-in provision weakened the functional equivalence of the Texas SO_2 Trading Program to CSAPR. The commenter cited EPA's determination not to include opt-in provisions in the CSAPR trading programs on the basis that opt-in provisions would undermine achievement of the CSAPR program's emission reduction objectives. The commenter also cited EPA's discussion of the reasons for this determination, including the difficulty of distinguishing new emission reductions from reductions that opt-in sources would have made anyway, and the consequent likelihood that the amounts of allowances allocated to the sources would exceed their starting emissions levels. The allocations to the sources opting in would thus introduce ''extra'' allowances into the CSAPR trading programs, increasing the quantity of allowances available to be traded to other sources and thereby decreasing the programs' stringency.[27] EPA believes that these considerations about potentially introducing ''extra'' allowances also apply to the current opt-in provisions in the Texas SO_2 Trading Program. Therefore, consistent with this supplemental proposal's overall objective of strengthening our finding that the Texas SO_2 Trading Program will result in SO_2 emission levels from Texas EGUs that are similar to or less than the emission levels from Texas EGUs that would have been realized from participation in the SO_2 trading program under CSAPR, EPA proposes to terminate the opt-in provisions in the Texas SO_2 Trading Program.

EPA requests comment on the proposed termination of the opt-in provisions. EPA also solicits comment as to what other relevant provisions in the Texas SO_2 Trading Program may offset the expressed concerns with the opt-in provisions.

The proposed termination of the opt-in provisions would be implemented through revisions in three locations. In § 97.904(b)(2), revised language would provide that the opportunity to participate in the Texas SO_2 Trading Program by opting in is available only for the 2019 and 2020 control periods. Revisions to §§ 97.911(b) and 97.921(d) would similarly provide that allowance allocations to opt-in units could be made and recorded only for the 2019 and 2020 control periods.

[27] *See generally* 76 FR at 48276.

4. Revision of Allowance Recordation Provisions

Under § 97.921(a) of the existing Texas SO_2 Trading Program regulations, ''[t]he Administrator may delay recordation of Texas SO_2 Trading Program allowances for the specified control periods if the State of Texas submits a SIP revision before the recordation deadline.'' Similarly, under § 97.921(b), ''[t]he Administrator may delay recordation of the Texas SO_2 Trading Program allowances for the applicable control periods if the State of Texas submits a SIP revision by May 1 of the year of the applicable recordation deadline under this paragraph.'' In this SNPRM, we are proposing to amend the language in the recordation provisions such that the Administrator can delay recordation in the event that Texas submits a SIP revision *and EPA takes final action to approve it.* These revisions are necessary to ensure that the program remains fully operational unless it is replaced by a SIP revision that is approved by EPA as meeting the SO_2 BART requirements for the covered units.

The proposed amendment to condition any exceptions to scheduled allowance recordation activities on EPA's approval, rather than Texas' submission, of a SIP revision would be implemented through revisions to three paragraphs of § 97.921. In § 97.921(a), the existing language providing for a possible delay of recordation activities scheduled for November 1, 2018, would be deleted without replacement; the language is moot because the recordation date has already passed. In § 97.921(b), which governs future recordation of allowances allocated from the trading budget under § 97.911(a), the existing language would be revised to provide that future recordation activities will take place as scheduled unless provided otherwise in EPA's approval of a SIP revision replacing the provisions of subpart FFFFF. The same revised condition would also be added to § 97.921(c), which governs future recordation of allowances allocated from the Supplemental Allowance Pool under § 97.912.

EPA requests comment on the proposed revisions to the allowance recordation provisions.

B. Interstate Visibility Transport

In our August 2018 proposal, we proposed to affirm that Texas' participation in CSAPR to satisfy NOx BART and the Texas SO_2 Trading Program fully addresses Texas' interstate visibility transport obligations for the following six NAAQS: (1) 1997 8-hour ozone; (2) 1997 $PM_{2.5}$ (annual and 24-hour); (3) 2006 $PM_{2.5}$ (24-hour); (4) 2008 8-hour ozone; (5) 2010 1-hour NO_2; and (6) 2010 1-hour SO_2.[28] The basis of this proposed affirmation was our determination in the October 2017 FIP that the regional haze measures in place for Texas are adequate to ensure that emissions from the State do not interfere with measures to protect visibility in nearby states because the emission reductions are consistent with the level of emissions reductions relied upon by other states during consultation and when setting their reasonable progress goals. As discussed in our August 2018 proposal, the 2009 Texas Regional Haze SIP relied on CAIR to meet SO_2 and NO_X BART requirements for EGUs. Under CAIR, Texas EGU sources were projected to emit approximately 350,000 tons of SO_2 annually. In today's SNPRM, EPA proposes to make four revisions to strengthen the Texas SO_2 Trading Program and increase its consistency with CSAPR, including the addition of an assurance level consistent with the 2012 CSAPR demonstration. As discussed elsewhere in this SNPRM, Texas EGU annual SO_2 emissions for sources covered by the trading program would be constrained by the assurance level of 255,081 tons. Including an estimated 35,000 tons per year of emissions from units not covered by the Texas SO_2 Trading Program yields 290,081 tons of SO_2, well below the 350,000-ton emissions projection for Texas sources under CAIR or the 317,100-ton emissions benchmark for Texas sources under CSAPR discussed in section III.A.1. Additionally, the October 2017 FIP relies on CSAPR as an alternative to EGU BART for NO_X, which exceeds the NO_X emission reductions from Texas relied upon by other states during consultation. Because the proposed revisions to the Texas SO_2 Trading Program in this SNPRM would make the program consistent with or below those emission levels relied upon by other states during consultation, we believe these revisions provide further support for our earlier finding that the BART alternatives in the October 2017 FIP result in emission reductions adequate to satisfy the requirements of CAA section 110(a)(2)(D)(i)(II) with respect to visibility for the six identified NAAQS. We invite comment on how the proposed revisions in this SNPRM impact our August 2018 proposal to affirm our October 2017 determination regarding Texas' visibility transport

[28] 83 FR at 43593, 43604, and 43605.

obligations with respect to the NAAQS identified above.

IV. Supplemental Proposed Action

In this SNPRM, EPA proposes to make four sets of amendments to the Texas SO_2 Trading Program: (1) The addition of assurance-level provisions; (2) revisions to the Supplemental Allowance Pool allocation provisions; (3) termination of the opt-in provisions; and (4) revision of the allowance recordation provisions. The proposed changes to the Texas SO_2 Trading Program would be implemented through revisions to the existing regulations at 40 CFR part 97, subpart FFFFF. A redline/strike-out document showing subpart FFFFF with the proposed revisions has been added to the docket for this proposed action.

In this proposed action we are only soliciting comment on the four proposed revisions to the Texas SO_2 Trading Program, and how those proposed changes impact our August 2018 proposal to affirm that (1) the Texas SO_2 Trading Program will result in SO_2 emission levels from Texas EGUs that are similar to or less than the emission levels from Texas EGUs that would have been realized from participation in the SO_2 trading program under CSAPR, and (2) Texas' interstate visibility transport obligations with respect to six NAAQS (listed in the preceding section) are satisfied. The EPA is not reopening the comment period on any other aspect of the August 2018 proposal. The EPA will not respond to comments received during the reopened comment period outside the above-defined scope. We will respond to all comments received on this SNPRM and our August 2018 proposal to affirm our October 2017 FIP in a single final rulemaking.

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Overview, Executive Order 13563: Improving Regulation and Regulatory Review

This proposed action is not a ''significant regulatory action'' under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and is therefore not subject to review under Executive Orders 12866 and 13563 (76 FR 3821, January 21, 2011).

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This proposed action is not an Executive Order 13771 regulatory action because this action is not significant under Executive Order 12866.

C. Paperwork Reduction Act

This proposed action does not impose any new information collection burden under the PRA. OMB has previously approved the information collection activities for the Texas SO_2 Trading Program as part of the most recent information collection request renewal for the CSAPR trading programs and has assigned OMB control number 2060–0667. This proposed action would not change any information collection requirements for any entity affected underthe Texas SO_2 Trading Program.

D. Regulatory Flexibility Act

I certify that this proposed action will not have a significant impact on a substantial number of small entities. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, has no net burden or otherwise has a positive economic effect on the small entities subject to the rule. This proposed rule does not impose any requirements or create impacts on small entities. This proposed action to modify a FIP action previously issued under Section 110 of the CAA will not create any new requirement with which small entities must comply. Accordingly, it affords no opportunity for the EPA to fashion for small entities less burdensome compliance or reporting requirements or timetables or exemptions from all or part of the rule. The fact that the CAA prescribes that various consequences (*e.g.*, emission limitations) may or will flow from this action does not mean that the EPA either can or must conduct a regulatory flexibility analysis for this action. We have therefore concluded that this proposed action will have no net regulatory burden for all directly regulated small entities.

E. Unfunded Mandates Reform Act (UMRA)

This proposed action does not contain an unfunded mandate of $100 million or more as described in UMRA, 2 U. S. C. 1531–1538, and does not significantly or uniquely affect small governments.

F. Executive Order 13132: Federalism

This proposed action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This proposed rule does not have tribal implications, as specified in Executive Order 13175. It will not have substantial direct effects on tribal governments. Thus, Executive Order 13175 does not apply to this rule.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks [29] applies to any rule that: (1) Is determined to be economically significant as defined under Executive Order 12866; and (2) concerns an environmental health or safety risk that we have reason to believe may have a disproportionate effect on children. EPA interprets E.O. 13045 as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under Section 5–501 of the E.O. has the potential to influence the regulation. This proposed action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because the EPA does not believe the environmental health or safety risks addressed by this proposed action present a disproportionate risk to children. This proposed action is not subject to E.O. 13045 because it implements specific standards established by Congress in statutes. However, to the extent this proposed rule will limit emissions of SO_2, the proposed rule will have a beneficial effect on children's health by reducing air pollution.

I. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This proposed action is not subject to Executive Order 13211 (66 FR 28355 (May 22, 2001)), because it is not a significant regulatory action under Executive Order 12866.

J. National Technology Transfer and Advancement Act (NTTAA)

This proposed action does not involve technical standards.

[29] 62 FR 19885 (Apr. 23, 1997).

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this proposed action does *not* have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). We have determined that this proposed rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it increases the level of environmental protection for all affected populations without having any disproportionately high and adverse human health or environmental effects on any population, including any minority or low-income population. The proposed rule limits emissions of SO_2 from certain facilities in Texas.

List of Subjects

40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxides, Visibility, Interstate transport of pollution, Regional haze, Best available retrofit technology.

40 CFR Part 97

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Nitrogen dioxide, Reporting and recordkeeping requirements, Sulfur dioxides.

Dated: November 1, 2019.

David Gray,

Acting Regional Administrator, Region 6.

For the reasons stated in the preamble, Part 97 of chapter I of title 40 of the Code of Federal Regulations is proposed to be amended as follows:

PART 97—FEDERAL NO_X BUDGET TRADING PROGRAM, CAIR NO_X AND SO_2 TRADING PROGRAMS, CSAPR NO_X AND SO_2 TRADING PROGRAMS, AND TEXAS SO_2 TRADING PROGRAM

■ 1. The authority citation for Part 97 is revised to read as follows:

Authority: 42 U. S. C. 7401, 7403, 7410, 7426, 7491, 7601, and 7651, *et seq.*

Subpart FFFFF—TEXAS SO_2 TRADING PROGRAM

■ 2. Section 97.902 is amended by:

■ a. In the definitions of ''Acid Rain Program'', ''Allowance Management System'', and ''Allowance Management System account'', capitalizing the first three words;

■ b. Adding in alphabetical order a definition of ''Assurance account'';

■ c. In the definition of ''authorized account representative'', capitalizing the word ''trading'' the first time it appears;

■ d. Adding in alphabetical order definitions of ''Common designated representative'', ''Common designated representative's assurance level'', and ''Common designated representative's share''; and

■ e. Revising the definitions of ''General account'' and ''Texas SO_2 Trading Program allowance deduction''.

The additions and revisions read as follows:

§ 97.902 Definitions.

* * * * *

Assurance account means an Allowance Management System account, established by the Administrator under § 97.925(b)(3) for certain owners and operators of a group of one or more Texas SO_2 Trading Program sources and units, in which are held Texas SO_2 Trading Program allowances available for use for a control period in a given year in complying with the Texas SO_2 Trading Program assurance provisions in accordance with §§ 97.906 and 97.925.

* * * * *

Common designated representative means, with regard to a control period in a given year, a designated representative where, as of April 1 immediately after the allowance transfer deadline for such control period, the same natural person is authorized under §§ 97.913(a) and 97.915(a) as the designated representative for a group of one or more Texas SO_2 Trading Program sources and units.

Common designated representative's assurance level means, with regard to a specific common designated representative and control period in a given year for which the State assurance level is exceeded as described in § 97.906(c)(2)(iii):

(1) The amount (rounded to the nearest allowance) equal to the sum of the total amount of Texas SO_2 Trading Program allowances allocated for such control period under § 97.911, or deemed to have been allocated under paragraph (2) of this definition, to the group of one or more Texas SO_2 Trading Program units having the common designated representative for such control period multiplied by the sum for such control period of the Texas SO_2 Trading Program budget under § 97.910(a)(1) and the variability limit under § 97.910(b) and divided by the sum of the total amount of Texas SO_2 Trading Program allowances allocated for such control period under § 97.911, or deemed to have been allocated under paragraph (2) of this definition, to all Texas SO_2 Trading Program units;

(2) Provided that, in the case of a Texas SO_2 Trading Program unit that operates during, but has no amount of Texas SO_2 Trading Program allowances allocated under § 97.911 for, such control period, the unit shall be treated, solely for purposes of this definition, as being allocated the amount of Texas SO_2 Trading Program allowances shown for the unit in § 97.911(a)(1).

Common designated representative's share means, with regard to a specific common designated representative for a control period in a given year and the total amount of SO_2 emissions from all Texas SO_2 Trading Program units during such control period, the total tonnage of SO_2 emissions during such control period from the group of one or more Texas SO_2 Trading Program units having the common designated representative for such control period.

* * * * *

General account means an Allowance Management System account, established under this subpart, that is not a compliance account or an assurance account.

* * * * *

Texas SO_2 Trading Program allowance deduction or *deduct Texas SO_2 Trading Program allowances* means the permanent withdrawal of Texas SO_2 Trading Program allowances by the Administrator from a compliance account (*e.g.,* in order to account for compliance with the Texas SO_2 Trading Program emissions limitation) or from an assurance account (*e.g.,* in order to account for compliance with the assurance provisions under §§ 97.906 and 97.925).

* * * * *

§ 97.904 [Amended]

■ 3. Section 97.904 is amended in paragraph (b)(2) by removing the text ''Program, provided'' and adding in its place the text ''Program for the control periods in years before 2021, provided''.

■ 4. Section 97.906 is amended by:

■ a. In paragraph (b)(2), adding after the text ''emissions limitation'' the text ''and assurance provisions'';

■ b. Redesignating paragraphs (c)(2) through (6) as paragraphs (c)(3) through (7) and adding a new paragraph (c)(2);

■ c. Redesignating the text of newly redesignated paragraph (c)(3) after the paragraph heading as paragraph (c)(3)(i) and adding a new paragraph (c)(3)(ii);

■ d. In newly redesignated paragraph (c)(4)(ii), removing the text "paragraph (c)(1)(ii)(A)" and adding in its place the text "paragraphs (c)(1)(ii)(A) and (c)(2)(i) through (iii)".

The additions read as follows:

§ 97.906 General provisions.

* * * * *

(c) * * *

(2) *Texas SO_2 Trading Program assurance provisions.* (i) If total SO_2 emissions during a control period in a given year from all Texas SO_2 Trading Program units at Texas SO_2 Trading Program sources exceed the State assurance level, then the owners and operators of such sources and units in each group of one or more sources and units having a common designated representative for such control period, where the common designated representative's share of such SO_2 emissions during such control period exceeds the common designated representative's assurance level for such control period, shall hold (in the assurance account established for the owners and operators of such group) Texas SO_2 Trading Program allowances available for deduction for such control period under § 97.925(a) in an amount equal to two times the product (rounded to the nearest whole number), as determined by the Administrator in accordance with § 97.925(b), of multiplying—

(A) The quotient of the amount by which the common designated representative's share of such SO_2 emissions exceeds the common designated representative's assurance level divided by the sum of the amounts, determined for all common designated representatives for such sources and units for such control period, by which each common designated representative's share of such SO_2 emissions exceeds the respective common designated representative's assurance level; and

(B) The amount by which total SO_2 emissions from all Texas SO_2 Trading Program units at Texas SO_2 Trading Program sources for such control period exceed the State assurance level.

(ii) The owners and operators shall hold the Texas SO_2 Trading Program allowances required under paragraph (c)(2)(i) of this section, as of midnight of November 1 (if it is a business day), or midnight of the first business day thereafter (if November 1 is not a business day), immediately after the year of such control period.

(iii) Total SO_2 emissions from all Texas SO_2 Trading Program units at Texas SO_2 Trading Program sources during a control period in a given year exceed the State assurance level if such total SO_2 emissions exceed the sum, for such control period, of the Texas SO_2 Trading Program budget under § 97.910(a)(1) and the variability limit under § 97.910(b).

(iv) It shall not be a violation of this subpart or of the Clean Air Act if total SO_2 emissions from all Texas SO_2 Trading Program units at Texas SO_2 Trading Program sources during a control period exceed the State assurance level or if a common designated representative's share of total SO_2 emissions from the Texas SO_2 Trading Program units at Texas SO_2 Trading Program sources during a control period exceeds the common designated representative's assurance level.

(v) To the extent the owners and operators fail to hold Texas SO_2 Trading Program allowances for a control period in a given year in accordance with paragraphs (c)(2)(i) through (iii) of this section,

(A) The owners and operators shall pay any fine, penalty, or assessment or comply with any other remedy imposed under the Clean Air Act; and

(B) Each Texas SO_2 Trading Program allowance that the owners and operators fail to hold for such control period in accordance with paragraphs (c)(2)(i) through (iii) of this section and each day of such control period shall constitute a separate violation of this subpart and the Clean Air Act.

(3) * * *

(ii) A Texas SO_2 Trading Program unit shall be subject to the requirements under paragraph (c)(2) of this section for the control period starting on January 1, 2021 and for each control period thereafter.

* * * * *

■ 5. Section 97.910 is amended by:

■ a. Revising the section heading; and

■ b. Adding paragraphs (b) and (c).

The revision and additions read as follows:

§ 97.910 Texas SO_2 Trading Program budget, Supplemental Allowance Pool budget, and variability limit.

* * * * *

(b) The variability limit for the Texas SO_2 Trading Program budget for the control periods in 2021 and thereafter is 16,688 tons.

(c) The Texas SO_2 Trading Program budget in paragraph (a)(1) of this section does not include any tons in the Supplemental Allowance Pool budget in paragraph (a)(2) of this section or the variability limit in paragraph (b) of this section.

■ 6. Section 97.911 is amended by:

■ a. Revising paragraph (a)(1);

■ b. In paragraph (a)(2), removing the text "allocated under the Texas Supplemental Allowance Pool under 40 CFR 97.912." and adding in its place the text "transferred to the Texas Supplemental Allowance Pool for potential allocation in accordance with § 97.912.";

■ c. In paragraph (b)(1), removing the text "SO_2 allocation" and adding in its place the text "allocation", and adding after the text "each year" the text "before 2021"; and

■ d. In paragraph (c)(5), removing the text "under 40 CFR 97.912." and adding in its place the text "for potential allocation in accordance with § 97.912.".

The revision reads as follows:

§ 97.911 Texas SO_2 Trading Program allowance allocations.

(a)(1) Except as provided in paragraph (a)(2) of this section, Texas SO_2 Trading Program allowances from the Texas SO_2 Trading Program budget will be allocated, for the control periods in 2019 and each year thereafter, as provided in Table 1 to this paragraph (a)(1):

TABLE 1 TO PARAGRAPH (a)(1)—TEXAS SO_2 TRADING PROGRAM ALLOCATIONS

Texas SO_2 trading program units	ORIS code	Texas SO_2 trading program allocation (tons)	Affiliated ownership group
Big Brown Unit 1	3497	8,473	Vistra Energy.
Big Brown Unit 2	3497	8,559	Vistra Energy.
Coleto Creek Unit 1	6178	9,057	Vistra Energy.
Fayette/Sam Seymour Unit 1	6179	7,979	Lower Colorado River Authority/City of Austin.
Fayette/Sam Seymour Unit 2	6179	8,019	Lower Colorado River Authority/City of Austin.

TABLE 1 TO PARAGRAPH (a)(1)—TEXAS SO_2 TRADING PROGRAM ALLOCATIONS—Continued

Texas SO_2 trading program units	ORIS code	Texas SO_2 trading program allocation (tons)	Affiliated ownership group
Graham Unit 2	3490	226	Vistra Energy.
H W Pirkey Power Plant Unit 1	7902	8,882	American Electric Power.
Harrington Unit 061B	6193	5,361	Xcel Energy.
Harrington Unit 062B	6193	5,255	Xcel Energy.
Harrington Unit 063B	6193	5,055	Xcel Energy.

Wilkes Unit 2	3478	2	American Electric Power.
Wilkes Unit 3	3478	3	American Electric Power.

* * * * *

■ 7. Section 97.912 is amended by:

■ a. In paragraph (a) introductory text, removing the text ''each control period in 2019 and thereafter,'' and adding in its place the text ''the control periods in 2019 and 2020,'';

■ b. In paragraph (a)(1), removing the text ''each subsequent February 15,'' and adding in its place the text ''February 15, 2021,'';

■ c. In paragraph (a)(3)(ii)(A), removing the text ''paragraph (b)'' and adding in its place the text ''paragraph (d)'';

■ d. In paragraph (a)(3)(ii)(B), removing the text ''paragraph (b)'' wherever it appears and adding in its place the text ''paragraph (d)'';

■ e. In paragraph (a)(3)(iii), removing the text ''paragraph (b)'' and adding in its place the text ''paragraph (d)'';

■ f. Redesignating paragraphs (a)(4) and (b) as paragraphs (c) and (d) and adding a new paragraph (b); and

■ g. In newly redesignated paragraph (d), adding after the text ''paragraph (a)(3)(iii)'' the text ''or (b)(4)(ii)''.

The addition reads as follows:

§ 97.912 Texas SO_2 Trading Program Supplemental Allowance Pool.

* * * * *

(b) For each control period in 2021 and thereafter, the Administrator will allocate Texas SO_2 Trading Program allowances from the Texas SO_2 Trading Program Supplemental Allowance Pool as follows:

(1) For each control period, the Administrator will assign each Texas SO_2 Trading Program unit to an affiliated ownership group reflecting the unit's ownership as of December 31 of the control period. The affiliated ownership group assignments for each control period will be as shown in § 97.911(a)(1) except that the Administrator will revise the assignments, based on the information required to be submitted in accordance with § 97.915(c) and any other information available to the Administrator, as necessary to reflect any ownership transfer resulting in a 50% or greater ownership share of a unit being held by a new owner that the Administrator determines is not affiliated with the previous holder of a 50% or greater ownership share of the unit.

(2) No later than February 15, 2022 and each subsequent February 15, the Administrator will review all the quarterly SO_2 emissions reports provided under § 97.934(d) for each Texas SO_2 Trading Program unit for the previous control period. The Administrator will identify each affiliated ownership group of Texas SO_2 Trading Program units as of December 31 of such control period for which the total amount of emissions reported for the units in the group for that control period exceeds the total amount of allowances allocated to the units in the group for that control period under § 97.911.

(3) For each affiliated ownership group of Texas SO_2 Trading Program units identified under paragraph (b)(2) of this section, the Administrator will calculate the amount by which the total amount of reported emissions for that control period exceeds the total amount

of allowances allocated for that control period under § 97.911.

(4)(i) The Administrator will allocate and record allowances from the Supplemental Allowance Pool as follows:

(A) If the total for all such affiliated ownership groups of the amounts calculated under paragraph (b)(3) of this section is less than or equal to the total number of allowances in the Supplemental Allowance Pool available for allocation under paragraph (d) of this section, then the Administrator will allocate and record in the compliance accounts for the sources at which the units in each such group are located a total amount of allowances from the Supplemental Allowance Pool equal to the amount calculated for the group under paragraph (b)(3) of this section.

(B) If the total for all such affiliated ownership groups of the amounts calculated under paragraph (b)(3) of this section is greater than the total number of allowances in the Supplemental Allowance Pool available for allocation under paragraph (d) of this section, then the Administrator will calculate each such group's allocation of allowances from the Supplemental Allowance Pool by dividing the amount calculated under paragraph (b)(3) of this section for the group by the sum of the amounts calculated under paragraph (b)(3) of this section for all such groups, then multiplying by the number of allowances in the Supplemental Allowance Pool available for allocation under paragraph (d) of this section and rounding to the nearest allowance. The Administrator will then record the calculated allocations of allowances in the applicable compliance accounts.

(C) When an affiliated ownership group receives an allocation of allowances under paragraph (b)(4)(i)(A) or (B) of this section, each unit in the group whose emissions during the control period for which allowances are being allocated exceed the amount of allowances allocated to the unit under § 97.911 will receive a share of the group's allocation. The Administrator will compute each such unit's share by dividing the amount of the unit's emissions during the control period exceeding the unit's allocation under § 97.911 by the sum for all such units of the amounts of the units' emissions during the control period exceeding the units' allocations under § 97.911, then multiplying by the group's allocation under paragraph (b)(4)(i)(A) or (B) of this section and rounding to the nearest allowance.

(ii) Any unallocated allowances remaining in the Supplemental Allowance Pool after the allocations determined under paragraph (b)(4)(i) of this section will be maintained in the Supplemental Allowance Pool. These allowances will be available for allocation by the Administrator in subsequent control periods to the extent consistent with paragraph (d) of this section.

* * * * *

■ 8. Section 97.913 is amended by revising paragraph (c) to read as follows:

§ 97.913 Authorization of designated representative and alternate designated representative.

* * * * *

(c) Except in this section, § 97.902, and §§ 97.914 through 97.918, whenever the term ''designated representative'' (as distinguished from the term ''common designated representative'') is used in this subpart, the term shall be construed to include the designated representative or any alternate designated representative.

■ 9. Section 97.920 is amended by:

■ a. Revising the section heading;

■ b. Redesignating paragraphs (b) through (d) as paragraphs (c) through (e) and adding a new paragraph (b);

■ c. In newly redesignated paragraph (c)(2)(i) introductory text, removing the text ''paragraph (b)(1)'' and adding in its place the text ''paragraph (c)(1)'';

■ d. In newly redesignated paragraph (c)(2)(ii), removing the text ''paragraph (b)(5)'' and adding in its place the text ''paragraph (c)(5)'';

■ e. In newly redesignated paragraphs (c)(3)(i) and (ii), removing the text ''paragraph (b)(1)'' and adding in its place the text ''paragraph (c)(1)'';

■ f. In newly redesignated paragraph (c)(4)(i), removing the text ''paragraph (b)(1)'' wherever it appears and adding in its place the text ''paragraph (c)(1)'';

■ g. In newly redesignated paragraph (c)(4)(ii), removing the text ''paragraph (b)(4)(i)'' and adding in its place text ''paragraph (c)(4)(i)'';

■ h. In newly redesignated paragraph (c)(5)(iii) introductory text and paragraph (c)(5)(iii)(C), removing the text ''paragraph (b)(5)(i)'' and adding in its place the text ''paragraph (c)(5)(i)'';

■ i. In newly redesignated paragraph (c)(5)(iii)(D), removing the text ''97.920(b)(5)(iv)'' and adding in its place the text ''97.920(c)(5)(iv)'';

■ j. In newly redesignated paragraph (c)(5)(iii)(E), removing the text ''97.920(b)(5)(iv),'' and adding in its place the text ''97.920(c)(5)(iv),'', and removing the text ''97.920(b)(5)'' and adding in its place the text ''97.920(c)(5)'';

■ k. In newly redesignated paragraph (c)(5)(iv), removing the text ''paragraph (b)(5)(iii)'' and adding in its place the text ''paragraph (c)(5)(iii)'';

■ l. In newly redesignated paragraph (c)(5)(v), removing the text ''paragraph (b)(5)(iii)(D)'' and adding in its place the text ''paragraph (c)(5)(iii)(D)'', and removing the text ''paragraph (b)(5)(iv)'' and adding in its place the text ''paragraph (c)(5)(iv)'';

■ m. In newly redesignated paragraph (d), removing the text ''paragraphs (a) and (b)'' and adding in its place the text ''paragraphs (a), (b), and (c)''; and

■ n. In newly redesignated paragraph (e), removing the text ''paragraphs (b)(2)(ii) and (b)(5)'' and adding in its place the text ''paragraphs (c)(2)(ii) and (c)(5)''.

The revision and addition read as follows:

§ 97.920 Establishment of compliance accounts, assurance accounts, and general accounts.

* * * * *

(b) *Assurance accounts.* The Administrator will establish assurance accounts for certain owners and operators and States in accordance with § 97.925(b)(3).

* * * * *

■ 10. Section 97.921 is amended by:

■ a. In paragraph (a), removing the second sentence;

■ b. Revising paragraphs (b) and (c); and

■ c. In paragraph (d), removing the text ''July 1 of each year thereafter,'' and adding in its place the text ''July 1, 2020,''.

The revision reads as follows:

§ 97.921 Recordation of Texas SO_2 Trading Program allowance allocations.

* * * * *

(b) By July 1, 2019, the Administrator will record in each Texas SO_2 Trading Program source's compliance account the Texas SO_2 Trading Program allowances allocated to the Texas SO_2 Trading Program units at the source in accordance with § 97.911(a) for the control period in the fourth year after the year of the applicable recordation deadline under this paragraph, unless provided otherwise in the Administrator's approval of a SIP revision replacing the provisions of this subpart.

(c) By February 15, 2020, and February 15 of each year thereafter, the Administrator will record in each Texas SO_2 Trading Program source's compliance account the allowances allocated from the Texas SO_2 Trading Program Supplemental Allowance Pool in accordance with § 97.912 for the control period in the year of the applicable recordation deadline under this paragraph, unless provided otherwise in the Administrator's approval of a SIP revision replacing the provisions of this subpart.

* * * * *

■ 11. Section 97.925 is added to read as follows:

§ 97.925 Compliance with Texas SO_2 Trading Program assurance provisions.

(a) *Availability for deduction.* Texas SO_2 Trading Program allowances are available to be deducted for compliance with the Texas SO_2 Trading Program assurance provisions for a control period in a given year by the owners and operators of a group of one or more Texas SO_2 Trading Program sources and units only if the Texas SO_2 Trading Program allowances:

(1) Were allocated for a control period in a prior year or the control period in the given year or in the immediately following year; and

(2) Are held in the assurance account, established by the Administrator for such owners and operators of such group of Texas SO_2 Trading Program sources and units under paragraph (b)(3) of this section, as of the deadline established in paragraph (b)(4) of this section.

(b) *Deductions for compliance.* The Administrator will deduct Texas SO_2 Trading Program allowances available under paragraph (a) of this section for compliance with the Texas SO_2 Trading Program assurance provisions for a control period in a given year in accordance with the following procedures:

(1) By June 1, 2022 and June 1 of each year thereafter, the Administrator will:

(i) Calculate the total SO_2 emissions from all Texas SO_2 Trading Program units at Texas SO_2 Trading Program sources during the control period in the year before the year of this calculation deadline and the amount, if any, by which such total SO_2 emissions exceed the State assurance level as described in § 97.906(c)(2)(iii).

(ii) [Reserved]

(2) If the calculations under paragraph (b)(1)(i) of this section indicate that the total SO_2 emissions from all Texas SO_2 Trading Program units at Texas SO_2 Trading Program sources during such control period exceed the State assurance level as described in § 97.906(c)(2)(iii):

(i) [Reserved]

(ii) By August 1 immediately after the deadline for the calculations under paragraph (b)(1)(i) of this section, the Administrator will calculate, for such control period and each common designated representative for such control period for a group of one or more Texas SO_2 Trading Program sources and units, the common designated representative's share of the total SO_2 emissions from all Texas SO_2 Trading Program units at Texas SO_2 Trading Program sources, the common designated representative's assurance level, and the amount (if any) of Texas SO_2 Trading Program allowances that the owners and operators of such group of sources and units must hold in accordance with the calculation formula in § 97.906(c)(2)(i). By each such August 1, the Administrator will promulgate a notice of data availability of the results of the calculations under this paragraph and paragraph (b)(1)(i) of this section, including separate calculations of the SO_2 emissions from each Texas SO_2 Trading Program source.

(iii) The Administrator will provide an opportunity for submission of objections to the calculations referenced by the notice of data availability required in paragraph (b)(2)(ii) of this section.

(A) Objections shall be submitted by the deadline specified in such notice and shall be limited to addressing whether the calculations referenced in the notice required under paragraph (b)(2)(ii) of this section are in accordance with § 97.906(c)(2)(iii), §§ 97.906(b) and 97.930 through 97.935, the definitions of ''common designated representative'', ''common designated representative's assurance level'', and ''common designated representative's share'' in § 97.902, and the calculation formula in § 97.906(c)(2)(i).

(B) The Administrator will adjust the calculations to the extent necessary to ensure that they are in accordance with the provisions referenced in paragraph (b)(2)(iii)(A) of this section. By October 1 immediately after the promulgation of such notice, the Administrator will promulgate a notice of data availability of the calculations incorporating any adjustments that the Administrator determines to be necessary and the reasons for accepting or rejecting any objections submitted in accordance with paragraph (b)(2)(iii)(A) of this section.

(3) The Administrator will establish one assurance account for each set of owners and operators referenced, in the notice of data availability required under paragraph (b)(2)(iii)(B) of this section, as all of the owners and operators of a group of Texas SO_2 Trading Program sources and units having a common designated representative for such control period and as being required to hold Texas SO_2 Trading Program allowances.

(4)(i) As of midnight of November 1 immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii)(B) of this section, the owners and operators described in paragraph (b)(3) of this section shall hold in the assurance account established for them and for the appropriate Texas SO_2 Trading Program sources and Texas SO_2 Trading Program units under paragraph (b)(3) of this section a total amount of Texas SO_2 Trading Program allowances, available for deduction under paragraph (a) of this section, equal to the amount such owners and operators are required to hold with regard to such sources and units as calculated by the Administrator and referenced in such notice.

(ii) Notwithstanding the allowance-holding deadline specified in paragraph (b)(4)(i) of this section, if November 1 is not a business day, then such allowance-holding deadline shall be midnight of the first business day thereafter.

(5) After November 1 (or the date described in paragraph (b)(4)(ii) of this section) immediately after the promulgation of each notice of data availability required in paragraph (b)(2)(iii)(B) of this section and after the recordation, in accordance with § 97.923, of Texas SO_2 Trading Program allowance transfers submitted by midnight of such date, the Administrator will determine whether the owners and operators described in paragraph (b)(3) of this section hold, in the assurance account for the appropriate Texas SO_2 Trading Program sources and Texas SO_2 Trading Program units established under paragraph (b)(3) of this section, the amount of Texas SO_2 Trading Program allowances available under paragraph (a) of this section that the owners and operators are required to hold with regard to such sources and units as calculated by the Administrator and referenced in the notice required in paragraph (b)(2)(iii)(B) of this section.

(6) Notwithstanding any other provision of this subpart and any revision, made by or submitted to the Administrator after the promulgation of the notice of data availability required in paragraph (b)(2)(iii)(B) of this section for a control period in a given year, of any data used in making the calculations referenced in such notice, the amounts of Texas SO_2 Trading Program allowances that the owners and operators are required to hold in accordance with § 97.906(c)(2)(i) for such control period shall continue to be such amounts as calculated by the Administrator and referenced in such notice required in paragraph (b)(2)(iii)(B) of this section, except as follows:

(i) If any such data are revised by the Administrator as a result of a decision in or settlement of litigation concerning such data on appeal under part 78 of this chapter of such notice, or on appeal under section 307 of the Clean Air Act of a decision rendered under part 78 of this chapter on appeal of such notice, then the Administrator will use the data as so revised to recalculate the amounts of Texas SO_2 Trading Program allowances that owners and operators are required to hold in accordance with the calculation formula in § 97.906(c)(2)(i) for such control period with regard to the Texas SO_2 Trading Program sources and Texas SO_2 Trading Program units involved, provided that such litigation under part 78 of this chapter, or the proceeding under part 78 of this chapter that resulted in the decision appealed in such litigation under section 307 of the Clean Air Act, was initiated no later than 30 days after promulgation of such notice required in paragraph (b)(2)(iii)(B) of this section.

(ii) [Reserved]

(iii) If the revised data are used to recalculate, in accordance with paragraph (b)(6)(i) of this section, the amount of Texas SO_2 Trading Program allowances that the owners and operators are required to hold for such control period with regard to the Texas SO_2 Trading Program sources and Texas SO_2 Trading Program units involved—

(A) Where the amount of Texas SO_2 Trading Program allowances that the owners and operators are required to hold increases as a result of the use of all such revised data, the Administrator will establish a new, reasonable deadline on which the owners and operators shall hold the additional amount of Texas SO_2 Trading Program allowances in the assurance account established by the Administrator for the appropriate Texas SO_2 Trading Program sources and Texas SO_2 Trading Program units under paragraph (b)(3) of this section. The owners' and operators' failure to hold such additional amount, as required, before the new deadline shall not be a violation of the Clean Air Act. The owners' and operators' failure to hold such additional amount, as required, as of the new deadline shall be a violation of the Clean Air Act. Each Texas SO_2 Trading Program allowance that the owners and operators fail to hold as required as of the new deadline, and each day in such control period, shall be a separate violation of the Clean Air Act.

(B) For the owners and operators for which the amount of Texas SO_2 Trading Program allowances required to be held decreases as a result of the use of all such revised data, the Administrator will record, in all accounts from which Texas SO_2 Trading Program allowances were transferred by such owners and operators for such control period to the assurance account established by the Administrator for the appropriate Texas SO_2 Trading Program sources and Texas SO_2 Trading Program units under paragraph (b)(3) of this section, a total amount of the Texas SO_2 Trading Program allowances held in such assurance account equal to the amount of the decrease. If Texas SO_2 Trading Program allowances were transferred to such assurance account from more than one account, the amount of Texas SO_2 Trading Program allowances recorded in each such transferor account will be in proportion to the percentage of the total amount of Texas SO_2 Trading Program allowances transferred to such assurance account for such control period from such transferor account.

(C) Each Texas SO_2 Trading Program allowance held under paragraph (b)(6)(iii)(A) of this section as a result of recalculation of requirements under the Texas SO_2 Trading Program assurance provisions for such control period must be a Texas SO_2 Trading Program allowance allocated for a control period in a year before or the year immediately following, or in the same year as, the year of such control period.

§ 97.926 [Amended]

■ 12. Amend § 97.926 paragraph (b) by adding after the text "§ 97.924," the text "§ 97.925,".

§ 97.928 [Amended]

■ 13. Amend § 97.928 paragraph (b) by removing the text "a compliance account," and adding in its place the text "a compliance account or an assurance account,".

§ 97.931 [Amended]

■ 14. Amend § 97.931 paragraph (d)(3) introductory text by removing after the text "is replaced by" the text "with".

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[WT Docket No. 02–55; FCC 19–108]

Improving Public Safety Communications in the 800 MHz Band

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document the Commission takes steps to streamline our rules and procedures to accelerate the successful conclusion of the Commission's 800 MHz band reconfiguration program, or rebanding. The document seeks comment on the proposed rule deletions.

DATES: Comments are due on or before December 16, 2019 and reply comments are due on or before December 30, 2019.

ADDRESSES: You may submit comments, identified by WT Docket No. 02–55, by any of the following methods:

- *Federal Communications Commission's website: http://fjallfoss.fcc.gov/ecfs2/.* Follow the instructions for submitting comments.
- *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: *FCC504@fcc.gov* or phone: 202–418–0530 or TTY: 202–418–0432.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Roberto Mussenden, Policy and Licensing Division, Public Safety and Homeland Security Bureau, (202) 418–1428.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking in WT Docket No. 02–55, FCC 19–108, released on October 28, 2019. The complete text of this document is available for download at *http://fjallfoss.fcc.gov/edocs_public/.* The complete text of this document is also available for inspection and copying during normal business hours in the FCC Reference Information Center, Portals II, 445 12th Street SW, Room CY–A257, Washington, DC 20554. To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *FCC504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

Synopsis

1. In the Notice of Proposed Rulemaking (*NPRM*), the Commission, recognizing that it has determined that Sprint did not reap an economic windfall from the spectrum award that Sprint received in exchange for undertaking the financial obligation to support 800 MHz rebanding, proposes eliminating the rule that requires an annual auditing of Sprint's rebanding expenditures by the 800 MHz Transition Administrator. The *NPRM* seeks comment on proposed procedures for eliminating the requirement that each rebanding agreement be reviewed and

approved by the 800 MHz Transition Administrator.

2. Pursuant to §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments in WT Docket No. 02–55 on or before the dates indicated on the first page of this document. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS). *See Electronic Filing of Documents in Rulemaking Proceedings,* 63 FR 24121 (1998).

• *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *http://fjallfoss.fcc.gov/ecfs2/.*

• *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number.

Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

• All hand-delivered or messenger-delivered paper filings for the Commission's Secretary must be delivered to FCC Headquarters at 445 12th St. SW, Room TW–A325, Washington, DC 20554. The filing hours are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes and boxes must be disposed of *before* entering the building.

• Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.

• U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th Street SW, Washington, DC 20554.

Accessible Formats: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

3. Commenters who file information that they believe should be withheld from public inspection may request confidential treatment pursuant to § 0.459 of the Commission's rules. Commenters should file both their original comments for which they request confidentiality and redacted comments, along with their request for confidential treatment. Commenters should not file proprietary information electronically. See Examination of Current Policy Concerning the Treatment of Confidential Information Submitted to the Commission, Report and Order, 13 FCC Rcd 24816 (1998), Order on Reconsideration, 14 FCC Rcd 20128 (1999). Even if the Commission grants confidential treatment, information that does not fall within a specific exemption pursuant to the Freedom of Information Act (FOIA) must be publicly disclosed pursuant to an appropriate request. See 47 CFR 0.461; 5 U.S.C. 552. We note that the Commission may grant requests for confidential treatment either conditionally or unconditionally. As such, we note that the Commission has the discretion to release information on public interest grounds that does fall within the scope of a FOIA exemption.

4. This proceeding shall be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with Section 1.1206(b). In proceedings governed by Section 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (*e.g.,* .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

Procedural Matters

A. Initial Regulatory Flexibility Analysis

5. The Initial Regulatory Flexibility Analysis required by section 604 of the Regulatory Flexibility Act, 5 U.S.C. 604, is included in Appendix B of the *NPRM.*

6. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this Notice of Proposed Rulemaking (*NPRM*). Written public comments are requested on this IRFA. Comments must be filed by the same dates as listed on the first page of the *NPRM* and must have a separate and distinct heading designating them as responses to this IRFA. The Commission will send a copy of the *NPRM,* including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *NPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.

B. Need for, and Objectives of, the Proposed Rules

7. The Commission initiates this rulemaking proceeding to seek comment on certain proposals designed to improve the efficiency of the 800 MHz band reconfiguration process set out in the 800 MHz Report and Order, and to advance the conclusion the rebanding process. The Commission initiated the 800 MHz rebanding program to alleviate harmful interference to 800 MHz public safety radio systems caused by their proximity in the band to the 800 MHz commercial cellular system operated by Sprint Corporation (Sprint). To increase the spectral separation between Sprint and public safety, Sprint was required to relocate its system to spectrum at the upper end of the band and public safety licensees were relocated to the lower end of the band. Sprint was also required to pay the accumulated relocation costs of public safety licensees as well as its own relocation costs, and in exchange Sprint received a separate block of spectrum outside of the 800 MHz band from the Commission. At the outset of the rebanding program, the Commission

imposed an ''anti-windfall'' obligation on Sprint to ensure that Sprint did not reap an economic windfall from the spectrum award that Sprint received in exchange for undertaking the financial obligation to support 800 MHz rebanding.

8. In the Order the Commission eliminates certain obligations imposed on the 800 MHz Transition Administrator which are no longer necessary in light of the Public Safety and Homeland Security Bureau's order determining that Sprint no longer is responsible for making a windfall payment to the Treasury. The changes apply to 800 MHz licensees that either (a) have not completed the rebanding process; or (b) having completed the rebanding process have not fulfilled the contract-closing obligations imposed on them by the Commission's rules and their Frequency Reconfiguration Agreements (FRAs) with Sprint. The changes make relatively small adjustments to the policies that affect 800 MHz Private Land Mobile Radio (PLMR) licensees. Additionally, the changes will also apply to the 800 MHz Transition Administrator and Sprint, which as discussed below are not small entities for purposes of the RFA.

9. The Commission tentatively concludes that the changes proposed in the Sixth FNPRM are necessary to accelerate the conclusion of the rebanding proceeding initiated in 2002, thereby lessening the logistic and economic burdens that certain procedures impose on the Commission, the 800 MHz Transition Administrator and Sprint. The Commission's objectives are to improve the rebanding process now that certain procedures no longer are necessary and confer no benefit on the parties to 800 MHz rebanding.

C. Legal Basis

10. The proposed action is authorized under pursuant sections 4(i),4(j), 301, 303, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i),154(j), 301, 303, and 403.

D. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

11. The RFA directs the Commission to provide a description of and, where feasible, an estimate of the number of small entities that will be affected by the proposed rules. The RFA generally defines the term ''small entity'' as encompassing the terms ''small business,'' ''small organization,'' and ''small governmental entity.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).

12. Small Businesses, Small Organizations, and Small Governmental Jurisdictions. Our actions, over time, may affect small entities that are not easily categorized at present. We therefore describe here, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the SBA's Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States which translates to 28.8 million businesses.

13. Next, the type of small entity described as a ''small organization'' is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' Nationwide, as of Aug 2016, there were approximately 356,494 small organizations based on registration and tax data filed by nonprofits with the Internal Revenue Service (IRS).

14. Finally, the small entity described as a ''small governmental jurisdiction'' is defined generally as ''governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.'' U.S. Census Bureau data from the 2012 Census of Governments indicates that there were 90,056 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number there were 37,132 General purpose governments (county, municipal and town or township) with populations of less than 50,000 and 12,184 Special purpose governments (independent school districts and special districts) with populations of less than 50,000. The 2012 U.S. Census Bureau data for most types of governments in the local government category shows that the majority of these governments have populations of less than 50,000. Based on this data we estimate that at least 49,316 local government jurisdictions fall in the category of ''small governmental jurisdictions.''

15. Public Safety Radio Licensees. As a general matter, Public Safety Radio Pool licensees include police, fire, local government, forestry conservation, highway maintenance, and emergency medical services. Because of the vast array of public safety licensees, the Commission has not developed a small business size standard specifically applicable to public safety licensees. The closest applicable SBA category is Wireless Telecommunications Carriers (except Satellite) which encompasses business entities engaged in radiotelephone communications. The appropriate size standard for this category under SBA rules is that such a business is small if it has 1,500 or fewer employees. For this industry, U.S. Census Bureau data for 2012 show that there were 967 firms that operated for the entire year. Of this total, 955 firms had employment of 999 or fewer employees and 12 had employment of 1000 employees or more. Thus under this category and the associated size standard, the Commission estimates that the majority of firms can be considered small.

16. Private Land Mobile Radio Licensees. Private land mobile radio (PLMR) systems serve an essential role in a vast range of industrial, business, land transportation, and public safety activities. Companies of all sizes operating in all U.S. business categories use these radios. Because of the vast array of PLMR users, the Commission has not developed a small business size standard specifically applicable to PLMR users. The closest applicable SBA category is Wireless Telecommunications Carriers (except Satellite) which encompasses business entities engaged in radiotelephone communications. The appropriate size standard for this category under SBA rules is that such a business is small if it has 1,500 or fewer employees. For this industry, U.S. Census Bureau data for 2012 show that there were 967 firms that operated for the entire year. Of this total, 955 firms had employment of 999 or fewer employees and 12 had employment of 1000 employees or more. Thus under this category and the associated size standard, the Commission estimates that the majority of PLMR Licensees are small entities.

17. According to the Commission's records, a total of approximately 400,622 licenses comprise PLMR users. Of this number there are a total of approximately 3,174 PLMR licenses in the 4.9 GHz band; 29,187 PLMR licenses in the 800 MHz band; and 3,374 licenses in the frequencies range 173.225 MHz to 173.375 MHz. The Commission does not require PLMR licensees to disclose information about number of employees and does not have information that

could be used to determine how many PLMR licensees constitute small entities under this definition. The Commission however believes that a substantial number of PLMR licensees may be small entities despite the lack of specific information.

18. Specialized Mobile Radio Licenses. The Commission awards ''small entity'' bidding credits in auctions for Specialized Mobile Radio (SMR) geographic area licenses in the 800 MHz and 900 MHz bands to firms that had revenues of no more than $15 million in each of the three previous calendar years. The Commission awards ''very small entity'' bidding credits to firms that had revenues of no more than $3 million in each of the three previous calendar years. The SBA has approved these small business size standards for the 900 MHz Service. The Commission has held auctions for geographic area licenses in the 800 MHz and 900 MHz bands. The 900 MHz SMR auction began on December 5, 1995 and closed on April 15, 1996. Sixty bidders claiming that they qualified as small businesses under the $15 million size standard won 263 geographic area licenses in the 900 MHz SMR band. The 800 MHz SMR auction for the upper 200 channels began on October 28, 1997 and was completed on December 8, 1997. Ten bidders claiming that they qualified as small businesses under the $15 million size standard won 38 geographic area licenses for the upper 200 channels in the 800 MHz SMR band. A second auction for the 800 MHz band conducted in 2002 and included 23 BEA licenses. One bidder claiming small business status won five licenses.

19. The auction of the 1,053 800 MHz SMR geographic area licenses for the General Category channels was conducted in 2000. Eleven bidders won 108 geographic area licenses for the General Category channels in the 800 MHz SMR band and qualified as small businesses under the $15 million size standard. In an auction completed in 2000, a total of 2,800 Economic Area licenses in the lower 80 channels of the 800 MHz SMR service were awarded. Of the 22 winning bidders, 19 claimed small business status and won 129 licenses. Thus, combining all four auctions, 41 winning bidders for geographic licenses in the 800 MHz SMR band claimed status as small businesses.

20. In addition, there are numerous incumbent site-by-site SMR licenses and licensees with extended implementation authorizations in the 800 and 900 MHz bands. We do not know how many firms provide 800 MHz or 900 MHz geographic area SMR service pursuant to extended implementation authorizations, nor how many of these providers have annual revenues of no more than $15 million. One firm has over $15 million in revenues. In addition, we do not know how many of these firms have 1,500 or fewer employees, which is the SBA-determined size standard. We assume, for purposes of this analysis, that all of the remaining extended implementation authorizations are held by small entities, as defined by the SBA.

21. Wireless Telecommunications Carriers (except Satellite). This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The appropriate size standard under SBA rules is that such a business is small if it has 1,500 or fewer employees. For this industry, U.S. Census Bureau data for 2012 show that there were 967 firms that operated for the entire year. Of this total, 955 firms had employment of 999 or fewer employees and 12 had employment of 1000 employees or more. Thus under this category and the associated size standard, the Commission estimates that the majority of wireless telecommunications carriers (except satellite) are small entities.

22. The Commission's own data—available in its Universal Licensing System—indicate that, as of August 31, 2018 there are 265 Cellular licensees. The Commission does not know how many of these licensees are small, as the Commission does not collect that information for these types of entities. Similarly, according to internally developed Commission data, 413 carriers reported that they were engaged in the provision of wireless telephony, including cellular service, Personal Communications Service (PCS), and Specialized Mobile Radio (SMR) Telephony services. Of this total, an estimated 261 have 1,500 or fewer employees, and 152 have more than 1,500 employees. Thus, using available data, we estimate that the majority of wireless firms can be considered small.

E. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

23. The requirements that the Commission proposes to eliminate in the Sixth FNPRM will not impose new or additional reporting, recordkeeping, or other compliance obligations on a substantial number of small entities. Nor will small entities be required to hire attorneys, engineers, consultants, or other professionals to comply with the proposed rule change, if adopted. Small entities that are 800 MHz licensees participating in the rebanding program who have negotiated FRAs with Sprint will no longer be required to have any costs/payments covered in the FRA or in any FRA amendments pre-approved by the TA which should yield them the benefit of faster completion of their rebanding process requirement.

F. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

24. The RFA requires an agency to describe any significant, specifically small business, alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rule for small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof for small entities.

25. The *NPRM* is deregulatory in nature and will not have a significant economic impact on a substantial number of small entities. As mentioned above small entities should benefit the proposed rule elimination with faster completion of their rebanding process. Faster completion should result in cost savings for such entities. The alternative of continuing to require a pre-approval requirement which is no longer needed would impose unnecessary burdens on and would not further or facilitate prompt completion of the rebanding process. We note in the Sixth FNPRM that we will to continue to require 800 MHz licensees to get pre-approval from the TA for any non-payment related FRA amendments and to have the Bureau address any payment related issues that arise from FRA amendments. However, to assist in the Commission's evaluation of the economic impact on small entities, and to better explore options and alternatives, the Commission has sought comment from the parties on these matters. The Commission expects to more fully consider the economic impact and alternatives for small entities following the review of comments and recommendations filed in response to

the Sixth FNPRM. proposed rules will not affect any small entities.

G. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

26. None.

Procedural Matters

A. Paperwork Reduction Act of 1995 Analysis

27. The Notice of Proposed Rulemaking document does not contains new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13.

Ordering Clauses

28. Accordingly, *it is ordered* that, pursuant to sections 4(i), 4(j), 301, 303, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 301, 303, and 403,the Notice of Proposed Rulemaking *is hereby adopted.*

29. *It is further ordered* that pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments on the *NPRM* on or before December 16, 2019 and reply comments on or before December 30, 2019.

Secretary.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 90 as follows:

PART 90—PRIVATE LAND MOBILE RADIO SERVICES

■ 1. The authority citation for part 90 continues to read as follows:

Authority: 47 U.S.C. 154(i), 161, 303(g), 303(r), 332(c)(7), 1401–1473.

§ 90.676 [Amended]

■ 2. Amend § 90.676 by removing and reserving paragraph (b)(4).

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2019–0076]

Environmental Impact Statement for Predator Damage Management in Oregon

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service plans to prepare an environmental impact statement analyzing alternatives for predator damage management in Oregon.

FOR FURTHER INFORMATION CONTACT: Mr. Kevin Christensen, Assistant State Director, Wildlife Services, APHIS, USDA, 3414 Del Webb Ave, Salem, OR 97301; (503) 329–9819.

SUPPLEMENTARY INFORMATION: The Animal and Plant Health Inspection Service (APHIS) intends to prepare an environmental impact statement (EIS) to address alternatives for APHIS Wildlife Services' involvement in managing damage and threats to livestock and other domestic animals, agricultural resources, property, natural resources, and human health and safety associated with predators in Oregon. The scope of the EIS is intended to include management of damage and conflicts associated with coyotes, gray wolves, black bears, mountain lions, bobcats, red foxes, striped skunks, raccoons, badgers, Virginia opossum, feral and free-ranging dogs, feral and free-ranging cats, spotted skunks, gray fox, and weasels.

We anticipate initiating public scoping for the EIS in the spring of 2020. Once completed, the EIS will replace APHIS Wildlife Services' existing environmental assessments on predator and wolf damage management in Oregon.

To receive notices regarding this project or other Wildlife Services NEPA projects, please register at *https://public.govdelivery.com/accounts/USDAAPHIS/subscriber/new.*

Done in Washington, DC, this 7th day of November 2019.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Florida Advisory Committee

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Florida Advisory Committee (Committee) will hold a meeting on Tuesday November 26, 2019, at 3:00 p.m. (Eastern) for the purpose of discussing next steps in hearing testimony regarding voting rights in Florida.

DATES: The meeting will be held on Tuesday November 26, 2019, from 3:00–4:30 p.m. Eastern.

Public Call Information: Dial: 800–353–6461, Conference ID: 8501912.

FOR FURTHER INFORMATION CONTACT: Melissa Wojnaroski, DFO, at *mwojnaroski@usccr.gov* or 312–353–8311.

SUPPLEMENTARY INFORMATION: Members of the public can listen to the discussion. This meeting is available to the public through the above listed toll-free call-in number. An open comment period will be provided to allow members of the public to make a statement as time allows. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the conference call number and conference ID number.

Written comments may be mailed to the Regional Program Unit Office, U.S. Commission on Civil Rights, 230 S Dearborn St., Suite 2120, Chicago, IL 60604. They may also be faxed to the Commission at (312) 353–8324 or may be emailed to Carolyn Allen at *callen@usccr.gov.* Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Florida Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Program Unit at the above email or street address.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Washington Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Washington Advisory Committee (Committee) will hold a series of meetings via teleconference on Monday December 2, 2019 from 12:30–1:30 p.m. Pacific Time, and Thursday December 19 from 1:30–2:30 p.m. Pacific Time, for the purpose of discussing the Committee's proposed forthcoming topic of study: Voting Rights in Washington.

DATES: The meetings will be held on

- Monday December 2, 2019, at 12:30 p.m. Pacific Time.
- Thursday December 19, 2019, at 1:30 p.m. Pacific Time.

Public Call Information: Dial: 800–353–6461, Conference ID: 2306868.

FOR FURTHER INFORMATION CONTACT: Melissa Wojnaroski, DFO, at *mwojnaroski@usccr.gov* or 312–353–8311.

SUPPLEMENTARY INFORMATION: Members of the public may listen to the discussion. This meeting is available to the public through the above listed toll free number. An open comment period will be provided to allow members of the public to make a statement as time allows. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be mailed to the Regional Programs Unit Office, U.S. Commission on Civil Rights, 230 S Dearborn, Suite 2120, Chicago, IL 60604. They may also be faxed to the Commission at (312) 353–8324, or emailed to Angelica Trevino at *atrevino@usccr.gov.* Persons who desire additional information may contact the Regional Programs Unit Office at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Unit Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Washington Advisory Committee link. Persons interested in the work of this Committee are also directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Unit office at the above email or street address.

BILLING CODE P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

In the Matter of: Mojtaba Biria, Bassumer Strasse 65, 28816 Stuhr, Germany; Order Denying Export Privileges

On August 14, 2019, in the U.S. District Court for the Northern District of New York, Mojtaba Biria (''Biria'') was convicted of violating the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.* (2012)) (''IEEPA''). Specifically, Biria was convicted of violating IEEPA by willfully conspiring to export and causing to be exported from the United States to Germany gas turbine parts, with knowledge that such goods were intended specifically for re-exportation directly and indirectly to Iran, without having first obtained the required U.S. Government authorization. Biria was sentenced to time served, a fine of $5,000, and an assessment of $100.

The Export Administration Regulations (''EAR'' or ''Regulations'') are administered and enforced by the U.S. Department of Commerce's Bureau of Industry and Security (''BIS'').[1] Section 766.25 of the Regulations provides, in pertinent part, that the ''Director of [BIS's] Office of Exporter Services, in consultation with the Director of [BIS's] Office of Export Enforcement, may deny the export privileges of any person who has been convicted of a violation of . . . the International Emergency Economic Powers Act (50 U.S.C 1701–1706).'' 15 CFR 766.25(a). The denial of export privileges under this provision may be for a period of up to 10 years from the date of the conviction. 15 CFR 766.25(d).[2] In addition, pursuant to Section 750.8 of the Regulations, BIS's Office of Exporter Services may revoke any BIS-issued licenses in which the person had an interest at the time of his/her conviction.[3]

BIS received notice of Biria's conviction for violating IEEPA and, pursuant to Section 766.25 of the Regulations, provided notice and an opportunity for Biria to make a written submission to BIS. To date, BIS has not received a written submission from Biria.

Based upon my review and consultations with BIS's Office of Export Enforcement, including its Director, and the facts available to BIS, I have decided to deny Biria's export privileges under the Regulations for a period of 10 years from the date of Biria's conviction. I have also decided to revoke any BIS-issued licenses in which Biria had an interest at the time of his conviction.

Accordingly, *it is hereby ordered:*

First, from the date of this Order until August 14, 2029, Mojtaba Biria, with a last known address at Bassumer Strasse 65, 28816 Stuhr, Germany, and when acting for or on his behalf, his successors, assigns, employees, agents or representatives (''the Denied Person''), may not directly or indirectly participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, license exception, or export control document;

[1] The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2019). The Regulations originally issued under the Export Administration Act of 1979, as amended, 50 U.S.C. 4601–4623 (Supp. III 2015) (''EAA''), which lapsed on August 21, 2001. The President, through Executive Order 13,222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which was extended by successive Presidential Notices, continued the Regulations in full force and effect under the International Emergency Economic Powers Act, 50 U.S.C. 1701, *et seq.* (2012) (''IEEPA''). On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which includes the Export Control Reform Act of 2018, 50 U.S.C. 4801–4852 (''ECRA''). While Section 1766 of ECRA repeals the provisions of the EAA (except for three sections which are inapplicable here), Section 1768 of ECRA provides, in pertinent part, that all rules and regulations that were made or issued under the EAA, including as continued in effect pursuant to IEEPA, and were in effect as of ECRA's date of enactment (August 13, 2018), shall continue in effect according to their terms until modified, superseded, set aside, or revoked through action undertaken pursuant to the authority provided under ECRA.

[2] *See also* Section 11(h) of the EAA, 50 U.S.C. 4610(h) (Supp. III 2015); Sections 1760(e) and 1768 of ECRA, 50 U.S.C. 4819 and 4826; and note 1, *supra.*

[3] *See* notes 1 and 2, *supra.*

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or engaging in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or from any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any other person, firm, corporation, or business organization related to Biria by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business may also be made subject to the provisions of this Order in order to prevent evasion of this Order.

Fourth, in accordance with Part 756 of the Regulations, Biria may file an appeal of this Order with the Under Secretary of Commerce for Industry and Security. The appeal must be filed within 45 days from the date of this Order and must comply with the provisions of Part 756 of the Regulations.

Fifth, a copy of this Order shall be delivered to Biria and shall be published in the **Federal Register**.

Sixth, this Order is effective immediately and shall remain in effect until August 14, 2029.

Issued this 7th day of November 2019.

Karen H. Nies-Vogel,

Director, Office of Exporter Services.

Bureau of Industry and Security

Action Affecting Export Privilege: Rasheed Al Jijakli; Correction

Summary: In the **Federal Register** of Monday, October 7, 2019, the Bureau of Industry and Security published an Order denying the export privileges of Rasheed Al Jijakli. The Order inadvertently referenced the U.S. District Court as the ''U.S. District Court for the Middle District of Georgia'' instead of the ''United States District Court for the Central District of California''. This notice is being published to correct the name of the U.S. District Court.

Correction:

In the **Federal Register** of Monday, October 7, 2019, in FR Doc. 2019–21745, on page 53405, in the first full paragraph of the third column, the correct name of the U.S. District Court should read as follows ''. . . in the U.S. District Court for the Central District of California . . .''

Issued this 7th day of November 2019.

Karen H. Nies-Vogel,

Director, Office of Exporter Services.

BILLING CODE 3510–DT–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

[Case No. 18–BIS–0002]

In the Matter of: Ali Caby, a/k/a ''Alex'' Caby, Blvd. James Boucher 91, Apt. 13, Floor 4, Lozenets, Sofia, Bulgaria 1407, et al., Respondents; Order Relating to Ali Caby, a/k/a ''Alex'' Caby

The Bureau of Industry and Security, U.S. Department of Commerce (''BIS''), has notified Ali Caby, a/k/a ''Alex'' Caby, of Sofia, Bulgaria, that it has initiated an administrative proceeding against him pursuant to Section 766.3 of the Export Administration Regulations (the ''Regulations''),[1] through the issuance of a Charging Letter alleging that Ali Caby, Arash Caby, Marjan Caby, AW-Tronics LLC, (''AW-Tronics'') and Arrowtronic, LLC (''Arrowtronic'') (collectively, ''Respondents'') violated the Regulations as follows:

Charge 1 15 CFR 764.2(d)—Conspiracy

Beginning as early as in or about September 2013, and continuing through in or about March 2014, Respondents conspired and acted in concert with others, known and unknown, to bring about one or more acts that constitute a violation of the Regulations. The purpose and object of the conspiracy was to unlawfully export goods from the United States through transshipment points to Syria, including to Syrian Arab Airlines (''Syrian Air''), the flag carrier airline of Syria and a Specially Designated Global Terrorist (''SDGT''), and in doing so evade the prohibitions and licensing requirements of the Regulations and avoid detection by U.S. law enforcement.

[1] The Regulations originally issued under the Export Administration Act of 1979, as amended, 50 U.S.C. 4601–4623 (Supp. III 2015) (''the EAA''), which lapsed on August 21, 2001. The President, through Executive Order 13,222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which was extended by successive Presidential Notices, continued the Regulations in full force and effect under the International Emergency Economic Powers Act, 50 U.S.C. 1701, *et seq.* (2012) (''IEEPA''). On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which includes the Export Control Reform Act of 2018, 50 U.S.C. 4801–4852 (''ECRA''). While Section 1766 of ECRA repeals the provisions of the EAA (except for three sections which are inapplicable here), Section 1768 of ECRA provides, in pertinent part, that all rules and regulations that were made or issued under the EAA, including as continued in effect pursuant to IEEPA, and were in effect as of ECRA's date of enactment (August 13, 2018), shall continue in effect according to their terms until modified, superseded, set aside, or revoked through action undertaken pursuant to the authority provided under ECRA. The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2018). The charged violation occurred in 2013–2014. The Regulations governing the violation at issue are found in the 2013–2014 versions of the Code of Federal Regulations (15 CFR parts 730–774 (2013–2014)). The 2019 Regulations set forth the procedures that apply to this matter.

Pursuant to Section 746.9 of the Regulations, a license is required for the export or reexport to Syria of all items subject to the Regulations, except food and medicine classified as EAR99. Furthermore, pursuant to Section 744.12 of the Regulations, a license is required to export or reexport items subject to the Regulations to SDGTs. Syrian Air was designated as an SDGT on May 16, 2013 (see 78 FR 32304, May 29, 2013), under authority granted to the Department of the Treasury by Executive Order 13,224, and was at all times pertinent hereto (and remains) listed as an SDGT.

At all pertinent times, AW-Tronics and Arrowtronic were active limited liability companies incorporated in the State of Florida. Documentary evidence and email correspondence shows that AW-Tronics personnel represented to various transaction parties that AW-Tronics and Arrowtronic (collectively, ''AW-Tronics/Arrowtronic'') were the same company. Arash Caby was listed on Florida corporate records as a Managing Member of AW-Tronics at the time of the violations. From January 2014 until its most recent annual report in January 2017, Ali Caby was listed on Florida corporate records as the registered agent of AW-Tronics. AW-Tronics/Arrowtronic has maintained offices in Miami, Florida and Sofia, Bulgaria, as well as other locations.

As part of the conspiracy, the co-conspirators used electronic mail (email) and other forms of communication to communicate with each other between the United States, Bulgaria, United Arab Emirates (UAE), and Syria. Under their scheme, co-conspirators would purchase from U.S. suppliers or vendors items subject to the Regulations for export to Syrian Air in Syria, including aircraft parts and equipment, and would provide materially false or misleading documents and information to conceal the illegal exports. In furtherance of the conspiracy, they also would arrange for payment for the illegal exports to be made using third-party companies to transfer payments between the co-conspirators. Overall, between in or about September 2013 and in or about March 2014, Respondents engaged in multiple transactions with Syrian Air involving the export of aircraft parts and equipment subject to the Regulations from the Miami office of AW-Tronics/Arrowtronic to Syrian Air's transshipment point in Dubai, United Arab Emirates. These items were actually intended for, and some or all were ultimately delivered to, Syrian Air in Syria.

During the conspiracy, Ali Caby managed the Bulgaria office of AW-Tronics/Arrowtronic, while Arash Caby managed its Miami office, and Marjan Caby was its internal auditor. In furtherance of the conspiracy, each of these respondents exchanged numerous emails with other AW-Tronics/Arrowtronic employees authorizing or otherwise discussing the above-described exports to Syrian Air. These email communications included, for example, instructions that were designed to prevent U.S. law enforcement from detecting the unlawful exports to Syria and to allow them to continue by changing the routing of exports from AW-Tronics/Arrowtronic's Miami, Florida office. In March 2014, United States Customs and Border Protection seized a shipment of micro switches that, according to Electronic Export Information (EEI) filed in the Automated Export System, was destined for Syrian Air in the UAE, when, in fact, the ultimate destination was Syria. On March 5, 2014, Marjan Caby sent an email to AW-Tronics/Arrowtronic logistics employees, copying Alex Caby, that explained, ''We will . . . have packages stopped by the US Customs and Border Control [and] have a case file like this for the same client[,]'' and provided instructions stating, ''NOTHING WILL BE SHIPPED TO CLIENTS IN THE MIDDLE EAST FROM THE USA OFFICE. WE HAVE TO SEND TO BG [Bulgaria] THEN TO CLIENT.'' (Emphasis in original). ''SYRIA'' was specifically listed as one country for which Respondents would use Bulgaria as a transshipment point. (Same).

In so doing, Ali Caby, a/k/a Alex Caby, Arash Caby, a/k/a ''Axel'' Caby, Marjan Caby, AW-Tronics, LLC, and Arrowtronic, LLC violated Section 764.2(d) of the Regulations, for which they are jointly and severally liable.

Whereas, BIS and Ali Caby have entered into a Settlement Agreement pursuant to Section 766.18(b) of the Regulations, whereby they agreed to settle this matter in accordance with the terms and conditions set forth therein;

Whereas, I have taken into consideration the plea agreement entered into by Ali Caby with the U.S. Attorney's Office for the Southern District of Florida, and the sentence imposed against him following or upon the entry of his guilty plea and conviction (''the plea agreement and sentence''); and

Whereas, I have approved of the terms of the Settlement Agreement;

It is therefore ordered:

First, for the period of six (6) years from the date of this Order Ali Caby, a/k/a ''Alex'' Caby, with a last known address of Blvd. James Boucher 91, Apt. 13, Floor 4, Lozenets, Sofia, Bulgaria 1407, and when acting for or on his behalf, his successors, assigns, representatives, agents, or employees (hereinafter collectively referred to as the ''Denied Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported to or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, license exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or engaging in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or from any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States, or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, any licenses issued under the Regulations in which Ali Caby has an interest as of the date of this Order shall be revoked by BIS.

Fourth, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any person, firm, corporation, or business organization related to the Denied Person by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be made subject to the provisions of this Order.

Fifth, the six-year denial period set forth above shall be active for a period of four years from the date of this Order. As authorized by Section 766.18(c) of the Regulations, the remaining two years of the denial period shall be suspended during a probationary period of two years under this Order, and shall thereafter be waived, provided that Ali Caby has committed no other violation of the Export Control Reform Act of 2018 (''ECRA''),[2] or the Regulations or any order, license or authorization issued under ECRA or the Regulations. If Ali Caby commits another violation of ECRA or the Regulations or any order, license or authorization issued under ECRA or the Regulations during the six-year denial period under this Order, the two-year suspended portion of this Order may be modified or revoked by BIS. If the suspension is modified or revoked, BIS may extend the active denial period until up to six years from the date of this Order when the activation occurs during the first four years from the date of this Order. BIS may extend the active denial period until up to two years from the date of the activation when the activation occurs more than four years from the date of this Order.

Sixth, Ali Caby shall not take any action or make or permit to be made any public statement, directly or indirectly, denying the allegations in the Charging Letter or this Order.

Seventh, the Charging Letter, the Settlement Agreement, and this Order shall be made available to the public.

Eighth, this Order shall be served on Ali Caby and shall be published in the **Federal Register**.

This Order, which constitutes the final agency action in this matter related to Ali Caby, is effective immediately.

Douglas R. Hassebrock,

Director, Office of Export Enforcement, performing the non-exclusive functions and duties of the Assistant Secretary of Commerce for Export Enforcement.

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

In the Matter of: Arash Caby, a/k/a ''Axel'' Caby, 7405 SW 79CT, Miami, FL 33143, et al., Respondents, Case No. 18–BIS–0002; Order Relating to Arash Caby, a/k/a ''Axel'' Caby

The Bureau of Industry and Security, U.S. Department of Commerce (''BIS''), has notified Arash Caby, a/k/a ''Axel'' Caby, of Miami, Florida, that it has initiated an administrative proceeding against him pursuant to Section 766.3 of the Export Administration Regulations (the ''Regulations''),[1] through the issuance of a Charging Letter alleging that Arash Caby, Ali Caby, Marjan Caby, AW-Tronics LLC, (''AW-Tronics'') and Arrowtronic, LLC (''Arrowtronic'') (collectively, ''Respondents'') violated the Regulations as follows:

Charge 1 15 CFR 764.2(d)—Conspiracy

Beginning as early as in or about September 2013, and continuing through in or about March 2014, Respondents conspired and acted in concert with others, known and unknown, to bring about one or more acts that constitute a violation of the Regulations. The purpose and object of the conspiracy was to unlawfully export goods from the United States through transshipment points to Syria, including to Syrian Arab Airlines (''Syrian Air''), the flag carrier airline of Syria and a Specially Designated Global Terrorist (''SDGT''), and in doing so evade the prohibitions and licensing requirements of the Regulations and avoid detection by U.S. law enforcement.

Pursuant to Section 746.9 of the Regulations, a license is required for the export or reexport to Syria of all items subject to the Regulations, except food and medicine classified as EAR99. Furthermore, pursuant to Section 744.12 of the Regulations, a license is required to export or reexport items subject to the Regulations to SDGTs. Syrian Air was designated as an SDGT on May 16, 2013 (see 78 FR 32304, May 29, 2013), under authority granted to the Department of the Treasury by Executive Order 13,224, and was at all times pertinent hereto (and remains) listed as an SDGT.

[1] The Regulations originally issued under the Export Administration Act of 1979, as amended, 50 U.S.C. 4601–4623 (Supp. III 2015) (''the EAA''), which lapsed on August 21, 2001. The President, through Executive Order 13,222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which was extended by successive Presidential Notices, continued the Regulations in full force and effect under the International Emergency Economic Powers Act, 50 U.S.C. 1701, *et seq.* (2012) (''IEEPA''). On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which includes the Export Control Reform Act of 2018, 50 U.S.C. 4801–4852 (''ECRA''). While Section 1766 of ECRA repeals the provisions of the EAA (except for three sections which are inapplicable here), Section 1768 of ECRA provides, in pertinent part, that all rules and regulations that were made or issued under the EAA, including as continued in effect pursuant to IEEPA, and were in effect as of ECRA's date of enactment (August 13, 2018), shall continue in effect according to their terms until modified, superseded, set aside, or revoked through action undertaken pursuant to the authority provided under ECRA. The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2018). The charged violation occurred in 2013–2014. The Regulations governing the violation at issue are found in the 2013–2014 versions of the Code of Federal Regulations (15 CFR parts 730–774 (2013–2014)). The 2019 Regulations set forth the procedures that apply to this matter.

At all pertinent times, AW-Tronics and Arrowtronic were active limited liability companies incorporated in the State of Florida. Documentary evidence and email correspondence shows that AW-Tronics personnel represented to various transaction parties that AW-Tronics and Arrowtronic (collectively, ''AW-Tronics/Arrowtronic'') were the same company. Arash Caby was listed on Florida corporate records as a Managing Member of AW-Tronics at the time of the violations. From January 2014 until its most recent annual report in January 2017, Ali Caby was listed on Florida corporate records as the registered agent of AW-Tronics. AW-Tronics/Arrowtronic has maintained offices in Miami, Florida and Sofia, Bulgaria, as well as other locations.

As part of the conspiracy, the co-conspirators used electronic mail (email) and other forms of communication to communicate with each other between the United States, Bulgaria, United Arab Emirates (UAE), and Syria. Under their scheme, co-conspirators would purchase from U.S. suppliers or vendors items subject to the Regulations for export to Syrian Air in Syria, including aircraft parts and equipment, and would provide materially false or misleading documents and information to conceal the illegal exports. In furtherance of the conspiracy, they also would arrange for payment for the illegal exports to be made using third-party companies to transfer payments between the co-conspirators. Overall, between in or about September 2013 and in or about March 2014, Respondents engaged in multiple transactions with Syrian Air involving the export of aircraft parts and equipment subject to the Regulations from the Miami office of AW-Tronics/Arrowtronic to Syrian Air's transshipment point in Dubai, United Arab Emirates. These items were actually intended for, and some or all were ultimately delivered to, Syrian Air in Syria.

During the conspiracy, Ali Caby managed the Bulgaria office of AW-Tronics/Arrowtronic, while Arash Caby managed its Miami office, and Marjan Caby was its internal auditor. In furtherance of the conspiracy, each of these respondents exchanged numerous emails with other AW-Tronics/Arrowtronic employees authorizing or otherwise discussing the above-described exports to Syrian Air. These email communications included, for example, instructions that were designed to prevent U.S. law enforcement from detecting the unlawful exports to Syria and to allow them to continue by changing the routing of exports from AW-Tronics/Arrowtronic's Miami, Florida office. In March 2014, United States Customs and Border Protection seized a shipment of micro switches that, according to Electronic Export Information (EEI) filed in the Automated Export System, was destined for Syrian Air in the UAE, when, in fact, the ultimate destination was Syria. On March 5, 2014, Marjan Caby sent an email to AW-Tronics/Arrowtronic logistics employees, copying Alex Caby, that explained, ''We will . . . have packages stopped by the US Customs and Border Control [and] have a case file like this for the same client[,]'' and provided instructions stating, ''NOTHING WILL BE SHIPPED TO CLIENTS IN THE

MIDDLE EAST FROM THE USA OFFICE. WE HAVE TO SEND TO BG [Bulgaria] THEN TO CLIENT.'' (Emphasis in original). ''SYRIA'' was specifically listed as one country for which Respondents would use Bulgaria as a transshipment point. (Same).

In so doing, Ali Caby, a/k/a Alex Caby, Arash Caby, a/k/a ''Axel'' Caby, Marjan Caby, AW-Tronics, LLC, and Arrowtronic, LLC violated Section 764.2(d) of the Regulations, for which they are jointly and severally liable.

Whereas, BIS and Arash Caby have entered into a Settlement Agreement pursuant to Section 766.18(b) of the Regulations, whereby they agreed to settle this matter in accordance with the terms and conditions set forth therein;

Whereas, I have taken into consideration the plea agreement entered into by Arash Caby with the U.S. Attorney's Office for the Southern District of Florida, and the sentence imposed against him following or upon the entry of his guilty plea and conviction (''the plea agreement and sentence''); and

Whereas, I have approved of the terms of the Settlement Agreement;

It is therefore ordered:

First, for the period of six (6) years from the date of this Order, Arash Caby, a/k/a ''Axel'' Caby, with a last known address of 7405 SW 79CT, Miami, FL 33143, and when acting for or on his behalf, his successors, assigns, representatives, agents, or employees (hereinafter collectively referred to as the ''Denied Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported to or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, license exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or engaging in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or from any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States, or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, any licenses issued under the Regulations in which Arash Caby has an interest as of the date of this Order shall be revoked by BIS.

Fourth, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any person, firm, corporation, or business organization related to the Denied Person by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be made subject to the provisions of this Order.

Fifth, the six-year denial period set forth above shall be active for a period of four years from the date of this Order. As authorized by Section 766.18(c) of the Regulations, the remaining two years of the denial period shall be suspended during a probationary period of two years under this Order, and shall thereafter be waived, provided that Arash Caby has committed no other violation of the Export Control Reform Act of 2018 (''ECRA''),[2] or the Regulations or any order, license or authorization issued under ECRA or the Regulations. If Arash Caby commits another violation of ECRA or the Regulations or any order, license or authorization issued under ECRA or the Regulations during the six-year denial period under this Order, the two-year suspended portion of this Order may be modified or revoked by BIS. If the suspension is modified or revoked, BIS may extend the active denial period until up to six years from the date of this Order when the activation occurs during the first four years from the date of this Order. BIS may extend the active denial period until up to two years from the date of the activation when the activation occurs more than four years from the date of this Order.

[2] See note 1, *supra.*

Sixth, Arash Caby shall not take any action or make or permit to be made any public statement, directly or indirectly, denying the allegations in the Charging Letter or this Order.

Seventh, the Charging Letter, the Settlement Agreement, and this Order shall be made available to the public.

Eighth, this Order shall be served on Arash Caby and shall be published in the **Federal Register**.

This Order, which constitutes the final agency action in this matter related to Arash Caby, is effective immediately.

Issued this 6th day of November 2019.

Douglas R. Hassebrock,

Director, Office of Export Enforcement, performing the non-exclusive functions and duties of the Assistant Secretary of Commerce for Export Enforcement.

Bureau of Industry and Security

[Case No. 18–BIS–0002]

In the Matter of: Arrowtronic, LLC, 7405 SW 79CT, Miami, FL 33143, et al., Respondents; Order Relating to Arrowtronic, LLC

The Bureau of Industry and Security, U.S. Department of Commerce (''BIS''), has notified Arrowtronic, LLC, of Miami, Florida, (''Arrowtronic'') that it has initiated an administrative proceeding against it pursuant to Section 766.3 of the Export Administration Regulations (the ''Regulations''),[1] through the issuance of

[1] The Regulations originally issued under the Export Administration Act of 1979, as amended, 50 U.S.C. 4601–4623 (Supp. III 2015) (''the EAA''), which lapsed on August 21, 2001. The President, through Executive Order 13,222 of August 17, 2001

Continued

a Charging Letter alleging that Arrowtronic, Ali Caby, Arash Caby, Marjan Caby, and AW-Tronics LLC (''AW-Tronics'') (collectively, ''Respondents'') violated the Regulations as follows:

Charge 1 15 CFR 764.2(d)—Conspiracy

Beginning as early as in or about September 2013, and continuing through in or about March 2014, Respondents conspired and acted in concert with others, known and unknown, to bring about one or more acts that constitute a violation of the Regulations. The purpose and object of the conspiracy was to unlawfully export goods from the United States through transshipment points to Syria, including to Syrian Arab Airlines (''Syrian Air''), the flag carrier airline of Syria and a Specially Designated Global Terrorist (''SDGT''), and in doing so evade the prohibitions and licensing requirements of the Regulations and avoid detection by U.S. law enforcement.

Pursuant to Section 746.9 of the Regulations, a license is required for the export or reexport to Syria of all items subject to the Regulations, except food and medicine classified as EAR99. Furthermore, pursuant to Section 744.12 of the Regulations, a license is required to export or reexport items subject to the Regulations to SDGTs. Syrian Air was designated as an SDGT on May 16, 2013 (see 78 FR 32304, May 29, 2013), under authority granted to the Department of the Treasury by Executive Order 13,224, and was at all times pertinent hereto (and remains) listed as an SDGT.

At all pertinent times, AW-Tronics and Arrowtronic were active limited liability companies incorporated in the State of Florida. Documentary evidence and email correspondence shows that AW-Tronics personnel represented to various transaction parties that AW-Tronics and Arrowtronic (collectively, ''AW-Tronics/Arrowtronic'') were the same company. Arash Caby was listed on Florida corporate records as a Managing Member of AW-Tronics at the time of the violations. From January 2014 until its most recent annual report in January 2017, Ali Caby was listed on Florida corporate records as the registered agent of AW-Tronics. AW-Tronics/Arrowtronic has maintained offices in Miami, Florida and Sofia, Bulgaria, as well as other locations.

As part of the conspiracy, the co-conspirators used electronic mail (email) and other forms of communication to communicate with each other between the United States, Bulgaria, United Arab Emirates (UAE), and Syria. Under their scheme, co-conspirators would purchase from U.S. suppliers or vendors items subject to the Regulations for export to Syrian Air in Syria, including aircraft parts and equipment, and would provide materially false or misleading documents and information to conceal the illegal exports. In furtherance of the conspiracy, they also would arrange for payment for the illegal exports to be made using third-party companies to transfer payments between the co-conspirators. Overall, between in or about September 2013 and in or about March 2014, Respondents engaged in multiple transactions with Syrian Air involving the export of aircraft parts and equipment subject to the Regulations from the Miami office of AW-Tronics/Arrowtronic to Syrian Air's transshipment point in Dubai, United Arab Emirates. These items were actually intended for, and some or all were ultimately delivered to, Syrian Air in Syria.

During the conspiracy, Ali Caby managed the Bulgaria office of AW-Tronics/Arrowtronic, while Arash Caby managed its Miami office, and Marjan Caby was its internal auditor. In furtherance of the conspiracy, each of these respondents exchanged numerous emails with other AW-Tronics/Arrowtronic employees authorizing or otherwise discussing the above-described exports to Syrian Air. These email communications included, for example, instructions that were designed to prevent U.S. law enforcement from detecting the unlawful exports to Syria and to allow them to continue by changing the routing of exports from AW-Tronics/Arrowtronic's Miami, Florida office. In March 2014, United States Customs and Border Protection seized a shipment of micro switches that, according to Electronic Export Information (EEI) filed in the Automated Export System, was destined for Syrian Air in the UAE, when, in fact, the ultimate destination was Syria. On March 5, 2014, Marjan Caby sent an email to AW-Tronics/Arrowtronic logistics employees, copying Alex Caby, that explained, ''We will . . . have packages stopped by the US Customs and Border Control [and] have a case file like this for the same client[,]'' and provided instructions stating, ''NOTHING WILL BE SHIPPED TO CLIENTS IN THE MIDDLE EAST FROM THE USA OFFICE. WE HAVE TO SEND TO BG [Bulgaria] THEN TO CLIENT.'' (Emphasis in original). ''SYRIA'' was specifically listed as one country for which Respondents would use Bulgaria as a transshipment point. (Same).

In so doing, Ali Caby, a/k/a Alex Caby, Arash Caby, a/k/a ''Axel'' Caby, Marjan Caby, AW-Tronics, LLC, and Arrowtronic, LLC violated Section 764.2(d) of the Regulations, for which they are jointly and severally liable.

Whereas, BIS and Arrowtronic have entered into a Settlement Agreement pursuant to Section 766.18(b) of the Regulations, whereby they agreed to settle this matter in accordance with the terms and conditions set forth therein; and

Whereas, I have approved of the terms of the Settlement Agreement; *it is therefore ordered*:

First, For the period of six (6) years from the date of this Order Arrowtronic, LLC, with a last known address of 7405 SW 79CT, Miami, FL 33143, and when acting for or on its behalf, its successors, assigns, director, officers, representatives, agents, or employees (hereinafter collectively referred to as the ''Denied Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported to or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, license exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or engaging in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or from any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that

(3 CFR, 2001 Comp. 783 (2002)), which was extended by successive Presidential Notices, continued the Regulations in full force and effect under the International Emergency Economic Powers Act, 50 U.S.C. 1701, *et seq.* (2012) (''IEEPA''). On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which includes the Export Control Reform Act of 2018, 50 U.S.C. 4801–4852 (''ECRA''). While Section 1766 of ECRA repeals the provisions of the EAA (except for three sections which are inapplicable here), Section 1768 of ECRA provides, in pertinent part, that all rules and regulations that were made or issued under the EAA, including as continued in effect pursuant to IEEPA, and were in effect as of ECRA's date of enactment (August 13, 2018), shall continue in effect according to their terms until modified, superseded, set aside, or revoked through action undertaken pursuant to the authority provided under ECRA. The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2018). The charged violation occurred in 2013–2014. The Regulations governing the violation at issue are found in the 2013–2014 versions of the Code of Federal Regulations (15 CFR parts 730–774 (2013–2014)). The 2019 Regulations set forth the procedures that apply to this matter.

has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States, or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, any licenses issued under the Regulations in which Arrowtronic has an interest as of the date of this Order shall be revoked by BIS.

Fourth, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any person, firm, corporation, or business organization related to the Denied Person by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be made subject to the provisions of this Order.

Fifth, Arrowtronic shall not take any action or make or permit to be made any public statement, directly or indirectly, denying the allegations in the Charging Letter or this Order.

Sixth, the Charging Letter, the Settlement Agreement, and this Order shall be made available to the public.

Seventh, this Order shall be served on Arrowtronic and shall be published in the **Federal Register**.

This *order,* which constitutes the final agency action in this matter related to Arrowtronic, is effective immediately.

Issued this 30th day of October, 2019.

Douglas R. Hassebrock,

Director, Office of Export Enforcement, performing the non-exclusive functions and duties of the Assistant Secretary of Commerce for Export Enforcement.

Wooden Cabinets and Vanities and Components Thereof From the People's Republic of China: Amended Preliminary Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is amending the preliminary determination of the less-than-fair-value investigation of wooden cabinets and vanities and components thereof (wooden cabinets and vanities) from the People's Republic of China (China) to correct significant ministerial errors.

DATES: Applicable November 14, 2019.

FOR FURTHER INFORMATION CONTACT: Kabir Archuletta, Rachel Greenberg, or Eliza Siordia, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2593, (202) 482–0652, or (202) 482–3878, respectively.

SUPPLEMENTARY INFORMATION:

Background

On October 9, 2019, Commerce published in the **Federal Register** the *Preliminary Determination,*[1] and completed the disclosure of all calculation materials to interested parties. On October 8, 2019, MJB Supply (Dalian) Co., Ltd, Shouguang Honsoar Imp. & Exp. Trading Co., Ltd, and Nantong Ouming Wood Co., Ltd. (collectively, D&H SRA Companies), and Zhong Shan King Yuandun Wood Products Co., Ltd. (Zhong Shan) timely filed ministerial error allegations regarding the *Preliminary Determination.*[2]

Period of Investigation

The period of investigation is July 1, 2018 through December 31, 2018.

Scope of Investigation

The product covered by this investigation is wooden cabinets and vanities from China. For a complete description of the scope of this investigation, *see* the appendix to this notice.

Legal Authority

Commerce will analyze any comments received and, if appropriate, correct any significant ministerial error by amending the preliminary determination according to 19 CFR 351.224(e). A ministerial error is defined in 19 CFR 351.224(f) as ''an error in addition, subtraction, or other arithmetic function, clerical error resulting from inaccurate copying, duplication, or the like, and any other similar type of unintentional error which the Secretary considers ministerial.''[3] A significant ministerial error is defined as a ministerial error, the correction of which, either singly or in combination with other errors, would result in: (1) A change of at least five absolute percentage points in, but not less than 25 percent of, the weighted-average dumping margin calculated in the original (erroneous) preliminary determination; or (2) a difference between a weighted-average dumping margin of zero or *de minimis* and a weighted-average dumping margin of greater than *de minimis* or vice versa.[4]

Analysis of Ministerial Error Allegation

On October 8, 2019, certain separate rate respondents submitted ministerial error allegations. The respondents claim that Commerce should have granted Zhong Shan a separate rate; that clerical errors were made with respect to the names of the producers for exporters MJB Supply (Dalian) Co., Ltd, and Shouguang Honsoar Imp. & Exp. Trading Co., Ltd; and an ''also known as'' company name for the exporter/producer combination Nantong Ouming Wood Co., Ltd should have been included. Commerce has reviewed the record and finds that Zhong Shan's allegation is not ministerial in nature as the *Preliminary Determination* demonstrates our intent and our reasoning as to why Zhong Shan was not eligible for a separate rate.[5] However, we do agree that we made certain clerical errors on the producer/

[2] *See* D&H SRA Companies' Letter, ''Wooden Cabinets and Vanities from the People's Republic of China: Ministerial Error Comments to Correct Spelling of Company Names,'' dated October 8, 2019; *see also* Zhong Shan's Letter, ''Wooden Cabinets and Vanities and Components Thereof from the People's Republic of China: Ministerial Error Comments—Prelim Determination,'' dated October 8, 2019.

[3] *See also* section 735(e) of the Tariff Act of 1930, as amended (the Act).

[4] *See* 19 CFR 351.224(g).

[5] *See Preliminary Determination* PDM at 17–19.

exporter list for separate rate recipients constituting significant ministerial errors within the meaning of 19 CFR 351.224(f) and (g).[6] These errors are significant because the rate applicable to these separate rate respondents, as a result of the errors, is the China-wide rate of 262.18 percent, rather than the separate rate of 39.25 percent. The difference in these two rates exceeds the significant ministerial error threshold established in 19 CFR 351.224(g)(1) because correction of these errors results in a change of at least five absolute percentage points.

Amended Preliminary Determination

Commerce preliminarily determines that the following amended weighted-average dumping margins exist for the period July 1, 2018 through December 31, 2018:

Exporter	Producer	Estimated weighted average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offsets) (percent)
MJB Supply (Dalian) Co., Ltd	Mulin City Bamiantong Linyeju Jisen Wood	39.25	28.71
Shouguang Honsoar Imp. & Exp. Trading Co., Ltd	Shandong Honsoar Cabinet Materials Co., Ltd	39.25	28.71
Nantong Ouming Wood Co., Ltd., also known as Nantong Ouming Wood Industry Co., Ltd.	Nantong Ouming Wood Co., Ltd., also known as Nantong Ouming Wood Industry Co., Ltd.	39.25	28.71

Amended Cash Deposits and Suspension of Liquidation

The collection of cash deposits and suspension of liquidation will be revised according to the rates calculated in this amended preliminary determination, in accordance with sections 733(d) and (f) of the Act, and 19 CFR 351.224. Because the rates are decreasing from the *Preliminary Determination,* the amended cash deposit rates will be effective retroactively to October 9, 2019, the date of publication of the *Preliminary Determination.* Parties will be notified of this determination, in accordance with sections 733(d) and (f) of the Act.

International Trade Commission Notification

In accordance with section 733(f) of the Act, we will notify the International Trade Commission of our amended preliminary determination.

Notification to Interested Parties

This amended preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.224(e).

Dated: November 6, 2019.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigation

The merchandise subject to this investigation consists of wooden cabinets and vanities that are for permanent installation (including floor mounted, wall mounted, ceiling hung or by attachment of plumbing), and wooden components thereof. Wooden cabinets and vanities and wooden components are made substantially of wood products, including solid wood and engineered wood products (including those made from wood particles, fibers, or other wooden materials such as plywood, strand board, block board, particle board, or fiberboard), or bamboo. Wooden cabinets and vanities consist of a cabinet box (which typically includes a top, bottom, sides, back, base blockers, ends/end panels, stretcher rails, toe kicks, and/or shelves) and may or may not include a frame, door, drawers and/or shelves. Subject merchandise includes wooden cabinets and vanities with or without wood veneers, wood, paper or other overlays, or laminates, with or without non-wood components or trim such as metal, marble, glass, plastic, or other resins, whether or not surface finished or unfinished, and whether or not completed.

Wooden cabinets and vanities are covered by the investigation whether or not they are imported attached to, or in conjunction with, faucets, metal plumbing, sinks and/or sink bowls, or countertops. If wooden cabinets or vanities are imported attached to, or in conjunction with, such merchandise, only the wooden cabinet or vanity is covered by the scope.

Subject merchandise includes the following wooden component parts of cabinets and vanities: (1) Wooden cabinet and vanity frames (2) wooden cabinet and vanity boxes (which typically include a top, bottom, sides, back, base blockers, ends/end panels, stretcher rails, toe kicks, and/or shelves), (3) wooden cabinet or vanity doors, (4) wooden cabinet or vanity drawers and drawer components (which typically include sides, backs, bottoms, and faces), (5) back panels and end panels, (6) and desks, shelves, and tables that are attached to or incorporated in the subject merchandise.

Subject merchandise includes all unassembled, assembled and/or ''ready to assemble'' (RTA) wooden cabinets and vanities, also commonly known as ''flat packs,'' except to the extent such merchandise is already covered by the scope of antidumping and countervailing duty orders on *Hardwood Plywood from the People's Republic of China. See Certain Hardwood Plywood Products from the People's Republic of China: Amended Final Determination of Sales at Less Than Fair Value, and Antidumping Duty Order,* 83 FR 504 (January 4, 2018); *Certain Hardwood Plywood Products from the People's Republic of China: Countervailing Duty Order,* 83 FR 513 (January 4, 2018). RTA wooden cabinets and vanities are defined as cabinets or vanities packaged so that at the time of importation they may include: (1) Wooden components required to assemble a cabinet or vanity (including drawer faces and doors); and (2) parts (*e.g.,* screws, washers, dowels, nails, handles, knobs, adhesive glues) required to assemble a cabinet or vanity. RTAs may enter the United States in one or in multiple packages.

Subject merchandise also includes wooden cabinets and vanities and in-scope components that have been further processed in a third country, including but not limited to one or more of the following: Trimming, cutting, notching, punching, drilling, painting, staining, finishing, assembly, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the in-scope product.

Excluded from the scope of this investigation, if entered separate from a wooden cabinet or vanity are:

(1) Aftermarket accessory items which may be added to or installed into an interior of a cabinet and which are not considered a structural or core component of a wooden cabinet or vanity. Aftermarket accessory items may be made of wood, metal, plastic, composite material, or a combination thereof that can be inserted into a cabinet and which are utilized in the function of organization/accessibility on the interior of a cabinet; and include:

- Inserts or dividers which are placed into drawer boxes with the purpose of organizing

[6] *See* Memorandum, ''Wooden Cabinets and Vanities and Components Thereof from the People's Republic of China: Ministerial Error Allegations in the Preliminary Determination,'' dated concurrently with this notice (Ministerial Error Memorandum).

or dividing the internal portion of the drawer into multiple areas for the purpose of containing smaller items such as cutlery, utensils, bathroom essentials, *etc.*

- Round or oblong inserts that rotate internally in a cabinet for the purpose of accessibility to foodstuffs, dishware, general supplies, *etc.*

(2) Solid wooden accessories including corbels and rosettes, which serve the primary purpose of decoration and personalization.

(3) Non-wooden cabinet hardware components including metal hinges, brackets, catches, locks, drawer slides, fasteners (nails, screws, tacks, staples), handles, and knobs.

(4) Medicine cabinets that meet all of the following five criteria are excluded from the scope: (1) Wall mounted; (2) assembled at the time of entry into the United States; (3) contain one or more mirrors; (4) be packaged for retail sale at time of entry; and (5) have a maximum depth of seven inches.

Also excluded from the scope of this investigation are:

(1) All products covered by the scope of the antidumping duty order on *Wooden Bedroom Furniture from the People's Republic of China. See Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Wooden Bedroom Furniture from the People's Republic of China,* 70 FR 329 (January 4, 2005).

(2) All products covered by the scope of the antidumping and countervailing duty orders on *Hardwood Plywood from the People's Republic of China. See Certain Hardwood Plywood Products from the People's Republic of China: Amended Final Determination of Sales at Less Than Fair Value, and Antidumping Duty Order,* 83 FR 504 (January 4, 2018); *Certain Hardwood Plywood Products from the People's Republic of China: Countervailing Duty Order,* 83 FR 513 (January 4, 2018).

Imports of subject merchandise are classified under Harmonized Tariff Schedule of the United States (HTSUS) statistical numbers 9403.40.9060 and 9403.60.8081. The subject component parts of wooden cabinets and vanities may be entered into the United States under HTSUS statistical number 9403.90.7080. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Ceramic Tile From the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Preliminary Negative Critical Circumstances Determination, and Postponement of Final Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that ceramic tile from the People's Republic of China (China) is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2018 through March 31, 2019. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 14, 2019.

FOR FURTHER INFORMATION CONTACT: Heather Lui or Paul Walker, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0016 or (202) 482–0413, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on May 8, 2019.[1] On September 5, 2019, Commerce postponed the preliminary determination of this investigation and the revised deadline is now November 6, 2019.[2] For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov*, and to all parties in the Central Records Unit, room B8024 of the main Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/*.

Scope of the Investigation

The product covered by this investigation is ceramic tile from China. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the record for this investigation, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum.[6] The scope case briefs were due on October 15, 2019, 30 days after the publication of the *Ceramic Tile from China Preliminary CVD Determination.*[7] There will be no further opportunity for comments on scope-related issues.[8]

[5] *See Initiation Notice.*

[6] *See* Memorandum, ''Ceramic Tile from the People's Republic of China: Scope Comments Decision Memorandum for the Preliminary Determinations,'' dated September 6, 2019 (Preliminary Scope Decision Memorandum).

[7] The scope case briefs were due 30 days after the publication of *Ceramic Tile from the People's Republic of China: Preliminary Affirmative Countervailing Duty Determination, Preliminary Negative Critical Circumstances Determination, and Alignment of Final Determination with Final Antidumping Duty Determination,* 84 FR 48125 (September 12, 2019) (*Ceramic Tile from China Preliminary CVD Determination*). *See* the Preliminary Scope Decision Memorandum at 3. In accordance with Commerce's practice, where a deadline falls on a weekend or federal holiday, the appropriate deadline is the next business day. *See Notice of Clarification: Application of ''Next Business Day'' Rule for Administrative Determination Deadlines Pursuant to the Tariff Act of 2930, As Amended,* 70 FR 24533 (May 10, 2005).

[8] Parties were already permitted the opportunity to file scope case briefs. Case briefs, other written comments, and rebuttal briefs should not include scope-related issues. *See* Preliminary Scope Decision Memorandum at 3.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export prices in accordance with section 772(a) of the Act. Because China is a non-market economy, within the meaning of section 771(18) of the Act, Commerce has calculated normal value in accordance with section 773(c) of the Act. In addition, pursuant to section 776(a) and (b) of the Act, Commerce has relied on facts otherwise available, with adverse inferences, for the China-wide entity. For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Negative Determination of Critical Circumstances

In accordance with section 733(e)(1) of the Act, Commerce preliminarily determines that information provided in the critical circumstances allegation does not demonstrate the existence of critical circumstances with respect to imports of ceramic tile from China. For a full description of the methodology and results of Commerce's analysis, *see* the Preliminary Decision Memorandum.

Combination Rates

In the *Initiation Notice,*[9] Commerce stated that it would calculate producer/exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.[10] In this investigation, we calculated producer/exporter combination rates for respondents eligible for separate rates.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter	Producer	Estimated weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offsets) (percent)
Belite Ceramics (Anyang) Co., Ltd	Belite Ceramics (Anyang) Co., Ltd./Beilitai (Tianjin) Tile Co., Ltd./Tianjin Honghui Creative Technology Co., Ltd.	244.26	233.72
Foshan Sanfi Import & Export Co., Ltd	Guangdong Sanfi Ceramics Group Co., Ltd	114.49	103.95

Suspension of Liquidation

In accordance with section 703(d)(1)(B) and (d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise as described in the scope of the investigation section entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the rates indicated above.

Disclosure

Commerce intends to disclose to interested parties the calculations performed in connection with this preliminary determination within five days of its public announcement or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last final verification report is issued in this investigation. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[12] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC, 20230, at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioners. Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by respondents for postponement of a final antidumping determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

Between October 28, 2019, and October 30, 2019, pursuant to 19 CFR 351.210(e), Belite, Foshan Sanfi, and the petitioner requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[13]

---

[11] Commerce preliminarily determined that Jiaxing Xingcheng Electronics Co., Ltd., Ningbo Panxiang Imp & Exp Co., Ltd., Ningbo Zhonglian Fastener Co., Ltd., and Ningbo Zhong Xin Angora Spinning Mill failed to establish their eligibility for a separate rate and, therefore, preliminarily determined that these companies are part of the China-wide entity. *See* Preliminary Decision Memorandum.

[12] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

[13] *See* Belite's Letter, "Belite Anyang's Request for Postponement of Final Determination and Extension of Provisional Measures Period in the Antidumping Duty Investigation on *Ceramic Tile from the People's Republic of China,* A–570–108," dated October 28, 2019; Foshan Sanfi's Letter, "Ceramic Tile From the People's Republic of China—Request Postponement of Final Determination and Extension of Provisional Measures Period," dated October 30, 2019; and

In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because (1) the preliminary determination is affirmative; (2) the requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce's final determination will be issued no later than 135 days after the date of publication of this preliminary determination.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports of the subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 6, 2019.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is ceramic flooring tile, wall tile, paving tile, hearth tile, porcelain tile, mosaic tile, flags, finishing tile, and the like (hereinafter ceramic tile). Ceramic tiles are articles containing a mixture of minerals including clay (generally hydrous silicates of alumina or magnesium) that are fired so the raw materials are fused to produce a finished good that is less than 3.2 cm in actual thickness. All ceramic tile is subject to the scope regardless of end use, surface area, and weight, regardless of whether the tile is glazed or unglazed, regardless of the water absorption coefficient by weight, regardless of the extent of vitrification, and regardless of whether or not the tile is on a backing. Subject merchandise includes ceramic tile with decorative features that may in spots exceed 3.2 cm in thickness and includes ceramic tile ''slabs'' or ''panels'' (tiles that are larger than 1 meter^2 (11 ft.^{2})).

Subject merchandise includes ceramic tile that undergoes minor processing in a third country prior to importation into the United States. Similarly, subject merchandise includes ceramic tile produced that undergoes minor processing after importation into the United States. Such minor processing includes, but is not limited to, one or more of the following: Beveling, cutting, trimming, staining, painting, polishing, finishing, additional firing, or any other processing that would otherwise not remove the merchandise from the scope of the investigation if performed in the country of manufacture of the in-scope product.

Subject merchandise is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under the following subheadings of heading 6907: 6907.21.1005, 6907.21.1011, 6907.21.1051, 6907.21.2000, 6907.21.3000, 6907.21.4000, 6907.21.9011, 6907.21.9051, 6907.22.1005, 6907.22.1011, 6907.22.1051, 6907.22.2000, 6907.22.3000, 6907.22.4000, 6907.22.9011, 6907.22.9051, 6907.23.1005, 6907.23.1011, 6907.23.1051, 6907.23.2000, 6907.23.3000, 6907.23.4000, 6907.23.9011, 6907.23.9051, 6907.30.1005, 6907.30.1011, 6907.30.1051, 6907.30.2000, 6907.30.3000, 6907.30.4000, 6907.30.9011, 6907.30.9051, 6907.40.1005, 6907.40.1011, 6907.40.1051, 6907.40.2000, 6907.40.3000, 6907.40.4000, 6907.40.9011, and 6907.40.9051. Subject merchandise may also enter under subheadings of headings 6914 and 6905: 6914.10.8000, 6914.90.8000, 6905.10.0000, and 6905.90.0050. The HTSUS subheadings are provided for convenience and customs purposes only. The written description of the scope of this investigation is dispositive.

Certain Lined Paper Products From India: Preliminary Results of Antidumping Duty Administrative Review, Preliminary Determination of No Shipments; 2017–2018

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is conducting an administrative review of the antidumping duty order on certain lined paper products from India, covering the period September 1, 2017 through August 31, 2018. We preliminarily find that Navneet Education Ltd. (Navneet) made sales of subject merchandise at less than normal value during the period of review (POR) and that SAB International (SAB) did not. We invite interested parties to comment on these preliminary results.

DATES: Applicable November 14, 2019.

FOR FURTHER INFORMATION CONTACT: Cindy Robinson or Samuel Brummitt, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3797 or (202) 482–7851, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 28, 2006, Commerce published the *CLPP from India AD Order* in the **Federal Register**.[1] On November 15, 2018, pursuant to section 751(a)(1) of the Tariff Act of 1930, as amended (the Act), Commerce initiated an administrative review of the antidumping duty order on certain lined paper products from India.[2] Commerce exercised its discretion to toll all deadlines affected by the partial federal government closure from December 22, 2018 through the resumption of operations on January 28, 2019.[3] On

[3] *See* Memorandum to the Record from Gary Taverman, Deputy Assistant Secretary for

Continued

June 19, 2019, we extended the deadline for the preliminary results to November 8, 2019.[4]

Commerce initiated this administrative review covering the following thirteen companies: Cellpage Ventures Private Limited (Cellpage), Goldenpalm Manufacturers PVT Limited (Goldenpalm), Kokuyo Riddhi Paper Products Private Limited (Kokuyo), Lodha Offset Limited (Lodha), Lotus Global Private Limited (Lotus Global), Magic International Pvt. Ltd. (Magic), Marisa International (Marisa), Navneet, Pioneer Stationery Private Limited (Pioneer), PP Bafna Ventures Private Limited (PP Bafna),[5] SAB, SGM Paper Products, and Super Impex.[6] This review covers two mandatory respondents, Navneet and SAB. The other eleven companies were not selected for individual examination and remain subject to this administrative review.

Scope of the Order

The merchandise covered by the *CLPP from India AD Order* is certain lined paper products. The merchandise subject to this order is currently classified under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 4811.90.9035, 4811.90.9080, 4820.30.0040, 4810.22.5044, 4811.90.9050, 4811.90.9090, 4820.10.2010, 4820.10.2020, 4820.10.2030, 4820.10.2040, 4820.10.2050, 4820.10.2060, and 4820.10.4000. Although the HTSUS numbers are provided for convenience and customs purposes, the written product description remains dispositive. A full description of the scope of the *CLPP from India AD Order* is contained in the Preliminary Decision Memorandum.[7]

Preliminary Determination of No Shipments

On November 22 and December 6, 2018, in their respective responses to Commerce's quantity and value questionnaire, Lodha and Pioneer reported that they had no exports or sales of subject merchandise into the United States during the POR. On December 10, 2018, Marisa submitted a certification of no shipments. To confirm Lodha's, Marisa's, and Pioneer's no-shipment claims, Commerce issued a no-shipment inquiry to U.S. Customs and Border Protection (CBP) requesting that it review Lodha's, Marisa's, and Pioneer's no-shipment claims. CBP reported that it had no information to contradict these claims of no shipments during the POR.

Given that Lodha, Marisa, and Pioneer reported that they made no shipments of subject merchandise to the United States during the POR, and there is no information calling their claims into question, we preliminarily determine that Lodha, Pioneer, and Marisa did not have any reviewable transactions during the POR. Consistent with Commerce's practice, we will not rescind the review with respect to Lodha, Marisa, and Pioneer but, rather, will complete the review and issue instructions to CBP based on the final results.[8]

Methodology

Commerce is conducting this review in accordance with section 751(a)(2) of the Act. Export price is calculated in accordance with section 772 of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our preliminary results, *see* the Preliminary Decision Memorandum. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov* and is available to all parties in the Central Records Unit, Room B–8094 of the main Commerce building. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/*. The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content. A list of the topics discussed in the Preliminary Decision Memorandum is attached as an Appendix to this notice.

Rate for Non-Selected Respondents

For the rate for non-selected respondents in an administrative review, generally, Commerce looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in a market economy investigation. Under section 735(c)(5)(A) of the Act, the all-others rate is normally ''an amount equal to the weighted-average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero or *de minimis* margins, and any margins determined entirely {on the basis of facts available}.'' In this segment of the proceeding, we calculated a margin for Navneet that was not zero, *de minimis,* or based on facts available. Accordingly, we have preliminarily applied the margin calculated for Navneet to the non-individually examined respondents.

Preliminary Results of the Review

We preliminarily determine that, for the period September 1, 2017 through August 31, 2018, the following weighted-average dumping margins exist:

Producer/exporter	Weighted-average dumping margin (percent)
Cellpage Ventures Private Limited	2.30
Goldenpalm Manufacturers PVT Limited	2.30
Kokuyo Riddhi Paper Products Pvt. Ltd	2.30
Lotus Global Private Limited	2.30
Magic International Pvt. Ltd	2.30
Navneet Education Ltd	2.30
PP Bafna Ventures Private Limited	2.30
SAB International	0.00
SGM Paper Products	2.30
Super Impex	2.30

Assessment Rates

Upon issuance of the final results, Commerce shall determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this review. If the weighted-average dumping margin for Navneet or SAB is not zero or *de minimis* (*i.e.,* less than 0.5

Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance, ''Deadlines Affected by the Partial Shutdown of the Federal Government,'' dated January 28, 2019. All deadlines in this segment of the proceeding have been extended by 40 days. If the new deadline falls on a non-business day, in accordance with Commerce's practice, the deadline will become the next business day.

[4] *See* Memorandum, ''Certain Lined Paper Products from India: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review; 2017–2018,'' dated June 19, 2019.

[5] The name of PP Bafna was inadvertently misspelled in the initiation notice.

[6] *Initiation Notice,* 83 FR at 57412.

[7] *See* Memorandum, ''Decision Memorandum for the Preliminary Results of Antidumping Duty Administrative Review: Certain Lined Paper Products from India; 2017–2018,'' dated concurrently and hereby adopted by this notice (Preliminary Decision Memorandum).

[8] *See, e.g., Certain Frozen Warmwater Shrimp from Thailand; Preliminary Results of Antidumping Duty Administrative Review, Partial Rescission of Review, Preliminary Determination of No Shipments; 2012–2013,* 79 FR 15951, 15952 (March 24, 2014), unchanged in *Certain Frozen Warmwater Shrimp from Thailand: Final Results of Antidumping Duty Administrative Review, Final Determination of No Shipments, and Partial Rescission of Review; 2012–2013,* 79 FR 51306, 51307 (August 28, 2014).

percent), we will calculate importer-specific *ad valorem* antidumping duty assessment rates based on the ratio of the total amount of dumping calculated for each importer's examined sales to the total entered value of those same sales in accordance with 19 CFR 351.212(b)(1).[9] If the weighted-average dumping margin for the respondents listed above is zero or *de minimis* in the final results, or an importer-specific assessment rate is zero or *de minimis* in the final results, we will instruct CBP not to assess antidumping duties on any of their entries in accordance with the *Final Modification for Reviews.*[10]

In accordance with Commerce's assessment practice, for entries of subject merchandise during the POR produced by Navneet or SAB for which it did not know that its merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate of 3.91 percent, as established in the less-than-fair-value investigation, if there is no rate for the intermediate company(ies) involved in the transaction.[11] For a full discussion of this matter, *see Assessment Policy Notice.*[12]

We intend to issue liquidation instructions to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for respondents noted above will be the rates established in the final results of this administrative review; (2) for merchandise exported by producers or exporters not covered in this administrative review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation, but the producer is, then the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the producer of the subject merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 3.91 percent, the all-others rate established in the investigation. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Disclosure and Public Comment

We will disclose to parties to the proceeding any calculations performed in connection with these preliminary results of review within five days after the date of publication of this notice.[13] Interested parties may submit case briefs not later than 30 days after the date of publication of this notice in the **Federal Register**.[14] Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than five days after the date for filing case briefs.[15] Parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.[16] All briefs must be filed electronically using ACCESS. An electronically filed document must be received successfully in its entirety by the established deadline.

Interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, within 30 days after the date of publication of this notice.[17] Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case and rebuttal briefs. If a request for a hearing is made, Commerce intends to hold the hearing at the U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, at a time and date to be determined.[18] Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

We intend to issue the final results of this administrative review, including the results of our analysis of the issues raised in any written briefs, not later than 120 days after the date of publication of this notice, pursuant to section 751(a)(3)(A) of the Act.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties and/or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Commerce's presumption that reimbursement of antidumping duties occurred and increase the subsequent assessment of the antidumping duties.

Notification to Interested Parties

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(h)(1).

Dated: November 7, 2019.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Emulsion Styrene-Butadiene Rubber From Brazil: Preliminary Results of Antidumping Duty Administrative Review; 2017–2018

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that certain emulsion styrene-butadiene rubber (ESB rubber) from Brazil is being, or is likely to be, sold in the United States at less than fair value. Interested

parties are invited to comment on these preliminary results.

DATES: Applicable November 14, 2019.

FOR FURTHER INFORMATION CONTACT: Drew Jackson, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4406.

SUPPLEMENTARY INFORMATION:

Background

On November 15, 2018, Commerce published in the **Federal Register** the notice of initiation of an antidumping duty administrative review on ESB rubber from Brazil.[1] The review covers one producer/exporter of the subject merchandise, ARLANXEO Brasil S.A. (ARLANXEO Brasil).[2] The period of review (POR) is February 24, 2017 through August 31, 2018.[3] Commerce exercised its discretion to toll all deadlines affected by the partial federal government closure from December 22, 2018 through the resumption of operations on January 29, 2019.[4] As a result, the revised deadline for the preliminary results of this administrative review became July 12, 2019. On June 7, 2019, we extended the preliminary results until November 7, 2019.[5] Interested parties are invited to comment on these preliminary results.

Scope of the Order

The product covered by this review is certain emulsion styrene-butadiene rubber from Brazil. For a full description of the scope *see* the Preliminary Decision Memorandum.[6]

Methodology

Commerce is conducting this review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (the Act). For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum. A list of the topics included in the Preliminary Decision Memorandum is included as an appendix to this notice. The Preliminary Decision Memorandum is a public document and is made available to the public via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov,* and it is available to all parties in the Central Records Unit, Room B8024 of the main Commerce building. In addition, a complete version of the Preliminary Decision Memorandum is available at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Preliminary Results of the Administrative Review

We preliminarily determine that the following weighted-average dumping margin exists for the period February 24, 2017 through August 31, 2018:

Exporter/producer	Weighted-average margin (percent)
ARLANXEO Brasil S.A	24.97

Disclosure

We intend to disclose the calculations performed for these preliminary results to the interested parties within five days after public announcement of the preliminary results in accordance with 19 CFR 351.224(b).

Public Comment

Pursuant to 19 CFR 351.309(c), interested parties may submit case briefs to the Assistant Secretary for Enforcement and Compliance not later than 30 days after the date of publication of this notice, unless the Secretary alters the time limit. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[7] Parties who submit case briefs or rebuttal briefs in this administrative review are encouraged to submit with each argument: (1) A statement of the issue, (2) a brief summary of the argument, and (3) a table of authorities.[8]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. An electronically filed document must be received successfully in its entirety by Commerce's electronic records system, ACCESS, by 5:00 p.m. Eastern Time within 30 days after the date of publication of this notice.[9] Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case briefs. Commerce intends to issue the final results of this administrative review, including the results of its analysis of the issues raised in any written briefs, not later than 120 days after the date of publication of these preliminary results in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act, unless extended.

Assessment Rate

Upon issuance of the final results, Commerce will determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries covered by this review.[10] If a respondent's weighted-average dumping margin is above *de minimis* in the final results of this review, we will calculate an importer-specific assessment rate based on the ratio of the total amount of dumping calculated for each importer's examined sales and the total entered value of the sales in accordance with 19 CFR 351.212(b)(1).[11] If a respondent's weighted-average dumping margin or an importer-specific assessment rate is zero or *de minimis* in the final results of review, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties in accordance with the *Final Modification for Reviews*.[12] The final results of this administrative review shall be the basis for the assessment of antidumping duties on entries of merchandise under review and for future deposits of estimated duties, where applicable. We intend to issue liquidation instructions

[9] *See* 19 CFR 351.310(c).

[10] *See* 19 CFR 351.212(b).

[11] In these preliminary results, Commerce applied the assessment rate calculation method adopted in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Duty Proceedings; Final Modification,* 77 FR 8101 (February 14, 2012) (*Final Modification for Reviews*).

[12] *See Final Modification for Reviews,* 77 FR at 8103; *see also* 19 CFR 351.106(c)(2).

to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements for estimated antidumping duties will be effective upon publication of the notice of final results of this review for all shipments of ESB rubber from Brazil entered, or withdrawn from warehouse, for consumption on or after the date of publication as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for company subject to this review will be equal to the weighted-average dumping margin established in the final results of the review; (2) for merchandise exported by companies not covered in this review but covered in a prior segment of this proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation but the producer is, the cash deposit rate will be the rate established for the most recently completed segment for the producer of the merchandise; (4) the cash deposit rate for all other producers or exporters will continue to be 19.61 percent, the all-others rate established in the less-than-fair-value investigation.[13] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this period of review. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

Commerce is issuing and publishing these results in accordance with sections 751(a)(1) and 777(i) of the Act and 19 CFR 351.221(b)(4).

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Public Comment for the Four Draft NOAA Science and Technology Strategies: NOAA Unmanned Systems, Artificial Intelligence, 'Omics, and Cloud Strategies

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public comment.

SUMMARY: This notice announces the availability for public comment of the NOAA *Unmanned Systems, Artificial Intelligence, 'Omics, and Cloud draft strategies.* These strategies are intended to dramatically expand our application of these four emerging science and technology focus areas by improving the efficiency, effectiveness and coordination of their development and usage across the agency.

DATES: Comments must be received by December 16, 2019.

ADDRESSES: Copies of the draft strategies may be downloaded or viewed on the internet at *https://nrc.noaa.gov/NOAA-Science-Technology-Focus-Areas.* The documents are also available by sending a written request to the point of contact identified below (see **FOR FURTHER INFORMATION**). You may submit public comments via email to *oar.rc.execsec@noaa.gov.* Please include ''Public Comment on NOAA Draft Science and Technology Strategies'' in the subject line of the message. You may also submit public comments via mail to Emma Kelley, Office of Labs and Cooperative Institutes, NOAA Research, 1315 East-West Highway, Silver Spring, MD 20910. All comments received are part of the public record. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender is publicly accessible. NOAA will accept anonymous comments.

FOR FURTHER INFORMATION CONTACT: Emma Kelley, Research Council Executive Secretariat, Office of Labs and Cooperative Institutes, NOAA Research, Rm. 11319, 1315 East-West Highway, Silver Spring, Maryland 20910. (Phone: 301–734–1179, email: *emma.kelley@noaa.gov*).

SUPPLEMENTARY INFORMATION: In recent years, individual NOAA programs and its multisector partners have worked to advance successful *unmanned systems, artificial intelligence, 'omics, and cloud solutions* that improve the delivery of their respective missions.

The draft strategies NOAA developed for each of these science and technology focus areas directly follow guidance from the Administration and Congress, including the Office of Science and Technology Policy FY21 Research and Development Priorities letter, the National Science and Technology Council report ''Science and Technology for America's Oceans: a Decadal Vision'', the Executive Order on Maintaining American Leadership in Artificial Intelligence, the Weather Research and Forecasting Innovation Act, and the Commercial Engagement Through Ocean Technology (CENOTE) Act.

The draft strategies will ensure robust agency-wide coordination and strong institutional support from NOAA senior leadership for these emerging science and technology focus areas to guide transformational advances in the quality and efficiency of NOAA's science, products, and services.

Summary of the Four Draft Strategies

Unmanned Systems Strategy: In recognition of the opportunities unmanned systems presents for addressing NOAA's mission priorities, the *NOAA Unmanned Systems Strategy* provides a framework to: (1) Efficiently provide requirements-driven, safe, cost-effective, and compliant Unmanned Systems services across the agency; (2) prioritize strategic investments in Unmanned Systems applications and technologies that fuel innovation and strengthen operations, and (3) accelerate and enhance capabilities through partnerships.

Artificial Intelligence Strategy: The overarching goal of the *NOAA Artificial Intelligence (AI) Strategy* is to utilize AI to advance NOAA's requirements-driven mission priorities. Through this strategy, NOAA seeks to reduce the cost of data processing, and provide higher quality and more timely scientific products and services for societal benefits.

'Omics Strategy: In recognition of the opportunities and challenges presented

by the advent of 'omics tools (a suite of advanced methods used to analyze material such as DNA, RNA, or proteins), the NOAA *'Omics Strategy* provides a framework to advance the application of 'omics to address mission priorities. The strategy leverages NOAA's current organizational structure to more effectively implement 'omics through improvements in computational and analytical capacities, targeted research, technology transition, workforce proficiency, and partnerships across NOAA's lines, federal agencies, and extramural research and commercial communities.

Cloud Strategy: NOAA's robust experience with cloud applications are already beginning to demonstrate significant improvements in performance and skill in areas such as satellite data products and services, numerical weather prediction, ocean models, and big data analysis, storage and dissemination. Cloud services will be further leveraged to expand benefits, such as: (1) Accelerated timeline to acquire new computing resources, (2) increased security posture, (3) more accessible and monetizable NOAA data to customers, such as academia and industry, (4) reduced transition time from research to operations, (5) scalable infrastructure that supports scientific and high performance computing requirements, and (6) a more agile and innovative culture.

After completion of these strategies, NOAA will develop corresponding Strategic Implementation Plans (or ''Roadmaps'') that define detailed action items, deadlines, and responsibilities. In the meantime, these NOAA S&T focus areas are already improving performance in our economically impactful missions and setting the course to strengthen our renowned environmental science and technology leadership for the coming decades. Through the four strategies, NOAA will be better positioned to achieve our top agency priorities to regain global leadership in numerical weather prediction and sustainably expand the American Blue Economy.

Dated: November 8, 2019.

David Holst,

Chief Financial Officer/Administrative Officer, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XR055

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Seabird Research Activities in Central California

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; incidental harassment authorization; request for comments on proposed Renewal.

SUMMARY: NMFS received a request from Point Blue Conservation Science (Point Blue) for the Renewal of their currently active incidental harassment authorization (IHA) to take marine mammals incidental to seabird and pinniped research activities in central California. These activities are identical to those covered in the current authorization. Pursuant to the Marine Mammal Protection Act, prior to issuing the currently active IHA, NMFS requested comments on both the proposed IHA and the potential for renewing the initial authorization if certain requirements were satisfied. The Renewal requirements have been satisfied, and NMFS is now providing an additional 15-day comment period to allow for any additional comments on the proposed Renewal not previously provided during the initial 30-day comment period.

DATES: Comments and information must be received no later than November 29, 2019.

ADDRESSES: Comments should be addressed to Jolie Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service. Physical comments should be sent to 1315 East-West Highway, Silver Spring, MD 20910 and electronic comments should be sent to *ITP.Fowler@noaa.gov.*

Instructions: NMFS is not responsible for comments sent by any other method, to any other address or individual, or received after the end of the comment period. Comments received electronically, including all attachments, must not exceed a 25-megabyte file size. Attachments to electronic comments will be accepted in Microsoft Word or Excel or Adobe PDF file formats only. All comments received are a part of the public record and will generally be posted online at *https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection*-act without change. All personal identifying information (*e.g.,* name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Amy Fowler, Office of Protected Resources, NMFS, (301) 427–8401. Electronic copies of the original application, Renewal request, and supporting documents (including NMFS **Federal Register** notices of the original proposed and final authorizations, and the previous IHA), as well as a list of the references cited in this document, may be obtained online at: *https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act.* In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The Marine Mammal Protection Act (MMPA) prohibits the ''take'' of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed incidental take authorization is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other ''means of effecting the least practicable adverse impact'' on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stocks for taking for certain subsistence uses (referred to here as ''mitigation measures''). Monitoring and reporting of such takings are also required. The meaning of key terms such as ''take,'' ''harassment,'' and ''negligible impact'' can be found in section 3 of the MMPA (16 U.S.C. 1362) and the agency's regulations at 50 CFR 216.103.

NMFS' regulations implementing the MMPA at 50 CFR 216.107(e) indicate that IHAs may be renewed for additional periods of time not to exceed one year for each reauthorization. In the notice of proposed IHA for the initial authorization, NMFS described the circumstances under which we would consider issuing a Renewal for this activity, and requested public comment on a potential Renewal under those circumstances. Specifically, on a case-by-case basis, NMFS may issue a one-year IHA Renewal when (1) another year of identical or nearly identical activities as described in the Specified Activities section is planned or (2) the activities would not be completed by the time the IHA expires and a second IHA would allow for completion of the activities beyond that described in the Dates and Duration section of the initial IHA. All of the following conditions must be met in order to issue a Renewal:

- A request for Renewal is received no later than 60 days prior to expiration of the current IHA.
- The request for Renewal must include the following:

(1) An explanation that the activities to be conducted beyond the initial dates either are identical to the previously analyzed activities or include changes so minor (*e.g.,* reduction in pile size) that the changes do not affect the previous analyses, take estimates, or mitigation and monitoring requirements; and

(2) A preliminary monitoring report showing the results of the required monitoring to date and an explanation showing that the monitoring results do not indicate impacts of a scale or nature not previously analyzed or authorized.

- Upon review of the request for Renewal, the status of the affected species or stocks, and any other pertinent information, NMFS determines that there are no more than minor changes in the activities, the mitigation and monitoring measures remain the same and appropriate, and the initial findings remain valid.

Although their request was not received 60 days in advance, issuance of the Renewal is still justified, given the effective dates do not extend beyond one year from the expiration of the initial IHA and all of the other qualifications were met.

An additional public comment period of 15 days (for a total of 45 days), with direct notice by email, phone, or postal service to commenters on the initial IHA, is provided to allow for any additional comments on the proposed Renewal. A description of the Renewal process may be found on our website at: *www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-harassment-authorization-renewals.* Any comments received on the potential Renewal, along with relevant comments on the initial IHA, have been considered in the development of this proposed IHA Renewal, and a summary of agency responses to applicable comments is included in this notice. NMFS will consider any additional public comments prior to making any final decision on the issuance of the requested Renewal, and agency responses will be summarized in the final notice of our decision.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, NMFS must review our proposed action (*i.e.,* the issuance of an incidental harassment authorization) with respect to potential impacts on the human environment. This action is consistent with categories of activities identified in Categorical Exclusion B4 (incidental harassment authorizations with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216–6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has preliminarily determined that the issuance of the renewal IHA qualifies to be categorically excluded from further NEPA review. We will review all comments submitted in response to this notice prior to concluding our NEPA process or making a final decision on the IHA request.

History of Request

On June 28, 2018, NMFS issued an IHA to Point Blue to take marine mammals incidental to seabird research activities in central California (83 FR 31372; July 5, 2018), effective from July 7, 2018 through July 6, 2019. On August 20, 2019, NMFS received an application for the Renewal of that initial IHA. As described in the application for Renewal, the activities for which incidental take is requested are identical to those covered in the initial authorization. As required, the applicant also provided a preliminary monitoring report (available at *https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-research-and-other-activities*) which confirms that the applicant has implemented the required mitigation and monitoring, and which also shows that no impacts of a scale or nature not previously analyzed or authorized have occurred as a result of the activities conducted.

Description of the Specified Activities and Anticipated Impacts

Point Blue plans to monitor and census seabird populations, observe seabird nesting habitat, restore nesting burrows, and resupply a field station annually in central California. The planned activities occur on Southeast Farallon Island (SEFI), Año Nuevo Island (ANO), and Point Reyes National Seashore (PRNS). Point Blue, along with partners Oikonos Ecosystem Knowledge and PRNS, have been conducting seabird research activities at these locations for over 30 years. This research is conducted under cooperative agreements with the U.S. Fish and Wildlife Service (USFWS) in consultation with the Gulf of the Farallones National Marine Sanctuary. The seabird research and monitoring activities planned by Point Blue are identical to those analyzed in the initial IHA issued by NMFS, described in detail in the **Federal Register** notice of proposed IHA (83 FR 20045; May 7, 2018).

Presence of researchers has the potential to disturb pinnipeds hauled out at SEFI, ANO, and PRNS. As in the initial authorization, NMFS anticipates that take, by Level B harassment only, of California sea lions (*Zalophus californianus*), harbor seals (*Phoca vitulina*), northern elephant seals (*Mirounga angustirostris*), and Steller sea lions (*Eumetopias jubatus*) could result from the specified activity (83 FR 31372; July 5, 2018).

Detailed Description of the Activity

A detailed description of the seabird research and monitoring activities for which take is proposed here may be found in the Notices of the Proposed and Final IHAs for the initial authorization (83 FR 20045, May 7, 2018; 83 FR 31372, July 5, 2018). The locations (as described in the *Specific Geographic Region* section of the initial IHA), timing, and nature of the activities, including the types of equipment planned for use, are identical to those described in the previous notices. The proposed Renewal would be effective from the date of issuance through July 6, 2020.

Description of Marine Mammals

A description of the marine mammals in the area of the activities for which authorization of take is proposed here, including information on abundance, status, distribution, and hearing, may be found in the **Federal Register** Notice of the Proposed IHA for the initial authorization (83 FR 20045; May 7, 2018). NMFS has reviewed the monitoring data from the initial IHA, recent draft Stock Assessment Reports, information on relevant Unusual Mortality Events, and other scientific literature. The 2018 Stock Assessment Report notes that the estimated abundance of California sea lions has decreased slightly, however, neither this nor any other new information affects which species or stocks have the potential to be affected or the pertinent information in the section Description of Marine Mammals in the Area of Specified Activities contained in the supporting documents for the initial IHA.

Potential Effects on Marine Mammals and Their Habitat

A description of the potential effects of the specified activity on marine mammals and their habitat for the activities for which take is proposed here may be found in the **Federal Register** Notice of the Proposed IHA for the initial authorization (83 FR 20045; May 7, 2018). NMFS has reviewed the monitoring data from the initial IHA, recent Stock Assessment Reports, information on relevant Unusual Mortality Events, and other scientific literature, and determined that neither this nor any other new information affects our initial analysis of impacts on marine mammals and their habitat.

Estimated Take

A detailed description of the methods and inputs used to estimate take for the specified activity are found in the **Federal Register** Notices of the Proposed and Final IHAs for the initial authorization (83 FR 20045, May 7, 2018; 83 FR 31372, July 5, 2018). Specifically, the expected number of survey days, and marine mammal occurrence data applicable to this authorization remain unchanged from the previously issued IHA. Similarly, the stocks taken, methods of take, and types of take remain unchanged from the previously issued IHA, as do the number of takes, which are indicated below in Table 1. As in the initial IHA, the take estimates are based on historical data from the previous five monitoring reports (2013–2014, 2014–2015, 2015–2016, 2016–2017, and 2017–2018) to generate 95 percent confidence interval maximums (assuming normal distribution) using STATA, a genera-purpose statistical computer package. Takes recorded in all previous monitoring reports were based on occurrences that are consistent with Levels 2 and 3 of the three-point harassment scale (see Table 2).

TABLE 1—POPULATION ABUNDANCE ESTIMATES, TOTAL PROPOSED LEVEL B TAKE, AND PERCENTAGE OF POPULATION THAT MAY BE TAKEN

Species	Stock	Stock abundance	Total proposed level B take	Percentage of stock or population
California sea lion	U.S	257,606	32,623	12.7
Northern elephant seal	California breeding stock	179,000	239	0.13
Harbor seal	California	30,968	304	0.98
Steller sea lion	Eastern U.S	41,638	43	0.10

Description of Proposed Mitigation, Monitoring and Reporting Measures

The proposed mitigation, monitoring, and reporting measures included as requirements in this authorization are identical to those included in the **Federal Register** Notice announcing the issuance of the initial IHA (83 FR 31372; July 5, 2018), and the discussion of the least practicable adverse impact included in that document remains accurate. The following measures are proposed for this renewal:

To reduce the potential for disturbance from acoustic and visual stimuli associated with survey activities Point Blue will implement the following mitigation measures for marine mammals:

(1) Slow approach to beaches for boat landings to avoid stampede, provide animals opportunity to enter water, and avoid vessel strikes;

(2) Observe a site from a distance, using binoculars if necessary, to detect any marine mammals prior to approach to determine if mitigation is required (*i.e.,* site surveys will not be conducted if fur seals are present; if other pinnipeds are present, researchers will approach with caution, walking slowly, quietly, and close to the ground to avoid surprising any hauled-out individuals and to reduce flushing/stampeding of individuals);

(3) Avoid pinnipeds along access ways to sites by locating and taking a different access way. Researchers will keep a safe distance from and not approach any marine mammal while conducting research, unless it is absolutely necessary to flush a marine mammal in order to continue conducting research (*i.e.,* if a site cannot be accessed or sampled due to the presence of pinnipeds);

(4) Cease or delay visits if the number of takes that have been granted are met, if a species for which takes were not granted is observed (*e.g.,* northern fur seals and Guadalupe fur seals), or if pups are present;

(5) Monitor for offshore predators and do not approach hauled out pinnipeds if great white sharks (*Carcharodon carcharias*) or killer whales (*Orcinus orca*) are present. If Point Blue and/or its designees see pinniped predators in the area, they must not disturb the pinnipeds until the area is free of predators;

(6) Keep voices hushed and bodies low to the ground in the visual presence of pinnipeds;

(7) Conduct seabird observations at North Landing on SEFI in an observation blind, shielded from the view of hauled out pinnipeds;

(8) Crawl slowly to access seabird nest boxes on ANI if pinnipeds are within view;

(9) Coordinate research visits to intertidal areas of SEFI (to reduce potential take) and coordinate research goals for ANI to minimize the number of trips to the island; and

(10) Require beach landings on ANI only occur after any pinnipeds that might be present on the landing beach have entered the water.

Point Blue will contribute to the knowledge of pinnipeds in California by noting observations of: (1) Unusual behaviors, numbers, or distributions of pinnipeds, such that any potential follow-up research can be conducted by the appropriate personnel; (2) tag-bearing pinnipeds or carcasses, allowing transmittal of the information to appropriate agencies and personnel; and (3) rare or unusual species of marine mammals for agency follow-up.

Proposed monitoring protocols for Point Blue will include the following:

(1) Record of date, time, and location (or closest point of ingress) of each visit to the research site;

(2) Composition of the marine mammals sighted, such as species, gender and life history stage (*e.g.,* adult, sub-adult, pup);

(3) Information on the numbers (by species) of marine mammals observed during the activities;

(4) Estimated number of marine mammals (by species) that may have been harassed during the activities;

(5) Behavioral responses or modifications of behaviors that may be attributed to the specific activities and a description of the specific activities occurring during that time (*e.g.,* pedestrian approach, vessel approach); and

(6) Information on the weather, including the tidal state and horizontal visibility.

The lead biologist will serve as an observer to record incidental take. For consistency, any reactions by pinnipeds to researchers will be recorded according to a three-point scale shown in Table 2. Note that only observations of disturbance noted in Levels 2 and 3 should be recorded as takes.

TABLE 2—LEVELS OF PINNIPED BEHAVIORAL DISTURBANCE

Level	Type of response	Definition
1	Alert	Seal head orientation or brief movement in response to disturbance, which may include turning head towards the disturbance, craning head and neck while holding the body rigid in a u-shaped position, changing from a lying to a sitting position, or brief movement of less than twice the animal's body length.
2 *	Movement	Movements in response to the source of disturbance, ranging from short withdrawals at least twice the animal's body length to longer retreats over the beach, or if already moving a change of direction of greater than 90 degrees.
3 *	Flush	All retreats (flushes) to the water.

* Only observations of disturbance Levels 2 and 3 are recorded as takes.

This information will be incorporated into a monitoring report for NMFS. The monitoring report will cover the period from January 1, 2019 through December 31, 2019. NMFS has requested that Point Blue submit annual monitoring report data on a calendar year schedule, regardless of the current IHA's initiation or expiration dates. This will ensure that data from all consecutive months will be collected and, therefore, can be analyzed to estimate authorized take for future IHA's regardless of the existing IHA's issuance date. Point Blue will submit a draft monitoring report to NMFS Office of Protected Resources by April 1, 2020. A final report will be prepared and submitted within 30 days following resolution of any comments on the draft report from NMFS. If no comments are received from NMFS, the draft final report will be considered to be the final report. This report must contain the informational elements described above, at minimum.

Point Blue must also report observations of unusual pinniped behaviors, numbers, or distributions and tag-bearing carcasses to the NMFS West Coast Regional Office.

If at any time the specified activity clearly causes the take of a marine mammal in a manner prohibited by this IHA, such as an injury (Level A harassment), serious injury, or mortality, Point Blue will immediately cease the specified activities and report the incident to the Office of Protected Resources, NMFS, and the West Coast Regional Stranding Coordinator, NMFS. The report must include the following information:

(1) Time and date of the incident;

(2) Description of the incident;

(3) Environmental conditions (*e.g.,* wind speed and direction, Beaufort sea state, cloud cover, and visibility);

(4) Description of all marine mammal observations in the 24 hours preceding the incident;

(5) Species identification or description of the animal(s) involved;

(6) Fate of the animal(s); and

(7) Photographs or video footage of the animal(s).

Activities will not resume until NMFS is able to review the circumstances of the prohibited take. NMFS will work with Point Blue to determine what measures are necessary to minimize the likelihood of further prohibited take and ensure MMPA compliance. Point Blue may not resume the activities until notified by NMFS.

In the event that an injured or dead marine mammal is discovered and it is determined that the cause of the injury or death is unknown and the death is relatively recent (*e.g.,* in less than a moderate state of decomposition), Point Blue will immediately report the incident to the Office of Protected Resources, NMFS, and the West Coast Regional Stranding Coordinator, NMFS. The report must include the same information identified in the paragraph above. Activities may continue while NMFS reviews the circumstances of the incident. NMFS will work with Point Blue to determine whether additional mitigation measures or modifications to the activities are appropriate.

In the event that an injured or dead marine mammal is discovered and it is determined that the injury or death is not associated with or related to the activities authorized in the IHA (*e.g.,* previously wounded animal, carcass with moderate to advanced decomposition, or scavenger damage), Point Blue will report the incident to the Office of Protected Resources, NMFS, and the West Coast Regional Stranding Coordinator, NMFS, within 24 hours of the discovery. Point Blue will provide photographs or video footage or other documentation of the stranded animal sighting to NMFS. Activities may continue while NMFS reviews the circumstances of the incident.

Public Comments

As noted previously, NMFS published a notice of a proposed IHA (83 FR 20045; May 7, 2018) and solicited public comments on both our proposal to issue the initial IHA for seabird research and on the potential for a Renewal, should certain requirements be met.

All public comments were addressed in the notice announcing the issuance of the initial IHA (83 FR 31372; July 5, 2018). Below, we describe how we have addressed, with updated information where appropriate, any comments received that specifically pertain to the Renewal of the 2018 IHA.

Comment: The Marine Mammal Commission (Commission) requested clarification of certain issues associated with NMFS's notice that one-year Renewals can be issued in certain limited circumstances and expressed concern that the process would bypass the public notice and comment requirements. The Commission also suggested that NMFS should discuss the possibility of Renewals through a more general route, such as a rulemaking, instead of notice in a specific authorization. The Commission further recommended that if NMFS did not pursue a more general route, that the agency provide the Commission and the public with a legal analysis supporting our conclusion that this process is consistent with the requirements of section 101(a)(5)(D) of the MMPA.

Response: The notice of the proposed initial IHA expressly notified and invited comment from the public on the possibility that under certain, limited conditions the applicant could seek a Renewal IHA for an additional year. The notice described the conditions under which such a Renewal request could be considered and expressly sought public comment in the event such a Renewal were sought. Further, since issuance of the initial IHA NMFS has modified the Renewal process to provide notice through the **Federal Register** and an additional 15-day public comment period at the time the Renewal IHA is requested. NMFS also will provide direct notice of the proposed Renewal to those who commented on the initial IHA, to provide an opportunity to submit any additional comments.

We appreciate the Commission's suggestion that NMFS discuss the potential for IHA Renewals through a more general route, such as a rulemaking. However, utilizing the public comment process associated with IHAs is more efficient for the agency, while still providing for appropriate public input into NMFS' decision-making. Further, NMFS's recent modification to the Renewal process (*i.e.,* soliciting additional public comment at the time of a Renewal request) should alleviate the Commission's concern about the lack of additional public comment and need for a more general rulemaking.

For more information, NMFS has published a description of the Renewal process on our website (available at *https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-harassment-authorization-renewals*).

Preliminary Determinations

The seabird research and monitoring activities proposed by Point Blue are identical to those analyzed in the initial IHA, as are the planned number of days of activity, the method of taking, and the effects of the action. The potential effects of Point Blue's activities are limited to Level B harassment in the form of behavioral disturbance. In analyzing the effects of the activity in the initial IHA, NMFS determined that Point Blue's activities would have a negligible impact on the affected species or stocks and that the authorized take numbers of each species or stock were small relative to the relevant stocks (*e.g.,* less than 13 percent of all stocks). The numbers of marine mammals proposed to be taken in this authorization are identical to those authorized in the initial IHA. The mitigation measures and monitoring and reporting requirements as described above are identical to the initial IHA.

NMFS has preliminarily concluded that there is no new information suggesting that our analysis or findings should change from those reached for the initial IHA. This includes consideration of the estimated abundance of the California sea lion stock decreasing slightly. Based on the information and analysis contained here and in the referenced documents, NMFS has determined the following: (1) The required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; (4) Point Blue's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action; and (5) appropriate monitoring and reporting requirements are included.

Endangered Species Act

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA: 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally, in this case with the West Coast Region Protected Resources Division Office, whenever we propose to authorize take for endangered or threatened species.

No incidental take of ESA-listed species is proposed or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

Proposed Renewal and Request for Public Comment

As a result of these preliminary determinations, NMFS proposes to issue an IHA Renewal to Point Blue for conducting seabird research activities in Central California, provided the previously described mitigation, monitoring, and reporting requirements are incorporated. A draft of the proposed IHA can be found at *https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act.* We request comment on our analyses, the proposed Renewal, and any other aspect of this Notice. Please include with your comments any supporting data or literature citations to help inform our final decision on the request for MMPA authorization.

Dated: November 7, 2019.

Donna S. Wieting,

Director, Office of Protected Resources, National Marine Fisheries Service.

COMMODITY FUTURES TRADING COMMISSION

Sunshine Act Meetings

TIME AND DATE: 10:00 a.m., Thursday, November 21, 2019.

PLACE: Three Lafayette Centre, 1155 21st Street NW, Washington, DC, 9th Floor Commission Conference Room.

STATUS: Closed.

MATTERS TO BE CONSIDERED: Enforcement matters. In the event that the time, date, or location of this meeting changes, an announcement of the change, along with the new time, date, and/or place of the meeting will be posted on the Commission's website at *https://www.cftc.gov/.*

CONTACT PERSON FOR MORE INFORMATION: Christopher Kirkpatrick, 202–418–5964.

Authority: 5 U.S.C. 552b.

Dated: November 12, 2019.

Christopher Kirkpatrick,

Secretary of the Commission.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Office of the Department of the Air Force

Notice of Intent To Grant an Exclusive Patent License

AGENCY: Department of the Air Force, DoD.

ACTION: Notice of Intent.

SUMMARY: Pursuant to the Bayh-Dole Act and implementing regulations, the Department of the Air Force hereby gives notice of its intent to grant an exclusive patent license agreement to the Defense Science Technology Laboratory, an executive agency of the Ministry of Defense of the United Kingdom of Great Britain and Northern Ireland.

DATES: Written objections must be filed no later than fifteen (15) calendar days after the date of publication of this Notice.

ADDRESSES: Submit written objections to the Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Room 260, Wright-Patterson AFB, OH 45433–7109; Facsimile: (937) 255–3733; or Email: *afmclo.jaz.tech@us.af.mil.* Include Docket No. AFD 1796 in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Rm 260, Wright-Patterson AFB, OH 45433–7109; Facsimile: (937) 255–3733; Email: *afmclo.jaz.tech@us.af.mil.*

SUPPLEMENTARY INFORMATION: The Department of the Air Force intends to grant the exclusive patent license agreement to consolidate rights with co-owner The Secretary of State for Defense of the United Kingdom of Great Britain and Northern Ireland as represented by the Defense Science Technology Laboratory for the invention described in:

A Radio or Sonic Wave Detector, Transmitter, Receiver and Method Thereof
- —United Kingdom Application Serial No. GB1803239.1, filed February 28, 2018
- —Patent Cooperation Treaty Serial No. PCT/GB2019/000041, filed February 25, 2019
- —U.S. Patent Application Serial No. 16/288,791, filed February 28, 2019

The consolidation of rights is in the best interest of both owners in order to promote commercialization of the technology in the United States and abroad. The Department of the Air Force may grant the prospective license unless a timely objection is received that sufficiently shows the grant of the license would be inconsistent with the Bayh-Dole Act or implementing regulations. A competing application for a patent license agreement, completed in compliance with 37 CFR 404.8 and received by the Air Force within the period for timely objections, will be treated as an objection and may be considered as an alternative to the proposed license.

Adriane Paris,

Acting Air Force Federal Register Liaison Officer.

DEPARTMENT OF DEFENSE

Office of the Secretary

U.S. Strategic Command Strategic Advisory Group; Notice of Advisory Committee Closed Meeting; Cancellation

AGENCY: Office of the Chairman Joint Chiefs of Staff, Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee; cancellation.

SUMMARY: On Monday, October 28, 2019 the DoD published a notice announcing a meeting of the U.S. Strategic Command Strategic Advisory Group that was to take place on Tuesday, November 19, 2019 to Wednesday, November 20, 2019. Due to schedule conflicts, the DoD is cancelling the November 19–20 meeting.

ADDRESSES: Mailing address is 901 SAC Boulevard, Suite 1F7, Offutt AFB, NE 68113–6030.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Trefz, Jr., Designated Federal Officer, (402) 294–4102 (Voice), (402) 294–3128 (Facsimile), *john.l.trefz.civ@mail.mil* (Email).

SUPPLEMENTARY INFORMATION: Due to circumstances beyond the control of the Department of Defense and the Designated Federal Officer, the U.S. Strategic Command Strategic Advisory Group was unable to provide sufficient public notification required by 41 CFR 102–3.150(a) concerning the cancellation of its previously noticed November 19–20, 2019 meeting. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

Dated: November 7, 2019.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2019–ICCD–0141]

Agency Information Collection Activities; Comment Request; William D. Ford Federal Direct Loan Program Repayment Plan Selection Form

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before January 13, 2020.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2019–ICCD–0141. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the

Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, ED will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W208 D, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202–377–4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: William D. Ford Federal Direct Loan Program Repayment Plan Selection Form.

OMB Control Number: 1845–0014.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 660,000.

Total Estimated Number of Annual Burden Hours: 110,220.

Abstract: The Repayment Plan Request form serves as the means by which Direct Loan borrowers notify the Department of their choice of an initial repayment plan under the Standard, Extended or Graduated options before their loans enter repayment. The form may also be used by borrowers to request a change in the Standard, Extended or Graduated repayment plans options after their loans have entered repayment. If a borrower does not select an initial repayment plan, the borrower is placed on the Standard Repayment Plan in accordance with 34 CFR 685.210(a)(2).

Dated: November 8, 2019.

Kate Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer.

[FR Doc. 2019–24746 Filed 11–13–19; 8:45 am]

BILLING CODE 4000–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–10001–95–OMS]

Good Neighbor Environmental Board

AGENCY: Environmental Protection Agency (EPA).

ACTION: Request for nominations to the Good Neighbor Environmental Board.

SUMMARY: The U.S. Environmental Protection Agency (EPA) invites nominations from a diverse range of qualified candidates to be considered for appointment to its Good Neighbor Environmental Board (GNEB). Vacancies are expected to be filled by March 31, 2020. Sources in addition to this **Federal Register** Notice may also be utilized in the solicitation of nominees.

ADDRESSES: Submit nominations to Eugene Green, Designated Federal Officer, Office of Resources and Business Operations, Federal Advisory Committee Management Division (1601M), 1200 Pennsylvania Avenue NW, Washington, DC 20460. You may also email nominations with the subject line COMMITTEE APPLICATION PACKAGE 2020 for (Name of Nominee) to *green.eugene@epa.gov.*

FOR FURTHER INFORMATION CONTACT: Eugene Green, Designated Federal Officer, U.S. EPA, telephone 202–564–2432, fax: 202–564–8129.

SUPPLEMENTARY INFORMATION:

Background: GNEB is a federal advisory committee chartered under the Federal Advisory Committee Act (FACA), Public Law 92–463. GNEB was created in 1992 by the Enterprise for the Americas Initiative Act, Public Law 102–532, 7 U.S.C. 5404. Implementing authority was delegated to the Administrator of EPA under Executive Order 12916. The GNEB is charged by statute with submitting an annual report to the President on the need for implementation of environmental and infrastructure projects within the states of the United States contiguous to Mexico. The statute calls for the GNEB to have representatives from U.S. Government agencies; the governments of the states of Arizona, California, New Mexico and Texas; and tribal and private organizations with experience in environmental and infrastructure issues along the US/Mexico Border. Members are appointed by the EPA Administrator for two-year terms with the possibility of reappointment. The GNEB meets approximately three times annually either in person or via video/teleconference. The average workload for committee members is approximately 10 to 15 hours per month. Members serve on the committees in a voluntary capacity. Although we are unable to offer compensation or an honorarium, members may receive travel and per diem allowances, according to applicable federal travel regulations. The EPA is seeking nominations from a variety of nongovernmental interests along the U.S.-Mexico border from the private sector, including representatives from business, academia, environmental groups, health groups, ranching and grazing, energy, financial, and other relevant sectors. EPA values and welcomes diversity. To obtain nominations of diverse candidates, EPA encourages nominations of women and men of all racial and ethnic groups.

The following criteria will be used to evaluate nominees:

- Background and experiences that would help members contribute to the diversity of perspectives on the committee (*e.g.,* geographic, economic, social, cultural, educational, and other considerations).
- Representative of a sector or group that helps to shape border-region environmental policy or representatives of a group that is affected by border region environmental policy.
- Has extensive professional knowledge and experience with the issues that the GNEB examines (*i.e.,* environmental and infrastructure issues along the U.S.-Mexico border),

including the bi-national dimension of these issues.

• Bring senior level experience that will fill a need of the GNEB in bringing a new and relevant dimension to its deliberations.

• Possesses a demonstrated ability to work in a consensus building process with a wide range of representatives from diverse constituencies.

• Ability to contribute approximately 10 to 15 hours per month to the GNEB's activities, including face-to-face meetings, conference calls and participation in the development of the GNEB's annual report to the President and comment letters.

• Nominees may self-nominate by submitting a resume describing their professional and educational qualifications, including current business address, email and daytime telephone number.

• All nominees must demonstrate the potential for active and constructive involvement in the GNEB's work.

If you are interested in serving on GNEB, we will need the following items to process your nomination package:

• Nominations must include a brief statement of interest, resume, curriculum vitae, or a short biography (no more than two paragraphs) describing your professional and educational qualifications, including a list of relevant activities and any current or previous service on advisory committees. The statement of interest, resume, curriculum vitae, or short biography should include the candidate's name, name and address of current organization, position title, email address, and daytime telephone number(s). In preparing your statement of interest, please describe how your background, knowledge, and experience will bring value to the work of the committee, and how these qualifications would contribute to the overall diversity of the GNEB. Also, be sure to describe any previous involvement with the Agency through employment, grant funding and/or contracting sources.

• Candidates from the academic sector must also provide a letter of recommendation authorizing the nominee to represent their institution.

• Please be advised that federal registered lobbyists are not permitted to serve on federal advisory boards.

Federal Advisory Committee Term and Condition: As indicated in the EPA memorandum, Strengthening and Improving Membership on EPA Federal Advisory Committees, issued on October 31, 2017, no member of an EPA Federal Advisory Committee may receive compensation from EPA grants, either as a principal investigator or co-investigator, or be in a position that otherwise would reap substantial direct benefit from the grant, while serving on an EPA Federal Advisory Committee.

Accordingly, an individual's ability to begin or continue serving on an EPA Federal Advisory committee may be impacted if during the individual's expected or ongoing service:

• (a) The grant recipient lists the individual as a principal investigator or co-investigator on the grant; or

• (b) The individual is not listed on the grant but is in a position for the entity such that the individual would otherwise reap substantial direct benefit from the grant.

This term and condition does not apply to state, local, or tribal government recipients.

Dated: October 25, 2019.

Eugene Green,

Program Analyst.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1211]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before January 13, 2020. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams, (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1211.

Title: Sections 96.17; 96.21; 96.23; 96.25; 96.33; 96.35; 96.39; 96.41; 96.43; 96.45; 96.51; 96.57; 96.59; 96.61; 96.63; 96.67, Commercial Operations in the 3550–3650 MHz Band.

Form Number: N/A.

Type of Review: Extension of a currently approved information collection.

Respondents: Business or other for-profit entities, state, local, or tribal government and not for profit institutions.

Number of Respondents: 110,782 respondents; 226,099 responses.

Estimated Time per Response: .25 to 1 hour.

Frequency of Response: One-time and on occasion reporting requirements; other reporting requirements—as-needed basis for equipment safety certification that is no longer in use, and consistently (likely daily) responses automated via the device.

Obligation To Respond: Required to obtain or retain benefits. Statutory authority for, these collections are contained in 47 U.S.C. 151, 152, 154(i), 154(j), 155(c), 302(a), 303, 304, 307(e), and 316 of the Communications Act of 1934.

Total Annual Burden: 64,561 hours.

Total Annual Cost: $13,213,975.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: The FCC adopted an Order on Reconsideration and Second Report and Order, FCC 16–55, that amends rules established in the First Report and Order, FCC 15–47, for commercial use of 150 megahertz in the 3550–3700 MHz (3.5 GHz) band and a new Citizens Broadband Radio Service, on April 28, 2016, published at 81 FR 49023 (July 26, 2016). The rule changes and information requirements contained in the First Report and Order are also approved under this Office of Management and Budget (OMB) control number and have not changed since they were last approved by OMB.

The Commission also received approval from OMB for the information collection requirements contained in FCC 16–55. The amendments contained in the Second Report and Order create additional capacity for wireless broadband by adopting a new approach to spectrum management to facilitate more intensive spectrum sharing between commercial and federal users and among multiple tiers of commercial users. The Spectrum Access System (SAS) will use the information to authorize and coordinate spectrum use for Citizen Broadband Radio Service Devices (CBSDs). The Commission will use the information to coordinate among the spectrum tiers and determine Protection Areas for Priority Access Licensees (PALs).

The following is a description of the information collection requirements for is approved under this collection:

Section 96.25(c)(1)(i) requires PALs to inform the SAS if a CBSD is no longer in use.

Section 96.25(c)(2)(i) creates a default protection contour for any CBSD at the outer limit of the PAL Protection Area, but allows a PAL to self-report a contour smaller than that established by the SAS.

These rules which contain information collection requirements are designed to provide for flexible use of this spectrum, while managing three tiers of users in the band, and create a low-cost entry point for a wide array of users. The rules will encourage innovation and investment in mobile broadband use in this spectrum while protecting incumbent users. Without this information, the Commission would not be able to carry out its statutory responsibilities.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0325]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before January 13, 2020. If you anticipate that you will be submitting comments but find it difficult to do so within the time period allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–0325.

Title: Section 80.605, U.S. Coast Guard Coordination.

Form No.: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 10 respondents and 10 responses.

Estimated Time per Response: 1.1 hours.

Frequency of Response: On occasion reporting requirement and Third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in Sections 4, 303, 307(e), 309, and 332, 48 Stat. 1066, as amended; 47 U.S.C. 154, 303, 307(e), 309, and 332, unless otherwise noted.

Total Annual Burden: 11 hours.

Annual Cost Burden: None.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: The information collection requirements contained in Section 80.605 are necessary because applicants are required to obtain written permission from the Coast Guard in the area where radio-navigation/radio-location devices are located. This rule insures that no hazard to marine navigation will result from the grant of applications for non-selectable transponders and shore based radio-navigation aids. The Coast Guard is responsible for making this determination under 14 U.S.C. 18. Section 308(b) of the Communications Act of 1934, as amended, 47 U.S.C. 308(b) mandates that the Commission have such facts before it to determine whether an application should be granted or denied. The potential hazard to navigation is a critical factor in determining whether this type of radio device should be authorized.

Federal Communications Commission.

Marlene Dortch,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1126]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before January 13, 2020. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *Nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1126.

Title: Testing and Logging Requirements for Wireless Emergency Alerts (WEA).

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for–profit entities.

Number of Respondents and Responses: 76 Participating CMS Providers; 429,020 Responses.

Estimated Time per Response: 0.000694 hours (2.5 seconds) to generate each alert log; 2 hours to respond to each request for alert log data or information about geo-targeting

Frequency of Response: Monthly and on occasion reporting requirements and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 152, 154(i) and (o), 301, 301(r), 303(v), 307, 309, 335, 403, 544(g), 606 and 615 of the Communications Act of 1934, as amended, as well as by sections 602(a), (b), (c), (f), 603, 604 and 606 of the WARN Act.

Total Annual Burden: 119,021 hours.

Total Annual Cost: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: Participating CMS Providers shall make available upon request to the Commission and FEMA, and to emergency management agencies that offer confidentiality protection at least equal to that provided in the federal Freedom of Information Act (FOIA) their alert logs and information about their approach to geo-targeting insofar as the information pertains to alerts initiated by that emergency management agency.

Federal Communications Commission.

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.'' The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before December 16, 2019. If you anticipate that you will be submitting comments but find it difficult to do so with the period of time allowed by this notice, you should advise the contacts listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, OMB, via email *Nicholas_A._Fraser@OMB.eop.gov;* and to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control No.: 3060–0262.

Title: Section 90.179, Shared Use of Radio Stations.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, non-for-profit institutions, and state, local and tribal government.

Number of Respondents and Responses: 43,000 respondents, 43,000 responses.

Estimated Time per Response: .25 up to .75 hours.

Frequency of Response: Recordkeeping requirement and On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 47 U.S.C. 154(i), 161, 303(g), 303(r) and 332(c)(7).

Total Annual Burden: 43,000 hours.

Annual Cost Burden: None.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: The Commission was directed by the United States Congress, in the Balanced Budget Act of 1997, to dedicate 2.4 MHz of electromagnetic spectrum in the 746–806 MHz band for public safety services. Section 90.179 requires that Part 90 licensees that share use of their private land mobile radio facility on non-profit, cost-sharing basis to prepare and keep a written sharing agreement as part of the station records. Regardless of the method of sharing, an up-to-date list of persons who are sharing the station and the basis of their eligibility under Part 90 must be maintained. The requirement is necessary to identify users of the system should interference problems develop. This information is used by the Commission to investigate interference complaints and resolve interference and operational complaints that may arise among the users.

OMB Control No.: 3060–0360.

Title: Section 80.409, Station Logs (Maritime Services).

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, not-for-profit institutions, and state, local and tribal government.

Number of Respondents: 19,214 respondents; 19,214 responses.

Estimated Time per Response: 27.3–95 hours.

Frequency of Response: Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 47 U.S.C. 151–155, 301–609.

Total Annual Burden: 538,082 hours.

Annual Cost Burden: None.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: The Commission will submit this extension (no change in the recordkeeping requirement) to the OMB to obtain the full three-year clearance from them. The information collection requirements are as follows:

Section 80.409(c), Public Coast Station Logs: This requirement is necessary to document the operation and public correspondence of public coast radio telegraph, public coast radiotelephone stations, and Alaska public-fixed stations, including the logging of distress and safety calls where applicable. Entries must be made giving details of all work performed which may affect the proper operation of the station. Logs must be retained by the licensee for a period of two years from the date of entry, and, where applicable, for such additional periods such as logs relating to a distress situation or disaster must be retained for three years from the date of entry in the log. If the Commission has notified the licensee of an investigation, the related logs must be retained until the licensee is specifically authorized in writing to destroy them. Logs relating to any claim or complaint of which the station licensee has notice must be retained until the claim or complaint has been satisfied or barred by statute limiting the time for filing suits upon such claims.

Section 80.409(d), Ship Radiotelegraph Logs: Logs of ship stations which are compulsorily equipped for radiotelegraphy and operating in the band 90 to 535 kHz must contain specific information in log entries according to this subsection.

Section 80.409(e), Ship Radiotelephone Logs: Logs of ship stations which are compulsorily equipped for radiotelephony must contain specific information in applicable log entries and the time of their occurrence.

The recordkeeping requirements contained in section 80.409 is necessary to document the operation and public correspondence service of public coast radiotelegraph, public coast radiotelephone stations and Alaska-public fixed stations, ship radiotelegraph, ship radiotelephone and applicable radiotelephone including the logging of distress and safety calls where applicable.

OMB Control Number: 3060–0653.

Title: Sections 64.703(b) and (c), Consumer Information—Posting by Aggregators.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 56,075 respondents; 5,339,038 responses.

Estimated Time per Response: .017 hours (1 minute) to 3 hours.

Frequency of Response: On occasion reporting requirements; Third party disclosure.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is found at section 226 [47 U.S.C. 226] Telephone Operator Services codified at 47 CFR 64.703(b) Consumer Information.

Total Annual Burden: 174,401 hours.

Total Annual Cost: $1,446,340.

Privacy Act Impact Assessment: An assurance of confidentiality is not offered because this information collection does not require the collection of personally identifiable information (PII) from individuals.

Nature and Extent of Confidentiality: No impact(s).

Needs and Uses: The information collection requirements included under this OMB Control Number 3060–0653, requires aggregators (providers of telephones to the public or to transient users of their premises) under 47 U.S.C. 226(c)(1)(A), 47 CFR 64.703(b) of the Commission's rules, to post in writing, on or near such phones, information about the pre-subscribed operator services, rates, carrier access, and the FCC address to which consumers may direct complaints.

Section 64.703(c) of the Commission's rules requires the posted consumer information to be added when an aggregator has changed the pre-subscribed operator service provider (OSP) no later than 30 days following such change. Consumers will use this information to determine whether they wish to use the services of the identified OSP.

OMB Control Number: 3060–0754.

Title: FCC Form 2100, Application for Media Bureau Audio and Video Service Authorization, Schedule H.

Form Number: FCC Form 2100, Schedule H.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for profit entities.

Number of Respondents: 1,758 respondents; 1,758 responses.

Estimated Time per Response: 10 hours.

Frequency of Response: Recordkeeping requirement: Annual reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in Sections 154(i) and 303 of the Communications Act of 1934, as amended.

Total Annual Burden: 17,580 hours.

Total Annual Cost: $1,054,800.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with respect to this collection of information.

Needs and Uses: Commercial full-power and Class A television broadcast stations are required to file FCC Form 2100, Schedule H (formerly FCC Form 398) (Children's Television Programming Report) within 30 days after the end of each calendar year. FCC Form 2100, Schedule H is a standardized form that: (a) Provides a consistent format for reporting the children's educational television programming aired by licensees to meet their obligation under the Children's Television Act of 1990 (CTA), and (b) facilitates efforts by the public and the FCC to monitor compliance with the CTA.

Commercial full-power and Class A television stations are required to complete FCC Form 2100, Schedule H within 30 days after the end of each calendar year and file the form with the Commission. The Commission places the form in the station's online public inspection file maintained on the Commission's database (*www.fcc.gov*). Stations use FCC Form 2100, Schedule H to report, among other things, the Core Programming (*i.e.,* children's educational and informational programming) the station aired the previous calendar year. FCC Form 2100, Schedule H also includes a ''Preemption Report'' that must be completed for each Core Program that was preempted during the year. This ''Preemption Report'' requests information on the reason for the preemption, the date of each preemption, the reason for the preemption and, if the program was rescheduled, the date and time the program was re-aired.

On July 10, 2019, the Commission adopted a Report and Order in MB Docket Nos. 18–202 and 17–105, FCC 19–67, In the Matter of Children's Television Programming Rules; Modernization of Media Regulation Initiative, which modernizes the children's television programming rules in light of changes to the media landscape that have occurred since the rules were first adopted. Among other revisions, the Report and Order revises the children's television programming rules to expand the Core Programming hours to 6:00 a.m. to 10:00 p.m.; modify the safe harbor processing guidelines for determining compliance with the children's programming rules; require that broadcast stations air the substantial majority of their Core Programming on their primary program streams, but permit broadcast stations to air up to 13 hours per quarter of regularly scheduled weekly programming on a multicast stream; eliminate the additional processing guideline applicable to stations that multicast; and modify the rules governing preemption of Core Programming. In addition, the Report and Order revises the children's television programming reporting requirements by requiring that Children's Television Programming Reports (FCC Form 2100, Schedule H) be filed on an annual rather than quarterly basis, within 30 days after the end of the calendar year; eliminating the requirements that the reports include information describing the educational and informational purpose of each Core Program aired during the current reporting period and each Core Program that the licensee expects to air during the next reporting period; eliminating the requirement to identify the program guide publishers who were sent information regarding the licensee's Core Programs; and streamlining the form by eliminating certain fields. The Report and Order also eliminates the requirement to publicize the Children's Television Programming Reports. The Report and Order directs the Media Bureau to make modifications to FCC Form 2100, Schedule H as needed to conform the form with the revisions to the children's programming rules, including the changes to the processing guidelines and preemption policies.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1013]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents,

including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before January 13, 2020. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *Nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–1013.

Title: Mitigation of Orbital Debris.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 10 respondents; 10 responses.

Estimated Time per Response: 3 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i), 301, 303, 308, 309 and 310.

Total Annual Burden: 30 hours.

Annual Cost Burden: $19,250.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general, there is no need for confidentiality with this collection of information.

Needs and Uses: This collection will be submitted to the Office of Management and Budget (OMB) as an extension after this 60-day comment period has ended in order to obtain the full three-year clearance from OMB.

Orbital debris consists of artificial objects orbiting the Earth that are not functional spacecraft. It consists of a wide range of non-functioning man-made objects that have been placed in the Earth's orbit, both accidentally and on purpose. Orbital debris consists of small objects such as paint flakes, discarded lens caps, ejected bolts and pieces of debris from exploded spacecraft and rocket bodies. Since human activity in space began, there has been a steady growth in the number and total mass of orbital debris. Once created, debris remains in orbit indefinitely, absent other forces. Growth in the orbital debris population may limit the usefulness of space for communications and other uses in the future by raising the costs and lowering the reliability of space based systems. Furthermore, the effects of collisions involving orbital debris can be catastrophic and may cause significant damage to functional spacecraft or to persons or property on the surface of the Earth, if the debris re-enters the Earth's atmosphere in an uncontrolled manner.

The information collection requirements accounted for in this collection are necessary to mitigate the potential harmful effects of orbital debris accumulation. Without such information collection requirements, the growth in the orbital debris population may limit the usefulness of space for communications and other uses in the future by raising the costs and lowering the reliability of experimental and amateur systems. Furthermore, the effects of collisions involving orbital debris can be catastrophic and may cause significant damage to functional spacecraft or to persons or property on the surface of the Earth, if the debris re-enters the Earth's atmosphere in an uncontrolled manner.

Federal Communications Commission.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 163 respondents; 163 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The Commission has authority for this information collection pursuant to 47 U.S.C. 154(i) of the Communications Act of 1934, as amended.

Total Annual Burden: 163 hours.

Annual Cost Burden: $48,900.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general, there is no need for confidentiality.

Needs and Uses: This collection will be submitted to the Office of Management and Budget (OMB) as an extension after this 60 day comment period has ended in order to obtain the full three-year clearance from OMB.

Without this collection of information, the Commission would not have critical information such as a change in a controlling interest in the ownership of the licensee. The Commission would not be able to carry out its duties under the Communications Act and to determine the qualifications of applicants to provide international telecommunications service, including applicants that are affiliated with foreign entities, and to determine whether and under what conditions the authorizations are in the public interest, convenience, and necessity. Furthermore, without this collection of information, the Commission would not be able to maintain effective oversight of U.S. providers of international telecommunications services that are affiliated with, or involved in certain co-marketing or similar arrangements with, foreign entities that have market power.

Federal Communications Commission.

Marlene Dortch,

Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0816]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before January 13, 2020. If you anticipate that you will be submitting comments but find it difficult to do so within the time period allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0816.

Title: Local Telephone Competition and Broadband Reporting, Report and Order, FCC Form 477, (WC Docket No. 19–195, WC Docket No, 11–10, FCC 19–79).

Form Number: FCC Form 477.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities; not-for-profit institutions; and state, local, or tribal governments.

Number of Respondents and Responses: 2,515 respondents; 5,030 responses.

Estimated Time per Response: 387 hours (average).

Frequency of Response: Semi-annual reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 4(i), 201, 218–220, 251–252, 271, 303(r), 332, and 403 of the Communications Act of 1934, as amended, and in section 706 of the Telecommunications Act of 1996, as amended, codified in section 1302 of the Broadband Data Improvement Act, 47 U.S.C. 1302.

Total Annual Burden: 1,946,610 hours.

Total Annual Cost: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: The Commission will no longer treat as confidential service providers' minimum advertised or expected speed data for mobile broadband services. Thus, provider-specific coverage data will be publicly released for all subsequent Form 477 filings. This action is necessary to ensure that consumers can easily use the information that is disclosed to the public, including minimum advertised or expected speed data, because such information is only beneficial if consumers know where service coverage is available.

Needs and Uses: After the 60-day comment period expires, the Commission will submit the revised information collection to the Office of Management and Budget (OMB) to obtain a full three-year clearance.

The revisions to the information collection are necessitated by a Report and Order in WC Docket Nos. 19–195 and 11–10, FCC 19–79, adopted on August 1, 2019. In this Order, the Commission makes targeted changes to the existing Form 477 data collection to reduce reporting burdens for all filers and incorporate new technologies.

The Order adopts the 5G–NR (New Radio) technology standards developed by the 3rd Generation Partnership Project (3GPP) with Release 15 and requires providers to submit 5G deployment data that meet the specifications of Release 15 (or any successor release that may be adopted by the Commission's Bureaus). The *Order* also requires mobile providers to submit broadband and voice subscriber data at the census-tract level based on the subscriber's place of primary use for postpaid subscribers and based on the subscriber's telephone number for prepaid and resold subscribers. These changes are necessary because the deployment data collected on Form 477 are no longer sufficient for targeting universal service funds. The actions to improve the Form 477 data collection are designed to increase the usefulness of the information to the Commission, Congress, the industry, and the public.

The Order reduces the burden on broadband providers by removing the requirement that facilities-based providers submit separate coverage maps depicting their broadband network coverage areas for each transmission technology and each frequency band. It also modifies the requirement that mobile broadband providers report coverage information for each technology deployed in their networks by reducing the number of categories from nine to four. The Order eliminates the requirement that facilities-based providers submit a list of census tracts in which the provider advertises its mobile wireless broadband service and in which the service is available to actual and potential subscribers. Finally, the Order removes the requirement that fixed providers offering business/enterprise/government services to report the maximum downstream and upstream contractual or guaranteed data throughput rate (committed information rate) available in each reported census block.

As part of these revisions to the Form 477 data collection, the Commission is requesting approval of certain changes to the form and the related instructions. These changes are necessary to streamline the filing process, implement revisions to the data collection, eliminate burdensome filings requirements, and increase the usefulness of the information to the Commission, Congress, the industry, and the public.

Federal Communications Commission.

Marlene Dortch,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0250]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before January 13, 2020. If you anticipate that you will be submitting comments but find it difficult to do so within the time period allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0250.

Title: Sections 73.1207, 74.784 and 74.1284, Rebroadcasts.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions; State, local or tribal government.

Number of Respondents and Responses: 6,462 respondents; 11,012 responses.

Estimated Time per Response: 0.50 hours.

Frequency of Response: Recordkeeping requirement; on occasion reporting requirement; semi-annual reporting requirement; third party disclosure requirement.

Total Annual Burden: 5,506 hours.

Total Annual Costs: None.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in Sections 154(i) and 325(a) of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality with this information collection.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: The information collection requirements contained in 47 CFR 73.1207 require that licensees of broadcast stations obtain written permission from an originating station prior to retransmitting any program or any part thereof. A copy of the written consent must be kept in the station's files and made available to the FCC upon request. Section 73.1207 also specifies procedures that broadcast stations must follow when rebroadcasting time signals, weather bulletins, or other material from non-broadcast services.

The information collection requirements contained in 47 CFR 74.784(b) require that a licensee of a low power television or TV translator station shall not rebroadcast the programs of any other TV broadcast station without obtaining prior consent of the station whose signals or programs are proposed to be retransmitted. Section 74.784(b) requires licensees of low power television and TV translator stations to notify the Commission when rebroadcasting programs or signals of another station. This notification shall include the call letters of each station rebroadcast. The licensee of the low power television or TV translator station shall certify that written consent has been obtained from the licensee of the station whose programs are retransmitted.

* 10771 Lastly, the information collection requirements contained in 47 CFR 74.1284 require that the licensee of a FM translator station obtain prior consent to rebroadcast programs of any broadcast station or other FM translator. The licensee of the FM translator station must notify the Commission of the call letters of each station rebroadcast and must certify that written consent has been received from the licensee of that station. Also, AM stations are allowed to use FM translator stations to rebroadcast the AM signal.

Federal Communications Commission.

Marlene Dortch,

Secretary.

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Sunshine Act Meeting

Pursuant to the provisions of the ''Government in the Sunshine Act'' (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10:00 a.m. on Tuesday, November 19, 2019, to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of Minutes of a Board of Directors' Meeting Previously Distributed.

Memorandum and resolution re: Regulatory Capital Rule: Revisions to the Supplementary Leverage Ratio to Exclude Certain Central Bank Deposits of Banking Organizations Predominantly Engaged in Custody, Safekeeping and Asset Servicing Activities.

Memorandum and resolution re: Regulatory Capital Treatment for High Volatility Commercial Real Estate (''HVCRE'') Exposures.

Memorandum and resolution re: Final Rule Removing Transferred OTS Regulation, Part 390 Subpart M—Deposits.

Memorandum and resolution re: Notice of Final Rulemaking Re: The Use and Remittance of Certain Assessment Credits.

Memorandum and resolution re: Establishment of the FDIC Advisory Committee of State Regulators.

Reports of actions taken pursuant to authority delegated by the Board of Directors and reports of the Office of Inspector General.

Discussion Agenda

Memorandum and resolution re: Regulatory Capital Rule: Standardized Approach for Calculating the Exposure Amount of Derivative Contracts.

Memorandum and resolution re: Notice of Proposed Rulemaking on Conversion of the Statement of Policy for Section 19 of the Federal Deposit Insurance Act to a Regulation.

Memorandum and resolution re: Notice of Proposed Rulemaking on Federal Interest Rate Authority.

The meeting will be held in the Board Room located on the sixth floor of the FDIC Building located at 550 17th Street NW, Washington, DC.

This Board meeting will be Webcast live via the internet and subsequently made available on-demand approximately one week after the event. Visit *http://fdic.windrosemedia.com* to view the live event. Visit *http://fdic.windrosemedia.com/index.php?category=FDIC+Board+Meetings* after the meeting. If you need any technical assistance, please visit our Video Help page at: *https://www.fdic.gov/video.html.*

The FDIC will provide attendees with auxiliary aids (*e.g.,* sign language interpretation) required for this meeting. Those attendees needing such assistance should call 703–562–2404 (Voice) or 703–649–4354 (Video Phone) to make necessary arrangements.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Executive Secretary of the Corporation, at 202–898–7043.

Dated at Washington, DC, on November 12, 2019.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

BILLING CODE 6714–01–P

FEDERAL ELECTION COMMISSION

Sunshine Act Meeting

TIME AND DATE: Tuesday, November 19, 2019 at 10:00 a.m.

PLACE: 1050 First Street NE, Washington, DC.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Compliance matters pursuant to 52 U.S.C. 30109.

Matters relating to internal personnel decisions, or internal rules and practices.

Investigatory records compiled for law enforcement purposes and production would disclose investigative techniques.

Information the premature disclosure of which would be likely to have a considerable adverse effect on the implementation of a proposed Commission action.

Matters concerning participation in civil actions or proceedings or arbitration.

* * * * *

CONTACT PERSON FOR MORE INFORMATION: Judith Ingram, Press Officer, Telephone: (202) 694–1220.

Vicktoria J. Allen,

Acting Deputy Secretary of the Commission.

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments on the agreements to the Secretary by email at *Secretary@fmc.gov,* or by mail, Federal Maritime Commission, Washington, DC 20573, within twelve days of the date this notice appears in the **Federal Register**. Copies of agreements are available through the Commission's website (*www.fmc.gov*) or by contacting the Office of Agreements at (202)–523–5793 or *tradeanalysis@fmc.gov.*

Agreement No.: 201323.

Agreement Name: Hoegh/Hyundai Glovis Global Space Charter Agreement.

Parties: Hoegh Autoliners AS and Hyundai Glovis Co., Ltd.

Filing Party: Wayne Rohde; Cozen O'Connor.

Synopsis: The Agreement authorizes the parties to charter space to/from one another on an ''as needed/as available'' basis in the trade between all ports in the United States and all ports and points worldwide.

Proposed Effective Date: 12/21/2019.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/24444.

Agreement No.: 201234–003.

Agreement Name: Agreement by Ocean Common Carriers to Participate on the Exchange Board.

Parties: CMA CGM S.A.; COSCO Shipping Co., Ltd.; COSCO Shipping Lines Co., Ltd.; Hapag Lloyd AG; Hyundai Merchant Marine Co., Ltd.; Maersk Line A/S; Ocean Network Express Pte. Ltd.; and Pacific International Lines (PTE) Ltd.

Filing Party: Ashley Craig and Elizabeth Lowe; Venable LLP.

Synopsis: The amendment adds ONE and PIL as parties to the Agreement.

Proposed Effective Date: 12/19/2019.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/2064.

Agreement No.: 201235–003.

Agreement Name: Agreement by Ocean Common Carriers to Use Standard Service Contract Terms.

Parties: CMA CGM S.A.; COSCO Shipping Co., Ltd.; COSCO Shipping Lines Co., Ltd.; Hapag Lloyd AG; Hyundai Merchant Marine Co., Ltd.; Maersk Line A/S; Ocean Network Express Pte. Ltd.; Orient Overseas Container Line Limited; OOCL (Europe) Limited; and Pacific International Lines (PTE) Ltd.

Filing Party: Ashley Craig and Elizabeth Lowe; Venable LLP.

Synopsis: The amendment adds ONE and PIL as parties to the Agreement.

Proposed Effective Date: 12/19/2019.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/2065.

Dated: November 8, 2019.

Rachel E. Dickon,

Secretary.

BILLING CODE 6731–AA–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments regarding each of these applications must be received at the Federal Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than November 27, 2019.

A. Federal Reserve Bank of Kansas City (Dennis Denney, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198–0001:

1. *BF Bank Partners LP and Main Street Banking Partners LP, both of Oklahoma City, Oklahoma;* as members acting in concert with the Rainbolt Family Control Group, to acquire voting shares of BancFirst Corporation and thereby indirectly acquire voting shares of BancFirst, both of Oklahoma City, Oklahoma, and Pegasus Bank, Dallas, Texas. The individuals who serve as the general partners of BF Bank Partners LP and Main Street Banking Partners LP, David E. Rainbolt and Leslie J. Rainbolt, respectively, both of Oklahoma City, Oklahoma, were previously approved under the Act and Regulation Y to acquire the voting shares that are the subject of this notice.

2. *The Commerce Bank and Trust Holding Company Employee Stock Ownership Plan, David S. Frick as Plan Administrator, both of Topeka, Kansas;* to acquire voting shares of Commerce Bank and Trust Holding Company and thereby indirectly acquire voting shares of CoreFirst Bank & Trust, both of Topeka, Kansas.

B. Federal Reserve Bank of St. Louis (David L. Hubbard, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166–2034. Comments can also be sent electronically to *Comments.applications@stls.frb.org:*

1. *Charles S. Penick, individually, and together with the Charles S. Penick Mary Michele Penick Revocable Trust, Charles S. Penick and Mary Michele Penick as co-trustees; the M. Michele Penick Irrevocable Trust, Mary Michele Penick, trustee; Mary Michele Penick; Mary Reese Fisher; and Ella Bleu Fisher, all of Morrilton, Arkansas; Edward M. Penick; George Penick; and Diane L. Tait, all of Little Rock, Arkansas; Megan Penick Voss; Beau Steven Voss; and Finlee Dru Voss, all of Solgohachia, Arkansas; and Mollie Penick Tanner, Rison, Arkansas;* as members of a group acting in concert to retain voting shares of Petit Jean Bancshares, Inc., and thereby indirectly retain voting shares of Petit Jean State Bank, both of Morrilton, Arkansas.

C. Federal Reserve Bank of San Francisco (Gerald C. Tsai, Director, Applications and Enforcement) 101 Market Street, San Francisco, California 94105–1579:

1. *Berkshire Hathaway, Inc., Wellfleet New York Insurance Company, Berkshire Hathaway Assurance Corporation, Berkshire Hathaway Homestate Insurance Company, Berkshire Hathaway International Insurance Ltd, Berkshire Hathaway Life Insurance Company of Nebraska, Berkshire Hathaway Specialty Insurance Company, BH Finance LLC, BHG Life Insurance Company, California Insurance Company, Central States Indemnity Company of Omaha, Columbia Insurance Company, Continental Indemnity Company, Cypress Insurance Company, Finial Reinsurance Company, First Berkshire Hathaway Life Insurance Company, National Fire & Marine Insurance Company, National Indemnity Company, National Liability & Fire Insurance Company, National Indemnity Company of Mid America, National Indemnity Company of the South, NRG America Holding Company, and Oak River Insurance Company, all of Omaha, Nebraska; Am GUARD Insurance Company and NorGUARD Insurance Company, both of Wilkes-Barre, Pennsylvania; Government Employees Insurance Company, GEICO Indemnity Company, and GEICO Marine Insurance Company, all of Chevy Chase, Maryland; General Re Life Corporation, General Reinsurance Corporation, General Star Indemnity Company, General Star National Insurance Company, and Genesis Insurance Company, all of Stamford, Connecticut; Medical Protective Company and Princeton Insurance Company, both of Ft. Wayne, Indiana; Mt. Vernon Fire Insurance Company and United States Liability Insurance Company, both of Wayne, Pennsylvania; and Old United Casualty Company, Merriam, Kansas;* to retain over 10 percent, and to acquire up to 24.99 percent, of the voting shares of Bank of America Corporation, Charlotte, North Carolina, and thereby indirectly retain and acquire voting shares of Bank of America, National Association, Charlotte, North Carolina and Bank of America California, National Association, San Francisco, California.

Board of Governors of the Federal Reserve System, November 8, 2019.

Michele Taylor Fennell,

Assistant Secretary of the Board.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–20–19ACI]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled Sealant Efficiency Assessment for Locals and States (SEALS) to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on April 8, 2019 to obtain comments from the public and affected agencies. CDC did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570 or send an email to *omb@cdc.gov.* Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Sealant Efficiency Assessment for Locals and States (SEALS)—Existing Collection in use without an OMB Control Number—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

By age 19, 67% of U.S. adolescents living in poverty have experienced tooth decay and 27% have at least one decayed tooth needing treatment. School sealant programs (SSP) provide dental sealants, which protect against 80% of cavities for two years, and continue to protect against 50% of cavities for up to four years.

Little is known about school sealant program delivery logistics, resource costs, or the quantity of resources used per unit of service or per averted cavity. The previously mentioned economic model on the cost-effectiveness of SSPs could find no recent studies on SSP cost in the U.S. and relied on the findings from four studies, all published before 2001. A systematic review of economic evaluations of SSPs conducted further found wide variation in reported cost per child, ranging from $33 to $163. Information on the cost and efficiency of SSPs could help these programs become more efficient and provide more services per dollar in their budget.

CDC requests information from states regarding children's cavity risk, one-year sealant retention rate, sealant program services delivered, and school sealant program cost and quantity of resources used at each school event. This data will allow CDC and states to monitor the performance and efficiency of their SSPs, which will improve and extend program delivery to more children.

At the beginning of each school year, SSPs electronically enter a list of schools they plan to serve (Add Schools), information about their program delivery logistics (Program Options), and per unit resource costs (Cost Options). Data from the previous funding period suggest that one SSP typically serves 20 schools. At each school event, SSPs enter information about resource use, children's risk for tooth decay, and delivered services (Add Event). Information collected at each school can be entered electronically onsite, or collected on paper form and entered electronically at a later date. At the end of the school year, SSPs enter administrative costs (*e.g.,* office supplies, rent, computers) electronically, and within nine to 15 months after first visiting the school, they enter information about sealant retention. Effectiveness of resin-based sealants is directly tied to retention, in that a retained sealant is 100% effective at preventing cavities. Because of this, many SSPs sample a few children for retention when they visit the school the next year to deliver services to new students.

CDC proposes to conduct a benchmarking analysis to identify the set of efficient SSPs and factors/practices associated with efficiency. Findings from the CDC benchmarking analyses will be submitted for publication in peer-reviewed journals and presented at the National Oral Health Conference. Findings will also be shared with the Association of State and Territorial Dental Directors (ASTDD), the oral health divisions in HRSA and CMS, and the National Institutes of Dental and Craniofacial Research. This information will inform entities considering implementing SSPs; assist local SSPs and state oral health departments to monitor efficiency and impact; identify best practices; and document if and how SSPs are a good investment of public health dollars.

CDC requests OMB clearance for three years. The total estimated annualized burden hours is 1,388. There are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
State Sealant Administrator	Add Program and Add User	18	1	45/60
SSP Local Administrator	Add User and Add School	162	1	43/60
	Program Options and Cost Options	162	1	46/60
	Add Event	162	20	21/60

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Scientific Integrity, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–367a–d and CMS–10400]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by *December 16, 2019.*

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395–5806 *OR* Email: *OIRA_submission@omb.eop.gov.*

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at website address at *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html.*

1. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

2. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Medicaid Drug Program; *Use:* Labelers transmit drug product and pricing data to CMS within 30 days after the end of each calendar month and quarter. CMS calculates the unit rebate amount (URA) and the unit rebate offset amount (UROA) for each new drug application (NDC) and distributes to all State Medicaid agencies. States use the URA to invoice the labeler for rebates and the UROA to report onto CMS–64. The monthly data is used to calculate Federal Upper Limit (FUL) prices for applicable drugs and for states that opt to use this data to establish their pharmacy reimbursement methodology. *Form Number:* CMS–367a, b, c, and d (OMB control number: 0938–0578); *Frequency:* Monthly, quarterly, and on occasion; *Affected Public:* Private sector (Business or other for-profits); *Number of Respondents:* 743; *Total Annual Responses:* 14,117; *Total Annual Hours:* 219,185. (For policy questions regarding this collection contact Andrea Wellington at 410–786–3490.)

2. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Establishment of Exchanges and Qualified Health Plans; *Use:* The Patient Protection and Affordable Care Act (Pub. L. 111–148) and the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152) (collectively, the Patient Protection and Affordable Care Act (PPACA)) were signed into law in 2010. The PPACA established competitive private health insurance markets, called Marketplaces or Exchanges, which give millions of Americans and small businesses access to qualified health plans (QHPs), including stand-alone dental plans (SADPs)—private health and dental insurance plans that are certified as meeting certain standards.

As directed by the rule Establishment of Exchanges and Qualified Health Plans; Exchange Standards for Employers (77 FR 18310) (Exchange rule), each Exchange assumed responsibilities related to the certification and offering of QHPs. Under 45 CFR 156.280(e)(5)(ii), each QHP issuer that offers non-excepted abortion services must submit to the State Insurance Commissioner a segregation plan describing how the QHP issuer establishes and maintains separate payment accounts for any QHP covering non-excepted abortion services, and pursuant to § 156.280(e)(5)(iii), each QHP issuer must annually attest to compliance with PPACA section 1303 and applicable regulations. This segregation plan is used to verify that the QHP issuer's financial and other systems fully conform to the segregation requirements required by the PPACA. *Form Number:* CMS–10400 (OMB control number 0938–1156); *Frequency:* Annually; *Affected Public:* Private Sector (business or other for-profits, not-for-profit institutions); *Number of Respondents:* 210; *Number of Responses:* 210; *Total Annual Hours:* 580. For questions regarding this collection contact Michele Oshman at 410–786–4396.

Dated: November 8, 2019.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10466 and 10714]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 13, 2020.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number _____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at website address at *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10466 Patient Protection and Affordable Care Act; Exchange Functions: Eligibility for Exemptions

CMS–10714 Electronic Medical Documentation Interoperability (EMDI) Pre and Post Pilot Measures Survey

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Patient Protection and Affordable Care Act; Exchange Functions: Eligibility for Exemptions; *Use:* The data collection and reporting requirements in ''Patient Protection and Affordable Care Act; Exchange Functions: Eligibility for Exemptions; Miscellaneous Minimum Essential Coverage Provisions'' (78 FR 39494—July 1, 2013)), address federal requirements that states must meet with regard to the Exchange minimum function of performing eligibility determinations and issuing certificates of exemption from the shared responsibility payment. In the final regulation, CMS addresses standards related to eligibility, including the verification and eligibility determination process, eligibility redeterminations, options for states to rely on HHS to make eligibility determinations for certificates of exemption, and reporting. *Form Number:* CMS–10466 (OMB control number: 0938–1190); *Frequency:* Occasionally; *Affected Public:* Private Sector (Businesses or other for-profits); *Number of Respondents:* 45,060; *Total Annual Responses:* 45,060; *Total Annual Hours:* 12,150. For policy questions regarding this collection contact Katherine Bentley at 301–492–5209.

2. *Type of Information Collection Request:* New Collection; *Title of Information Collection:* Electronic Medical Documentation Interoperability (EMDI) Pre and Post Pilot Measures Survey; *Use:* The EMDI program assists the Centers for Medicare & Medicaid Services (CMS) Health Information Technology (health IT) standards and interoperability (S&I) initiative, which is to: (1) Facilitate and expand the secure transport of interoperable electronic documentation, (2) utilize and fill in the gaps in the current standards to achieve increased level of interoperability among systems and organizations, and (3) demonstrate the utility of these standards by establishing pilot programs with existing Health Information Handlers, Health Information Service Providers (HISP), and health care providers.

The EMDI Initiative, associated documentation, and pilots are for the purposes of evaluating the performance of CMS policies that involve interoperability and the collection of data/information only. The collected data/information will help CMS, and the EMDI team in determining the overall effectiveness of piloting the EMDI program, as well as assessing each provider's current ability to send, and receive electronic data. *Form Number:* CMS–10714 (OMB control number: 0938-New); *Frequency:* Yearly; *Affected Public:* Private Sector (Business or other for-profit, not-for-profit institutions); *Number of Respondents:* 240; *Total Annual Responses:* 240; *Total Annual*

Hours: 120. For policy questions regarding this collection contact Christopher Lofts at 410–786–4076.

Dated: November 8, 2019.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2019–N–4900]

Patient-Focused Drug Development Guidance: Incorporating Clinical Outcome Assessments Into Endpoints for Regulatory Decision Making; Public Workshop; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop; request for comments.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing a public workshop to convene a discussion on incorporating clinical outcome assessments (COAs) into endpoints for regulatory decision making. This workshop will inform development of patient-focused drug development guidance as required by the 21st Century Cures Act (Cures Act) and as part of commitments made by FDA under the sixth authorization of the Prescription Drug User Fee Amendments (PDUFA VI). The Agency will publish a discussion document approximately 1 month before the workshop date. FDA is interested in seeking information and comments on the approaches proposed in the discussion document, as well as input on examples that could be illustrated in the forthcoming draft guidance, where approaches proposed in the discussion document have been successfully applied.

DATES: The public workshop will be held on December 6, 2019, from 9 a.m. to 5 p.m. Submit either electronic or written comments on this public workshop by February 4, 2020. See the **SUPPLEMENTARY INFORMATION** section for registration date and information.

ADDRESSES: The public workshop will be held at FDA's White Oak Campus, 10903 New Hampshire Ave., Bldg. 31 Conference Center, the Great Room (Rm. 1503), Silver Spring, MD 20993. Entrance for the public workshop participants (non-FDA employees) is through Building 1 where routine security check procedures will be performed. For parking and security information, please refer to *https://www.fda.gov/AboutFDA/WorkingatFDA/BuildingsandFacilities/WhiteOakCampusInformation/ucm241740.htm.*

You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before February 4, 2020. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of February 4, 2020. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2019–N–4900 for ''Patient-Focused Drug Development Guidance: Incorporating Clinical Outcome Assessments into Endpoints for Regulatory Decision Making; Public Workshop; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Meghana Chalasani, Center for Drug Evaluation and Research, Food and

Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6304, Silver Spring, MD 20993–0002, 240–402–6525, Fax: 301–847–8443, *meghana.chalasani@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

This public workshop is intended to support FDA implementation of requirements for guidance development under section 3002 of the Cures Act (Pub. L. 114–255) and to meet a performance goal included in PDUFA VI. Section 3002 of Title III, Subtitle A of the Cures Act directs FDA to develop patient-focused drug development guidance to address a number of areas, including methodologies, standards, and technologies to collect and analyze COA data for purposes of regulatory decision-making.

In addition, FDA committed to meet certain performance goals under PDUFA VI. This reauthorization, part of the FDA Reauthorization Act of 2017 (Pub. L. 115–52), signed by President Trump on August 18, 2017, includes a number of performance goals and procedures that are documented in the PDUFA VI Commitment Letter, which is available at *https://www.fda.gov/downloads/ForIndustry/UserFees/PrescriptionDrugUserFee/UCM511438.pdf.*

These goal commitments were developed in consultation with patient and consumer advocates, healthcare professionals, and other public stakeholders, as part of negotiations with regulated industry. Section J.1 of the commitment letter, ''Enhancing the Incorporation of the Patient's Voice in Drug Development and Decision-Making,'' (*https://www.fda.gov/downloads/ForIndustry/UserFees/PrescriptionDrugUserFee/UCM511438.pdf*) outlines work, including the development of a series of guidance documents and associated public workshops to facilitate the advancement and use of systematic approaches to collect and utilize robust and meaningful patient and caregiver input that can more consistently inform drug development, and, as appropriate, regulatory decision making.

Prior to the issuance of each guidance, as part of the development, FDA will conduct a public workshop to gather input from the wider community of patients, patient advocates, academic researchers, expert practitioners, drug developers, and other stakeholders.

II. Topics for Discussion at the Public Workshop

During the public workshop, speakers and participants will address a range of issues and considerations related to incorporating COAs into endpoints for regulatory decision-making. The range of issues and considerations includes: (1) Endpoint development; (2) estimands and analysis models; (3) addressing heterogeneity in disease symptoms and functional status between patients and within the same patient over time; and (4) data collection, storage, transmission, and analysis.

III. Participating in the Public Workshop

Registration: Interested parties are encouraged to register early. To register electronically, please visit *https://patientfocuseddrugdevelopment.eventbrite.com.* Registration for in-person attendance will close on December 3, 2019. Registration for the webcast will remain open until the day of the workshop. Persons without access to the internet can call 301–796–0621 to register. If you are unable to attend the workshop in person, you can register to view a live webcast of the workshop. You will be asked to indicate in your registration if you plan to attend in person or via the webcast. Seating will be limited, so early registration is recommended.

Registration is free. FDA may limit the number of participants from each organization based on space limitations. Registrants will receive confirmation once they have been accepted. Onsite registration on the day of the workshop will be based on space availability.

If you need special accommodations due to a disability, please contact Meghana Chalasani (see **FOR FURTHER INFORMATION CONTACT**) at least 7 days before the workshop.

Requests for Oral Presentations: There will be time allotted during the workshop for open public comment. Sign-up for this session will be on a first-come, first-served basis on the day of the workshop. Individuals and organizations with common interests are urged to consolidate or coordinate, and request time for a joint presentation. No commercial or promotional material will be permitted to be presented or distributed at the public workshop.

Streaming Webcast of the Public Workshop: This public workshop will also be webcast at *https://collaboration.fda.gov/pfddg123119/.* If you have never attended a Connect Pro event before, test your connection at *https://collaboration.fda.gov/common/help/en/support/meeting_test.htm.* To get a quick overview of the Connect Pro program, visit *https://www.adobe.com/go/connectpro_overview.* FDA has verified the website addresses in this document, as of the date this document publishes in the **Federal Register**, but websites are subject to change over time.

Transcripts: Please be advised that as soon as a transcript of the public workshop is available, it will be accessible at *https://www.regulations.gov.* It may be viewed at the Dockets Management Staff (see **ADDRESSES**). A link to the transcript will also be available on the internet at *https://www.fda.gov/drugs/news-events-human-drugs/patient-focused-drug-development-guidance-collection-and-analysis-clinical-outcome-assessment-data.*

Dated: November 8, 2019.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

Food and Drug Administration

[Docket No. FDA–2018–D–2310]

Process To Request a Review of Food and Drug Administration's Decision Not To Issue Certain Export Certificates for Devices; Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a final guidance entitled ''Process to Request a Review of FDA's Decision Not to Issue Certain Export Certificates for Devices.'' FDA is issuing this guidance to comply with changes to the Federal Food, Drug, and Cosmetic Act (FD&C Act), as amended by the FDA Reauthorization Act of 2017 (FDARA), which specifies the process afforded to persons denied a Certificate to Foreign Government (CFG) for a device. This guidance describes the information that the Center for Devices and Radiological Health (CDRH) and the Center for Biologics Evaluation and Research (CBER), in collaboration with the Office of Regulatory Affairs (ORA), will provide to a person whose request for a CFG for a device is denied, and the process for seeking review of such a denial.

DATES: The announcement of the guidance is published in the **Federal Register** on November 14, 2019.

ADDRESSES: You may submit either electronic or written comments on

Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–D–2310 for ''Process to Request a Review of FDA's Decision Not to Issue Certain Export Certificates for Devices.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the guidance document entitled ''Process to Request a Review of FDA's Decision Not to Issue Certain Export Certificates for Devices'' to the Office of Policy, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002, or to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Joann Belt, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 1463, Silver Spring, MD 20993–0002, *exportcert@cdrh.fda.gov,* 301–796–7400, option 3; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is issuing this guidance to comply with section 704 of FDARA (Pub. L. 115–52), which amended section 801(e)(4) of the FD&C Act (21 U.S.C. 381(e)(4)), to specify the process afforded to persons denied a CFG for a device. This guidance describes the information that CDRH and CBER, in collaboration with ORA, will provide to a person whose request for a CFG for a device is denied, and the process for seeking review of such a denial. This guidance applies to the process for persons denied CFGs requested pursuant to section 801(e)(4)(A) of the FD&C Act for devices manufactured in an establishment registered under section 510 of the FD&C Act (21 U.S.C. 360) (*i.e.,* FDA-approved, cleared, or exempted devices) that are exported from the United States. This guidance supplements the FDA's guidance ''FDA Export Certificates,'' which is available at: *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/fda-export-certificates.* FDA considered comments received on the draft guidance that appeared in the **Federal Register** of August 17, 2018 (83 FR 41078). FDA revised the guidance as appropriate in response to the comments.

II. Significance of Guidance

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on ''Process to Request a Review of FDA's Decision Not to Issue Certain Export Certificates for Devices.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

III. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the internet. A search capability for all

Center for Devices and Radiological Health guidance documents is available at *https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm.* This guidance document is also available at *https://www.regulations.gov* or *https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances.* Persons unable to download an electronic copy of ''Process to Request a Review of FDA's Decision Not to Issue Certain Export Certificates for Devices'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number 17044 to identify the guidance you are requesting.

IV. Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521). The collections of information in the following FDA regulations and guidance have been approved by OMB as listed in the following table:

FD&C Act section; 21 CFR part; or guidance	Topic	OMB control No.
FD&C Act sections 801(e) and 802 (21 U.S.C. 382)	Export certificates for FDA regulated products	0910–0498
21 CFR part 820	Current Good Manufacturing Practice (CGMP); Quality System (QS) Regulation.	0910–0073
21 CFR part 807, subparts A through E	Electronic Submission of Medical Device Registration and Listing.	0910–0625
''Center for Devices and Radiological Health Appeals Processes''.	Appeals process	0910–0738

Dated: November 5, 2019.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Standardized Work Plan (SWP) Form for Use With Applications to the Bureau of Health Workforce (BHW) Research and Training Grants and Cooperative Agreements, OMB No. 0906–xxxx–New

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR have been provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this Notice has closed.

DATES: Comments on this ICR should be received no later than December 16, 2019.

ADDRESSES: Submit your comments, including the ICR Title, to the desk officer for HRSA, either by email to *OIRA_submission@omb.eop.gov* or by fax to (202) 395–5806.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Lisa Wright-Solomon, the HRSA Information Collection Clearance Officer at *paperwork@hrsa.gov* or call (301) 443–1984.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: SWP Form for Use with Applications to BHW Research and Training Grants and Cooperative Agreements, OMB No. 0906–xxxx–NEW

Abstract: BHW requires applicants for training and research grants and cooperative agreements to submit a work plan that describes the timeframes and deliverables required during the grant period of performance to address each of the needs detailed in the Purpose and Need section of the application, as required in the Notice of Funding Opportunity announcement. Applicants are currently able to submit work plans in a non-standardized format.

In order to standardize the data provided by applicants to make informed decisions about funding and assist with monitoring awardee progress, BHW plans to require applicants to complete a SWP form in lieu of submitting a work plan in the applicant's own format. Applicants will use the SWP form when they submit their proposals, and grantees and Project Officers will use the SWP information to assist in monitoring progress once HRSA makes the awards.

A 60-day notice was published in the **Federal Register** on June 19, 2019, Vol. 84, No. 118, pp.28560–28561. There was one public comment and it was thoroughly addressed.

Need and Proposed Use of the Information: The information collected by the SWP form is necessary to standardize and streamline the data used by HRSA in reviewing applications and monitoring awardees. The form will ask applicants to provide a description of the activities or steps the recipient will take to achieve each of the objectives proposed during the entire period of performance. The current variation in formats and data submitted by applicants reduces efficiency in reviewing, awarding, and monitoring each project, so this change will remedy that inefficiency. In addition, seeking OMB approval comports with the regulatory requirement imposed by 45 CFR 75.206(a), Paperwork clearances.

The proposed SWP form will be used to provide information to assess applications for awards including ranking applications as part of the grant review process. BHW will also use the information to assess whether current recipients of grant funding have met statutory and programmatic requirements.

Likely Respondents: Respondents will be applicants to HRSA's research and training programs in BHW.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Standardized Work Plan	1,000	1	1,000	1	1,000
	1,000	....	1,000	....	1,000

Maria G. Button,

Director, Executive Secretariat.

Office of the Secretary

Findings of Research Misconduct

AGENCY: Office of the Secretary, HHS

ACTION: Notice.

SUMMARY: Findings of research misconduct have been made against Deepti Malhotra, Ph.D. (Respondent), former Doctoral Student and Postdoctoral Fellow, Department of Environmental Health Sciences, Johns Hopkins Bloomberg School of Public Health (JHSPH). Dr. Malhotra engaged in research misconduct in research supported by U.S. Public Health Service (PHS) funds, specifically National Heart, Lung, and Blood Institute (NHLBI), National Institutes of Health (NIH), grants R01 HL081205, P50 HL084945, P50 HL084948–01, U01 HL105569–03, P50 HL107169–01, R01 HL066554–09, and R03 HL096931–02; National Institute of Environmental Health Sciences (NIEHS), NIH, grants P50 ES015903, P01 ES018176–01, and P30 ES003891–25; National Cancer Institute (NCI), NIH, grant P50 CA058184–18; and National Institute for Research Resources (NCRR), NIH, grant UL1 RR025005–02. The administrative actions, including debarment for a period of four (4) years, were implemented beginning on October 1, 2019, and are detailed below.

FOR FURTHER INFORMATION CONTACT: Elisabeth A. Handley, Interim Director, Office of Research Integrity, 1101 Wootton Parkway, Suite 240, Rockville, MD 20852, (240) 453–8200.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Office of Research Integrity (ORI) has taken final action in the following case:

Deepti Malhotra, Ph.D., Johns Hopkins Bloomberg School of Public Health: Based on the report of an investigation conducted by JHSPH and analysis conducted by ORI in its oversight review, ORI found that Dr. Deepti Malhotra, former Doctoral Student and Postdoctoral Fellow, Department of Environmental Health Sciences, JHSPH, engaged in research misconduct in research supported by PHS funds, specifically NHLBI, NIH, grants R01 HL081205, P50 HL084945, P50 HL084948–01, U01 HL105569–03, P50 HL107169–01, R01 HL066554–09, and R03 HL096931–02; NIEHS, NIH, grants P50 ES015903, P01 ES018176–01, and P30 ES003891–25; NCI, NIH, grant P50 CA058184–18; and NCRR, NIH, grant UL1 RR025005–02.NCI, NIH, grant R01 CA122737–01A2.

ORI found that Respondent engaged in research misconduct by knowingly, intentionally, and/or recklessly falsifying and/or fabricating data included in the following four (4) published papers and her Ph.D. Thesis:

- *Am J Respir Crit Care Med.* 2008;178(6):592–604 (hereafter referred to as ''*AJRCCM* 2008''). Retracted in: *Am J Respir Crit Care Med.* 2016 Feb 1;193(3):344.
- *Am J Respir Crit Care Med.* 2009;180(12):1196–1207 (hereafter referred to as ''*AJRCCM* 2009''). Retracted in: *Am J Respir Crit Care Med.* 2016 Feb 1;193(3):344.
- *J Clin Invest.* 2011;121(11):4289–4302 (hereafter referred to as ''*JCI* 2011''). Retracted in: *J Clin Invest.* 2014 Dec;124(12):5521.
- *PLoS Comput Biol.* 2012;8(7):e1002597 (hereafter referred to as ''*PLoS Comput Biol.* 2012'').
- Malhotra D. ''Transcription Factor Nuclear Factor (Erythroid-Derived 2) Receptor 2 (Nrf2), A Master Regulator of Environmental Stress Response, Is A Modifier Of Chronic Obstructive Pulmonary Disease (COPD).'' A dissertation submitted to the Johns Hopkins University in conformity with the requirements for the degree of Doctor of Philosophy, August 2010 (hereafter referred to as the ''Ph.D. Thesis'').

Respondent knowingly, intentionally, and/or recklessly falsified and/or fabricated Western blot data for protein expression in cultured cell lines and/or alveolar macrophages of patients with chronic obstructive pulmonary disease (COPD) by trimming and manipulating Western blot images to disguise their origin or by reversing negative DNA gel images of the PCR product, reusing and relabeling them to represent Western blot data for unrelated experiments in seventeen (17) figures included in four (4) published papers and twelve (12) figures included in her Ph.D. Thesis. In the absence of original reliable image data, the quantitative data in associated plots, statistical analyses, and related text also are falsified and/or fabricated. Specifically, Respondent falsified and/or fabricated the following figures included in:

- *AJRCCM* **2008**

▪ by reusing sets of repeating blot band images from unknown and/or differently labeled film images to falsely create Western Blot panels of:

➢ GAPDH in Figure 1C, also included as Figure 2–4B in the Ph.D. Thesis
➢ GAPDH, DJ–1 and KEAP1 in Figure 2B, also included as Figure 2–4C in the Ph.D. Thesis
➢ GAPDH in Figure 5D, also included as Figure 2–7A in the Ph.D. Thesis
➢ DJ–1, NRF2, NQO1, and GAPDH in Figure 6B, also included as Figure 2–8B in the Ph.D. Thesis

- *AJRCCM* **2009**

▪ by trimming Western blot panel representing samples from:

➢ Human subjects in Figure 4C and in the Ph.D. Thesis, Figure 3–7C, right column, Figure 3–7G, right column, and Figure 3–8A, right column, GAPDH lanes 1–4, and reusing them to represent samples from mice in Figure 3A and in the Ph.D. Thesis, Figure 3–6A
➢ normal human subjects in Figures 4C and 5A, left column, and in the Ph.D.

Thesis, Figures 3–7C and 3–8A, left column, and reusing them after flipping horizontally and vertically as lanes 12–18 in the same GAPDH panel in the same figures to represent samples from COPD patients

• *JCI* **2011**

▪ by trimming Western blot panels from:

➢ Figure 2D, reusing and relabeling in Figure 4A to represent different samples

➢ Supplemental Figure 1A, reusing and relabeling in Figure 4A to represent different samples

➢ Figure 3F, reusing and relabeling Figure 3B, bottom panel, in *PloS Comp Biol.* 2012

➢ Figure 9B and the Ph.D. Thesis Figure 4–9H, bottom panel, lanes 1–5, and reusing them in Figure 4–8C, lanes 4–8, in the Ph.D. Thesis, to represent different samples

➢ Figure 9B and the Ph.D. Thesis, Figure 4–9H, middle panel, lanes 1–3, and reusing them in Figure 4–8C, middle panel, lanes 2–4, in the Ph.D. Thesis, to represent different samples

➢ Figure 9D and the Ph.D. Thesis, Figure 4–9I, top panel, lanes 1–4, and reusing them after flipping horizontally in Figure 4–8C, top panel, lanes 1–4, in the Ph.D. Thesis, to represent different samples

▪ by trimming negative DNA gel images from:

➢ Figure 2A, reversing and reusing the positive image as Western blot images in:

• Figure 3B

• Supplemental Figure 3A

➢ Figure 3G, reversing and reusing the positive image as Western blots in different panels in Figure 3B in *PloS Comp Biol.* 2012

Dr. Malhotra entered into a Voluntary Exclusion Agreement (Agreement) and agreed for a period of four (4) years, beginning on October 1, 2019:

(1) To exclude herself voluntarily from any contracting or subcontracting with any agency of the United States Government and from eligibility for or involvement in nonprocurement programs of the United States Government referred to as ''covered transactions'' pursuant to HHS' Implementation (2 CFR part 376) of OMB Guidelines to Agencies on Governmentwide Debarment and Suspension, 2 CFR part 180 (collectively the ''Debarment Regulations''); and

(2) to exclude herself voluntarily from serving in any advisory capacity to PHS including, but not limited to, service on any PHS advisory committee, board, and/or peer review committee, or as a consultant.

Elisabeth A. Handley,

Interim Director, Office of Research Integrity.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Findings of Research Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Findings of research misconduct have been made against Dr. Sudhakar Yakkanti (Respondent) (formerly named Sudhakar Akulapalli),[1] former staff scientist and Director of the Cell Signaling, Retinal & Tumor Angiogenesis Laboratory, Boys Town National Research Hospital (BTNRH). Respondent engaged in research misconduct in research supported by U.S. Public Health Service (PHS) funds, specifically, National Cancer Institute (NCI), National Institutes of Health (NIH), grant R01 CA143128, National Eye Institute (NEI), NIH, grants R01 EY018179 and R01 EY16695, and National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), NIH, grants R01 DK055000, R01 DK055001, R01 DK062987, and R01 DK051711. The administrative actions, including debarment for a period of five (5) years, were implemented beginning on August 24, 2019, and are detailed below.

FOR FURTHER INFORMATION CONTACT: Elisabeth A. Handley, Interim Director, Office of Research Integrity, 1101 Wootton Parkway, Suite 240, Rockville, MD 20852, (240) 453–8200.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Office of Research Integrity (ORI) has taken final action in the following case:

Dr. Sudhakar Yakkanti, Boys Town National Research Hospital: Based upon the evidence and findings of an investigation report by BTNRH and additional information obtained by ORI during its oversight review of the BTNRH investigation, ORI found that Dr. Sudhakar Yakkanti, former staff scientist and Director of the Cell Signaling, Retinal & Tumor Angiogenesis Laboratory, BTNRH, engaged in research misconduct in research supported by PHS funds, specifically, NCI, NIH, grant R01 CA143128, NEI, NIH, grants R01 EY018179 and R01 EY16695, and NIDDK, NIH, grants R01 DK055000, R01 DK055001, R01 DK062987, and R01 DK051711.

ORI found by a preponderance of the evidence that Respondent intentionally, knowingly, or recklessly falsified and/or fabricated figures in the following eight (8) unfunded NIH grant applications, one (1) funded NIH grant application, seven (7) publications, and two (2) unpublished manuscripts:

• R01 CA115763–01A2 submitted to NCI, NIH (unfunded)
• R21 CA155796–01 submitted to NCI, NIH (unfunded)
• R01 CA166195–01 submitted to NCI, NIH (unfunded)
• R01 CA143128–01 submitted to NCI, NIH (unfunded)
• R01 CA143128–04 submitted to NCI, NIH (unfunded)
• R01 EY020539–01 submitted to NEI, NIH (unfunded)
• R01 EY020539–01A1 submitted to NEI, NIH (unfunded)
• R01 EY024967–01 submitted to NEI, NIH (unfunded)
• R01 CA143128–01A1 submitted to NCI, NIH (funded)
• *Biochemistry* 2000;39(42):12929–12938 (hereafter referred to as ''*Biochem* 2000'')
• *Proc. Natl. Acad. Sci. U.S.A.* 2003;100(8):4766–4771 (hereafter referred to as ''*PNAS* 2003'')
• *The Journal of Clinical Investigation* 2005;115(10):2801–2810 (hereafter referred to as ''*JCI* 2005'')
• *Invest. Ophthalmol. Vis. Sci.* 2009;50(10):4567–4575 (hereafter referred to as ''*IOVS* 2009'')
• *Pharmaceutical Research* 2008;25(12):2731–2739 (hereafter referred to as ''*Pharm Research* 2008'')
• *Scientific Reports* 2014;4(4136):1–9 (hereafter referred to as ''*Sci Reports* 2014'')
• *Current Eye Res.* 2010 Jan;35(1):44–55 (hereafter referred to as ''*CER* 2010'')
• Tumstatin inhibits Choroidal Neovascularization by Inhibiting MMP–2 activation *in-vitro* and *in vivo.* Submitted to *Molecular Vision* on February 7, 2011 (hereafter referred to as ''*Mol Vis* Sub 2011'') (unpublished)
• Inhibitory Effect of Tumstatin on Corneal Neovascularization Both *In-vitro* and *In-vivo.* Submitted to *Journal of Clinical & Experimental Ophthalmology* on January 16, 2011 (hereafter referred to as ''*JCEO* Sub 2011'') (unpublished)

Specifically, ORI found by a preponderance of the evidence that

[1] The Respondent changed his name from Sudhakar Akulapalli to Sudhakar Yakkanti during the BTNRH inquiry.

Respondent engaged in research misconduct by intentionally, knowingly, or recklessly:

- Falsifying an image from an *in vivo* choroidal neovascularization (CNV) experiment by falsely relabeling an image representing results from an experiment with the anti-angiogenic molecule arresten (α1NC1) to represent results from a different CNV experiment with a different anti-angiogenic molecule, hexastatin (α6NC1) in Figure 9A (right panel) of grant application R01 CA166195–01
- falsifying an image from an *in vivo* CNV experiment by falsely relabeling an image representing results from an experiment with the anti-angiogenic molecule hexastatin (α6NC1) to represent results from different CNV experiments with different anti-angiogenic molecules:
  —Arresten (α1NC1) in Figure 10A (right panel) of grant application R01 EY020539–01A1
  —tumstatin (α3NC1) in Figure 6A (right panel) of *Mol Vis* Sub 2011
- falsifying and/or fabricating bar graphs in Figure 9B of grant application R01 CA166195–01, which was based on the falsified image in Figure 9A (right panel) of grant application R01 CA166195–01
- falsifying and/or fabricating bar graphs in Figure 6B of *Mol Vis* Sub 2011, which was based on the falsified image in Figure 6A (right panel) of *Mol Vis* Sub 2011
- falsifying and/or fabricating bar graphs in Figure 10B of grant application R01 EY020539–01A1, which was based on the falsified image in Figure 10A of grant application R01 EY020539–01A1
- falsifying microscope images of endothelial tube formation assays by labeling one image as two different experiments:
  —A control in an experiment performed in Human umbilical vein endothelial cells (HUVECs) in Figure 1D (first panel) of grant application R21 CA155796–01
  —a control in an experiment performed in mouse choroidal endothelial cells (MCECs) in Figure 2B (first panel) of grant application R01 EY020539–01A1
- falsifying microscope images of endothelial tube formation assays by reusing and falsely labeling one image as three different experiments:
  —HUVECs treated with 0.5 µM hexastatin (α6(IV)NC1) in Figure 1D (third panel) of grant application R21 CA155796–01
  —MCECs treated with 0.5 µM arresten (α1(IV)NC1) in Figure 2B (second panel) of grant application R01 EY020539–01A1
  —MCECs treated with 1.0 µM tumstatin (α3(IV)NC1) in Figure 2C (bottom right panel) of *Mol Vis* Sub 2011
- falsifying Western blot images by reusing and falsely labeling one image as four different experiments:
  —The protein band FAK from HUVECs treated with hexastatin (α6(IV)NC1) in Figure 3A (bottom panel) of grant application R21 CA155796–01 and Figure 4A (bottom panel) of grant application R01 CA166195–01
  —the protein band FAK from MCECs treated with arresten (α1(IV)NC1) in Figure 5A (bottom panel) of grant application R01 EY020539–01A1
  —the protein band Raf from HUVECs treated with rh-Endo in Figure 5A (bottom panel) of *PNAS* 2003
  —the protein band FAK from mouse retinal pigmented epithelial cell (MRPECs) treated with arresten (α1(IV)NC1) in Figure 5B (bottom panel) of grant application R01 EY020539–01 and in Figure 7B (bottom panel) of *IOVS* 2009
- falsifying Western blot images by reusing and falsely labeling one image as two different experiments:
  —HUVECs treated with rh-Endo in Figure 5D (middle panel) of *PNAS* 2003
  —mouse retinal endothelial cells (MRECs) treated with arresten (α1(IV)NC1) in Figure 7C (top panel) of *IOVS* 2009
- falsifying Western blot images by reusing and falsely labeling one image as two different experiments:
  —HUVECs treated with hexastatin (α6(IV)NC1) in Figure 3C (top panel) of grant application R21 CA155796–01
  —MCECs treated with arresten (α1(IV)NC1) in Figure 5B (top panel) of grant application R01 EY020539–01A1
- falsifying Western blot images by reusing and falsely labeling one image as two different experiments:
  —HUVECs treated with hexastatin (α6(IV)NC1) in Figure 3C (bottom panel) of grant application R21 CA155796–01
  —MCECs treated with arresten (α1(IV)NC1) in Figure 5B (bottom panel) of grant application R01 EY020539–01A1
- falsifying Western blot images by reusing and falsely labeling one image as two different experiments:
  —HUVECs treated with hexastatin (α6(IV)NC1) in Figure 3D (top panel) of grant application R21 CA155796–01
  —MCECs treated with arresten (α1(IV)NC1) in Figure 5C (top panel) of grant application R01 EY020539–01A1
- falsifying Western blot images by reusing and falsely labeling one image as two different experiments:
  —HUVECs treated with hexastatin (α6(IV)NC1) in Figure 3D (bottom panel) of grant application R21 CA155796–01,
  —MCECs treated with arresten (α1(IV)NC1) in Figure 5C (bottom panel) of grant application R01 EY020539–01A1
- falsifying Western blot images by reusing and falsely labeling one image as three different experiments:
  —The protein band FAK(P) from HUVECs treated with rh-Endo in Figure 4A (top panel) of *PNAS* 2003
  —the protein band Cox-2 from HUVECs treated with arresten (α1(IV)NC1) in Figure 2B (top panel) of grant application R01 CA115763–01A2, Figure 2B (top panel) of grant application R01 CA143128–01, and Figure 2B (top panel) of grant application R01 CA143128–01A1
  —the protein band Cox-2 from MCECs treated with arresten (α1(IV)NC1) in Figure 5C (top panel) of grant application R01 CA143128–04 and Figure 8B (top panel) of R01 EY024967–01
- falsifying Western blot images by reusing and falsely labeling one image as two different experiments:
  —The protein band eIF2α 51A in Figure 1A (lanes 3–5) of *Biochem* 2000
  —the protein band tumstatin (α3(IV)NC1) in Figure 2 (lanes 2–4) of *Pharm Research* 2008
- falsifying Western blot images by reusing and falsely labeling one image as two different experiments:
  —The protein band active MMP–2 in Figure 10D (top panel, lanes 1–4) of grant application R01 CA115763–01A2, Figure 10B of grant application R01 CA143128–01, Figure 10B (third panel, lanes 1–4) of grant application R01 CA143128–01A1, and Figure 7D (third panel, lanes 1–4) of grant application R01 EY020539–01A1
  —the protein band arresten (α1(IV)NC1) in Figure 3C (lanes 3–6) of *Sci Reports* 2014, Figure 6D (lanes 3–6) of grant application R01 CA143128–04, and Figure 9D (lanes 3–6) of grant application R01 EY024967–01
- falsifying Western blot images by reusing and falsely labeling one image as three different experiments:

—The protein band Raf from mouse lung endothelial cells (MLECs) at the time points 0, 5, 10, 20, and 30 minutes in Figure 5A (bottom panel, lanes 1–5) of *JCI* 2005
—the protein band FAK(P) from MRECs at the time points 20 and 40 minutes in Figure 7A (top panel, lanes 2 and 4) of *IOVS* 2009 and Figure 5A (top panel, lanes 2 and 4) of grant application R01 EY020539–01
—the protein band FAK from MRECs at the time points 0, 20, 20, 40, and 40 minutes in Figure 7A (bottom panel, lanes 1–5) of *IOVS* 2009 and Figure 5A (bottom panel, lanes 1–5) of grant application R01 EY020539–01

• falsifying images of corneas by reusing and falsely labeling one image as two different experiments:
—CNV cornea treated with arresten (α1(IV)NC1) in Figure 13 (right panel) of grant application R01 EY020539–01
—CNV cornea treated with tumstatin (α3(IV)NC1) in Figure 3A (right panel) of *JCEO* Sub 2011

• falsifying images of corneal sections by reusing and falsely labeling one image as two different experiments:
—CNV cornea treated with arresten (α1(IV)NC1) in Figure 14 (right panel) of grant application R01 EY020539–01
—CNV cornea treated with tumstatin (α3(IV)NC1) in Figure 4 (right panel) of *JCEO* Sub 2011

• falsifying endothelial cell migration assays by reusing and falsely labeling one image as two different experiments:
—MRECs treated with vascular endothelial growth factor (VEGF) and arresten (α1(IV)NC1) in Figure 2A (top right panel) of *IOVS* 2009 and Figure 2 (top right panel) of grant application R01 EY020539–01
—HUVECs treated with only VEGF in Figure 1C (middle panel) of grant application R21 CA155796–01 and Figure 2C (second panel) of grant application R01 CA166195–01

• falsifying endothelial cell migration assays by reusing and falsely labeling one image as two different experiments:
—MRECs treated with VEGF in Figure 2A (top middle panel) of *IOVS* 2009 and Figure 2 (top middle panel) of grant application R01 EY020539–01
—MRECs treated with basic fibroblast growth factor (bFGF) in Figure 3A (second panel) of *CER* 2010

• falsifying endothelial cell migration assays by reusing and falsely labeling one image as two different experiments:
—MRECs treated with bFGF and arresten (α1NC1) in Figure 3A (fourth panel) of *CER* 2010
—MRECs treated with VEGF and arresten (α1NC1) in Figure 2A (bottom middle panel) of *IOVS* 2009 and Figure 2 (bottom middle panel) of grant application R01 EY020539–01

• falsifying endothelial cell migration assays by reusing and falsely labeling one image as three different experiments:
—MRECs treated with bFGF and 10 μg/ml arresten (α1NC1) in Figure 3A (fifth panel) of *CER* 2010
—HUVECs treated with VEGF and 0.5 μM hexastatin (α6NC1) in Figure 1C (last panel) of grant application R21 CA155796–01
—HUVECs treated with VEGF and 0.25 μM hexastatin (α6NC1) in Figure 2C (third panel) of grant application R01 CA166195–01

The following administrative actions have been implemented, beginning on August 24, 2019:

(1) Respondent is debarred for a period of five (5) years from eligibility for any contracting or subcontracting with any agency of the United States Government and from eligibility for, or involvement in, nonprocurement programs of the United States Government referred to as ''covered transactions'' pursuant to HHS' Implementation (2 CFR part 376 *et seq.*) of Office of Management and Budget (OMB) Guidelines to Agencies on Governmentwide Debarment and Suspension, 2 CFR part 180 (collectively the ''Debarment Regulations'');

(2) Respondent is prohibited from serving in any advisory capacity to PHS including, but not limited to, service on any PHS advisory committee, board, and/or peer review committee, or as a consultant for a period of five (5) years; and

(3) in accordance with 42 CFR 93 §§ 93.407(a)(1) and 93.411(b), HHS will send a notice of the findings and of the need for correction or retraction to the pertinent journals for each of the following:

• *Biochemistry* 2000;39(42):12929–12938
• *Proc. Natl. Acad. Sci. U.S.A.* 2003;100(8):4766–4771
• *The Journal of Clinical Investigation* 2005;115(10):2801–2810
• *Invest. Ophthalmol. Vis. Sci.* 2009;50(10):4567–4575
• *Pharmaceutical Research* 2008;25(12):2731–2739
• *Scientific Reports* 2014;4(4136):1–9
• *Current Eye Res.* 2010 Jan;35(1):44–55

National Center For Advancing Translational Sciences; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Center for Advancing Translational Sciences Special Emphasis Panel; CTSA.

Date: January 24, 2020.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Bethesda North Marriott Hotel & Conference Center, 5701 Marinelli Road, Bethesda, MD 20852.

Contact Person: Victor Henriquez, Ph.D., Scientific Review Officer, Office of Scientific Director, National Center for Advancing Translational Sciences (NCATS), National Institutes of Health, 6701 Democracy Blvd., Democracy 1, Room 1080, Bethesda, MD 20892–4878, 301–435–0813, *henriquv@mail.nih.gov.*

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Office of The Director, National Institutes of Health; Notice of Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the Novel and Exceptional Technology and Research Advisory Committee.

The meeting will be open to the public, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The meetings will also be videocast and can be accessed from the NIH Videocasting and Podcasting website (*http://videocast.nih.gov/*).

Name of Committee: Novel and Exceptional Technology and Research Advisory Committee.

Date: December 5, 2019.

Time: 11:00 a.m. to 5:15 p.m.

Agenda: The Novel and Exceptional Technology and Research Advisory Committee (NExTRAC) will discuss (1) pathways for responsible innovation in emerging biotechnologies; (2) characteristics of emerging biotechnologies, including presentations on horizon scanning, gene editing in the clinic, gene drives, neurotechnology, artificial intelligence, and synthetic biology; and (3) proactively addressing scientific and societal implications of emerging biotechnologies. In addition, charge(s) to the committee will be presented.

Place: National Institutes of Health, Building 35A, Room 620/630, 9000 Rockville Pike, Bethesda, MD 20892.

Name of Committee: Novel and Exceptional Technology and Research Advisory Committee.

Date: December 6, 2019.

Time: 9:00 a.m. to 2:45 p.m.

Agenda: The Novel and Exceptional Technology and Research Advisory Committee (NExTRAC) will discuss (1) pathways for responsible innovation in emerging biotechnologies; (2) characteristics of emerging biotechnologies, including presentations on horizon scanning, gene editing in the clinic, gene drives, neurotechnology, artificial intelligence, and synthetic biology; and (3) proactively addressing scientific and societal implications of emerging biotechnologies. In addition, charge(s) to the committee will be presented.

Place: National Institutes of Health, Building 35A, Room 620/630, 9000 Rockville Pike, Bethesda, MD 20892.

Contact Person: Shayla Beckham, Management Program Analyst, Office of Science Policy, National Institutes of Health, 6705 Rockledge Drive, Room 750, Bethesda, MD 20892–9606, 301–496–9838, *shayla.beckham@nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the NExTRAC web page: *https://osp.od.nih.gov/biotechnology/novel-exceptional-technology-research-advisory-committee/,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2019–0025; OMB No. 1660–0017]

Agency Information Collection Activities: Proposed Collection; Comment Request; Public Assistance Program

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on a revision of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning information collected for the Public Assistance (PA) program eligibility determinations, grants management, and compliance with Federal laws and regulations.

DATES: Comments must be submitted on or before January 13, 2020.

ADDRESSES: To avoid duplicate submissions to the docket, please use only one of the following means to submit comments:

(1) *Online.* Submit comments at *www.regulations.gov* under Docket ID FEMA–2019–0025. Follow the instructions for submitting comments.

(2) *Mail.* Submit written comments to Docket Manager, Office of Chief Counsel, DHS/FEMA, 500 C Street SW, 8NE, Washington, DC 20472–3100.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Rachel Hildebrand, Process Improvement Section Chief, Public Assistance Program Delivery Branch, 202–646–3484. You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121–5207 (the Stafford Act), authorizes grants to assist State, Tribal, and local governments and certain Private Non-Profit entities with the response to and recovery from disasters following Presidentially declared major disasters and emergencies. 44 CFR part 206 specifies the information collections necessary to facilitate the provision of assistance under the Public Assistance (PA) Program. 44 CFR 206.202 describes the general application procedures for the PA Program.

FEMA is seeking a revision to the already existing collection of information, OMB Control Number 1660–0017, because FEMA proposes changing the title from ''Request for Appeals and Recommendation/No Forms'' to ''Request for Appeals or Arbitrations and Recommendations/No Forms.'' Section 1219 of the Disaster Recovery Reform Act of 2018, which amended Section 423(d) of the Stafford Act (42 U.S.C. 5189a), provides a right of arbitration to certain applicants of the PA Program that have a dispute concerning the eligibility for assistance or repayment of assistance. Plus, the annual cost to the Federal Government is increasing from $805,311.96 to $1,891,473. Finally, there has been a change in the annual burden hours due to a correction of errors in burden estimates. For example, in the past, FEMA incorrectly used 1.3 hours to represent 1.5 hours for FEMA Form 009–0–91.

Collection of Information

Title: Public Assistance Program.

Type of Information Collection: Revision of a currently approved collection.

OMB Number: 1660–0017.

FEMA Forms: FEMA Form–009–0–49 Request for Public Assistance; FEMA Form 009–0–91 Project Worksheet (PW); FEMA Form 009–0–91A Project Worksheet (PW)—Damage Description and Scope of Work Continuation Sheet; FEMA Form 009–0–91B Project Worksheet (PW)—Cost Estimate Continuation Sheet; FEMA Form 009–0–91C Project Worksheet (PW)—Maps and Sketches Sheet; FEMA Form 009–0–91D Project Worksheet (PW)—Photo Sheet; FEMA Form 009–0–120 Special Considerations Questions; FEMA Form 009–0–121 PNP Facility Questionnaire; FEMA Form 009–0–123 Force Account Labor Summary Record; FEMA Form 009–0–124 Materials Summary Record;

FEMA Form 009–0–125 Rented Equipment Summary Record; FEMA Form 009–0–126 Contract Work Summary Record; FEMA Form 009–0–127 Force Account Equipment Summary Record; FEMA Form 009–0–128 Applicant's Benefits Calculation Worksheet; FEMA Form 009–0–111, Quarterly Progress Report; FEMA Form 009–0–141, FAC–TRAX System.

Abstract: The information collected is utilized by FEMA to make determinations for Public Assistance grants based on the information supplied by the respondents.

Affected Public: State, local or Tribal government.

Estimated Number of Respondents: 1,012.

Estimated Number of Responses: 398,068.

Estimated Total Annual Burden Hours: 466,025.

Estimated Total Annual Respondent Cost: $29,601,921.

Estimated Respondents' Operation and Maintenance Costs: N/A.

Estimated Respondents' Capital and Start-Up Costs: N/A.

Estimated Total Annual Cost to the Federal Government: $1,891,473.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Maile Arthur,

Deputy Director, Information Management Division, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

[FR Doc. 2019–24719 Filed 11–13–19; 8:45 am]

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY

Agency Information Collection Activities: Vulnerability Assessments

AGENCY: Infrastructure Security Division (ISD), Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

ACTION: 30-Day notice and request for comments; revision, 1670–0035.

SUMMARY: DHS CISA ISD will submit the following information collection request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. CISA previously published this ICR for a 60-day public comment period. No comments were received by CISA. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are due by December 16, 2019.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, OMB. Comments should be addressed to the OMB Desk Officer, Department of Homeland Security and sent via electronic mail to *dhsdeskofficer@omb.eop.gov.* All submissions must include the words ''Department of Homeland Security'' and the OMB Control Number 1670–0035.

Comments submitted in response to this notice may be made available to the public through relevant websites. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT: Ricky Morgan, 866–844–8163, *IPGatewayHelpDesk@hq.dhs.gov.*

SUPPLEMENTARY INFORMATION: The Presidential Policy Directive-21 and the National Infrastructure Protection Plan highlight the need for a centrally managed repository of infrastructure attributes capable of assessing risks and facilitating data sharing. To support this mission need, the DHS CISA ISD has developed a data collection system that contains several capabilities which support the homeland security mission in the area of critical infrastructure (CI) protection.

Protective Security Advisors (PSAs) and Cyber Security Advisors (CSAs) conduct voluntary assessments on CI facilities. These assessments are web-based and are used to collect an organization's basic, high-level information, and its dependencies. This data is then used to determine a Protective Measures Index (PMI) and a Resilience Measures Index (RMI) for the assessed organization. This information allows an organization to see how it compares to other organizations within the same sector as well as allows them to see how adjusting certain aspects would change their score. This allows the organization to then determine where best to allocate funding and perform other high-level decision-making processes pertaining to the security and resiliency of the organization.

The information will be gathered by site visits, arranged between the organization owners and DHS PSAs or CSAs. The PSA or CSA will then visit the site and perform the assessment, as requested. They then return to complete the vulnerability assessment and input the data into the system where the data is then accessible to system users. Once available, the organization and other relevant system users can then review the data and use it for planning, risk identification, mitigation and decision making. All data is captured electronically by the PSA, CSA or by the organization as a self-assessment. Participation in the vulnerability assessments is voluntary, but full completion of the assessment data collection is required if the organization desires to receive a complete evaluation of their security posture.

After assessments are input into the system, the user is prompted to participate in a feedback questionnaire. Every user is prompted to participate in the Post Assessment questionnaire after entering an assessment. Participation in the Post Assessment questionnaire is voluntary. The Post Assessment Questionnaires are designed to capture feedback about a vulnerability assessment and the system. There are three different questionnaires correlated and prompted after entering a particular assessment into the database. The results are used internally within DHS to make programmatic improvements.

The collection of information uses automated electronic vulnerability assessments and questionnaires. The vulnerability assessments and questionnaires are electronic in nature and include questions that measure the security, resiliency and dependencies of an organization. The vulnerability assessments are arranged at the request of an organization and are then scheduled and performed by a PSA or CSA.

The changes to the collection since the previous OMB approval include: Updating the title of the collection, adding three customer feedback questionnaires, increase in burden estimates and costs. The three questionnaires were added to the collection to provide user feedback on the content and functionality of the system. The addition of the questionnaires have increased the burden estimates by $3,861.

The annual burden cost for the collection has increased by $121,591, from $1,786,166 to $1,907,757, due to the addition of the Post Assessment Questionnaires and updated wage rates.

The annual government cost for the collection has increased by $509,195, from $1,710,959 to $2,220,152, due to the addition of the Post Assessment Questionnaires and updated wage rates.

This is a revision and renewal of an information collection.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Title of Collection: Cybersecurity and Infrastructure Security Agency Vulnerability Assessments.

OMB Control Number: 1670–0035.

Frequency: Annually.

Affected Public: State, Local, Tribal, and Territorial Governments and Private Sector Individuals.

Number of Annualized Respondents: 3,181.

Estimated Time per Respondent: 7.5 hours, 0.17 hours.

Total Annualized Burden Hours: 21,907 hours.

Total Annualized Respondent Opportunity Cost: $1,907,757.

Total Annualized Respondent Out-of-Pocket Cost: $0.

Total Annualized Government Cost: $2,220,152.

Scott Libby,

Deputy Chief Information Officer.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLAK940000.L14100000.BX0000.20X. LXSS001L0100]

Filing of Plats of Survey: Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of official filing.

SUMMARY: The plats of survey of lands described in this notice are scheduled to be officially filed in the Bureau of Land Management (BLM), Alaska State Office, Anchorage, Alaska. These surveys were executed at the request of the U.S. Coast Guard, the Bureau of Indian Affairs and BLM, are necessary for the management of these lands.

DATES: The BLM must receive protests by December 16, 2019.

ADDRESSES: You may buy a copy of the plats from the BLM Alaska Public Information Center, 222 W 7th Avenue, Mailstop 13, Anchorage, AK 99513. Please use this address when filing written protests. You may also view the plats at the BLM Alaska Public Information Center, Fitzgerald Federal Building, 222 W 8th Avenue, Anchorage, Alaska, at no cost.

FOR FURTHER INFORMATION CONTACT: Douglas N. Haywood, Chief, Branch of Cadastral Survey, Alaska State Office, Bureau of Land Management, 222 W. 7th Avenue, Anchorage, AK 99513; 907–271–5481; *dhaywood@blm.gov.* People who use a telecommunications device for the deaf may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the BLM during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The lands surveyed are:

U.S. Survey No. 4486, accepted October 31, 2019, situated within:

Kateel River Meridian, Alaska

T. 25 N, R. 19 W

T. 8 N, R. 18 E, accepted August 21, 2019

A person or party who wishes to protest one or more plats of survey identified above must file a written notice of protest with the State Director for the BLM in Alaska. The notice of protest must identify the plat(s) of survey that the person or party wishes to protest. You must file the notice of protest before the scheduled date of official filing for the plat(s) of survey being protested. The BLM will not consider any notice of protest filed after the scheduled date of official filing. A notice of protest is considered filed on the date it is received by the State Director for the BLM in Alaska during regular business hours; if received after regular business hours, a notice of protest will be considered filed the next business day. A written statement of reasons in support of a protest, if not filed with the notice of protest, must be filed with the State Director for the BLM in Alaska within 30 calendar days after the notice of protest is filed.

If a notice of protest against a plat of survey is received prior to the scheduled date of official filing, the official filing of the plat of survey identified in the notice of protest will be stayed pending consideration of the protest. A plat of survey will not be officially filed until the dismissal or resolution of all protests of the plat.

Before including your address, phone number, email address, or other personally identifiable information in a notice of protest or statement of reasons, you should be aware that the documents you submit, including your personally identifiable information, may be made publicly available in their entirety at any time. While you can ask the BLM to withhold your personally identifiable information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 U.S.C. Chap. 3.

Douglas N. Haywood,
Chief Cadastral Surveyor, Alaska.

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting comments on the significance of properties nominated before October 26, 2019, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by November 29, 2019.

ADDRESSES: Comments may be sent via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C St. NW, MS 7228, Washington, DC 20240.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before October 26, 2019. Pursuant to Section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act, and Notice of Availability and Request for Comments on Draft Restoration Plan/Environmental Assessment

On November 8, 2019, the Department of Justice filed a Complaint and lodged a proposed Consent Decree with the United States District Court for the Eastern District of Michigan in a lawsuit entitled *United States of America, State of Michigan, and the Saginaw Chippewa Indian Tribe of Michigan* v. *The Dow Chemical Company,* Civil Action No. 1:19–cv–13292. On the same date, the United States Fish and Wildlife Service published a Draft Restoration Plan/Environmental Assessment (''RP/EA'') that relates to various natural resource restoration activities that would be undertaken pursuant to the Consent Decree.

The proposed Consent Decree would resolve natural resource damage claims asserted against The Dow Chemical Company (''Dow'') for injuries to natural resources resulting from releases of hazardous substances, including dibenzo-*p*-dioxins and dibenzofurans, into the environment from a facility that Dow owns and operates in Midland, Michigan. The filed Complaint in this action alleges that injured natural resources include, but are not limited to, fish, mammals, and birds within an Assessment Area that includes portions of the Tittabawassee River and adjacent riverbank and floodplain areas, the Saginaw River and adjacent riverbank and floodplain areas, portions of Saginaw Bay, and an area within Midland affected by aerial deposition of hazardous substances from Dow's Midland facility. The Complaint also alleges that hazardous substances released from Dow's Midland facility resulted in the loss of recreational fishing and tribal use services provided by natural resources.

The Complaint asserts claims on behalf of designated federal, state, and tribal natural resource trustees to recover natural resource damages under Section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9607. The Complaint also asserts claims on behalf of state natural resource trustees to recover natural resource damages under Sections 3115(2) and 20126a of the Michigan Natural Resources and Environmental Protection Act, MCL 324.3115(2) and 324.20126a. The natural resource trustees here include the U.S. Department of the Interior, acting through the U.S. Fish and Wildlife Service and the Bureau of Indian Affairs; the Saginaw Chippewa Indian Tribe of Michigan; and the State of Michigan, represented by the Michigan Department of Environment, Great Lakes, and Energy (formerly known as the Michigan Department of Environmental Quality), the Michigan Department of Natural Resources, and the Michigan Attorney General (collectively, the ''Trustees'').

Under the proposed Consent Decree, Dow would: (1) Implement eight natural resource restoration projects in accordance with requirements set forth in Statements of Work attached to the Consent Decree and subject to oversight and approval of the Trustees; (2) pay $6.75 million to a restoration account that will be used by the Trustees to fund five additional natural resource restoration projects described in the Consent Decree; (3) pay an additional $15 million to a restoration account—of which at least $5 million will be used to fund additional natural resource restoration projects that will be selected by the Trustees in the future, with public input; (4) reimburse the Trustees for past assessment costs not already reimbursed under a memorandum of agreement; and (5) implement two other projects as part of the resolution of a separate State claim for reimbursement of certain State response costs. In addition, under the proposed Consent Decree, the United States, on behalf of Settling Federal Agencies, would pay $21 million to Dow in exchange for a comprehensive resolution of potential liability of Settling Federal Agencies for both natural resource damages and for past and future response costs relating to releases or discharges from Dow's Midland, Michigan facility.

Subject to specific reservations of rights set forth in the proposed Consent Decree, the proposed settlement would resolve (1) Dow's potential liability for natural resource damages resulting from releases of hazardous substances or discharges of oil from Dow's Midland facility, (2) Dow's potential liability for reimbursement of a limited set of State response costs identified in the proposed Consent Decree, and (3) specified claims of Dow against the other Settling Parties, including claims against Settling Federal Agencies that Dow contends are also liable for releases or discharges of hazardous substances or discharges of oil from the Midland facility. The proposed Consent Decree does not resolve potential liability of Dow to perform response actions to clean up hazardous substances or discharges of oil released from the Midland facility or to reimburse any response costs incurred by the Settling Parties in connection with releases from the Midland facility.

Consistent with the Department of the Interior's Natural Resource Damage Assessment and Restoration regulations, 43 CFR part 11, and the National Environmental Policy Act of 1969, as amended, 42 U.S.C. 4321–4347, and its implementing regulations at 40 CFR parts 1500–1508, the Trustees evaluated a suite of three alternatives for conducting the type, quality, and quantity of restoration sufficient to compensate the public for natural resource injuries and service losses resulting from releases of hazardous substances from Dow's Midland facility. Based on selection factors including location, technical feasibility, cost effectiveness, and types and timing of benefits, the Trustees identified a preferred alternative. The Draft RP/EA describes the Trustees' natural resource damage assessment, identifies and evaluates various alternatives considered by the Trustees to restore, replace or acquire the equivalent of injured natural resources, and identifies the Trustees' preferred alternative.

Under the preferred alternative described in the Draft RP/EA, Dow would implement a set of projects to protect, enhance, and restore habitat for natural resources as well as provide recreational fishing, hunting, park-use, and tribal-use services relevant to the impacted area; provide funding for a set of projects for the Trustees to implement either directly or through partnerships; and provide funding for future projects to be selected by the Trustees with public input, as well as funding to support long-term stewardship of the projects beyond Dow's obligations.

The publication of this notice opens a period for public comment on both the proposed Consent Decree and the Draft RP/EA.

Comments on the proposed Consent Decree should be addressed to the Deputy Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States of America, State of Michigan, and the Saginaw Chippewa Indian Tribe of Michigan* v. *The Dow Chemical Company,* D.J. Ref. No. 90–11–3–08593. All comments on the Consent Decree must be submitted no later than forty five (45) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Deputy Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the Consent Decree may be examined and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.*

The Justice Department will provide a paper copy of the Consent Decree and/or the Draft RP/EA upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

If requesting a paper copy of both the Consent Decree and the Draft RP/EA, please enclose a check or money order for $107.50 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy of the Consent Decree without the Draft RP/EA, the cost is $64.00. For a paper copy of only the Draft RP/EA, the cost is $43.50.

Comments on the Draft RP/EA should be addressed to Lisa L. Williams, U.S. Fish and Wildlife Service, and reference "TR RP/EA comment" in the subject line. All comments on the Draft RP/EA must be submitted no later than forty-five (45) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*t.river.nrda@fws.gov.*
By mail	Lisa L. Williams, U.S. Fish and Wildlife Service, 2651 Coolidge Road, East Lansing, MI 48823.

During the public comment period, the Draft RP/EA may be examined and downloaded at this U.S. Fish and Wildlife Service Midwest Region Natural Resource Damage Assessment website: *https://www.fws.gov/Midwest/es/ec/nrda/TittabawasseeRiverNRDA/.* As described above, a paper copy of the Draft RP/EA may be obtained from the Department of Justice upon written request and payment of reproduction costs.

Randall M. Stone,

Acting Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[Prohibited Transaction Exemption 2019–07; Exemption Application No. D–11962]

Notice of Exemption Involving Credit Suisse Group AG (CSG) and Its Current and Future Affiliates, Including Credit Suisse AG (CSAG) (Collectively, Credit Suisse or the Applicant), Located in Zurich, Switzerland

AGENCY: Employee Benefits Security Administration, U.S. Department of Labor.

ACTION: Notice of individual exemption.

SUMMARY: This document contains an exemption issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and/or the Internal Revenue Code of 1986 (the Code). This notice is for the following granted exemption: 2019–07, Credit Suisse AG, D–11962.

DATES: This five-year exemption will be in effect for five years beginning on the expiration of PTE 2015–14.

FOR FURTHER INFORMATION CONTACT: Mrs. Blessed Chuksorji-Keefe of the Department, telephone (202) 693–8567. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: A notice was published in the **Federal Register** of the pendency before the Department of a proposal to grant this exemption. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Department in Washington, DC. The notice also invited interested persons to submit comments on the requested exemption to the Department. In addition, the notice stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicant has represented that it has complied with the requirements of the notification to interested persons. One request for a hearing was received by the Department. Public comments were received by the Department as described in the granted exemption.

The notice of proposed exemption was issued and the exemption is being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996), transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Discussion

On July 16, 2019, the Department of Labor (the Department) published a notice of proposed exemption in the **Federal Register** at 84 FR 33966, for certain entities with specified relationships to CSAG (CS Affiliated QPAMs) to continue to rely upon the relief provided by PTE 84–14 for a period of five years,[1] notwithstanding CSAG's criminal conviction, as described herein. The Department is granting this exemption in order to ensure that Covered Plans[2] whose

[1] 49 FR 9494 (March 13, 1984), as corrected at 50 FR 41430 (October 10, 1985), as amended at 70 FR 49305 (August 23, 2005) and as amended at 75 FR 38837 (July 6, 2010), hereinafter referred to as PTE 84–14 or the QPAM exemption.

[2] The term "Covered Plan" is a plan subject to Part 4 of Title 1 of ERISA ("ERISA-covered plan")

assets are managed by a CS Affiliated QPAM may continue to benefit from the relief provided by PTE 84–14. The exemption is effective from November 21, 2019 through November 20, 2024 (the Exemption Period).

No relief from a violation of any other law is provided by this exemption, including any criminal conviction described in the proposed exemption, as clarified herein. Furthermore, the Department cautions that the relief in this exemption will terminate immediately if, among other things, an entity within the Credit Suisse corporate structure is convicted of a crime described in Section I(g) of PTE 84–14 (other than the Conviction) during the Exemption Period. The terms of this exemption have been specifically designed to promote conduct that adheres to basic fiduciary standards under ERISA and the Code. The exemption also aims to ensure that plans and IRAs can terminate relationships in an orderly and cost effective fashion in the event a plan or IRA fiduciary determines it is prudent for the plan or IRA to sever its relationship with an entity covered by the exemption.

Written Comments

The Department invited all interested persons to submit written comments and/or requests for a public hearing with respect to the notice of proposed exemption. All comments and requests for a hearing were due by August 30, 2019. The Department received three comment letters in response to the proposed exemption.[3] One letter did not identify substantive issues. Credit Suisse commented, and requested numerous revisions to the proposed exemption. Three individuals (Dr. Paul Morjanoff, James S. Henry and Andreas Frank) joined together in one letter (the Morjanoff Letter).[4] In the Morjanoff Letter, the individuals: Requested a hearing; commented on Credit Suisse's letter; and requested revisions to the proposed exemption.[5]

After considering these submissions, the Department has determined to grant the proposed exemption, with revisions, as described below.

I. The Credit Suisse Comment Letter

Credit Suisse Comment 1. Credit Suisse requested that the Department reconsider its decision to impose the exemption's annual audit requirement. Credit Suisse contends: (1) The conviction occurred outside of the CS Affiliated QPAMs, in an entity that is separate from the asset management business; (2) the audit proposed for the second five-year term of relief is more burdensome than the audit imposed under the existing exemption for the first five-year term; and (3) the exemption's Compliance Officer requirement is a reasonable substitute for a full audit. Credit Suisse represents that it has demonstrated a strong culture of compliance and commitment to addressing the Department's articulated concerns.

Department's Response: The Department is not eliminating the exemption's audit requirement. CSAG, which is the corporate parent of the CS Affiliated QPAMs, knowingly and willfully engaged in serious, substantial, pervasive and decades-long criminal misconduct. The audits required by this exemption are structured to ensure that CS Affiliated QPAMs remain insulated from CSAG and the criminal misconduct that gave rise to the Conviction. Each future annual audit is essential to the Department's determination that, prospectively, this exemption will be in the interest of, and protective of, Covered Plans, and will be administratively feasible, as required by Section 408(a) of ERISA.

Credit Suisse Comment 2. Credit Suisse requests that, if the audit requirement is not eliminated, the Department revise the certification process for an Audit Report's addendum. In this regard, Section I(i)(5) of the exemption provides, in pertinent part, that the CS Affiliated QPAM must promptly address or prepare a written plan of action to address any determination as to the adequacy of the Policies and Training and the auditor's recommendations (if any) with respect to strengthening the Policies and Training of the respective CS Affiliated QPAM. Any action taken or the plan of action to be taken by the respective CS Affiliated QPAM must be included in an addendum to the Audit Report (such addendum must be completed prior to the certification described in Section I(i)(7) below).

Section I(i)(7) of the exemption requires, in relevant part, that a senior executive officer of the CS Affiliated QPAM certify in writing, under penalty of perjury, that the CS Affiliated QPAM addressed, corrected, or remedied any noncompliance and inadequacy, or has an appropriate written plan to address any inadequacy regarding the Policies and Training identified in the Audit Report.

Credit Suisse states that ''it would be preferable'' to require that the addendum be completed as part of the senior executive officer certification process, rather than prior to it. According to Credit Suisse, requiring completion of addenda as part of the certification process would allow for meaningful, comprehensive input by the certifying officer.

Department's Response: The Department is not making the requested modification. The certification of a completed addendum by a CS executive officer ensures that a senior, knowledgeable corporate officer with relevant experience has reviewed the actual actions taken, or the actual plans of action that will be taken, by the CS Affiliated QPAM, to address any instances of the CS Affiliated QPAM's noncompliance or inadequacy. The Department is not persuaded that certification of actions, or plans of action, that are not finalized provides meaningful protection to Covered Plans. Further, nothing in the exemption precludes a certifying officer from providing meaningful, comprehensive input prior to the finalization of the addendum.

Credit Suisse Comment 3. Section I(i)(8) provides, in part: ''The Risk Committee, the Audit Committee, and CSAG's Board of Directors are provided a copy of each Audit Report. . . and the head of Compliance and the General Counsel must review the Audit Report for each CS Affiliated QPAM and must certify in writing, under penalty of perjury, that such officer has reviewed each Audit Report . . . .''

First, Credit Suisse states that the requirement that the Audit Report be provided to the Risk Committee, Audit Committee, and Board of Directors is an escalation compared to not only the

---

or a plan subject to Section 4975 of the Code (''IRA'') with respect to which a CS Affiliated QPAM relies on PTE 84–14, or with respect to which a CS Affiliated QPAM (or any CS affiliate) has expressly represented that the manager qualifies as a QPAM or relies on the QPAM class exemption (PTE 84–14). A Covered Plan does not include an ERISA-covered Plan or IRA to the extent the CS Affiliated QPAM has expressly disclaimed reliance on QPAM status or PTE 84–14 in entering into its contract, arrangement, or agreement with the ERISA-covered plan or IRA.

[3] The letters are summarized below. The commenters' letters are available in their entirety by contacting the Public Disclosure Room of the Employee Benefits Security Administration, Room N–1515, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210, and referencing Application No. D–11962.

[4] The letter included a statement that, ''Mr. Bartlett Naylor, Senior Financial Policy Advocate, Public Citizen's Congress Watch, also formally requests a hearing.'' However, Mr. Naylor did not submit any information that validates or supports this request.

[5] The Department requested that Credit Suisse respond, on the record, to the Morjanoff Letter. Credit Suisse's response may be requested through the Public Disclosure Office in the Employee Benefits Security Administration, Room N–1515, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210, by referencing Application No. D–11962.

existing exemption but to prior exemptions for similarly situated applicants. PTE 2015–14 contains no requirement to provide the audit report to a committee of the Board of Directors. Credit Suisse notes that the Department granted exemptions arising from criminal convictions of entities that conspired to manipulate the price of U.S. dollars and euros exchanged in the foreign currency exchange (FX) spot market (the FX exemptions),[6] and the Audit Reports in those exemptions were required to be provided to either the Risk Committee or the Audit Committee of the entity's Board of Directors (depending on their structure), not both, and not to the full Board.

Second, Credit Suisse requests that the condition be revised to require that an executive officer of Credit Suisse AG must review the Audit Report for each CS Affiliated QPAM and must certify in writing, under penalty of perjury, that such officer has reviewed each Audit Report.

Department's Response: The Department is not persuaded that the conditions in this exemption must mirror the conditions in the FX exemptions. First, the Department's individual exemptions and the conditions therein are not precedential. Further, the Department does not view all criminal convictions as analogous when determining whether to grant an individual exemption and how best to protect affected plans and IRAs. Each applicant for an exemption must demonstrate, and the Department must affirmatively find, on the record, that the requested relief is in the interest of, and protective of, affected plans and IRAs, and administratively feasible. Finally, the Department will not fail to impose a condition it believes will enhance the protection of affected plans and IRAs, merely because an earlier exemption does not contain that condition.

It is the Department's understanding that the primary function of Credit Suisse's Risk Committee is to assist the Credit Suisse Group AG Board of Directors in fulfilling its risk management responsibilities as defined by applicable law and regulations as well as Credit Suisse Group AG's articles of association and internal regulations. Additionally, it is the Department's understanding that the primary function of Credit Suisse's Audit Committee is to assist the Board of Directors in its oversight role by monitoring and assessing the financial statements of Credit Suisse. Given those roles, the Department believes that receipt of the Audit Report by either the Risk Committee or the Audit Committee will provide a meaningful protection to Covered Plans. Consistent with this requirement, the exemption mandates that a senior executive officer of the Risk or Audit Committee that received the Audit Report must review the Audit Report, and must certify in writing, under penalty of perjury, that the officer has reviewed the Audit Report.

Credit Suisse Comment 4. Section I(i)(9) requires, in part, that each CS Affiliated QPAM must provide its certified Audit Report to the Department no more than 30 days following the completion of the Audit Report. Credit Suisse requests that the time for delivering the audit report to the Department be extended from 30 days to 45 days.

Department's Response: The Department has revised Section I(i)(9) as requested.

Credit Suisse Comment 5. Credit Suisse requests that relief to the CS Affiliated QPAMs and to Covered Plans not be conditioned upon the independent auditor's cooperation with the Department or disclosure of work papers. In this regard, Section I(i)(11) provides, in part: ''The auditor must provide the Department, upon request, for inspection and review, access to all of the work papers created and used in connection with the audit, provided the access and inspection are otherwise permitted by law. . . .'' And Section I(q) provides, in part: ''A CS Affiliated QPAM will not fail to meet the terms of this five-year exemption solely because a different CS Affiliated QPAM fails to satisfy a condition for relief described in Sections I(c), (d), (h), (i), (j), (k), (l), (n), and (p); or, if the independent auditor described in Section I(i) fails a provision of the exemption other than the requirement described in Section I(i)(11), provided that such failure did not result from any actions or inactions of CSAG or its affiliates.''

Department's Response: The Department is not making the requested revision. The Department expects the CS Affiliated QPAMs and the Independent Auditor will make every effort to ensure that their respective responsibilities under the exemption are fulfilled, and to contact the Office of Exemption Determinations in a timely manner any time guidance is needed. The Department is not aware of any instance where an independent auditor has failed to meet its responsibilities under a QPAM Section I(g) individual exemption.

Credit Suisse Comment 6. Section I(a) of the proposed exemption provides, in part: ''For purposes of this exemption, including paragraph (c) below, ''participate in'' refers not only to active participation in the criminal conduct of CSAG that is the subject of the Conviction, but also to knowing approval of the criminal conduct, or knowledge of such conduct without taking active steps to prohibit such conduct, including reporting the conduct to such individual's supervisors, and to the Board of Directors. In this regard, unless the individual reasonably believed that his or her initial report was given an appropriate response within a reasonable time, the individual must further report the criminal conduct to the person or persons the individual reasonably expected would carry out the appropriate response.''

Credit Suisse requests that this condition be replaced with the language in the FX exemptions. No prior exemption has contained a requirement that an individual determine whether his or her initial report of criminal conduct was appropriately addressed, and Credit Suisse submits that this requirement is not necessary to protect Covered Plans, and the requirement is inherently problematic. According to Credit Suisse, instead of reflecting a state of affairs that existed at the time of the criminal conduct, the condition appears to be prospective in that it requires further action by any individual with knowledge of the criminal conduct. Credit Suisse states that even the parallel conditions in the exemptions granted to BNP Paribas in May 2018 and to UBS in February 2019, both for third convictions, applied only to the criminal conduct at issue and did not contain a prospective component. Credit Suisse performed the diligence required by the Department under the existing exemption. Credit Suisse states that the requirement is unjust and, with the significant passage of time, potentially impossible, to now require the investigation and diligence required by this provision.

Credit Suisse additionally argues that the condition as written involves a subjective assessment of the state of mind of the reporting individual at the time of the criminal conduct. According to Credit Suisse, this analysis requires the Applicant to speculate about what an individual may have been thinking, which is nearly impossible to comply

[6] Citicorp, JPMorgan Chase & Co. and Barclays PLC were criminally convicted for conspiring to manipulate the price of U.S. dollars and euros exchanged in the foreign currency exchange (FX) spot market (the FX convictions). QPAMs related to those entities received five year exemptions (the FX exemptions) allowing them to continue to rely on the relief provided by PTE 84–14, notwithstanding the FX convictions. See PTE 2017–05 (Citicorp), PTE 2017–03 (JPMorgan Chase & Co.) and PTE 2017–06 (Barclays).

with or confirm, especially five years removed from the criminal conduct.

The applicant also complains that the term ''reasonably'' is used three times and is not defined, resulting in a further lack of clarity as to whether and how this condition could be satisfied. Credit Suisse submits that this condition is not practically enforceable and that there is no need to deviate from the objective conditions used in the FX exemptions.

Department's Response: The Department is revising the exemption in part in response to the Credit Suisse request. The condition, as written, is consistent with an essential premise of the QPAM class exemption: That the QPAM, and those persons and entities that control the QPAM, act with integrity. The condition, as written, is also consistent with representations by Credit Suisse: That the criminal misconduct did not occur within any CS Affiliated QPAM. The Department carefully considered those representations when structuring the protective conditions of PTE 2015–14 and this exemption. The Department expects that each CS Affiliated QPAM will use every effort to ensure that this condition is met throughout the duration of the exemption. The Department is revising the condition by removing the last sentence of Section I(a) beginning with ''In this regard . . .'' as requested by Credit Suisse.

Credit Suisse Comment 7. Section I(d) of the proposed exemption provides, in part: At all times during the Exemption Period, a CS Affiliated QPAM will not use its authority or influence to direct an ''investment fund'' (as defined in Section VI(b) of PTE 84–14) that is subject to ERISA or the Code and managed by such CS Affiliated QPAM with respect to one or more Covered Plans, to enter into any transaction with CSAG or to engage CSAG to provide any service to such investment fund, for a direct or indirect fee borne by such investment fund, regardless of whether such transaction or service may otherwise be within the scope of relief provided by an administrative or statutory exemption. A Credit Suisse Affiliated QPAM will not fail this condition solely because:

(1) A CSAG affiliate serves as a local sub-custodian that is selected by an unaffiliated global custodian that, in turn, is selected by someone other than a CS Affiliated QPAM or CS Related QPAM;

(2) CSAG provides only necessary, non-investment, nonfiduciary services that support the operations of CS Affiliated QPAMs, at the CS Affiliated QPAM's own expense, and the Covered Plan is not required to pay any additional fee beyond its agreed-to asset management fee. This exception does not permit CSAG or its branches to provide any service to an investment fund managed by a CS Affiliated QPAM or CS Related QPAM; or

(3) CSAG employees are double-hatted, seconded, supervised, or subject to the control of a CS Affiliated QPAM.

First, regarding Section I(d)(1), Credit Suisse states: ''the formulation here is not practically workable and must be revised. Although Section I(d)(1) allows a CSAG affiliate to serve as a local sub-custodian, this condition does not benefit the Covered Plan clients of Credit Suisse because only the Bank and its branches—not an affiliate—currently serve as local sub-custodians for the four largest plan global custodians. While in some markets, it might be possible for a global custodian to select an affiliate or subsidiary of a bank, that situation is very rare.''

Department's Response: The Department is not revising Section I(d)(1). The criminal wrong-doing that is the subject of the Conviction was committed by CSAG, and the charging documents cite participation by CSAG subsidiaries. In this regard, as noted in the proposed exemption, on May 19, 2014, in the U.S. District Court for the Eastern District of Virginia (the District Court),[7] the U.S. Department of Justice charged CSAG with, and CSAG pled guilty to, one criminal count of conspiracy to violate Code section 7206(2).[8] The charging documents cited Credit Suisse and its subsidiaries, Credit Suisse Fides and Clariden Leu Ltd., for willfully aiding, assisting in, procuring, counseling, and advising the preparation and presentation of false income tax returns and other documents to the Internal Revenue Service of the Treasury Department (IRS), for decades, prior to and through approximately 2009. On May 19, 2014, pursuant to a plea agreement, CSAG entered a guilty plea for assisting U.S. citizens in federal income tax evasion. On November 21, 2014, the District Court entered a judgment of conviction against CSAG.

Credit Suisse has not adequately demonstrated that permitting CSAG and its subsidiaries and branches to participate in the sub-custody transactions described in Section I(d)(1) of the exemption would be in the interest of, and protective of, affected Covered Plans.

Second, regarding Section I(d)(2), Credit Suisse states: The condition should be clarified to permit CSAG to provide support services to the CS Affiliated QPAMs regardless of whether such support also benefits an investment fund managed by a QPAM, as long as the Covered Plan pays no additional fee. According to Credit Suisse, the condition, as written, creates confusion in any situation where CSAG may provide services to the CS Affiliated QPAMs because of the prohibition on services to investment funds managed by the QPAMs.

Department's Response: The Department is not revising the condition. Credit Suisse has not demonstrated that the condition creates confusion. In the Department's view, the condition is clear and unambiguous: CSAG may only provide necessary, non-investment, non-fiduciary services that support the operations of CS Affiliated QPAMs, at the CS Affiliated QPAM's own expense. Further, the Department notes that if it is unclear whether a particular arrangement or situation satisfies a term in the exemption, the CS Affiliated QPAM should resolve the ambiguity in light of the exemption's protective purposes. To the extent additional clarification is necessary, persons or entities should contact EBSA's Office of Exemption Determinations, at 202–693–8540.

Credit Suisse Comment 8. Section I(l) of the proposed exemption provides, in part: ''The CS Affiliated QPAM must comply with each condition of PTE 84–14, as amended, with the sole exception of the violation of Section I(g) of PTE 84–14 that is attributable to the Conviction. If, during the Exemption Period, an entity within the Credit Suisse corporate structure is convicted of a crime described in Section I(g) of PTE 84–14, (other than the Conviction), including a conviction in a foreign jurisdiction for a crime described in Section I(g) of PTE 84–14, relief in this exemption would terminate immediately.''

Credit Suisse requests that the Department ''reconsider its additional condition that a conviction in a foreign jurisdiction automatically would disqualify Credit Suisse from relief under Section I(g) of PTE 84–14 and under this individual exemption, as stated in Section I(l).'' Credit Suisse submits that, should the Department include the condition in Section I(l) for Credit Suisse and later reconsider its view, the CS Affiliated QPAMs would be treated differently from similarly

[7] *United States of America* v. *Credit Suisse AG,* Case Number 1:14–cr–188–RBS.

[8] Section 7206(2) of the Code prohibits willfully aiding, assisting, procuring, counseling, or advising the preparation or presentation of false income tax returns. Section 371 of Title 18 of the United States Code generally prohibits two or more persons from conspiring either to commit any offense against the United States or to defraud the United States.

situated applicants and the regulated community as a whole.

Department's Response: The Department has removed the condition's reference to foreign convictions. This revision should not be interpreted, however, as the Department's affirmation that a violation of Section I(g) of PTE 84–14 does not occur when a person or entity is convicted in a foreign jurisdiction for a crime described in Section I(g) of PTE 84–14.

Credit Suisse Comment 9. Credit Suisse requests three revisions to Sections I(a) and I(b) of the proposed exemption. Section I(a) provides, in relevant part: ''The CS Affiliated QPAMs (including their officers, directors, agents other than CSAG, employees of such QPAMs, and CSAG employees described in subparagraph (d) above) did not know of, have reason to know of, or participate in the criminal conduct of CSAG that is the subject of the Conviction . . . ''

Section I(b) of the proposed exemption provides: ''The CS Affiliated QPAMs and the CS Related QPAMs (including their officers, directors, agents other than CSAG, employees of such QPAMs, and CSAG employees described in subparagraph (d) above) did not receive direct compensation, or knowingly receive indirect compensation, in connection with the criminal conduct of CSAG that is the subject of the Conviction.''

First, Credit Suisse requests that the Department qualify that the conditions apply only to employees of the CS Affiliated and Related QPAMs who had responsibility for or exercised authority in connection with the management of plan assets. Credit Suisse states that comparable sections in the FX exemptions covered only QPAM employees ''who had responsibility for, or exercised authority in connection with the management of plan assets.''

Second, Credit Suisse states that the phrase ''or knowingly receive indirect compensation'' implicates the same problems as the definition of ''participated in,'' described above. Credit Suisse states that it performed the diligence required by the Department under the existing exemption, and it is potentially impossible, given the passage of time, to perform the investigation and diligence required by this provision.

Third, Credit Suisse requests that the Department clarify that references to CSAG employees described in subparagraph (d) of the proposed exemption, is intended to refer only to subparagraph (d)(3).

Department's Response: The Department is not making the first two requested revisions. The FX convictions involve criminal misconduct that occurred within non-asset management divisions of certain entities that acted as QPAMs. Consistent with those facts, Section I(a) of each FX exemption precludes relief if a QPAM's asset management division employs an individual who knew of the misconduct, had reason to know of the misconduct, or who participated in the relevant FX criminal misconduct. Also consistent with those facts, Section I(b) of each FX exemption precludes relief if an employee in a QPAM's asset management division received direct compensation or knowingly received indirect compensation from participating in the criminal conduct that gave rise to the relevant FX conviction.

It is the Department's understanding, consistent with Credit Suisse's representations, that the CSAG Conviction arose from criminal misconduct that occurred outside any CS Affiliated QPAM. No CS Affiliated QPAM employee (asset management or otherwise) knew of, had reason to know of, or participated in, the criminal misconduct that gave rise to the CSAG Conviction. Section I(a) and Section I(b) of the exemption are structured consistent with both the record and with Credit Suisse's representations. Credit Suisse has not demonstrated that it would be in the interest of Covered Plans if individuals who participated in, or were compensated from, the CSAG criminal misconduct were permitted to work in a non-asset management division of a CS Affiliated QPAM.

Regarding Credit Suisse's comment regarding the difficulty a CS Affiliated QPAM may have in complying with these conditions, the Department expects that each CS Affiliated QPAM will use every effort to ensure that the conditions are complied with throughout the duration of the exemption.

Credit Suisse's third requested revision is consistent with the Department's intent, and the Department has made the requested revision.

Credit Suisse Comment 10. Section I(f) provides: ''A CS Affiliated QPAM or a CS Related QPAM did not exercise authority over the assets of any plan subject to Part 4 of Title I of ERISA (an ERISA-covered plan) or section 4975 of the Code (an IRA) in a manner that it knew or should have known would: further criminal conduct that is the subject of the Conviction; or cause the CS Affiliated QPAM or CS Related QPAM, its affiliates, or related parties to directly or indirectly profit from the criminal conduct that is the subject of the Conviction.''

Credit Suisse requests that the term ''related parties'' be removed from this condition. Credit Suisse states that the term is undefined and should be removed.

For clarity, the Department is removing the term ''related parties.''

Credit Suisse Comment 11. Section I(h)(1) provides, in pertinent part: ''Each CS Affiliated QPAM must continue to maintain, adjust (to the extent necessary) or immediately implement and follow written policies and procedures (the Policies). The Policies must require and be reasonably designed to ensure that:

(i) The asset management decisions of the CS Affiliated QPAMs are conducted independently of CSAG's corporate management and business activities, and without considering any fee a CS-related local sub-custodian may receive from those decisions. This condition does not preclude a CS Affiliated QPAM from receiving publicly available research and other widely available information from a CSAG affiliate;

* * * * *

(vi) The CS Affiliated QPAM complies with the terms of this five-year exemption, and CSAG complies with the terms of Section I(d)(2).''

First, Credit Suisse states that the phrase ''or immediately implement'' should be deleted. ''Immediately'' is not defined, and in Credit Suisse's view, it is unrealistic for the CS Affiliated QPAMs to ''immediately implement'' the policies required under the exemption. Credit Suisse requests that the Department revise the condition, such that each CS Affiliated QPAM must continue to maintain and follow or, within six (6) months of the effective date of this exemption, adjust (to the extent necessary) and implement written policies.

Department's Response: Credit Suisse has not demonstrated or supported its contention that it would be ''unrealistic'' for the CS Affiliated QPAMs to ''immediately implement'' the policies required by the exemption. However, the Department believes that Covered Plans would be adequately protected if the CS Affiliated QPAMs continue to follow and maintain policies the Policies required by PTE 2015–14 for six months following the effective date of this exemption (*i.e.,* until May 20, 2020). Notwithstanding this, the Department notes that the policies required by PTE 2015–14 do not cover transactions or arrangements described in Section I(d) of this exemption. Therefore, the Department is revising Section I(h)(1), which now begins as follows: Prior to May 21, 2020, a CS Affiliated QPAM may continue to maintain, follow and implement the policies described in Section I(h)(1) of PTE 2015–14. Otherwise, each CS Affiliated QPAM must maintain, adjust (to the extent necessary), implement, and follow the written policies and procedures described below (the Policies). Notwithstanding the preceding sentence, a CS Affiliated QPAM may not engage in any transaction or arrangement described in Section I(d)(1) through (3) of this exemption prior to the date the Policies have been developed, implemented and followed.

Second, Credit Suisse notes that Section I(h)(1)(i) includes the additional prohibition that asset management decisions are made ''without considering any fee a CS-related local sub-custodian may receive from those decisions.'' Credit Suisse states that the scope of this condition is unclear by virtue of the ambiguous word ''considering. . .'' Credit Suisse requests that the Department substitute the following language: ''without putting the fact of any fee a CS-related local sub-custodian may receive before the interest of the plan client.''

Department's Response: The Department is not revising the condition. Credit Suisse has not demonstrated why the term ''considering'' is ambiguous. As written, the condition makes it clear that the Policies must require and be reasonably designed to ensure that the CS Affiliated QPAM's asset management decisions do not take into account the fee a CS-related local sub-custodian may receive from those decisions.

Third, Credit Suisse states that the second clause of Section I(h)(1)(vi) ''is impracticable for the reasons [Credit Suisse raised] in connection with Section I(d)(2).''

Department's Response: The Department is not revising the second clause of Section I(h)(1)(vi) for the same reasons the Department expressed in response to Credit Suisse's request to revise Section I(d)(2).

Credit Suisse Comment 12. Section I(h)(2) provides: ''Any violation of, or failure to comply with, an item in subparagraphs (h)(1)(ii) through (vi) of this section, is corrected as soon as reasonably possible upon discovery, or as soon after the QPAM reasonably should have known of the noncompliance (whichever is earlier), and any such violation or compliance failure not so corrected is reported, upon discovery of such failure to so correct, in writing, to appropriate corporate officers, the head of Compliance and the General Counsel (or their functional equivalent) of the relevant CS Affiliated QPAM, and the independent auditor responsible for reviewing compliance with the Policies. A CS Affiliated QPAM will not be treated as having failed to develop, implement, maintain, or follow the Policies, provided that it corrects any instance of noncompliance as soon as reasonably possible upon discovery, or as soon as reasonably possible after the QPAM reasonably should have known of the noncompliance (whichever is earlier), and provided that it adheres to the reporting requirements set forth in this paragraph (2).''

Credit Suisse states that the notification requirements of this condition are unclear by virtue of the phrase ''appropriate corporate officers.'' Credit Suisse suggests instead that subsection (h)(2) read as follows: ''Any violation of, or failure to comply with, an item in subparagraphs (h)(1)(ii) through (vi) of this section, is corrected as soon as reasonably possible upon discovery, or as soon after the QPAM reasonably should have known of the noncompliance (whichever is earlier), and any such violation or compliance failure not so corrected is reported, upon discovery of such failure to so correct, in writing, to the head of Compliance and the General Counsel (or their functional equivalent) of the relevant CS Affiliated QPAM, and the independent auditor responsible for reviewing compliance with the Policies. A CS Affiliated QPAM will not be treated as having failed to develop, implement, maintain, or follow the Policies, provided that it corrects any instance of noncompliance as soon as reasonably possible upon discovery, or as soon as reasonably possible after the QPAM reasonably should have known of the noncompliance (whichever is earlier), or provided that it adheres to the reporting requirements set forth in this paragraph (2), if applicable.''

Department's Response: The Department is removing the condition's reference to ''appropriate corporate officers.'' However, the Department is not making Credit Suisse's remaining requested revisions. Credit Suisse has not demonstrated why a CS Affiliated QPAM should not be treated as having failed to develop, implement, maintain or follow the Policies merely because it adheres to the condition's reporting requirements.

Credit Suisse Comment 13. Section I(h)(3) provides, in part: ''Each CS Affiliated QPAM must maintain, adjust (to the extent necessary), and implement a program of training (the Training), conducted at least annually, for all relevant CS Affiliated QPAM asset/portfolio management, trading, legal, compliance, and internal audit personnel. The Training must:

* * * * *

(ii) Be conducted by a professional who has been prudently selected and who has appropriate technical training and proficiency with ERISA and the Code.''

Credit Suisse requests confirmation that the training may be conducted electronically or via a website. In addition, Credit Suisse requests a period of six (6) months from the effective date of the exemption to adjust and implement training as necessary.

Department's Response: The Department declines to incorporate the Applicant's requested language regarding the use of electronic or web-based methods in conducting the Training. Further, the training required by this exemption is substantially similar to the training required by PTE 2015–14, and Credit Suisse has not demonstrated the need to delay the training required by this exemption for six months. Given the importance of this condition, the Department is not revising the condition to allow the six month adjustment/implementation period sought by Credit Suisse.

Credit Suisse Comment 14. Section I(k)(1) provides: ''Each CS Affiliated QPAM provides a notice of the five-year exemption, along with a separate summary describing the facts that led to the Conviction (the Summary), which have been submitted to the Department, and a prominently displayed statement (the Statement) that the Conviction results in a failure to meet a condition in PTE 84–14, to each sponsor and beneficial owner of a Covered Plan that entered into a written asset or investment management agreement with a CS Affiliated QPAM, or the sponsor of an investment fund in any case where a CS Affiliated QPAM acts as a sub-adviser to the investment fund in which such ERISA-covered plan and IRA invests. The notice, Summary and Statement must be provided prior to, or contemporaneously with, the client's receipt of a written asset management agreement from the CS Affiliated QPAM. If this five-year exemption is granted, the clients must receive a **Federal Register** copy of the notice of final five-year exemption within sixty (60) days of its publication in the **Federal Register**. The notice may be delivered electronically (including by an email that has a link to the five-year exemption).''

Credit Suisse requests that the sixty-day period to provide notice of the final exemption run from the effective date, rather than the date of publication in the **Federal Register**.

Department's Response. The Department has revised the condition as requested.

Credit Suisse Comment 15. Section I(m)(1) provides:

''By May 20, 2020, CSAG designates a senior compliance officer (the Compliance Officer) who will be responsible for compliance with the Policies and Training requirements described herein. The Compliance Officer must conduct an annual review for each twelve month period, beginning on November 21, 2019, (the Annual Review) to determine the adequacy and effectiveness of the implementation of the Policies and Training. With respect to the Compliance Officer, the following conditions must be met:

* * * * *

(ii) The Compliance Officer must have a direct reporting line to the highest ranking corporate officer in charge of compliance for asset management.''

Credit Suisse requests that the condition be changed to require a CS Affiliated QPAM, rather than the parent company, to designate the senior compliance officer. In addition, Credit Suisse requests that the Department clarify that each relevant line of business may designate its own compliance officer. Finally, Credit Suisse requests clarification that the designated compliance officer report to (or be) the highest ranking corporate officer in charge of compliance for the CS Affiliated QPAM.

Department's Response: The Department is making the requested revisions.

Credit Suisse Technical Corrections Request

In addition to the substantive comments above, Credit Suisse requested that certain technical clarifications be made to the proposed exemption. The Department's responses are described below.

Technical Correction Request 1. Section I(h)(1)(iv) provides: ''Any filings or statements made by the CS Affiliated QPAM to regulators, including but not limited to, the Department of Labor, the Department of the Treasury, the Department of Justice, and the Pension Benefit Guaranty Corporation, on behalf of, or in relation to Covered Plans are materially accurate and complete, to the best of such QPAM's knowledge at that time . . . .''

Credit Suisse requests that the Department strike the phrase ''in relation to Covered Plans'' in Section (I)(h)(1)(iv). Section (I)(h)(1)(v) includes ''communications with such regulators with respect to Covered Plans,'' which encompasses all communications that would potentially be covered by Section I(h)(1)(iv). Because a similar requirement is included in both subsections, the assumption is that a different meaning is intended.

Department's Response: The Department is not making the requested revision. The phrase ''in relation to Covered Plans'' is sufficiently clear such that the requested revision is not warranted.

Technical Correction Request 2. Section I(i)(5)(i) provides, in part, that ''the Audit Report must include the auditor's specific determinations regarding the adequacy of the CS Affiliated QPAM's Policies and Training; the CS Affiliated QPAM's compliance with the Policies and Training; the need, if any, to strengthen such Policies and Training; and any instance of the respective CS Affiliated QPAM's noncompliance with the written Policies and Training described in Section I(h) above. The CS Affiliated QPAMs must promptly address any noncompliance. The CS Affiliated QPAM must promptly address or prepare a written plan of action to address any determination as to the adequacy of the Policies and Training and the auditor's recommendations (if any) with respect to strengthening the Policies and Training of the respective CS Affiliated QPAM.''

Credit Suisse requests that the requirement in Section I(i)(5)(i) to ''promptly'' address any noncompliance be revised to be ''as soon as reasonably possible.'' This would align the procedure with the provisions for addressing noncompliance relating to the policies, set forth in Section I(h)(2), which require action ''as soon as reasonably possible.''

Department's Response: The Department is not making the requested revision. The term ''promptly'' is consistent with the Department's view that addressing any noncompliance must be an important and high priority for a CS Affiliated QPAM.

Technical Correction Request 3. Section I(i)(7) provides, in part: ''With respect to each Audit Report, the General Counsel, or one of the three most senior executive officers of the CS Affiliated QPAMs to which the Audit Report applies, must certify in writing, under penalty of perjury, that the officer has reviewed the Audit Report and this five-year exemption; and that to the best of such officer's knowledge at the time the CS Affiliated QPAM addressed, corrected, or remedied any noncompliance and inadequacy or has an appropriate written plan to address any inadequacy regarding the Policies and Training identified in the Audit Report.''

Credit Suisse requests that the Department replace ''General Counsel'' in Section I(i)(7) with ''general counsel,'' and clarify that the certification of the Audit Report may come from the respective CS Affiliated QPAM's general counsel or one of its three most senior officers.

Department's Response: Given that the criminal misconduct that gave rise to the CSAG Conviction did not occur at any CS Affiliated QPAM, the Department has replaced ''General Counsel'' with ''general counsel.'' The condition is otherwise clear and reflects the Department's intent as to who must certify the Audit Report.

Technical Correction Request 4. Section I(i)(12) provides: ''CSG must notify the Department of a change in the independent auditor no later than two (2) months after the engagement of a substitute or subsequent auditor and must provide an explanation for the substitution or change including a description of any material disputes between the terminated auditor and CSAG.''

Credit Suisse requests that the reference to ''CSG'' in Section I(i)(12) be revised to read, ''CSAG and/or the CS Affiliated QPAMs.''

Department's Response: The Department has revised the exemption consistent with this request.

II. The Morjanoff Letter

a. *The Individuals' Hearing Request:* The three individuals that submitted the Morjanoff Letter stated that ''it is impractical to present all the necessary evidence as comments, but it can be presented at a hearing. Briefly, the reasons are:

1. Recent investigations and court decisions show that CS provided false information for the first exemption.

2. It has declined to correct this false information since then.

3. CS lodged their comment on the last day and was not publicly visible until after public comments had closed.

4. That CS comment requested a relaxation of waiver conditions based on highly dubious assumptions.

5. In essence, this would tend to recreate conditions which could facilitate illegal activity based on the same general scheme as facilitated the criminal activity for which it was convicted.

6. That scheme was based on having a set of 'ineffective rules & policies' for appearances while 'inciting' staff to

break those 'rules & policies' for the bank's illegal profit.

7. Quasi 'third parties' were created which pretended to be 'external' to the bank, but in fact operated as if they were a part of the bank.

8. Because thousands of bank employees became accustomed to such extreme double standards, special remediation is required.

9. The public have a right and an urgent need to respond to CS's proposals.

10. Since comments have closed, that would have to be at a public hearing.

11. The sophistication of the bank's deceptions go beyond what can be reasonably expected of the DOL or pension funds to adequately discern.

12. As further proof of the bank's absence of seriousness in correcting its illegal activities, we note that it continues to refuse to respond to formal notifications of crime in the bank sent to top management.

13. A complete analysis of the flaws in CS's submissions is beyond the scope of a comment.''

The individuals stated further, ''A public hearing is essential: CS's submission contains false statements, omissions & half-truths while the DOL can't be expected to have the expertise to see through CS's schemes.''

The individuals attached numerous links to recent court cases and other sources. The individuals added, ''The matters raised are not merely matters of law and the factual issues identified are too complex to be adequately explored through the submission of evidence in written (including electronic) form.'' The individuals concluded, ''[s]ince the 'CS Public Hearing' was held on January 15, 2015, a mass of new evidence has become publicly available which dramatically changes the context of the application. Had this knowledge been available previously, it is likely that the previous application would have either been rejected or the waiver substantially modified. Broadly speaking, CS would have known these facts and their non-disclosure represents a serious lack of candour and likely a sufficient breach of requirements to summarily reject the current application.''

Department's Response to the Individuals' Hearing Request: The Department declines to hold a hearing. The individuals articulated and supported their views in a twelve page comment letter. The individuals had adequate time (a 45 day comment period, plus one additional week) to supplement their letter with all relevant information that was available to them. The individuals did not demonstrate that the issues they raised in the Morjanoff Letter would be more fully or expeditiously explored at a hearing.

Regarding the three individuals' contention that, ''[s]ince the 'CS Public Hearing' was held on January 15, 2015, a mass of new evidence has become publicly available which dramatically changes the context of the application[,]'' the Department believes the Independent Auditor is best suited to determine whether any newly uncovered evidence affects Credit Suisse's compliance with requirements of the exemption. An essential premise in the Department's determination to grant PTE 2015–14 (and this exemption) is that a qualified independent auditor will annually determine whether each condition of the exemption had been met over the prior year. This includes an in-depth analysis of a wide range of transactions, arrangements, policies, agreements, and procedures relating to the operation of, and services provided by, the Credit Suisse QPAMs. Further, in the Department's view, the factual issues described by the individuals in the Morjanoff Letter could be fully explored through the submission of evidence in written (including electronic) form, which the individuals failed to submit.

b. *The Individuals' Response to the Credit Suisse Comment Letter:* In the Morjanoff Letter, the three individuals took issue with many of the revisions that Credit Suisse requested in their response letter. With respect to the Credit Suisse-requested revisions which the Department accepted, the three individuals stated the following:

(a) Regarding Credit Suisse's request to remove the term ''related parties'' from Section I(f), the three individuals state that Credit Suisse structured their crime so that undefined ''quasi-third parties'' benefited from and concealed criminal activity. ''It is futile to attempt to define related parties while CS uses its creativity in manufacturing them. Details can be provided at a public hearing.''

(b) The three individuals state that the exemption should specify the actual affiliates who will receive relief under the exemption. The individuals recommend that relief should be limited to CSAM LLC and CSAM Ltd, ''who are the only affiliates that currently manage the assets of ERISA-covered plans on a discretionary basis.'' The individuals state that Credit Suisse Securities (USA) LLC ''has participated in all manner of illegal, criminal and disreputable activities (as described in previous submissions and subsequently)'' and should not be permitted to be QPAM. The individuals state that if relief is available to potentially other affiliates, ''they should be named now, and their suitability examined at a public hearing.''

Department's Response: The Department does not agree the suitability of future CS Affiliated QPAMs must be examined at a public hearing. This exemption contains a suite of protective conditions, including an in-depth annual audit of, among other things, each CS Affiliated QPAM's transactions, training and policies, as well as each QPAM's compliance with the terms of this exemption. The Department has reviewed prior audits of CS Affiliated QPAMs under PTE 2015–14, and the Department believes the conditions of this exemption are sufficiently protective of Covered Plans with assets managed by current and future QPAMs.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of ERISA or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of ERISA, which, among other things, require a fiduciary to discharge its duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of ERISA; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) In accordance with section 408(a) of ERISA and section 4975(c)(2) of the Code, the Department makes the following determinations: The exemption is administratively feasible, the exemption is in the interests of affected plans and of their participants and beneficiaries, and the exemption is protective of the rights of participants and beneficiaries of such plans;

(3) The exemption is supplemental to, and not in derogation of, any other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The availability of this exemption is subject to the express condition that the material facts and representations contained in the application accurately describe all material terms of the transaction which is the subject of the exemption.

Five-Year Exemption

The Department is granting a five-year exemption under the authority of section 408(a) of the Employee Retirement Income Security Act of 1974, as amended (ERISA), and section 4975(c)(2) of the Internal Revenue Code of 1986, as amended (the Code), and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, 66644, October 27, 2011).[9]

Section I. Covered Transactions

The CS Affiliated QPAMs, as further defined in Section II(d), will not be precluded from relying on the exemptive relief provided by Prohibited Transaction Exemption 84–14 (PTE 84–14),[10] notwithstanding the ''Conviction'' against CSAG (as further defined in Section II(a)),[11] during the Exemption Period, provided that the following conditions are satisfied:

(a) The CS Affiliated QPAMs and the CS Related QPAMs (including their officers, directors, agents other than CSAG, employees of such QPAMs, and CSAG employees described in subparagraph (d) below) did not know of, have reason to know of, or participate in the criminal conduct of CSAG that is the subject of the Conviction. For purposes of this exemption, including paragraph (c) below, ''participate in'' refers not only to active participation in the criminal conduct of CSAG that is the subject of the Conviction, but also to knowing approval of the criminal conduct, or knowledge of such conduct without taking active steps to prohibit such conduct, including reporting the conduct to such individual's supervisors, and to the Board of Directors.

(b) The CS Affiliated QPAMs and the CS Related QPAMs (including their officers, directors, agents other than CSAG, employees of such QPAMs, and CSAG employees described in subparagraph (d)(3) below) did not receive direct compensation, or knowingly receive indirect compensation, in connection with the criminal conduct of CSAG that is the subject of the Conviction;

(c) The CS Affiliated QPAMs will not employ or knowingly engage any of the individuals that ''participated in'' the criminal conduct of CSAG that is the subject of the Conviction;

(d) At all times during the Exemption Period, a CS Affiliated QPAM will not use its authority or influence to direct an ''investment fund'' (as defined in Section VI(b) of PTE 84–14) that is subject to ERISA or the Code and managed by such CS Affiliated QPAM with respect to one or more Covered Plans, to enter into any transaction with CSAG or to engage CSAG to provide any service to such investment fund, for a direct or indirect fee borne by such investment fund, regardless of whether such transaction or service may otherwise be within the scope of relief provided by an administrative or statutory exemption. A CS Affiliated QPAM will not fail this condition solely because:

(1) A CSAG affiliate serves as a local sub-custodian that is selected by an unaffiliated global custodian that, in turn, is selected by someone other than a CS Affiliated QPAM or CS Related QPAM;

(2) CSAG provides only necessary, non-investment, non-fiduciary services that support the operations of CS Affiliated QPAMs, at the CS Affiliated QPAM's own expense, and the Covered Plan is not required to pay any additional fee beyond its agreed-to asset management fee. This exception does not permit CSAG or its branches to provide any service to an investment fund managed by a CS Affiliated QPAM or CS Related QPAM; or

(3) CSAG employees are double-hatted, seconded, supervised, or subject to the control of a CS Affiliated QPAM;

(e) Any failure of a CS Affiliated QPAM to satisfy Section I(g) of PTE 84–14 arose solely from the Conviction;

(f) A CS Affiliated QPAM or a CS Related QPAM did not exercise authority over the assets of any plan subject to Part 4 of Title I of ERISA (an ERISA-covered plan) or section 4975 of the Code (an IRA) in a manner that it knew or should have known would: Further criminal conduct that is the subject of the Conviction; or cause the CS Affiliated QPAM or CS Related QPAM or its affiliates to directly or indirectly profit from the criminal conduct that is the subject of the Conviction;

(g) CSAG will not act as a fiduciary within the meaning of section 3(21)(A)(i) or (iii) of ERISA, or section 4975(e)(3)(A) and (C) of the Code, with respect to ERISA-covered Plan and IRA assets, except it may act as such a fiduciary (1) with respect to employee benefit plans sponsored for its own employees or employees of an affiliate; or (2) in connection with securities lending services of the New York Branch of CSAG. CSAG will not be treated as violating the conditions of the exemption solely because it acted as an investment advice fiduciary within the meaning of section 3(21)(A)(ii) of ERISA or section 4975(e)(3)(B) of the Code;

(h)(1) Prior to May 21, 2020, a CS Affiliated QPAM may continue to maintain, follow and implement the policies described in Section I(h)(1) of PTE 2015–14. Otherwise, each CS Affiliated QPAM must maintain, adjust (to the extent necessary), implement, and follow the written policies and procedures described below (the Policies). Notwithstanding the preceding sentence, a CS Affiliated QPAM may not engage in any transaction or arrangement described in Section I(d)(1) through (3) of this exemption prior to the date the Policies below have been developed, implemented and followed.

The Policies must require and be reasonably designed to ensure that:

(i) The asset management decisions of the CS Affiliated QPAMs are conducted independently of CSAG's corporate management and business activities, and without considering any fee a CS-related local sub-custodian may receive from those decisions. This condition does not preclude a CS Affiliated QPAM from receiving publicly available research and other widely available information from a CSAG affiliate;

(ii) The CS Affiliated QPAM fully complies with ERISA's fiduciary duties, and with ERISA and the Code's prohibited transaction provisions, in each case, as applicable, with respect to each Covered Plan, and does not knowingly participate in any violation of these duties and provisions with respect to Covered Plans;

(iii) The CS Affiliated QPAM does not knowingly participate in any other person's violation of ERISA or the Code with respect to Covered Plans;

(iv) Any filings or statements made by the CS Affiliated QPAM to regulators, including but not limited to, the Department of Labor, the Department of the Treasury, the Department of Justice,

[9] For purposes of this five-year exemption, references to section 406 of Title I of ERISA, unless otherwise specified, should be read to refer as well to the corresponding provisions of section 4975 of the Code.

[10] 49 FR 9494 (March 13, 1984), as corrected at 50 FR 41430 (October 10, 1985), as amended at 70 FR 49305 (August 23, 2005), and as amended at 75 FR 38837 (July 6, 2010).

[11] Section I(g) of PTE 84–14 generally provides that ''[n]either the QPAM nor any affiliate thereof . . . nor any owner . . . of a 5 percent or more interest in the QPAM is a person who within the 10 years immediately preceding the transaction has been either convicted or released from imprisonment, whichever is later, as a result of'' certain criminal activity therein described.

and the Pension Benefit Guaranty Corporation, on behalf of, or in relation to Covered Plans are materially accurate and complete, to the best of such QPAM's knowledge at that time;

(v) To the best of its knowledge at the time, the CS Affiliated QPAM does not make material misrepresentations or omit material information in its communications with such regulators with respect to Covered Plans, or make material misrepresentations or omit material information in its communications with Covered Plans; and

(vi) The CS Affiliated QPAM complies with the terms of this five-year exemption, and CSAG complies with the terms of Section I(d)(2);

(2) Any violation of, or failure to comply with, an item in subparagraphs (h)(1)(ii) through (vi) of this section, is corrected as soon as reasonably possible upon discovery, or as soon after the QPAM reasonably should have known of the noncompliance (whichever is earlier), and any such violation or compliance failure not so corrected is reported, upon discovery of such failure to so correct, in writing, to the head of Compliance and the general counsel (or their functional equivalent) of the relevant CS Affiliated QPAM, and the independent auditor responsible for reviewing compliance with the Policies. A CS Affiliated QPAM will not be treated as having failed to develop, implement, maintain, or follow the Policies, provided that it corrects any instance of noncompliance as soon as reasonably possible upon discovery, or as soon as reasonably possible after the QPAM reasonably should have known of the noncompliance (whichever is earlier), and provided that it adheres to the reporting requirements set forth in this paragraph (2);

(3) Each CS Affiliated QPAM must maintain, adjust (to the extent necessary), and implement a program of training (the Training), conducted at least annually, for all relevant CS Affiliated QPAM asset/portfolio management, trading, legal, compliance, and internal audit personnel. The Training must:

(i) At a minimum, cover the Policies, ERISA and Code compliance (including applicable fiduciary duties and the prohibited transaction provisions), ethical conduct, the consequences for not complying with the conditions of this five-year exemption (including any loss of exemptive relief provided herein), and prompt reporting of wrongdoing; and

(ii) Be conducted by a professional who has been prudently selected and who has appropriate technical training and proficiency with ERISA and the Code;

(i)(1) Each CS Affiliated QPAM submits to three audits, conducted by an independent auditor, who has been prudently selected and who has appropriate technical training and proficiency with ERISA and the Code, to evaluate the adequacy of, and each CS Affiliated QPAM's compliance with, the Policies and Training described herein. The audit requirement must be incorporated in the Policies. The first audit must cover the 24 month period that begins on November 21, 2019. The second audit must cover the 24 month period that begins on November 21, 2021, and the third audit must cover the 12 month period that begins on November 21, 2023. Each audit must be completed no later than six (6) months after the period to which the audit applies;[12]

(2) Within the scope of the audit and to the extent necessary for the auditor, in its sole opinion, to complete its audit and comply with the conditions for relief described herein, and only to the extent such disclosure is not prevented by state or federal statute, or involves communications subject to attorney client privilege, each CS Affiliated QPAM and, if applicable, CSAG, will grant the auditor unconditional access to its business, including, but not limited to: Its computer systems; business records; transactional data; workplace locations; training materials; and personnel. Such access is limited to information relevant to the auditor's objectives, as specified by the terms of this exemption;

(3) The auditor's engagement must specifically require the auditor to determine whether each CS Affiliated QPAM has developed, implemented, maintained, and followed the Policies in accordance with the conditions of this five-year exemption, and has developed and implemented the Training, as required herein;

(4) The auditor's engagement must specifically require the auditor to test each CS Affiliated QPAM's operational compliance with the Policies and Training. In this regard, the auditor must test a sample of: (1) Each CS Affiliated QPAM's transactions involving Covered Plans; (2) each CS Affiliated QPAM's transactions involving CSAG affiliates that serve as a local sub-custodian. The samples must be sufficient in size and nature to afford the auditor a reasonable basis to determine the QPAM's operational compliance with the Policies and Training;

(5) For each audit, on or before the end of the relevant period described in Section I(i)(1) for completing the audit, the auditor must issue a written report (the Audit Report) to CSAG and the CS Affiliated QPAMs to which the audit applies that describes the procedures performed by the auditor during the course of its examination. The auditor, at its discretion, may issue a single consolidated Audit Report that covers all the CS Affiliated QPAMs. The Audit Report must include the auditor's specific determinations regarding:

(i) The adequacy of the CS Affiliated QPAM's Policies and Training; the CS Affiliated QPAM's compliance with the Policies and Training; the need, if any, to strengthen such Policies and Training; and any instance of the respective CS Affiliated QPAM's noncompliance with the written Policies and Training described in Section I(h) above. The CS Affiliated QPAMs must promptly address any noncompliance. The CS Affiliated QPAM must promptly address or prepare a written plan of action to address any determination as to the adequacy of the Policies and Training and the auditor's recommendations (if any) with respect to strengthening the Policies and Training of the respective CS Affiliated QPAM. Any action taken or the plan of action to be taken by the respective CS Affiliated QPAM must be included in an addendum to the Audit Report (such addendum must be completed prior to the certification described in Section I(i)(7) below). In the event such a plan of action to address the auditor's recommendation regarding the adequacy of the Policies and Training is not completed by the time of submission of the Audit Report, the following period's Audit Report must state whether the plan was satisfactorily completed. Any determination by the auditor that the respective CS Affiliated QPAM has implemented, maintained, and followed sufficient Policies and Training must not be based solely or in substantial part on an absence of evidence indicating noncompliance. In this last regard, any finding that a CS Affiliated QPAM has complied with the requirements under this subparagraph must be based on evidence that the particular CS Affiliated QPAM has actually implemented, maintained, and followed the Policies and Training required by this exemption. Furthermore, the auditor must not solely rely on the Annual Exemption Report created by the compliance officer (the Compliance Officer), as described in Section I(m)

[12] Periods prior to November 21, 2019 must be audited consistent with PTE 2015–14.

below, as the basis for the auditor's conclusions in lieu of independent determinations and testing performed by the auditor as required by Section I(i)(3) and (4) above; and

(ii) The adequacy of the Annual Exemption Review described in Section I(m);

(6) The auditor must notify the respective CS Affiliated QPAMs of any instance of noncompliance identified by the auditor within five (5) business days after such noncompliance is identified by the auditor, regardless of whether the audit has been completed as of that date;

(7) With respect to each Audit Report, the general counsel, or one of the three most senior executive officers of the CS Affiliated QPAMs to which the Audit Report applies, must certify in writing, under penalty of perjury, that the officer has reviewed the Audit Report and this five-year exemption; that, to the best of such officer's knowledge at the time, the CS Affiliated QPAM addressed, corrected, or remedied any noncompliance and inadequacy or has an appropriate written plan to address any inadequacy regarding the Policies and Training identified in the Audit Report. Such certification must also include the signatory's determination that, to the best of the officer's knowledge at the time, the Policies and Training in effect at the time of signing are adequate to ensure compliance with the conditions of this exemption and the applicable provisions of ERISA and the Code;

(8) A copy of the Audit Report must be provided to CSAG's Board of Directors and to either the Risk Committee or the Audit Committee; and a senior executive officer at either the Risk Committee or the Conduct and Financial Crime Control Committee must review the Audit Report for each CS Affiliated QPAM and must certify in writing, under penalty of perjury, that such officer has reviewed each Audit Report;

(9) Each CS Affiliated QPAM must provide its certified Audit Report, by regular mail to: The Department's Office of Exemption Determinations (OED), 200 Constitution Avenue NW, Suite 400, Washington, DC 20210, or by private carrier to: 122 C Street NW, Suite 400, Washington, DC 20001–2109. The delivery must take place no more than 45 days following the completion of the Audit Report. The Audit Report will be part of the public record regarding this five-year exemption. Furthermore, each CS Affiliated QPAM must make its Audit Report unconditionally available, electronically or otherwise, for examination upon request by any duly authorized employee or representative of the Department, other relevant regulators, and any fiduciary of a Covered Plan;

(10) Any engagement agreement with an auditor to perform the audit required by this exemption must be submitted to OED no later than two (2) months after the execution of the engagement agreement;

(11) The auditor must provide the Department, upon request, for inspection and review, access to all of the workpapers created and used in connection with the audit, provided the access and inspection are otherwise permitted by law; and

(12) CSAG and/or the CS Affiliated QPAMs must notify the Department of a change in the independent auditor no later than two (2) months after the engagement of a substitute or subsequent auditor and must provide an explanation for the substitution or change including a description of any material disputes between the terminated auditor and CSAG and/or the CS Affiliated QPAMs;

(j) As of the effective date of this five-year exemption, with respect to any arrangement, agreement, or contract between a CS Affiliated QPAM and a Covered Plan, each CS Affiliated QPAM agrees and warrants to Covered Plans:

(1) To comply with ERISA and the Code, as applicable with respect to the Covered Plan; to refrain from engaging in prohibited transactions that are not otherwise exempt (and to promptly correct any inadvertent prohibited transactions); and to comply with the standards of prudence and loyalty set forth in section 404 of ERISA with respect to each such ERISA-covered plan and IRA to the extent that section 404 is applicable;

(2) To indemnify and hold harmless the Covered Plan for any actual losses resulting directly from a CS Affiliated QPAM's violation of ERISA's fiduciary duties, as applicable, and of the prohibited transaction provisions of ERISA and the Code, as applicable; a breach of contract by a CS Affiliated QPAM; or any claim arising out of the failure of such CS Affiliated QPAMs to qualify for the exemptive relief provided by PTE 84–14 as a result of a violation of Section I(g) of PTE 84–14 other than the Conviction. This condition only applies to actual losses caused by the CS Affiliated QPAM's violations;

(3) Not to require (or otherwise cause) the Covered Plan to waive, limit, or qualify the liability of the CS Affiliated QPAM for violating ERISA or the Code or engaging in prohibited transactions;

(4) Not to restrict the ability of the Covered Plan to terminate or withdraw from its arrangement with the CS Affiliated QPAM, with respect to any investment in a separately-managed account or pooled fund subject to ERISA and managed by such QPAM, with the exception of reasonable restrictions, appropriately disclosed in advance, that are specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors. In connection with any such arrangement involving investments in pooled funds subject to ERISA entered into after the effective date of this exemption, the adverse consequences must relate to a lack of liquidity of the underlying assets, valuation issues, or regulatory reasons that prevent the fund from promptly redeeming an ERISA-covered plan's or IRA's investment, and such restrictions must be applicable to all such investors and effective no longer than reasonably necessary to avoid the adverse consequences;

(5) Not to impose any fees, penalties, or charges for such termination or withdrawal with the exception of reasonable fees, appropriately disclosed in advance, that are specifically designed to prevent generally-recognized abusive investment practices or specifically designed to ensure equitable treatment of all investors in a pooled fund in the event such withdrawal or termination may have adverse consequences for all other investors, provided that such fees are applied consistently and in like manner to all such investors;

(6) Not to include exculpatory provisions disclaiming or otherwise limiting liability of the CS Affiliated QPAMs for a violation of the agreement's terms. To the extent consistent with section 410 of ERISA, however, this provision does not prohibit disclaimers for liability caused by an error, misrepresentation, or misconduct of a plan fiduciary or other party hired by the plan fiduciary who is independent of CSAG and its affiliates, or damages arising outside the control of the CS Affiliated QPAM; and

(7) Within four (4) months of the effective date of this five-year exemption, each CS Affiliated QPAM must provide a notice of its obligations under this Section I(j) to each Covered Plan. For Covered Plans that enter into a written asset or investment management agreement with a CS Affiliated QPAM on or after November 21, 2019, the CS Affiliated QPAM must agree to its obligations under this Section I(j) in an updated investment management agreement between the CS Affiliated QPAM and such clients or

other written contractual agreement. Notwithstanding the above, a CS Affiliated QPAM will not violate the condition solely because a Covered Plan refuses to sign an updated investment management agreement. This condition will be deemed met for each Covered Plan that received a notice pursuant to PTE 2015–14 that meets the terms of this condition.

(k) *Notice to Covered Plan Clients.* Each CS Affiliated QPAM provides a notice of the five-year exemption, along with a separate summary describing the facts that led to the Conviction (the Summary), which have been submitted to the Department, and a prominently displayed statement (the Statement) that the Conviction results in a failure to meet a condition in PTE 84–14, to each sponsor and beneficial owner of a Covered Plan that entered into a written asset or investment management agreement with a CS Affiliated QPAM, or the sponsor of an investment fund in any case where a CS Affiliated QPAM acts as a sub-adviser to the investment fund in which such ERISA-covered plan and IRA invests. The notice, Summary and Statement must be provided prior to, or contemporaneously with, the client's receipt of a written asset management agreement from the CS Affiliated QPAM. The clients must receive a **Federal Register** copy of the notice of final five-year exemption within sixty (60) days of the effective date of this exemption. The notice may be delivered electronically (including by an email that has a link to the five-year exemption).

(l) The CS Affiliated QPAM must comply with each condition of PTE 84–14, as amended, with the sole exception of the violation of Section I(g) of PTE 84–14 that is attributable to the Conviction. If, during the Exemption Period, an entity within the Credit Suisse corporate structure is convicted of a crime described in Section I(g) of PTE 84–14, relief in this exemption would terminate immediately;

(m)(1) By May 20, 2020, each CS Affiliated QPAM designates a senior compliance officer (the Compliance Officer) who will be responsible for compliance with the Policies and Training requirements described herein. For purposes of this condition (m), each relevant line of business within a CS Affiliated QPAM may designate its own compliance officer. The Compliance Officer must conduct an annual review for each twelve month period, beginning on November 21, 2019, (the Annual Exemption Review) to determine the adequacy and effectiveness of the implementation of the Policies and Training. With respect to the Compliance Officer, the following conditions must be met:

(i) The Compliance Officer must be a professional who has extensive experience with, and knowledge of, the regulation of financial services and products, including under ERISA and the Code; and

(ii) The Compliance Officer must have a direct reporting line to the highest ranking corporate officer in charge of compliance for the applicable CS Affiliated QPAM.

(2) With respect to each Annual Exemption Review, the following conditions must be met:

(i) The Annual Exemption Review includes a review of the CS Affiliated QPAMs compliance with and effectiveness of the Policies and Training and of the following: Any compliance matter related to the Policies or Training that was identified by, or reported to, the Compliance Officer or others within the compliance and risk control function (or its equivalent) during the previous year; the most recent audit report issued pursuant to this exemption or PTE 2015–14; any material change in the relevant business activities of the CS Affiliated QPAMs; and any change to ERISA, the Code, or regulations related to fiduciary duties and the prohibited transaction provisions that may be applicable to the activities of the CS Affiliated QPAMs;

(ii) The Compliance Officer prepares a written report for each Annual Exemption Review (each, an Annual Exemption Report) that (A) summarizes his or her material activities during the preceding year; (B) sets forth any instance of noncompliance discovered during the preceding year, and any related corrective action; (C) details any change to the Policies or Training to guard against any similar instance of noncompliance occurring again; and (D) makes recommendations, as necessary, for additional training, procedures, monitoring, or additional and/or changed processes or systems, and management's actions on such recommendations;

(iii) In each Annual Exemption Report, the Compliance Officer must certify in writing that to the best of his or her knowledge at the time: (A) The report is accurate; (B) the Policies and Training are working in a manner which is reasonably designed to ensure that the Policies and Training requirements described herein are met; (C) any known instance of noncompliance during the preceding year and any related correction taken to date have been identified in the Annual Exemption Report; and (D) the CS Affiliated QPAMs have complied with the Policies and Training, and/or corrected (or are correcting) any known instances of noncompliance in accordance with Section I(h) above;

(iv) Each Annual Exemption Report must be provided to appropriate corporate officers of CSAG and each CS Affiliated QPAM to which such report relates; the head of Compliance and the general counsel (or their functional equivalent) of the relevant CS Affiliated QPAM; and must be made unconditionally available to the independent auditor described in Section I(i) above;

(v) Each Annual Exemption Review, including the Compliance Officer's written Annual Exemption Report, must be completed within three (3) months following the end of the period to which it relates;

(n) Each CS Affiliated QPAM will maintain records necessary to demonstrate that the conditions of this five-year exemption have been met, for six (6) years following the date of any transaction for which the CS Affiliated QPAM relies upon the relief in the five-year exemption;

(o) During the Exemption Period, CSAG: (1) Immediately discloses to the Department any Deferred Prosecution Agreement (a DPA) or Non-Prosecution Agreement (an NPA) that Credit Suisse Group AG or CSAG or any affiliate (as defined in Section VI(d) of PTE 84–14) enters into with the U.S Department of Justice, to the extent such DPA or NPA relates to the conduct described in Section I(g) of PTE 84–14 or section 411 of ERISA; and (2) immediately provides the Department any information requested by the Department, as permitted by law, regarding the agreement and/or the conduct and allegations that led to the agreement;

(p) Within 60 days of the effective date of the five-year exemption, each CS Affiliated QPAM, in its agreements with, or in other written disclosures provided to Covered Plans, will clearly and prominently inform Covered Plan clients of their right to obtain a copy of the Policies or a description (Summary Policies) which accurately summarizes key components of the CS Affiliated QPAM's written Policies developed in connection with this exemption. If the Policies are thereafter changed, each Covered Plan client must receive a new disclosure within six (6) months following the end of the calendar year during which the Policies were changed.[13] With respect to this

[13] In the event the Applicant meets this disclosure requirement through Summary Policies, changes to

Continued

requirement, the description may be continuously maintained on a website, provided that such website link to the Policies or Summary Policies is clearly and prominently disclosed to each Covered Plan; and

(q) A CS Affiliated QPAM will not fail to meet the terms of this five-year exemption, solely because a different CS Affiliated QPAM fails to satisfy a condition for relief under this five-year exemption described in Sections I(c), (d), (h), (i), (j), (k), (l), (n), and (p); or, if the independent auditor described in Section I(i) fails a provision of the exemption other than the requirement described in Section I(i)(11), provided that such failure did not result from any actions or inactions of CSAG or its affiliates.

Section II. Definitions

(a) The term ''Conviction'' means the judgment of conviction against CSAG for one count of conspiracy to violate section 7206(2) of the Internal Revenue Code in violation of Title 18, United States Code, Section 371, that was entered in the District Court for the Eastern District of Virginia in Case Number 1:14–cr–188–RBS, on November 21, 2014.

(b) The term ''Covered Plan'' means a plan subject to Part 4 of Title I of ERISA (an ''ERISA-covered plan'') or a plan subject to section 4975 of the Code (an ''IRA''), in each case, with respect to which a CS Affiliated QPAM relies on PTE 84–14, or with respect to which a CS Affiliated QPAM (or any CSAG affiliate) has expressly represented that the manager qualifies as a QPAM or relies on the QPAM class exemption (PTE 84–14). A Covered Plan does not include an ERISA-covered plan or IRA to the extent the CS Affiliated QPAM has expressly disclaimed reliance on QPAM status or PTE 84–14 in entering into a contract, arrangement, or agreement with the ERISA-covered plan or IRA.

(c) The term ''CSAG'' means Credit Suisse AG.

(d) The term ''CS Affiliated QPAM'' means a ''qualified professional asset manager'' (as defined in Section VI(a) of PTE 84–14) that relies on the relief provided by PTE 84–14 and with respect to which CSAG is a current or future ''affiliate'' (as defined in Section VI(d) of PTE 84–14), but is not a CS Related QPAM. The term ''CS Affiliated QPAM'' excludes the parent entity, CSAG.

the Policies shall not result in the requirement for a new disclosure unless, as a result of changes to the Policies, the Summary Policies are no longer accurate.

(e) The term ''CS Related QPAM'' means any current or future ''qualified professional asset manager'' (as defined in Section VI(a) of PTE 84–14) that relies on the relief provided by PTE 84–14, and with respect to which CSAG owns a direct or indirect five (5) percent or more interest, but with respect to which CSAG is not an ''affiliate'' (as defined in section VI(d)(1) of PTE 84–14).

(f) The term ''Exemption Period'' means the period from November 21, 2019 through November 20, 2024.

Effective Date: This five-year exemption will be in effect for five years beginning on the expiration of PTE 2015–14.

FOR FURTHER INFORMATION CONTACT: Mrs. Blessed Chuksorji-Keefe of the Department, telephone (202) 693–8567. (This is not a toll-free number.)

Signed at Washington, DC, this 8th day of November, 2019.

Lyssa Hall,

Director, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2018–0007]

National Advisory Committee on Occupational Safety and Health (NACOSH): Notice of Membership Meeting

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Announcement of a NACOSH meeting.

SUMMARY: NACOSH will meet on December 12, 2019, in Washington, DC.

DATES: NACOSH will meet from 9:30 a.m. to 4:00 p.m., ET, Thursday, December 12, 2019.

ADDRESSES: NACOSH will meet in Room N–5437, Conference Rooms A–D, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210.

Submission of comments and requests to speak: Submit comments and requests to speak at the NACOSH meeting by December 5, 2019, identified by the docket number for this **Federal Register** notice (Docket No. OSHA–2018–0007), using one of the following methods:

Electronically: You may submit comments, including attachments, electronically at: *http://www.regulations.gov,* the Federal eRulemaking Portal. Follow the online instructions for submitting comments.

Facsimile: If your comments, including attachments, do not exceed 10 pages, you may fax them to the OSHA Docket Office at (202) 693–1648.

Regular mail, express mail, hand delivery, and messenger or courier service: You may submit comments and attachments to the OSHA Docket Office, Docket No. OSHA–2018–0007, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3653, 200 Constitution Avenue NW, Washington, DC 20210. Deliveries (express mail, hand (courier) delivery, and messenger service) are accepted during the OSHA Docket Office's normal business hours, 10:00 a.m. to 3:00 p.m., ET.

Instructions: All submissions must include the agency name and the OSHA docket number for this **Federal Register** notice (Docket No. OSHA–2018–0007). Because of security-related procedures, submissions by regular mail may result in a significant delay in receipt. Please contact the OSHA Docket Office for information about security procedures for making submissions by express mail, hand (courier) delivery, and messenger service.

OSHA will place comments and requests to speak, including personal information, in the public docket, which may be available online. Therefore, OSHA cautions interested parties about submitting personal information such as Social Security numbers and birthdates.

Docket: To read or download documents in the public docket for this NACOSH meeting, go to *http://www.regulations.gov.* All documents in the public docket are listed in the index; however, some documents (*e.g.,* copyrighted material) are not publicly available to read or download through *http://www.regulations.gov.* All submissions are available for inspection and, when permitted, copying at the OSHA Docket Office at the above address. For information on using *http://www.regulations.gov* to make submissions or to access the docket, click on the ''Help'' tab at the top of the homepage. Contact the OSHA Docket Office for information about materials not available through that website and for assistance in using the internet to locate submissions and other documents in the docket.

Requests for special accommodations: Please submit requests for special accommodations for this NACOSH meeting by December 5, 2019, to Ms. Carla Marcellus, OSHA, Technical Data Center, Room N–3508, U.S. Department of Labor, 200 Constitution Ave NW, Washington, DC 20210; telephone: (202) 693–2235; email: *marcellus.carla@dol.gov.*

FOR FURTHER INFORMATION CONTACT:

For press inquiries: Mr. Francis Meilinger, Director, OSHA Office of Communications; telephone (202) 693–1999 (TTY (877) 889–5627); email *meilinger.francis2@dol.gov.*

For general information about NACOSH: Ms. Michelle Walker, Director, OSHA Technical Data Center, Directorate of Technical Support and Emergency Management; telephone (202) 693–2350 (TTY (877) 889–5627); email *walker.michelle@dol.gov.*

For copies of this ***Federal Register*** *Notice:* Electronic copies of this **Federal Register** notice are available at *http://www.regulations.gov.* This notice, as well as news releases and other relevant information, are also available at OSHA's web page at *www.osha.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651, 656) established NACOSH to advise, consult with, and make recommendations to the Secretary of Labor and the Secretary of Health and Human Services on matters relating to the administration of the OSH Act. NACOSH is a continuing advisory committee of indefinite duration.

NACOSH operates in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. App. 2), its implementing regulations (41 CFR part 102–3), and OSHA's regulations on NACOSH (29 CFR part 1912a).

NACOSH is comprised of 12 members, all of whom the Secretary appoints. The Committee must meet at least two times a year (29 U.S.C. 656(a)(1)).

II. Meeting Information

Attending the meeting: NACOSH will meet on December 12, 2019, from 9:30 a.m. until approximately 4:00 p.m., ET. The Committee will meet at the U.S. Department of Labor, Frances Perkins Building, 200 Constitution Avenue NW, Washington, DC 20210 in Room N–5437, Conference Rooms A–D. Meeting attendees must use the visitor's entrance located at 3rd & C Streets NW.

Meeting agenda: The tentative agenda for the meeting includes:

1. An introduction and update from the Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health on key OSHA initiatives, and
2. Remarks from the Director of the National Institute for Occupational Safety and Health.

Requests to speak at the NACOSH meeting: Attendees who want to address NACOSH at the meeting must submit a request to speak, as well as any written or electronic presentation by December 5, 2019, using one of the methods listed in the **ADDRESSES** section. The request must state the amount of time requested to speak; the interest you represent (*e.g.,* business, organization, affiliation), if any; and a brief outline of your presentation. PowerPoint presentations and other electronic materials must be compatible with PowerPoint 2010 and other Microsoft Office 2010 formats.

OSHA will place comments and requests to speak, including personal information, in the public docket, which may be available online. Therefore, OSHA cautions interested parties about submitting personal information such as Social Security Numbers and birthdates.

Docket: To read or download documents in the public docket for this NACOSH meeting, go to *http://www.regulations.gov.* All documents in the public docket are listed in the index; however, some documents (*e.g.,* copyrighted material) are not publicly available to read or download through *http://www.regulations.gov.* All submissions are available for inspection and, when permitted, copying at the OSHA Docket Office at the above address. For information on using *http://www.regulations.gov* to make submissions or to access the docket, click on the ''Help'' tab at the top of the homepage. Contact the OSHA Docket Office for information about materials not available through that website and for assistance in using the internet to locate submissions and other documents in the docket.

Authority and Signature

Loren Sweatt, Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice under the authority granted by 5 U.S.C. App. 2; 29 U.S.C. 656; 29 CFR part 1912a; 41 CFR part 102–3; and Secretary of Labor's Order No. 1–2012 (77 FR 3912 (1/25/2012)).

Signed at Washington, DC, on November 6, 2019.

Loren Sweatt,

Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

NATIONAL CREDIT UNION ADMINISTRATION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: National Credit Union Administration (NCUA).

ACTION: Notice and request for comment.

SUMMARY: The National Credit Union Administration (NCUA), as part of a continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on the following extensions of a currently approved collection, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments should be received on or before January 13, 2020 to be assured consideration.

ADDRESSES: Interested persons are invited to submit written comments on the information collection to Dawn Wolfgang, National Credit Union Administration, 1775 Duke Street, Suite 6032, Alexandria, Virginia 22314; Fax No. 703–519–8579; or Email at *PRAComments@NCUA.gov.*

FOR FURTHER INFORMATION CONTACT: Address requests for additional information to Dawn Wolfgang at the address above or telephone 703–548–2279.

SUPPLEMENTARY INFORMATION:

OMB Number: 3133–0103.

Title: Recordkeeping and Disclosure Requirements Associated with Regulations B, E, M, and CC.

Type of Review: Extension of a currently approved collection.

Abstract: This information collection request provides for the application of three CFPB rules and one FRB rule. NCUA has enforcement responsibility for these rules for federal credit unions. These rules are: Regulation B (''Equal Credit Opportunity Act,'' 12 CFR part 1002); Regulation E (''Electronic Fund Transfers,'' 12 CFR part 1005); Regulation M (''Consumer Leasing,'' 12 CFR part 1013); and Regulation CC (''Availability of Funds and Collection of Checks,'' 12 CFR part 229).

The third party disclosure and recordkeeping requirements in this collection are required by statute and regulation. The regulations prescribe certain aspects of the credit application and notification process, making certain disclosures, uniform methods for computing the costs of credit, disclosing credit terms and cost, resolving errors on certain types of credit accounts, and timing requirements and disclosures relating to the availability of deposited funds.

Affected Public: Private Sector: Not-for-profit institutions; Individuals or households.

Estimated No. of Respondents: Reg. B, 3,330 FCU; Reg. E, 2,661 FCU and 24,700,000 credit union members; Reg. M, 48 FCU, and Reg. CC, 4,396 FICU.

Estimated No. of Responses per Respondent: Annual for most credit unions. Once for credit union members choosing to opt-in.

Estimated Total Annual Responses: 56,105,209.

Estimated Burden Hours per Response: Estimated burden hours per response range from 0.01 to 20 depending upon the information collection activity.

Estimated Total Annual Burden Hours: 3,239,916.

OMB Number: 3133–0163.

Title: Privacy of Consumer Financial Information, Regulation P, 12 CFR part 1016.

Type of Review: Extension of a currently approved collection.

Abstract: Regulation P (12 CFR part 1016) requires credit unions to disclose its privacy policies to customers as well as offer customers a reasonable opportunity to opt out-in whole or in part-of those policies to further restrict the release of their personal financial information to nonaffiliated third parties. Credit unions are required to provide an initial privacy notice to customers that is clear and conspicuous, an annual notice of the privacy policies and practices of the institution, a revised notice to customers if triggered by specific changes to the existing policy, and a notice of the right of the customer to opt out of the institution's information sharing practices. Consumers who choose to exercise their opt-out right document this choice by returning an opt-out form or other permissible method.

Affected Public: Private Sector: Not-for-profit institutions; Individuals or households.

Estimated No. of Respondents: 2,654 FICU; 1,360,000 members who opt-out.

Estimated No. of Responses per Respondent: Annual for most FICUs. Once for credit union members choosing to opt-out.

Estimated Total Annual Responses: 1,365,319.

Estimated Burden Hours per Response: FICUs, 8.11; Consumers, 0.28.

Estimated Total Annual Burden Hours: 426,248.

OMB Number: 3133–0187.

Title: Reverse Mortgage Products—Guidance for Managing Reputation Risks.

Type of Review: Extension of a currently approved collection.

Abstract: The Reverse Mortgage Guidance sets forth standards intended to ensure that financial institutions effectively assess and manage the compliance and reputation risks associated with reverse mortgage products. The information collection will allow NCUA to evaluate the adequacy of a federally-insured credit union's internal policies and procedures as they relate to reverse mortgage products.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated No. of Respondents: 17.

Estimated No. of Responses per Respondent: 1.05.

Estimated Total Annual Responses: 18.

Estimated Burden Hours per Response: 9.78.

Estimated Total Annual Burden Hours: 176.

Request for Comments: Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record. The public is invited to submit comments concerning: (a) Whether the collection of information is necessary for the proper execution of the function of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of the information on the respondents, including the use of automated collection techniques or other forms of information technology.

By Gerard Poliquin, Secretary of the Board, the National Credit Union Administration, on November 7, 2019.

Dated: November 8, 2019.

Dawn D. Wolfgang,

NCUA PRA Clearance Officer.

BILLING CODE 7535–01–P

THE NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Notice of Proposed Information Collection Request: "Museums Empowered: Professional Development Opportunities for Museum Staff"—A Museums for America Special Initiative

AGENCY: Institute of Museum and Library Services.

ACTION: Notice, request for comments, collection of information.

SUMMARY: The Institute of Museum and Library Services (IMLS), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act. This pre-clearance consultation program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The purpose of this Notice is to solicit comments concerning Museums Empowered: Professional Development and Capacity Building Opportunities for Museums—A Museums for America Special Initiative.

A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the addressee section below on or before January 12, 2020.

The IMLS is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

ADDRESSES: For a copy of the documents contact: Mark Isaksen, Senior Museum Program Officer, Institute of Museum and Library Services, 955 L'Enfant Plaza North, SW, Suite 4000, Washington, DC 20024. Mr. Isaksen can be reached by telephone: 202–653–4662; fax: 202–653–4667; email: *misaksen@imls.gov* or by or by *teletype* (TTY/TDD) for persons with hearing difficulty at 202–653–4614.

FOR FURTHER INFORMATION CONTACT: Kim Miller, Grants Management Specialist, Office of Grants Policy and Management, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW, Suite 4000, Washington, DC 20024–2135. Ms. Miller can be reached by Telephone: 202–653–4762, or by email at *kmiller@imls.gov* or by teletype (TTY/TDD) for persons with hearing difficulty at 202–653–4614.

SUPPLEMENTARY INFORMATION:

I. Background

The Institute of Museum and Library Services is the primary source of federal support for the nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant making, research, and policy development. Our vision is a nation where museums and libraries work together to transform the lives of individuals and communities. To learn more, visit *www.imls.gov.*

II. Current Actions

To administer a special initiative in the Museums for America (MFA) grant program titled Museums Empowered: Professional Development Opportunities for Museum Staff—A Museums for America Special Initiative.

Museums for America (MFA) grants support projects that strengthen the ability of an individual museum to serve its public. This is a special MFA initiative with the goal of strengthening the ability of an individual museum to serve its public through professional development activities that cross-cut various departments to generate systemic change within the museum.

As centers of innovation and discovery, as well as catalysts of community revitalization, museums are at the forefront of change in our communities. Like any other institution, museums need to remain dynamic to respond to fast-evolving technological advances and changing demographics. Museums also need to generate and share outcomes-based data and results of their community impact and develop sustainable organizational structures and strategies for continued growth and vitality. Professional Development is critical for museums to deliver on these areas of need.

To support and empower museums of all sizes and disciplines in responding to the evolving needs of the museum profession and changes in their communities, this MFA special initiative has four project categories for professional development: 1. Diversity and Inclusion 2. Digital Technology 3. Evaluation 4. Organizational Management. Potential projects will address one of these four categories and help strengthen the ability of an individual museum to better serve its public. Projects will utilize comprehensive strategies and frameworks to support professional development. Projects should cross-cut various departments and result in systemic change within the museum.

Agency: Institute of Museum and Library Services.

Title: ''Museums Empowered: Professional Development Opportunities for Museum Staff''—A Museums for America Special Initiative.

OMB Number: 3137–0107.

Agency Number: 3137.

Frequency: Annually.

Affected Public: Museums that meet the IMLS Museums for America institutional eligibility criteria.

Number of Respondents: 100.

Estimated Time per Respondent: 40 hours.

Total Burden Hours: 4,000.

Total Annualized cost to respondents: $112,480.00.

Total Annualized capital/startup costs: 0.

Total Annualized Cost to Federal Government: $14,471.88.

Public Comments Invited: Comments submitted in response to this notice will be summarized and/or included in the request for OMB's clearance of this information collection.

Dated: November 8, 2019.

Kim Miller,

Grants Management Specialist, Institute of Museum and Library Services.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

Meeting of Humanities Panel

AGENCY: National Endowment for the Humanities; National Foundation on the Arts and the Humanities.

ACTION: Notice of meeting.

SUMMARY: The National Endowment for the Humanities will hold six meetings of the Humanities Panel, a federal advisory committee, during December 2019. The purpose of the meetings is for panel review, discussion, evaluation, and recommendation of applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965.

DATES: See **SUPPLEMENTARY INFORMATION** for meeting dates.

ADDRESSES: The meetings will be held at Constitution Center, 400 7th Street SW, Washington, DC 20506, unless otherwise indicated.

FOR FURTHER INFORMATION CONTACT: Elizabeth Voyatzis, Committee Management Officer, 400 7th Street SW, Room 4060, Washington, DC 20506; (202) 606–8322; *evoyatzis@neh.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given of the following meetings:

1. Date: December 3, 2019

This meeting will discuss applications on the topic U.S. History (Pre-1900), for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

2. Date: December 9, 2019

This meeting will discuss applications for the Dialogues on the Experience of War grant program, submitted to the Division of Education Programs.

3. Date: December 10, 2019

This meeting will discuss applications for the Dialogues on the Experience of War grant program, submitted to the Division of Education Programs.

4. Date: December 11, 2019

This meeting will discuss applications for the Dialogues on the Experience of War grant program, submitted to the Division of Education Programs.

5. Date: December 11, 2019

This meeting will discuss applications for Fellowship Programs at Independent Research Institutions, submitted to the Division of Research Programs.

6. Date: December 13, 2019

This meeting will discuss applications for the Dialogues on the Experience of War grant program, submitted to the Division of Education Programs.

Because these meetings will include review of personal and/or proprietary financial and commercial information given in confidence to the agency by grant applicants, the meetings will be closed to the public pursuant to sections 552b(c)(4) and 552b(c)(6) of Title 5, U.S.C., as amended. I have made this determination pursuant to the authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings dated April 15, 2016.

Dated: November 7, 2019.

Elizabeth Voyatzis,

Committee Management Officer, National Endowment for the Humanities.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87491; File No. SR–NASDAQ–2019–088]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 4759

November 7, 2019.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 1, 2019, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 4759, as described below. While these amendments are effective upon filing, the Exchange has designated the proposed amendments to be operative on November 4, 2019.

The text of the proposed rule change is available on the Exchange's website at *http://nasdaq.cchwallstreet.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 4759, which lists the proprietary and network processor feeds that the Exchange utilizes for the handling, routing, and execution of orders, as well as for the regulatory compliance processes related to those functions. Presently, the Exchange's trading system utilizes proprietary market data as the Primary Source of quotation data for the following markets that provide a reliable direct feed: NYSE American, Nasdaq BX, CBOE EDGA, CBOE EDGX, CHX, NYSE, NYSE Arca, Nasdaq, Nasdaq PSX, CBOE BYX, and CBOE BZX. For each of these markets, the Exchange uses SIP data as the Secondary Source of quotation data.[3] For other markets,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Pursuant to Rule 4759, the Primary Source of data is used unless it is delayed by a configurable amount compared to the Secondary Source of data.

namely NYSE National, FINRA ADF, and IEX, the Exchange utilizes SIP data as the Primary Source; there is no Secondary Source for those markets. The Exchange proposes to amend Rule 4759 to state that going forward, the Exchange will utilize SIP data, rather than a direct feed, as its Primary Source of data for CHX (now known as NYSE Chicago [4]), with no Secondary Source utilized for that data. The Exchange proposes this amendment to reflect the fact that NYSE Chicago is migrating to a new technology platform and that, after November 1, 2019, it has announced that it will cease offering the NYSE Chicago Book Feed that currently serves as its direct feed to the Exchange.[5] Although the Exchange understands that NYSE Chicago plans to offer new data feeds to replace the NYSE Chicago Book Feed, the Exchange has yet to decide whether it will utilize them.[6]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that it is necessary to amend its Rules to account for the fact that, after November 1, 2019, NYSE Chicago will no longer offer the direct feed to which the Exchange currently subscribes. The Exchange notes that it already utilizes the SIP as its sole source of quote data for NYSE National and IEX—as well as the FINRA ADF, without issue. In the event that the Exchange determines that its proposal to utilize SIP data is inadequate for its purposes, then the Exchange may choose to subscribe to one or more of the replacement proprietary data feeds that NYSE Chicago plans to offer beginning on November 4, 2019.

Lastly, the Exchange believes that it is consistent with the public interest and the protection of investors to update the names of the exchanges listed in Rule 4759 as this change will make it easier for market participants to identify the exchanges for which the Exchange uses the direct feed and/or SIP for the purposes described in the Rule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, it is merely intended to reflect the fact that the Exchange will no longer consume the NYSE Chicago Book Feed, which NYSE Chicago plans to discontinue after November 1, 2019. The Exchange does not expect that its decision to utilize the SIP, going forward, to obtain NYSE Chicago quote data will have any competitive impacts. As noted above, the Exchange presently utilizes the SIP as its sole source of quote data for several other exchanges, including NYSE National and IEX.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [9] and Rule 19b–4(f)(6) thereunder.[10]

A proposed rule change filed under Rule 19b–4(f)(6) [11] normally does not become operative for 30 days from the date of filing. However, Rule 19b–4(f)(6)(iii) [12] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the Exchange can amend Rule 4759 prior to the discontinuation of the NYSE Chicago Book Feed. The Exchange states that waiver of the operative delay would prevent Rule 4759 from being inaccurate and causing confusion among investors and the public. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2019–088 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2019–088. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use

The Exchange reverts to the Primary Source of data once the delay has been resolved.

[4] The Exchange also proposes to update the Rule to reflect the fact that the Chicago Stock Exchange is now known as NYSE Chicago.

[5] *See https://www.nyse.com/market-data/real-time#chicago.*

[6] *See id.* If and when the Exchange decides to subscribe to these replacement NYSE Chicago direct data feed products, the Exchange will file a proposal to amend Rule 4759 accordingly.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87489; File No. SR–Phlx–2019–47]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 3304(a)

November 7, 2019.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 29, 2019, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 3304(a), as described below. While these amendments are effective upon filing, the Exchange has designated the proposed amendments to be operative on November 4, 2019.

The text of the proposed rule change is available on the Exchange's website at *http://nasdaqphlx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 3304(a), which lists the proprietary and network processor feeds that the Exchange utilizes for the handling, routing, and execution of orders, as well as for the regulatory compliance processes related to those functions. Presently, the Exchange's trading system utilizes proprietary market data as the Primary Source of quotation data for the following markets that provide a reliable direct feed: NYSE American, Nasdaq BX, CBOE EDGA, CBOE EDGX, CHX, NYSE, NYSE Arca, Nasdaq, Nasdaq PSX, CBOE BYX, and CBOE BZX. For each of these markets, the Exchange uses SIP data as the Secondary Source of quotation data.[3] For other markets, namely NYSE National, FINRA ADF, and IEX, the Exchange utilizes SIP data as the Primary Source; there is no Secondary Source for those markets. The Exchange proposes to amend Rule 3304(a) to state that going forward, the Exchange will utilize SIP data, rather than a direct feed, as its Primary Source of data for CHX (now known as NYSE Chicago[4]), with no Secondary Source utilized for that data. The Exchange proposes this amendment to reflect the fact that NYSE Chicago is migrating to a new technology platform and that, after November 1, 2019, it has announced that it will cease offering the NYSE Chicago Book Feed that currently serves as its direct feed to the Exchange.[5] Although the Exchange understands that NYSE Chicago plans to offer new data feeds to replace the NYSE Chicago Book Feed, the Exchange has yet to decide whether it will utilize them.[6]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that it is necessary to amend its Rules to account for the fact that, after November 1, 2019, NYSE Chicago will no longer offer the direct feed to which the Exchange currently subscribes. The Exchange notes that it already utilizes the SIP as its sole source of quote data for NYSE National and IEX—as well as the FINRA ADF, without issue. In the event that the Exchange determines that its proposal to utilize SIP data is inadequate for its purposes, then the Exchange may choose to subscribe to one or more of the replacement proprietary data feeds that NYSE Chicago plans to offer beginning on November 4, 2019.

Lastly, the Exchange believes that it is consistent with the public interest and the protection of investors to update the names of the exchanges listed in Rule 3304(a) as this change will make it easier for market participants to identify

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Pursuant to Rule 3304(a), the Primary Source of data is used unless it is delayed by a configurable amount compared to the Secondary Source of data. The Exchange reverts to the Primary Source of data once the delay has been resolved.

[4] The Exchange also proposes to update the Rule to reflect the fact that the Chicago Stock Exchange is now known as NYSE Chicago.

[5] *See https://www.nyse.com/market-data/real-time#chicago.*

[6] *See id.* If and when the Exchange decides to subscribe to these replacement NYSE Chicago direct data feed products, the Exchange will file a proposal to amend Rule 4759 [sic] accordingly.

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

the exchanges for which the Exchange uses the direct feed and/or SIP for the purposes described in the Rule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, it is merely intended to reflect the fact that the Exchange will no longer consume the NYSE Chicago Book Feed, which NYSE Chicago plans to discontinue after November 1, 2019. The Exchange does not expect that its decision to utilize the SIP, going forward, to obtain NYSE Chicago quote data will have any competitive impacts. As noted above, the Exchange presently utilizes the SIP as its sole source of quote data for several other exchanges, including NYSE National and IEX.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [9] and Rule 19b–4(f)(6) thereunder.[10]

A proposed rule change filed under Rule 19b–4(f)(6) [11] normally does not become operative for 30 days from the date of filing. However, Rule 19b–4(f)(6)(iii) [12] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the Exchange can amend Rule 3304(a) prior to the discontinuation of the NYSE Chicago Book Feed. The Exchange states that waiver of the operative delay would prevent Rule 3304(a) from being inaccurate and causing confusion among investors and the public. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2019–47 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2019–47. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2019–47 and should be submitted on or before December 5, 2019.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87485; File No. SR–LCH SA–2019–005]

Self-Regulatory Organizations; LCH SA; Order Approving Proposed Rule Change Relating to (i) Introduction of Clearing of the New Markit iTraxx Subordinated Financials Index CDS and the Related Single Name CDS Constituents; (ii) Enhancements to Wrong Way Risk Margin; and (iii) Modification to Default Fund Additional Margin

November 7, 2019.

I. Introduction

On August 2, 2019, Banque Centrale de Compensation, which conducts business under the name LCH SA (''LCH SA''), filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934

[9] 15 U.S.C. 78s(b)(3)(A).

[10] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has requested that the Commission waive the pre-filing requirement. The Commission hereby waives that requirement.

[11] 17 CFR 240.19b–4(f)(6).

[12] 17 CFR 240.19b–4(f)(6)(iii).

[13] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[14] 17 CFR 200.30–3(a)(12).

(''Act''),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend its rules to (i) introduce clearing of new Markit iTraxx Subordinated Financials Index CDS and the Related Single Name CDS Constituents (together ''Subordinated Financials''); (ii) incorporate changes to the Wrong Way Risk (''WWR'') margin recommended as a result of a risk model validation; and (iii) modify the Default Fund Additional Margin (''DFAM''). The proposed rule change was published for comment in the **Federal Register** on August 9, 2019.[3] On August 30, 2019, the Commission designated a longer period for taking action on the proposed rule change to November 7, 2019.[4] The Commission did not receive comments on the proposed rule change. For the reasons discussed below, the Commission is approving the proposed rule change.

II. Description of the Proposed Rule Change

A. Subordinated Financials

To introduce clearing of Subordinated Financials,[5] the proposed rule change would make changes to (i) the Reference Guide: CDSClear Margin Framework and CDSClear Default Fund Methodology (together the ''CDSClear Risk Methodology''); (ii) the CDS Clearing Supplement (''Supplement''); and (iv) the CDS Clearing Procedures (''Procedures'').[6]

i. Changes to the CDSClear Risk Methodology

LCH SA's existing Total Initial Margin Framework is comprised of the following components: Self Referencing Margin; Spread Margin; WWR Margin; Short Charge Margin; Interest Rate Risk Margin; Recovery Rate Margin; Vega Margin; and certain additional margins, including Liquidity and Concentration Risk Margin. The proposed rule change would apply LCH SA's existing margin methodology to the clearing of Subordinated Financials, and in doing so, would adapt certain components of that margin methodology for the clearing of Subordinated Financials. Specifically, the proposed rule change would adapt the Spread Margin, WWR Margin, Short Charge Margin, and Liquidity and Concentration Risk Margin components to the clearing of Subordinated Financials.

With respect to the Spread Margin, LCH would use the historical data available for Subordinated Financials and would consider Subordinated Financials to be a different instrument than senior debt for purposes of portfolio margining.

With respect to WWR Margin, the proposed rule change would cover Subordinated Financials with specific shocks calibrated from available historical data.

With respect to the Short Charge, the proposed rule change would apply to Subordinated Financials the existing global short charge that covers non-financials, but would consider shocks in the recovery rates to ensure that the short charge covers the different recovery rates for Subordinated Financials. With respect to calculating the short charge for portfolios containing Subordinated Financials, LCH believes that considering shocks in the recovery rates without modifying the number of defaults would lead to overly conservative margins where jump-to-default would outweigh other components of the margin methodology.[7] To avoid this outcome the proposed rule change would decrease the number of expected credit events in the five days following the default of a Clearing Member from two to one, by moving the second credit event to the ''extreme market conditions'' category as opposed to the ''normal market conditions'' category. The proposed rule change would also calculate the exposure the portfolio has to each underlying reference entity and the probability of each combination of defaults, to define the maximum amount that could be lost with a 99.7% confidence due to default events. The proposed rule change would then retain the greater of this calculated amount and the top exposure with a shifted recovery rate as the Short Charge margin.

Finally, the proposed rule change would make similar changes with respect to the stressed short charge and global short charge, and a specific change for CDX.HY names, by taking the stress short charge as the maximum of the sum of the top two exposures and the average across the ten riskiest entities.

With respect to Liquidity and Concentration Risk Margin, the proposed rule change would apply the existing liquidity charge to Subordinated Financials as a new instrument but would consider Subordinated Financials jointly with Senior CDS for purposes of the concentration charge component of the margin charge.

ii. Changes to the Supplement

The proposed rule change would amend the Supplement, which establishes the legal terms for CDS transactions cleared by LCH SA. The proposed rule change would amend the Supplement to include relevant language needed for clearing Subordinated Financials. Specifically, with respect to defining Credit Events, the proposed rule change would change various references to ''Restructuring Credit Event'' to ''M(M)R Restructuring'' or add references ''M(M)R Restructuring'', to make clear that these provisions apply to a restructuring that is a ''M(M)R Restructuring.'' This change is needed because clearing Subordinated Financials would introduce transactions for which Restructuring is a Credit Event but where ''M(M)R Restructuring'' is not applicable, and thus, in specifying provisions that would apply to ''M(M)R Restructuring'' the proposed rule change would clarify that these provisions would not apply to a restructuring of Subordinated Financials. Moreover, a number of provisions of the Supplement, such as the defined terms, apply to all Cleared Transactions that refer to a Reference Entity, which would include Cleared Transactions involving Subordinated Financials. However, the clearing of Subordinated Financials would mean that a portfolio could contain CDS contracts that have the same underlying Reference Entity but which reference different seniorities of debt issued by that Reference Entity. Certain Credit Events or Succession Events with respect to a Reference Entity could apply or not apply to a CDS contract, depending on seniority and/or transaction type. Thus, where appropriate and necessary, the proposed rule change would add wording to the relevant provisions of the Supplement to clarify that that, depending on the Reference Entity, Transaction Type, or Reference Obligation, those provisions may apply or not apply to a specific transaction. In connection with this change, the proposed rule change would also add a definition for, and various references to, the term ''Component Transaction'' to distinguish further cleared transactions by Reference Entity

[3] Securities Exchange Act Release No. 86576 (Aug. 6, 2019), 84 FR 39386 (Aug. 9, 2019) (SR–LCH–SA–2019–005) (''Notice'').

[4] Securities Exchange Act Release No. 86834 (Aug. 30, 2019), 84 FR 46984 (Sep. 6, 2019) (SR–LCH–SA–2019–005).

[5] The following description is substantially excerpted from the Notice. *See* Notice, 84 FR at 39386. For further explanation on the background and creation of Subordinated Financials, *see* Notice, 84 FR at 39386.

[6] Capitalized terms not otherwise defined herein have the meanings assigned to them in the LCH SA rulebook, the CDSClear Risk Methodology, Supplement, or Procedures.

[7] *See* Notice, 84 FR at 39387.

and Transaction Type. The proposed rule change would also make various modifications to use of the Physical Settlement Matrix to accommodate clearing of Subordinated Financials.

Finally, unrelated to the clearing of Subordinated Financials, the proposed rule change would modify inaccurate references to the CCM Client account structure. Earlier this year, LCH SA amended its rules to permit Clearing Members to create multiple account structures for a single client and multiple trade accounts per client within a single omnibus account structure.[8] In line with that change, the proposed rule change would update certain portions of the Supplement to make clear that Clearing Members may create multiple account structures for a single client and multiple trade accounts per client within a single omnibus account structure. LCH SA did not make these changes in the earlier amendment, and the proposed rule change would make these changes now to ensure consistency with the amendment from earlier this year. The proposed rule change would also make various typographical and technical corrections to the CDS Clearing Supplement and update references as needed.

iii. Changes to the Procedures

Consistent with the changes to the Supplement, the proposed rule change would modify Section 4 of the Procedures to treat transactions differently depending upon the Transaction Type and/or seniority of a transaction. Similarly, the proposed rule change would add a reference to seniority and Reference Entity, Transaction Type, and Reference Obligation in Procedure 4.3. As discussed above, the clearing of Subordinated Financials would mean that a portfolio could contain CDS contracts that have the same underlying Reference Entity but which reference different seniorities of debt issued by that Reference Entity. Thus, the proposed rule change would modify Section 4 of the Procedures to distinguish the Reference Obligation by seniority level, if applicable.

B. WWR Margin

To address certain recommendations arising out of a recent model validation, the proposed rule change would make two changes to WWR margin designed to enhance the WWR margin's stability and decrease its volatility. First, the proposed rule change would calculate WWR margin as if it was inside the expected shortfall. Second, the proposed rule change would include the iTraxx Main index in the WWR margin calculation, with a dedicated shock defined separately from the iTraxx Senior Financials and iTraxx Subordinated Financials indices.

C. Modification to DFAM

Independent of and unrelated to LCH SA's proposal to introduce the clearing of Subordinated Financials, the proposed rule change would also modify DFAM. LCH SA's intent in collecting DFAM is to ensure that LCH SA collects from a Clearing Member additional margin to account for the stress risk of that Clearing Member above a certain threshold (defined as a percentage of the size of the Default Fund and dependent on the internal credit score of the Clearing Member). In other words, DFAM gradually demutualizes a Clearing Member's stress risk above and beyond a certain threshold of the Default Fund by collecting additional margin from that Clearing Member (rather than covering such stress risk through the Default Fund). However, according to LCH SA, it does not intend to require Clearing Members to deposit a total amount of resources for a given clearing service higher than that Clearing Member's worst stress loss for that service. To ensure that the sum of all resources called from a Clearing Member, including DFAM, does not exceed the stress tested loss measured for that Clearing Member, consistent with LCH SA's intent in collecting DFAM,[9] the proposed rule change would put in place a cap on the amount of DFAM to ensure that, in collecting DFAM, LCH SA does not unintentionally require a Clearing Member to contribute resources greater than the Clearing Member's worst stress loss. The proposed rule change would do so by amending the CDSClear Default Fund Methodology to ensure that DFAM could not exceed a Clearing Member's Stress Test Loss Over Additional Margin, which would be defined as a Clearing Member's Stress Test Loss, minus that Clearing Member's contribution to the Default Fund.

III. Commission Findings

Section 19(b)(2)(C) of the Act directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the organization.[10] For the reasons given below, the Commission finds that the proposed rule change is consistent with Section 17A(b)(3)(F) of the Act[11] and Rules 17Ad–22(e)(1) and (e)(6)(i) thereunder.[12]

A. Consistency With Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act requires, among other things, that the rules of LCH SA be designed to promote the prompt and accurate clearance and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts, and transactions, to assure the safeguarding of securities and funds which are in the custody or control of LCH SA or for which it is responsible, and, in general, to protect investors and the public interest.[13]

As described above, the proposed rule change would facilitate the clearing of Subordinated Financials by LCH SA, which, as discussed above, consist of the Markit iTraxx Subordinated Financials Index CDS and Related Single Name CDS Constituents. To do so, the proposed rule change would amend the CDSClear Risk Methodology to apply LCH SA's existing margin methodology to Subordinated Financials and, relatedly, amend the Supplement and the Procedures to add new terms and revise existing terms and references as necessary to ensure that Subordinated Financials are clearly and accurately defined and referenced throughout LCH SA's existing rulebook. By making these changes to facilitate LCH SA's clearance and settlement of these additional CDS contracts, the Commission believes the proposed rule change would promote the prompt and accurate clearance and settlement of securities transactions.

Moreover, as described above, the proposed rule change would make a number of changes to LCH SA's margin methodology, which the Commission believes would improve the operation and effectiveness of the margin methodology. First, in adapting LCH SA's margin methodology to the clearance and settlement of Subordinated Financials, the Commission believes that the proposed rule change would help to ensure that LCH SA's margin system effectively deals with, and collects margin to cover, the risks associated with clearing these additional CDS contracts. Second, the Commission believes that, by incorporating the changes to the WWR

[8] Securities Exchange Act Release No. 86376 (July 15, 2019), 84 FR 34955 (July 19, 2019) (SR–LCH–SA–2019–003).

[9] *See* Notice, 84 FR at 39387.

[10] 15 U.S.C. 78s(b)(2)(C).

[11] 15 U.S.C. 78q–1(b)(3)(F).

[12] 17 CFR 240.17Ad–22(e)(1) and (e)(6)(i).

[13] 15 U.S.C. 78q–1(b)(3)(F).

margin described above, the proposed rule change would help to ensure that WWR margin operates effectively and accurately captures and covers the wrong-way-risk associated with clearing certain portfolios. Finally, the Commission believes that in establishing a cap on DFAM the proposed rule change would help to ensure that LCH SA does not require Clearing Members to deposit a total amount of resources for a given clearing service higher than their worst stress loss for that service, consistent with LCH SA's intent in collecting DFAM.

Given that an effective margin system is necessary to manage LCH SA's credit exposures to its Clearing Members and the risks associated with clearing security based swap-related portfolios, the Commission believes that the proposed rule change would help improve LCH SA's ability to avoid potential losses that could result from the mismanagement of credit exposures and the risks associated with clearing security based swap-related portfolios. Because such losses could disrupt LCH SA's ability to promptly and accurately clear security based swap transactions, the Commission believes that the proposed rule change, by improving the operation and effectiveness of LCH SA's margin system, would thereby help promote the prompt and accurate clearance and settlement of securities transactions. Similarly, given that such losses could threaten LCH SA's ability to operate, thereby threatening access to securities and funds in LCH SA's control, the Commission believes that the proposed rule change would help assure the safeguarding of securities and funds which are in the custody or control of the LCH SA or for which it is responsible. For both of these reasons, the Commission believes the proposed rule change would, in general, protect investors and the public interest. Finally, the Commission believes that in helping to ensure that LCH SA does not collect from a Clearing Member DFAM higher than its worst stress loss, the proposed rule change would leave a Clearing Member with additional liquidity to engage in CDS transactions, which would therefore promote the clearance and settlement of CDS transactions.

Finally, as discussed above, the proposed rule change would correct typographical errors, make technical corrections, and update references as needed to the Supplement and Procedures, including modifying inaccurate references to the CCM Client account structure. The Commission believes that these changes would help to ensure that the Supplement and Procedures are clear and operate effectively, consistent with LCH SA's intent. The Commission further believes that clear and effective Supplement and Procedures are necessary for LCH SA to promptly and accurately clear and settle CDS transactions, and therefore that this aspect of the proposed rule change also would promote the prompt and accurate clearance and settlement of securities transactions.

Therefore, the Commission finds that the proposed rule change would promote the prompt and accurate clearance and settlement of securities transactions, assure the safeguarding of securities and funds in LCH SA's custody and control, and in general, protect investors and the public interest, consistent with the Section 17A(b)(3)(F) of the Act.[14]

B. Consistency With Rule 17Ad–22(e)(1)

Rule 17Ad-22(e)(1) requires that LCH SA establish, implement, maintain, and enforce written policies and procedures reasonably designed to provide for a well-founded, clear, transparent, and enforceable legal basis for each aspect of its activities in all relevant jurisdictions.[15] The Commission believes that the proposed rule change, in introducing new terms, as well as correcting typographical errors and updating references, would help to ensure that the Supplement and Procedures provide a consistent and enforceable legal basis for clearing Subordinated Financials. Therefore, the Commission finds that the proposed rule change is consistent with Rule 17Ad–22(e)(1).[16]

C. Consistency With Rule 17Ad–22(e)(6)(i)

Rule 17Ad–22(e)(6)(i) requires that LCH SA establish, implement, maintain, and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, considers, and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market.[17]

The Commission believes that the proposed rule change, in adapting LCH SA's margin methodology to the clearance and settlement of Subordinated Financials, would help to ensure that LCH SA's margin system considers, and produces margin levels commensurate with, the risks and particular attributes of these additional CDS contracts. Moreover, the Commission believes that, by incorporating the changes to the WWR margin described above, the proposed rule change would help to ensure that LCH SA's margin system considers, and produces margin levels commensurate with, the wrong-way-risk associated with clearing certain portfolios. Finally, in capping DFAM to ensure that Clearing Members are not required to deposit a total amount of resources for a given clearing service higher than their worst stress loss for that service, consistent with LCH SA's intent, the Commission believes that the proposed rule change would help to ensure that LCH SA's margin requirement does not exceed the stress loss risk associated with a Clearing Member, and thus is set at a level commensurate with the stress risk posed by a particular Clearing Member's portfolio. Because the proposed rule change would not prevent LCH SA from collecting DFAM up to the stress loss risk associated with a Clearing Member, however, the Commission believes the proposed rule change would not interfere with LCH SA's ability to cover its credit exposures to Clearing Members through DFAM.

Therefore, the Commission finds that the proposed rule change is consistent with Rule 17Ad–22(e)(6)(i).[18]

IV. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and in particular, with the requirements of Section 17A(b)(3)(F) of the Act[19] and Rules 17Ad–22(e)(1) and (e)(6)(i) thereunder.[20]

It is therefore ordered pursuant to Section 19(b)(2) of the Act[21] that the proposed rule change (SR–LCH–SA–2019–005), be, and hereby is, approved.[22]

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Jill M. Peterson,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87488; File No. SR–NYSEArca–2019–79]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.37–E To Specify in Exchange Rules the Exchange's Use of Data Feeds From NYSE Chicago, Inc.

November 7, 2019.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 31, 2019, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to: (1) Amend Rule 7.37–E to specify in Exchange rules the Exchange's use of data feeds from NYSE Chicago, Inc. (''NYSE Chicago'') for order handling and execution, order routing, and regulatory compliance; and (2) amend Rule 7.45–E to reflect that Archipelago Securities LLC (''Arca Securities'') would function as a routing broker for the Exchange's affiliate, NYSE Chicago. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the table in Rule 7.37–E that sets forth on a market-by-market basis the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, execution and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the table would be amended to include NYSE Chicago, which intends to migrate to the Pillar trading platform.[4] Rule 7.37–E currently provides that the Chicago Stock Exchange, Inc., the predecessor name of NYSE Chicago, utilizes the securities information processor (''SIP'') data feed as its primary source for the handling, execution and routing of orders, as well as for regulatory compliance, and does not use a secondary source. Once NYSE Chicago transitions trading to Pillar, it would use a direct data feed as its primary source and the SIP data feed as a secondary source. To reflect these changes, the Exchange proposes to amend Rule 7.37–E to specify which data feeds the Exchange would use for NYSE Chicago. Specifically, the Exchange proposes to amend the rule to provide that NYSE Chicago would use the direct data feed as the primary source and would use the SIP data feed as a secondary source.

Additionally, the Exchange proposes to amend Rule 7.45–E to reflect that Arca Securities would function as a routing broker for the Exchange's affiliate, NYSE Chicago. Specifically, the Exchange proposes to amend Rule 7.45–E(c)(1) and (2) to reference NYSE Chicago as an affiliate of the Exchange for the purposes of the inbound routing function performed by Arca Securities. The proposed rule change would provide more clarity and transparency to all the functions that Arca Securities performs on behalf of the Exchange and its affiliates, which now includes NYSE Chicago. The Exchange is not proposing any substantive change to the rule.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Securities Exchange Act of 1934 (the ''Act''),[5] in general, and furthers the objectives of Section 6(b)(5),[6] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes its proposal to update the table in Rule 7.37–E to include NYSE Chicago will ensure that Rule 7.37–E correctly identifies and publicly states on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, execution and routing of orders, and for performing the regulatory compliance checks to each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because it provides additional specificity, clarity and transparency. The Exchange believes the proposed rule change to amend Rule 7.45–E also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because the proposed rule change would enhance the clarity and transparency in Exchange Rules surrounding the inbound routing function performed by Arca Securities for the Exchange's affiliate, NYSE Chicago.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather would provide the public and investors with information about which data feeds the Exchange uses for execution and routing decisions, and provide clarity in Exchange rules that Arca Securities would perform the inbound routing function on behalf on the Exchange's affiliate, NYSE Chicago.

[6] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, it has become effective pursuant to Section 19(b)(3)(A) of the Act [7] and Rule 19b–4(f)(6) thereunder.[8]

A proposed rule change filed under Rule 19b–4(f)(6) [9] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[10] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange represents that the proposal would correctly identify and publicly state on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, execution and routing of orders, and for performing the regulatory compliance checks to each of those functions. Further, the Exchange represents that the proposal would enhance the clarity and transparency in Exchange Rules surrounding the inbound routing function performed by Arca Securities for the Exchange's affiliate, NYSE Chicago. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest, and hereby waives the operative delay and designates the proposed rule change as operative upon filing.[11]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [12] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2019–79 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2019–79. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2019–79 and should be submitted on or before December 5, 2019.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Jill M. Peterson,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87486; File No. SR–NASDAQ–2019–061]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of Proposed Rule Change, as Modified by Amendment No. 1, Relating to the Nasdaq Official Closing Price for Nasdaq-Listed Exchange-Traded Products

November 7, 2019.

I. Introduction

On August 8, 2019, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change relating to how the Nasdaq Official Closing Price (''NOCP'') will be determined for a Nasdaq-listed security that is an exchange-traded product (''ETP''). The proposed rule change was published for comment in the **Federal Register** on August 23, 2019.[3] On October 4, 2019, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 86705 (August 19, 2019), 84 FR 44343 (''Notice'').

[4] 15 U.S.C. 78s(b)(2).

to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] The Commission received one comment letter from the Exchange on the proposed rule change.[6] On October 25, 2019, the Exchange filed Amendment No. 1 to the proposed rule change.[7] The Commission is publishing this notice to solicit comments on Amendment No. 1 from interested persons, and is approving the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

II. Description of the Proposed Rule Change

Currently, for a Nasdaq-listed ETP that participates in the Nasdaq closing cross, the closing cross price will be the NOCP.[8] For a Nasdaq-listed ETP that does not have a closing cross, the Nasdaq last sale price will be the NOCP.[9] According to the Exchange, thinly-traded ETPs are less likely to have a closing cross, which can result in a closing price that is based on a stale price that is no longer reflective of the value of the security.[10] Specifically, if an ETP is thinly-traded, it is possible that the NOCP would be based on a Nasdaq last sale price that may not necessarily reflect the current value of the security.[11] The Exchange now proposes to amend Nasdaq Rule 4754(b)(4) to amend how it would determine the NOCP for a Nasdaq-listed ETP[12] that does not have a closing cross.[13]

Under proposed Nasdaq Rule 4754(b)(4)(A), the NOCP for a Nasdaq-listed ETP that does not have a closing cross would be the time-weighted average midpoint (''T–WAM'') of the national best bid and national best offer (''NBBO''), with certain parameters. Specifically, the T–WAM price would be a time-weighted average midpoint value calculation that uses eligible quotes during the time period of 3:58:00 p.m. to 3:59:55 p.m., based on quotes observed every second.[14] The T–WAM calculation would only use eligible quotes, and an eligible quote would be defined as a quote whose spread is no greater than a value of 10% of the midpoint price. Quoted spreads within the T–WAM time period that are greater than 10% of the midpoint price would be excluded from the T–WAM calculation. Crossed NBBO markets would also be excluded from the T–WAM calculation.

As proposed, if there are no eligible quotes to use in the T–WAM calculation or if the ETP is halted, the Exchange would use the consolidated last sale price prior to 4:00:00 p.m. as the NOCP. For an ETP that is already listed on Nasdaq, if there are no eligible quotes to use in the T–WAM calculation and no consolidated last sale prices that day, the NOCP would be the previous day's NOCP. For an ETP that transferred its listing to Nasdaq, if there are no eligible quotes to use in the T–WAM calculation and no consolidated last sale prices that day, the NOCP would be the previous day's closing price as disseminated by the primary listing market that previously listed the ETP. For an ETP that is a new Nasdaq listing, if there are no eligible quotes to use in the T–WAM calculation and no consolidated last sale prices that day, the NOCP would not be disseminated.

The Exchange proposes to implement the proposed rule change within 30 calendar days following Commission approval and will announce the implementation date via Nasdaq Equity Trader Alert.[15]

III. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[16] In particular, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 6(b)(5) of the Act,[17] which requires, among other things, that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Commission also finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 6(b)(8) of the Act,[18] which requires that the rules of a national securities exchange not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

As noted above, the proposal would amend how the Exchange would determine the NOCP for a Nasdaq-listed

[5] *See* Securities Exchange Act Release No. 87230, 84 FR 54714 (October 10, 2019). The Commission designated November 21, 2019, as the date by which the Commission shall approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change.

[6] *See* letter from Phil Mackintosh, Chief Economist, Nasdaq, Inc., dated October 10, 2019, available at *https://www.sec.gov/comments/sr-nasdaq-2019-061/srnasdaq2019061-6293523-193399.pdf* (''Nasdaq Letter'').

[7] In Amendment No. 1, the Exchange provided additional justification for its proposed methodology for determining the NOCP for Nasdaq-listed ETPs and specified that it will implement the proposed rule change within 30 calendar days following Commission approval. Amendment No. 1 is available at *https://www.sec.gov/comments/sr-nasdaq-2019-061/srnasdaq2019061-6353201-195587.pdf.*

[8] *See* Nasdaq Rule 4754(b)(4).

[9] *See* Notice, *supra* note 3, at 44344–45.

[10] *See id.* at 44344.

[11] *See id.*

[12] As used in proposed Nasdaq Rule 4754(b)(4), an ETP would mean a series of Portfolio Depository Receipts, Index Fund Shares, Managed Fund Shares, or Trust Issued Receipts (as defined in Nasdaq Rules 5705(a), 5705(b), 5735, and 5720, respectively); securities linked to the performance of indexes and commodities (including currencies) (as defined in Nasdaq Rule 5710); Index-Linked Exchangeable Notes, Equity Gold Shares, Trust Certificates, Commodity-Based Trust Shares, Currency Trust Shares, Commodity Index Trust Shares, Commodity Futures Trust Shares, Partnership Units, Trust Units, Managed Trust Securities, or Currency Warrants (as defined in Nasdaq Rule 5711(a)–(k)). The proposal would not apply to NextShares (as defined in Nasdaq Rule 5745) and corporate securities. *See* Notice, *supra* note 3, at 44344 n.4.

[13] The Exchange is not proposing to change the process for determining the price level at which the closing cross will occur. *See id.* at 44344 n.9. Nasdaq-listed ETPs that have closing crosses will continue to be priced using the current process for calculating the closing cross price. *See id.* at 44344.

[14] The Exchange states that it has considered using the last sale for an ETP that does not have a closing cross, but determined that even if the last sale occurs during the last two minutes leading into the closing cross, it is not necessarily reflective of the best price to use for the NOCP (*e.g.*, a wide quote and a last sale that is based on either the bid or the offer would not be as accurate as the midpoint of the prevailing quotes at that time). *See* Amendment No. 1, *supra* note 7, at 3. According to the Exchange, using the proposed T–WAM methodology would eliminate a valuation based on a last sale transaction occurring against an excessively wide NBBO, and even when spreads are wide, the midpoint of the spread is usually close to the fair value of the underlying basket of the ETP. *See id.* The Exchange also states that this rationale is based, in part, on conversations with issuers, who are supportive of the proposal. *See id.*

[15] *See* Notice, *supra* note 3, at 44345 and Amendment No. 1, *supra* note 7, at 4.

[16] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[17] 15 U.S.C. 78f(b)(5).

[18] 15 U.S.C. 78f(b)(8).

ETP that does not have a closing cross. The Commission notes that the primary listing market's closing price for a security is relied upon by market participants for a variety of reasons, including, but not limited to, calculation of index values, calculation of the net asset value of mutual funds and exchange-traded products, the price of derivatives that are based on the security, and certain types of trading benchmarks such as volume weighted average price strategies. The Commission believes that the proposed methodology for determining the NOCP for a Nasdaq-listed ETP that does not have a closing cross could provide a NOCP that is more reflective of the current value of the ETP than a potentially stale last sale price, especially for a thinly-traded ETP.[19] In particular, the Nasdaq last sale trade for an ETP that occurred earlier in a trading day or even from a prior trading day may no longer be reflective of the value of the ETP, which should be priced relative to the value of its components.[20] The Commission therefore believes that the Exchange's proposal is reasonably designed to achieve the Act's objectives to protect investors and the public interest. Accordingly, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act.

IV. Solicitation of Comments on Amendment No. 1 to the Proposed Rule Change

Interested persons are invited to submit written data, views, and arguments concerning whether Amendment No. 1 is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2019–061 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2019–061. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2019–061, and should be submitted on or before December 5, 2019.

V. Accelerated Approval of Proposed Rule Change, as Modified by Amendment No. 1

The Commission finds good cause to approve the proposed rule change, as modified by Amendment No. 1, prior to the thirtieth day after the date of publication of notice of the filing of Amendment No. 1 in the **Federal Register.** As discussed above, in Amendment No. 1, the Exchange provided additional justification for its proposed methodology for determining the NOCP for Nasdaq-listed ETPs and specified that it will implement the proposed rule change within 30 calendar days following Commission approval. The Commission notes that Amendment No. 1 does not materially alter the substance of the proposal and provides additional clarity and justification to the proposal. Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Act,[21] to approve the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

VI. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[22] that the proposed rule change (SR–NASDAQ–2019–061), as modified by Amendment No. 1, be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Jill M. Peterson,

Assistant Secretary.

[FR Doc. 2019–24694 Filed 11–13–19; 8:45 am]

BILLING CODE 8011–01–P

[19] *See* Notice, *supra* note 3, at 44344–45. Moreover, according to the Exchange, when there is no closing cross at 4:00:00 p.m., the Exchange's internal research has shown that using the T–WAM of the time period between 3:58:00 p.m. and 3:59:55 p.m. results in a price that reflects a fair current valuation and is reflective of the price that was calculated by the closing cross. *See id.* at 44344 n.12 and 44345. *See also* Nasdaq Letter, *supra* note 6 (providing more details regarding the Exchange's internal research relating to this proposal).

[20] *See* Notice, *supra* note 3, 44345. According to the Exchange, the proposal would not apply to NextShares because its reference trading price is reset to 100 every day for quoting purposes and the actual net asset value does not correspond to this reference price, and therefore the midpoints are not applicable in determining a more accurate fair value of the basket. *See id.* at 44344 n.4. The proposal also would not apply to corporate securities because, unlike ETPs, they do not have a net asset value along with an arbitrage component that keeps the prices in line. *See id.*

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87490; File No. SR–NYSENAT–2019–25]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.37 To Specify in Exchange Rules the Exchange's Use of Data Feeds From NYSE Chicago, Inc.

November 7, 2019.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 31, 2019, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to: (1) Amend Rule 7.37 to specify in Exchange rules the Exchange's use of data feeds from NYSE Chicago, Inc. (''NYSE Chicago'') for order handling and execution, order routing, and regulatory compliance; and (2) amend Rule 7.45 to reflect that Archipelago Securities LLC (''Arca Securities'') would function as a routing broker for the Exchange's affiliate, NYSE Chicago. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the table in Rule 7.37 that sets forth on a market-by-market basis the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, execution and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the table would be amended to include NYSE Chicago, which intends to migrate to the Pillar trading platform.[4] Rule 7.37 currently provides that the Chicago Stock Exchange, Inc., the predecessor name of NYSE Chicago, utilizes the securities information processor (''SIP'') data feed as its primary source for the handling, execution and routing of orders, as well as for regulatory compliance, and does not use a secondary source. Once NYSE Chicago transitions trading to Pillar, it would use a direct data feed as its primary source and the SIP data feed as a secondary source. To reflect these changes, the Exchange proposes to amend Rule 7.37 to specify which data feeds the Exchange would use for NYSE Chicago. Specifically, the Exchange proposes to amend the rule to provide that NYSE Chicago would use the direct data feed as the primary source and would use the SIP data feed as a secondary source.

Additionally, the Exchange proposes to amend Rule 7.45 to reflect that Arca Securities would function as a routing broker for the Exchange's affiliate, NYSE Chicago. Specifically, the Exchange proposes to amend Rule 7.45(c)(1) and (2) to reference NYSE Chicago as an affiliate of the Exchange for the purposes of the inbound routing function performed by Arca Securities. The proposed rule change would provide more clarity and transparency to all the functions that Arca Securities performs on behalf of the Exchange and its affiliates, which now includes NYSE Chicago. The Exchange is not proposing any substantive change to the rule.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Securities Exchange Act of 1934 (the ''Act''),[5] in general, and furthers the objectives of Section 6(b)(5),[6] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes its proposal to update the table in Rule 7.37 to include NYSE Chicago will ensure that Rule 7.37 correctly identifies and publicly states on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, execution and routing of orders, and for performing the regulatory compliance checks to each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because it provides additional specificity, clarity and transparency. The Exchange believes the proposed rule change to amend Rule 7.45 also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because the proposed rule change would enhance the clarity and transparency in Exchange Rules surrounding the inbound routing function performed by Arca Securities for the Exchange's affiliate, NYSE Chicago.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather would provide the public and investors with information about which data feeds the Exchange uses for execution and routing decisions, and provide clarity in Exchange rules that Arca Securities would perform the inbound routing function on behalf on the Exchange's affiliate, NYSE Chicago.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, it has become effective pursuant to Section 19(b)(3)(A) of the Act[7] and Rule 19b–4(f)(6) thereunder.[8]

A proposed rule change filed under Rule 19b–4(f)(6)[9] normally does not become operative prior to 30 days after the date of the filing. However, pursuant

[4] NYSE Chicago has announced that, subject to rule approvals, it will transition to trading on Pillar on November 4, 2019. *See* Trader Update, *available here: https://www.nyse.com/publicdocs/nyse/notifications/trader-update/NYSEChicago_Migration_update_9.4.pdf.*

[5] 15 U.S.C. 78f(b).

[6] 15 U.S.C. 78f(b)(5).

[7] 15 U.S.C. 78s(b)(3)(A).

[8] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[9] 17 CFR 240.19b–4(f)(6).

to Rule 19b–4(f)(6)(iii),[10] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange represents that the proposal would correctly identify and publicly state on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, execution and routing of orders, and for performing the regulatory compliance checks to each of those functions. Further, the Exchange represents that the proposal would enhance the clarity and transparency in Exchange Rules surrounding the inbound routing function performed by Arca Securities for the Exchange's affiliate, NYSE Chicago. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest, and hereby waives the operative delay and designates the proposed rule change as operative upon filing.[11]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[12] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSENAT–2019–25 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSENAT–2019–25. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSENAT–2019–25 and should be submitted on or before December 5, 2019.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Jill M. Peterson,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87487; File No. SR–BX–2019–040]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 4759

November 7, 2019.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 29, 2019, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 4759, as described below. While these amendments are effective upon filing, the Exchange has designated the proposed amendments to be operative on November 4, 2019.

The text of the proposed rule change is available on the Exchange's website at *http://nasdaqbx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 4759, which lists the proprietary

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

and network processor feeds that the Exchange utilizes for the handling, routing, and execution of orders, as well as for the regulatory compliance processes related to those functions. Presently, the Exchange's trading system utilizes proprietary market data as the Primary Source of quotation data for the following markets that provide a reliable direct feed: NYSE American, Nasdaq BX, CBOE EDGA, CBOE EDGX, CHX, NYSE, NYSE Arca, Nasdaq, Nasdaq PSX, CBOE BYX, and CBOE BZX. For each of these markets, the Exchange uses SIP data as the Secondary Source of quotation data.[3] For other markets, namely NYSE National, FINRA ADF, and IEX, the Exchange utilizes SIP data as the Primary Source; there is no Secondary Source for those markets. The Exchange proposes to amend Rule 4759 to state that going forward, the Exchange will utilize SIP data, rather than a direct feed, as its Primary Source of data for CHX (now known as NYSE Chicago [4]), with no Secondary Source utilized for that data. The Exchange proposes this amendment to reflect the fact that NYSE Chicago is migrating to a new technology platform and that, after November 1, 2019, it has announced that it will cease offering the NYSE Chicago Book Feed that currently serves as its direct feed to the Exchange.[5] Although the Exchange understands that NYSE Chicago plans to offer new data feeds to replace the NYSE Chicago Book Feed, the Exchange has yet to decide whether it will utilize them.[6]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that it is necessary to amend its Rules to account for the fact that, after November 1, 2019, NYSE Chicago will no longer offer the direct feed to which the Exchange currently subscribes. The Exchange notes that it already utilizes the SIP as its sole source of quote data for NYSE National and IEX—as well as the FINRA ADF, without issue. In the event that the Exchange determines that its proposal to utilize SIP data is inadequate for its purposes, then the Exchange may choose to subscribe to one or more of the replacement proprietary data feeds that NYSE Chicago plans to offer beginning on November 4, 2019.

Lastly, the Exchange believes that it is consistent with the public interest and the protection of investors to update the names of the exchanges listed in Rule 4759 as this change will make it easier for market participants to identify the exchanges for which the Exchange uses the direct feed and/or SIP for the purposes described in the Rule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, it is merely intended to reflect the fact that the Exchange will no longer consume the NYSE Chicago Book Feed, which NYSE Chicago plans to discontinue after November 1, 2019. The Exchange does not expect that its decision to utilize the SIP, going forward, to obtain NYSE Chicago quote data will have any competitive impacts. As noted above, the Exchange presently utilizes the SIP as its sole source of quote data for several other exchanges, including NYSE National and IEX.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [9] and Rule 19b–4(f)(6) thereunder.[10]

A proposed rule change filed under Rule 19b–4(f)(6) [11] normally does not become operative for 30 days from the date of filing. However, Rule 19b–4(f)(6)(iii) [12] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the Exchange can amend Rule 4759 prior to the discontinuation of the NYSE Chicago Book Feed. The Exchange states that waiver of the operative delay would prevent Rule 4759 from being inaccurate and causing confusion among investors and the public. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[3] Pursuant to Rule 4759, the Primary Source of data is used unless it is delayed by a configurable amount compared to the Secondary Source of data. The Exchange reverts to the Primary Source of data once the delay has been resolved.

[4] The Exchange also proposes to update the Rule to reflect the fact that the Chicago Stock Exchange is now known as NYSE Chicago.

[5] *See https://www.nyse.com/market-data/real-time#chicago.*

[6] *See id.* If and when the Exchange decides to subscribe to these replacement NYSE Chicago direct data feed products, the Exchange will file a proposal to amend Rule 4759 accordingly.

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

[9] 15 U.S.C. 78s(b)(3)(A).

[10] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has requested that the Commission waive the pre-filing requirement. The Commission hereby waives that requirement.

[11] 17 CFR 240.19b–4(f)(6).

[12] 17 CFR 240.19b–4(f)(6)(iii).

[13] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2019–040 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2019–040. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BX–2019–040 and should be submitted on or before December 5, 2019.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Jill M. Peterson,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–87481; File No. SR–NYSE–2019–57]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend NYSE Rule 7.37 To Specify the Exchange's Use of Data Feeds from NYSE Chicago, Inc.

November 6, 2019.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on October 31, 2019, New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to: (1) Amend Rule 7.37 to specify in Exchange rules the Exchange's use of data feeds from NYSE Chicago, Inc. (''NYSE Chicago'') for order handling and execution, order routing, and regulatory compliance; and (2) amend Rule 17 to reflect that Archipelago Securities LLC (''Arca Securities'') would function as a routing broker for the Exchange's affiliate, NYSE Chicago. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the table in Rule 7.37 that sets forth on a market-by-market basis the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, execution and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the table would be amended to include NYSE Chicago, which intends to migrate to the Pillar trading platform.[4] Rule 7.37 currenlty [sic] provides that the Chicago Stock Exchange, Inc., the predecessor name of NYSE Chicago, utilizes the securities information processor (''SIP'') data feed as its primary source for the handling, execution and routing of orders, as well as for regulatory compliance, and does not use a secondary source. Once NYSE Chicago transitions trading to Pillar, it would use a direct data feed as its primary source and the SIP data feed as a secondary source. To reflect these changes, the Exchange proposes to amend Rule 7.37 to specify which data feeds the Exchange would use for NYSE Chicago. Specifically, the Exchange proposes to amend the rule to provide that NYSE Chicago would use the direct data feed as the primary source and would use the SIP data feed as a secondary source.

Additionally, the Exchange proposes to amend Rule 17 to reflect that Arca Securities would function as a routing broker for the Exchange's affiliate, NYSE Chicago. Specifically, the Exchange proposes to amend Rule 17(c)(2)(A) and (B) to reference NYSE Chicago as an affiliate of the Exchange for the purposes of the inbound routing function performed by Arca Securities. The proposed rule change would provide more clarity and transparency to all the functions that Arca Securities performs on behalf of the Exchange and its affiliates, which now includes NYSE Chicago. The Exchange is not proposing any substantive change to the rule.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Securities Exchange Act of 1934 (the

[4] NYSE Chicago has announced that, subject to rule approvals, it will transition to trading on Pillar on November 4, 2019. *See* Trader Update, *available here: https://www.nyse.com/publicdocs/nyse/notifications/trader-update/NYSEChicago_Migration_update_9.4.pdf.*

''Act''),[5] in general, and furthers the objectives of Section 6(b)(5),[6] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes its proposal to update the table in Rule 7.37 to include NYSE Chicago will ensure that Rule 7.37 correctly identifies and publicly states on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, execution and routing of orders, and for performing the regulatory compliance checks to each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because it provides additional specificity, clarity and transparency. The Exchange believes the proposed rule change to amend Rule 17 also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because the proposed rule change would enhance the clarity and transparency in Exchange Rules surrounding the inbound routing function performed by Arca Securities for the Exchange's affiliate, NYSE Chicago.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather would provide the public and investors with information about which data feeds the Exchange uses for execution and routing decisions, and provide clarity in Exchange rules that Arca Securities would perform the inbound routing function on behalf on the Exchange's affiliate, NYSE Chicago.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [7] and Rule 19b–4(f)(6) thereunder.[8] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[9]

A proposed rule change filed under Rule 19b–4(f)(6) [10] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[11] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange represents that the proposal would correctly identify and publicly state on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, execution and routing of orders, and for performing the regulatory compliance checks to each of those functions. Further, the Exchange represents that the proposal would enhance the clarity and transparency in Exchange Rules surrounding the inbound routing function performed by Arca Securities for the Exchange's affiliate, NYSE Chicago. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest, and hereby waives the operative delay and designates the proposed rule change as operative upon filing.[12]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [13] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2019–57 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2019–57. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2019–0016]

Privacy Act of 1974; Matching Program

AGENCY: Social Security Administration (SSA).

ACTION: Notice of a New Matching Program.

SUMMARY: In accordance with the provisions of the Privacy Act, as amended, this notice announces a new matching program with the Center for Medicare & Medicaid Services (CMS). This matching agreement establishes the terms, conditions, and safeguards under which CMS will disclose to SSA Medicare non-utilization information for Social Security Title II beneficiaries aged 90 and above. CMS will identify Medicare enrollees whose records have been inactive for three or more years. SSA will use this data as an indicator to select and prioritize cases for review to determine continued eligibility for benefits under Title II of the Social Security Act (Act). SSA will contact these individuals to verify ongoing eligibility. SSA will use this data for the purposes of fraud discovery and the analysis of fraud program operations; this agreement allows for SSA's Office of Anti-Fraud Programs (OAFP) to evaluate the data for the purposes of fraud detection. SSA will refer individual cases of suspected fraud, waste, or abuse to the Office of the Inspector General (OIG) for investigation.

DATES: The deadline to submit comments on the proposed matching program is 30 days from the date of publication of this notice in the **Federal Register**. The matching program will be applicable on January 1, 2020, or once a minimum of 30 days after publication of this notice has elapsed, whichever is later. The matching program will be in effect for a period of 18 months.

ADDRESSES: Interested parties may comment on this notice by either telefaxing to (410) 966–0869, writing to Matthew Ramsey, Executive Director, Office of Privacy and Disclosure, Office of the General Counsel, Social Security

Administration, G–401 WHR, 6401 Security Boulevard, Baltimore MD 21235–6401, or emailing *Matthew.Ramsey@ssa.gov.* All comments received will be available for public inspection by contacting Mr. Ramsey at this street address.

FOR FURTHER INFORMATION CONTACT: Norma Followell, Supervisory Team Lead, Office of Privacy and Disclosure, Office of the General Counsel, Social Security Administration, G–401 WHR, 6401 Security Boulevard, Baltimore, MD 21235–6401, at telephone: (410) 966–5855, or send an email to *Norma.Followell@ssa.gov.*

SUPPLEMENTARY INFORMATION: None.

Matthew Ramsey,

Executive Director, Office of Privacy and Disclosure, Office of the General Counsel.

PARTICIPATING AGENCIES:

SSA and CMS.

AUTHORITY FOR CONDUCTING THE MATCHING PROGRAM:

The legal authority for this agreement is executed in compliance with the Privacy Act of 1974 (5 U.S.C. 552a), as amended by the Computer Matching and Privacy Protection Act (CMPPA) of 1988 (Public Law (Pub. L.) 100–503), including 5 U.S.C. 552a(b)(3); section 1106 of the Act (42 U.S.C. 1306); and Office of Management and Budget guidelines pertaining to computer matching at 54 FR 25818 (June 19, 1989).

Section 202 of the Act (42 U.S.C. 402) outlines the requirements for eligibility to receive Old-Age, Survivors, and Disability Insurance Benefits under Title II of the Act. Section 205(c) of the Act (42 U.S.C. 405) directs the Commissioner of Social Security to verify the eligibility of a beneficiary.

This matching program employs CMS systems containing Protected Health Information (PHI) as defined by Health and Human Services (HHS) regulation ''Standards for Privacy of Individually Identifiable Health Information'' (45 CFR 160 and 164 (78 FR 5566, Parts A and E, published January 25, 2013)). PHI authorized by the routine uses may only be disclosed by CMS if, and as permitted or required by the ''Standard for Privacy in Individually Identifiable Health Information,'' (45 CFR 164.512d).

PURPOSE(S):

This matching program establishes the terms, conditions, and safeguards under which CMS will disclose to SSA Medicare non-utilization information for Social Security Title II beneficiaries aged 90 and above.

CMS will identify Medicare enrollees whose records have been inactive for three or more years. SSA will use this data as an indicator to select and prioritize cases for review to determine continued eligibility for benefits under Title II of the Act. SSA will contact these individuals to verify ongoing eligibility. In addition, SSA will use this data for the purposes of fraud discovery and the analysis of fraud program operations; this agreement allows for SSA's OAFP to evaluate the data for purposes of fraud detection. SSA will refer individual cases of suspected fraud, waste, or abuse to OIG for investigation.

CATEGORIES OF INDIVIDUALS:

The individuals whose information is involved in this matching program are Social Security Title II beneficiaries aged 90 and above.

CATEGORIES OF RECORDS:

SSA will provide CMS with a finder file containing the following information for each individual: (a) Title II Claim Account Number; (b) Title II Beneficiary Identification Code; (c) First Name; (d) Last Name; and (e) Date of birth.

CMS will provide SSA with a response file containing the following information for each individual: (a) CMS File Number (identified as a Health Insurance Claim Number (HICN) or Medicare Beneficiary Identifier (MBI)); (b) Whether CMS matched beneficiary or individual is a Medicare beneficiary; (c) Whether individual is a Medicaid recipient; (d) Whether Medicare was used in the last 3 years; (e) Whether the beneficiary is a part of an HMO; (f) Whether the beneficiary lives in a nursing home; (g) Whether the beneficiary has private health insurance; (h) Whether the beneficiary has veteran's health insurance; or (i) Whether the beneficiary has Tricare insurance.

SYSTEM(S) OF RECORDS:

SSA will disclose to CMS information from the Master Beneficiary Record (MBR) (60–0090), last fully published January 11, 2006 (71 FR 1826), amended on December 10, 2007 (72 FR 69723), July 5, 2013 (78 FR 40542), July 3, 2018 (83 FR 31250–31251), and November 1, 2018 (83 FR 54969).

SSA will retain any information from the CMS response file in the Anti-Fraud Enterprise Solution System of Records for OAFP fraud-related analytics, or data that leads to OAFP to initiate a fraud investigation (60–0388) published May 3, 2018 (83 FR 19588).

CMS will disclose to SSA information from the following Systems of Record (SORs): (a) National Claims History (NCH) (09–70–0558), published November 20, 2006 (71 FR 67137); (b) Enrollment Data Base (EDB) (09–70–0502), published February 26, 2008 at 73 FR 10249; and (c) The Long Term Care—Minimum Data Set (MDS) (90–70–0528), published March 19, 2007 at 72 FR 12801.

SSA's and CMS's SORs have routine uses permitting the disclosures needed to conduct this match.

[FR Doc. 2019–24724 Filed 11–13–19; 8:45 am]

BILLING CODE P

SURFACE TRANSPORTATION BOARD

[Docket No. AB 55 (Sub-No. 797X)]

CSX Transportation, Inc.—Discontinuance of Service Exemption—in Suffolk County, Va.

CSX Transportation, Inc. (CSXT), has filed a verified notice of exemption under 49 CFR part 1152 subpart F—*Exempt Abandonments and Discontinuances of Service* to discontinue service over an approximately 4.0-mile rail line on its Florence Division, Portsmouth Subdivision, known as the Suffolk Spur from milepost AB 214.0 to milepost AB 218.0, in Suffolk County, Va. (the Line). The Line traverses U.S. Postal Service Zip Code 23434. CSXT states that there is one station on the Line: Suffolk (FSAC10133) at milepost AB 215.0. CSXT states that the station can be closed.

CSXT has certified that: (1) No freight traffic has moved over the Line for two years; (2) any overhead traffic on the Line can be rerouted; (3) no formal complaint filed by a user of rail service on the Line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the Line either is pending with the Surface Transportation Board (Board) or with any U.S. District Court or has been decided in favor of complainant within the two-year period; and (4) the requirements at 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the discontinuance of service shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho,* 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) [1] to subsidize continued rail service has been received, this exemption will be effective on December 14, 2019, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues must be filed by November 22, 2019. Formal expressions of intent to file an OFA to subsidize continued rail service under 49 CFR 1152.27(c)(2) [2] must be filed by November 25, 2019.[3] Petitions for reconsideration must be filed by December 4, 2019, with the Surface Transportation Board, 395 E Street SW, Washington, DC 20423–0001.

A copy of any petition filed with the Board should be sent to CSXT's representative, Louis E. Gitomer, Law Offices of Louis E. Gitomer, LLC, 600 Baltimore Avenue, Suite 301, Towson, MD 21204.

If the verified notice contains false or misleading information, the exemption is void ab initio.

Board decisions and notices are available at *www.stb.gov.*

Decided: November 6, 2019.

By the Board, Allison C. Davis, Director, Office of Proceedings.

Kenyatta Clay,

Clearance Clerk.

[FR Doc. 2019–24709 Filed 11–13–19; 8:45 am]

BILLING CODE 4915–01–P

[1] Persons interested in submitting an OFA to subsidize continued rail service must first file a formal expression of intent to file an offer, indicating the intent to file an OFA for subsidy and demonstrating that they are preliminarily financially responsible. *See* 49 CFR 1152.27(c)(2)(i).

[2] The filing fee for OFAs can be found at 49 CFR 1002.2(f)(25).

[3] Because this is a discontinuance proceeding and not an abandonment, trail use/rail banking and public use conditions are not appropriate. Because there will be an environmental review during abandonment, this discontinuance does not require environmental review.

TENNESSEE VALLEY AUTHORITY

Sunshine Act Meetings

TIME AND DATE: 9:30 a.m. on November 14, 2019.

PLACE: The Halloran Centre for Performing Arts & Education, 225 S Main Street, Memphis, Tennessee.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Meeting No. 19–04

The TVA Board of Directors will hold a public meeting on November 14, 2019, at the Halloran Centre for Performing Arts & Education, 225 S Main Street, Memphis, Tennessee. The meeting will be called to order at 9:30 a.m. CT to consider the agenda items listed below. TVA management will answer questions from the news media following the Board meeting.

On November 13, the public may comment on any agenda item or subject at a board-hosted public listening session which begins at 3:30 p.m. CT and will last until 5:30 p.m. Preregistration is required to address the Board.

Agenda

1. Approval of minutes of the August 22, 2019, Board Meeting
2. Report from President and CEO
3. Report of the Finance, Rates, and Portfolio Committee
   A. Contracts Delegation
4. Report of the People and Performance Committee
   A. Fiscal Year 2019 Performance and Compensation
   B. CEO Compensation for Fiscal Year 2020
5. Report of the Audit, Risk, and Regulation Committee
6. Report of the Nuclear Oversight Committee
7. Report of the External Relations Committee
8. Chair Report
   A. Committee Assignments

CONTACT PERSON FOR MORE INFORMATION: For more information: Please call Jim Hopson, TVA Media Relations at (865) 632–6000, Knoxville, Tennessee. People who plan to attend the meeting and have special needs should call (865) 632–6000. Anyone who wishes to comment on any of the agenda in writing may send their comments to: TVA Board of Directors, Board Agenda Comments, 400 West Summit Hill Drive, Knoxville, Tennessee 37902.

Dated: November 7, 2019.

Sherry A. Quirk,

General Counsel.

BILLING CODE 8120–08–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2019–0690]

Agency Information Collection Activities: Requests for Comments; Clearance of Renewed Approval of Information Collection: Flight Operations Quality Assurance (FOQA) Program.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on September 4, 2019. The collection involves the voluntary submission of information gained through the Flight Operations Quality Assurance (FOQA) Program. FOQA is a voluntary safety program designed to improve aviation safety through the proactive use of flight-recorded data. The information collected will allow operators to use this data to identify and correct deficiencies in all areas of flight operations.

DATES: Written comments should be submitted by December 16, 2019.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the attention of the Desk Officer, Department of Transportation/FAA, and sent via electronic mail to *oira_submission@omb.eop.gov,* or faxed to (202) 395–6974, or mailed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Docket Library, Room 10102, 725 17th Street, NW, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Sandra Ray by email at: *Sandra.ray@faa.gov;* phone: 412–329–3088.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–0660.

Title: Flight Operations Quality Assurance (FOQA) Program.

Form Numbers: There are no forms associated with this collection.

Type of Review: Renewal of an Information Collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on September 4, 2019 (84 FR 46604). Comments were received from the 60 day comment period, and the estimated time burden has been adjusted to reflect those comments. The number of respondents was also updated to reflect the most current number. Flight Operations Quality Assurance (FOQA) is a voluntary safety program designed to improved aviation safety through the proactive use of flight-recorded data. Operators will use this data to identify and correct deficiencies in all areas of flight operations. Properly used, FOQA data can reduce or eliminate safety risks, as well as minimize deviations from regulations. Through access to de-identified aggregate FOQA data, the Federal Aviation Administration (FAA can identify and analyze national trends and target resources to reduce operational risks in the National Airspace System (NAS), air traffic control (ATC), flight operations and airport operations.

The FAA and the air transportation industry have sought additional means for addressing safety problems and identifying potential safety hazards. Based on the experiences of foreign air carriers, the results of several FAA-sponsored studies, and input received from government/industry safety forums, the FAA concluded that wide implementation of FOQA programs could have significant potential to reduce air carrier accident rates below current levels. The value of FOQA programs is the early identification of adverse safety trends, which, if uncorrected, could lead to accidents. A key element in FOQA is the application of corrective action and follow-up to ensure that unsafe conditions are effectively remediated.

Respondents: 64 Air Carriers (55 with existing programs and 9 carriers with new programs).

Frequency: Once for a certificate holders seeking approval of a program, monthly (or less depending on agreement with FAA office) for certificate holders with an approved program.

Estimated Average Burden per Response: 100 Hours for certificate holders seeking approval of a new program, 30.0 hour per year for certificate holders with an approved program.

Estimated Total Annual Burden: 100 hours per new respondent, 30 hours annually per existing respondents.

Issued in Washington, DC on November 8, 2019.

Sandra L. Ray

Aviation Safety Inspector, FAA, Policy Integration Branch, AFS–270.

[FR Doc. 2019–24713 Filed 11–13–19; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. 2019–68]

Petition for Exemption; Summary of Petition Received; BFD Systems, LLC

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Federal Aviation Regulations. The purpose of this notice is to improve the public's awareness of, and participation in, the FAA's exemption process. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before December 4, 2019.

ADDRESSES: Send comments identified by docket number FAA–2019–0657 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jake Troutman, (202) 683–7788, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC, on November 7, 2019.

Forest Rawls,

Acting Deputy Executive Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2019–0657.

Petitioner: BFD Systems, LLC.

Section(s) of 14 CFR Affected: §§ 61.23(a) & (c); 61.101(e)(4) & (5); 61.113(a); 61.315(a); 91.7(a); 91.119(c); 91.121; 91.151(a)(1); 91.405(a); 91.407(a)(1); 91.409(a)(1) & (2); & 91.417(a) & (b).

Description of Relief Sought: The proposed exemption, if granted, would allow the petitioner to operate the GD–40 BFD Edition unmanned aircraft system, with a maximum takeoff weight of 120 pounds. Operations will be conducted for: Closed set motion picture films, carrying cinematic cameras, in restricted access film locations; not over people, and within visual line of sight of the pilot. The petitioner also requests relief for tethered operations for communication and video equipment cellular network augmentation, and live broadcast conditions. The proposed locations are in guarded restricted-access areas, or within a defined cordoned off area. Cellular network augmentation operations will support FirstNet network subscribers in disaster areas and help restore and improve first responder communications capabilities in the aftermath of natural disasters in the United States.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA–2019–0034]

Agency Information Collection Activities: Notice of Request for Extension of Currently Approved Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of request for extension of currently approved information collection.

SUMMARY: The FHWA invites public comments about our intention to request the Office of Management and Budget's (OMB) approval for renewal of an existing information collection that is summarized below under **SUPPLEMENTARY INFORMATION**. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by January 13, 2020.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 2020–0034 by any of the following methods:

Website: For access to the docket to read background documents or comments received, go to the Federal eRulemaking Portal: *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Steven Frankel, (202) 366–9649 or Beatriz Hernandez (202)366–3126, Office of the Chief Financial Officer, Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: Request Form for Fund Transfers to Other Agencies and Among Title 23 Programs.

OMB Control Number: 2125–0620.

Background: The Fixing America's Surface Transportation (FAST) Act, Public Law 114–94, continues the ability of States to transfer highway funds to other States and agencies and among programs/projects. These authorities are codified in sections 104 and 126 of title 23, United States Code, as amended by the FAST Act. Transferability under the FAST Act is generally similar to that allowed under previous authorization acts such as the Moving Ahead for Progress in the 21st Century Act (MAP–21) and the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA–LU). This notice establishes requirements for initiating the transfer of apportioned funds (funds distributed among States and programs by statutory formula) to carry out these provisions of law. The types of transfers affected by this notice are:

a. Transfer of funds from a State to the FHWA pursuant to U.S.C. Title 23, § 104(f)(3);

b. Transfer of funds from a State to a Federal Agency other than FHWA;

c. Transfer of funds from a State to another State;

d. Transfer of funds from FHWA to Federal Transit Administration pursuant to U.S.C. Title 23, § 104(f)(1);

e. Transfer of funds between programs pursuant to U.S.C. Title 23, § 126; and,

f. Transfer of funds between projects.

The State initiating the fund transfer must fill out a FHWA Funds Transfer Request form. This transfer form (FHWA–1575C) submitted for approval is similar to the currently approved transfer forms (FHWA–1575 and FHWA–1576) that have been utilized for the past five years. The main improvement is that this transfer form combines what were previously two forms (one for transfers within State or to another State and one for transfers to other agencies) into a single form. The new FHWA–1575C transfer form includes drop-down boxes that will allow States to select the type of transfer and other information. This new form will streamline that transfer request process for States by allowing them to use the single form for all types of transfers of apportioned funds rather than having to select the appropriate form. Information required to fill out a transfer form will include the requester's contact information; a description of the program/project the transfer will come from and go to, the fiscal year, the program code, a demo ID or an urban area when applicable, and the amount to be transferred. The form must be approved by the applicable State Department of Transportation and concurred on by the correlating FHWA Division Office.

Respondents: 50 State Transportation Departments, the District of Columbia, and Puerto Rico.

Frequency: As Needed.

Estimated Average Burden per Response: 15 minutes.

Estimated Total Annual Burden hours: It is estimated that a total of 2,000 responses will be received annually, which would equal a total annual burden of 500 hours.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued On: November 8, 2019.

Michael Howell,

Information Collection Officer.

[FR Doc. 2019–24721 Filed 11–13–19; 8:45 am]

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2019–0188]

Hours of Service of Drivers: Palmetto State Armory; Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that it has received an application from Palmetto State Armory (PSA) requesting an exemption to increase the 100 air-mile radius in ''short-haul operations,'' to 150 air-miles for its drivers. PSA requests the exemption to permit two of its commercial motor vehicle (CMV) drivers to record hours of servie on time records instead of record of duty status (RODS) when operating between 100 and 150 air miles. FMCSA requests public comment on PSA's application for exemption.

DATES: Comments must be received on or before December 16, 2019.

ADDRESSES: You may submit comments identified by Federal Docket Management System Number FMCSA–2019–0188 by any of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* See the *Public Participation and Request for Comments* section below for further information.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12–

140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m. E.T., Monday through Friday, except Federal holidays.

• *Fax:* 1–202–493–2251.

Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to *www.regulations.gov,* including any personal information included in a comment. Please see the *Privacy Act* heading below.

Docket: For access to the docket to read background documents or comments, go to *www.regulations.gov* at any time or visit Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. The on-line FDMS is available 24 hours each day, 365 days each year.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: Ms. Pearlie Robinson, FMCSA Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; Telephone: (202) 366–4325; Email: *MCPSD@dot.gov.* If you have questions on viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2019–0188), indicate the specific section of this document to which the comment applies, and provide a reason for suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to *www.regulations.gov* and put the docket number, ''FMCSA–2019–0188'' in the ''Keyword'' box, and click ''Search.'' When the new screen appears, click on ''Comment Now!'' button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material received during the comment period.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period (up to 5 years) and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

III. Request for Exemption

Drivers qualifying for the HOS short-haul exception in 49 CFR 395.1(e)(1) do not have to maintain a record of duty status (RODS), provided that (among other things) they operate within a 100 air-mile radius of their normal work reporting location and return to that location and are relased from work within 12 hours after coming on duty. A driver who exceeds the 100 air-mile radius or the 12-hour limit loses the short-haul exception and must immediately prepare RODS for the entire day, or use an electronic logging device (ELD) if the driver is required to prepare RODS for more than eight days in a thirty day period, per 49 CFR 395.8(a)(1)(i).

PSA is requesting an exemption to increase the 100 air-mile radius in 49 CFR 395.1(e)(1) to 150 air-miles for its drivers. This proposed exemption would enable the drivers not exceeding the 150 air-mile radius to utilize time records instead of a RODS for that day.

PSA reported in its application that drivers pick up and deliver products between manufacturing facilities, many of whom are sister companies. Drivers also drive to PSA retail stores. They drive for short periods of time, usually less than two hours between stops. These stops or deliveries allow the driver to remain alert. All drivers operate property-carrying CMVs within 150 air-miles and return to their work reporting location at the end of each day.

PSA wrote that current operations include trips between 103 and 109 air-miles. PSA contends that the use of ELDs or maintaining driver logs adds substantial costs to its operation and does not increase the level of safety. PSA requests that the exemption cover the maximum allowable duration of 5 years.

IV. Method To Ensure an Equivalent or Greater Level of Safety

To ensure an equivalent level of safety PSA offers monitoring CSA safety management scores, managing hours of service, requiring both pre-trip and post-trip vehicle inspection, as well as training in defensive driving. PSA reports that its CSA safety management scores are zero in all seven categories; with no recordable accidents during the past 24 months. A copy of the application for exemption is available for review in the docket for this notice.

Issued on: November 6, 2019.

Larry W. Minor,

Associate Administrator for Policy.

[FR Doc. 2019–24722 Filed 11–13–19; 8:45 am]

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–1999–6253]

Petition for Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on October 31, 2019, the Utah Transit Authority (UTA) petitioned the

Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR parts 210, 217, 218, 219, 220, 221, 222, 223, 225, 228, 229, 231, 234, 238, 239, 240, 242, and 243. FRA assigned the petition Docket Number FRA–1999–6253.

UTA, operator of the rail fixed guideway public transit system TRAX in Salt Lake City, Utah, seeks an extension of the terms and conditions of its current shared use waiver of compliance. TRAX is operated with temporal separation on track owned by UTA and shared partially with Utah Railway Company and Savage Bingham & Garfield Railroad Company freight trains dispatched by UTA. FRA granted the original shared use waiver on August 19, 1999, for the North-South line, modified on March 25, 2011, to include a portion of the Mid-Jordan extension with its additional Siemens S70 rolling stock (77 vehicles). In 2015, FRA renewed the previous waivers, granted relief from additional parts of the CFR, and approved the change of shared use milepost limits on the North-South Line to reflect the cessation of freight service south of 6100 South as part of the transit-exclusive Draper Extension.

Specifically, UTA requests FRA extend the regulatory relief in this docket, noting it has recently retired and disposed of 29 Urban Transportation Development Corporation (UTDC) vehicles acquired from the Santa Clara Valley Transportation Authority. Also, UTA is now requesting relief from part 243 for its light rail operators, supervisors, controller supervisors, and light rail rolling stock maintenance employees because training of these employees is already addressed by the existing Utah Department of Transportation State Safety Oversight Agency program certified by the Federal Transit Administration. UTA Track/Signal and Train Control maintenance-of-way employees will comply with part 243 because these employees also perform work on FRA-compliant Frontrunner commuter service.

UTA states it will adopt specific policies and procedures that will provide a level of safety equivalent to that provided by full compliance with FRA regulations. Also, UTA states that ''unlike some light rail systems operating under a shared use waiver, UTA owns the entirety of the TRAX system and corridor, providing it control of the entry of freight trains on the TRAX system.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov* and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Ave. SE, W12–140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Website: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* Docket Operations Facility, U.S. Department of Transportation, 1200 New Jersey Ave. SE, W12–140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Ave. SE, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received by December 30, 2019 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable. Anyone can search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See also *https://www.regulations.gov/privacyNotice* for the privacy notice of *regulations.gov.*

Issued in Washington, DC.

John Karl Alexy,

Associate Administrator for Railroad Safety, Chief Safety Officer.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2019–0120]

Hemphill Brothers Leasing Company; Grant of Petition for Temporary Exemption From Shoulder Belt Requirement for Side-Facing Seats on Motorcoaches

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice of grant of a petition for temporary exemption.

SUMMARY: In accordance with the procedures in our regulations, NHTSA is granting a petition from Hemphill Brothers Leasing Company, LLC (Hemphill), for a temporary exemption from a shoulder belt requirement of Federal Motor Vehicle Safety Standard (FMVSS) No. 208, ''Occupant crash protection,'' for side-facing seats on motorcoaches. The grant permits Hemphill to install Type 1 seat belts (lap belt only) at side-facing seating positions, instead of Type 2 seat belts (lap and shoulder belts). After reviewing the petition and the comments received, the agency has determined that the requested exemption is warranted to enable the petitioner to sell a vehicle whose overall level of safety or impact protection is at least equal to that of a nonexempted vehicle.

DATES: This exemption applies to the petitioner's motorcoaches produced from November 14, 2019 until November 15, 2021.

FOR FURTHER INFORMATION CONTACT: Deirdre R. Fujita, Office of the Chief Counsel, NCC–200, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE, West Building, Washington, DC 20590. Telephone: (202) 366–2992; Fax: (202) 366–3820.

SUPPLEMENTARY INFORMATION:

I. Background

a. Statutory Authority for Temporary Exemptions

The National Traffic and Motor Vehicle Safety Act (Safety Act), codified as 49 U.S.C. chapter 301, provides the Secretary of Transportation authority to exempt, on a temporary basis, under specified circumstances, and on terms the Secretary deems appropriate, motor vehicles from a motor vehicle safety standard or bumper standard. This authority and circumstances are set forth in 49 U.S.C. 30113. The authority for implementing this section has been delegated to NHTSA by 49 CFR 1.95.

NHTSA established 49 CFR part 555, *Temporary Exemption from Motor Vehicle Safety and Bumper Standards,* to implement the statutory provisions concerning temporary exemptions. Under part 555, subpart A, a vehicle manufacturer seeking an exemption must submit a petition for exemption containing specified information. Among other things, the petition must set forth (a) the reasons why granting the exemption would be in the public interest and consistent with the objectives of the Safety Act, and (b) required information showing that the manufacturer satisfies one of four bases for an exemption.[1] Hemphill has applied on the basis that the applicant is otherwise unable to sell a motor vehicle with an overall safety level at least equal to that of nonexempt vehicles (*see* 49 CFR 555.6(d)). A manufacturer is eligible for an exemption under this basis only if NHTSA determines the exemption is for not more than 2,500 vehicles to be sold in the U.S. in any 12-month period. An exemption under this basis may be granted for not more than 2 years but may be renewed upon reapplication.[2]

b. FMVSS No. 208

On November 25, 2013, NHTSA published a final rule amending FMVSS No. 208 to require seat belts for each passenger seating position in all new over-the-road buses (OTRBs) (regardless of gross vehicle weight rating (GVWR)), and all other buses with GVWRs greater than 11,793 kilograms (kg) (26,000 pounds (lb)) (with certain exclusions).[3]

In the notice of proposed rulemaking (NPRM) preceding the final rule (75 FR 50958, August 18, 2010) NHTSA proposed to permit manufacturers the option of installing either a Type 1 (lap belt) or a Type 2 (lap and shoulder belt) on side-facing seats.[4] The proposed option was consistent with a provision in FMVSS No. 208 that allows lap belts for side-facing seats on buses with a GVWR of 4,536 kg (10,000 lb) or less. NHTSA proposed the option because the agency was unaware of any demonstrable increase in associated risk of lap belts compared to lap and shoulder belts on side-facing seats. NHTSA believed that[5] ‘‘a study commissioned by the European Commission regarding side-facing seats on minibuses and motorcoaches found that due to different seat belt designs, crash modes and a lack of real world data, it cannot be determined whether a lap belt or a lap/shoulder belt would be the most effective.’’[6]

However, after the NPRM was published, the Motorcoach Enhanced Safety Act of 2012 was enacted as part of the Moving Ahead for Progress in the 21st Century Act (MAP–21), Public Law 112–141 (July 6, 2012). Section 32703(a) of MAP–21 directed the Secretary of Transportation (authority delegated to NHTSA) to ‘‘prescribe regulations requiring safety belts to be installed in motorcoaches at each designated seating position.’’[7] As MAP–21 defined ‘‘safety belt’’ to mean an integrated lap and shoulder belt, the final rule amended FMVSS No. 208 to require lap and shoulder belts at all designated seating positions, including side-facing seats, on OTRBs.[8]

Even as it did so, however, the agency reiterated its view that ‘‘the addition of a shoulder belt at [side-facing seats on light vehicles] is of limited value, given the paucity of data related to side facing seats.’’[9] NHTSA also reiterated that there have been concerns expressed in literature in this area about shoulder belts on side-facing seats, noting in the final rule that, although the agency has no direct evidence that shoulder belts may cause serious neck injuries when applied to side-facing seats, there are simulation data indicative of potential carotid artery injury when the neck is loaded by the shoulder belt.[10] The agency also noted that Australian Design Rule ADR 5/04, ‘‘Anchorages for Seatbelts’’ specifically prohibits shoulder belts for side-facing seats.

Given that background, and believing there would be few side-facing seats on OTRBs, NHTSA stated in the November 2013 final rule that the manufacturers at issue may petition NHTSA for a temporary exemption under 49 CFR part 555 to install lap belts instead of lap and shoulder belts at side-facing seats.[11] The basis for the petition would be that the applicant is unable to sell a bus whose overall level of safety is at least equal to that of a non-exempted vehicle. In other words, for side-facing seats, lap belts provide at least an equivalent level of safety as lap and shoulder belts.

c. Overview of Petition

In accordance with 49 U.S.C. 30113 and the procedures in 49 CFR part 555, Hemphill submitted a petition dated April 5, 2018, asking NHTSA for a temporary exemption from the shoulder belt requirement of FMVSS No. 208 for side-facing seats on its OTRBs under 49 CFR 555.6(d). A copy of the petition may be found in the docket (go to *http://www.regulations.gov* and enter Docket No. NHTSA–2019–0019).

Hemphill describes itself as a second-stage manufacturer[12] organized under the laws of Tennessee. The petitioner states that it typically receives a bus shell[13] from an ‘‘original manufacturer’’ and ‘‘customizes the Over-the-Road Bus (‘OTRB’) to meet the needs of entertainers, politicians, musicians, celebrities and other specialized customers who use motorcoaches as a necessity for their businesses.’’ Hemphill states that it ‘‘builds out the complete interior’’ of the bus shell, including—

roof escape hatch; fire suppression systems (interior living space, rear tires, electrical

[2] 49 CFR 555.8(b) and (e).

[3] 78 FR 70416 (November 25, 2013); response to petitions for reconsideration, 81 FR 19902 (April 6, 2016). The final rule became effective November 28, 2016 for buses manufactured in a single stage, and a year later for buses manufactured in more than one stage.

[4] 75 FR at 50971.

[5] 75 FR at 50971–50972.

[6] *http://ec.europa.eu/enterprise/automotive/projects/safety_consid_long_stg.pdf.*

[7] MAP–21 states at § 32702(6) that ‘‘the term ‘motorcoach’ has the meaning given the term ‘over-the-road bus’ in section 3038(a)(3) of the Transportation Equity Act for the 21st Century (49 U.S.C. 5310 note), but does not include a bus used in public transportation provided by, or on behalf of, a public transportation agency; or a school bus, including a multifunction school activity bus.’’ Section 3038(a)(3) (49 U.S.C. 5310 note) states: ‘‘The term ‘over-the-road bus’ means a bus characterized by an elevated passenger deck located over a baggage compartment.’’

[8] For side-facing seats on buses other than OTRBs, in the final rule NHTSA permitted either lap or lap/shoulder belts at the manufacturer's option.

[9] 78 FR at 70448, quoting from the agency's Anton's Law final rule which required lap/shoulder belts in forward-facing rear seating positions of light vehicles, 59 FR 70907.

[10] Editors: Fildes, B., Digges, K., ‘‘Occupant Protection in Far Side Crashes,’’ Monash University Accident Research Center, Report No. 294, April 2010, pg. 57.

[11] 78 FR at 70448.

[12] While ‘‘second-stage manufacturer’’ is not defined in NHTSA's regulations, Hemphill is referring to a ‘‘final-stage manufacturer,’’ which is defined in NHTSA's certification regulation (49 CFR part 567) as ‘‘a person who performs such manufacturing operations on an incomplete vehicle that it becomes a completed vehicle’’ (49 CFR 567.3). Hemphill states that it also operates the vehicles as a for-hire motor carrier of passengers, ‘‘leas[ing] the vehicle with driver to a customer on an exclusive basis for a designated period of time.’’

[13] The petition states in its petition (p. 2) that the bus shell ‘‘generally contains the following components: Exterior frame; driver's seat; dash cluster, speedometer, emissions light and emissions diagnosis connector; exterior lighting, headlights, marker lights, turn signals lights, and brake lights; exterior glass, windshield and side lights with emergency exits; windshield wiper system; braking system; tires, tire pressure monitoring system and suspension; and engine and transmission.’’

panels, bay storage compartments, and generator); ceiling, side walls and flooring; seating; electrical system, generator, invertor and house batteries; interior lighting; interior entertainment equipment; heating, ventilation and cooling system; galley with potable water, cooking equipment, refrigerators, and storage cabinets; bathroom and showers; and sleeping positions.

The petitioner states that ''fewer than 100 entertainer-type motorcoaches with side-facing seats are manufactured and enter the U.S. market each year.''

In support of its assertion that the exempted vehicles would provide an overall level of safety or impact protection at least equal to that of nonexempt vehicles, Hemphill reiterates NHTSA's statements in the November 2013 final rule. The petitioner states that NHTSA has not conducted testing on the impact or injuries to passengers in side-facing seats in motorcoaches, so ''there is no available credible data that supports requiring a Type 2 belt at the side-facing seating positions.'' Hemphill states that if it complies with the final rule as published, it would be ''forced to offer'' customers—

> a motorcoach with a safety feature that could make the occupants less safe, or certainly at least no more safe, than if the feature was not installed. The current requirement in FMVSS 208 for Type 2 belts at side-facing seating positions in OTRBs makes the applicants unable to sell a motor vehicle whose overall level of safety is equivalent to or exceeds the level of safety of a non-exempted vehicle.

In support of its assertion that the exemption would be consistent with the public interest, Hemphill states ''NHTSA's analysis in developing this rule found that such belts presented no demonstrable increase in associated risk.'' The petitioner also states that the final rule requiring Type 2 belts at side-facing seats ''was not the result of any change in NHTSA policy or analysis, but rather resulted from an overly broad mandate by Congress for 'safety belts to be installed in motorcoaches at each designated seating position.' '' It states that, based on the existing studies noted in the rulemaking, Type 1 belts at side-facing seats may provide equivalent or even superior occupant protection than Type 2 belts.

The petitioner believes that an option for Type 1 belts at side-facing seats is consistent with the objectives of the Safety Act because it allows the manufacturer to determine the best approach to motor vehicle safety depending on the intended use of the vehicle and its overall design. Additionally, Hemphill states the option meets the need for motor vehicle safety because data indicate no demonstrable difference in risk between the two types of belts when installed in side-facing seats. Finally, the petitioner notes that the option would provide an objective standard that is easy for manufacturers to understand and meet.

Notice of Receipt

On March 28, 2019, NHTSA published a notice of receipt of Hemphill's petition for temporary exemption and requested comment on the petition.[14] The agency received 8 comments on the petition, all of which supported the request. NHTSA received no comments opposing the petition.

Several commenters, all similarly-positioned final-stage manufacturers of entertainer-type motorcoaches, submitted identical comments supporting Hemphill's petition.[15] These commenters state that their entertainer motorcoaches are custom built and typically include side-facing, perimeter seating. They state that fewer than 100 entertainer motorcoaches are manufactured each year. They believe that there is no available data supporting requiring a Type 2 belt at side-facing seats and are concerned that serious injury to passengers could result if they installed the shoulder belts at those seats. Another entertainer motorcoach manufacturer[16] stated that there are no statistics or test models showing that a shoulder belt provides a benefit on side-facing seats.

The American Bus Association (ABA), a trade association for operators who transport the public, and the National Interstate Insurance Company, an insurance provider to the commercial passenger transportation industry, strongly supported Hemphill's petition.[17] These commenters also affirm that fewer than 100 entertainer motorcoaches are manufactured each year. They expressed concern that serious injury to passengers could result from operators and manufacturers complying with the FMVSS No. 208 rule to install the shoulder belts and believe there is no data that supports requiring a Type 2 seat belt at side-facing seats.

Agency Analysis and Decision

After reviewing Hemphill's petition for temporary exemption and the comments received on it, the agency is granting the petition. Granting the petition will enable the petitioner to sell a vehicle whose overall level of safety or impact protection is at least equal to that of a nonexempted vehicle.

In the rulemaking implementing MAP–21's mandate for seat belts on motorcoaches, NHTSA's proposal in the NPRM was to allow manufacturers an option of installing Type 1 (lap belt) or Type 2 (lap and shoulder belt) on side-facing seats. The proposed option was consistent with a provision in FMVSS No. 208 that allows lap belts for side-facing seats on buses with a GVWR of 4,536 kg (10,000 lb) or less. NHTSA proposed the option because the agency was unaware of any demonstrable increase in associated risk of lap belts compared to lap and shoulder belts on side-facing seats. That is, the agency believed that lap belts were not less protective than lap and shoulder belts on side-facing seats.

Commenters and the petitioner raise safety concerns about the shoulder belt portion of a lap and shoulder belt on side-facing seats. The commenters and the petitioner do not provide information supporting their beliefs about the potential for ''serious injury'' beyond reciting what NHTSA said on the matter in the November 2013 final rule. Accordingly, NHTSA believes that the potential safety risk at issue is theoretical at this point; as explained in the November 2013 final rule, the agency cannot affirmatively conclude, based on available information, that shoulder belts on side-facing seats are associated with a demonstrated risk of serious neck injuries in frontal crashes. However, at the same time, NHTSA believes a shoulder belt is of limited value on side-facing seats for the reasons explained in the final rule. Given the uncertainties about shoulder belts on side-facing seats, the few side-facing seats there are on buses subject to the November 2013 final rule, and that FMVSS No. 208 does not require shoulder belts on side-facing seats on any other vehicle type, NHTSA is granting Hemphill's petition for temporary exemption. The grant will permit Hemphill to install Type 1 seat belts (lap belt only) at side-facing seating positions, instead of Type 2 seat

[14] 84 FR 11735, Docket No. NHTSA–2019–0019.

[15] D&S Classic Coach, Pioneer Coach, Roberts Brothers Coach Co., Russell Coach, and Nitetrain Coach Co. These commenters were among the ''other petitioners'' listed in the attachment to the Hemphill petition NHTSA discussed in the notice of receipt of Hemphill's petition (84 FR at 11738). Hemphill's petition originally sought to cover 39 ''other petitioners'' listed in an attachment to the petition. NHTSA noted that the Safety Act and NHTSA's procedures did not clearly allow the bundling of petitions for the type of exemption Hemphill sought. Subsequently, the other manufacturers, including these commenters, submitted individual petitions for temporary exemptions. NHTSA will address those petitions separately from this document.

[16] Superior Coach Interiors, which is also among the ''other petitioners'' attached to the Hemphill petition.

[17] National Interstate describes itself as currently insuring a significant share of the enetertainment motorcoach industry marke and states that it has consistently insured motorcoaches for 30 years.

belts (lap and shoulder belts) at those positions, on the OTRBs it manufactures. This exemption does not apply to forward-facing designated seating positions on the petitioner's vehicles. Under FMVSS No. 208, the forward-facing seating positions must have Type 2 lap and shoulder belts.[18]

NHTSA believes that granting Hemphill's petition is consistent with the public interest. The exemption will enable the applicant to sell buses whose overall level of safety is at least equal to that of non-exempted vehicles. Further, we believe that Hemphill is a small entity.[19] Thus, this temporary exemption not only permits the manufacturer to sell vehicles whose overall level of safety is at least equal to that of non-exempted vehicles, but provides relief to a small business by, as the petitioner notes, providing ''an objective standard that is easy for manufacturers to understand and meet.''

A grant is consistent with the Safety Act. The requested exemption will not impact general motor vehicle safety because the exempted buses will provide overall safety at least equal to that of nonexempted buses. Further, Hemphill produces a small number of affected vehicles annually. Hemphill did not specify in its petition how many buses it would manufacture under the exemption but noted that ''fewer than 100 entertainer-type motorcoaches with side-facing seats are manufactured and enter the U.S. market each year.'' As noted earlier, the ABA and the National Interstate Insurance Company, as well as the ''other petitioners'' who have separately filed petitions for temporary exemption, also affirm that fewer than 100 entertainer-type motorcoaches are manufactured each year. Thus, NHTSA concludes that Hemphill will manufacture very few vehicles relative to the 2,500 per manufacturer limit set forth in the Safety Act and 49 CFR 555.6(d)(4). Further, as explained below, in accordance with 49 CFR 555.9 and § 30113(h) of the Safety Act, prospective purchasers will also be notified of the exemption prior to making their purchasing decisions. The vehicles must have a label notifying prospective purchasers that the vehicles are exempted from the shoulder belt requirement of FMVSS No. 208 for the side-facing seats.

Labeling

Under 49 CFR 555.9(b), a manufacturer of an exempted vehicle must securely affix to the windshield or side window of each exempted vehicle a label containing a statement that the vehicle meets all applicable FMVSSs in effect on the date of manufacture ''except for Standard Nos. [Listing the standards by number and title for which an exemption has been granted] exempted pursuant to NHTSA Exemption No. ____.'' This label notifies prospective purchasers about the exemption and its subject. Under § 555.9(c)(2), this information must also be included on the vehicle's certification label.[20]

The text of § 555.9 does not expressly indicate how the required statement on the two labels should read in situations in which an exemption covers part, but not all, of an FMVSS. In this case, NHTSA believes that a blanket statement that the vehicle has been exempted from Standard No. 208, without an indication that the exemption is limited to the shoulder belt on side-facing seats, could be confusing. A purchaser might incorrectly believe that the vehicle has been exempted from all of FMVSS No. 208's requirements. For this reason, NHTSA believes the two labels should read in relevant part, ''except for the shoulder belt requirement for side-facing seats (Standard No. 208, Occupant Crash Protection), exempted pursuant to * * *.''

In accordance with 49 U.S.C. 30113(b)(3)(B)(iv), the applicant is granted NHTSA Temporary Exemption No. EX 19–01, from the shoulder belt requirement of 49 CFR 571.208 for side-facing seats on its motorcoaches. The exemption shall remain effective for the period designated at the beginning of this document in the DATES section.

[18] On October 2, 2019, the National Transportation Safety Board (NTSB) issued Recommendation H–19–14 in connection with the NTSB's investigation of an October 6, 2018 Schoharie, New York limousine crash. H–19–14 recommends that NHTSA ''[r]equire lap/shoulder belts for each passenger seating position on all new vehicles modified to be used as limousines.'' The limousine in the Schoharie crash had between 18 and 22 seating positions and a GVWR of 13,080 lb. Under FMVSS No. 208, vehicles with 11 or more seating positions and a GVWR between 10,000 lb and 26,000 lb are not required to have seat belts in passenger seats. The NTSB recommendation would apply a passenger seat belt requirement to those vehicles.

[19] According to 13 CFR 121.201, the Small Business Administration's size standards regulations used to define small business concerns, manufacturers of these buses fall under North American Industry Classification System (NAICS) No. 336213, Motor Home Manufacturing, which has a size standard of 1,250 employees or fewer.

[20] 49 CFR 555.9(c)(2) refers to § 567.5(c)(7)(iii) as the regulation setting forth the certification statement final-stage manufacturers are to use in their certification labels. That reference to § 567.5(c)(7)(iii) is outdated; it should be to § 567.5(d)(2)(v)(A). The certification label requirements for final-stage manufacturers formerly were in § 567(c)(7)(iii) but the requirements were moved to § 567.5(d)(2)(v)(A) (*see,* 70 FR 7433; February 14, 2005).

Authority: 49 U.S.C. 30113; delegation of authority at 49 CFR 1.95.

Issued on: November 5, 2019.

James Clayton Owens,

Acting Administrator.

Prohibitions and Restrictions on Proprietary Trading and Certain Interests in, and Relationships With, Hedge Funds and Private Equity Funds

AGENCY: Office of the Comptroller of the Currency, Treasury (OCC); Board of Governors of the Federal Reserve System (Board); Federal Deposit Insurance Corporation (FDIC); Securities and Exchange Commission (SEC); and Commodity Futures Trading Commission (CFTC).

ACTION: Final rule.

SUMMARY: The OCC, Board, FDIC, SEC, and CFTC are adopting amendments to the regulations implementing section 13 of the Bank Holding Company Act. Section 13 contains certain restrictions on the ability of a banking entity and nonbank financial company supervised by the Board to engage in proprietary trading and have certain interests in, or relationships with, a hedge fund or private equity fund. These final amendments are intended to provide banking entities with clarity about what activities are prohibited and to improve supervision and implementation of section 13.

DATES:

Effective date: The effective date for amendatory instructions 1 through 14 (OCC), 16 through 29 (Board), 31 through 44 (FDIC), and 46 through 58 (CFTC) is January 1, 2020; the effective date for amendatory instructions 60 through 73 (SEC) is January 13, 2020; and the effective date for the addition of appendices Z at amendatory instructions 15 (OCC), 30 (Board), and 45 (FDIC) is January 1, 2020, through December 31, 2020, except for amendatory instruction 74 (SEC), which is effective January 13, 2020, through December 31, 2020.

Compliance date: Banking entities must comply with the final amendments by January 1, 2021. Until the compliance date, banking entities must continue to comply with the 2013 rule (as set forth in appendices Z to 12 CFR parts 44, 248, and 351 and 17 CFR parts 75 and 255). Alternatively, a banking entity may voluntarily comply, in whole or in part, with the amendments adopted in this release prior to the compliance date, subject to the agencies' completion of necessary technological changes.

I. Background

Section 13 of the Bank Holding Company Act of 1956 (BHC Act),[1] also known as the Volcker Rule, generally prohibits any banking entity from engaging in proprietary trading or from

[1] 12 U.S.C. 1851.

acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with a hedge fund or private equity fund (covered fund).[2] The statute expressly exempts from these prohibitions various activities, including among other things:

- Trading in U.S. government, agency, and municipal obligations;
- Underwriting and market making-related activities;
- Risk-mitigating hedging activities;
- Trading on behalf of customers;
- Trading for the general account of insurance companies; and
- Foreign trading by non-U.S. banking entities.[3]

In addition, section 13 of the BHC Act contains several exemptions that permit banking entities to engage in certain activities with respect to covered funds, subject to certain restrictions designed to ensure that banking entities do not rescue investors in those funds from loss, and do not guarantee nor expose themselves to significant losses due to investments in or other relationships with these funds.[4]

Authority under section 13 for developing and adopting regulations to implement the prohibitions and restrictions of section 13 of the BHC Act is shared among the Board, the FDIC, the OCC, the SEC, and the CFTC (individually, an agency, and collectively, the agencies).[5] The agencies issued a final rule implementing section 13 of the BHC Act in December 2013 (the 2013 rule), and those provisions became effective on April 1, 2014.[6]

Since the adoption of the 2013 rule, the agencies have gained several years of experience implementing the 2013 rule, and banking entities have had more than five years of becoming familiar and complying with the 2013 rule. The agencies have received various communications from the public and other sources since adoption of the 2013 rule and over the course of the 2013 rule's implementation. Staffs of the agencies also have held numerous meetings with banking entities and other market participants to discuss the 2013 rule and its implementation. In addition, the data collected in connection with the 2013 rule, compliance efforts by banking entities, and the agencies' experiences in reviewing trading, investment, and other activity under the 2013 rule have provided valuable insights into the effectiveness of the 2013 rule. Together, these experiences have highlighted areas in which the 2013 rule may have resulted in ambiguity, overbroad application, or unduly complex compliance routines or may otherwise not have been as effective or efficient in achieving its purpose as intended or expected.

II. Notice of Proposed Rulemaking

Based on their experience implementing the 2013 rule, the agencies published a notice of proposed rulemaking (the proposed rule or proposal) on July 17, 2018, that proposed amendments to the 2013 rule. These amendments sought to provide greater clarity and certainty about what activities are prohibited under the 2013 rule and to improve the effective allocation of compliance resources where possible.[7]

The agencies sought to address a number of targeted areas for revision in the proposal. First, the agencies proposed further tailoring to make the scale of compliance activity required by the 2013 rule commensurate with a banking entity's size and level of trading activity. In particular, the agencies proposed to establish three categories of banking entities based on the firms' level of trading activity—those with significant trading assets and liabilities, those with moderate trading assets and liabilities, and those with limited trading assets and liabilities.[8] The agencies also invited comments on whether certain definitions, including ''banking entity'' [9] and ''trading desk,'' [10] and ''covered fund'' [11] should be modified.

The agencies also proposed making several changes to subpart B of the 2013 rule, which implements the statutory prohibition on proprietary trading and the various statutory exemptions to this prohibition. The agencies proposed revisions to the trading account definition,[12] including replacing the short-term intent prong of the trading account definition in the 2013 rule with a new prong based on the accounting treatment of a position (the accounting prong) and, with respect to trading activity subject only to the accounting prong, establishing a presumption of compliance with the prohibition on proprietary trading, based on the absolute value of a trading desk's profit and loss.[13] Under the proposed accounting prong, the trading account would have encompassed financial instruments recorded at fair value on a recurring basis under applicable accounting standards.

In addition, the proposal would have modified several of the exemptions and exclusions from the prohibition on proprietary trading in subpart B to clarify how banking entities may qualify for those exemptions and exclusions, as well as to reduce associated compliance burdens. For example, the agencies proposed revising the 2013 rule's exemptions for underwriting and market making-related activities,[14] the exemption for risk-mitigating hedging activities,[15] the exemption for trading by a foreign banking entity that occurs solely outside of the United States,[16] and the liquidity management exclusion.[17] In addition, the agencies proposed establishing an exclusion for transactions to correct trading errors.[18]

The agencies also proposed certain modifications to the prohibitions in subpart C on banking entities directly or indirectly acquiring or retaining an ownership interest in, or having certain relationships with, a covered fund. For example, the proposed rule would have modified provisions related to the underwriting or market making of ownership interests in covered funds [19] and the exemption for certain permitted covered fund activities and investments outside of the United States. The proposal also would have expanded a banking entity's ability to engage in hedging activities involving an ownership interest in a covered fund.[20] In addition, the agencies requested comment regarding tailoring the definition of ''covered fund,'' including potential additional exclusions,[21] and revising the provisions limiting banking entities' relationships with covered funds.[22]

To enhance compliance efficiencies, the agencies proposed tailoring the

compliance requirements based on new compliance tiers. The proposed rule would have applied the six-pillar compliance program, and a CEO attestation requirement largely consistent with the 2013 rule, to firms with significant trading assets and liabilities and eliminated the enhanced minimum standards for compliance programs in Appendix B of the 2013 rule.[23] Firms with moderate trading assets and liabilities would have been required to adhere to a simplified compliance program, with a CEO attestation requirement,[24] and firms with limited trading assets and liabilities would have had a presumption of compliance with the rule.[25] The proposal also included a reservation of authority specifying that the agencies could impose additional requirements on banking entities with limited or moderate trading assets and liabilities if warranted.[26] The proposal would have revised the metrics reporting and recordkeeping requirements by, for example, applying those requirements based on a banking entity's size and level of trading activity, eliminating some metrics, and adding a limited set of new metrics to enhance compliance efficiencies.[27] In addition, the agencies requested comment on whether some or all of the reported quantitative measurements should be made publically available.

The agencies invited comment on all aspects of the proposal, including specific proposed revisions and questions posed by the agencies. The agencies received over 75 unique comments from banking entities and industry groups, public interest groups, and other organizations and individuals. In addition, the agencies received approximately 3,700 comments from individuals using a version of a short form letter to express opposition to the proposed rule. For the reasons discussed below, the agencies are now adopting a final rule that incorporates a number of modifications.

III. Overview of the Final Rule and Modifications From the Proposal

A. The Final Rule

Similar to the proposal, the final rule includes a risk-based approach to revising the 2013 rule that relies on a set of clearly articulated standards for both prohibited and permitted activities and investments. The final rule is intended to further tailor and simplify the rule to allow banking entities to more efficiently provide financial services in a manner that is consistent with the requirements of section 13 of the BHC Act.

The comments the agencies received from banking entities and financial services industry trade groups were generally supportive of the proposal, with the exception of the proposed accounting prong, and provided recommendations for further targeted changes. The agencies also received a few comments in opposition to the proposal from various organizations and individuals.[28] As described further below, the agencies have adopted many of the proposed changes to the 2013 rule, with certain targeted adjustments based on comments received. Furthermore, the agencies intend to issue an additional notice of proposed rulemaking that would propose additional, specific changes to the restrictions on covered fund investments and activities and other issues related to the treatment of investment funds under the regulations implementing section 13 of the BHC Act.

The final rule includes the same general three-tiered approach to tailoring the compliance program requirements as the proposal. However, based on comments received, the agencies have modified the threshold for banking entities in the ''significant'' compliance category from $10 billion in gross trading assets and liabilities to $20 billion in gross trading assets and liabilities. The final rule also includes modifications to the calculation of trading assets and liabilities for purposes of determining which compliance tier a banking entity falls into by excluding certain financial instruments that banking entities are permitted to trade without limit under section 13. Additionally, the final rule aligns the methodologies for calculating the ''limited'' and ''significant'' compliance thresholds for foreign banking organizations by basing both thresholds on the trading assets and liabilities of the firm's U.S. operations.[29]

The final rule also includes many of the proposed changes to the proprietary trading restrictions, with certain changes based on comments received. One such change is that the final rule does not include the proposed accounting prong in the trading account definition. Instead, the final rule retains a modified version of the short-term intent prong and replaces the 2013 rule's rebuttable presumption that financial instruments held for fewer than 60 days are within the short-term intent prong of the trading account with a rebuttable presumption that financial instruments held for 60 days or longer are not within the short-term intent prong of the trading account. The final rule also provides that a banking entity that is subject to the market risk capital rule prong of the trading account definition is not also subject to the short-term intent prong, and a banking entity that is not subject to the market risk capital rule prong may elect to apply the market risk capital rule prong (as an alternative to the short-term intent prong). Additionally, the final rule modifies the liquidity management exclusion from the proprietary trading restrictions to permit banking entities to use a broader range of financial instruments to manage liquidity, and it adds new exclusions for error trades, certain customer-driven swaps, hedges of mortgage servicing rights, and purchases or sales of instruments that do not meet the definition of trading assets or liabilities. Furthermore, the final rule revises the trading desk definition to provide more flexibility to banking entities to align the definition with other trading desk definitions in existing or planned compliance programs. This modified definition also will provide for consistent treatment across different regulatory regimes.

The final rule also includes the proposed changes to the exemptions from the prohibitions in section 13 of the BHC Act for underwriting and market making-related activities, risk-mitigating hedging, and trading by foreign banking entities solely outside the United States. The final rule also includes the proposed changes to the covered funds provisions for which specific rule text was proposed, including with respect to permitted underwriting and market making and risk-mitigating hedging with respect to a covered fund, as well as investment in or sponsorship of covered funds by foreign banking entities solely outside the United States and the exemption for prime brokerage transactions. With respect to the exemptions for underwriting and market making-related activities, the final rule adopts the presumption of compliance with the

[23] *See* 83 FR 33487–89; 33490–94.

[24] *See* 83 FR 33489.

[25] *See* 83 FR 33490.

[26] *See* 83 FR 33454.

[27] *See* 83 FR 33494–514.

[28] *See, e.g.,* Senators Merkley et al.; Elise J. Bean (Bean); National Association of Federally-Insured Credit Unions (NAFCU); Better Markets, Inc. (Better Markets); Americans for Financial Reform (AFR); Volcker Alliance; Occupy the SEC; and Volcker 2.0 Form Letter.

[29] Under the proposal, the ''limited'' compliance threshold would have been based on the trading assets and liabilities of a foreign banking organization's worldwide operations whereas the ''significant'' compliance threshold would have been based on the trading assets and liabilities of a foreign banking organization's U.S. operations.

reasonably expected near-term demand requirement for trading within certain internal limits, but instead of requiring banking entities to promptly report limit breaches or increases to the agencies, banking entities are required to maintain and make available upon request records of any such breaches or increases and follow certain internal escalation and approval procedures in order to remain qualified for the presumption of compliance.

With respect to the compliance program requirements, the final rule includes the changes from the proposal to eliminate the enhanced compliance requirements in Appendix B of the 2013 rule and to tailor the compliance program requirements based on the size of the banking entity's trading activity. However, different from the proposal, the final rule only applies the CEO attestation requirement to firms with significant trading assets and liabilities. Also, in response to comments, the final rule includes modifications to the metrics collection requirements to, among other things, eliminate certain metrics and reduce the compliance burden associated with the requirement.

For the OCC, Board, FDIC, and CFTC, the final amendments will be effective on January 1, 2020. For the SEC, the final amendments will be effective on January 13, 2020. In order to give banking entities a sufficient amount of time to comply with the changes adopted, banking entities will not be required to comply with the final amendments until January 1, 2021. During that time, the 2013 rule will remain in effect as codified in appendix Z, which is a temporary appendix that will expire on the compliance date. However, banking entities may voluntarily comply, in whole or in part, with the amendments adopted in this release prior to the compliance date, subject to the agencies' completion of necessary technical changes. In particular, the agencies need to complete certain technological programming in order to accept metrics compliant with the final amendments. The agencies will conduct a test run with banking entities of the revised metrics submission format. A banking entity seeking to switch to the revised metrics prior to January 1, 2021, must first successfully test submission of the revised metrics in the new XML format. Accordingly, banking entities should work with each appropriate agency to determine how and when to voluntarily comply with the metrics requirements under the final rules and to notify such agencies of their intent to comply, prior to the January 1, 2021, compliance date.

B. Interagency Coordination and Other Comments

Section 13(b)(2)(B)(ii) of the BHC Act directs the agencies to ''consult and coordinate'' in developing and issuing the implementing regulations ''for the purpose of assuring, to the extent possible, that such regulations are comparable and provide for consistent application and implementation of the applicable provisions of [section 13 of the BHC Act] to avoid providing advantages or imposing disadvantages to the companies affected . . . .'' [30] The agencies recognize that coordinating with each other to the greatest extent practicable with respect to regulatory interpretations, examinations, supervision, and sharing of information is important to maintaining consistent oversight, promoting compliance with section 13 of the BHC Act and implementing regulations, and to fostering a level playing field for affected market participants. The agencies further recognize that coordinating these activities helps to avoid unnecessary duplication of oversight, reduces costs for banking entities, and provides for more efficient regulation.

In the proposal, the agencies requested comment on interagency coordination regarding the Volcker Rule in general and asked several specific questions relating to transparency, efficiency, and safety and soundness.[31] Numerous commenters, including banking entities and industry groups, suggested that the agencies more effectively coordinate Volcker Rule related supervision, examinations, and enforcement, in order to improve efficiency and predictability in supervision and oversight.[32] For example, several commenters suggested that Volcker Rule related supervision should be conducted solely by a bank's prudential onsite examiner,[33] and that the two market regulators be required to consult and coordinate with the prudential onsite examiner.[34] Several commenters encouraged the agencies to memorialize coordination and information sharing between the agencies by entering into a formal written agreement, such as an interagency Memorandum of Understanding.[35]

Several comment letters from public interest organizations suggested that the agencies have not provided sufficient transparency when implementing and enforcing the Volcker Rule, and urged the agencies to make public certain information related to enforcement actions, metrics, and covered funds activities.[36] In addition, several commenters, including a member of Congress, argued that the agencies have not adequately explained or provided evidence to support the current rulemaking.[37]

The agencies agree with commenters that interagency coordination plays an important role in the effective implementation and enforcement of the Volcker Rule, and acknowledge the benefits of providing transparency in proposing and adopting rules to implement section 13 of the BHC Act. Accordingly, the agencies have endeavored to provide specificity and clarity in the final rule to avoid conflicting interpretations or uncertainty. The final rule also includes notice and response procedures that provide a greater degree of certainty about the process by which the agencies will make certain determinations under the final rule. The agencies continue to recognize the benefits of consistent application of the rules implementing section 13 of the BHC Act and intend to continue to consult with each other when formulating guidance on the final rule that would be shared with the public generally. That said, the agencies also are mindful of the need to strike an appropriate balance between public disclosure and the protection of sensitive, confidential information, and the agencies are generally restricted from disclosing sensitive, confidential business and supervisory information on a firm-specific basis.

Several commenters provided general comments regarding the proposal and the current rulemaking. For example, several public interest commenters suggested that the proposed rule did not provide a sufficient financial disincentive against proprietary trading and encouraged the agencies to adopt certain limitations on compensation arrangements.[38] A commenter also suggested possible penalties for rule violations and encouraged the agencies to elaborate on the consequences of

significant violations of the rule.[39] Other commenters recommended that the agencies impose strong penalties on banking entities that break the law.[40] The agencies believe that the appropriate consequences for a violation of the rule will likely depend on the specific facts and circumstances in individual cases, as well as each agency's statutory authority under section 13, and therefore are not amending the rule to provide for specific penalties or financial disincentives for violations. Finally, several commenters suggested that the proposed rule is too complex and may provide too much deference to a banking entity's internal procedures and models (for example, in provisions related to underwriting, market making, and hedging), and that the proposed revisions would make the rule less effective.[41] As discussed further below, the agencies believe that the particular changes adopted in the final rule are meaningfully simpler and streamlined compared to the 2013 rule, and are appropriate for the reasons described in greater detail below.

IV. Section by Section Summary of the Final Rule

A. Subpart A—Authority and Definitions

1. Section ____.2: Definitions

a. Banking Entity

Section 13(a)(1)(A) of the BHC Act prohibits a banking entity from engaging in proprietary trading or acquiring or retaining an ownership interest, or sponsoring, a covered fund, unless the activity is otherwise permissible under section 13.[42] Therefore, the definition of the term ''banking entity'' defines the scope of entities subject to restrictions under the rule. Section 13(h)(1) of the BHC Act defines the term ''banking entity'' to include (i) any insured depository institution (as defined by statute); (ii) any company that controls an insured depository institution; (iii) any company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978; and (iv) any affiliate or subsidiary of any such entity.[43] The regulations implementing this provision are consistent with the statute and also exclude covered funds that are not themselves banking entities, certain portfolio companies, and the FDIC acting in its corporate capacity as conservator or receiver.[44]

In addition, the agencies note that, consistent with the statute, for purposes of this definition, the term ''insured depository institution'' does not include certain institutions that function solely in a trust or fiduciary capacity, and certain community banks and their affiliates.[45] Section 203 of the Economic Growth, Regulatory Relief, and Consumer Protection Act (EGRRCPA) amended the definition of ''banking entity'' in the Volcker Rule to exclude certain community banks from the definition of insured depository institution, the general result of which was to exclude community banks and their affiliates and subsidiaries from the scope of the Volcker Rule.[46] On July 22, 2019, the agencies adopted a final rule amending the definition of ''insured depository institution,'' in a manner consistent with EGRRCPA.[47]

The proposed rule did not propose specific rule text to amend the definition of ''banking entity,'' but invited comment on a number of specific issues.[48] The agencies received several comments about the ''banking entity'' definition, many of which asked that the agencies revise this definition to exclude specific types of entities.

Several commenters expressed concern about the treatment of certain funds that are excluded from the definition of ''covered fund'' in the 2013 rule, including registered investment companies (RICs), foreign public funds (FPFs), and, with respect to a foreign banking entity, certain foreign funds offered and sold outside of the United States (foreign excluded funds).[49] In particular, these commenters noted that when a banking entity invests in such funds, or has certain corporate governance rights or other control rights with respect to such funds, the funds could meet the definition of ''banking entity'' for purposes of the Volcker Rule.[50] Concerns about certain funds' potential status as banking entities arise, in part, because of the interaction between the statute's and the 2013 rule's definitions of the terms ''banking entity'' and ''covered fund.'' Sponsors of RICs, FPFs, and foreign excluded funds have noted that the treatment of such funds as ''banking entities'' would disrupt bona fide asset management activities (including fund investment strategies that may include proprietary trading or investing in covered funds), which these sponsors argued would be inconsistent with section 13 of the BHC Act.[51] Commenters also noted that treatment of RICs, FPFs, and foreign excluded funds as ''banking entities'' would put such banking entity-affiliated funds at a competitive disadvantage compared to funds not affiliated with a banking entity, and therefore not subject to restrictions under section 13 of the BHC Act.[52] In general, commenters also asserted that the treatment of RICs, FPFs, and foreign excluded funds as banking entities would not further the policy objectives of section 13 of the BHC Act.[53]

Several commenters suggested that the agencies exclude from the definition of ''banking entity'' foreign excluded funds.[54] These commenters generally noted that failing to exclude such funds from the definition of ''banking entity'' in the 2013 rule has the unintended consequence of imposing proprietary trading restrictions and compliance obligations on foreign excluded funds that are in some ways more burdensome than the requirements that would apply under the 2013 rule to covered funds. Another commenter expressed opposition to carving out foreign excluded funds from the definition of banking entity.[55] The staffs of the agencies continue to consider ways in which the regulations may be amended in a manner consistent with the statutory definition of ''banking entity,'' or other appropriate actions that may be taken, to address any unintended consequences of section 13 of the BHC Act and the 2013 rule. The agencies intend to issue a separate proposed

rulemaking that specifically addresses the fund structures under the rule, including the treatment of foreign excluded funds.

To provide additional time to complete this rulemaking, the Federal banking agencies released a policy statement on July 17, 2019, in response to concerns about the treatment of foreign excluded funds. This policy statement provides that the Federal banking agencies would not propose to take action during the two-year period ending on July 21, 2021, against a foreign banking entity based on attribution of the activities and investments of a qualifying foreign excluded fund to the foreign banking entity,[56] or against a qualifying foreign excluded fund as a banking entity, in each case where the foreign banking entity's acquisition or retention of any ownership interest in, or sponsorship of, the qualifying foreign excluded fund would meet the requirements for permitted covered fund activities and investments solely outside the United States, as provided in section 13(d)(1)(I) of the BHC Act and § ____.13(b) of the 2013 rule, as if the qualifying foreign excluded fund were a covered fund.[57]

Several commenters expressed concern with the treatment of RICs and FPFs, which are subject to significant regulatory requirements in the United States and foreign jurisdictions, respectively. These commenters encouraged the agencies to consider excluding such entities from the definition of ''banking entity.''[58] In the past, the staffs of the agencies issued several FAQs to address the treatment of RICs and FPFs.[59] One of these staff FAQs provides guidance about the treatment of RICs and FPFs during the period in which the banking entity is testing the fund's investment strategy, establishing a track record of the fund's performance for marketing purposes, and attempting to distribute the fund's shares (the so-called seeding period).[60] Another FAQ stated that staffs of the agencies would not view the activities and investments of an FPF that meets certain eligibility requirements in the 2013 rule as being attributed to the banking entity for purposes of section 13 of the BHC Act or the 2013 rule, where the banking entity (i) does not own, control, or hold with the power to vote 25 percent or more of any class of voting shares of the FPF (after the seeding period), and (ii) provides investment advisory, commodity trading advisory, administrative, and other services to the fund in compliance with applicable limitations in the relevant foreign jurisdiction. Similarly, this FAQ stated that the staffs of the agencies would not view the FPF to be a banking entity for purposes of section 13 of the BHC Act and the 2013 rule solely by virtue of its relationship with the sponsoring banking entity, where these same conditions are met.[61]

As noted above, the agencies intend to issue a separate proposal addressing and requesting comment on the covered fund provisions and other fund-related issues. The final rule does not modify or revoke any previously issued staff FAQs or guidance related to RICs, FPFs, and foreign excluded funds.[62]

Apart from these topics, the agencies received numerous other comments about the treatment of entities as ''banking entities'' under section 13 of the BHC Act. In general, these commenters requested that the agencies provide additional exclusions from the definition of ''banking entity'' for various types of entities. One commenter suggested that, as an alternative to excluding certain entities from the banking entity definition, the agencies could exempt the activities of these entities from the proprietary trading and covered fund prohibitions.[63]

One commenter recommended that the agencies provide a general exemption from the banking entity definition for investment funds, except in circumstances where the investment fund is determined to have been organized to permit the banking entity sponsor to engage in impermissible proprietary trading.[64] Some commenters encouraged the agencies to exclude employee securities companies from the definition of ''banking entity.''[65] One commenter argued that despite a banking entity's role as a general partner in employee securities companies, treating such entities as ''banking entities'' does not further the policy goals of section 13 of the BHC Act.[66] Several commenters encouraged the agencies to exclude from the definition of ''banking entity'' any non-consolidated subsidiaries not operated or managed by a banking entity, on the basis that such entities were never intended to be subject to section 13 of the BHC Act.[67] Another commenter said the agencies should exclude from the definition of ''banking entity'' all employee compensation plans, regardless of whether such plans are qualified or non-qualified.[68] Other commenters suggested that the agencies should exclude subsidiaries of foreign banking entities that do not engage in trading activities in the United States, or otherwise limit application to foreign subsidiaries of foreign banking groups.[69] Other commenters requested modification of the definition of ''banking entity'' to exclude parent companies and affiliates of industrial loan companies, noting that such companies are generally not subject to other restrictions on their activities under the BHC Act.[70]

One commenter encouraged the agencies to exclude international banks from the definition of ''banking entity'' if they have limited U.S. trading assets and liabilities.[71] This commenter also

[56] Foreign banking entity was defined for purposes of the policy statement to mean a banking entity that is not, and is not controlled directly or indirectly by, a banking entity that is located in or organized under the laws of the United States or any State.

Continued

encouraged the agencies to exclude certain non-U.S. commercial companies that are comparable to U.S. merchant banking portfolio companies.[72] This commenter argued that excluding these entities would not pose material risks to the financial stability of the United States.

Some commenters suggested that the agencies should clarify the standards for what constitutes ''control'' in the context of determining whether an entity is an ''affiliate'' or ''subsidiary'' for purposes of the definition of ''banking entity'' in the Volcker Rule.[73] One commenter suggested that the definition of ''banking entity'' should include only a company in which a banking entity owns, controls, or has the power to vote 25 percent or more of a class of voting securities of the company.[74]

The definition of ''banking entity'' in section 13 of the BHC Act uses the definition of control in section 2 of the BHC Act.[75] Under the BHC Act, ''control'' is defined by a three-pronged test. A company has control over another company if the first company (i) directly or indirectly or acting through one or more other persons owns, controls, or has power to vote 25 percent or more of any class of voting securities of the other company; (ii) controls in any manner the election of a majority of the directors of the other company; or (iii) directly or indirectly exercises a controlling influence over the management or policies of the other company.[76] The Board recently issued a proposed rulemaking that would clarify the standards for evaluating whether one company exercises a controlling influence over another company for purposes of the BHC Act.[77]

The final rule does not amend the definition of banking entity. Commenters raised important considerations with respect to the consequences of the current ''banking entity'' definition under section 13 of the BHC Act and the 2013 rule. The agencies believe that other amendments to the requirements of the regulations implementing the Volcker Rule may address some of the issues raised by commenters. Certain concerns raised by commenters may need to be addressed through amendments to section 13 of the BHC Act.[78] In addition, as noted above, the agencies intend to revisit the fund-related provisions of the Volcker Rule in a separate rulemaking.

b. Limited, Moderate, and Significant Trading Assets and Liabilities

The proposal would have established three categories of banking entities based on their level of trading activity, as measured by the average gross trading assets and liabilities of the banking entity and its subsidiaries and affiliates (excluding obligations of or guaranteed by the United States or any agency of the United States) over the previous four consecutive quarters.[79] These categories would have been used to calibrate compliance requirements for banking entities, with the most stringent compliance requirements applicable to those with the greatest level of trading activities.

The first category would have included firms with ''significant'' trading assets and liabilities, defined as those banking entities that have consolidated trading assets and liabilities equal to or exceeding $10 billion.[80] The second category would have included firms with ''moderate'' trading assets and liabilities, which would have included those banking entities that have consolidated trading assets and liabilities of $1 billion or more, but with less than $10 billion in consolidated trading assets and liabilities.[81] The final category would have included firms with ''limited'' trading assets and liabilities, defined as those banking entities that have less than $1 billion in consolidated trading assets and liabilities.[82] The proposal would have also provided the agencies with a reservation of authority to require a banking entity with limited or moderate trading assets and liabilities to apply the compliance program requirements of a higher compliance tier if an agency determined that the size or complexity of the banking entity's trading or investment activities, or the risk of evasion of the requirements of the rule, warranted such treatment.[83] The proposal also solicited comment as to whether there should be further tailoring of the thresholds for a banking entity that is an affiliate of another banking entity with significant trading assets and liabilities, if that entity generally operates on a basis that is separate and independent from its affiliates and parent companies.[84]

Commenters provided feedback on multiple aspects of the tiered compliance framework, including the level of the proposed thresholds between the categories ($1 billion and $10 billion in trading assets and liabilities), the manner in which ''trading assets and liabilities'' should be measured, and alternative approaches that commenters believed would be preferable to the proposed three-tiered compliance framework. As described further below, after consideration of the comments received, the agencies are adopting a three-tiered compliance framework that is consistent with the proposal, with targeted adjustments to further tailor compliance program requirements based on the level of a firm's trading activities, and in light of concerns raised by commenters.[85] The agencies believe that this approach will increase compliance efficiencies for all banking entities relative to the 2013 rule and the proposal, and will further reduce compliance costs for firms that have little or no activity subject to the prohibitions and restrictions of section 13 of the BHC Act.

Several commenters expressed support for the proposed three-tiered compliance framework in the proposal.[86] One commenter noted that the 2013 rule's compliance regime, which imposes significant compliance obligations on all banking entities with $50 billion or more in total consolidated assets, does not appropriately tailor compliance obligations to the scope of activities covered under the regulation, particularly for firms engaged in limited trading activities.[87] Other commenters expressed general opposition to the proposed three-tiered compliance program.[88] Another commenter expressed concern in particular that banking entities with ''limited'' trading assets and liabilities would have been presumed compliant with the requirements of section 13 of the BHC

status is determined by disaggregating separate, independent corporate groups.

Act under the proposed rule.[89] Some commenters also suggested that the agencies adopt a two-tiered compliance program, bifurcating banking entities into those with and without significant trading assets and liabilities.[90] One commenter expressed opposition to tailoring compliance requirements for banking entities that operate separately and independently from their affiliates, by calculating trading assets and liabilities for such entities independent of the activities of affiliates.[91] The agencies believe that the three-tiered framework set forth in the proposal, subject to the additional amendments described below, appropriately differentiates among banking entities for the purposes of tailoring compliance requirements. Specifically, the agencies believe that the significant differences in business models and activities among banking entities that would have significant trading assets and liabilities, moderate trading assets and liabilities, and limited trading assets and liabilities, as described below, support having a three-tiered compliance framework.

A few commenters recommended that the agencies raise the proposed $1 billion threshold between banking entities with limited and moderate trading assets and liabilities.[92] These commenters suggested that raising this threshold to $5 billion in trading assets and liabilities would be consistent with the objective of the proposal to have the most streamlined requirements imposed on banking entities with a relatively small amount of trading activities. Other commenters recommended that the threshold between banking entities with limited and moderate trading activities was appropriate or should be set at a lower level.[93] The agencies believe that the compliance obligations applicable to banking entities with limited trading assets and liabilities are most appropriately reserved for banking entities below the $1 billion threshold set forth in the proposal. Such banking entities tend to have simpler business models and do not have large trading operations that would warrant the expanded compliance obligations applicable to banking entities with moderate and significant trading assets and liabilities. As discussed further below, these banking entities also hold a relatively small amount of the trading assets and liabilities in the U.S. banking system. Therefore, the final rule adopts the threshold from the proposed rule for determining whether a banking entity has limited trading assets and liabilities.[94]

Several commenters recommended that the agencies modify the threshold for ''significant'' trading assets and liabilities.[95] Generally, these commenters expressed support for raising the threshold from $10 billion in trading assets and liabilities to $20 billion in trading assets and liabilities.[96] These commenters noted that this change would have minimal impact on the number of banking entities that would remain categorized as having significant trading assets and liabilities.[97] Several commenters also noted that increasing the threshold from $10 billion to $20 billion would provide additional certainty to banking entities that are near or approaching the $10 billion threshold, because market events or unusual customer demands could cause such banking entities to exceed (permanently or on a short-term basis) the $10 billion trading assets and liabilities threshold.[98] The final rule adopts the change recommended by several commenters to raise the threshold from $10 billion to $20 billion for calculating whether a banking entity has significant trading assets and liabilities.[99]

The agencies estimate that, under the final rule with the increased threshold from $10 billion to $20 billion described above, banking entities classified as having significant trading assets and liabilities would hold approximately 93 percent of the trading assets and liabilities in the U.S. banking system. The agencies also estimate that banking entities with significant trading assets and liabilities and those with moderate trading assets and liabilities in combination would hold approximately 99 percent of the trading assets and liabilities in the U.S. banking system. Therefore, both of these thresholds will tailor the compliance obligations under the final rule for all firms by virtue of imposing greater compliance obligations on those banking entities with the most substantial levels of trading activities.

One commenter suggested that the agencies index the compliance tier thresholds to inflation.[100] At present, the agencies do not believe that the additional complexity associated with inflation-indexing the thresholds in the final rule is necessary in light of the other changes to the thresholds and calculation methodologies described below, including the increase in the threshold for firms with significant trading assets and liabilities from $10 billion to $20 billion, and the modifications to the calculation of trading assets and liabilities adopted in the final rule.[101]

Commenters recommended that the regulations incorporate a number of changes to the methodology used in the proposed rule to classify firms into different compliance tiers. Some commenters recommended that the agencies apply a consistent methodology to foreign banking entities to classify such firms as having significant trading assets and liabilities, moderate trading assets and liabilities, or limited trading assets and liabilities.[102] For purposes of classifying the banking entity as having significant trading assets and liabilities, the proposal would have included only the trading assets and liabilities of the combined U.S. operations of a foreign banking entity, but used the banking entity's worldwide trading assets and liabilities for purposes of classifying the firm as having either limited trading assets and liabilities or moderate trading assets and liabilities.[103] Commenters recommended that the agencies apply a consistent standard for classifying a foreign banking entity as having significant trading assets and liabilities, moderate trading assets and liabilities, or limited trading assets and liabilities, and that the most appropriate measure would look only at the combined U.S. operations of such a banking entity.[104] These commenters noted that classifying foreign banking entities based on their global trading activities could have the result of imposing extensive compliance obligations on the non-U.S. trading activities of a banking entity with minimal U.S. trading activities.[105]

The final rule adopts a consistent methodology for calculating the trading assets and liabilities of foreign banking entities across all categories, taking into account only the trading assets and

[105] *Id.*

liabilities of such banking entities' combined U.S. operations.[106] The agencies believe this approach is appropriate, particularly for foreign firms with little or no U.S. trading activity but substantial worldwide trading operations. The agencies further believe that the trading activities of foreign banking entities that occur outside of the United States and are booked into such foreign banking entities (or into their foreign affiliates), pose substantially less risk to the U.S. financial system than trading activities booked into a U.S. banking entity, including a U.S. banking entity that is an affiliate of a foreign banking entity. This approach is also appropriate in light of provisions in section 13 of the BHC Act that provide foreign banking entities with significant flexibility to conduct trading and covered fund activities outside of the United States.[107]

One commenter expressed concern that the regulations did not give banking entities sufficient guidance as to how to calculate their trading assets and liabilities, and asked that the regulations expressly permit a banking entity to rely on home jurisdiction accounting standards when calculating trading assets and liabilities.[108] In light of the changes to the methodology for calculating trading assets and liabilities noted above, in particular using combined U.S. trading assets and liabilities for establishing the appropriate compliance tier for foreign banking entities, the agencies believe that further clarifications to the standards for calculating ''trading assets and liabilities'' are not necessary for banking entities to have sufficient information available as to the manner in which to calculate trading assets and liabilities.

A few commenters suggested that the threshold for ''significant trading assets and liabilities'' should be determined based on the relative size of the banking entity's total trading assets and liabilities as compared to other metrics, such as total consolidated assets or capital, thereby establishing a banking entity's compliance requirements based on the significance of trading activities to the banking entity.[109] Some commenters suggested that the use of trading assets and liabilities alone as a metric to classify banking entities for determining compliance obligations was inappropriate.[110] The agencies believe that a banking entity's trading assets and liabilities, as calculated under the methodology described in the final rule, is an appropriate metric to use in establishing compliance requirements for banking entities. Imposing compliance obligations on a banking entity based on the relative significance of trading activities to the firm could have the result of imposing fewer compliance obligations on a larger banking entity with identical trading activities to a smaller counterpart, simply because of that entity's larger size.

Several commenters recommended that the regulations exclude particular types of trading assets and liabilities for purposes of determining whether a banking entity has significant trading assets and liabilities, moderate trading assets and liabilities, or limited trading assets and liabilities. In particular, some commenters encouraged the agencies to exclude all government obligations and other assets and liabilities that are not subject to the prohibition on proprietary trading under section 13 of the BHC Act and the regulations.[111] The final rule modifies the methodology for calculating a firm's trading assets and liabilities to exclude all financial instruments that are obligations of, or guaranteed by, the United States, or that are obligations, participations, or other instruments of or guaranteed by an agency of the United States or a government-sponsored enterprise as described in the regulations.[112] As commenters noted, banking entities are permitted to engage in trading activities in these products under section 13 of the BHC Act and the implementing regulations, and therefore the exclusion of such instruments for the final rule will result in a more appropriately tailored standard than under the proposal. The agencies also believe that the calculation of trading assets and liabilities, subject to these modifications, should continue to be relatively simple for banking entities and the agencies, without requiring the imposition of additional reporting requirements.

A few commenters recommended that certain *de minimis* risk portfolios, such as matched derivatives holdings and loan-related swaps, be excluded from the calculation of trading assets and liabilities.[113] Another commenter recommended the calculation of trading assets and liabilities should exclude insurance assets.[114] Another commenter proposed that the trading assets and liabilities of non-consolidated affiliates be excluded, because tracking the trading assets and liabilities of such subsidiaries on an ongoing basis may present significant practical burdens.[115] As discussed herein, the final rule makes several amendments to the methodology for calculating trading assets and liabilities, for example by excluding securities issued or guaranteed by certain government-sponsored enterprises, and by calculating trading assets and liabilities for foreign banking entities based only on the combined U.S. operations of such banking entities.[116] The agencies believe that the revisions in the final rule should simplify the manner in which a banking entity calculates its trading assets and liabilities. However, the final rule does not adopt the changes recommended by a few commenters to exclude trading assets and liabilities associated with particular business activities or business lines, other than the express modifications noted above, or to exclude the trading assets and liabilities of certain types of subsidiaries. Rather, the final rule adopts an approach that is intended to be straightforward and consistent and allow banking entities greater ability to leverage regulatory reports that banking entities are already required to prepare under existing law, such as the Form Y9–C and the Call Report.[117]

Some commenters noted that the regulations should clarify the manner in which a banking entity should calculate trading assets and liabilities, and make clear whether it would be appropriate to rely on regulatory reporting forms such as the Board's Consolidated Financial Statements for Holding Companies, Form FR Y–9C or call report information, or other regulatory reporting forms.[118] Other commenters recommended that the agencies clarify whether the calculation of ''trading assets and liabilities'' should include only positions that would be within the scope of the ''trading account'' definition, or should otherwise exclude

[117] Compliance obligations are determined on a consolidated basis under the final rule. For that reason, where a banking entity has an unconsolidated subsidiary, the banking entity would not need to examine additional financial reports to determine its compliance obligations.

[118] *See, e.g.,* Bank of Oklahoma; KeyCorp; BPI; and Capital One et al Banks.

certain types of instruments.[119] The agencies support banking entities relying on current regulatory reporting forms to the extent possible to determine their compliance obligations under the final rule. As discussed above, the calculation of significant trading assets and liabilities, moderate trading assets and liabilities, and limited trading assets and liabilities is based on a four-quarter average, and therefore would not require daily or more frequent monitoring of trading assets and liabilities.[120]

A few commenters encouraged the agencies to include transition periods for a banking entity that moves to a higher compliance tier, to allow the banking entity time to comply with the different expectations under the compliance tier.[121] Some commenters said that the regulations should permit a banking entity to breach a threshold for a higher compliance category without needing to comply with the heightened compliance requirements applicable to banking entities with that level of trading assets and liabilities, provided the banking entity's trading assets and liabilities drop below the relevant threshold within a limited period of time.[122] The final rule does not adopt transition periods or cure periods as recommended by commenters. The calculation of a banking entity's trading assets and liabilities is calculated based on a 4-quarter average, which should provide banking entities with ample notice to come into compliance with the requirements of the final rule when crossing from having limited to moderate trading assets and liabilities, or from moderate to significant trading assets and liabilities.[123]

One commenter recommended that the agencies provide for notice and response procedures prior to exercising the reservation of authority to require a banking entity to apply the requirements of a higher compliance program tier, and, if a banking entity is determined to be required to apply increased compliance program requirements, it should be given a two-year conformance period to come into compliance with such requirements.[124] After considering this comment, the agencies believe that the notice and response procedures provided in the proposal for rebutting the presumption of compliance for banking entities with limited trading assets and liabilities would also be appropriate with respect to an agency exercising this reservation of authority. However, the agencies believe that providing an automatic two-year conformance period would be inappropriate, especially in instances where the agency has concerns regarding evasion of the requirements of the final rule. Therefore, the agencies are adopting the reservation of authority with a modification to require that the agencies exercise such authority in accordance with the notice and response procedures in section ____.20(i) of the final rule.[125] To the extent that an agency exercises this authority to require a banking entity to apply increased compliance program requirements, an appropriate conformance period shall be determined through the notice and response procedures.

B. Subpart B—Proprietary Trading Restrictions

Section 13(a)(1)(A) of the BHC Act prohibits a banking entity from engaging in proprietary trading unless otherwise permitted in section 13. Section 13(h)(4) of the BHC Act defines proprietary trading, in relevant part, as engaging as principal for the trading account of the banking entity in any transaction to purchase or sell, or otherwise acquire or dispose of, a security, derivative, contract of sale of a commodity for future delivery, or other financial instrument that the agencies include by rule. Section 13(h)(6) of the BHC Act defines ''trading account'' to mean any account used for acquiring or taking positions in the securities and instruments described in section 13(h)(4) principally for the purpose of selling in the near term (or otherwise with the intent to resell in order to profit from short-term price movements), and any such other accounts as the agencies, by rule determine.[126] Section 3 of the implementing regulations defines ''proprietary trading,'' ''trading account,'' and several related definitions.

1. Section ____.3: Prohibition on Proprietary Trading and Related Definitions

a. Trading Account

The 2013 rule's definition of trading account includes three prongs and a rebuttable presumption. The short-term intent prong includes within the definition of trading account the purchase or sale of one or more financial instruments principally for the purpose of (A) short-term resale, (B) benefitting from actual or expected short-term price movements, (C) realizing short-term arbitrage profits, or (D) hedging one or more positions resulting from the purchases or sales of financial instruments for the foregoing purposes.[127] Under the 2013 rule's rebuttable presumption, the purchase (or sale) of a financial instrument by a banking entity is presumed to be for the trading account under the short-term intent prong if the banking entity holds the financial instrument for fewer than sixty days or substantially transfers the risk of the financial instrument within sixty days of the purchase (or sale). A banking entity could rebut the presumption by demonstrating, based on all relevant facts and circumstances, that the banking entity did not purchase (or sell) the financial instrument principally for any of the purposes described in the short-term intent prong.[128]

The market risk capital rule prong (market risk capital prong) includes within the definition of trading account the purchase or sale of one or more financial instruments that are both covered positions and trading positions under the market risk capital rule (or hedges of other covered positions under the market risk capital rule), if the banking entity, or any affiliate of the banking entity, is an insured depository institution, bank holding company, or savings and loan holding company, and calculates risk-based capital ratios under the market risk capital rule.[129]

Finally, the dealer prong includes within the definition of trading account any purchase or sale of one or more financial instruments for any purpose if the banking entity (A) is licensed or registered, or is required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such; or (B) is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in

connection with the activities of such business.[130]

The proposal would have replaced the 2013 rule's short-term intent prong with a new third prong based on the accounting treatment of a position (the accounting prong). The proposal also would have added a presumption of compliance with the proposed rule's prohibition on proprietary trading for trading desks whose activities are not covered by the market risk capital prong or the dealer prong if the activities did not exceed a specified quantitative threshold. The proposal would have retained a modified version of the market risk capital prong and would have retained the dealer prong unchanged from the 2013 rule. As described in detail below, the final rule retains the three-pronged definition of trading account from the 2013 rule and does not adopt the proposed accounting prong or presumption of compliance with the proprietary trading prohibition. Rather, the final rule makes targeted changes to the definition of trading account.

Among other changes, the final rule eliminates the 2013 rule's rebuttable presumption and replaces it with a rebuttable presumption that financial instruments held for sixty days or more are not included in the trading account under the short-term intent prong.[131] The agencies believe that the market risk capital prong, which expressly includes certain short-term trading activities, is an appropriate interpretation of the statutory definition of trading account for all firms subject to the market risk capital rule.[132] Therefore, the final rule provides that banking entities that are subject to the market risk capital prong are not subject to the short-term intent prong.[133] However, the final rule provides that banking entities that are subject to the short-term intent prong may elect to apply the market risk capital prong instead of the short-term intent prong.[134] These changes are designed to simplify and tailor the trading account definition in a manner that is consistent with section 13 of the BHC Act and applicable safety and soundness standards.

i. Accounting Prong

The proposed accounting prong would have provided that ''trading account'' meant any account used by a banking entity to purchase or sell one or more financial instruments that is recorded at fair value on a recurring basis under applicable accounting standards.[135] Such instruments generally include, but are not limited to, derivatives, trading securities, and available-for-sale securities. The proposed inclusion of this prong in the definition of ''trading account'' was intended to provide greater certainty and clarity to banking entities than the short-term intent prong in the 2013 rule about which transactions would be included in the trading account, because banking entities could more readily determine which positions are recorded at fair value on their balance sheets.[136]

Many commenters strongly opposed replacing the short-term intent prong with the accounting prong.[137] These commenters asserted that the accounting prong could inappropriately scope in, among other things: Over $400 billion in available-for-sale debt securities;[138] certain long term investments;[139] static hedging of long term investments;[140] traditional asset-liability management activities;[141] derivative transactions entered into for any purpose and duration;[142] long-term holdings of commercial mortgage-backed securities;[143] seed capital investments;[144] investments that are expressly permitted under the covered fund provisions;[145] investments in connection with employee compensation;[146] bank holding company-permissible investments in enterprises engaging in activities that are part of the business of banking or incidental thereto, as well as other investments made pursuant to the BHC Act;[147] and financial holding company merchant banking investments.[148] Some commenters argued that the accounting prong was inconsistent with the statute;[149] would lead to increased regulatory burden and uncertainty;[150] could encourage banking entities not to elect to account for financial instruments at fair value, thereby reducing transparency into banking entities' financial reporting and frustrating risk management practices that are based on the fair value option;[151] could result in disparate treatment of the same activity between two banking entities where one banking entity elects the fair value option and the other does not;[152] would have a disproportionately negative impact on midsize and regional banks;[153] could negatively impact the securitization industry if liquidity for asset-backed securities is impeded;[154] could inappropriately scope in investment advisers' use of seed capital to develop products, services, or strategies for asset management clients;[155] could lead to increased burden for international banks by requiring them to apply both local accounting standards and U.S. generally accepted accounting principles (GAAP) to non-U.S. positions, one for regular accounting purposes and one specifically for assessing compliance with the regulations implementing section 13 of the BHC Act;[156] that the exclusions and exemptions from the prohibition on proprietary trading in the 2013 rule are ill-suited with respect to positions captured by the accounting prong;[157] and that fair valuation of

[130] *See* 2013 rule § ____.3(b)(1)(iii). An insured depository institution may be registered as a swap dealer, but only the swap dealing activities that require it to be so registered are covered by the dealer trading account. If an insured depository institution purchases or sells a financial instrument in connection with activities of the insured depository institution that do not trigger registration as a swap dealer, such as lending, deposit-taking, the hedging of business risks, or other end-user activity, the financial instrument is included in the trading account only if the instrument falls within the definition of trading account under at least one of the other prongs. *See* 79 FR at 5549.

assets and liabilities under applicable accounting standards is not indicative of short-term trading intent.[158]

Some commenters expressed a preference for the 2013 rule's short-term intent prong over the accounting prong.[159] Other commenters suggested revisions to the accounting prong if adopted, such as excluding from the definition of trading account any financial instrument for which financial institutions record the change in value in other comprehensive income; [160] expressly excluding available-for-sale portfolios from the accounting prong; [161] and clarifying that non-U.S. banking entities are permitted to use accounting standards adopted by individual banking entities other than International Financial Reporting Standards and GAAP.[162] One commenter expressed concern that a banking entity could circumvent the prohibition on proprietary trading by recording financial instruments at amortized cost instead of fair value.[163]

Some commenters supported adopting the accounting prong.[164] One commenter urged the agencies to retain the short-term intent prong and to adopt the accounting prong as an additional test without any presumption of compliance.[165] Another commenter argued that the accounting prong should be implemented as a new presumption within the short-term trading prong.[166] This commenter urged the agencies to revise the accounting prong by codifying language from the applicable accounting standards and coupling this with preamble language indicating that the agencies intend to interpret the accounting prong in a manner that is consistent with GAAP and international accounting codifications and guidance, thereby allowing the agencies to definitively interpret the text rather than accounting authorities, who might not consider the regulations implementing section 13 of the BHC Act when making further changes to accounting standards.[167]

After considering all comments received,[168] the agencies are not adopting the accounting prong in the final rule. The agencies agree with commenters' concerns that the accounting prong would have inappropriately scoped in many financial instruments and activities that section 13 of the BHC Act was not intended to capture, including some long-term investments. In addition, the accounting prong would have inappropriately scoped in entire categories of financial instruments, regardless of the banking entity's purpose for buying or selling the instrument, such as all derivatives and equity securities with a readily determinable fair value. Furthermore, the accounting prong would have captured certain seeding activity that would otherwise be permitted under subpart C of the regulations implementing section 13 of the BHC Act. As noted in the preamble to the proposed rule, the impetus behind replacing the short-term intent prong with the accounting prong was to address the uncertain application of the short-term intent prong to certain trades.[169] As discussed in detail below, the agencies have modified the short-term intent prong to provide more clarity. The agencies have also provided further clarity to the trading account definition in the final rule by adding additional exclusions from the ''proprietary trading'' definition. The agencies are adopting these clarifying measures as a more tailored approach to address the difficulties that have arisen under the existing short-term intent prong.

ii. Presumption of Compliance With the Prohibition on Proprietary Trading

Under the accounting prong, the proposal would have added a presumption of compliance with the proprietary trading prohibition based on an objective, quantitative measure of a trading desk's activities.[170] Under this proposed presumption of compliance, the activities of a trading desk of a banking entity that are not covered by the market risk capital prong or the dealer prong—*i.e.,* the activities that would be within the trading account under the proposed accounting prong—would have been presumed to comply with the proposed rule's prohibition on proprietary trading if the activities did not exceed a specified quantitative threshold. The trading desk would have remained subject to the prohibition on proprietary trading and, unless the desk engaged in a material level of trading activity (or the presumption of compliance was rebutted), the desk would not have been required to comply with the more extensive requirements that would otherwise apply under the proposal to demonstrate compliance. The agencies proposed to use the absolute value of the trading desk's profit and loss on a 90-calendar-day rolling basis as the relevant quantitative measure for this threshold.

Two commenters supported adopting the presumption of compliance with the prohibition on proprietary trading.[171] Several commenters opposed adopting this presumption of compliance.[172] Some of these commenters argued that the presumption of compliance could allow banks to evade the restrictions on proprietary trading by splitting trades over multiple trading desks.[173] One of these commenters suggested that the presumption of compliance for trading desk activities that would have been within the trading account under the accounting prong in the proposed rule could invite proprietary trading within the $25 million threshold.[174] Another commenter had several concerns with this proposal, including that not all businesses calculate daily profits and losses, and that even businesses that do not sell a single position within a 90-day period might exceed $25 million in unrealized gains and losses.[175] Two commenters asserted there is no statutory basis to permit a *de minimis* amount of proprietary trading.[176] Other commenters asserted that the presumption could increase regulatory burden.[177] Several commenters argued that, if the presumption is adopted, the threshold should be increased,[178] or the method of calculating profit and loss should be modified.[179] Many commenters stated that the proposed trading desk-level presumption of compliance did not adequately address the overbreadth of the accounting prong.[180]

After considering the comments, the agencies have decided not to adopt a trading desk-level presumption of compliance with the prohibition on

proprietary trading. As discussed in the preamble to the proposal, this presumption of compliance would have been available only for a trading desk's activities that would have been within the trading account under the proposed accounting prong, and not for a trading desk that is subject to the market risk capital prong or the dealer prong of the trading account definition. This presumption of compliance was intended to address the potential impact of the accounting prong, which the proposal recognized would have been a significant change from the 2013 rule. In particular, the proposal noted that the proposed trading desk-level presumption of compliance with the prohibition on proprietary trading was intended to allow banking entities to conduct ordinary banking activities without having to assess every individual trade for compliance with subpart B of the implementing regulations and the proposed accounting prong.[181] Since the agencies are not adopting the accounting prong and are adopting additional clarifying revisions to the short-term intent prong, the agencies have determined it is not necessary to adopt the presumption of compliance.

iii. Short-Term Intent Prong

The 2013 rule's short-term intent prong included within the definition of trading account the purchase or sale of one or more financial instruments principally for the purpose of (A) short-term resale, (B) benefitting from actual or expected short-term price movements, (C) realizing short-term arbitrage profits, or (D) hedging one or more positions resulting from the purchases or sales of financial instruments for the foregoing purposes.[182] Under the 2013 rule's rebuttable presumption, the purchase (or sale) of a financial instrument by a banking entity was presumed to be for the trading account under the short-term intent prong if the banking entity held the financial instrument for fewer than sixty days or substantially transferred the risk of the financial instrument within sixty days of the purchase (or sale). A banking entity could rebut the presumption by demonstrating, based on all relevant facts and circumstances, that the banking entity did not purchase (or sell) the financial instrument principally for any of the purposes described in the short-term intent prong.[183]

Several commenters stated that, for banking entities that are subject to the market risk capital prong, the short-term intent prong is redundant.[184] In addition, several commenters stated that the final rule should eliminate the short-term intent prong altogether, as proposed.[185] Other commenters stated that, consistent with the statutory definition of trading account, the agencies should not eliminate the short-term intent prong.[186] One commenter suggested re-adopting the short-term intent prong but defining the term ''short-term'' differently based on asset class.[187] Several commenters supported retaining the short-term intent prong with modifications, such as eliminating or reversing the rebuttable presumption or aligning the short-term intent prong more closely with the market risk capital prong.[188] The agencies agree that there is substantial overlap between the short-term intent prong and the market risk capital prong and have revised the definition of trading account accordingly.

Under the final rule, the definition of trading account includes any account that is used by a banking entity to purchase or sell one or more financial instruments principally for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging one or more of the positions resulting from the purchases or sales of financial instruments for the foregoing purposes.[189] The agencies believe that it is necessary to include a prong other than the market risk capital prong or the dealer prong to define ''trading account'' for banking entities that are subject to the final rule but are not subject to the market risk capital prong. The agencies believe that requiring banking entities that are not subject to the market risk capital rule to apply the market risk capital prong in order to identify the scope of positions subject to the Volcker Rule's proprietary trading provisions could be unduly complex and burdensome for banking entities with smaller and less active trading activities. The final rule allows a banking entity not subject to the market risk capital prong to define its trading account by reference to either the short-term intent prong or the market risk capital prong because both tests are consistent with the statutory definition of trading account; this flexible approach for banking entities with less trading activities is appropriate for various reasons, including because these banking entities are already familiar with the short-term intent prong.[190]

Under the final rule, the regulatory short-term intent prong applies only to a banking entity that is not subject to the market risk capital prong and that has not elected to apply the market risk capital prong to determine the scope of the banking entity's trading account.[191] For purposes of the final rule, a banking entity is subject to the market risk capital prong if it, or any affiliate with which the banking entity is consolidated for regulatory reporting purposes, calculates risk-based capital ratios under the market risk capital rule.[192] Applying the short-term intent prong only to banking entities whose trading account is not covered by the market risk capital prong will simplify application of the rule. No longer applying the short-term intent prong to banking entities that are subject to the market risk capital prong is appropriate because the scope of activities captured by the short-term intent prong is substantially similar to the scope of activities captured by the market risk capital prong. Indeed, the preamble to the 2013 rule noted that the definition of trading position in the market risk capital rule largely parallels the statutory definition of trading account,[193] which in turn mirrors the language in the short-term intent prong. Accordingly, the agencies believe that a banking entity should be subject either to the short-term intent prong or to the market risk capital prong, but not both.[194]

The final rule allows a banking entity that is not subject to the market risk capital prong to elect to apply the market risk capital prong in place of the short-term intent prong.[195] The final rule includes this option to provide parity between smaller banking entities that are not subject to the market risk capital rule and larger banking entities with active trading businesses that are

[194] A number of commenters suggested that, due to the overlap between the market risk capital prong and the short-term intent prong, banking entities that are subject to the market risk capital prong should not also be subject to the short-term intent prong. *See, e.g.,* Capital One et al.; BPI; FSF; Goldman Sachs; CREFC; and SIFMA.

[195] *See* final rule § ____.3(b)(2)(ii).

subject to the market risk capital prong.[196] Under the final rule, a banking entity that is not subject to the market risk capital rule may choose to define its trading account as if the banking entity were subject to the market risk capital prong. If a banking entity opts into the market risk capital prong, the banking entity's trading account would include all accounts used by the banking entity to purchase or sell one or more financial instruments that would be covered positions and trading positions under the market risk capital rule if the banking entity were subject to the market risk capital rule. Banking entities that do not make this election will continue to apply the short-term intent prong.

Under the final rule, an election to apply the market risk capital prong must be consistent among a banking entity and all of its wholly owned subsidiaries.[197] This consistency requirement is intended to facilitate banking entities' compliance with the proprietary trading prohibition by subjecting wholly owned legal entities within a firm to the same definition. Requiring a consistent definition of ''trading account'' is particularly important to simplify compliance because a trading desk may book trades into different legal entities within an organization, and having a consistent definition of ''trading account'' among these entities should help ensure that each banking entity can identify relevant trading activity and meet its compliance obligations under the final rule. This requirement is also expected to facilitate the agencies' supervision of compliance with the final rule. This consistency requirement would apply only to a banking entity and its wholly owned subsidiaries. In the case of minority-owned subsidiaries or other subsidiaries that the banking entity does not functionally control, it may be impractical for one banking entity within the organization to ensure that all affiliates will make a consistent election. However, the relevant primary financial regulatory agency may subject a banking entity that is not a wholly owned subsidiary to the consistency requirement if the agency determines it is necessary to prevent evasion of the rule's requirements. When exercising this authority, the relevant primary financial regulatory agency will follow the same notice and response procedures used elsewhere in the final rule.

iv. 60-Day Rebuttable Presumption

The proposal would have eliminated the 2013 rule's 60-day rebuttable presumption. Many commenters supported the proposed rule's elimination of this rebuttable presumption.[198] Some commenters urged the agencies to establish a presumption that positions held for more than 60 days are not proprietary trading.[199] Some commenters suggested that the agencies should presume, for banking entities not subject to the market risk capital rule, that financial instruments held for longer than 60 days, or that have an original maturity or remaining maturity upon acquisition of fewer than 60 days to their stated maturities, are not for the banking entity's trading account.[200] One commenter suggested that any third prong to the definition of trading account that applies to banking entities that are not subject to the market risk capital rule should have a rebuttable presumption that any position held by the banking entity as principal for 60 days or more is not for the trading account, as well as a reasonable challenge procedure through which a banking entity would be provided an opportunity to demonstrate to its primary financial regulatory agency that positions held for fewer than 60 days do not constitute proprietary trading.[201] Several commenters asked that the agencies—if they do not eliminate the presumption—provide guidance on the rebuttal process,[202] or make certain revisions to the presumption, such as revising the ''substantial transfer of risk'' language; [203] exempting financial instruments close to maturity; [204] and excluding hedging activity.[205] Some commenters argued, in contrast, that the 60-day rebuttable period was under-inclusive.[206] One commenter argued that any position purchased or sold within 180 days should be automatically included within the definition of trading account, or, in the alternative, that the presumption should be extended from 60 to 180 days, and the agencies should mandate ongoing monitoring and disclosure of all components, excluded or not, of the banking entities' reported trading account assets.[207] This commenter also argued that there should not be a presumption that certain positions are not within the trading account; that documentation requirements for rebutting the presumption should be clearly specified and the criteria more restrictive; that all arbitrage positions should be presumed to be trading positions; and that the definition of ''short-term'' should vary by asset class. Another commenter generally opposed eliminating the 60-day rebuttable presumption.[208]

After considering all comments received, the agencies are eliminating the 60-day rebuttable presumption from the 2013 rule and establishing a new rebuttable presumption that financial instruments held for sixty days or more are not within the short-term intent prong. Since the 2013 rule came into effect, the agencies have found that the rebuttable presumption has captured many activities that should not be included in the definition of proprietary trading,[209] which, under the statute, only covers buying and selling financial instruments principally for the purpose of selling in the near term (or otherwise with the intent to resell in order to profit from short-term price movements).[210] Several commenters supported eliminating the 2013 rule's rebuttable presumption for this reason or due to difficulties in rebutting the presumption.[211] Given the type of activities that have triggered the 2013 rule's rebuttable presumption but that are not undertaken principally for the purpose of selling in the near-term,[212]

[196] Several commenters recommended defining the trading account solely by reference to the dealer prong and market risk capital prong for banking entities subject to the market risk capital rule. *See, e.g.,* Capital One et al.; BPI; FSF; Goldman Sachs; CREFC; and SIFMA. One commenter suggested that banking entities that are not subject to the market risk capital rule and subject to a third prong should be allowed to elect to be treated as a banking entity subject to the market risk capital rule for purposes of the regulations implementing section 13 of the BHC Act. This approach would maintain parity between banking entities that are subject to the market risk capital rule and those that are not. *See* SIFMA.

[212] Such activities include a foreign branch of a U.S. banking entity purchasing a foreign sovereign debt obligation with remaining maturity of fewer than 60 days in order to meet foreign regulatory requirements. Similarly, error correcting trades and matched derivative transactions, discussed *infra* may have triggered the 2013 rule's rebuttable presumption but are not undertaken principally for the purpose of selling in the near term (or otherwise

Continued

the agencies have concluded that it is not appropriate to continue to presume short-term trading intent from holding a financial instrument for fewer than 60 days.

However, the agencies recognize the utility for both the agencies and the subject banking entities of an objective time-based standard.[213] The final rule contains a new rebuttable presumption: The purchase or sale of a financial instrument presumptively lacks short-term trading intent if the banking entity holds the financial instrument for 60 days or longer and does not transfer substantially all of the risk of the financial instrument within 60 days of the purchase (or sale).[214] The agencies agree with commenters that a banking entity subject to the short-term intent prong that holds an instrument for at least 60 days should receive the benefit of a presumption that the trade was not entered into for the purpose of selling in the near term or otherwise with the intent to resell in order to profit from short-term price movements. Replacing the 2013 rule's rebuttable presumption with a rebuttable presumption that financial instruments held for sixty days or longer are not within the short-term intent prong will provide clarity for banking entities with respect to such positions, without imposing the burden associated with the 2013 rule's rebuttable presumption.

In light of the revision to the 60-day rebuttable presumption, the agencies do not believe it is necessary to provide a formal challenge procedure with respect to financial instruments that are purchased or sold within 60 days. Under the final rule, such activity is no longer presumptively within a banking entity's trading account.

As in the 2013 rule, the final rule's presumption only applies to the short-term intent prong and does not apply to the market risk capital or dealer prongs

v. Market Risk Capital Prong Modification

The proposal would have revised the market risk capital prong to apply to the activities of foreign banking organizations (FBOs) to take into account the different market risk frameworks FBOs may have in their home countries.[215] Specifically, the proposal included within the market risk capital prong an alternative definition that permitted a banking entity that is not, and is not controlled directly or indirectly by a banking entity that is, located in or organized under the laws of the United States or any State, to include any account used by the banking entity to purchase or sell one or more financial instruments that are subject to risk-based capital requirements under a market risk framework established by the home-country supervisor that is consistent with the market risk framework published by the Basel Committee on Banking Supervision (Basel Committee), as amended from time to time.

One commenter asserted that, under some foreign regulatory market risk capital frameworks, this expansion would capture positions that are not held for short-term trading.[216] This commenter advocated adopting a flexible approach where foreign banking entities could exclude a position subject to a foreign jurisdiction's market risk capital framework from the trading account by demonstrating that the position was not acquired for short-term purposes or otherwise should not be treated as a trading account position.[217]

After considering the comments on this issue,[218] the agencies have decided not to modify the market risk capital prong to incorporate foreign market risk capital frameworks. The agencies believe that relying on the short-term intent prong, market risk capital prong, and dealer prong will ensure consistent treatment of U.S. and foreign banking entities. Foreign banking entities that are not subject to the market risk capital rule may continue to use the short-term intent prong to define their trading accounts. However, a banking entity, including a foreign banking entity, may elect to apply the market risk capital prong in determining the scope of its trading account. As discussed above, a banking entity that uses the market risk capital prong to determine the scope of its trading account is not also subject to the short-term intent prong. This approach will provide appropriate parity between U.S. and foreign banking entities and will also maintain consistency with the statutory trading account definition.[219]

Accordingly, the final rule retains a market risk capital prong that is substantially similar to that in the 2013 rule. The final rule's market risk capital prong includes within the definition of trading account any account that is used by a banking entity to purchase or sell one or more financial instruments that are both covered positions and trading positions under the market risk capital rule (or hedges of other covered positions under the market risk capital rule), if the banking entity, or any affiliate that is consolidated with the banking entity for regulatory reporting purposes, calculates risk-based capital ratios under the market risk capital rule.[220]

In addition, the final rule includes a transition period for banking entities as they become subject to the market risk capital prong.[221] Under the final rule, if a banking entity is subject to the short-term intent prong and then becomes subject to the market risk capital prong, the banking entity may continue to apply the short-term intent prong instead of the market risk capital prong for one year from the date on which it becomes, or becomes consolidated for regulatory reporting purposes with, a banking entity that calculates risk-based capital ratios under the market risk capital rule. The agencies are adopting this transition period to provide banking entities a reasonable period to update compliance programs.

The market risk capital rule includes a position that is reported as a covered position for regulatory reporting purposes on applicable reporting forms.[222] Certain banking entities that may be subject to, or elect to apply, the

with the intent to resell in order to profit from short-term price movements).

[214] *See* final rule § ___.3(b)(4).

[215] *See* proposed rule § ___. 3(b)(1)(ii); 83 FR at 33447.

[216] *See* IIB.

[217] *See id.*

[218] *See* IIB (noting that the scope of some foreign supervisory market risk capital frameworks may capture positions that are not held solely for short-term purposes and thus should be out of scope for purposes of the final rule).

[219] In the course of developing the final rule, the agencies have considered the prudential actions of foreign regulators in this area and the resulting effects on U.S. and non-U.S. financial institutions and the relevant markets in which they participate.

[220] *See* final rule § ___.3(b)(1)(ii). The final rule's market risk capital prong has, however, been modified as compared to the 2013 rule to account for a banking entity that is not consolidated with an affiliate (for regulatory reporting purposes) that calculates risk-based capital ratios under the market risk capital rule. For example, the trading positions of a broker-dealer that is not consolidated with its parent bank holding company will not be included in the holding company's trading positions in the holding company's Form FR Y–9C. In such an instance, even though the broker-dealer is affiliated with an entity that calculates risk-based capital ratios under the market risk capital rule, it would not be subject to the market capital risk prong due to the fact that the broker-dealer is not consolidated with the affiliate for regulatory reporting purposes. As a result, the broker-dealer would be subject to the amended short-term intent prong and the dealer prong (with respect to instruments purchased or sold in connection with the activities that require the broker-dealer to be licensed or registered as such). It may, however, be able to elect to use the market risk capital prong (as an alternative to the short-term intent prong) by following the procedures described above.

[221] Unlike the Volcker Rule compliance program requirements, which are based on average gross trading assets and liabilities over the prior four quarters, the thresholds in the market risk capital rule are based on the most recent quarter.

[222] *See* 12 CFR 3.202; 12 CFR 217.202; 12 CFR 324.202 (defining "covered position").

market risk capital prong may not report positions on applicable regulatory reporting forms as trading assets or trading liabilities. Therefore, the final rule amends the definition of ''market risk capital rule covered position and trading position'' to clarify that this definition includes any position that meets the criteria to be a covered position and a trading position, without regard to whether the financial instrument is reported as a covered position or trading position on any applicable regulatory reporting forms. The final rule also modifies the definition of ''market risk capital rule'' to update a cross-reference to the Board's capital rules and to clarify what the applicable market risk capital rule would be for a firm electing to apply the market risk capital prong.[223]

vi. Dealer Prong

The proposal did not propose revisions to the dealer prong. However, several commenters requested that the agencies clarify that not all purchases and sales of financial instruments by a dealer are captured by the dealer prong.[224] Specifically, these commenters requested that the agencies clarify that the dealer prong does not capture purchases or sales made by a dealer in a non-dealing capacity, including financial instruments purchased for long-term investment purposes.[225] Among other things, those commenters noted that without such modifications, the dealer prong may require a position-by-position analysis to confirm whether a long-term investment is part of the trading account. Another commenter requested that the agencies revise the dealer prong to ensure that derivatives activities remain in the trading account without regard to potential SEC and CFTC actions on the *de minimis* thresholds or other registration requirements, and that such derivatives activities do not benefit from any presumption of compliance.[226] The final rule retains the 2013 rule's dealer prong without any substantive change.[227]

The final rule's dealer prong includes within the definition of trading account any account that the banking entity uses to purchase or sell one or more financial instruments for any purpose if the banking entity (A) is licensed or registered, or is required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such; or (B) is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in connection with the activities of such business.[228] In response to commenters and consistent with the 2013 rule, the agencies reaffirm that a banking entity may be licensed or registered as a dealer, but only the types of activities that require it to be so licensed or registered are covered by the dealer prong. Thus, if a banking entity purchases or sells a financial instrument in connection with activities that are not the types of activities that would trigger registration as a dealer, the purchase or sale of the financial instrument is not covered by the dealer prong. However, it may be included in the trading account under the short-term intent prong or the market risk capital prong, as applicable.[229] Moreover, in response to commenters' concerns that the existing rule may require dealers to conduct a position-by-position analysis of their trading activities to determine whether a position is captured by the dealer prong, the agencies believe that the changes being adopted today, particularly the exclusions for financial instruments that are not trading assets or liabilities,[230] should help alleviate those concerns by narrowing the range of transactions covered by the rule.

b. Proprietary Trading Exclusions

Section ____.3 of the 2013 rule generally prohibits a banking entity from engaging in proprietary trading. In addition to defining the scope of trading activity subject to the prohibition on proprietary trading, the 2013 rule also provides several exclusions from the definition of proprietary trading. Based on experience implementing the 2013 rule, the agencies proposed modifying the exclusion for liquidity management and adopting new exclusions for transactions made to correct errors and for certain offsetting swap transactions. In addition, the agencies requested comment regarding whether any additional exclusions should be added, for example, to address certain derivatives entered into in connection with a customer lending transaction. The agencies are adopting the liquidity management exclusion as proposed, with a modification to encompass non-deliverable cross-currency swaps, and additional exclusions for the following activities: (i) Trading activity to correct trades made in error, (ii) loan-related and other customer accommodation swaps, (iii) matched derivative transactions, (iv) hedges of mortgage servicing rights where trading in the underlying mortgage servicing rights is not prohibited by the rule; and (v) financial instruments that do not meet the definition of trading assets or trading liabilities under applicable reporting forms.

i. Liquidity Management Exclusion Amendments

The 2013 rule excludes from the definition of proprietary trading the purchase or sale of securities for the purpose of liquidity management in accordance with a documented liquidity management plan.[231] This exclusion contains several requirements. First, the liquidity management exclusion is limited by its terms to securities and requires that transactions be conducted pursuant to a liquidity management plan that specifically contemplates and authorizes the particular securities to be used for liquidity management purposes; describes the amounts, types, and risks of securities that are consistent with the banking entity's liquidity management plan; and the liquidity circumstances in which the particular securities may or must be used. Second, any purchase or sale of securities contemplated and authorized by the plan must be principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes. Third, the plan must require that any securities purchased or sold for liquidity management purposes be highly liquid and limited to instruments the market, credit, and other risks of which the banking entity does not reasonably expect to give rise to appreciable profits or losses as a result of short-term price movements. Fourth, the plan must limit any

[223] *See* 12 CFR part 217.

[224] *See, e.g.,* BPI; FSF; and SIFMA.

[225] *See e.g.,* BPI; FSF; and SIFMA.

[226] *See* Better Markets.

[227] In response to the commenter, the agencies clarify that banking entities that are licensed or registered (or required to be licensed or registered) as dealers, swap dealers, or security-based swap dealers analyze the types of activities that would be captured by the dealer prong without regard to the *de minimis* thresholds for swap dealer or security-based swap dealer registration. However, regardless of whether a banking entity is so licensed or registered, the banking entity is also required to determine whether a purchase or sale of a financial instrument would be captured by either the short-term intent prong or the market risk capital prong, as applicable.

[229] *See* final rule § ____.3(b)(1)(i), (ii).

[230] *See infra* section IV.B.1.b.v.

[231] *See* 2013 rule § ____.3(d)(3).

securities purchased or sold for liquidity management purposes to an amount that is consistent with the banking entity's near-term funding needs, including deviations from normal operations of the banking entity or any affiliate thereof, as estimated and documented pursuant to methods specified in the plan. Fifth, the banking entity must incorporate into its compliance program internal controls, analysis, and independent testing designed to ensure that activities undertaken for liquidity management purposes are conducted in accordance with the requirements of the 2013 rule and the banking entity's liquidity management plan. Finally, the plan must be consistent with the supervisory requirements, guidance, and expectations regarding liquidity management of the agency responsible for regulating the banking entity. The 2013 rule established these requirements to provide some safeguards to ensure that the liquidity management exclusion is not misused for the purpose of impermissible proprietary trading.[232] While some safeguards around a banking entity's liquidity management are appropriate, the restrictions under the 2013 rule have limited the ability of banking entities to engage in certain types of bona fide liquidity management activities.

The proposal would have amended the exclusion for liquidity management activities to allow banking entities to use foreign exchange forwards and foreign exchange swaps, each as defined in the Commodity Exchange Act,[233] and physically settled cross-currency swaps (*i.e.,* cross-currency swaps that involve an actual exchange of the underlying currencies) as part of their liquidity management activities.[234] Foreign exchange forwards, foreign exchange swaps, and physically settled cross-currency swaps are often used by trading desks of foreign branches and subsidiaries of a U.S. banking entity to manage liquidity in foreign jurisdictions.[235] The proposal would have provided that a banking entity could use foreign exchange forwards, foreign exchange swaps, and physically settled cross-currency swaps for liquidity management purposes provided that the use of such financial instruments was in accordance with a documented liquidity management plan.[236]

Many commenters supported the proposed expansion of activities covered by the liquidity management exclusion.[237] However, some commenters expressed the view that the expansion did not go far enough and should be expanded to include other types of financial instruments.[238] One commenter asserted that expanding the scope of the liquidity management exclusion would streamline compliance for banking entities without introducing additional safety and soundness concerns or the risk of impermissible proprietary trading.[239] Some commenters said that non-deliverable currency derivatives should also qualify for the exclusion, because there are some currencies for which physically settled cross-currency swaps are not available.[240] Additionally, other commenters argued that given the role of derivatives in liquidity risk management, the agencies should expand the exclusion further to cover all derivatives, including interest rate swaps.[241] Certain commenters suggested that the agencies should further expand the liquidity management exclusion to include all financial instruments that would be convenient and useful for managing liquidity and asset-liability mismatch risks of the organization.[242]

Several commenters claimed that the eligibility criteria of the liquidity management exclusion are opaque and confusing, and suggested modifying, clarifying, or eliminating some or all of the requirements.[243] For example, several commenters argued that the requirement to maintain a documented liquidity management plan with certain enumerated elements is unnecessarily prescriptive.[244] Some commenters stated that banking entities do not rely on the exclusion due to the number and limiting nature of the requirements.[245] Some commenters argued that the agencies should be promoting, rather than restricting, appropriate liquidity management and structural interest rate risk management activities, and that the retention of these requirements is not consistent with the removal of the prescriptive requirements of Appendix B in the 2013 rule.[246] Other commenters argued that the agencies should eliminate the compliance-related requirements and permit banking entities to design and manage their liquidity management function according to their existing internal compliance frameworks.[247] In addition, a commenter recommended clarifying whether treasury functions within banking entities may manage global liquidity through the newly added financial instruments.[248]

In contrast, other commenters did not support the proposed expansion of the liquidity management exclusion.[249] One commenter asserted that the proposed rule fails to demonstrate the need for providing banks greater opportunity to use foreign currency transactions to manage their liquidity needs when those needs are already being met via the securities markets.[250] Another commenter argued that the proposed change would create concern for the currency markets by making it easier for trading desks to trade these instruments for speculative purposes under the guise of legitimate liquidity management.[251] One commenter argued that the proposal would encourage banking entities to exclude impermissible trades as liquidity management and engage in speculative currency trading. As a result, it would increase banks' risk-taking and moral hazard, reducing the effectiveness of regulatory oversight.[252] In addition, some commenters suggested that the agencies did not provide sufficient justification to support the proposed changes to the exclusion.[253]

After reviewing the comments received, the agencies are adopting the liquidity management exclusion substantially as proposed, but with a modification to permit the use of non-deliverable cross-currency swaps. The agencies recognize the various types of financial instruments that can be used by a banking entity for liquidity management as noted by commenters. However, the agencies continue to believe, as stated in the proposal, that the purpose of the expansion is to streamline compliance for banking entities operating in foreign

[253] *See, e.g.,* Public Citizen and Bean.

jurisdictions.[254] Thus, the final rule expands the liquidity management exclusion to permit the purchase or sale of foreign exchange forwards (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)), foreign exchange swaps (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25)), and cross-currency swaps [255] entered into by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan.[256]

In response to commenters' concerns that physically settled cross-currency swaps are not available for some currencies (*e.g.,* due to currency controls), the exclusion also encompasses non-deliverable cross-currency swaps. For currencies where physically settled cross-currency swaps are not available, a banking entity may have had to engage in procedures such as using spot transactions or holding currency at foreign custodians, which could be inefficient. Allowing banking entities to use non-deliverable cross-currency swaps can provide greater flexibility in conducting liquidity management in these situations. Even though physically settled cross-currency swaps are available in many currencies, the agencies believe it is appropriate to allow non-deliverable cross-currency swaps to be used for liquidity management in all currencies. Requiring physical settlement for some cross-currency swaps but not others would make the exclusion more difficult for banking entities to use and for the agencies to monitor, particularly if currency controls change, causing the list of currencies for which physical settlement is permitted to change. These administrative hurdles would negate many of the benefits of allowing the use of non-deliverable cross-currency swaps.

Regarding the assertion that banking entities could meet their liquidity needs in the securities markets, the agencies have found that, to the contrary, foreign exchange forwards, foreign exchange swaps, and cross-currency swaps are often used by trading desks to manage liquidity both in the United States and in foreign jurisdictions. As foreign branches and subsidiaries of U.S. banking entities often have liquidity requirements mandated by foreign jurisdictions, U.S. banking entities often use foreign exchange products to address currency risk arising from holding this liquidity in foreign currencies. Thus, these foreign exchange products are important for liquidity management and should be included in the expansion of the liquidity management exclusion.

The agencies believe that adding foreign exchange forwards, foreign exchange swaps, and cross-currency swaps to the exclusion addresses the primary liquidity management needs for foreign entities, and therefore are declining to expand the exclusion to other products as suggested by some commenters. While some commenters asserted that further expanding the liquidity management exclusion would streamline compliance without introducing additional safety and soundness or proprietary trading concerns, the agencies believe that the range of financial instruments that will qualify for the exclusion under the final rule will be sufficient for managing banking entities' liquidity risks.

The final rule permits a banking entity to purchase or sell foreign exchange forwards, foreign exchange swaps, and cross-currency swaps to the same extent that a banking entity may purchase or sell securities under the liquidity management exclusion in the 2013 rule, and the conditions that apply for securities transactions also apply to transactions in foreign exchange forwards, foreign exchange swaps, and cross-currency swaps.[257]

The agencies acknowledge that, as stated in the proposal, cross-currency swaps generally are more flexible in their terms, may have longer durations, and may be used to achieve a greater variety of potential outcomes, as compared to foreign exchange forwards and foreign exchange swaps.[258] However, the agencies believe that the requirement to conduct liquidity management in accordance with a documented liquidity management plan appropriately limits the use of cross-currency swaps to activities conducted for liquidity management purposes, and therefore banking entities' use of these swaps should not adversely affect currency markets, as one commenter warned. Under the plan, the purpose of the transactions must be liquidity management. The timing of purchases and sales, the types and duration of positions taken and the incentives provided to managers of these purchases and sales must all indicate that managing liquidity, and not taking short-term profits (or limiting short-term losses), is the purpose of these activities. Thus, to be in compliance with the plan, cross-currency swaps must be used principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes.[259]

Regarding the assertion from some commenters that the compliance-related requirements for the liquidity management exclusion are opaque or unnecessarily prescriptive, the agencies believe it is important to retain these requirements in order to provide clarity in administration of the rule and to protect against potential misuse of the liquidity management exclusion for proprietary trading. As noted above, the documented liquidity management plan, required under the 2013 rule and retained in the final rule,[260] is a key element in assuring that liquidity management is the purpose of the relevant transactions. The agencies do not believe that the final rule will stand as an obstacle to or otherwise impair the ability of banking entities to manage their liquidity risks. Although other changes to the 2013 rule in the final rule, such as the elimination of Appendix B, reflect efforts to tailor compliance obligations, the agencies believe it is important to be explicit in maintaining targeted compliance requirements for specific provisions of the final rule, such as the liquidity management exclusion.

The agencies believe that the six required elements of the liquidity management plan help to mitigate commenters' concerns that the proposal would have encouraged banking entities to exclude impermissible trades as liquidity management or increase risk-taking. Under the liquidity management plan required by the final rule, the exclusion does not apply to activities undertaken with the stated purpose or effect of hedging aggregate risks incurred by the banking entity or its affiliates related to asset-liability mismatches or other general market risks to which the entity or affiliates may be exposed. Further, the exclusion does not apply to any trading activities

[254] *See* 83 FR at 33451–52.

[255] As proposed, the final rule defines a cross-currency swap as a swap in which one party exchanges with another party principal and interest rate payments in one currency for principal and interest rate payments in another currency, and the exchange of principal occurs on the date the swap is entered into, with a reversal of the exchange of principal at a later date that is agreed upon for when the swap is entered. This definition is consistent with regulations pertaining to margin and capital requirements for covered swap entities, swap dealers, and major swap participants. *See* 12 CFR 45____.2; 12 CFR 237.2; 12 CFR 349.2; 17 CFR 23.151.

[260] *See* § ____.3(d)(3).

that expose banking entities to substantial risk from fluctuations in market values, unrelated to the management of near-term funding needs, regardless of the stated purpose of the activities.[261]

This final rule also includes a change to one of the liquidity management exclusion's requirements. The 2013 rule requires that activity conducted under the liquidity management exclusion be consistent with applicable ''supervisory requirements, guidance, and expectations.'' [262] Consistent with changes elsewhere in the final rule and with the Federal banking agencies' Interagency Statement Clarifying the Role of Supervisory Guidance,[263] the agencies are removing references to guidance and expectations from the regulatory text of the liquidity management exclusion. In addition, the final rule includes conforming changes that reflect the addition of foreign exchange forwards, foreign exchange swaps, and cross-currency swaps as permissible contracts in conjunction with the other criteria under the exclusion.[264]

ii. Transactions To Correct Bona Fide Trade Errors

The proposal included an exclusion from the definition of proprietary trading for trading errors and subsequent correcting transactions.[265] As discussed in the proposal, the exclusion was intended to address situations in which a banking entity erroneously executes a purchase or sale of a financial instrument in the course of conducting a permitted or excluded activity. For example, a trading error may occur when a banking entity is acting solely in its capacity as an agent, broker, or custodian pursuant to § ____.3(d)(7) of the 2013 rule, such as by trading the wrong financial instrument, buying or selling an incorrect amount of a financial instrument, or purchasing rather than selling a financial instrument (or vice versa). To correct such errors, a banking entity may need to engage in a subsequent transaction as principal to fulfill its obligation to deliver the customer's desired financial instrument position and to eliminate any principal exposure that the banking entity acquired in the course of its effort to deliver on the customer's original request. As the proposal noted, banking entities have expressed concern that, however, under the 2013 rule, the initial trading error and any corrective transactions could, depending on the facts and circumstances involved, fall within the proprietary trading definition if the transaction is covered by any of the prongs of the trading account definition and is not otherwise excluded pursuant to a different provision of the rule.

To address this concern, the agencies proposed a new exclusion from the definition of proprietary trading for trading errors and subsequent correcting transactions. The proposal noted that the availability of this exclusion would depend on the facts and circumstances of the transactions, such as whether the banking entity made reasonable efforts to prevent errors from occurring, or identified and corrected trading errors in a timely and appropriate manner. The proposed exclusion required that banking entities, once they identified purchases or sales made in error, transfer the financial instrument to a separately managed trade error account for disposition. The proposal would have required that this separately managed trade error account be monitored and managed by personnel independent from the traders responsible for the error, and that banking entities monitor and manage trade error corrections and trade error accounts.

The majority of commenters generally supported the proposed exclusion for trade errors.[266] Some commenters noted that, consistent with operational risk management practices, bona fide trade error activity is separately managed and classified as an operational loss when there is a loss event or a ''near miss'' when error activity results in a gain.[267] Many commenters urged the agencies not to mandate a separately managed trade error account, but to permit banking entities to resolve trading errors in accordance with internal policies and procedures to avoid duplicative resolution systems and unnecessary regulatory costs.[268] One commenter argued that error trades are clearly outside the scope of activities meant to be prohibited by the statute, so it should not be necessary to include any additional documentation or administrative requirements related to them.[269] One comment letter requested that the agencies clarify that the exclusion covers both pre-settlement trade errors (where the error is identified and corrected prior to being settled in the client's account and is settled in a separately managed trade error account) and post-settlement trade errors (where the trade error is settled in and posted directly to the client's account).[270]

One commenter supported providing an exclusion for bona fide error trades, but suggested certain changes to the proposed exclusion.[271] This commenter expressed concern that the proposed exclusion did not provide sufficient protections to ensure that banking entities correct errors in a timely and comprehensive manner and do not use the exclusion to facilitate directional exposures. To this end, the commenter recommended requiring banking entities to establish reasonably designed controls, including periodic exception reports containing certain specified fields. These reports, the commenter argued, should be provided to independent personnel in the second line-of-defense, including compliance and risk personnel, and escalated internally in accordance with the banking entity's internal policies and procedures. The commenter also recommended requiring periodic error trade testing and audits conducted by the second line-of-defense.

One commenter argued against a blanket exclusion for error trades, and urged the agencies to require any profit from error trades be forfeited to the U.S. Treasury, thereby removing any incentive for a banking entity to erroneously classify intentional financial positions as error trades.[272] Another commenter argued that the proposal did not adequately explain or provide sufficient data to justify the necessity of providing an exclusion for error trades, and that the exclusion could be used to evade the prohibition on proprietary trading.[273]

After weighing the comments received, the agencies are excluding from the definition of ''proprietary trading'' any purchase or sale of one or more financial instruments that was made in error by a banking entity in the course of conducting a permitted or

[273] *See* CAP.

excluded activity or is a subsequent transaction to correct such an error.[274] The agencies do not believe bona fide trading errors and correcting transactions are proprietary trading. Under the 2013 rule, trading errors and subsequent transactions to correct such errors could trigger the short-term intent prong's 60-day rebuttable presumption and thus could be considered to be presumptively within the trading account. In addition, trading errors and correcting transactions could be within the definition of proprietary trading under the market risk prong or dealer prong. While the final rule eliminates the 2013 rule's 60-day rebuttable presumption,[275] the agencies believe it is useful and appropriate to clarify in the final rule that trading errors and subsequent correcting transactions are not proprietary trading because banking entities do not enter into these transactions principally for the purpose of selling in the near-term (or otherwise with the intent to resell in order to profit from short-term price movements).[276] Rather, the principal purpose of a trading error correction is to remedy a mistake made in the ordinary course of the banking entity's permissible activities.[277] Accordingly, the agencies are adopting this exclusion to provide clarity regarding bona fide trading errors and subsequent correcting transactions.

Consistent with feedback from several commenters,[278] the exclusion in the final rule does not require banking entities to transfer erroneously purchased (or sold) financial instruments to a separately managed trade error account for disposition. The agencies agree that this requirement could have resulted in duplicative resolution systems and imposed undue regulatory costs, which are not appropriate in light of the narrow class of bona fide trading errors that fall within the exclusion. As with all exclusions and permitted trading activities, the agencies intend to monitor use of this exclusion for evasion. For example, the magnitude or frequency of errors could indicate that the trading activity is inconsistent with this exclusion.

The agencies have considered comments suggesting that the agencies should impose on banking entities certain reporting, auditing, and testing requirements specifically related to trade error transactions.[279] As noted above, the agencies believe mandating requirements such as these could lead to undue costs for banking entities, which are not appropriate in light of the narrow class of bona fide trading errors that fall within the exclusion. Such bona fide trade errors and subsequent correcting transactions do not fall within the statutory definition of ''proprietary trading'' because they lack the requisite short-term intent. Accordingly, the agencies do not find it necessary to impose additional requirements with respect to such activities. Further, the agencies do not agree that any profits resulting from trade error transactions should be remitted to the U.S. Treasury.

iii. Matched Derivative Transactions

The proposal requested comment on the treatment of loan-related swaps between a banking entity and customers that have received loans from the banking entity.[280] The proposal explained that, in a loan-related swap transaction, a banking entity enters into a swap with a customer in connection with the customer's loan and contemporaneously offsets the swap with a third party. The swap with the customer is directly related to the terms of the customer's loan.[281] In one typical type of loan-related swap, a banking entity seeks to make a floating-rate loan to a customer that could have the benefit to the banking entity of reducing the banking entity's interest rate risk, but the customer would prefer to have the economics of a fixed-rate loan.[282] To achieve a result that addresses these divergent preferences, the banking entity makes a floating-rate loan to the customer and contemporaneously or nearly contemporaneously enters into a floating rate to fixed rate interest rate swap with the same customer and an offsetting swap with another counterparty.[283] As a result, the customer receives economic treatment similar to a fixed-rate loan.[284] The banking entity has entered into the preferred floating rate loan, provided the customer with the customer's preferred fixed rate economics though the interest rate swap with the customer and offset its market risk exposure from the customer-facing interest rate swap through a swap with another counterparty.[285]

Loan-related swaps have presented a compliance challenge particularly for smaller non-dealer banking entities.[286] These banking entities may enter into loan-related swaps infrequently, and the decision to do so tends to be situational and dependent on changes in market conditions as well as on the interaction of a number of factors specific to the banking entity, such as the nature of the customer relationship.[287]

The proposal sought comment on whether loan-related swaps should be excluded from the definition of proprietary trading, exempted from the prohibition on proprietary trading, or permitted under the exemption for market making-related activities.[288] The proposal also asked whether other types of swaps, such as end-user customer-driven swaps that are used by a customer to hedge commercial risk should be treated the same way as loan-related swaps.[289] The proposal also requested comment as to whether it is appropriate to permit loan-related swaps to be conducted pursuant to the exemption for market making-related activities where the frequency with which a banking entity executes such swaps is minimal but the banking entity remains prepared to execute such swaps when a customer makes an appropriate request.[290]

Most commenters supported allowing loan-related swaps, either by adopting an exclusion from the definition of proprietary trading,[291] creating a new exemption for loan-related swaps,[292] or clarifying that banking entities could enter into loan-related swaps under existing exemptions.[293] The majority of these commenters supported explicitly excluding loan-related swaps from the definition of proprietary trading.[294] These commenters noted that loan-related swap transactions generally do not fall within the statutory definition of trading account and that these

transactions are important risk-mitigating activities.[295] Commenters stated that providing an exclusion or permitted activity exemption for loan-related swaps would prevent section 13 of the BHC Act from having an unintended chilling effect on an important and prudent lending-related activity.[296] Commenters also stated that these types of swap transactions are important tools that facilitate bank customers' ability to manage their risks.[297] One commenter opposed providing an exclusion for loan-related swaps, arguing that these activities instead should be conducted under the risk-mitigating hedging exemption.[298]

Two commenters requested that the agencies adopt a permitted activity exemption for loan-related swaps or revise the existing exemption for market making-related activities if the agencies do not explicitly exclude loan-related swaps from the definition of proprietary trading.[299] In addition, two commenters suggested that the exemption for riskless principal transactions in § ____.6(c)(2) of the 2013 rule could cover loan-related swaps.[300] These commenters and two others suggested that excluding loan-related swaps from the definition of proprietary trading would be more effective than adopting a new permitted activity exemption or relying on an existing permitted activity exemption.[301]

Two commenters argued that banking entities should be allowed to engage in loan-related swaps using the exemption for market making-related activities.[302] Several other commenters asserted that the market-making exemption is a poor fit for loan-related swaps and that the market-making exemption's requirements were unduly burdensome with respect to this activity, particularly for smaller banking entities.[303]

Several commenters supported excluding additional derivatives activities from the definition of proprietary trading, such as customer-driven matched-book trades that enable customers to hedge commercial risk regardless of whether the swaps are related to a loan.[304] Commenters noted that such customer-driven matched-book trades do not expose banking entities to risk other than counterparty credit risk.[305] Moreover, these trades reduce risks to the bank's customer and thus also reduce the risk of the banking entity's loans to that customer.[306]

Three commenters requested that the exclusion be expanded to cover instances where a banking entity enters into a loan-related swap with a customer but does not offset that swap with a third party.[307]

One commenter urged the agencies to adopt a definition of loan-related swaps that is substantially similar to the definition adopted by the CFTC for swaps executed in connection with originating loans to customers, and to include in the definition, the derivatives transaction entered into with a dealer to offset the risk of the customer-facing swap.[308] Another commenter opposed using the CFTC's definition, noting that the CFTC's definition would not address commodity-based matched-book derivative transactions.[309] One commenter recommended defining ''customer-facing loan-related swap'' to mean any swap with a customer or affiliate thereof in which the rate, asset, liability, or other notional item underlying the swap with the customer or affiliate thereof is, or is directly related to, a financial term of a loan or other credit facility with the customer or affiliate thereof (including, without limitation, the loan or other credit facility's duration, rate of interest, currency or currencies, or principal amount).[310] The same commenter stated that the exclusion should not include a timing requirement with respect to the offsetting swap or, if a timing condition is included, the banking entity should be required to enter into the offsetting swap ''contemporaneously or substantially contemporaneously'' with the customer-facing loan-related swap.[311]

After considering the comments received, the agencies are excluding from the definition of ''proprietary trading'' entering into a customer-driven swap or a customer-driven security-based swap and a matched swap or security-based swap if: (i) The transactions are entered into contemporaneously; (ii) the banking entity retains no more than minimal price risk;[312] and (iii) the banking entity is not a registered dealer, swap dealer, or security-based swap dealer.[313] The agencies are adopting this exclusion to provide greater certainty for non-dealer banking entities that engage in these customer-driven matched-book swap transactions.

Under the 2013 rule, these customer-driven matched swap transactions could trigger the short-term intent prong's rebuttable presumption and thus would be presumptively within the trading account. Although the agencies are eliminating the 2013 rule's rebuttable presumption,[314] the agencies believe that it is nevertheless useful and appropriate to clarify in the final rule that these customer-driven matched swap transactions are not proprietary trading because banking entities do not enter into these transactions principally for the purpose of selling in the near-term (or otherwise with the intent to resell in order to profit from short-term price movements).[315] For this reason, the agencies are providing an exclusion for these activities from the proprietary trading definition rather than requiring them to be conducted pursuant to the risk-mitigating hedging exemption, as one commenter suggested.

The agencies believe that adopting this exclusion will reduce costs for non-dealer banking entities and avoid disrupting a common and traditional banking service provided to small and medium-sized businesses. This exclusion will provide a greater degree of certainty that these customer-driven matched swap transactions are outside the scope of the final rule.

Consistent with feedback received from commenters,[316] the exclusion in the final rule is not limited to loan-related swaps.[317] Thus, the exclusion in the final rule could apply to a swap with a customer in connection with the

[317] As a result, the agencies are not adopting a definition of ''loan-related swap'' substantially similar to the definition adopted by the CFTC for swaps executed in connection with originating loans to customers, as requested by one customer. *See* Chatham. The agencies also note that this exclusion does not impact the ''insured depository institution swaps in connection with originating loans to customers'' provisions in the CFTC's definition of ''swap dealer.'' *See* 17 CFR 1.3, Swap dealer, paragraphs (4)(i)(C) and (5). Additionally, this exclusion does not affect any other aspects of the ''swap dealer'' definition in CFTC regulations, or how that term is interpreted by the CFTC.

customer's end-user activity (provided that all the terms of the exclusion are met). For example, a corn farmer is a customer of a non-dealer banking entity. To manage its risk with respect to the price of corn, the corn farmer enters into a swap on corn prices with the banking entity. The banking entity contemporaneously enters into a corn-price swap with another counterparty to offset the price risk of the swap with the corn farmer. The swap with the corn farmer and the offsetting swap with the counterparty have matching terms such that the banking entity retains no more than minimal price risk. The agencies have determined that it is appropriate to exclude these types of transactions from the definition of proprietary trading because, like matched loan-related swaps discussed above, banking entities do not enter into these customer-driven transactions principally for the purpose of selling in the near-term (or otherwise with the intent to resell in order to profit from short-term price movements).[318]

Several conditions must be met for the exclusion to apply.[319] The exclusion applies only to banking entities that are not registered dealers, swap dealers, or security-based swap dealers. This approach is consistent with feedback from commenters noting that primarily smaller banking entities have faced compliance challenges with respect to customer-driven swaps activities.[320] Banking entities that are registered dealers, swap dealers, or security-based swap dealers generally engage in these activities on a more regular basis and therefore have been able to conduct their derivatives activities pursuant to the exemption for market making-related activities. Although some commenters argued that the exemption for market making-related activities is too burdensome to apply to this type of activity,[321] the agencies note that the final rule streamlines certain requirements of that exemption.[322]

The exclusion only applies to transactions where one of the two matched swaps or security-based swaps is customer-driven, in that the transaction is entered into for a customer's valid and independent business purposes. In addition, the hedging swap or hedging security-based swap must match the customer-driven swap or customer-driven security-based swap. The banking entity may retain no more than minimal price risk between the two swaps or security-based swaps.[323] Finally, the banking entity must enter into the customer-driven swap or customer driven security-based swap contemporaneously with the matching swap or matching security-based swap.[324] These conditions carve out from the exclusion activities whose principal purpose is resale in the near term.[325] For example, if a banking entity entered into a hedging swap whose economic terms did not match the terms of the customer-driven swap, the banking entity would be exposed to price risk and could be speculating on short-term price movements. Similarly, if a banking entity waited multiple days between entering into a customer-driven swap and entering into the offsetting swap, the banking entity could be speculating on short-term price movements during the unhedged period of the swap transaction. In either case, the banking entity could be engaged in proprietary trading.[326] The requirements in the final rule's exclusion are intended to limit the exclusion to activities that the agencies have determined lack the requisite short-term trading intent.

The agencies have considered the comments requesting an exclusion for unmatched loan-related swaps and determined that such an exclusion is not necessary in the final rule.[327] For example, if a bank provides a loan to a customer and enters into a swap with the customer related directly to the terms of that loan but does not offset that customer-driven swap with a third-party, the exclusion does not apply. Although the exclusion may not apply, the agencies believe that this type of activity is unlikely to be within the trading account under the final rule, particularly because the agencies are not adopting the proposed accounting prong. Entering into such a loan-related swap would be proprietary trading only if the purchase or sale of the swap is principally for short term trading purposes or is otherwise within the definition of trading account.[328]

iv. Hedges of Mortgage Servicing Rights or Assets

The final rule excludes from the definition of proprietary trading any purchase or sale of one or more financial instruments that the banking entity uses to hedge mortgage servicing rights or mortgage servicing assets in accordance with a documented hedging strategy. The agencies are adopting this exclusion to clarify the scope of the prohibition on proprietary trading and to provide parity between banking entities that are subject to the market risk capital prong and banking entities that are subject to the short-term intent prong.

Section 13 of the BHC Act defines "trading account" to mean "any account used for acquiring or taking positions in . . . securities and instruments . . . principally for the purpose of selling in the near term (or otherwise with the intent to resell in order to profit from short-term price movements)," and any such other accounts that the agencies determine by rule. The purchase or sale of a financial instrument as part of a bona fide mortgage servicing rights or mortgage servicing asset hedging program is not within the statutory definition of "trading account" under the short-term intent prong because the principal purpose of such a purchase or sale is hedging rather than short-term resale for profit.

The agencies have determined to explicitly exclude this type of hedging activity from the definition of "proprietary trading" to provide greater clarity to banking entities that are subject to the short-term intent prong in light of changes made elsewhere in the final rule. Under the final rule, banking entities that are subject to the market risk capital prong (or that elect to apply the market risk capital prong) are not subject to the short-term intent prong. The market risk capital rule explicitly excludes intangibles, including servicing assets, from the definition of "covered position." Financial instruments used to hedge mortgage servicing rights or assets generally would not be captured under the market risk capital prong. Therefore, absent an explicit exclusion, banking entities that are subject to the market risk capital prong have more certainty than banking entities that are subject to the short-term intent prong that the purchase or sale of a financial instrument to hedge mortgage servicing rights or mortgage servicing assets is not proprietary

[318] *See* 12 U.S.C. 1851(h)(6).

[319] If a transaction does not satisfy all of the conditions of the exclusion but is not within the definition of trading account, the transaction would not constitute proprietary trading.

[320] *See, e.g.,* Chatham; ABA; and Covington.

[321] *See, e.g.,* IIB; Covington; SIFMA; Capital One et al.; BPI; and B&F.

[322] *See* final rule § ____.4(b).

[323] The banking entity would retain minimal price risk if the economic terms of the two swaps (*e.g.,* index, amount, maturity, and underlying reference asset or index) match.

[324] The exclusion only applies to transactions where the customer-driven swap or customer-driven security-based swap is offset by a matching swap or security-based swap on a one-for-one basis. The exclusion does not apply to portfolio-hedged derivatives transactions.

[325] *See* 12 U.S.C. 1851(h)(6).

[326] Whether the banking entity is actually engaged in impermissible proprietary trading would depend on the facts and circumstances of the particular transaction.

[327] *See* ABA and Arvest.

[328] *See* final rule § ____.3(b).

trading. The agencies are explicitly excluding mortgage servicing rights and mortgage servicing asset hedging activity to provide banking entities that are not subject to the market risk capital prong (or that elect to apply the market risk capital prong) the same degree of certainty. As described in part IV.B.1.a.iii of this **SUPPLEMENTARY INFORMATION**, the final rule seeks to provide parity between smaller banking entities that are not subject to the market risk capital rule and larger banking entities with active trading businesses that are subject to the market risk capital prong. The agencies believe an express exclusion for mortgage servicing rights and mortgage servicing hedging activity is useful in light of the revision to the trading account definition that applies the short-term intent prong only to banking entities that are not subject to the market risk capital prong.

This exclusion applies only to bona fide hedging activities, conducted in accordance with a documented hedging strategy. This requirement will assist the agencies in monitoring for evasion or abuse. In addition, the agencies note that banking entities' mortgage servicing activities and related hedging activities remain subject to applicable law and regulation, including the Federal banking agencies' safety and soundness standards.

v. Financial Instruments That Are Not Trading Assets or Trading Liabilities

The final rule excludes from the trading account any purchase or sale of a financial instrument that does not meet the definition of ''trading asset'' or ''trading liability'' under the banking entity's applicable reporting form. As with the exclusion for hedges of mortgage servicing rights or assets, the agencies are adopting this exclusion to clarify the scope of the prohibition on proprietary trading and to provide parity between banking entities that are subject to the market risk capital prong (or that elect to apply the market risk capital prong) and banking entities that are subject to the short-term intent prong.

The agencies have determined to exclude the purchase or sale of assets that would not meet the definition of trading asset or trading liability from the definition of ''proprietary trading'' to provide greater clarity to banking entities that are subject to the short-term intent prong. As described above, under the final rule, banking entities that are subject to the market risk capital prong (or that elect to apply the market risk capital prong) are not subject to the short-term intent prong.[329] Under the market risk capital prong, a purchase or sale of a financial instrument is within the trading account if it would be both a covered position and trading position under the market risk capital rule. In general, a position is a covered position under the market risk capital prong if it is a trading asset or trading liability (whether on- or off-balance sheet).[330] Thus, the exclusion for financial instruments that are not ''trading assets and liabilities'' extends the same certainty to banking entities subject to the short-term intent prong as is provided by operation of the market risk capital prong.

One commenter recommended that the agencies modify the short-term intent prong to include only financial instruments that meet the definition of trading assets and liabilities and that are held for the purpose of short-term trading.[331] The agencies have determined that including only financial instruments that meet the definition of trading assets and liabilities (by excluding instruments that do not meet this definition) is appropriate because the trading asset and liability definitions used for regulatory reporting purposes incorporate substantially the same short-term trading standard as the short-term intent prong and section 13 of the BHC Act. The Call Report and FR Y–9C provide that trading activities typically include, among other activities, acquiring or taking positions in financial instruments ''principally for the purpose of selling in the near term or otherwise with the intent to resell in order to profit from short-term price movements.'' [332] This language is substantially identical to the statutory definition of trading account, which applies to any account used for acquiring or taking positions in financial instruments ''principally for the purpose of selling in the near term (or otherwise with the intent to resell in order to profit from short-term price movements) . . . .'' [333] Therefore, excluding any purchase or sale of a financial instrument that would not be classified as a trading asset or trading liability on these applicable reporting forms is consistent with the statutory definition of trading account in section 13 of the BHC Act. This exclusion is expected to provide additional clarity to banking entities subject to the short-term intent prong, while also better aligning the compliance program requirements with the scope of activities subject to section 13 of the BHC Act.

This exclusion applies to any purchase or sale of a financial instrument that does not meet the definition of ''trading asset'' or ''trading liability'' under the applicable reporting form as of the effective date of this final rule. The final rule references the reporting forms in effect as of the final rule's effective date to ensure the scope of the exclusion remains consistent with the statutory trading account definition. Because the reporting forms are used for many purposes and are generally based on generally accepted accounting principles, future revisions to the reporting forms could define ''trading asset'' and ''trading liability'' inconsistently with the ''trading account'' definition in section 13 of the BHC Act. Further, tying the exclusion to the reporting forms currently in effect will provide greater certainty to banking entities. If the scope of the exclusion were subject to change based on revisions to the applicable reporting forms, it could require banking entities to make corresponding changes to compliance systems to remain in compliance with the rule, which could result in disruption both for banking entities and the agencies. Accordingly, the final rule excludes any purchase or sale of a financial instrument that does not meet the definition of trading asset or trading liability under the applicable reporting form as of the effective date of the final rule.

c. Trading Desk

The 2013 rule applies certain requirements at the ''trading desk''-level of organization.[334] The 2013 rule defined ''trading desk'' to mean the smallest discrete unit of organization of a banking entity that purchases or sells financial instruments for the trading account of the banking entity or an affiliate thereof.[335]

As noted in the proposal, some banking entities had indicated that, in practice, the 2013 rule's definition of trading account had led to uncertainty regarding the meaning of ''smallest discrete unit.'' [336] In addition, banking

[334] *See* 2013 rule §§ ____.4, ____.5, App. A., App. B; final rule §§ ____.4, ____.5, App. A.

[335] 2013 rule § ____.3(e)(13).

[336] *See* 83 FR at 33453.

entities had communicated that this definition has caused confusion and duplicative compliance and reporting efforts for banking entities that also define trading desks for purposes unrelated to the 2013 rule, including for internal risk management and reporting and calculating regulatory capital requirements.[337] In response to these concerns, the proposal included a detailed request for comment on whether to revise the trading desk definition to align with the trading desk concept used for other purposes.[338] Specifically, the proposal requested comment on using a multi-factor trading desk definition based on the same criteria typically used to establish trading desks for other operational, management, and compliance purposes.[339]

Commenters that addressed the definition of ''trading desk'' generally supported revising the definition along the lines contemplated in the proposal.[340] Commenters asserted that the 2013 rule's ''smallest discrete unit language'' was subjective, ambiguous, and had been interpreted in different ways.[341] Commenters said that adopting a multi-factor definition would be preferable to the 2013 rule's definition because a multi-factor definition would align the definition of trading desk with other operational and managerial structures, whereas the 2013 rule's definition could be interpreted to require banking entities to designate certain units of organization as trading desks purely for purposes of the regulations implementing section 13 of the BHC Act.[342] One commenter supported the multi-factor definition in the proposal but recommended that the agencies should be required to approve the initial trading desk designations and any changes in trading desk designations.[343] One commenter said the agencies should allow the unit of the trading desk to be determined at the discretion of each financial institution [344] and another said it is not necessary to introduce complexity into how banking entities organize their internal operations.[345]

The final rule adopts a multi-factor definition that is substantially similar to the definition included in the request for comment in the proposal, except that the first prong has been revised and the reference to incentive compensation has been removed. This multi-factor definition will align the criteria used to define trading desk for purposes of the regulations implementing section 13 of the BHC Act with the criteria used to establish trading desks for other operational, management, and compliance purposes.

The definition of trading desk includes a new second prong that explicitly aligns the definition with the market risk capital rule.[346] The final rule provides that, for a banking entity that calculates risk-based capital ratios under the market risk capital rule, or a consolidated affiliate of a banking entity that calculates risk-based ratios under market risk capital rule, ''trading desk'' means a unit of organization that purchases or sells financial instruments for the trading account of the banking entity or an affiliate thereof that is established by the banking entity or its affiliate for purposes of capital requirements under the market risk capital rule.[347] This change specifies that, for a banking entity that is subject to the market risk capital prong, the trading desk established for purposes of the market risk capital rule must be the same unit of organization that is established as a trading desk under the regulations implementing section 13 of the BHC Act. This prong of the trading desk definition is expected to simplify the supervisory activities of the Federal banking agencies that also oversee compliance with the market risk capital rule because the same unit of organization can be assessed for purposes of both the market risk capital rule and section 13 of the BHC Act, which will reduce complexity and cost for banking entities, and improve the effectiveness of the final rule. Together with providing firms with the flexibility to leverage existing or planned compliance programs in order to satisfy the elements of § ____.20 as appropriate, the agencies expect aligning the definition of trading desk will minimize compliance burden on banking entities subject to both rules.

To further align the final rule's trading desk concept with the market risk capital rule, the final rule provides that a trading desk must be ''structured by the banking entity to implement a well-defined business strategy.'' [348] This further aligns the trading desk definition with the definition of ''trading desk'' in the Basel Committee's minimum capital requirements for market risk.[349] This change will ensure that banking entities that are subject to the market risk capital prong and banking entities that are not subject to the market risk capital prong have comparable trading desk definitions. In general, a well-defined business strategy typically includes a written description of a desk's objectives, including the economics behind its trading and hedging strategies, as well as the instruments and activities the desk will use to accomplish its objectives. A desk's well-defined business strategy may also include an annual budget and staffing plan and management reports.

Like the proposal, the final rule states that a trading desk is organized to ensure appropriate setting, monitoring, and management review of the desk's trading and hedging limits, current and potential future loss exposures, and strategies. The final rule also states that a trading desk is characterized by a clearly-defined unit that: (i) Engages in coordinated trading activity with a unified approach to its key elements; (ii) operates subject to a common and calibrated set of risk metrics, risk levels, and joint trading limits; (iii) submits compliance reports and other information as a unit for monitoring by management; and (iv) books its trades together. The agencies consider a unit to be ''clearly-defined'' if it meets these four factors.

The proposal included a multi-factor definition of trading desk that referenced incentive compensation as one defining factor. However, the banking agencies do not incorporate incentive compensation in regulatory capital rules generally, and therefore omitting this criterion would better align the trading desk definition between the market risk capital rule and the Volcker Rule. Thus, the final rule does not incorporate any reference to incentive compensation.[350]

The final rule does not require the agencies to approve banking entities'

[345] *See* CCMC.

[346] Currently, the market risk capital rule does not include a definition of ''trading desk.'' However, the federal banking agencies expect to implement the Basel Committee's revised market risk capital standards, which do. *See* Basel Committee on Banking Supervision, ''Minimum Capital Requirements for Market Risk,'' MAR12 (Feb. 2019). The federal banking agencies expect their revised market risk capital rule will include a definition of ''trading desk'' that is consistent with the trading desk concept described in the ''Minimum Capital Requirements for Market Risk,'' and the multifactor approach in this final rule.

[347] *See* final rule § ____.3(e)(13)(ii).

[348] Final rule § ____.3(e)(13)(i)(A).

[349] *See* Basel Committee on Banking Supervision, Minimum Capital Requirements for Market Risk (Feb. 2019).

[350] *Compare* 83 FR at 33453 *with* final rule § ____.3(e)(13)(i)(B).

initial trading desk designations and any changes in trading desk designations, as one commenter had recommended.[351] The agencies believe such an approval process is unnecessary for purposes of the final rule because the agencies intend to continue assessing banking entities' trading desk designations as part of the agencies' ongoing supervision of banking entities' compliance with the final rule as well as other safety and soundness regulations, as applicable. At the same time, the final rule does not allow the trading desk to be set completely at the discretion of the banking entity, as one commenter suggested.[352] The adopted definition will provide flexibility to allow banking entities to define their trading desks based on the same criteria typically used for other operational, management, and compliance purposes but would not be so broad as to hinder the agencies' or banking entities' ability to detect prohibited proprietary trading.

d. Reservation of Authority

The proposal included a reservation of authority that would have permitted an agency to determine, on a case-by-case basis, that any purchase or sale of one or more financial instruments by a banking entity for which it is the primary financial regulatory agency either is or is not for the trading account as defined in section 13(h)(6) of the BHC Act.[353] The preamble requested comment on whether such a reservation of authority would be necessary in connection with the proposed trading account definition, which would have focused on objective factors to define proprietary trading. The agencies explained that this approach may have produced results that were over- or under-inclusive with respect to the statutory trading account definition. The agencies further explained that the reservation of authority could provide appropriate balance by recognizing the subjective elements of the statute in light of the bright-line approach of the proposed accounting prong.

Two commenters supported adopting the reservation of authority.[354] Both of these commenters noted the importance of coordination and consistent application of the reservation of authority, particularly in instances where the primary financial regulatory agency may vary by legal entity within a firm.[355] One of these commenters suggested that the agencies keep such authority in reserve for use solely in those circumstances wherein poor management is putting an institution at risk of failure.[356]

The final rule does not include the proposed reservation of authority.[357] The revised trading account definition in the final rule retains a short-term intent standard that largely tracks the statutory standard.[358] Because the final trading account definition does not include the proposed accounting prong and is aligned with the statutory standard, the agencies do not find it necessary to retain a reservation of authority.

2. Section ____.4: Permitted Underwriting and Market Making Related Activities

a. Current Exemptions for Underwriting and Market Making—Related Activities [359]

Section 13(d)(1)(B) of the BHC Act contains an exemption from the prohibition on proprietary trading for the purchase, sale, acquisition, or disposition of securities, derivatives, contracts of sale of a commodity for future delivery, and options on any of the foregoing in connection with underwriting or market making-related activities, to the extent that such activities are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties (RENTD).[360] As the agencies noted when they adopted the 2013 rule, client-oriented financial services, which include underwriting, market making, and asset management services, are important to the U.S. financial markets and the participants in those markets.[361]

In particular, underwriters play a key role in facilitating issuers' access to funding, and are accordingly important to the capital formation process and to economic growth.[362] For example, underwriters can help reduce issuers' costs of capital by mitigating potential information asymmetries between issuers and their potential investors.[363] Similarly, market makers operate to help ensure that securities, commodities, and derivatives markets in the United States remain well-functioning by, among other things, providing important intermediation and liquidity.[364] At the same time, however, the agencies also recognized that providing appropriate latitude to banking entities to provide such client-oriented services need not and should not conflict with clear, robust, and effective implementation of the statute's prohibitions and restrictions.[365]

Accordingly, the 2013 rule follows a comprehensive, multi-faceted approach to implementing the statutory exemptions for underwriting and market making-related activities. Specifically, section ____.4(a) of the 2013 rule implements the statutory exemption for underwriting and sets forth the requirements that banking entities must meet in order to rely on the exemption. Among other things, the 2013 rule requires that:

- The banking entity act as an ''underwriter'' for a ''distribution'' of securities and the trading desk's underwriting position be related to such distribution;
- The amount and types of securities in the trading desk's underwriting position be designed not to exceed RENTD, and reasonable efforts be made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security;
- The banking entity has established and implements, maintains, and enforces an internal compliance program that is reasonably designed to ensure the banking entity's compliance with the requirements of the underwriting exemption, including reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and addressing:
  - The products, instruments, or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities;
  - Limits for each trading desk, based on the nature and amount of the trading

[357] *See* proposed rule § ____.3(g).

[358] Although banking entities that are subject to the market risk capital prong are not subject to the short-term intent prong, the market risk capital prong incorporates a substantially similar short-term intent standard. As described above, the market risk capital rule's definition of trading position largely parallels the statutory definition of trading account, which in turn mirrors the language in the short-term intent prong.

[359] In contrast to the proposal, the discussions of the exemptions for underwriting and market making-related activity have been combined in order to avoid any unnecessary redundancy as well as any confusion that could arise to the extent there are differences in the way that otherwise identical provisions of those exemptions operate. However, the two exemptions remain separate and distinct. Banking entities seeking to rely on one or both exemptions are required to comply with the requirements and legal standards contained in each applicable exemption, and will continue to be required to do so following adoption of the final rule.

desk's underwriting activities, including RENTD, on the (1) amount, types, and risk of the trading desk's underwriting position, (2) level of exposures to relevant risk factors arising from the trading desk's underwriting position, and (3) period of time a security may be held;

○ Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

○ Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval;

• The compensation arrangements of persons performing the banking entity's underwriting activities are designed not to reward or incentivize prohibited proprietary trading; and

• The banking entity is licensed or registered to engage in the activity described in the underwriting exemption in accordance with applicable law.

Similarly, section ____.4(b) of the 2013 rule implements the statutory exemption for market making-related activities and sets forth the requirements that all banking entities must meet in order to rely on the exemption. Among other things, the 2013 rule requires that:

• The trading desk that establishes and manages the financial exposure routinely stands ready to purchase and sell one or more types of financial instruments related to its financial exposure and is willing and available to quote, purchase and sell, or otherwise enter into long and short positions in those types of financial instruments for its own account, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the relevant types of financial instruments;

• The amount, types, and risks of the financial instruments in the trading desk's market-maker inventory are designed not to exceed, on an ongoing basis, RENTD, as required by the statute and based on certain factors and analysis specified in the rule;

• The banking entity has established and implements, maintains, and enforces an internal compliance program that is reasonably designed to ensure its compliance with the exemption for market making-related activities, including reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and assessing certain specified factors;[366]

• To the extent that any required limit[367] established by the trading desk is exceeded, the trading desk takes action to bring the trading desk into compliance with the limits as promptly as possible after the limit is exceeded;

• The compensation arrangements of persons performing market making-related activities are designed not to reward or incentivize prohibited proprietary trading; and

• The banking entity is licensed or registered to engage in market making-related activities in accordance with applicable law.[368]

In the several years since the adoption of the 2013 rule, public commenters have observed that the significant and costly compliance requirements in the existing exemptions may unnecessarily constrain underwriting and market making without a corresponding reduction in the type of trading activities that the rule was designed to prohibit.[369] As the agencies noted in the proposal, implementation of the 2013 rule has indicated that the existing approach to give effect to the statutory standard of RENTD may be overly broad and complex, and also may inhibit otherwise permissible activity.[370]

Accordingly, the proposal was intended to tailor, streamline, and clarify the requirements that a banking entity must satisfy to avail itself of either exemption for underwriting or market making-related activities. In particular, the proposal intended to provide a clearer way to determine if a trading desk's activities satisfy the statutory requirement that underwriting or market making-related activity, as applicable, be designed not to exceed RENTD. Specifically, the proposal would have established a presumption, available to banking entities both with and without significant trading assets and liabilities, that trading within internally set limits satisfies the requirement that permitted activities must be designed not to exceed RENTD.[371] In addition, the agencies also proposed to tailor the exemption for underwriting and market making-related activities' compliance program requirements to the size, complexity, and type of activity conducted by the banking entity by making those requirements applicable only to banking entities with significant trading assets and liabilities.[372]

b. Proposed Presumption of Compliance With the Statutory RENTD Requirement

As described above, the statutory exemptions for underwriting and market making-related activities in section 13(d)(1)(B) of the BHC Act requires that such activities be designed not to exceed RENTD.[373] Consistent with the statute, for the purposes of the exemption for underwriting activities, section ____.4(a)(2)(ii) of the 2013 rule requires that the amount and type of the securities in the trading desk's underwriting position be designed not to exceed RENTD, and reasonable efforts are made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security.[374]

Similarly, for the purposes of the exemption for market making-related activities, section ____.4(b)(2)(ii) of the 2013 rule requires that the amount, types, and risks of the financial instruments in the trading desk's market-maker inventory are designed not to exceed, on an ongoing basis, RENTD, based on certain factors and analysis.[375] Specifically, these factors are: (i) The liquidity, maturity, and depth of the market for the relevant type of financial instrument(s), and (ii) demonstrable analysis of historical customer demand, current inventory of financial instruments, and market and other factors regarding the amount, types, and risks of or associated with positions in financial instruments in which the trading desk makes a market, including through block trades.[376] Under § ____.4(b)(2)(iii)(C) of the 2013 rule, a banking entity must account for these considerations when establishing limits for each trading desk.[377]

In the proposal, the agencies recognized that the prescriptive standards for meeting the statutory RENTD requirements in the exemptions for underwriting and market making-related activities were complex, costly, and did not provide bright line conditions under which trading activity

366 *See* 2013 rule § ____.4(b)(2)(iii).

367 *See* 79 FR at 5615.

368 2013 rule § ____.4(b)(2). This provision was not intended to expand the scope of licensing or registration requirements under relevant U.S. or foreign law that are applicable to a banking entity engaged in market-making activities, but rather to recognize that compliance with applicable law is an essential indicator that a banking entity is engaged in market-making activities. *See* 79 FR at 5620.

377 2013 rule § ____.4(b)(2)(iii)(C).

could be classified as permissible underwriting or market making-related activity.[378] Accordingly, the agencies sought comment on a proposal to implement this key statutory factor—in connection with both relevant exemptions—in a manner designed to provide banking entities and the agencies with greater certainty and clarity about what activity constitutes permissible underwriting or market making-related activity pursuant to the applicable exemption.[379]

Instead of the approach taken in the 2013 rule, the agencies proposed to establish the articulation and use of internal limits as a key mechanism for conducting trading activity in accordance with the rule's exemptions for underwriting and market making-related activities.[380] Specifically, the proposal would have provided that the purchase or sale of a financial instrument by a banking entity would be presumed to be designed not to exceed RENTD if the banking entity establishes internal limits for each trading desk, subject to certain conditions, and implements, maintains, and enforces those limits, such that the risk of the financial instruments held by the trading desk does not exceed such limits.[381] As stated in the proposal, the agencies believe that this approach would provide banking entities with more flexibility and certainty in conducting permissible underwriting and market making-related activities.[382]

Under the proposal, all banking entities, regardless of their volume of trading assets and liabilities, would have been able to voluntarily avail themselves of the presumption of compliance with the RENTD requirement by establishing and complying with these internal limits. With respect to the underwriting exemption, the proposal would have provided that a banking entity would establish internal limits for each trading desk that are designed not to exceed RENTD, based on the nature and amount of the trading desk's underwriting activities, on the:

(1) Amount, types, and risk of its underwriting position;

(2) Level of exposures to relevant risk factors arising from its underwriting position; and

(3) Period of time a security may be held.[383]

With respect to the exemption for market making-related activities, the proposal would have provided that all banking entities, regardless of their volume of trading assets and liabilities, would be able to voluntarily avail themselves of the presumption of compliance with the RENTD requirement by establishing and complying with internal limits. Specifically, the proposal would have provided that a banking entity would establish internal limits for each trading desk that are designed not to exceed RENTD, based on the nature and amount of the trading desk's market making-related activities, on the:

(1) Amount, types, and risks of its market-maker positions;

(2) Amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes;

(3) Level of exposures to relevant risk factors arising from its financial exposure; and

(4) Period of time a financial instrument may be held.[384]

In the case of both exemptions, the proposal provided that banking entities utilizing the applicable presumption of compliance with the RENTD requirement would have been required to maintain internal policies and procedures for setting and reviewing desk-level risk limits.[385] The proposed approach would not have required that a banking entity's limits be based on any specific or mandated analysis, as required with respect to RENTD analysis under the 2013 rule. Rather, a banking entity would have established the limits according to its own internal analyses and processes around conducting its underwriting activities and market making-related activities in accordance with section 13(d)(1)(B).[386] In addition, the proposal would have required, for both the exemption for underwriting and market making-related activities, a banking entity to promptly report to the appropriate agency when a trading desk exceeds or increases its internal limits.[387]

The proposal also provided that internal limits established by a banking entity for the presumption of compliance with the statutory RENTD requirement under both the exemption for underwriting and market making-related activities would have been subject to review and oversight by the appropriate agency on an ongoing basis. Any review of such limits would have assessed whether or not those limits are established based on the statutory standard—*i.e.,* the trading desk's RENTD, based on the nature and amount of the trading desk's underwriting or market making-related activities.[388]

Finally, under the proposal, the presumption of compliance with the statutory RENTD requirement for permissible underwriting and market making-related activities could have been rebutted by the appropriate agency if the agency determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the trading desk's RENTD on an ongoing basis. The agency would have provided notice of any such determination to the banking entity in writing.[389]

The agencies requested comment on the proposed addition of a presumption that conducting underwriting or market making-related activities within internally set limits satisfies the requirement that permitted such activities be designed not to exceed RENTD.

---

[378] *See* 83 FR at 33455, 33459.

[379] *Id.*

[380] As stated in the proposal, as a consequence of the changes to focus on limits, many of the requirements of the 2013 rule relating to limits associated with the exemptions for underwriting and market making-related activities would be incorporated into this requirement and modified or removed as appropriate in the proposal.

[381] *See* proposed rule § ____.4(a)(8); proposed rule § ____.4(b)(6).

[382] 83 FR at 33438.

[383] Proposed rule § ____.4(a)(8)(i).

[384] Proposed rule § ____.4(6)(i)(B).

[385] *See* 83 FR at 33456, 33460. Under the proposal, banking entities with significant trading assets and liabilities would have continued to be required to establish internal limits for each trading desk as part of the underwriting compliance program requirement in § ____.4(a)(2)(iii)(B), the elements of which would cross-reference directly to the requirement in proposed § ____.4(a)(8)(i). Similarly, banking entities with significant trading assets and liabilities would have continued to be required to establish internal limits for each trading desk as part of the compliance program requirement for market making-related activity in § ____.4(b)(2)(iii)(C), the elements of which would cross-reference directly to the requirement in proposed § ____.4(b)(6)(i). Banking entities without significant trading assets and liabilities would have no longer been required to establish a compliance program that is specific for the purposes of complying with the either exemption, but would need to establish, implement, maintain and enforce internal limits if they chose to utilize the proposed presumption of compliance with respect to the statutory RENTD requirement in section 13(d)(1)(B) of the BHC Act.

[386] *See* 83 FR at 33456, 34460. In the proposal, the agencies indicated that they expected that the risk and position limits metric that is required for certain banking entities under the 2013 rule (and would continue to be required under the Appendix to the proposal) would help banking entities and the agencies to manage and monitor the underwriting and market making-related activities of banking entities subject to the metrics reporting and recordkeeping requirements of the Appendix.

[389] *See* proposed rule § ____.4(a)(8)(iv); proposed rule § ____.4(b)(6)(iv).

c. Commenters' Views

General Approach of a Presumption of Compliance With the Statutory RENTD Requirement

As discussed above, the agencies proposed to establish the articulation and use of internal limits as a key mechanism for conducting trading activity in accordance with the rule's exemptions for underwriting and market making-related activities.[390] A number of commenters expressed support for the general approach of a presumption of compliance to satisfy the RENTD standard.[391] Claiming that the 2013 rule has chilled market making-related activities and is complex and costly and does not provide bright line conditions under which trading can clearly be classified as permissible market making-related activities, one commenter asserted that the general approach would significantly improve upon the approach of the 2013 rule.[392]

One commenter supported the proposed approach on the basis that the presumption would allow banking entities to estimate and manage inventory limits in a more holistic manner to allow for greater and more efficient liquidity and pricing for its clients.[393] That commenter argued that, in comparison to the 2013 rule, a presumption will more effectively leverage existing industry practices and reporting requirements related to managing market-making inventory, such as maintaining daily VaR metrics by product and position limits compared to relative levels of client activity.[394] Another suggested that because internally set limits are developed and applied by each banking entity in light of capital requirements and risk management it would be reasonable to provide a presumption of compliance tied to internally set limits.[395] Finally, one commenter said that the approach would provide a more efficient use of compliance resources and allow banking entities to tailor compliance requirements to its specific underwriting and market making-related activities.[396]

Several commenters, however, expressed concerns about the creation of a presumption of compliance to satisfy the statutory RENTD standard.[397] For example, commenters argued that the proposed presumption is not consistent with the statute,[398] with one commenter claiming that the statutory requirement was intended to constrain bank activities, not bank risks.[399] Commenters expressed concerns that the proposed presumption of compliance is too deferential to banking entities[400] and would reward aggressive banking entities that set their risk limits too high.[401] One commenter argued that the limits would not constrain proprietary trading because the proposed presumption of compliance with RENTD allows banking entities to raise their limits and does not distinguish between permissible and impermissible proprietary trades within risk limits.[402] Another commenter disagreed with a presumption of compliance for underwriting activity, asserting that this approach would undermine well-established principles of safety and soundness, particularly given what the commenter referred to as a general lack of scrutiny over bank-developed risk limits.[403]

Required Analysis for Establishing Risk Limits

As discussed above, the agencies recognized in the proposal that the prescriptive standards in the 2013 rule for meeting the RENTD requirements were complex, costly, and did not provide bright line conditions under which trading can clearly be classified as permissible proprietary trading.[404] As a result, the proposal would not have required that a banking entity's limits be based on any specific or mandated analysis, as was required under the 2013 rule. Rather, under the presumption of compliance with the RENTD requirement in the proposal, a banking entity would have established limits according to its own internal analyses and processes around conducting its underwriting and market making-related activities in accordance with section 13(d)(1)(B) of the BHC Act.[405] Several commenters provided their views on this element of the proposal.

Two commenters supported the agencies' contention in the proposal that the prescriptive standards in the 2013 rule were complex, costly, and did not provide bright line conditions under which trading can clearly be classified as permissible proprietary trading.[406] Some commenters said that removing certain conditions, such as the demonstrable analysis of historical customer demand in § ____.4(b)(2)(ii)(B) of the 2013 rule, would increase flexibility and provide certainty for banking entities to engage in market making-related activities since current or reasonably forecasted market demand may be different than historical data may suggest.[407]

Several commenters, however, expressed concerns about the proposed removal of the demonstrable analysis requirement. Some commenters argued that the removal of this requirement will make it harder to for the agencies to rebut the presumption or determine when banking entities have not properly set their RENTD limits.[408] One commenter argued that by not requiring a demonstrable analysis, the proposed rule will allow banking entities to engage in trading activities only superficially tied to customer demand.[409] One commenter expressed a belief that the demonstrable analysis cannot be effectively replaced by other metrics in the proposal, such as the risk and position limits and usage metric in the Appendix because this metric does not provide information on customer demand relative to trading inventories.[410]

To increase flexibility and certainty for banking entities engaged in permitted activities, several of the commenters that supported the general approach of the presumption of compliance with the RENTD requirement requested that this proposed requirement be modified in certain ways. One commenter suggested that the presumption should be available to trading desks that establish internal limits appropriate for their risk appetite, risk capacity, and business strategy and hold themselves out as a

market maker.[411] A commenter requested that the agencies revise the presumption to make it available to a banking entity that sets, in a manner agreed to with its onsite prudential examiner and consistent with the intent and purposes of section 13 of the BHC, internal RENTD limits based on factors relevant to the reasonable near-term demand of clients, customers and counterparties, which are calibrated with the intention of not exceeding RENTD.[412] One commenter suggested that, instead of adhering to the more prescriptive aspects of the proposed RENTD presumption, the trading desks of moderate and limited trading assets and liabilities banking entities should be given discretion to adopt internal risk limits appropriate to the activities of the desk subject to other existing bank regulations, supervisory review, and oversight by the appropriate agency and still be able to utilize the presumption of compliance.[413]

Some commenters requested that the agencies clarify aspects of the proposal's RENTD presumption. Commenters asked the agencies to clarify that supervisors and examiners will not impose a one-size fits all approach given the differences in business models among banking entities.[414] While opposed to the general approach of a presumption of compliance with the statutory RENTD requirement, one commenter suggested that, if the agencies adopt the presumption of compliance, additional guidance should be given to banking entities regarding the factors to consider when setting the limits required to establish the presumption of compliance, as the factors in the proposal were too broad and malleable.[415] Another commenter suggested that the agencies clarify that the presumption of compliance should include activity-based limits as a part of its risk-limit structure, such as financial instrument holding periods, notional size and inventory turnover, because activity-based limits are reflective of client demand and an appropriate statutory substitute compared to risk-based limits, which can be hedged.[416]

Specific to the underwriting exemption, one commenter asserted that underwriting activity can be sporadic due to client demand or market factors, which may result in low limit utilization and a rebuttal of the presumption of compliance even when the underwriting position itself is identifiable as part of a primary or follow-on offering of securities.[417] The commenter suggested that the agencies consider corporate actions, such as a debt offering, as an appropriate identifier of permissible underwriting.[418] Another commenter suggested that the agencies permit banking entities to set limits based on the absolute value of profits and losses in the case of an underwriting desk.[419]

Prompt Notifications

As discussed above, the proposal would have required a banking entity to promptly report to the appropriate agency when a trading desk exceeds or increases the internal limits it sets to avail itself of the RENTD presumption with respect to the exemptions for underwriting and market making-related activities.[420] With two exceptions,[421] commenters strongly opposed the proposal's requirement that banking entities promptly report limit breaches.[422] For example, many of these commenters stated that the notifications would be impractical and burdensome to banking entities[423] and would not enhance the oversight capabilities of the agencies because the information is already otherwise available through ordinary supervisory processes,[424] including the internal limits and usage metric.[425] Two commenters asserted that the notices would provide little insight into how risk is managed.[426] Some commenters expressed concern that complying with the requirement would be particularly challenging for banking entities with parents that are FBOs because these banking entities lack on-site examiners to receive notifications.[427] A few commenters claimed that the prompt notification requirement provides incentives for banking entities to set their limits so high that they have fewer breaches and changes to limits.[428] Commenters also noted that, when risk limits are appropriately calibrated, breaches are not uncommon, and notifying the agencies of each breach could overwhelm the agencies.[429] Another commenter argued that the prompt notification may chill traders' willingness to request changes to limits where it would otherwise be appropriate to accommodate legitimate customer demand.[430]

As an alternative to the prompt notification requirement, many commenters suggested that the agencies require banking entities to make detailed records of limit changes and breaches.[431] Other commenters suggested that the agencies rely on existing supervisory processes to monitor limit breaches and increases,[432] including the internal limits and usage metric.[433]

Rebutting the Presumption

As discussed above, under the proposal, the RENTD presumption could have been rebutted by the appropriate agency if the agency determined, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based

on the trading desk's RENTD on an ongoing basis.[434]

A few commenters discussed the rebuttal process. For example, one commenter requested that the agencies specify the procedures for an agency to rebut the presumption of compliance.[435] Another commenter recommended that the agencies adopt a consistent procedure for challenging the presumptions in the rule.[436] Another commenter stated that the proposal would only allow the agencies to challenge the risk limit approval and exception process, not the nexus between RENTD and the limits themselves.[437]

d. Final Presumption of Compliance With the Statutory RENTD Requirement

The agencies are adopting the presumption of compliance with the RENTD requirement for both the exemptions for underwriting and market making-related activities largely as proposed, but with modifications intended to be responsive to commenters' concerns.[438]

The agencies are mindful of the concerns raised by commenters regarding the general approach of relying on a banking entity's internal limits to satisfy the statutory RENTD requirement.[439] With respect to the comments described above that the presumption would not be consistent with the statute, the agencies note that the statute permits underwriting and market making-related activities to the extent that such activities are designed not to exceed RENTD. Accordingly, under the final rule the presumption will be available to each trading desk that establishes, implements, maintains, and enforces internal limits that are designed not to exceed RENTD.[440] In addition, with respect to the commenter who expressed concern that the presumption would undermine safety and soundness due to a perceived lack of general scrutiny over banking entity-developed limits, the agencies note that these internal limits will be subject to supervisory review and oversight, which constrains banking entities' ability to set their limits too high. Further, the agencies may review such limits to assess whether or not those limits are consistent with the statutory RENTD standard. This allows the supervisors and examiners to look to the articulation and use of limits to distinguish between permissible and impermissible proprietary trading. The agencies believe that the presumption of compliance, along with the other requirements of the final rule's exemptions for underwriting and market making-related activities, create a framework that will allow banking entities and the agencies to determine whether a trading activity has been designed not to exceed RENTD.

Further, the agencies are concerned that compliance with the 2013 rule's exemptions for underwriting and market making-related activities may be unnecessarily complex and costly to achieve the intended goal of compliance with these exemptions. For example, as noted in the proposal, a number of banking entities have indicated that even after conducting a number of complex and intensive analyses to meet the ''demonstrable analysis'' requirements for the exemption for market making-related activities, they still may be unable to gain comfort that their bona fide market making-related activity meets the factors.[441] Further, the absence of clear, bright-line standards for assessing compliance with the statutory RENTD standard may be unnecessarily constraining underwriting and market making, two critical functions to the health and well-being of financial markets in the United States.

The agencies note commenters' concerns regarding the removal of ''demonstrable analysis'' requirement will make it harder for agencies to rebut the presumption of compliance with the RENTD requirement or determine when banking entities have not properly set their RENTD limits. The agencies believe, however, that requiring a banking entity's internal limits to be based on RENTD as a requirement for utilizing the presumption of compliance should help to simplify compliance with, and oversight of, that statutory standard by placing the focus on how those limits are established, maintained, implemented, and enforced.

Accordingly, under the rule, a banking entity will be presumed to meet the RENTD requirements in § ____.4 (a)(2)(ii)(A) or § ____.4(b)(2)(ii) with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits for the relevant trading desk as described in the final rule.[442] With respect to underwriting activities, the presumption will be available to each trading desk that establishes, implements, maintains, and enforces internal limits that are designed not to exceed RENTD, based on the nature and amount of the trading desk's underwriting activities, on the:

(1) Amount, types, and risk of its underwriting position;

(2) Level of exposures to relevant risk factors arising from its underwriting position; and

(3) Period of time a security may be held.[443]

With respect to market making-related activities, the presumption will be available to each trading desk that establishes, implements, maintains, and enforces risk and position limits that are designed not to exceed RENTD, based on the nature and amount of the trading desk's market making-related activities, that address the:

(1) Amount, types, and risks of its market-maker positions;

(2) Amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes;

(3) Level of exposures to relevant risk factors arising from its financial exposure; and

(4) Period of time a financial instrument may be held.[444]

---

[434] *See* proposed rule § ____.4(a)(8)(iv); proposed rule § ____.4(b)(6)(iv).

[435] *See* MBA.

[436] *See* IIB.

[437] *See* Better Markets.

[438] In addition to the changes described in this section, the presumption of compliance has been moved into a new paragraph (c) in § ____.4, as opposed to including separate provisions under each of the two relevant exemptions. That change was intended solely for clarity and to avoid any unnecessary duplication in light of the fact that the process for complying with the presumption of compliance is identical for both exemptions. New paragraph (c) does, however, recognize that the limits banking entities will be required to implement, maintain, and enforce will differ as between the exemptions for underwriting and market making-related activities. *See* final rule §§ ____.4(c)(2)(A) and ____.4(c)(2)(B).

[439] As noted above, this includes commenters who argue that such amendments will undermine the operation of the 2013 rule, lead to increased risk taking among banking entities, and conflict with the statutory requirements in section 13(d)(1)(B) of the BHC Act. *See supra* notes 28, 36–41 and accompanying text.

[440] For consistency with the final rule's RENTD requirement, the sub-heading for § ____.4(c)(1) has been changed from ''risk limits'' to ''limits.''

[441] 83 FR at 33459.

[442] *See* final rule, § ____.4(c)(1)(i).

[443] *See* final rule § ____.4(c)(1)(ii)(A). The language in this paragraph of the rule has been modified slightly from the proposal to clarify that such limits should take into account the liquidity, maturity, and depth of the market for the relevant types of financial instruments. As this language comes directly from the RENTD requirement in § ____.4 (a)(2)(ii)(A), the agencies do not view this as a substantive change. Rather, the agencies believe that it is important to emphasize in the rule text that the limit used to satisfy the presumption of compliance for one type of financial instrument will not necessarily be the same for other types of financial instruments and that the particular characteristics of the relevant market should be taken into account throughout the process of setting these limits.

[444] *See* final rule § ____.4(c)(1)(ii)(B). For the reasons described in connection with the limits required as satisfy the presumption of compliance in connection with the underwriting exemption, the

Continued

Some commenters also noted that the agencies should not take a ''one-size-fits-all'' approach to the limits that must be established to satisfy the presumption of compliance with RENTD on the basis that not all of the proposed limits may be applicable to every type of financial instrument, particularly derivatives.[445] In response to these commenters, the agencies have modified the rule text to clarify that the limits required to be established by a banking entity in order to satisfy the presumption of compliance must address certain items. The agencies recognize that certain of the enumerated items, which are unchanged from the proposal, may be more easily applied for desks that engage in market-making in securities rather than derivatives, and emphasize that section ____.4(b), both as currently in effect and as amended, is intended to provide banking entities with the flexibility to determine appropriate limits for market making-related activities that are designed not to exceed RENTD, taking into account the liquidity, maturity, and depth of the market for the relevant types of financial instruments.

With respect to derivatives, certain of the enumerated items may not be effective for designing market making-related activities not to exceed RENTD, which is ultimately the primary purpose of adopting a presumption of compliance based on the establishment and use of internal limits.[446] Under those circumstances, the agencies acknowledge that it may be appropriate for banking entities to establish limits based on specific conditions that would need to be satisfied in order to utilize the presumption of compliance, rather than a fixed number of market-maker positions.[447]

For example, for a desk that engages in market making-related activities only with respect to derivatives (or derivatives and non-financial instruments), the requirement to establish, implement, maintain, and enforce limits designed not to exceed RENTD could be satisfied to the extent the banking entity establishes limits on the market making desk's level of exposures to relevant risk factors arising from its financial exposure and such limits are designed not to exceed RENTD (including derivatives positions related to a request from a client, customer, or counterparty), based on the nature and amount of the trading desk's market making-related activities. Such limits would be consistent with the underlying purpose of the exemption for market making-related activities, which is to implement the restriction on a banking entity's proprietary trading activities while still allowing market makers to provide intermediation and liquidity services necessary to the functioning of our financial markets.

Consistent with the proposal, the limits used to satisfy the presumption of compliance under the final rule will be subject to supervisory review and oversight by the applicable agency on an ongoing basis.[448] Moreover, the final rule provides that the presumption of compliance may be rebutted by the applicable agency if such agency determines, taking into account the liquidity, maturity, and depth of the market for the relevant types of financial instruments and based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not designed not to exceed RENTD.[449] In a modification from the proposed rule, the final rule contains additional language that specifies that the agencies will take into account the liquidity, maturity, and depth of the market for the relevant types of financial instruments when determining whether to rebut the presumption of compliance. This change is intended to provide additional clarity regarding the factors the agencies will consider when making this determination. In response to commenters' concerns about the rebuttal process, the final rule specifies that any such rebuttal of the presumption must be made in accordance with the notice and response procedures in subpart D of the rule.[450]

The agencies are, however, persuaded by the arguments raised by some commenters with respect to the proposed requirement that a banking entity promptly report to the appropriate agency when a trading desk exceeds or increases its internal limits to avail itself of the RENTD presumption with respect to the exemptions for underwriting and market making-related activity.[451] The agencies recognize that limits that are set so high as to never be breached are not necessarily meaningful limits. Thus, breaches of appropriately set limits may occur with a frequency that does not justify notifying the agencies for every single breach. The agencies recognize that the burdens associated with preparing and reporting such information may not be justified in light of the potential benefits of such requirement.

Accordingly, the final rule instead requires banking entities to maintain and make available to the applicable agency, upon request, records regarding (1) any limit that is exceeded and (2) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the agency.[452] Moreover, when a limit is breached or increased, the presumption of compliance with RENTD will continue to be available so long as the banking entity: (1) Takes action as promptly as possible after a breach to bring the trading desk into compliance; and

(2) follows established written authorization procedures, including escalation procedures that require review and approval of any trade that exceeds a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval.[453] The agencies believe that this requirement will provide the agencies with sufficient information to determine whether a banking entity's existing limits are appropriately calibrated to comply with the RENTD requirement for that particular financial instrument.[454]

language in this paragraph has been modified slightly from the proposal to clarify that such limits must take into account the liquidity, maturity, and depth of the market for the relevant types of financial instruments. *See id.*

[445] *See e.g.,* FSF, SIFMA.

[446] As previously noted, the final rule also replaces the existing definition of ''market maker-inventory'' with a definition of ''market-maker positions.'' This change was intended to reflect the fact that requiring banking entities seeking to rely on the presumption of compliance with the RENTD requirement to have limits on market maker-inventory is generally unworkable in the context of derivatives. *See infra* note 458 and accompanying text.

[447] The agencies note that this discussion does not encompass or impact the CFTC's or SEC's treatment of market-making in derivatives for purposes other than section 13 of the BHC Act and the rule.

[448] *See* final rule § ____.4(c)(2). The supervisory review provision in the proposed rule stated that ''any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.'' Sections______ .4(c)(1)(i)–(ii) of the final rule clearly stipulate that such limits must be designed not to exceed the reasonably expected near term demand of clients, customers, or counterparties. To avoid redundancy, this language has been omitted from § ____.4(c)(2) in the final rule.

[449] *See* final rule § ____.4(c)(4).

[450] *See infra* notes 655–58 and accompanying text (discussion of the notice and response procedures in § ____.20(i)).

[451] *See* proposed rule §§ ____.4(a)(8)(iii) and ____.4(b)(6)(iii). *See also supra* note 387 and accompanying text.

[452] *See* final rule § ____.4(c)(3)(i).

[453] *See* final rule § ____.4(c)(3)(i).

[454] The agencies note that the final rule requires that banking entities with significant trading assets

e. Additional Changes to the Final Rule's Underwriting and Market Making-Related Activities Exemptions

In addition to the changes described above, the final rule's exemptions for underwriting and market making-related activities contain several other conforming and clarifying changes. Consistent with the proposed rule, the structure of § ____.4(a)(ii) in the final rule has been modified to clarify that the applicable paragraph contains two separate and distinct requirements.[455] In addition, several definitions used in the final rule's exemptions for underwriting and market making-related activities have also been modified. Specifically, the phrase ''paragraph (b)'' has been replaced with ''this section'' in the definition of ''underwriting position'' because the defined term is used in several places.[456] The definition of ''financial exposure'' has been similarly modified.[457] Finally, the final rule, however, replaces the existing definition of ''market maker-inventory'' with a definition for ''market-maker positions'' to correspond with the language in § ____.4(c)(ii)(B)(1), which is the only place such definition is used.[458]

f. Compliance Program and Other Requirements for Underwriting and Market Making-Related Activities

2013 Rule Compliance Program Requirements

The underwriting exemption in § ____.4(a) of the 2013 rule requires a banking entity to establish, implement, maintain, and enforce an internal compliance program, as required by subpart D, that is reasonably designed to ensure compliance with the requirements of the exemption. Such compliance program is required to include reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing: (i) The products, instruments, or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities; (ii) certain limits for each trading desk, based on the nature and amount of the trading desk's underwriting activities, including the reasonably expected near term demands of clients, customers, or counterparties;[459] (iii) internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and (iv) authorization procedures, including escalation procedures that require review and approval of any trade that would exceed one or more of a trading desk's limits, demonstrable analysis of the basis for any temporary or permanent increase to one or more of a trading desk's limits, and independent review (*i.e.,* by risk managers and compliance officers at the appropriate level independent of the trading desk) of such demonstrable analysis and approval.

The exemption for market making-related activities in the 2013 rule contains similar requirements. Specifically, § ____.4(b) of the 2013 rule requires that a banking entity establish, implement, maintain, and enforce an internal compliance program, as required by subpart D, that is reasonably designed to ensure compliance with the requirements of the exemption. Such a compliance program is required to include reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and addressing: (i) The financial instruments each trading desk stands ready to purchase and sell in accordance with the exemption for market making-related activities; (ii) the actions the trading desk will take to demonstrably reduce or otherwise significantly mitigate the risks of its financial exposure consistent with the limits required under paragraph (b)(2)(iii)(C), and the products, instruments, and exposures each trading desk may use for risk management purposes; the techniques and strategies each trading desk may use to manage the risks of its market making-related activities and inventory; and the process, strategies, and personnel responsible for ensuring that the actions taken by the trading desk to mitigate these risks are and continue to be effective; (iii) the limits for each trading desk, based on the nature and amount of the trading desk's market making-related activities, including the reasonably expected near term demands of clients, customers, or counterparties;[460] (iv) internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and (v) authorization procedures, including escalation procedures that require review and approval of any trade that would exceed one or more of a trading desk's limits, demonstrable analysis of the basis for any temporary or permanent increase to one or more of a trading desk's limits, and independent review (*i.e.,* by risk managers and compliance officers at the appropriate level independent of the trading desk) of such demonstrable analysis and approval.

Proposed Compliance Program Requirement

Feedback from market participants and agency oversight have indicated that the compliance program requirements of the existing exemptions for underwriting and market making-related activities may be unduly complex and burdensome for banking entities with smaller and less active trading activities. In the proposed rule, the agencies proposed a tiered approach to such compliance program requirements, to make these requirements commensurate with the size, scope, and complexity of the relevant banking entity's trading activities and business structure. Under the proposed rule, a banking entity with significant trading assets and liabilities would continue to be required to establish, implement, maintain, and enforce a comprehensive internal compliance program as a condition for relying on the exemptions for underwriting and market making-related activities. However, the agencies proposed to eliminate such compliance program requirements for banking entities that have moderate or limited trading assets and liabilities.[461]

Comments on the Proposed Compliance Program Requirement

Some commenters did not support the removal of the underwriting or market making-specific compliance program

and liabilities must record and report the quantitative measurements contained in the Appendix to the final rule. *See infra* Subpart E—Metrics: Appendix to Part [•]—Reporting and Recordkeeping Requirements. The agencies believe that the risk and position limits metric will also help banking entities and the agencies monitor the underwriting and market making-related activities of banking entities with significant trading assets and liabilities.

455 Unlike the 2013 rule, § ____.4(a)(ii) in the final rule contains subparagraphs (A) and (B).

456 *See* § ____.4(a)(6).

457 *See* § ____.4(b)(4).

458 *See* § ____.4(c)(ii)(B)(1). With respect to the exemption for market making-related activities, the rebuttable presumption of compliance for the RENTD requirement in the final rule requires, among other things, that a trading desk establish, implement, and enforce limits on the amounts, types, and risks of its market-maker positions.

459 These factors include the: (1) Amount, types, and risk of its underwriting position; (2) level of exposures to relevant risk factors arising from its underwriting position; and (3) period of time a security may be held.

460 Specifically, such limits include the: (1) Amount, types, and risks of its market-maker inventory; (2) amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes; (3) the level of exposures to relevant risk factors arising from its financial exposure; and (4) period of time a financial instrument may be held.

461 Under the 2013 rule, the compliance program requirement in § ____.4(a)(2)(iii) is part of the compliance program required by subpart D but is specifically used for purposes of complying with the exemption for underwriting activity.

requirements for banking entities with limited and moderate trading assets and liabilities under the proposal. For example, one commenter urged the agencies to require all banking entities to establish, implement, maintain, and enforce such compliance program, independent of any presumption of compliance.[462] This commenter indicated that there are ''exceedingly low incremental costs'' associated with most elements of the RENTD compliance and controls framework for the exemptions for underwriting and market making-related activities, even for those banking entities with limited or moderate trading assets and liabilities.[463] In the commenter's view, minimal incremental costs support the retention of such requirements, which are further justified by the increased stability of financial institutions and financial markets as a result of the 2013 rule.[464]

Further, that same commenter asserted that the compliance requirements under the 2013 rule permit too much discretion for banking entities to implement policies, procedures, and controls, noting that judgments on the effectiveness of implemented controls depend on the methodologies used by banking entities' testing functions, and argued that the agencies should consider additional capital and activities-based requirements specifically tied to the reported inventory of trading assets, taking into account the total size of those trading assets, the overall capital position of the financial institution, and the average holding period or aging of trading assets, which may indicate that inventories are unrelated to underwriting and market making activities.[465] Similarly, another commenter indicated that a tiered compliance approach would not be appropriate because it considered the proposed categorization of entities in terms of trading assets and liabilities to be flawed.[466]

Other commenters supported the revisions under the proposed rule to apply the market making-related activities' compliance program requirements only to those banking entities with significant trading assets and liabilities. For example, one commenter expressed concern that the market making-related activities' compliance program requirements under the 2013 rule have contributed to decreased market making activities with, and increased costs for, banking entities' commercial end-user counterparties.[467] This commenter indicated that applying the market making-related activities' compliance program requirements only to banking entities with significant trading assets and liabilities would allow banking entities to develop more efficient compliance and liquidity risk management programs, which would ultimately reduce transaction costs for commercial end users.[468]

Another commenter expressed the view that the proposed approach of applying the compliance program requirements under the exemptions for underwriting and market making-related activities only to those banking entities with significant trading assets and liabilities was an appropriate means of reducing the regulatory burdens on banks with limited or moderate trading and underwriting exposures.[469] That commenter noted that such approach would continue to allow for the appropriate monitoring of these activities to ensure compliance with the provisions of the 2013 rule.[470]

Final Compliance Program Requirement

The agencies believe that the compliance program requirements that apply specifically to the exemptions for underwriting and market making-related activities play an important role in facilitating and monitoring a banking entity's compliance with the requirements of those exemptions. However, the agencies also believe that those requirements can be appropriately tailored to the nature of the underwriting and market making activities conducted by each banking entity. It also is important to recognize that the removal of such compliance program requirements for banking entities that do not have significant trading assets and liabilities would not relieve those banking entities of the obligation to comply with the other requirements of the exemptions for underwriting and market making-related activities, including RENTD requirements, under the final rule.

Accordingly, and after consideration of the comments, the agencies continue to believe that removing the § ____.4 compliance program requirements for banking entities that do not have significant trading assets and liabilities as a condition to engaging in permitted underwriting and market making-related activities should provide these banking entities with additional flexibility to tailor their compliance programs in a way that takes into account the risk profile and relevant trading activities of each particular trading desk.

The agencies recognize that banking entities that do not have significant trading assets and liabilities may incur costs to establish, implement, maintain, and enforce the compliance program requirements applicable to permitted underwriting activities under the 2013 rule. As the trading activities of banking entities that do not have significant trading activities comprise approximately seven percent of the total U.S. trading activity subject to the Volcker Rule, the agencies believe the costs of the compliance program requirement would be disproportionate to the banking entity's trading activity and the risk posed to U.S. financial stability. Accordingly, eliminating the § ____.4 compliance program requirements for permitted underwriting and market making-related activities conducted by banking entities that do not have significant trading assets and liabilities may reduce compliance costs without materially impacting conformance with the objectives set forth in section 13 of the BHC Act. Applying these specific compliance requirements only to banking entities with significant trading assets and liabilities also is consistent with the modifications to the general compliance program requirements for these banking entities under § ____.20 of the final rule, as discussed below.

Accordingly, § ____.4(a)(2)(iii) of the final rule will require banking entities with significant trading assets and liabilities, as a condition to complying with the underwriting exemption, to establish and implement, maintain, and enforce an internal compliance program required by subpart D that is reasonably designed to ensure the banking entity's compliance with the requirements of the exemption, including reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing:

(A) The products, instruments or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities;

(B) Limits for each trading desk, in accordance with § ____.4(a)(2)(ii)(A);[471]

[462] *See* Better Markets.

[463] *Id.*

[464] *Id.*

[465] *Id.*

[466] *See* Data Boiler.

[467] *See* Coalition of Derivatives End Users.

[468] *Id.*

[469] *See* CFA.

[470] *Id.*

[471] Final rule § ____.4(a)(2)(ii)(A) requires that the amount and type of the securities in the trading desk's underwriting position are designed not to exceed RENTD, taking into account the liquidity, maturity, and depth of the market for the relevant type of security; and (B) that reasonable efforts are made to sell or otherwise reduce the underwriting

(C) Written authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval; and

(D) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits.

With respect to the exemption for market making-related activities, § ____.4(a)(b)(iii) of the final rule will require banking entities with significant trading assets and liabilities to establish and implement, maintain, and enforce an internal compliance program required by subpart D that is reasonably designed to ensure the banking entity's compliance with the requirements of the exemption, including reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing:

(A) The financial instruments each trading desk stands ready to purchase and sell in accordance with § ____.4(b)(2)(i);[472]

(B) The actions the trading desk will take to demonstrably reduce or otherwise significantly mitigate promptly the risks of its financial exposure consistent with the limits required under § ____.4 (b)(2)(iii)(C); the products, instruments, and exposures each trading desk may use for risk management purposes; the techniques and strategies each trading desk may use to manage the risks of its market making-related activities and positions; and the process, strategies, and personnel responsible for ensuring that the actions taken by the trading desk to mitigate these risks are and continue to be effective;

(C) Limits for each trading desk, in accordance with § ____.4(b)(2)(ii);[473]

(D) Written authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval; and

(E) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits.

The agencies are clarifying in the final rule that the authorization procedures for banking entities with significant trading assets and liabilities of proposed § ____.4(a)(2)(iii)(D) and § ____.4(b)(2)(iii)(E) are to be in writing pursuant to § ____.4(a)(2)(iii)(C) and § ____.4(b)(2)(iii)(D). Requiring that these authorization procedures are written provides a basis for which banking entities and supervisors can review for compliance with the underwriting and market making exemption compliance requirements.

Sections ____.4(a)(2)(iii) (which sets forth the compliance program requirements for the underwriting exemption) and § ____.4(b)(2)(iii) (which sets forth the compliance program requirements for the exemptions for market making-related activities) further provide that a banking entity with significant trading assets and liabilities may satisfy the requirements pertaining to limits and written authorization procedures by complying with the requirements pursuant to the presumption of compliance with the statutory RENTD requirement in § ____.4(c).[474] As such, § ____.4(c)(1) provides for a rebuttable presumption that a banking entity's purchase or sale of a financial instrument complies with the RENTD requirements in § ____.4(a)(2)(ii)(A) and § ____.4(b)(2)(ii) if the relevant trading desk establishes, implements, maintains, and enforces internal limits that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, taking into account the liquidity, maturity, and depth of the market for the relevant type of security. In taking this approach, the agencies recognize that requiring a banking entity to establish separate limits in accordance with the statutory RENTD requirement would be unnecessary and may reduce the benefit of relying on internal limits set pursuant to § ____.4(c)(1).

Additionally, in the case of a banking entity with significant trading assets and liabilities, the relevant exemption compliance requirements pertaining to written authorization procedures in § ____.4(a)(2)(iii)(C) are not required if the criteria in § ____.4(c) are satisfied. Without the requirement to establish limits pursuant to § ____.4(a)(iii)(B), such a requirement for written authorization procedures would be unnecessary. Further, because § ____.4(c)(3)(ii)(*2*) contains written authorization procedures, also requiring written authorization procedures in § ____.4(a)(2)(iii)(C) would be duplicative.

These revisions clarify that banking entities with significant trading assets and liabilities that establish limits and written authorization procedures pursuant to the rebuttable presumption of compliance do not have to establish a second set of limits and written authorization procedures pursuant to the compliance program requirements of the underwriting or market making exemptions. Regardless of whether a banking entity with significant trading assets and liabilities relies on the presumption of compliance in § ____.4(c), every banking entity with significant trading assets and liabilities is required to maintain limits and written authorization procedures for purposes of complying with the exemption for permitted underwriting or market making-related activities under § ____.4.

The agencies are removing the proposed rule's requirement for a banking entity with significant trading assets and liabilities that, to the extent that any limit identified pursuant to § ____.4(b)(2)(iii)(C) of the proposed rule is exceeded, the trading desk takes action to bring the trading desk into compliance with the limits as promptly as possible after the limit is exceeded. Instead, this requirement is being moved to § ____.4(c), the rebuttable presumption of compliance for banking entities that establish internal limits pursuant to § ____.4(c)(1). Such requirements would be redundant for a banking entity with significant trading assets and liabilities that is required, on an ongoing basis, to ensure that its trading desk's market making activities are designed not to exceed RENTD while also establishing limits designed not to exceed RENTD.[475] In addition, the written authorization procedures[476]

position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security.

[472] Final rule § ____.4(b)(2)(i) requires that the trading desk that establishes and manages the financial exposure routinely stands ready to purchase and sell one or more types of financial instruments related to its financial exposure and is willing and available to quote, purchase and sell, or otherwise enter into long and short positions in those types of financial instruments for its own account, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the relevant types of financial instruments.

[473] Final rule § ____.4(b)(2)(ii) requires that the trading desk's market making-related activities are designed not to exceed, on an ongoing basis, RENTD, taking into account the liquidity, maturity, and depth of the market for the relevant type of security.

[474] *See supra* section IV.B.2.d (discussing the requirements in the final rule associated with the presumption of compliance with the statutory RENTD requirement).

[475] *See* final rule § ____.4(b)(2)(iii)(C).

[476] *See* final rule § ____.4(b)(2)(iii)(D).

require internal compliance processes to handle such limit breaches.

g. Other Comments

Finally, some commenters recommended changes to certain aspects of the existing exemptions for underwriting and market making-related activities in the 2013 rule that were not specifically proposed. For example, one commenter suggested that the agencies eliminate the limitations on treating banking entities with greater than $50 billion in trading assets and liabilities as clients, customers, or counterparties.[477] As stated in the 2013 rule, the agencies believe that removing this limitation could make it difficult to meaningfully distinguish between permitted market making-related activity and impermissible proprietary trading, and allow a trading desk to maintain an outsized inventory and to justify such inventory levels as being tangentially related to expected market-wide demand.[478] The agencies also believe that banking entities engaged in substantial trading activity do not typically act as customers to other market makers.[479] As a result, the agencies have retained the 2013 rule's definition of client, customer, or counterparty. Another commenter suggested broadening the scope of the exemption for underwriting activities to encompass any activity that assists persons or entities in accessing the capital markets or raising capital.[480] The agencies believe the final rule's changes provide additional clarity while maintaining consistency with statutory objectives. Accordingly, after consideration of these comments, the agencies have decided not to make any changes to the exemptions for underwriting or market making-related activities other than those discussed above.

h. Market Making Hedging

As noted in the proposal, during implementation of the 2013 rule, the agencies received a number of inquiries regarding the circumstances under which banking entities could elect to comply with the market making risk management provisions permitted in § ____.4(b) or alternatively the risk-mitigating hedging requirements under § ____.5. These inquiries generally related to whether a trading desk could treat an affiliated trading desk as a client, customer, or counterparty for purposes of the exemption market making-related activities' RENTD requirement; and whether, and under what circumstances, one trading desk could undertake market making risk management activities for one or more other trading desks.[481]

Each trading desk engaging in a transaction with an affiliated trading desk that meets the definition of proprietary trading must rely on an exemption or exclusion in order for the transaction to be permissible. As noted in the proposal, in one example presented to the agencies, one trading desk of a banking entity may make a market in a certain financial instrument (*e.g.,* interest rate swaps), and then transfer some of the risk of that instrument (*e.g.,* foreign exchange (FX) risk) to a second trading desk (*e.g.,* an FX swaps desk) that may or may not separately engage in market making-related activity. In the proposal, the agencies requested comment as to whether, in such a scenario, the desk taking the risk (in the preceding example, the FX swaps desk) and the market making desk (in the preceding example, the interest rate desk) should be permitted to treat each other as a client, customer, or counterparty for purposes of establishing internal limits or RENTD levels under the exemption for market making-related activities.[482]

The agencies also requested comment as to whether each desk should be permitted to treat swaps executed between the desks as permitted market making-related activities of one or both desks if the swap does not cause the relevant desk to exceed its applicable limits and if the swap is entered into and maintained in accordance with the compliance requirements applicable to the desk, without treating the affiliated desk as a client, customer, or counterparty for purposes of establishing or increasing its limits. This approach was intended to maintain appropriate limits on proprietary trading by not permitting an expansion of a trading desk's market making limits based on internal transactions. At the same time, this approach was intended to permit efficient internal risk management strategies within the limits established for each desk.[483]

The agencies also requested comment on the circumstances in which an organizational unit of an affiliate (affiliated unit) of a trading desk engaged in market making-related activities in compliance with § ____.4(b) (market making desk) would be permitted to enter into a transaction with the market making desk in reliance on the market making desk's risk management policies and procedures. In this scenario, to effect such reliance the market making desk would direct the affiliated unit to execute a risk-mitigating transaction on the market making desk's behalf. If the affiliated unit did not independently satisfy the requirements of the exemption for market making-related activities with respect to the transaction, it would be permitted to rely on the exemption for market making-related activities available to the market making desk for the transaction if: (i) The affiliated unit acts in accordance with the market making desk's risk management policies and procedures; and (ii) the resulting risk-mitigating position is attributed to the market making desk's financial exposure (and not the affiliated unit's financial exposure) and is included in the market making desk's daily profit and loss calculation. If the affiliated unit establishes a risk-mitigating position for the market making desk on its own accord (*i.e.,* not at the direction of the market making desk) or if the risk-mitigating position is included in the affiliated unit's financial exposure or daily profit and loss calculation, then the affiliated unit may still be able to comply with the requirements of the risk-mitigating hedging exemption pursuant to § ____.5 for such activity.[484]

The commenters were generally in favor of permitting affiliated trading desks to treat each other as a client, customer, or counterparty for the purposes of establishing risk limits or RENTD levels under the exemption for market making-related activities,[485] particularly for banking entities that service customers in different jurisdictions. One commenter, however, did not support this approach, and expressed that it would be difficult to validate banking entities' RENTD limits if affiliates could be considered as a client, customer, or counterparty.[486]

One commenter argued that affiliated trading desks with different mandates should be able to treat each other as a client, customer, or counterparty as long as each desk stays within its limits, because such an approach would allow banking entities to take an enterprise-wide view of risk management.[487]

Two commenters explained that, to increase efficiencies, certain internationally active banking entities employ a ''hub-and-spoke'' model, where trading desks at local entities

[477] *See* CCMC.

[486] *See* Data Boiler.

[487] *See* IIB.

(spoke) enter into transactions with major affiliates (hub) that manage the risks of, and source trading positions for, the local entities.[488] One of these commenters expressed that these trading desks have trouble demonstrating they are indeed market making desks without intra-entity and inter-affiliate transactions being treated as transactions with a client, customer, or counterparty.[489] The other commenter expressed that, under the hub-and-spoke model, treating the ''spoke'' trading desk as a client, customer, or counterparty, would allow the hub desk to look through to the customer of the local entity since the hub is acting as the ultimate market maker.[490]

After consideration of comments, the agencies continue to recognize that, under certain circumstances, a trading desk may undertake market making risk management activities for one or more affiliated trading desks [491] and trading desks may rely on the exemption for market making-related activities for its transactions with affiliated trading desks. The agencies, however, are declining to permit banking entities to treat affiliated trading desks as ''clients, customers, or counterparties'' [492] for the purposes of determining a trading desk's RENTD pursuant to § ____.4(b)(2)(ii) of the exemption for market making-related activities.

The agencies believe that, under the exemption for market making-related activities, each trading desk must be able to independently tie its activities to the RENTD of external customers that the trading desk services. Allowing a desk to treat affiliated trading desks as customers for purposes of RENTD would allow the desk to accumulate financial instruments if it has a reason to believe that other internal desks will be interested in acquiring the positions in the near term. Those other desks could then acquire the positions from the first desk at a later time when they have a reasonable expectation of near term demand from external customers. The agencies also believe that generally allowing a desk to treat other internal desks as customers for purposes of RENTD could impede monitoring of market making-related activity and detection of impermissible proprietary trading since a banking entity could aggregate in a single trading desk the RENTD of trading desks that engage in multiple different trading strategies and aggregate a larger volume of trading activities.[493]

With respect to the arguments raised by these commenters that permitting this treatment would facilitate efficient risk management,[494] the agencies believe that the amendments to the risk-mitigating hedging exemption in the final rule [495] and the amendments to the liquidity management exemption in the final rule [496] will provide banking entities with additional flexibility to manage risks more efficiently than the 2013 rule.

Further, the agencies note that while affiliated trading desks may not consider each other clients, customers, or counterparties, transactions between affiliated trading desks may be permitted under the exemption for market making-related activities in certain circumstances that do not require the expansion of a trading desk's market making limits based on internal transactions. Returning to the example from the proposal and described above [497] concerning an interest rate swaps desk transferring some of the risk of a financial instrument to an affiliated FX swaps desk, if the FX swaps desk acts as a market maker in FX swaps, the FX swaps desk may be able to rely on the exemption for market making-related activities for its transactions with the interest rate swaps desk if those transactions are consistent with the requirements of the exemption for market making-related activities, including the FX swaps desk's RENTD.[498] Further, if the FX swaps desk does not independently satisfy the requirements of the exemption for market making-related activities with respect to the transaction, it would be permitted to rely on the exemption for market making-related activities available to the market making desk for the transaction under certain conditions. If the banking entity has significant trading assets and liabilities, the FX swaps desk would be permitted to rely on the exemption for market making-related activities if: (i) The FX swaps desk acts in accordance with the interest rate swaps desk's risk management policies and procedures established in accordance with § ____.4(b)(2)(iii) and (ii) the resulting risk-mitigating position is attributed to the interest rate swaps desk's financial exposure (and not the FX swaps desk's financial exposure) and is included in the interest rate swaps desk's daily profit and loss calculation. If the banking entity does not have significant trading assets and liabilities, the FX swaps desk would be permitted to rely on the exemption for market making-related activities if the resulting risk-mitigating position is attributed to the interest rate swaps desk's financial exposure (and not the FX swaps desk's financial exposure) and is included in the interest rate swaps desk's daily profit and loss calculation. If the FX swaps desk cannot independently satisfy the requirements of the exemption for market making-related activities with respect to its transactions with the interest rate swaps desk, the risk-mitigating hedging exemption would be available, provided the conditions of that exemption are met.

3. Section ____.5: Permitted Risk-Mitigating Hedging Activities

a. Section ____.5 of the 2013 Rule

Section 13(d)(1)(C) of the BHC Act provides an exemption from the prohibition on proprietary trading for risk-mitigating hedging activities that are designed to reduce the specific risks to a banking entity in connection with and related to individual or aggregated positions, contracts, or other holdings. Section ____.5 of the 2013 rule implements section 13(d)(1)(C).

Section ____.5 of the 2013 rule provides a multi-faceted approach to implementing the hedging exemption to ensure that hedging activity is designed to be risk-reducing and does not mask prohibited proprietary trading. Under the 2013 rule, risk-mitigating hedging activities must comply with certain conditions for those activities to qualify for the exemption. Generally, a banking entity relying on the hedging exemption must have in place an appropriate internal compliance program that meets specific requirements, including the requirement to conduct certain correlation analysis, to support its compliance with the terms of the exemption, and the compensation arrangements of persons performing risk-mitigating hedging activities must be designed not to reward or incentivize

[488] *See* HSBC and JBA.

[489] *See* JBA.

[490] *See* HSBC.

[491] *See* 79 FR at 5594.

[492] § ____.4(b)(3).

[493] *See* 79 FR at 5590.

[494] *See* HSBC; JBA; and IIB.

[495] The agencies are streamlining several aspects of the risk-mitigating hedging exemption for banking entities with and without significant trading assets and liabilities. *See* final rule § ____.5; *See also* section IV.B.3, *infra.*

[496] The agencies have expanded the types of financial instruments eligible for the exclusion to include for exchange forwards and foreign exchange swaps. *See* final rule § ____.3(e); *See also* section IV.B.1.b.i, *supra.*

[497] *See* Part IV.B.2.h, *supra; see also* 83 FR 33463.

[498] The interest rate market making desk can rely on the exemption for market making-related activities for the FX swap it enters into with the FX swaps desk provided the interest rate market making desk enters into the FX swap to hedge its market making-related position and otherwise complies with the requirements of the exemption for market making-related activities.

prohibited proprietary trading.[499] In addition, the hedging activity itself must meet specified conditions. For example, at inception, the hedge must be designed to reduce or otherwise significantly mitigate, and must demonstrably reduce or otherwise significantly mitigate, one or more specific, identifiable risks arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, and the activity must not give rise to any significant new or additional risk that is not itself contemporaneously hedged.[500] Finally, § ____.5 establishes certain documentation requirements with respect to the purchase or sale of financial instruments made in reliance of the risk-mitigating exemption under certain circumstances.[501]

b. Proposed Amendments to Section ____.5

i. Correlation Analysis for Section ____.5(b)(1)(iii)

The agencies proposed to remove the specific requirement to conduct a correlation analysis for risk-mitigating hedging activities.[502] In particular, the agencies proposed to remove the words ''including correlation analysis'' from the requirement that the banking entity seeking to engage in risk-mitigating hedging activities conduct ''analysis, including correlation analysis, and independent testing'' designed to ensure that hedging activities may reasonably be expected to reduce or mitigate the risks being hedged. Thus, the requirement to conduct an analysis would have remained, but the banking entity would have had flexibility to apply a type of analysis that was appropriate to the facts and circumstances of the hedge and the underlying risks targeted.[503]

The agencies noted that they have become aware of practical difficulties with the correlation analysis requirement, which according to banking entities can add delays, costs, and uncertainty to permitted risk-mitigating hedging.[504] The agencies anticipated that removing the correlation analysis requirement would reduce uncertainties in meeting the analysis requirement without significantly impacting the conditions that risk-mitigating hedging activities must meet in order to qualify for the exemption.[505]

The agencies also noted that section 13 of the BHC Act does not specifically require this correlation analysis.[506] Instead, the statute only provides that a hedging position, technique, or strategy is permitted so long as it is ''. . . designed to reduce the specific risks to the banking entity . . . .'' [507] The 2013 rule added the correlation analysis requirement as a measure intended to ensure compliance with this exemption.

ii. Hedge Demonstrably Reduces or Otherwise Significantly Mitigates Specific Risks for Sections ____.5(b)(1)(iii), ____.5(b)(2)(ii), and ____.5(b)(2)(iv)(B)

The agencies stated in the proposal that the requirements in § ____.5(b)(1)(iii), § ____.5(b)(2)(ii), and § ____.5(b)(2)(iv)(B), that a risk-mitigating hedging activity demonstrably reduces or otherwise significantly mitigates specific risks, is not directly required by section 13(d)(1)(C) of the BHC Act.[508] The statute instead requires that the hedge *be designed* to reduce or otherwise significantly mitigate specific risks.[509] Thus, the agencies proposed to remove the ''demonstrably reduces or otherwise significantly mitigates'' specific risk requirement from § ____.5(b)(2)(ii) and § ____.5(b)(2)(iv)(B). This change would retain the requirement that the hedging activity be designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, while providing banking entities with the flexibility to apply a type of analysis that was appropriate to the facts and circumstances of the hedge and the underlying risks targeted.

The agencies also proposed to remove parallel provisions in § ____.5(b)(1)(iii). In particular, the agencies proposed to delete the word ''demonstrably'' from the requirement that ''the positions, techniques and strategies that may be used for hedging may reasonably be expected to demonstrably reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged'' in § ____.5(b)(1)(iii). This change would have meant that the banking entity's analysis and testing would have had to show that the hedging may be expected to reduce or mitigate the risks being hedged, but without the specific requirement that such reduction or mitigation be demonstrable. The agencies also proposed to delete the requirement in § ____.5(b)(1)(iii) that ''such correlation analysis demonstrates that the hedging activity demonstrably reduces or otherwise significantly mitigates the specific, identifiable risk(s) being hedged'' because this requirement was not necessary if the ''correlation analysis'' and ''demonstrable'' requirements were deleted.

The agencies noted that, in practice, it appears that the requirement to show that hedging activity demonstrably reduces or otherwise significantly mitigates a specific, identifiable risk that develops over time can be complex and could potentially reduce bona fide risk-mitigating hedging activity. For example, in some circumstances it would be very difficult, if not impossible, for a banking entity to comply with the continuous requirement to demonstrably reduce or significantly mitigate the identifiable risks, and therefore the firm would not enter into what would otherwise be effective hedges of foreseeable risks.[510]

iii. Reduced Compliance Requirements for Banking Entities That Do Not Have Significant Trading Assets and Liabilities for Section ____.5(b) and (c)

For banking entities that do not have significant trading assets and liabilities, the agencies proposed to eliminate the requirements for a separate internal compliance program for risk-mitigating hedging under § ____.5(b)(1); certain of the specific requirements of § ____.5(b)(2); the limits on compensation arrangements for persons performing risk-mitigating activities in § ____.5(b)(3); and the documentation requirements for certain hedging activities in § ____.5(c).[511] In place of those requirements, the agencies proposed a new § ____.5(b)(2) that would require that the risk-mitigating hedging activities be: (i) At the inception of the hedging activity (including any adjustments), designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including the risks specifically enumerated in the proposal; and (ii) subject to ongoing recalibration, as appropriate, to ensure that the hedge remains designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks.[512] The proposal also included conforming changes to § ____.5(b)(1) and § ____.5(c) of the 2013 rule to make the requirements of those sections

[499] *See* 2013 rule § ____.5(b)(1) and (3).

applicable only to banking entities that have significant trading assets and liabilities.[513]

The agencies explained that these requirements are overly burdensome and complex for banking entities that do not have significant trading assets and liabilities, which are generally less likely to engage in the types of trading activities and hedging strategies that would necessitate these additional compliance requirements. Given these considerations, the agencies believed that removing the requirements for banking entities that do not have significant trading assets and liabilities would be unlikely to materially increase risks to the safety and soundness of the banking entity or U.S. financial stability. The agencies also believed that the proposed requirements for banking entities without significant trading assets and liabilities would effectively implement the statutory requirement that the hedging transactions be designed to reduce specific risks the banking entity incurs.[514]

iv. Reduced Documentation Requirements for Banking Entities That Have Significant Trading Assets and Liabilities for Section ____.5(c)

For banking entities that have significant trading assets and liabilities, the agencies proposed to retain the enhanced documentation requirements for the hedging transactions identified in § ____.5(c)(1) to permit evaluation of the activity.[515] However, the agencies proposed a new paragraph (c)(4) in § ____.5 that would eliminate the enhanced documentation requirement for hedging activities that meets certain conditions.[516] Under new paragraph (c)(4) in § ____.5, compliance with the enhanced documentation requirement would not apply to purchases and sales of financial instruments for hedging activities that are identified on a written list of financial instruments pre-approved by the banking entity that are commonly used by the trading desk for the specific types of hedging activity for which the financial instrument is being purchased or sold.[517] In addition, at the time of the purchase or sale of the financial instruments, the related hedging activity would need to comply with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument, which would be required to be appropriate for the size, types, and risks of the hedging activities commonly undertaken by the trading desk; the financial instruments purchased and sold by the trading desk for hedging activities; and the levels and duration of the risk exposures being hedged.[518]

The agencies explained that certain of the regulatory purposes of these documentation requirements, such as facilitating subsequent evaluation of the hedging activity and prevention of evasion, are less relevant in circumstances where common hedging strategies are used repetitively. Therefore the agencies believed that the enhanced documentation requirements were not necessary in such instances and that reducing them would make beneficial risk-mitigating activity more efficient and effective. The agencies intended that the conditions on the pre-approved limits would provide clarity regarding the limits needed to comply with requirements.[519]

c. Commenters' Views

One commenter argued that the requirements associated with the 2013 rule's risk-mitigating hedging exemption have been overly prescriptive, cumbersome, and unnecessary for sound and efficient risk management.[520] Many commenters supported the agencies' efforts to reduce costs and uncertainty and improve the utility of the risk-mitigating hedging exemption.[521] More specifically, commenters agreed with the recommendations to remove the correlation analysis requirement, remove the requirement that a hedge demonstrably reduce or otherwise significantly mitigate one or more specific risks, and reduce the enhanced documentation requirements.[522]

Although some commenters supported the agencies' effort to reduce the compliance burden in the risk-mitigating hedging exemption, others argued that the agencies did not go far enough. Several commenters argued that the agencies should reduce the enhanced documentation requirements and go further to remove these requirements for all banking entities.[523] Another commenter urged the agencies to eliminate the enhanced documentation requirements altogether in light of the proposed rule's robust compliance framework.[524] In addition, a commenter suggested targeted modifications to the provision, including permitting certain types of hedging in line with internal risk limits, allowing aggregate assessment of hedging, and clarifying how firms can comply with the provision.[525]

In contrast, other commenters did not support the agencies' proposed changes to the compliance obligations associated with the risk-mitigating hedging exemption.[526] One commenter argued that eliminating the correlation analysis requirement would eliminate the primary means used by most banks today to ensure a hedging activity is, in fact, offsetting risk.[527] Moreover, the same commenter argued that eliminating the existing regulatory requirement that banks show a hedge ''demonstrably reduces'' or ''significantly mitigates'' the risks targeted by the hedge would be a direct repudiation of the statute, because that type of demonstration is required by the statute.[528] Another commenter argued that the various changes proposed by the agencies would lead to uncontrollable speculations.[529]

d. Final Rule

i. Correlation Analysis for Section ____.5(b)(1)(i)(C)

The agencies are adopting § ____.5(b)(1)(iii) as proposed, but renumbered as § ____.5(b)(1)(i)(C). Based on the agencies' implementation experience of the 2013 rule and commenters' feedback on the proposed changes, the agencies are removing the requirement that a correlation analysis be the type of analysis used to assess risk-mitigating hedging activities. The agencies continue to believe, as stated in the proposal, that allowing banking entities to use the type of analysis that is appropriate to the hedging activities in question will avoid the uncertainties discussed in the proposal without substantially impacting the conditions that risk-mitigating hedging activities must meet in order to qualify for the exemption.[530]

Furthermore, section 13 of the BHC Act does not require that the analysis used by the banking entity be a correlation analysis. Instead, the statute only provides that a hedging position,

technique, or strategy is permitted so long as it is ''. . . designed to reduce the specific risks to the banking entity . . . .'' [531] The agencies believe the continuing requirement that the banking entity conduct ''analysis and independent testing designed to ensure that the positions, techniques and strategies that may be used for hedging may reasonably be expected to reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged'' will effectively implement the statute.

The agencies anticipate that the banking entity's flexibility to apply the type of analysis that is appropriate to assess the particular hedging activity at issue will facilitate the appropriate use of risk-mitigating hedging under the exemption. Regarding the comment asserting that correlation analysis is the primary means used by banking entities to test whether a hedging activity is offsetting risk, the agencies note that if this is the case it would be reasonable to expect that the banking entity would use correlation analysis to satisfy the regulatory requirements with respect to that hedging activity. However, if another type of analysis is more appropriate, the banking entity would have the flexibility to use that form of analysis instead.

ii. Hedge Demonstrably Reduces or Otherwise Significantly Mitigates Specific Risks for Sections ____.5(b)(1)(i)(C), ____.5(b)(1)(ii)(B) and ____.5(b)(1)(ii)(D)(*2*)

The agencies are adopting § ____.5(b)(1)(iii), § ____.5(b)(2)(ii), and § ____.5(b)(2)(iv)(B) as proposed, but renumbered as § ____.5(b)(1)(i)(C), § ____.5(b)(1)(ii)(B) and § ____.5(b)(1)(ii)(D)(2). As stated in the proposal, the requirement that the reduction or mitigation of specific risks resulting from a risk-mitigating hedging activity be demonstrable is not directly required by section 13(d)(1)(C) of the BHC Act.[532] In practice, it appears that the requirement to show that hedging activity demonstrably reduces or otherwise significantly mitigates a specific, identifiable risk that develops over time can be complex and could potentially reduce bona fide risk-mitigating hedging activity. The agencies continue to believe that in some circumstances, it may be difficult for banking entities to know with sufficient certainty that a potential hedging activity that a banking entity seeks to commence will continuously demonstrably reduce or significantly mitigate an identifiable risk after it is implemented, even if the banking entity is able to enter into a hedge reasonably designed to reduce or significantly mitigate such a risk. As stated in the proposal, unforeseeable changes in market conditions, event risk, sovereign risk, and other factors that cannot be known with certainty in advance of undertaking a hedging transaction could reduce or eliminate the otherwise intended hedging benefits.[533] In these events, the requirement that a hedge ''demonstrably reduce'' or ''significantly mitigate'' the identifiable risks could create uncertainty with respect to the hedge's continued eligibility for the exemption. In such cases, a banking entity may determine not to enter into what would otherwise be a reasonably designed hedge of foreseeable risks out of concern that the banking entity may not be able to effectively comply with the requirement that such a hedge demonstrably reduces such risks due to the possibility of unforeseen risks occur. Therefore, the final rule removes the ''demonstrably reduces or otherwise significantly mitigates'' specific risk requirement from § ____.5(b)(1)(i)(C), § ____.5(b)(1)(ii)(B) and § ____.5(b)(1)(ii)(D)(2).

The agencies do not agree with a commenter's assertion that the requirement that banking entities show that a hedge ''demonstrably'' reduces or significantly mitigates the risks is a core requirement under section 13 of the BHC Act. Instead, the statute expressly permits hedging activities that are ''designed to reduce the specific risks of the banking entity.'' [534] The final rule maintains the requirement that hedging activity undertaken pursuant to § ____.5 be designed to reduce or otherwise mitigate specific, identifiable risks. Hedging activity must also be subject to ongoing recalibration by the banking entity to ensure that the hedging activity satisfies the requirement that the activity is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks even after changes in market conditions or other factors. In light of these requirements, the agencies do not find it necessary to require that the hedge ''demonstrably reduce'' risk to the banking entity on an ongoing basis.

iii. Reduced Compliance Requirements for Banking Entities That Do Not Have Significant Trading Assets and Liabilities for Section ____.5(b)(2) and Section ____.5(c)

The agencies are adopting §§ ____.5(b)(2) and ____.5(c) as proposed. Consistent with the changes in the final rule relating to the scope of the requirements for banking entities that do not have significant trading assets and liabilities, the agencies are also revising the requirements in §§ ____.5(b)(2) and ____.5(c) for banking entities that do not have significant trading assets and liabilities. For these firms, the agencies are eliminating the requirements for a separate internal compliance program for risk-mitigating hedging under § ____.5(b)(1); certain of the specific requirements of § ____.5(b)(2); the limits on compensation arrangements for persons performing risk-mitigating activities in § ____.5(b)(1)(iii); and the documentation requirements for those activities in § ____.5(c). Based on comments received, the agencies have determined that these requirements are overly burdensome and complex for banking entities with moderate trading assets and liabilities, in light of the reduced scale of their trading and hedging activities.

In place of those requirements, new § ____.5(b)(2) requires that risk-mitigating hedging activities for those banking entities be: (i) At the inception of the hedging activity (including any adjustments), designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including the risks specifically enumerated in the proposal; and (ii) subject to ongoing recalibration, as appropriate, to ensure that the hedge remains designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks. The agencies continue to believe that these tailored requirements for banking entities without significant trading assets and liabilities effectively implement the statutory requirement that the hedging transactions be designed to reduce specific risks the banking entity incurs. The agencies believe that the remaining requirements for a firm with moderate trading assets and liabilities would be effective in ensuring such banking entities engage only in permissible risk-mitigating hedging activities. The agencies also note that reducing these compliance requirements for banking entities that do not have significant trading assets and liabilities is unlikely to materially increase risks to the safety and soundness of the banking entity or

[531] 12 U.S.C. 1851(d)(1)(C).

[532] *See* 83 FR at 33465.

[533] *See id.*

[534] 12 U.S.C. 1851(d)(1)(C).

U.S. financial stability. Therefore, the agencies are eliminating and modifying these requirements for banking entities that do not have significant trading assets and liabilities. In connection with these changes, the final rule also includes conforming changes to §§ ____.5(b)(1) and ____.5(c) of the 2013 rule to make the requirements of those sections applicable only to banking entities that have significant trading assets and liabilities.

iv. Reduced Documentation Requirements for Banking Entities That Have Significant Trading Assets and Liabilities for Section ____.5(c)

The agencies are adopting § ____.5(c) as proposed. The final rule retains the enhanced documentation requirements for banking entities that have significant trading assets and liabilities for hedging transactions identified in § ____.5(c)(1) to permit evaluation of the activity. Although this documentation requirement results in more extensive compliance efforts, the agencies continue to believe it serves an important role to prevent evasion of the requirements of section 13 of the BHC Act and the final rule.

The hedging transactions identified in § ____.5(c)(1) include hedging activity that is not established by the specific trading desk that creates or is responsible for the underlying positions, contracts, or other holdings the risks of which the hedging activity is designed to reduce; is effected through a financial instrument, exposure, technique, or strategy that is not specifically identified in the trading desk's written policies and procedures as a product, instrument, exposure, technique, or strategy such trading desk may use for hedging; or established to hedge aggregated positions across two or more trading desks. The agencies believe that hedging transactions established at a different trading desk, or which are not identified in the relevant policies, may present or reflect heightened potential for prohibited proprietary trading. In other words, the further removed hedging activities are from the specific positions, contracts, or other holdings the banking entity intends to hedge, the greater the danger that such activity is not limited to hedging specific risks of individual or aggregated positions, contracts, or other holdings of the banking entity. For this reason, the agencies do not agree with commenters who argued that the enhanced documentation requirements should be removed for all banking entities.

However, based on the agencies' experience during the first several years of implementation of the 2013 rule, it appears that many hedges established by one trading desk for other affiliated desks are often part of common hedging strategies that are used regularly and that do not raise the concerns of those trades prohibited by the rule. In those instances, the documentation requirements of § ____.5(c) of the 2013 rule are less necessary for purposes of evaluating the hedging activity and preventing evasion. In weighing the significantly reduced regulatory and supervisory utility of additional documentation of common hedging trades against the complexity of complying with the enhanced documentation requirements, the agencies have determined that the documentation requirements are not necessary in those instances. Reducing the documentation requirement for common hedging activity undertaken in the normal course of business for the benefit of one or more other trading desks would also make beneficial risk-mitigating activity more efficient and potentially improve the timeliness of important risk-mitigating hedging activity, the effectiveness of which can be time sensitive.

Therefore, § ____.5(c)(4) of the final rule eliminates the enhanced documentation requirement for hedging activities that meet certain conditions. In excluding a trading desk's common hedging instruments from the enhanced documentation requirements in § ____.5(c), the final rule seeks to distinguish between those financial instruments that are commonly used for a trading desk's ordinary hedging activities and those that are not. The final rule requires the banking entity to have in place appropriate limits so that less common or more unusual levels of hedging activity would still be subject to the enhanced documentation requirements. The final rule provides that the enhanced documentation requirement does not apply to purchases and sales of financial instruments for hedging activities that are identified on a written list of financial instruments pre-approved by the banking entity that are commonly used by the trading desk for the specific types of hedging activity for which the financial instrument is being purchased or sold. In addition, at the time of the purchase or sale of the financial instruments, the related hedging activity would need to comply with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument. These hedging limits must be appropriate for the size, types, and risks of the hedging activities commonly undertaken by the trading desk; the financial instruments purchased and sold by the trading desk for hedging activities; and the levels and duration of the risk exposures being hedged. These conditions on the pre-approved limits are intended to provide clarity as to the types and characteristics of the limits needed to comply with the final rule. The pre-approved limits should be reasonable and set to correspond to the type of hedging activity commonly undertaken and at levels consistent with the hedging activity undertaken by the trading desk in the normal course.

The agencies considered comments that suggested additional targeted modifications to the risk-mitigating hedging requirements, but believe that the suggested modifications would add additional complexity and administrative burden without significantly changing the efficiency and effectiveness of the final rule. Additionally, the agencies believe that because the final rule maintains significant requirements for hedging activities to qualify for the exemption, it should not lead to uncontrollable speculation, as one commenter warned.

4. Section ____.6(e): Permitted Trading Activities of a Foreign Banking Entity

Section 13(d)(1)(H) of the BHC Act [535] permits certain foreign banking entities to engage in proprietary trading that occurs solely outside of the United States (the foreign trading exemption); [536] however, the statute does not define when a foreign banking entity's trading occurs ''solely outside of the United States.'' The 2013 rule includes several conditions on the availability of the foreign trading exemption. Specifically, in addition to limiting the exemption to foreign banking entities where the purchase or sale is made pursuant to paragraph (9)

[535] Section 13(d)(1)(H) of the BHC Act permits trading conducted by a foreign banking entity pursuant to paragraph (9) or (13) of section 4(c) of the BHC Act (12 U.S.C. 1843(c)), if the trading occurs solely outside of the United States, and the banking entity is not directly or indirectly controlled by a banking entity that is organized under the laws of the United States or of one or more States. *See* 12 U.S.C. 1851(d)(1)(H).

[536] This section's discussion of the concept of ''solely outside of the United States'' is provided solely for purposes of the rule's implementation of section 13(d)(1)(H) of the BHC Act and does not affect a banking entity's obligation to comply with additional or different requirements under applicable securities, banking, or other laws. Among other differences, section 13 of the BHC Act does not necessarily include the customer protection, transparency, anti-fraud, anti-manipulation, and market orderliness goals of other statutes administered by the agencies. These other goals or other aspects of those statutory provisions may require different approaches to the concept of ''solely outside of the United States'' in other contexts.

or (13) of § ____.4(c) of the BHC Act,[537] the 2013 rule provides that the foreign trading exemption is available only if: [538]

(i) The banking entity engaging as principal in the purchase or sale (including any personnel of the banking entity or its affiliate that arrange, negotiate, or execute such purchase or sale) is not located in the United States or organized under the laws of the United States or of any State.

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State.

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

(iv) No financing for the banking entity's purchase or sale is provided, directly or indirectly, by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State (the financing prong).

(v) The purchase or sale is not conducted with or through any U.S. entity,[539] except if the purchase or sale is conducted:

(A) With the foreign operations of a U.S. entity, if no personnel of such U.S. entity that are located in the United States are involved in the arrangement, negotiation or execution of such purchase or sale (the counterparty prong); [540]

(B) with an unaffiliated market intermediary acting as principal, provided the transaction is promptly cleared and settled through a clearing agency or derivatives clearing organization acting as a central counterparty; or

(C) through an unaffiliated market intermediary, provided the transaction is conducted anonymously (*i.e.,* each party to the transaction is unaware of the identity of the other party(ies)) on an exchange or similar trading facility and promptly cleared and settled through a clearing agency or derivatives clearing organization acting as a central counterparty.

Since the adoption of the 2013 rule, foreign banking entities have asserted that certain of these criteria limit their ability to make use of the statutory exemption for trading activity that occurs outside of the United States, which has adversely impacted their foreign trading operations. Additionally, many foreign banking entities have suggested that the full set of eligibility criteria to rely on the exemption for foreign trading activity are unnecessary to accomplish the policy objectives of section 13 of the BHC Act. This information has raised concerns that the current requirements for the exemption may be overly restrictive and not effective in permitting foreign banks to engage in foreign trading activities consistent with the policy objective of the statute.

The proposal would have modified the requirements for the foreign trading exemption so that it would be more usable by foreign banking entities. Specifically, the proposal would have retained the first three requirements of the 2013 rule, with a modification to the first requirement, and would have removed the last two requirements of § ____.6(e)(3). As a result, § ____.6(e)(3), as modified by the proposal, would have required that for a foreign banking entity to be eligible for this exemption:

(i) The banking entity engaging as principal in the purchase or sale (including relevant personnel) is not located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State; and

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

The proposal would have maintained these three requirements in order to ensure that the banking entity (including any relevant personnel) that engages in the purchase or sale as principal or makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or any State. Furthermore, the proposal would have retained the 2013 rule's requirement that the purchase or sale, including any transaction arising from a related risk-mitigating hedging transaction, may not be accounted for as principal by the U.S. operations of the foreign banking entity. However, the proposal would have replaced the first requirement that any personnel of the banking entity that arrange, negotiate, or execute such purchase or sale are not located in the United States with one that would restrict only the relevant personnel engaged in the banking entity's decision in the purchase or sale are not located in the United States.

Under the proposed approach, the requirements for the foreign trading exemption focused on whether the banking entity that engages in or that decides to engage in the purchase or sale as principal (including any relevant personnel) is located in the United States. The proposed modifications recognized that some limited involvement by U.S. personnel (*e.g.,* arranging or negotiating) would be consistent with this exemption so long as the principal risk and actions of the purchase or sale do not take place in the United States for purposes of section 13 of the BHC Act and the implementing regulations.

The proposal also would have eliminated the financing prong and the counterparty prong. Under the proposal, these changes would have focused the key requirements of the foreign trading exemption on the principal actions and risk of the transaction. In addition, the proposal would have removed the financing prong to address concerns that the fungibility of financing has made this requirement in certain circumstances difficult to apply in practice to determine whether a particular financing is tied to a particular trade. Market participants have raised a number of questions about the financing prong and have indicated that identifying whether financing has been provided by a U.S. affiliate or branch can be exceedingly complex, in particular with respect to demonstrating that financing has not been provided by a U.S. affiliate or branch with respect to a particular transaction. To address the concerns raised by foreign banking entities and other market participants, the proposal would have amended the exemption to focus on the principal risk of a transaction and the location of the actions as principal and trading decisions, so that a foreign banking entity would be able to make use of the exemption so long as the risk of the transaction is booked outside of the United States. While the agencies

[537] 12 U.S.C. 1843(c)(9), (13). *See* 2013 rule § ____.6(e)(1)(i) and (ii).

[538] *See* 2013 rule § ____.6(e).

[539] "U.S. entity" is defined for purposes of this provision as any entity that is, or is controlled by, or is acting on behalf of, or at the direction of, any other entity that is, located in the United States or organized under the laws of the United States or of any State. *See* 2013 rule § ____.6(e)(4).

[540] A foreign banking entity wishing to engage in trading activities with a U.S. entity's foreign affiliate generally must rely on the counterparty prong.

recognize that a U.S. branch or affiliate that extends financing could bear some risks, the agencies note that the proposed modifications to the foreign trading exemption were designed to require that the principal risks of the transaction occur and remain solely outside of the United States.

Similarly, foreign banking entities have communicated to the agencies that the counterparty prong has been overly difficult and costly for banking entities to monitor, track, and comply with in practice. As a result, the agencies proposed to remove the requirement that any transaction with a U.S. counterparty be executed solely with the foreign operations of the U.S. counterparty (including the requirement that no personnel of the counterparty involved in the arrangement, negotiation, or execution may be located in the United States) or through an unaffiliated intermediary and an anonymous exchange. These changes were intended to materially reduce the reported inefficiencies associated with rule compliance. In addition, market participants have indicated that this requirement has in practice led foreign banking entities to overly restrict the range of counterparties with which transactions can be conducted, as well as disproportionately burdened compliance resources associated with those transactions, including with respect to counterparties seeking to do business with the foreign banking entity in foreign jurisdictions.

The proposal would have removed the counterparty prong and focused the requirements of the foreign trading exemption on the location of a foreign banking entity's decision to trade, action as principal, and principal risk of the purchase or sale. This proposed focus on the location of actions and risk as principal in the United States was intended to align with the statute's definition of ''proprietary trading'' as ''engaging *as principal for the trading account of the banking entity.*'' [541] The proposal would have scaled back those requirements that were not critical for this determination and thus would not be needed in the final rule. Therefore, the proposal would have removed the requirements of § ___.6(e)(3) since they are less directly relevant to these considerations.

Consistent with the 2013 rule, the exemption under the proposal would not have exempted the U.S. or foreign operations of U.S. banking entities from having to comply with the restrictions and limitations of section 13 of the BHC Act. Thus, for example, the U.S. and foreign operations of a U.S. banking entity that is engaged in permissible market making-related activities or other permitted activities may engage in those transactions with a foreign banking entity that is engaged in proprietary trading in accordance with the exemption under § ___.6(e) of the 2013 rule, so long as the U.S. banking entity complies with the requirements of § ___.4(b), in the case of market making-related activities, or other relevant exemption applicable to the U.S. banking entity. The proposal, like the 2013 rule, would not have imposed a duty on the foreign banking entity or the U.S. banking entity to ensure that its counterparty is conducting its activity in conformance with section 13 and the implementing regulations. Rather, that obligation would have been on each party subject to section 13 to ensure that it is conducting its activities in accordance with section 13 and the implementing regulations.

The proposal's exemption for trading of foreign banking entities outside the United States potentially could have given foreign banking entities a competitive advantage over U.S. banking entities with respect to permitted activities of U.S. banking entities because foreign banking entities could trade directly with U.S. counterparties without being subject to the limitations associated with the market making-related activities exemption or other exemptions under the rule. This competitive disparity in turn could create a significant potential for regulatory arbitrage. In this respect, the agencies sought to mitigate this concern through other changes in the proposal; for example, U.S. banking entities would have continued to be able to engage in all of the activities permitted under the 2013 rule and the proposal, including the simplified and streamlined requirements for market making and risk-mitigating hedging and other types of trading activities.

In general, commenters supported the proposed changes.[542] However, a number of commenters requested further modifications to the foreign trading exemption. For example, some commenters requested that the agencies clarify the definition of ''relevant personnel'' to mean employees that conduct risk management, and not the traders or others associated with executing the transaction.[543] One commenter requested clarification that the proposed changes not constrain foreign banking entities from delegating investment authority to non-affiliated U.S. investment advisers.[544] Another commenter supported eliminating the conduct restriction.[545] One commenter proposed several additional modifications, including further simplifying the exemption to only focus on where the transaction is booked, clarifying certain terms (*e.g.,* sub-servicing, dark pools, engaging in), and including inter-affiliate or intra-bank transactions in the exemption.[546] This commenter also requested that the agencies include execution as one of the examples of limited involvement.[547]

A few commenters opposed the proposed changes to eliminate the financing and counterparty requirements.[548] These commenters argued that the proposed changes might provide foreign entities with a competitive advantage over domestic entities.[549] One commenter asserted that the proposed changes would increase uncertainty and could increase the exposure of U.S. institutions to foreign proprietary trading losses.[550] This commenter also argued that the agencies did not provide factual data to support the change and that the proposal was contrary to law.[551]

After consideration of these comments, the agencies are adopting the changes to the foreign trading exemption as proposed. The proposal's modifications in general sought to balance concerns regarding competitive impact while mitigating the concern that an overly narrow approach to the foreign trading exemption may cause market bifurcations, reduce the efficiency and liquidity of markets, make the exemption overly restrictive to foreign banking entities, and harm U.S. market participants. The agencies believe that this approach appropriately balances one of the key objectives of section 13 of the BHC Act by limiting the risks that proprietary trading poses to the U.S. financial system, while also modifying the application of section 13 as it applies to foreign banking entities, as required by section 13(d)(1)(H).

As noted in the preamble to the proposal, the statute contains an exemption that allows foreign banking entities to engage in trading activity that is, only for purposes of the prohibitions of the statute, solely outside the United

[551] *See* Bean.

States. The statute also contains a prohibition on proprietary trading for U.S. banking entities regardless of where their activity is conducted. The statute generally prohibits U.S. banking entities from engaging in proprietary trading because of the perceived risks of those activities to U.S. banking entities and the U.S. financial system. The modified foreign trading exemption excludes from the statutory prohibitions transactions where the principal risk is booked outside of the United States and the actions and decisions as principal occur outside of the United States by foreign operations of foreign banking entities. The agencies also are confirming that the foreign trading exemption does not preclude a foreign banking entity from engaging a non-affiliated U.S. investment adviser as long as the actions and decisions of the banking entity as principal occur outside of the United States. By continuing to limit the risks of foreign banking entities' proprietary trading activities to the U.S. financial system, the agencies believe that the rule continues to protect and promote the safety and soundness of banking entities and the financial stability of the United States, while also allowing U.S. markets to continue to operate efficiently in conjunction with foreign markets.

C. Subpart C—Covered Fund Activities and Investments

1. Overview of Agencies' Approach to the Covered Fund Provisions

The proposal included several proposed revisions to subpart C (the covered fund provisions). The proposal also sought comments on other aspects of the covered fund provisions beyond those changes for which specific rule text was proposed. As described further below, the agencies have determined to adopt, as proposed, the changes to subpart C for which specific rule text was proposed. The agencies continue to consider other aspects of the covered fund provisions on which the agencies sought comment in the proposal and intend to issue a separate proposed rulemaking that specifically addresses those areas.

The proposal sought comment on the 2013 rule's general approach to defining the term ''covered fund,'' as well as the existing exclusions from the covered fund definition and potential new exclusions from this definition. The agencies received numerous comments on these aspects of the covered fund provisions. Some commenters encouraged the agencies to make significant revisions to these provisions, such as narrowing the covered fund ''base definition'' [552] or providing additional exclusions from this definition.[553] Other commenters argued that the agencies should not narrow the covered fund definition or should retain the definition in section 13 of the BHC Act.[554] Some commenters raised concerns about the agencies' ability to finalize changes to the covered fund provisions for which the proposal did not provide specific rule text.[555] In light of the number and complexity of issues under consideration, the agencies intend to address these and other comments received on the covered fund provisions in a subsequent proposed rulemaking.

In this final rule, the agencies are adopting only those changes to the covered fund provisions for which specific rule text was proposed.[556] Those changes are being adopted as final without change from the proposal for the reasons described below. While the agencies are not including any other changes to subpart C in this final rule, this approach does not reflect any final determination with respect to the comments received on other aspects of the covered fund provisions. The agencies continue to consider comments received and intend to address additional aspects of the covered funds provisions in the future covered funds proposal.

2. Section ____.11: Permitted Organizing and Offering, Underwriting, and Market Making With Respect to a Covered Fund

Section 13(d)(1)(B) of the BHC Act permits a banking entity to purchase and sell securities and other instruments described in section 13(h)(4) of the BHC Act in connection with the banking entity's underwriting or market making-related activities.[557] The 2013 rule provides that the prohibition against acquiring or retaining an ownership interest in or sponsoring a covered fund does not apply to a banking entity's underwriting or market making-related activities involving a covered fund as long as:

- The banking entity conducts the activities in accordance with the requirements of the underwriting exemption in § ____.4(a) of the 2013 rule or market making exemption in § ____.4(b) of the 2013 rule, respectively.
- The banking entity includes the aggregate value of all ownership interests of the covered fund acquired or retained by the banking entity and its affiliates for purposes of the limitation on aggregate investments in covered funds (the aggregate-fund limit) [558] and capital deduction requirement; [559] and
- The banking entity includes any ownership interest that it acquires or retains for purposes of the limitation on investments in a single covered fund (the per-fund limit) if the banking entity (i) acts as a sponsor, investment adviser or commodity trading adviser to the covered fund; (ii) otherwise acquires and retains an ownership interest in the covered fund in reliance on the exemption for organizing and offering a covered fund in § ____.11(a) of the 2013 rule; (iii) acquires and retains an ownership interest in such covered fund and is either a securitizer, as that term is used in section 15G(a)(3) of the Exchange Act, or is acquiring and retaining an ownership interest in such covered fund in compliance with section 15G of that Act and the implementing regulations issued thereunder, each as permitted by § ____.11(b) of the 2013 rule; or (iv) directly or indirectly, guarantees, assumes, or otherwise insures the obligations or performance of the covered fund or of any covered fund in which such fund invests.[560]

The proposal would have removed the requirement that the banking entity include for purposes of the aggregate fund limit and capital deduction the value of any ownership interests of a third-party covered fund (*i.e.,* covered funds that the banking entity does not advise or organize and offer pursuant to § ____.11 of the final rule) acquired or retained in accordance with the underwriting or market-making exemptions in § ____.4. Under the proposal, these limits, as well as the per-fund limit, would have applied only to a covered fund that the banking entity organizes or offers and in which the banking entity acquires or retains an ownership interest pursuant to § ____.11(a) or (b) of the 2013 rule. The agencies proposed this change to more closely align the requirements for engaging in underwriting or market-making-related activities with respect to ownership interests in a covered fund with the requirements for engaging in these activities with respect to other financial instruments.

[558] 2013 rule § ____.12(a)(2)(iii).

[559] 2013 rule § ____.12(d).

[560] *See* 2013 rule § ____.11(c).

Several commenters supported eliminating these requirements for underwriting and market making in ownership interests in covered funds.[561] Many of these commenters said this proposal would reduce the compliance burden for banking entities engaged in client-facing underwriting and market making activities and would facilitate these permitted activities.[562] One of these commenters noted in particular the difficulties for banking entities to determine whether a third-party fund is a covered fund subject to the limits of the 2013 rule and to determine with certainty whether certain non-U.S. securities may be issued by covered funds.[563] Some of these commenters argued that providing underwriting and market making in the interests in such funds increases liquidity and benefits the marketplace generally.[564] One of these commenters also stated that this would facilitate capital-raising activities of covered funds and other issuers.[565] Other commenters opposed this change because they believed that it would greatly expand banking entities' ability to hold ownership interests in covered funds,[566] and is contrary to section 13 of the BHC Act.[567]

Several commenters supported making additional revisions to § ____.11 by eliminating the aggregate fund limit and capital deduction for other funds, such as affiliated funds or sponsored funds [568] and advised funds.[569] Certain of these commenters argued that underwriting and market making in interests in these covered funds would not expose banking entities to greater risk because ownership interests in such funds acquired in accordance with the risk-mitigating hedging, market-making or underwriting exemptions would nevertheless be subject to the restrictions contained in those exemptions.[570]

The agencies are eliminating the aggregate fund limit and the capital deduction requirement for the value of ownership interests in third-party covered funds acquired or retained in accordance with the underwriting or market-making exemption (*i.e.,* covered funds that the banking entity does not advise or organize and offer pursuant to § ____.11(a) or (b) of the final rule).[571] The agencies believe this change will better align the compliance requirements for underwriting and market making involving covered funds with the risks those activities entail. In particular, the agencies understand that it has been difficult for banking entities to determine whether ownership interests in covered funds are being acquired or retained in the context of trading activities, especially for non-U.S. issuers. Banking entities have had to undertake an often time-consuming process to determine whether an issuer is a covered fund and the security issued is an ownership interest, all for the purpose of ensuring compliance with the aggregate fund limit and capital deduction requirement for the period of time that the banking entity holds the ownership interest as part of its otherwise permissible underwriting and market making activities.[572] These compliance challenges are heightened in the case of third-party funds. However, a banking entity can more readily determine whether a fund is a covered fund if the banking entity advises or organizes and offers the fund. Thus, the agencies are not eliminating the aggregate fund limit and capital deduction requirement for advised covered funds or covered funds that the banking entity organizes or offers. The agencies continue to consider whether the approach being adopted in the final rule may be extended to other issuers, such as funds advised by the banking entity, and intend to address and request additional comment on this issue in the future proposed rulemaking.

The agencies disagree with the commenter who argued that eliminating the aggregate fund limit and capital deduction is contrary to section 13 of the BHC Act.[573] An exemption from the prohibition on acquiring or retaining an ownership interest in a covered fund for underwriting and market making involving covered fund ownership interests is consistent with and supported by section 13 of the BHC Act.[574] Section 13(d)(1)(B) provides a statutory exemption for underwriting and market making activities and, by its terms, applies to both prohibitions in section 13(a), whether on proprietary trading or covered fund activities. Section 13 does not require any per-fund or aggregate limits, or capital deduction, with respect to covered fund ownership interests acquired pursuant to the underwriting and market making exemption in section 13(d)(1)(B), and eliminating these requirements with respect to third-party funds will improve the effectiveness of the statutory exemption for these activities.[575]

The agencies also disagree with commenters who asserted that this change will greatly expand banking entities' ability to hold ownership interests in covered funds.[576] This exemption for underwriting and market making involving ownership interests in covered funds applies only to underwriting and market making activities conducted pursuant to the requirements in section 13(d)(1)(B) of the BHC Act and § ____.4 of the final rule. This exemption is intended to allow banking entities to engage in permissible underwriting and market making involving covered fund ownership interests to the same extent as other financial instruments. It is also intended to increase the effectiveness of the underwriting and market making exemptions in § ____.4 by appropriately limiting the covered fund determinations a banking entity must make in the course of these permissible activities. For these reasons, and to limit the potential for evasion, the exemption for underwriting and market making involving ownership interests in covered funds continues to apply only to activities that satisfy the requirements of the underwriting or market making exemptions in § ____.4.

One commenter argued that the aggregate fund limit should apply only at the global consolidated level for all firms.[577] This commenter argued that measuring aggregate covered fund ownership at the parent-level is a better test of immateriality than measuring covered fund investments at a lower level, such as at the level of an

[570] *See, e.g.,* BPI and ISDA.

[571] As in the proposal, this requirement is also eliminated for underwriting and market-making activities involving funds with respect to which the banking entity directly or indirectly, guarantees, assumes, or otherwise insures the obligations or performance of the covered fund or of any covered fund in which such fund invests. Such funds are not organized and offered pursuant to § ____.11(a) or (b) of the final rule and thus treatment as a third-party fund is more appropriate for purposes of the underwriting and market-making exemption for covered funds. The agencies note, however, that other provisions of section 13 of the BHC Act, as well as other laws and regulations, limit banking entities' ability to guarantee, assume, or otherwise insure the obligations or performance of covered funds. See 12 U.S.C. 1851(f); 12 U.S.C. 1851(d)(2); §§ ____.14 and ____.15 of the final rule. See also 12 CFR 7.1017 (limiting authority of national bank to act as a guarantor).

intermediate holding company.[578] This commenter also said the agencies should expand the per-fund limit to allow bank-affiliated securitization investment managers to rely on applicable foreign risk retention regulations as a basis for exceeding the three percent per-fund limitation, provided that those foreign regulations are generally comparable to U.S. requirements.[579] Another commenter asserted that the preamble to the 2013 rule indicated that direct investments made alongside a covered fund should be aggregated for purposes of the per-fund limit in certain circumstances.[580] This commenter asked the agencies to clarify that the 2013 rule does not prohibit banking entities from making direct investments alongside covered funds, regardless of whether the fund is sponsored or the investments are coordinated, so long as such investments are otherwise authorized for such banking entities (*e.g.,* under merchant banking authority). The agencies continue to consider these issues. As noted above, the agencies expect to address and request additional comments on these and other covered fund provisions in the future proposed rulemaking.

3. Section ____.13: Other Permitted Covered Fund Activities

a. Permitted Risk-Mitigating Hedging

Section 13(d)(1)(C) of the BHC Act provides an exemption for risk-mitigating hedging activities in connection with and related to individual or aggregated positions, contracts, or other holdings of a banking entity that are designed to reduce the specific risks to the banking entity in connection with and related to such positions, contracts, or other holdings.[581] As described in the preamble to the proposal, the 2013 rule implemented this authority narrowly in the context of covered fund activities. Specifically, the 2013 rule permitted only limited risk-mitigating hedging activities involving ownership interests in covered funds for hedging employee compensation arrangements.

Like the proposal, the final rule allows a banking entity to acquire or retain an ownership interest in a covered fund as a hedge when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund. This provision is consistent with the agencies' original 2011 proposal.[582]

The proposal also would have amended § ____.13(a) to align with the proposed modifications to § ____.5. In particular, the proposal would have required that a risk-mitigating hedging transaction pursuant to § ____.13(a) be designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks to the banking entity. It would have removed the requirement that the hedging transaction ''demonstrably'' reduces or otherwise significantly mitigates the relevant risks, consistent with the proposed modifications to § ____.5.[583]

Several commenters supported permitting banking entities to acquire and retain ownership interests in covered funds as a hedge when acting as intermediary on behalf of a customer.[584] Certain of these commenters argued that acquiring or retaining ownership interests in covered funds for this purpose (fund-linked products) is beneficial because it accommodates banking entities' client facilitation and related risk management activities.[585] Two commenters noted that restricting institutions' ability to find the best hedge for a transaction may increase risks to safety and soundness and, conversely, permitting banking entities to use the best available hedge for risks arising from customer facilitation activities would promote safety and soundness and reduce risk.[586] Several of these commenters also argued that fund-linked products are not a high-risk trading strategy.[587] For example, one commenter argued that the magnitude of counterparty default risk that banking entities would face in acquiring or retaining a covered fund ownership interest under these circumstances (*i.e.,* to hedge a position by the banking entity when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate exposure by the customer to a covered fund) is no different than any other counterparty default risk that banking entities face when entering into other risk-mitigating hedges.[588] Other commenters opposed this change and noted that, at the time the 2013 rule was adopted, the agencies considered acting as principal in providing exposure to the profits and losses of a covered fund for a customer, even if hedged by the banking entity with ownership interests of the covered fund, to constitute a high-risk trading strategy.[589] One commenter stated that the proposal did not offer specific examples or explain why such fund-linked products are necessary.[590] Another commenter argued that the exemption for risk-mitigating hedging involving ownership interests in covered funds should be further restricted or completely removed from the rule.[591]

The final rule adopts the proposed revision without change. This exemption is tailored to permit bona fide customer facilitation activities and to limit the risk incurred directly by the banking entity. The new exemption in § ____.13(a) extends only to a position taken by the banking entity when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate the customer's exposure to the profits and losses of the covered fund. The banking entity's acquisition or retention of the ownership interest as a hedge must be designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks arising out of a transaction conducted solely to accommodate a specific customer request with respect to the covered fund. As a result, a transaction conducted in reliance on this exemption must be customer-driven. A banking entity cannot rely on this exemption to solicit customer transactions in order to facilitate the banking entity's own exposure to a covered fund.

As some commenters noted, in the preamble to the 2013 rule, the agencies stated that they were not adopting an exemption for customer facilitation activities and related hedging activities involving ownership interests in covered funds because these activities could potentially expose a banking entity to the types of risks that section 13 of the BHC Act sought to address. However, in light of other comments received,[592] the agencies do not believe that a banking entity's customer facilitation activities and related hedging activities involving ownership interests in covered funds necessarily constitute high-risk trading strategies that could threaten the safety and soundness of the banking entity. The agencies believe that, properly monitored and managed, these activities can be conducted without creating a greater degree of risk to the banking entity than the other customer facilitation activities permitted by the

final rule.[593] In particular, these activities remain subject to all of the final rule's requirements for risk-mitigating hedging transactions, including requirements that such transactions must:

• Be designed to reduce or otherwise significantly mitigate the specific, identifiable risks to the banking entity;

• be made in accordance with the banking entity's written policies, procedures and internal controls;

• not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with the risk-mitigating hedging requirements; and

• be subject to continuing review, monitoring and management by the banking entity.[594]

In addition, these activities remain subject to § ____.15 of the final rule and, therefore, to the extent they would in practice significantly increase the likelihood that the banking entity would incur a substantial financial loss or would pose a threat to the financial stability of the United States, they would not be permissible. The agencies are also adopting without change the amendment to align § ____.13(a) with § ____.5 by eliminating the requirement that a risk-mitigating hedging transaction ''demonstrably'' reduces or otherwise significantly mitigates the relevant risks. The agencies are adopting this amendment to § ____.13(a) for the same reason the agencies are adopting the amendment to § ____.5.

b. Permitted Covered Fund Activities and Investments Outside of the United States

Section 13(d)(1)(I) of the BHC Act permits foreign banking entities to acquire or retain an ownership interest in, or act as sponsor to, a covered fund, so long as those activities and investments occur solely outside the United States and certain other conditions are met (the foreign fund exemption).[595] Section 13 of the BHC Act does not further define ''solely outside of the United States'' (SOTUS).

The 2013 rule established several conditions on the availability of the foreign fund exemption. Specifically, the 2013 rule provided that an activity or investment occurs solely outside the United States for purposes of the foreign fund exemption only if:

• The banking entity acting as sponsor, or engaging as principal in the acquisition or retention of an ownership interest in the covered fund, is not itself, and is not controlled directly or indirectly by, a banking entity that is located in the United States or organized under the laws of the United States or of any State;

• The banking entity (including relevant personnel) that makes the decision to acquire or retain the ownership interest or act as sponsor to the covered fund is not located in the United States or organized under the laws of the United States or of any State;

• The investment or sponsorship, including any transaction arising from risk-mitigating hedging related to an ownership interest, is not accounted for as principal directly or indirectly on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State; and

• No financing for the banking entity's ownership or sponsorship is provided, directly or indirectly, by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State (the ''financing prong'').[596]

Much like the similar requirement under the exemption for permitted trading activities of a foreign banking entity, the proposal would have removed the financing prong of the foreign fund exemption, while leaving in place the other requirements for an activity or investment to be considered ''solely outside of the United States.'' Removing the financing prong was intended to streamline the requirements of the foreign fund exemption with the intention of improving implementation of the statutory exemption.

Several commenters supported removing the financing prong from the foreign fund exemption.[597] One commenter argued that this change would appropriately refocus the foreign fund exemption on the location of the activities of the banking entity as principal.[598] Another commenter argued that the proposed changes to the foreign fund exemption, including removal of the financing prong, could promote international regulatory cooperation.[599] Other commenters argued against eliminating the financing prong because it could result in a U.S. branch or affiliate that extends financing to bear some risks.[600]

The agencies are adopting the proposal to remove the financing prong for the same reasons described above in section IV.B.4 for the trading outside of the United States exemption. This change focuses one of the key requirements of the foreign fund exemption on the principal actions and risk of the transaction. Removing the financing prong would also address concerns that the fungibility of financing has made this requirement in certain circumstances difficult to apply in practice to determine whether a particular financing is tied to a particular activity or investment. Eliminating the financing prong, while retaining the other prongs of the foreign fund exemption, strikes a better balance between the risks posed to U.S. banking entities and the U.S. financial system, on the one hand, and effectuating the statutory exemption for activities conducted solely outside of the United States, on the other. The agencies note that a U.S. banking entity's affiliate lending activities remain subject to other laws and regulations—including sections 23A and 23B of the Federal Reserve Act and prudential safety and soundness standards, as applicable.

One of the restrictions of the statutory exemption for covered fund activities conducted by foreign banking entities solely outside the United States is the restriction that ''no ownership interest in such hedge fund or private equity fund is be offered for sale or sold to a resident of the United States.[601] To implement this restriction, § ____.13(b) of the 2013 rule requires, as one condition of the foreign fund exemption, that ''no ownership interest in the covered fund is offered for sale or sold to a resident of the United States'' (the ''marketing restriction'').[602]

The final rule, like the proposal, clarifies that an ownership interest in a covered fund is not offered for sale or sold to a resident of the United States for purposes of the marketing restriction only if it is not sold and has not been sold pursuant to an offering that targets residents of the United States in which the banking entity or any affiliate of the banking entity participates. The final

[593] *See, e.g.,* final rule § ____.3(d)(11).

[594] *See* final rule § ____.13.

[595] Section 13(d)(1)(I) of the BHC Act permits a banking entity to acquire or retain an ownership interest in, or have certain relationships with, a covered fund notwithstanding the restrictions on investments in, and relationships with, a covered fund, if: (i) Such activity or investment is conducted by a banking entity pursuant to paragraph (9) or (13) of section 4(c) of the BHC Act; (ii) the activity occurs solely outside of the United States; (iii) no ownership interest in such fund is offered for sale or sold to a resident of the United States; and (iv) the banking entity is not directly or indirectly controlled by a banking entity that is organized under the laws of the United States or of one or more States. *See* 12 U.S.C. 1851(d)(1)(I).

[596] *See* final rule § ____.13(b)(4).

[597] *See, e.g.,* BPI; BVI; EBF; IIB; JBA; and New England Council.

[598] *See* EBF.

[599] *See* BPI.

[600] *See, e.g.,* Better Markets and CAP.

[601] *See* 12 U.S.C. 1851(d)(1)(I).

[602] *See* final rule § ____.13(b)(1)(iii).

rule, like the proposal, also clarifies that if the banking entity or an affiliate sponsors or serves, directly or indirectly, as the investment manager, investment adviser, commodity pool operator, or commodity trading advisor to a covered fund, then the banking entity or affiliate will be deemed for purposes of the marketing restriction to participate in any offer or sale by the covered fund of ownership interests in the covered fund.[603] This revision adopts existing staff guidance addressing this issue.[604] Several commenters supported this clarification.[605] Some commenters argued that this clarification appropriately excludes from the marketing restriction those activities where the risk occurs and remains outside of the United States and reflects the intended extraterritorial limitations of the section 13 of the BHC Act.[606] In addition, commenters stated that codifying the previously issued staff guidance will provide greater clarity and certainty for non-U.S. banking entities making investments in third party funds (*i.e.,* covered funds that the banking entity does not advise or organize and offer pursuant to § ____.11(a) or (b) of the final rule) and will enable long-term strategies in reliance on this provision.[607]

The agencies are adopting this clarification as proposed to formally incorporate the existing staff guidance. As staff noted in the previous staff guidance, the marketing restriction constrains the foreign banking entity in connection with its own activities with respect to covered funds rather than the activities of unaffiliated third parties.[608] This ensures that the foreign banking entity seeking to rely on the foreign fund exemption does not engage in an offering of ownership interests that targets residents of the United States. This clarification limits the extraterritorial application of section 13 to foreign banking entities while seeking to ensure that the risks of covered fund investments by foreign banking entities occur and remain solely outside of the United States. If the marketing restriction were applied to the activities of third parties, such as the sponsor of a third-party covered fund (rather than the foreign banking entity investing in a third-party covered fund), the foreign fund exemption may not be available in certain circumstances even though the risks and activities of a foreign banking entity with respect to its investment in the covered fund are solely outside the United States.

One commenter asked the agencies to clarify that the requirement that the banking entity (including the relevant personnel) that makes the decision ''to acquire or retain the ownership interest or act as sponsor to the covered fund'' must not be located in the United States does not prohibit non-U.S. investment funds from utilizing the expertise of U.S. investment advisers under delegation agreements.[609] This commenter noted that a foreign investment fund may appoint a qualified U.S. investment adviser for providing investment management or investment advisory services under delegation but that the ultimate responsibility for the investment decisions and compliance with statutory and contractual investment limits remains with the foreign management company that manages the foreign investment fund. As stated in the preamble to the 2013 rule, the foreign fund exemption permits the U.S. personnel and operations of a foreign banking entity to act as investment adviser to a covered fund in certain circumstances. For example, the U.S. personnel of a foreign banking entity may provide investment advice and recommend investment selections to the manager or general partner of a covered fund so long as the investment advisory activity in the United States does not result in U.S. personnel participating in the control of the covered fund or offering or selling an ownership interest to a resident of the United States.[610] Consistent with the foreign trading exemption, as discussed above,[611] the agencies also are confirming that under the final rule, the foreign fund exemption does not preclude a foreign banking entity from engaging a non-affiliated U.S. investment adviser as long as the actions and decisions of the banking entity as principal occur outside of the United States. The agencies intend to address and request further comment on additional covered fund issues in a future proposed rulemaking.

4. Section ____.14: Limitations on Relationships With a Covered Fund

a. Relationships With a Covered Fund

Section 13(f) of the BHC Act provides that, with limited exceptions, no banking entity that serves, directly or indirectly, as the investment manager, investment adviser, or sponsor to a hedge fund or private equity fund, or that organizes and offers a hedge fund or private equity fund pursuant to section 13(d)(1)(G), and no affiliate of such entity, may enter into a transaction with the fund, or with any other hedge fund or private equity fund that is controlled by such fund, that would be a ''covered transaction,'' as defined in section 23A of the Federal Reserve Act, as if such banking entity and the affiliate thereof were a member bank and the hedge fund or private equity fund were an affiliate thereof.[612] The 2013 rule includes this prohibition as well.[613] The proposal included a request for comment regarding the restrictions in section 13(f) of the BHC Act and § ____.14 of the 2013 rule. As with the other covered fund issues for which no specific rule text was proposed, the agencies continue to consider the prohibition in section 13(f) of the BHC Act and intend to issue a separate proposed rulemaking that addresses this issue.

b. Prime Brokerage Transactions

Section 13(f) of the BHC Act provides an exemption from the prohibition on covered transactions with a hedge fund or private equity fund for any prime brokerage transaction with a hedge fund or private equity fund in which a hedge fund or private equity fund managed, sponsored, or advised by a banking entity has taken an ownership interest (a second-tier fund).[614] The statute by its terms permits a banking entity with a relationship to a hedge fund or private equity fund described in section 13(f) of the BHC Act to engage in prime brokerage transactions (that are covered transactions) only with second-tier funds and does not extend to hedge funds or private equity funds more generally.[615] Under the statute, the exemption for prime brokerage transactions is available only so long as certain enumerated conditions are satisfied.[616] The 2013 rule included this exemption as well and similarly required satisfaction of certain enumerated conditions in order for a banking entity to engage in permissible prime brokerage transactions.[617] The

[613] *See* final rule § ____.14(a)(1).

[614] *See* U.S.C. 1851(f)(3).

[615] Neither the statute nor the proposal limits covered transactions between a banking entity and a covered fund for which the banking entity does not serve as investment manager, investment adviser, or sponsor (as defined in section 13 of the BHC Act) or have an interest in reliance on section 13(d)(1)(G) of the BHC Act. Similarly, the final rule does not limit such covered transactions.

[616] *See* 12 U.S.C. 1851(f)(3).

[617] *See* final rule § ____.14(a)(2)(ii).

2013 rule's conditions are that (i) the banking entity is in compliance with each of the limitations set forth in § ____.11 of the 2013 rule with respect to a covered fund organized and offered by the banking entity or any of its affiliates; (ii) the CEO (or equivalent officer) of the banking entity certifies in writing annually that the banking entity does not, directly or indirectly, guarantee, assume, or otherwise insure the obligations or performance of the covered fund or of any covered fund in which such covered fund invests; and (iii) the Board has not determined that such transaction is inconsistent with the safe and sound operation and condition of the banking entity.

The proposal retained each of the 2013 rule's conditions for the prime brokerage exemption described above, including the requirement that certification be made to the appropriate agency for the banking entity.[618] Staffs of the agencies previously issued guidance explaining when a banking entity was required to provide this certification during the conformance period.[619] The proposal incorporated this guidance into the rule text by requiring banking entities to provide the CEO certification annually no later than March 31 of the relevant year.[620] This change was intended to provide banking entities with certainty about when the required certification must be provided to the appropriate agency in order to comply with the prime brokerage exemption. As under the 2013 rule, under the proposal, the CEO would have a duty to update the certification if the information in the certification materially changes at any time during the year when he or she becomes aware of the material change.[621]

One commenter recommended that the agencies expressly state that the CEO certification for purposes of the prime brokerage exemption is based on a reasonable review by the CEO and is made based on the knowledge and reasonable belief of the CEO.[622] That commenter also requested that the agencies clarify that the term ''prime brokerage transaction'' includes transactions and services commonly provided in connection with prime brokerage transactions, as described under the 2013 rule, including: (1) Lending and borrowing of financial assets, (2) provision of secured financing collateralized by financial assets, (3) repurchase and reverse repurchase of financial assets, (4) derivatives, (5) clearance and settlement of transactions, (6) ''give-up'' agreements, and (7) purchase and sale of financial assets from inventory.[623] Similarly, another commenter requested that the agencies clarify that the term ''prime brokerage transaction'' applies to any transaction provided in connection with custody, clearance and settlement, securities borrowing or lending services, trade execution, financing, or data, operational, and administrative support regardless of which business line within the banking entity conducts the business.[624] The same commenter suggested that any prime brokerage transaction with a second-tier covered fund should be presumed to comply with section ____.14 of the rule and the prime brokerage exemption as long as it is executed in compliance with the requirements of Section 23B of the Federal Reserve Act.[625] In addition, one commenter recommended limiting the prime brokerage exemption by, for instance, excluding financing and securities lending and borrowing from the prime brokerage exemption.[626]

The final rule adopts the proposed revision to the prime brokerage exemption with no changes. The agencies believe that codifying a deadline for CEO certification with respect to prime brokerage transactions will provide banking entities with greater certainty and facilitate supervision and review of the prime brokerage exemption. With respect to the other issues raised by commenters regarding the prime brokerage exemption in section 13(f) of the BHC Act, the agencies continue to consider these issues and intend to issue a separate proposed rulemaking that specifically addresses these issues.

D. Subpart D—Compliance Program Requirement; Violations

1. Section ____.20: Program for Compliance; Reporting

Section ____.20 of the 2013 rule contains compliance program and metrics collection and reporting requirements. The 2013 rule was intended to focus the most significant compliance obligations on the largest and most complex organizations, while minimizing the economic impact on small banking entities.[627] To this end, the 2013 rule included a simplified compliance program for small banking entities and banking entities that did not engage in extensive trading activity.[628] However, as the agencies noted in the proposal, public feedback has indicated that even determining whether a banking entity is eligible for the simplified compliance program could require significant analysis for small banking entities. In addition, certain traditional banking activities of small banks fall within the scope of the proprietary trading and covered fund prohibitions and exemptions, making banks engaging in these activities ineligible for the simplified compliance program. As the agencies noted in the proposal, public feedback has also indicated that the compliance program requirements are unduly burdensome for larger banking entities that must implement the rule's enhanced compliance program, metrics, and CEO attestation requirements. Accordingly, the agencies proposed to revise the compliance program requirements to allow greater flexibility for banking entities in integrating the Volcker compliance and exemption requirements into existing compliance programs and to focus the requirements on the banking entities with the most significant and complex activities.

Specifically, the agencies proposed applying the compliance program requirement to banking entities as follows:

- Banking entities with significant trading assets and liabilities. Banking entities with significant trading assets and liabilities would have been subject to the six-pillar compliance program requirement (§ ____.20(b) of the 2013 rule), the metrics reporting requirements (§ ____.20(d) of the 2013 rule),[629] the covered fund documentation requirements (§ ____.20(e) of the 2013 rule), and the CEO attestation

[618] *See* 83 FR at 33486–87.

[619] *See supra* note 59, FAQ 18.

[620] *See* 83 FR at 33487.

[621] This duty to update the certification is required as a condition of the statutory exemption. *See* 12 U.S.C. 1851(f)(3)(A)(ii).

[622] *See* SIFMA.

[623] *See id.*

[624] *See* ABA.

[625] *See id.*

[626] *See* Occupy the SEC.

[627] *See* 79 FR 5753.

[628] Banking entities did not have any compliance program obligations under the 2013 rule if they do not engage in any covered activities other than trading in certain government, agency, State or municipal obligations. § ____20(f)(1). Additionally, banking entities with $10 billion or less in total consolidated assets could satisfy the compliance program requirements under the 2013 rule by including appropriate references to the requirements of section 13 of the BHC Act and the implementing regulations in their existing policies and procedures. § ____.20(f)(2).

[629] As discussed below, the proposal would have amended the Appendix A metrics requirements to reduce compliance-related inefficiencies while allowing for the collection of data to permit the agencies to better monitor compliance with section 13 of the BHC Act. In addition, the proposal would have eliminated Appendix B of the 2013 rule, which would have resulted in Appendix A being re-designated as the ''Appendix.''

requirement (Appendix B of the 2013 rule).[630]

- Banking entities with moderate trading assets and liabilities. Banking entities with moderate trading assets and liabilities would have been required to establish the simplified compliance program (described in § ____.20(f)(2) of the 2013 rule) and comply with the CEO attestation requirement.
- Banking entities with limited trading assets and liabilities. Banking entities with limited trading assets and liabilities would have been presumed to be in compliance with the proposal and would have had no obligation to demonstrate compliance with subpart B and subpart C of the implementing regulations on an ongoing basis. These banking entities would not have been required to demonstrate compliance with the rule unless and until the appropriate agency, based upon a review of the banking entity's activities, determined that the banking entity should have been treated as if it did not have limited trading assets and liabilities.

After reviewing all of the comments to this section, the agencies are finalizing these changes largely as proposed, except for further tailoring application of the CEO attestation requirement to only banking entities with significant trading assets and liabilities and revising the notice and response procedures in subpart D to be more broadly applicable.

a. Compliance Program Requirements for Banking Entities With Significant Trading Assets and Liabilities

i. Section 20(b)—Six-Pillar Compliance Program

Section ____.20(b) of the 2013 rule specifies six elements that each compliance program required under that section must at a minimum contain.

The six elements specified in § ____.20(b) are:

- Written policies and procedures reasonably designed to document, describe, monitor and limit trading activities and covered fund activities and investments conducted by the banking entity to ensure that all activities and investments that are subject to section 13 of the BHC Act and the rule comply with section 13 of the BHC Act and the 2013 rule;
- A system of internal controls reasonably designed to monitor compliance with section 13 of the BHC Act and the rule and to prevent the occurrence of activities or investments that are prohibited by section 13 of the BHC Act and the 2013 rule;
- A management framework that clearly delineates responsibility and accountability for compliance with section 13 of the BHC Act and the 2013 rule and includes appropriate management review of trading limits, strategies, hedging activities, investments, incentive compensation and other matters identified in the rule or by management as requiring attention;
- Independent testing and audit of the effectiveness of the compliance program conducted periodically by qualified personnel of the banking entity or by a qualified outside party;
- Training for trading personnel and managers, as well as other appropriate personnel, to effectively implement and enforce the compliance program; and
- Records sufficient to demonstrate compliance with section 13 of the BHC Act and the 2013 rule, which a banking entity must promptly provide to the relevant agency upon request and retain for a period of no less than 5 years.

Under the 2013 rule, these six elements have to be part of the required compliance program of each banking entity with total consolidated assets greater than $10 billion that engages in covered trading activities and investments subject to section 13 of the BHC Act and the implementing regulations (excluding trading permitted under § ____.6(a) of the 2013 rule).

The agencies proposed further tailoring the compliance program requirements to make the scale of compliance activity required by the rule commensurate with a banking entity's size and level of trading activity. Specifically, the proposal would have applied the six-pillar compliance program requirements to banking entities with significant trading assets and liabilities and would have afforded flexibility to integrate the § ____.20 compliance program requirements into other compliance programs of the banking entity. The proposal also would have eliminated the enhanced compliance program requirements found in Appendix B of the 2013 rule,[631] except for the CEO attestation requirement discussed below. The proposal also would have revised the covered fund documentation requirements in § ____.20(e), which applied to all banking entities with greater than $10 billion in total consolidated assets under the 2013 rule, to only apply to firms with significant trading assets and liabilities.

Several commenters expressed support for the elimination of the enhanced compliance program requirements in Appendix B of the 2013 rule.[632] One commenter requested that the agencies provide greater discretion to banking entities with significant trading assets and liabilities to tailor their compliance programs to the size and complexity of their activities and structure of their business.[633] A few commenters opposed the elimination of Appendix B of the 2013 rule.[634] One asserted that firms have already made investments in their compliance programs, so there was no justification for the change.[635] Another commenter argued that the remaining controls are not sufficient to ensure compliance with the rule because they lack specificity.[636] This commenter also asserted that merging the Volcker Rule requirements with the safety and soundness compliance framework would be problematic as the Volcker Rule considers market supply and demand dynamics while the safety and soundness compliance framework generally only considers risks.[637] The concern was that a combined program might not adequately consider the activities restrictions of the Volcker Rule.

The agencies are adopting the six-pillar compliance program requirements and retaining the covered fund

[630] Although the proposal would have eliminated Appendix B, as noted above, it would have continued to apply a modified version of the CEO attestation to banking entities without limited trading assets and liabilities.

[631] The enhanced minimum standards in Appendix B of the 2013 rule required that the firm's compliance program: (1) Be reasonably designed to identify, document, monitor, and report the trading and covered fund activities and investments of the banking entity; identify, monitor and promptly address the risks of these activities and investments and potential areas of noncompliance; and prevent activities or investments prohibited by, or that do not comply with, section 13 of the BHC Act and the 2013 rule; (2) establish and enforce appropriate limits on the activities and investments of the banking entity, including limits on the size, scope, complexity, and risks of the individual activities or investments consistent with the requirements of section 13 of the BHC Act and the 2013 rule; (3) subject the effectiveness of the compliance program to periodic independent review and testing, and ensure that the entity's internal audit, corporate compliance and internal control functions involved in review and testing are effective and independent; (4) make senior management, and others as appropriate, accountable for the effective implementation of the compliance program, and ensure that the board of directors and CEO (or equivalent) of the banking entity review the effectiveness of the compliance program; and (5) facilitate supervision and examination by the agencies of the banking entity's trading and covered fund activities and investments.

[637] *Id.*

documentation requirements for banking entities with significant trading assets and liabilities as proposed. The agencies continue to believe that these banking entities are engaged in activities at a scale that warrants the costs of establishing and maintaining the detailed and comprehensive compliance program elements described in §§ ____.20(b) and ____.20(e) of the rule. Accordingly, the agencies believe it is appropriate to require banking entities with significant trading assets and liabilities to maintain a six-pillar compliance program to ensure that banking entities' activities are conducted in compliance with section 13 of the BHC Act and the implementing regulations. Based on experience with the six-pillar compliance program requirements under the 2013 rule, the agencies believe that such requirements are appropriate and effective for firms with significant trading assets and liabilities; these standards impose certain minimum standards, but permit the banking entity flexibility to reasonably design the program in light of the banking entity's activities. The agencies also believe that the prescribed six-pillar compliance requirements are consistent with the standards banking entities use in their traditional risk management and compliance processes.

The agencies believe that banking entities should have discretion to tailor their compliance programs to the structure and activities of their organizations. The flexibility to build on compliance programs that already exist at banking entities, including internal limits, risk management systems, board-level governance protocols, and the level at which compliance is monitored, may reduce the costs and complexity of compliance while also enabling a robust compliance mechanism for the final rule.

The agencies therefore believe that removal of the specific, enhanced minimum standards in Appendix B will afford a banking entity considerable flexibility to satisfy the elements of § ____.20 in a manner that it determines to be most appropriate given its existing compliance regimes, organizational structure, and activities. Allowing banking entities the flexibility to integrate Volcker Rule compliance requirements into existing compliance programs should increase the effectiveness of the § ____.20 requirements by eliminating duplicative governance and oversight structures arising from the Appendix B requirement for a stand-alone compliance program.

ii. CEO Attestation Requirement

The 2013 rule included a requirement in its Appendix B that a banking entity's CEO must review and annually attest in writing to the appropriate agency that the banking entity has in place processes to establish, maintain, enforce, review, test, and modify the compliance program established pursuant to Appendix B and § ____.20 of the 2013 rule in a manner reasonably designed to achieve compliance with section 13 of the BHC Act and the implementing regulations.

Under the proposal, Appendix B would have been eliminated, and a modified CEO attestation requirement would have applied to banking entities with significant trading assets and liabilities or moderate trading assets and liabilities. The agencies believed that, while the revisions to the compliance program requirements under the proposal generally would simplify the compliance program requirements, this simplification should be balanced against the requirement for all banking entities to maintain compliance with section 13 of the BHC Act and the implementing regulations. Accordingly, the agencies believed that applying the CEO attestation requirement to banking entities with meaningful trading activities would ensure that the compliance programs established by these banking entities pursuant to § ____.20(b) or § ____.20(f)(2) of the proposal would be reasonably designed to achieve compliance with section 13 of the BHC Act and the implementing regulations as proposed. The agencies proposed limiting the CEO attestation requirement to banking entities with moderate trading assets and liabilities or significant trading assets and liabilities because, under the proposal, banking entities with limited trading assets and liabilities would have been subject to a rebuttable presumption of compliance. Thus, the agencies did not believe it necessary to require a CEO attestation for banking entities with limited trading assets and liabilities as those banking entities would not be subject to the express requirement to maintain a compliance program pursuant to § ____.20 under the proposal. Further, the agencies proposed retaining the 2013 rule's language concerning how the CEO attestation requirement applies to the U.S. operations of a foreign banking entity. This language states that, in the case of the U.S. operations of a foreign banking entity, including a U.S. branch or agency of a foreign banking entity, the attestation may be provided for the entire U.S. operations of the foreign banking entity by the senior management officer of the U.S. operations of the foreign banking entity who is located in the United States.

Several commenters expressed support for the CEO attestation requirement and recommended that the agencies make no changes to the requirement or apply it to all banking entities.[638] Other commenters believed that the CEO attestation requirement should not apply to banking entities with moderate trading assets and liabilities,[639] as requiring the development of costly and burdensome internal compliance efforts would not be consistent with the activities or risks of such firms.[640] One commenter argued that the CEO attestation requirement duplicates existing quarterly reporting process,[641] and another commenter asserted that imposing such a requirement for firms with moderate trading assets and liabilities would negate the tailoring the agencies proposed for those banking entities.[642] One commenter urged the agencies to limit the application of the compliance program and reporting requirements to only the U.S. operations of foreign banking entities.[643] Other requests for modification included streamlining the CEO attestation requirement,[644] adding a knowledge qualifier,[645] and limiting the scope to only U.S. operations.[646] A few commenters requested that the CEO attestation be completely eliminated.[647]

After reviewing the comments, the agencies have decided to retain the CEO attestation requirement but only for banking entities with significant trading assets and liabilities. The agencies continue to believe that incorporating the CEO attestation requirement (which was previously in Appendix B of the 2013 rule) into § ____.20(c) will help to ensure that the compliance program established pursuant to that section is reasonably designed to achieve compliance with section 13 of the BHC Act and the implementing regulations.

However, the agencies have decided not to apply the CEO attestation requirement to banking entities without significant trading assets and liabilities. Such banking entities will still need to comply with section 13 of the BHC Act and the implementing regulations;

[638] *See, e.g.,* AFR; Merkley; Better Markets; and Data Boiler.

[639] *See, e.g.,* Capital One et al.; ABA; Arvest; BB&T; State Street; BPI; and IIB.

[640] *See* Capital One et al.

[641] *See* BOK.

[642] *See* Capital One et al.

[643] *See* IIB.

[644] *See, e.g.,* ABA and JBA.

[645] *See, e.g.,* ABA and FSF.

[646] *See* JBA.

[647] *See* BOK and Capital One et al.

however, they will not need to provide CEO attestations. This means that the CEO attestation requirement will not be expanded to cover banking entities that did not need to provide CEO attestations under the 2013 rule.[648] The agencies believe that requiring a CEO attestation from banking entities with limited or moderate trading assets and liabilities would result in additional costs and burdens that would not be commensurate with the type of activities or risks of these firms.

b. Compliance Program Requirements for Banking Entities With Moderate Trading Assets and Liabilities

The 2013 rule provided that a banking entity with total consolidated assets of $10 billion or less as measured on December 31 of the previous two years that engages in covered activities or investments pursuant to subpart B or subpart C of the 2013 rule (other than trading activities permitted under § ____.6(a) of the 2013 rule) may satisfy the compliance program requirements by including in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act and subpart D of the implementing regulations and adjustments as appropriate given the activities, size, scope, and complexity of the banking entity.[649]

The agencies proposed extending the availability of this simplified compliance program to banking entities with moderate trading assets and liabilities. The agencies believed that streamlining the compliance program requirements for banking entities with moderate trading assets and liabilities would be appropriate because the scale and nature of the activities and investments in which these banking entities are engaged may not justify the additional costs associated with establishing the compliance program elements under §§ ____.20(b) and (e) of the 2013 rule. Such activities may be appropriately managed through an appropriately tailored simplified compliance program. The agencies noted that banking entities with moderate trading assets and liabilities would be able to incorporate their simplified compliance program into existing compliance policies and procedures and tailor their compliance programs to the size and nature of their activities, consistent with the approach for banking entities with significant trading assets and liabilities.

Other commenters expressed support for a tailored compliance program for banking entities with moderate trading assets and liabilities.[650] The agencies are adopting the compliance program requirements, as proposed, for banking entities with moderate trading assets and liabilities, for the aforementioned reasons. Thus, a banking entity with moderate trading assets and liabilities qualifies for the simplified compliance program under § ____.20(f)(2) of the final rule.

c. Compliance Program Requirements for Banking Entities With Limited Trading Assets and Liabilities

Under the proposal, a banking entity with limited trading assets and liabilities would have been presumed to be in compliance with the rule. Banking entities with limited trading assets and liabilities would have had no obligation to demonstrate compliance with subpart B and subpart C of the implementing regulations on an ongoing basis, given the limited scale of their trading operations. The agencies believed, based on experience implementing and supervising compliance with the 2013 rule, that these banking entities generally engage in minimal trading and investment activities subject to section 13 of the BHC Act. Thus, the agencies believed that the limited trading assets and liabilities of the banking entities qualifying for the presumption of compliance would be unlikely to warrant the costs of establishing a compliance program under § ____.20 of the 2013 rule.

Under the proposed approach, the agencies would not have expected a banking entity with limited trading assets and liabilities that qualified for the presumption of compliance to demonstrate compliance with the proposal on an ongoing basis in conjunction with the agencies' normal supervisory and examination processes. However, the appropriate agency would have been able to exercise its authority to treat the banking entity as if it did not have limited trading assets and liabilities if, upon review of the banking entity's activities, the relevant agency determined that the banking entity engaged in proprietary trading or covered fund activities that were otherwise prohibited under subpart B or subpart C. A banking entity would have been expected to remediate any impermissible activity upon being notified of such determination by the agency within a period of time deemed appropriate by the agency.

In addition, irrespective of whether a banking entity had engaged in activities in violation of subpart B or C, the relevant agency would have retained its authority to require a banking entity to apply the compliance program requirements that would otherwise apply if the banking entity had significant or moderate trading assets and liabilities if the relevant agency determined that the size or complexity of the banking entity's trading or investment activities, or the risk of evasion, did not warrant a presumption of compliance.

One commenter expressed support for the rebuttable presumption of compliance for banking entities with limited trading assets and liabilities.[651] Another commenter suggested completely exempting banking entities with limited trading assets and liabilities from section 13 of the BHC Act.[652] One commenter requested that the evidence that an agency would require in response to its attempt to rebut a presumption should not be greater than what is required of the banking entity under the presumption.[653] Another commenter recommended that the agencies treat inadvertent violations of the rule as supervisory matters and not as violations.[654]

The final rule adopts the compliance program requirements for banking entities with limited trading assets and liabilities as proposed. The agencies note that the removal of the standard compliance program requirements in § ____.20 for banking entities with limited trading assets and liabilities does not relieve those banking entities of the obligation to comply with the prohibitions and other requirements of the permitted trading activity exemptions, to the extent that the banking entity engages in such activities, including RENTD requirements for permitted underwriting and market making, under the final rule. The agencies believe the presumption of compliance for banking entities with limited trading assets and liabilities will allow flexibility for these banking entities to take appropriate actions, tailored to the individual activities in which the banking entities engage, to comply with the rule. Such

[648] The 2013 rule applied the CEO attestation requirement to all banking entities with total consolidated assets of $50 billion or more (or, in the case of a foreign banking entity, total U.S. assets of $50 billion or more). By applying the CEO attestation requirement to banking entities with moderate trading assets and liabilities, the proposal would have expanded its applicability to certain banking entities with less than $50 billion in total U.S. assets that were not subject to the requirement under the 2013 rule.

[649] 2013 rule § ____.20(f)(2).

[650] *See, e.g.,* BB&T and JBA.

[651] *See* B&F.

[652] *See* JBA.

[653] *See* SIFMA.

[654] *See* ABA.

actions may include, for example, integrating the requirements for permitted trading activities under the exemptions in § ____.4, ____.5, and ____.6 into existing internal policies and procedures (to the extent the banking entity engages in such activities), or taking other steps to satisfy the criteria to engage in such activities under the final rule. Regarding one commenter's proposal that the agencies completely exempt banking entities with limited trading activities, the agencies note that section 13 of the BHC Act does not give the agencies authority to completely exempt banking entities from the requirements of the Volcker Rule.

d. Notice and Response Procedures

The proposed rule included notice and response procedures that an agency would follow when determining whether to treat a banking entity with limited trading assets and liabilities as if it did not have limited trading assets and liabilities.[655] The notice and response procedures required the relevant agency to provide a written explanation of its determination and allowed the banking entity the opportunity to respond to the agency with any matters that the banking entity would have the agency consider in reaching its determination. The response procedures would have required the banking entity to respond within 30 days unless the agency extended the time period for good cause or if the agency shortened the time period either with the consent of the banking entity or because the conditions or activities of the banking entity so required. Failure to respond within the applicable timeframe would have constituted a waiver of objection to the agency's determination. After the close of the response period, the agency would have decided, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the agency's determination and would have notified the banking entity of its decision in writing. These notice and response procedures were similar, but not identical to, notice and response procedures found elsewhere in the proposed rule.[656]

One commenter suggested that there should be a consistent notice and response process regarding all presumptions in the final rule.[657] The agencies agree and have modified the notice and response procedures in subpart D to apply more broadly to several types of determinations under the final rule, including determinations and rebuttals made under §§ ____.3, ____.4, and ____.20.[658] This change will provide consistency and enhance transparency with respect to the processes that an agency will follow for certain determinations throughout the final rule.

E. Subpart E—Metrics: Appendix to Part [•]—Reporting and Recordkeeping Requirements

Under the 2013 rule, a banking entity with substantial trading activity[659] must furnish the following quantitative measurements for each of its trading desks engaged in covered trading activity, calculated in accordance with Appendix A:

- Risk and position limits and usage;
- Risk factor sensitivities;
- Value-at-risk and stressed VaR;
- Comprehensive profit and loss attribution;
- Inventory turnover;
- Inventory aging; and
- Customer-facing trade ratio.

The proposal explained that, based on the agencies' evaluation of the effectiveness of the metrics data in monitoring covered trading activities for compliance with section 13 of the BHC Act and the associated reporting costs,[660] the proposed rule would have amended Appendix A requirements to reduce compliance-related inefficiencies while allowing for the collection of data to permit the agencies to better monitor compliance with section 13 of the BHC Act.[661] Specifically, the proposed rule would have made the following modifications to the reporting requirements in Appendix A:

- Limit the applicability of certain metrics only to market making and underwriting desks.
- Replace the Customer-Facing Trade Ratio with a new Transaction Volumes metric to more precisely cover types of trading desk transactions with counterparties.
- Replace Inventory Turnover with a new Positions metric, which measures the value of all securities and derivatives positions.
- Remove the requirement to separately report values that can be easily calculated from other reported quantitative measurements.
- Streamline and make consistent value calculations for different product types, using both notional value and market value to facilitate better comparison of metrics across trading desks and banking entities.
- Eliminate inventory aging data for derivatives because aging, as applied to derivatives, does not appear to provide a meaningful indicator of potential impermissible trading activity or excessive risk-taking.
- Require banking entities to provide qualitative information specifying for each trading desk the types of financial instruments traded, the types of covered trading activity the desk conducts, and the legal entities into which the trading desk books trades.
- Require a Narrative Statement describing changes in calculation methods, trading desk structure, or trading desk strategies.
- Remove the paragraphs labeled ''General Calculation Guidance'' from the regulation. The Instructions generally would provide calculation guidance.[662]
- Remove the requirement that banking entities establish and report limits on Stressed Value-at-Risk at the trading desk-level because trading desks do not typically use such limits to manage and control risk-taking.
- Require banking entities to provide descriptive information about their reported metrics, including information uniquely identifying and describing

[655] *See* proposed rule § ____.20(g)(2)(ii).

[656] *See* proposed rule §§ ____.3(c), ____.3(g)(2), ____.4(a)(8)(iv), ____.4(b)(6)(iv).

[657] *See* IIB.

[658] *See* final rule § ____.20(i).

[659] Appendix A of the 2013 rule applies to U.S. banking entities with trading assets and liabilities the average gross sum of which equals or exceeds $10 billion on a worldwide consolidated basis over the previous four calendar quarters (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States), and to foreign banking entities with combined U.S. trading assets and liabilities the average gross sum of which equals or exceeds $10 billion over the previous four calendar quarters (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States). 2013 rule § ____.20(d)(1).

[660] *See* 79 FR at 5772.

[661] As previously noted in the section entitled ''Enhanced Minimum Standards for Compliance Programs,'' the Agencies are proposing to eliminate Appendix B of the 2013 rule. Current Appendix A is therefore re-designated as the ''Appendix'' in the final rule.

[662] The Instructions will be available on each agency's respective website at the addresses specified in the Paperwork Reduction Act section of this **SUPPLEMENTARY INFORMATION**. For the SEC and CFTC, this document represents the views of SEC staff and CFTC staff; neither Commission has approved nor disapproved them. The Instructions are not a rule, regulation, or statement of the SEC or the CFTC; and like all SEC or CFTC staff guidance, it has no legal force or effect, does not alter or amend applicable law, and creates no new or additional SEC or CFTC obligations for any person. Consistent with changes elsewhere in the final rule and with the Federal banking agencies' Interagency Statement Clarifying the Role of Supervisory Guidance (Sept. 11, 2018; *https://www.federalreserve.gov/supervisionreg/srletters/sr1805.htm, https://www.occ.gov/news-issuances/news-releases/2018/nr-ia-2018-97a.pdf, https://www.fdic.gov/news/news/financial/2018/fil18049.html*), the agencies are removing references to guidance and expectations from the regulatory text of the metrics reporting requirements.

certain risk measurements and information identifying the relationships of these measurements within a trading desk and across trading desks.

• Require electronic submission of the Trading Desk Information, Quantitative Measurements Identifying Information, and each applicable quantitative measurement in accordance with the XML Schema specified and published on each agency's website.[663]

Several commenters objected to the proposed rule's modification of the metrics. Some commenters suggested that the proposed amendments to metrics reporting were inappropriate in light of the lack of public disclosure of previously reported metrics information, and in some cases recommended that the agencies expand metrics reporting requirements.[664] Other commenters recommended that the agencies simplify or eliminate the metrics.[665] As described in detail below, the final rule streamlines the reporting requirements in Appendix A of the 2013 rule and adopts a limited set of the new requirements introduced in the proposal. Among other changes, the final rule entirely eliminates the stressed value-at-risk, risk factor sensitivities, and inventory aging. Taken together, the agencies estimate that the revised metrics in the final rule would result in a 67 percent reduction in the number of data items and approximately 94 percent reduction in the total volume of data, relative to the 2013 rule's reporting requirement. The agencies believe the remaining metrics are generally useful to help firms demonstrate that their covered trading activities are conducted appropriately, and to enable the agencies to identify activities that potentially involve impermissible proprietary trading. Moreover, the agencies believe that these items do not pose a special calculation burden because firms generally already record these values in the regular course of business. The agencies expect that the changes in the final rule will enable banking entities to leverage calculations from their market risk capital programs to meet the requirements for the Volcker Rule quantitative measurements, which will reduce complexity and cost for banking entities, and improve the effectiveness of the final rule.[666] As discussed above, in order to give banking entities a sufficient amount of time to comply with the changes adopted, banking entities will not be required to comply with the final amendments until January 1, 2021 (although banking entities may voluntarily comply, in whole or in part, with the amendments adopted in this release prior to the compliance date, subject to the agencies' completion of necessary technological changes). By providing an extended compliance period, the final amendments also should facilitate firms in integrating these requirements into existing or planned compliance programs.

1. Purpose

Paragraph I.c of Appendix A of the 2013 rule provides that the quantitative measurements that are required to be reported under the rule are not intended to serve as a dispositive tool for identifying permissible or impermissible activities. The proposal would have expanded the qualifying language in paragraph I.c of Appendix A to apply to all of the information required to be reported pursuant to the appendix, rather than only to the quantitative measurements themselves. In addition, the proposed rule would have also removed paragraph I.d. in Appendix A of the 2013 rule, which provides that the agencies would review the metrics data and revise the metrics collection requirements based on that review.

The agencies received no comments on these proposed changes. The final rule adopts the changes, as proposed. The agencies believe that the trading desk information and quantitative measurements identifying information, coupled with the quantitative measurements, should assist the agencies in monitoring compliance. This information will be used to monitor patterns and identify activity that may warrant further review. Additionally, the final rule removes paragraph I.d. Appendix A of the 2013 rule, as the agencies have conducted this preliminary evaluation of the effectiveness of the quantitative measurements collected to date and have adopted modifications based on that review.

2. Definitions

The proposed rule would have clarified the definition of ''covered trading activity'' by adding the phrase ''in its covered trading activity'' to clarify that the term ''covered trading activity,'' as used in the proposed appendix, may include trading conducted under § ____.3(d), ____.6(c), ____.6(d), or ____.6(e) of the proposal.[667] In addition, the proposed rule defined two additional terms for purposes of the appendix, ''applicability'' and ''trading day,'' that were not defined in the 2013 rule. The proposal defined ''applicability'' to clarify when certain metrics are required to be reported for specific trading desks and thus make several metrics applicable only to desks engaged in market making or underwriting. Finally, the proposal defined ''trading day,'' a term used throughout Appendix A of the 2013 rule,[668] to mean a calendar day on which a trading desk is open for trading.

Commenters supported the proposal to define ''applicability'' in order to clarify that certain metrics are only applicable to desks engaged in market making or underwriting.[669] One commenter suggested defining the scope of ''covered trading activity'' to align with activity covered under the Basel Committee's revised standard for market risk capital.[670] While the agencies received no comments on the proposed definition of ''trading day'' in the regulation, several comments expressed serious concerns with the proposed ''trading day'' definition in the 2018 Instructions,[671] specifically requiring banking entities to report metrics for trading days when U.S. markets are closed but non-U.S. locations may be open.[672] These commenters argued that this would impose significant operational costs with no commensurate benefit to the agencies' oversight ability. However, the Agencies feel the definition of trading day is appropriate because the potential for impermissible

[663] The staff-level Technical Specifications Guidance describes the XML Schema. The Technical Specifications Guidance and the XML Schema are available on each agency's respective website at the addresses specified in the Paperwork Reduction Act section of this **SUPPLEMENTARY INFORMATION**.

[664] *See, e.g.,* AFR; Better Markets; Occupy the SEC; Public Citizen; and Volcker Alliance.

[665] *See, e.g.,* ABA; FSF; IIB; New England Council; and SIFMA.

[666] The agencies anticipate the market risk capital calculations and the Volcker Rule quantitative measurements will align particularly closely when the banking agencies adopt a rule implementing the Basel Committee's market risk capital standard in the United States. However, the agencies note that certain anticipated changes resulting from the Basel market risk capital standards may still result in a mismatch between metrics required under the market risk capital rule and the final rule. The agencies are aware of this potential issue and intend to address any such discrepancies at a future date.

[667] The proposed change would clarify that banking entities would have the discretion (but not the obligation) to report metrics with respect to a broader range of activities.

[668] Appendix A of the 2013 rule provides that the calculation period for each quantitative measurement is one trading day, but does not define ''trading day''.

[669] *See, e.g.,* Credit Suisse; FSF; and JBA.

[670] *See* JBA.

[671] The definition in the Instructions require banking entities to calculate each metric for each calendar day on which a trading desk is open for trading, even if the desk is closed for trading in one jurisdiction (for example, due to a national holiday).

[672] *See, e.g.,* ABA; CCMR; FSF; and SIFMA.

trading activity on a desk exists on any day when the desk is open for trading, regardless of which markets are open. The final rule retains the definition.

The agencies believe that the scope of ''covered trading activity'' in the final rule is appropriate, and note that, due to changes in the definition of trading account, the scope of ''covered trading activity'' will align more closely with the scope of activities covered under the Basel Committee's market risk capital standards for certain banking entities. Therefore, the final rule adopts these definitions as proposed.

3. Reporting and Recordkeeping

Paragraph III.a of Appendix A of the 2013 rule required banking entities subject to the appendix to furnish seven quantitative metrics for all trading desks engaged in trading activity conducted pursuant to § ____.4, § ____.5, or § ____ .6(a) (*i.e.,* permitted underwriting, market making, and risk-mitigating hedging activity and trading in certain government obligations).[673]

The proposal would have made several modifications to streamline the reporting requirements in paragraph III.a of Appendix A of the 2013 rule. Specifically, the proposal would have: (1) Replaced the Inventory Turnover and Customer-Facing Trade Ratio metrics with the Positions and Transaction Volumes quantitative measurements, respectively; (2) limited the Inventory Aging metric to only apply to securities[674] and changed the name of the quantitative measurement to the Securities Inventory Aging; (3) added the phrase ''as applicable'' to paragraph III.a in order to limit application of the Positions, Transaction Volumes, and Securities Inventory Aging quantitative measurements to only trading desks that rely on § ____.4(a) or § ____.4(b) to conduct underwriting activity or market making-related activity, respectively; and (4) inserted references in paragraph III.a to the new qualitative information requirements added to the appendix (*i.e.,* Trading Desk Information, Quantitative Measurements Identifying Information, and Narrative Statement requirements).[675]

A number of commenters supported the proposed changes to remove or tailor certain of the metrics provided in Appendix A of the 2013 rule, but opposed the addition of new metrics reporting requirements (*i.e.,* Trading Day definition, Trading Desk Information, Quantitative Measurements Identifying Information, Narrative Statement).[676] These commenters argued that, contrary to the proposal's objective to streamline compliance requirements, the new reporting requirements would significantly increase the overall compliance burden and impose substantial compliance costs on firms.[677] Three commenters argued that the agencies did not provide reasoned cost benefit analysis to justify the inclusion of the new metrics.[678] A few commenters recommended that the agencies should further streamline the current metrics to permit individual supervisors and banking entities to collaborate on determining which metrics are appropriate for that specific institution.[679] One commenter expressed concern that the agencies intended for the newly added metrics to replace onsite supervision and review, as the new qualitative information requirements often duplicate the existing compliance program requirements.[680]

Other commenters opposed all of the proposed revisions to the metrics, with certain limited exceptions (*e.g.,* limiting Inventory Aging to securities).[681] Some of these commenters argued that the agencies should adopt an approach focused on further streamlining the metrics requirements included in Appendix A of the 2013 rule.[682] A few of these commenters argued that the proposed changes to the existing metrics would in effect create entirely new metrics and that the new metrics would not provide new information that cannot be obtained through the existing metrics.[683] Other commenters supported only retaining the Comprehensive Profit and Loss Attribution and Risk Management metrics.[684] Another commenter supported retaining the current requirements, as any revisions would necessitate changes to firms' current systems and thus impose considerable operational burdens and costs.[685] One commenter stressed the inability of the general public to provide informed comment on the proposed changes as the agencies have not publically disclosed any data related to firms' metrics submissions.[686] Another commenter noted that disclosing firms' metrics submissions on an aggregated and/or time-delayed basis would enable the general public to understand the impact of the Volcker Rule.[687] In contrast, other commenters urged the agencies not to publicly disclose the metrics data because the data is confidential supervisory information that could be used by competitors and could create distortions in the capital markets.[688] Another commenter recommended replacing the metrics with a utility platform that would automate and perform trade surveillance in real time.[689]

As described in detail below, the final rule focuses on streamlining the 2013 rule's reporting requirements and only adopts a limited set of the new qualitative requirements introduced in the proposal. The agencies believe the remaining metrics are generally useful tools to help both firms and supervisors identify activities that potentially involve impermissible proprietary trading. Moreover, the agencies believe that these items do not pose a special calculation burden because firms already record these values in the regular course of business.

Finally, although the agencies are not including any changes related to public disclosure of the quantitative measurements in this final rule, the agencies will continue to consider whether some or all of the quantitative measurements should be publicly disclosed, taking into account the need to protect sensitive, confidential information, as well as restrictions on the agencies relating to the disclosure of sensitive, confidential business and supervisory information on a firm-specific basis.

4. Trading Desk Information

The proposed rule added a new paragraph III.b to Appendix A to require

[673] In addition, the 2013 rule permits banking entities to optionally include trading under § ____.3(d), § ____.6(c), § ____.6(d), or § ____.6(e).

[674] Including derivatives or securities that also meet the 2013 rule's definition of a derivative *See infra* Part III.E.2.*i*.v (discussing the Securities Inventory Aging quantitative measurement). The definition of ''security'' and ''derivative'' are set forth in § ____.2 of the 2013 rule. *See* 2013 rule §§ ____.2 (h), (y).

[675] In addition, the proposed rule would have added to paragraph III.a. a requirement that banking entities include file identifying information in each submission to the relevant agency pursuant to Appendix A of the 2013 rule. Specifically, the proposal would have required the file identifying information to include the name of the banking entity, the RSSD ID assigned to the top-tier banking entity by the Board, the reporting period, and the creation date and time.

banking entities to report certain descriptive information for each trading desk engaged in covered trading activity, including the trading desk name and identifier, the type of covered activity conducted by the desk, a brief description of the trading desk's general strategy (*i.e.,* the method for conducting authorized trading activities), the types of financial instruments purchased and sold by the trading desk, and the list of legal entities used to book trades including which were the main booking entities. The proposal also would have required firms to indicate for each trading desk whether each calendar date is a trading day or not a trading day and to specify the currency used by a trading desk as well as the conversion rate to U.S. dollars, if applicable.

In general, most commenters opposed requiring banking entities to report any new information outside the scope of the 2013 rule requirements, including qualitative information for each trading desk.[690] These commenters argued that the *de minimis* benefit to the agencies' oversight ability did not justify the significant operational costs associated with the new requirements, in particular identifying the legal entities used as booking entities by the trading desk as well as the financial instruments and other products traded by the desk.[691]

After considering these comments, the final rule retains a modified version of the Trading Desk Information. The final rule eliminates the requirement for each trading desk to identify the financial instruments and other products traded by the desk. The final rule also replaces the requirement to identify the legal entities that serve as booking entities for each trading desk with the simpler requirement that the banking entity's submission for each trading desk list: (1) Each agency receiving the submission for the desk; and (2) the exemptions or exclusions under which the desk conducts trading activity. The exemption/exclusion identification is particularly necessary in light of the fact that some of the quantitative measurements identified below (*i.e.,* the customer-facing activity measurements) are only required for desks operating under the underwriting or market making exemptions. The list of the agencies that have received the submission for a desk should facilitate inter-agency coordination, as generally trading desks encompass multiple legal entities, for which more than one agency may be the primary federal regulator. The agencies believe that this approach appropriately balances the benefit to the agencies and the cost to firms from the new reporting obligations.

5. Quantitative Measurements Identifying Information

The proposed rule added a new paragraph III.c. to Appendix A to require banking entities to prepare and provide five schedules: (i) Risk and Position Limits Information Schedule; (ii) Risk Factor Sensitivities Information Schedule; (iii) Risk Factor Attribution Information Schedule; (iv) Limit/Sensitivity Cross-Reference Schedule; and (v) Risk factor Sensitivity/Attribution Schedule. The proposed schedules would have provided descriptive information on the quantitative measurements on a collective basis for all relevant trading desks. The new proposed Schedules would have required banking entities to provide detailed information regarding each limit and risk factor sensitivity reported in quantitative measurements as well as on the attribution of existing position profit and loss to the risk factor reported in the quantitative measurements. In addition, the new Limit/Sensitivity Cross-Reference Schedule would have required banking entities to cross-reference, by unique identification label, a limit reported in the Risk and Position Limits Information Schedule to any associated risk factor sensitivity reported in the Risk Factor Sensitivities Information Schedule.

Many commenters generally opposed requiring banking entities to report any new information outside the scope of the 2013 rule requirements, including quantitative measurements identifying information.[692] One commenter argued that these new requirements impose undue costs on firms without providing any new supervisory benefit as they duplicate existing requirements in § ____.20, which information the agencies can obtain through the normal supervisory and examination process.[693] This commenter further noted that increasing the scope of the appendix submission may harm the agencies' ability to effectively supervise Volcker compliance, by increasing the supervisory resources necessary to review the data at the detriment of performing normal supervision.

After considering these comments, the final rule retains a modified version of the Quantitative Measurements Identifying Information that eliminates the Risk Factor Sensitivities Information Schedule, the Limit/Sensitivity Cross-Reference Schedule and the Risk-Factor Sensitivity/Attribution Cross-Reference Schedule. Despite the potential benefit to the agencies from having a deeper understanding of the relationship between firms' limits and the risk factor sensitivities, the agencies agree that the proposed requirements could significantly increase firms' reporting burden in a way not commensurate with the potential benefits. The final rule retains the Risk Factor Attribution Information Schedule and a modified version of the Risk and Position Limits Information Schedule that includes identification of the corresponding risk factor attribution for certain limits (''Internal Limits Information Schedule''). While together these schedules add two new reporting elements relative to the 2013 Appendix A (*i.e.,* a description of the limit/risk factor sensitivities and risk factor attribution for certain limits), the agencies generally expect firms to realize a net reduction in reporting burden from the elimination of the duplicative reporting requirements in the current framework. The 2013 rule requires firms report internal limits, including but not limited to risk and position limits, and risk factor sensitivities established for each trading desk on a daily basis. As in practice, firms often use the same limits and risk factors for multiple desks, the 2013 rule results in firms reporting the same limit on a daily basis for multiple desks. These two new schedules reduce reporting burden by allowing firms to submit a comprehensive list of all the internal limits and the risk factor sensitivities that account for a preponderance of the profit or loss for the trading desks. Additionally, the final rule eliminates the requirement to report Risk Factor Sensitivities for each trading desk on a daily basis. Based on the submissions received to date, the agencies expect this change alone will reduce the total volume of data submitted by more than half relative to the 2013 rule.

6. Narrative Statement

The proposed rule would have added a new paragraph III.d. to require banking entities to submit a Narrative Statement in a separate electronic document to the relevant agency that describes any changes in calculation methods used for its quantitative measurements, or the trading desk structure (*e.g.,* adding, terminating, or merging pre-existing desks) or strategies. In addition, in its Narrative Statement, a banking entity, if applicable, would

[690] *See, e.g.,* ABA; Credit Suisse; CCMR; FSF; IIB; JBA; and SIFMA.

[691] *See, e.g.,* ABA; CCMR; and SIFMA.

[692] *See, e.g.,* ABA; CCMR; Credit Suisse; Data Boiler; JBA; and SIFMA.

[693] *See* SIFMA.

have to explain its inability to report a particular quantitative measurement and to provide notice if a trading desk changes its approach to including or excluding products that are not financial instruments in its metrics. The proposed rule would have required that banking entities that do not have any information to report in a Narrative Statement to submit an electronic document stating that the firm does not have any information to report in a Narrative Statement.

Most commenters generally opposed requiring banking entities to report any new information outside the scope of the 2013 rule requirements, including the Narrative Statement.[694] While recognizing that currently banking entities voluntarily provide additional information about their metrics submissions, one commenter argued that requiring the Narrative Statement would impose undue costs on banking entities, as the agencies can already obtain this information through the normal supervisory process.[695]

After considering all comments received, the agencies are not adopting the narrative statement requirement in the final rule. Rather, the final rule retains the provision from the 2013 rule's reporting instructions that permits, but does not require, firms to provide a narrative statement describing any additional information they believe would be helpful to the agencies in identifying material events or changes. Narrative statements may permit the agencies to understand aspects of the metrics without going back to the banking entities to ask questions. While the agencies anticipate that many banking entities will continue to voluntarily provide clarifying information, the agencies agree that the compliance costs associated with requiring a separate document are not commensurate with the potential benefit to the agencies of receiving information in this format from banking entities that do not wish to provide it.

7. Frequency and Method of Required Calculation and Reporting

The 2013 rule established a reporting schedule in § ____.20 that required banking entities with $50 billion or more in trading assets and liabilities to report the information required by Appendix A of the 2013 rule within 10 days of the end of each calendar month. The proposed rule would have extended this reporting schedule for firms with significant trading activities, as defined in the final rule, to be within 20 days of the end of each calendar month.[696]

In general, commenters supported extending the reporting schedule to be within 20 days of the end of each calendar month.[697] Two commenters suggested further extending this to 30 days.[698] Of these, one commenter recommended reducing the frequency from monthly to quarterly in order to better align the metrics reporting with other regulatory reporting regimes.[699]

Under the final rule, metrics filers must submit metrics on a quarterly basis. In addition, the final rule retains the reporting schedule of 30 days after the end of each quarter, consistent with the reporting schedule for quarterly filers under the 2013 rule. Supervisory experience has indicated that this will reduce the incidence of errors and improve the quality of the data in the metrics submissions.

Appendix A of the 2013 rule did not specify a format in which metrics should be reported. To clarify the formatting requirements for the data submissions and to help ensure the quality and consistency of data submissions across banking entities, the proposed rule would have required banking entities to report all the information contained within the proposed appendix in accordance with an XML Schema to be specified and published on the relevant agency's website.[700]

Two commenters opposed transitioning to XML format for reporting due to the costs of changing reporting software to switch formats.[701] One commenter fully supported the use of XML as a standardized format.[702] Another commenter supported XML and estimated the cost of switching formats to be low compared to other costs involved in reporting.[703] Finally, one commenter asserted that reporting in XML could be useful in certain cases but that it was not clear that requiring metrics reporting in XML would be useful. The commenter recommended deferring the decision to adopt the XML until after a final rule is adopted. The commenter stated that the decision of whether to adopt the XML Schema requirement should be subject to separate notice and comment.[704]

The final rule adopts the use of XML for reporting metrics, following the format specified in XML Schema to be posted on the relevant agency's website. The agencies acknowledge that any changes to the metrics will impose some switching costs on banking entities. As a very common standard for data transmission, XML is expected to be a less costly format to employ than a bespoke format. Moreover, the XML Schema allows for clearer specification, which should reduce miscommunication, errors, inconsistencies, and the need for data resubmissions. The agencies believe the benefits of standardization outweigh the one-time switching costs.

8. Recordkeeping

Under paragraph III.c. of Appendix A of the 2013 rule, a banking entity's reported quantitative measurements are subject to the record retention requirements provided in Appendix A. Under the proposed rule, this provision would have been moved to paragraph III.f. and expanded to include the new qualitative information requirements added to the appendix (*i.e.,* Trading Desk Information, Quantitative Measurements Identifying Information, and Narrative Statement requirements). The agencies received no comments on these proposed changes. The final rule's recordkeeping requirement is being adopted largely as proposed.[705]

9. Quantitative Measurements

Section IV of Appendix A of the 2013 rule sets forth the individual quantitative measurements required by the appendix. The proposed rule would have added an ''Applicability'' paragraph to each quantitative measurement to identify the trading desks for which a banking entity would be required to calculate and report a particular metric based on the type of covered trading activity conducted by the desk. The proposed rule also would have removed the ''General Calculation Guidance'' paragraphs in section IV of Appendix A of the 2013 rule for each quantitative measurement, and provided such guidance in the Instructions.

As noted above, commenters generally supported the proposal to define ''applicability'' in order to clarify that certain metrics are only applicable

[694] *See, e.g.,* ABA; CCMR; Credit Suisse; Data Boiler; JBA; and SIFMA.

[695] *See* SIFMA.

[696] *See* § ____.20(d) of the proposal.

[697] *See, e.g.,* FSF and Goldman Sachs.

[698] *See, e.g.,* Credit Suisse and SIFMA.

[699] *See* SIFMA.

[700] To the extent the XML Schema is updated, the version of the XML Schema that must be used by banking entities would be specified on the relevant agency's website. A banking entity must not use an outdated version of the XML Schema to report the Trading Desk Information, Quantitative Measurements Identifying Information, and applicable quantitative measurements to the relevant agency.

[701] *See, e.g.,* Credit Suisse and JBA.

[702] *See* Goldman Sachs.

[703] *See* Data Boiler.

[704] *See* SIFMA.

[705] The recordkeeping requirement in the final rule does not require that banking entities retain a copy of the Narrative Statement.

to desks engaged in market making or underwriting.[706] The agencies' received no comments on providing the metrics calculation guidance in an Instructions document and removing this guidance from the appendix. The metrics are not intended to serve as a dispositive tool for identifying permissible or impermissible activities. Thus, the agencies believe that providing the metrics calculation guidance in the Instructions and not within the regulation is more appropriate.[707] Therefore, the agencies are adopting these changes as proposed.

a. Risk-Management Measurements

i. Internal Limits and Usage

Like the 2013 rule, the proposed rule would have applied the Risk and Position Limits and Usage metric to all trading desks engaged in covered trading activities. Additionally, the proposed rule would have removed references to Stressed Value-at-Risk (Stressed VaR) in the Risk and Position Limits and Usage metric and required banking entities to report the unique identification label for each limit as listed in the Risk and Position Limits Information Schedule, the limit size (distinguishing between the upper bound and lower bound of the limit, where applicable), and the value of usage of the limit.[708]

In general, most commenters supported eliminating requirements to establish limits on Stressed VaR.[709] One commenter did not support this change, as any revisions would necessitate changes to firms' current systems and thus impose considerable operational burdens and costs.[710] Another commenter supported further requiring full reporting of upper and lower bounds of risk and position limits usage.[711]

The final rule largely adopts these changes as proposed. As noted above, the agencies believe requiring firms to submit one consolidated Internal Limits Information Schedule for the entire banking entity's covered trading activity, rather than multiple times in the Risk and Position Limits and Usage metric for different trading desks, will alleviate inefficiencies associated with reporting redundant information and reduce electronic file submission sizes. The unique identification label should allow the agencies to efficiently obtain the descriptive information regarding the limit that is separately reported in the Internal Limits Information Schedule.[712] Recognizing that firms may establish internal limits other than risk and position limits (*e.g.,* inventory aging limits), the final rule adopts an Internal Limits Information Schedule and daily Internal Limits and Usage quantitative metric.

As discussed in more detail below, the final rule removes the metrics for Risk Factor Sensitivities. Accordingly, the final rule also removes the cross reference between Risk and Position Limits and Risk Factor Sensitivities, and the cross-reference between Risk Factor Sensitivities and Profit and Loss Risk Factor Attributions. These cross-references would have provided an essential link between the limits on exposures to risk factors and the factors that are demonstrably important sources of revenue. In place of these two cross-references, the final rule adopts an identifier within the Internal Limits Information Schedule indicating the corresponding Risk Factor Attribution when a desk measures and imposes a limit on exposure to that risk factor. This identifier facilitates the agencies' review of the Internal Limits metric and its relation to gains and losses on the positions measured by that metric.

ii. Risk Factor Sensitivities

Like the 2013 rule, the proposed rule would have applied the Risk Factor Sensitivities metric to all trading desks engaged in covered trading activities. Under the proposal, a banking entity would have to report for each trading desk the unique identification label associated with each risk factor sensitivity of the desk, the magnitude of the change in the risk factor, and the aggregate change in value across all positions of the desk given the change in risk factor.

As discussed above in Quantitative Measurements Identifying Information, to reduce firms' reporting burden the final rule eliminates the Risk Factor Sensitivities quantitative measurement.

iii. Value-at-Risk and Stressed Value-at-Risk

The 2013 rule applies the Value-at-Risk and Stressed Value-at-Risk metric to all trading desks engaged in covered trading activities. The proposed rule would have modified the description of Stressed VaR to align its calculation with that of Value-at-Risk and clarified that Stressed VaR is not required to be reported for trading desks whose covered trading activity is conducted exclusively to hedge products excluded from the definition of financial instrument in § ____.3(d)(2) of the proposal. The proposal would have also revised the definition of Value-at-Risk to provide that Value-at-Risk is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on current market conditions.[713]

In general, a few commenters supported eliminating Stressed VaR, including for non-financial instrument hedging.[714] One commenter did not support this change, as any revisions would necessitate changes to firms' current systems and thus impose considerable operational burdens and costs.[715] One commenter stated that Stressed VaR was not a helpful metric because it bears an attenuated relationship to proprietary trading.[716]

After considering the comments received, the agencies believe that eliminating the Stressed VaR metric altogether will reduce burden without affecting the ability of the agencies to monitor for prohibited proprietary trading. The agencies believe that the other metrics retained or adopted in the final rule provide appropriate data to monitor for prohibited proprietary trading. To avoid duplicative or unnecessary metrics, the final rule eliminates the Stressed VaR metric.

b. Source-of-Revenue Measurements

i. Comprehensive Profit and Loss Attribution

The 2013 rule requires banking entities to calculate and report volatility of comprehensive profit and loss. The proposed rule would have eliminated this requirement as the measurement can be calculated from the profit and loss amounts reported under the Comprehensive Profit and Loss Attribution metric. Additionally, the proposed rule would have required banking entities to provide, for one or more factors that explain the

[706] *See, e.g.,* Credit Suisse; FSF; and JBA.

[707] *See supra* note 662.

[708] If a limit is introduced or discontinued during a calendar month, the banking entity must report this information for each trading day that the trading desk used the limit during the calendar month.

[709] *See, e.g.,* FSF and Data Boiler.

[710] *See* JBA.

[711] *See* Data Boiler.

[712] Such information includes the name of the limit, a description of the limit, the unit of measurement for the limit, the type of limit, and identification of the corresponding risk factor attribution in the particular case that the limit type is a limit on a risk factor sensitivity and profit and loss attribution to the same risk factor is reported.

[713] Banking entities may base their calculations of Value-at-Risk on historical observations consistent with other applicable regulatory requirements relating to the calculation of Value-at-Risk. *See, e.g.,* 12 CFR part 3 subpart F; 12 CFR part 217 subpart F; 12 CFR part 324 subpart F.

[714] *See, e.g.,* FSF and Data Boiler.

[715] *See* JBA.

[716] *See* Goldman Sachs.

preponderance of the profit or loss changes due to risk factor changes, a unique identification label for the factor and the profit or loss due to the factor change. The proposed rule also would have required banking entities to report a unique identification label for the factor so the agencies can efficiently obtain the descriptive information regarding the factor that is separately reported in the Risk Factor Attribution Information Schedule.[717]

In general, commenters did not support requiring firms to attribute profit and loss to specific risk factors.[718] One commenter expressed concern that this could disrupt firms' current infrastructure projects to comply with the Basel Committee's revised market risk capital standards, which also require specific alignment of risk factor attribution and risk factor sensitivity hierarchies.[719] This commenter also noted the limited utility of this information for horizontal comparisons across firms as each banking organization defines these metrics at different levels of granularity. Two commenters supported eliminating the volatility calculation, as proposed.[720]

After considering these comments, the final rule adopts these changes as proposed. Under the final rule, banking entities will no longer be required to report volatility for the Comprehensive Profit and Loss metric. Banking entities will be required to provide certain information regarding the factors that explain the preponderance of the profit or loss changes due to risk factor changes when sub-attributing comprehensive profit and loss from existing positions to specific and other factors.

As in the 2013 rule and the proposal, the final rule requires trading desks to attribute profit and loss into: (i) Profit and loss attributable to a trading desk's existing positions, and (ii) profit and loss attributable to new positions. The final rule retains the category for residual profit and loss,[721] but clarifies that this is a sub-category of profit and loss attributable to existing positions.

c. Customer-Facing Activity Metrics

i. Replacement of Inventory Turnover With Positions Metric

The 2013 rule required banking entities to calculate and report inventory turnover, or the turnover of a trading desk's inventory, over a 30-day, 60-day, and 90-day reporting period. The proposed rule would have replaced the Inventory Turnover metric with the daily data underlying that metric, rather than proposing specific calculation periods. The proposal would have replaced Inventory Turnover with the daily Positions quantitative measurement. As noted in the Supplemental Information to the proposed rule, positions information that is a component of the Inventory Turnover metric would be more useful to the agencies, and is already tracked by banking entities as a component of the Inventory Turnover metric. The proposal would have limited the scope of applicability of the Positions metric to trading desks that rely on § ____.4(a) or § ____.4(b) to conduct underwriting activity or market making-related activity, respectively. As a result, a trading desk that did not rely on § ____.4(a) or § ____.4(b) would not have been subject to the proposed Positions metric.[722]

The proposal would have also required banking entities subject to the appendix to separately report the market value of all long securities positions, the market value of all short securities positions, the market value of all derivatives receivables, the market value of all derivatives payables, the notional value of all derivatives receivables, and the notional value of all derivatives payables.[723] Finally, the proposal also would have clarified that positions reported as ''derivatives'' need not be reported as ''securities,'' thereby clarifying the treatment of certain positions that may have met both definitions. This technical change would have addressed the possibility that a position could have been reported in both the ''securities'' and ''derivatives'' positions, and thus been double-counted.

A few commenters recommended that the agencies eliminate the Positions metric, but retain the inventory turnover metric.[724] These commenters expressed concern that the new ''Positions'' metric would be, in effect, a ''new'' metric that would require reporting banking entities to modify their systems to generate as a standalone metric and noted that this metric could create ''false positives'' due to daily changes in inventory that may be driven by fluctuations in the expectation of customer demand. Other commenters recommended that the agencies eliminate inventory turnover metrics reporting requirements for derivatives, including foreign exchange derivatives.[725] One commenter supported the positions metric, but recommended removing the requirement to report market values for derivative positions—as notional value measures are sufficient to assess the size of a trading desk's derivative inventory.[726]

The final rule adopts the ''Positions'' metric and eliminates the ''Inventory Turnover'' metric consistent with the proposal. The ''Positions'' metric is itself a necessary component firms already must calculate to generate the ''Inventory Turnover'' metric. Therefore, producing the ''Positions'' metric as a standalone figure would not require firms to generate additional data not produced internally today, but will result in a more effective metrics reporting framework. The agencies are aware that all changes to the metrics reporting requirements require changes to the underlying systems required to generate and report metrics to the agencies. However, the Positions metric will allow both the agencies and the firms themselves to analyze firms' trading activities over different time horizons, as appropriate; the Inventory Turnover metric, by contrast, relied on the same underlying positions data as the final rule requires to be reported, but aggregated it in a manner (with 30-day, 60-day, and 90-day rolling averages) that is more complicated than a direct reporting of positions metrics, and is less effective. The final rule differs from the proposal in that it eliminates the requirement to report the notional value of derivatives. Removing the requirement to report notional value of derivative positions will avoid potential complexity arising from using different calculation methods for determining the notional value for different types of derivatives. Additionally, as the definition of financial instrument in section ____.3 lists securities, derivatives and futures as distinct types of financial instruments, the agencies are clarifying that futures positions

[717] Such information includes the name of the risk factor or other factor, a description of the risk factor or other factor, and the change unit of the risk factor or other factor.

[718] *See* SIFMA.

[719] *See* SIFMA.

[720] *See, e.g.,* Goldman Sachs and FSF.

[721] As under the 2013 rule, significant unexplained profit and loss must be escalated for further investigation and analysis under the final rule.

[722] For example, a trading desk that relies solely on § ____.5 to conduct risk-mitigating hedging activity would not have been subject to the Positions metric under the proposed rule.

[723] Under the proposal, banking entities would have been required to report the effective notional value of derivatives receivables and derivatives payables for those derivatives whose stated notional amount is leveraged.

[724] *See, e.g.,* GFMA and SIFMA.

[725] *See, e.g.,* GFMA; Goldman Sachs; and State Street.

[726] *See e.g.,* Credit Suisse.

should be reported as ''derivatives,'' and are not expected to be broken out separately. The agencies are making this technical change to avoid confusion as to whether or how to classify futures for this metric.[727]

ii. Transaction Volumes and the Customer-Facing Trade Ratio

Paragraph IV.c.3. of Appendix A of the 2013 rule requires banking entities to calculate and report a Customer-Facing Trade Ratio comparing transactions involving a counterparty that is a customer of the trading desk to transactions with a counterparty that is not a customer of the desk. Appendix A of the 2013 rule requires the Customer-Facing Trade Ratio to be computed by measuring trades on both a trade count basis and value basis. In addition, Appendix A of the 2013 rule provides that the term ''customer'' for purposes of the Customer-Facing Trade Ratio is defined in the same manner as the terms ''client, customer, and counterparty'' used in § ___.4(b) of the 2013 rule describing the permitted activity exemption for market making-related activities. This metric is required to be calculated on a daily basis for 30-day, 60-day, and 90-day calculation periods.

The proposed rule would have replaced the Customer-Facing Trade Ratio with a daily Transaction Volumes quantitative measurement that would allow the agencies to calculate customer-facing trade ratios over any period of time and to conduct more meaningful analysis of trading desks' customer-facing activity.[728] The proposed Transaction Volumes metric would measure the number and value[729] of all securities and derivatives transactions[730] conducted by a trading desk engaged in permitted underwriting activity or market making-related activity under the 2013 rule with four categories of counterparties: (i) Customers (excluding internal transactions); (ii) non-customers (excluding internal transactions); (iii) trading desks and other organizational units where the transaction is booked into the same banking entity; and (iv) trading desks and other organizational units where the transaction is booked into an affiliated banking entity.[731] The proposed rule would have clarified that the term ''customer'' for purposes of this metric has the same meaning as ''client, customer, and counterparty'' in § ___.4(a) for underwriting desks and in § ___.4(b) for market-making desks. To reduce reporting inefficiencies, the proposed rule would have only required trading desks engaged in underwriting or market making-related activity under § ___.4(a) or § ___.4(b) to calculate this quantitative measurement for each trading day. As with the Positions metric, the proposed rule would also have further reduced reporting volume by replacing the 30-day, 60-day, and 90-day calculation periods for each transaction with a single daily transaction value and count for each type.

The proposed rule would have required banking entities to separately report the value and number of securities and derivatives transactions conducted by a trading desk with the four categories of counterparties described above. The proposed classification of securities and derivatives described above for Positions would have also applied to Transaction Volumes.

A few commenters opposed the replacing the Customer-Facing Trade Ratio with the new Transactions Volume quantitative metric.[732] These commenters argued that the proposed changes would effectively create an entirely new metric, in particular by requiring firms to classify inter-affiliate transactions within the prescribed categories. One commenter also asserted that distinguishing trades that occur across banking entities from those within a single banking entity would not provide any informational value to the agencies in monitoring compliance with section 13 of the BHC Act.[733] One commenter supported the proposal, but also recommended excluding inter-affiliate transactions.[734]

The final rule adopts the proposed change to add a category of counterparty for desk-to-desk transactions within the same legal entity and transactions between affiliates (collectively, Internal Transactions). In order to connect the transactions metric with the other quantitate measurements, for example risk, profit and loss, and positions, it is important for transactions metrics to include all transactions conducted by the desk, including: (i) Desk-to-desk transfers within the same legal entity; (ii) transactions between affiliates; and (iii) transactions with non-affiliated external counterparties. It is also important for supervisors to be able to distinguish Internal Transactions from transactions with external non-affiliated counterparties because, based on supervisory experience under the 2013 rule, firms report these transactions inconsistently depending on a desk's purpose and business model.[735] Considering the trading activities of a desk without Internal Transactions may not give a complete picture of the desk's positions, risk exposure or trading strategies. To understand the activity of the desk the agencies need to observe its Internal Transactions.

Transactions between one trading desk and another trading desk in which the second desk books the position in the same banking entity as the first are not purchases or sales of financial instruments subject to the rule, including the prohibition on proprietary trading in § ___.3. However, in practice many trading desks book positions into multiple affiliated banking entities and also engage in desk-to-desk transactions within the same legal entity. Distinguishing Internal Transactions that move positions to new legal entities from desk-to-desk transactions that occur purely within the same legal entity would require an additional layer of recordkeeping. The agencies agree that the benefit of distinguishing trades across affiliated banking entities from desk-to-desk transactions within the same legal entity does not justify the

[727] *See* final rule § ___.3(c)(1) (defining ''financial instrument'' to mean (i) a security, including an option on a security; (ii) a derivative, including an option on a derivative; or (iii) a contract of sale of a commodity for future delivery, or option on a contract of sale of a commodity for future delivery).

[728] As noted in the proposal the current Customer-Facing Trade Ratio metric does not provide meaningful information when a trading desk only conducts customer-facing trading activity. The numerator of the ratio represents transactions with counterparties that are customers, while the denominator represents transactions with counterparties that are not customers. If a trading desk only trades with customers, it will not be able to calculate this ratio because the denominator will be zero.

[729] The proposal defined value to mean gross market value with respect to securities, gross notional value (*i.e.,* the current dollar market value of the quantity of the commodity underlying the derivative) for commodity derivatives, and gross notional value for all other derivatives.

[730] As noted in the Positions metric preamble, in calculating the Transactions Volume quantitative metric, futures positions should be reported as ''derivatives.''

[731] The proposal noted that in order to avoid double-counting transactions, these four categories would be exclusive of each other (*i.e.,* a transaction could only be reported in one category).

[732] *See, e.g.,* IIB and SIFMA.

[733] *See* SIFMA.

[734] *See, e.g.,* Credit Suisse.

[735] Internal Transactions are used for a number of reasons, including to transfer risk to a desk better equipped to manage the position's risk; to allow a desk with better market access or specialized market knowledge to facilitate another desk better equipped to face customers; or to allocate funding costs via transfer pricing, in which case one desk treats other internal desks or affiliate desks in much the same way as external clients. Supervisory experience has shown that, depending on the purpose of the internal transaction, banking entities sometimes report these internal transactions as transactions with customers, sometimes as transactions with non-customers, and sometimes do not report them at all.

extra record-keeping costs. The final rule consolidates these two proposed categories into one category, transactions with trading desks and other organizational units where the transaction is booked into either the same banking entity or an affiliated banking entity.

d. Securities Inventory Aging

The 2013 rule requires all trading desks engaged in covered trading activities to report Inventory Aging metrics for their securities and derivative positions. The proposed rule would have only required trading desks that relied on § ____.4(a) or § ____.4(b) to conduct underwriting or market making-related activity to report Inventory Aging and limited the scope of this metric to only securities positions.[736] To reflect the revised scope, the proposed rule would have revised the name of this metric to be Securities Inventory Aging. Finally, the proposal would have required a banking entity to calculate and report the Securities Inventory Aging metric according to a specific set of age ranges. Specifically, banking entities would have to calculate and report the market value of security assets and security liabilities over the following holding periods: 0–30 calendar days; 31–60 calendar days; 61–90 calendar days; 91–180 calendar days; 181–360 calendar days; and greater than 360 calendar days.

In general, commenters supported reducing the Inventory Aging metric, as inventory aging data is not readily available or particularly useful for derivative positions.[737] After consideration of comments and in light of the general desire to reduce reporting burden, the agencies believe that the Inventory Aging metric may be overly prescriptive as an indicator of compliance with the rule. Therefore, the final rule no longer requires the Inventory Aging metric for all desks and position types. For those desks where banking entities identify inventory aging as a meaningful control, the entities should report their internal limits on inventory aging under the Internal Limits and Usage metric and consequently ''Inventory Aging'' has been added as a potential type of limit under the Internal Limits Information Schedule.

V. Administrative Law Matters

A. Use of Plain Language

Section 722 of the Gramm-Leach-Bliley Act[738] requires the OCC, Board, and FDIC (Federal banking agencies) to use plain language in all proposed and final rules published after January 1, 2000. The Federal banking agencies have sought to present the proposed rule in a simple and straightforward manner and did not receive any comments on plain language.

B. Paperwork Reduction Act

Certain provisions of the final rule contain ''collection of information'' requirements within the meaning of the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3521). In accordance with the requirements of the PRA, the agencies may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The agencies reviewed the final rule and determined that the final rule revises certain reporting and recordkeeping requirements that have been previously cleared under various OMB control numbers. The agencies did not receive any specific comments on the PRA. The agencies are extending for three years, with revision, these information collections. The information collection requirements contained in this final rule have been submitted by the OCC and FDIC to OMB for review and approval under section 3507(d) of the PRA (44 U.S.C. 3507(d)) and section 1320.11 of the OMB's implementing regulations (5 CFR 1320). The Board reviewed the final rule under the authority delegated to the Board by OMB. The Board will submit information collection burden estimates to OMB and the submission will include burden for Federal Reserve-supervised institutions, as well as burden for OCC-, FDIC-, SEC-, and CFTC-supervised institutions under a holding company. The OCC and the FDIC will take burden for banking entities that are not under a holding company.

Abstract

Section 13 to the BHC Act generally prohibits any banking entity from engaging in proprietary trading or from acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with a covered fund, subject to certain exemptions. The exemptions allow certain types of permissible trading activities such as underwriting, market making, and risk-mitigating hedging, among others. The 2013 rule implementing section 13 became effective on April 1, 2014. Section ____.20(d) and Appendix A of the 2013 final rule require certain of the largest banking entities to report to the appropriate agency certain quantitative measurements.

Current Actions

This final rule contains requirements subject to the PRA and the changes relative to the 2013 rule are discussed herein. The new and modified reporting requirements are found in sections ____.4(c)(3)(i), ____.20(d), ____.20(i), and the Appendix. The new and modified recordkeeping requirements are found in sections, ____.3(d)(3), ____.4(c)(3)(i), ____.5(c), ____.20(b), ____.20(c), ____.20 (d), ____.20(e), ____.20(f), and the Appendix. The modified information collection requirements[739] would implement section 13 of the BHC Act. The respondents are for-profit financial institutions, including small businesses. A covered entity must retain these records for a period that is no less than 5 years in a form that allows it to promptly produce such records to the relevant agency on request.

Reporting Requirements

Section ____.4(c)(3)(i) requires a banking entity to make available to the agency upon request records regarding (1) any limit that is exceeded and (2) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the primary financial regulatory agency. The agencies estimate that the average time per response would be 15 minutes.

Section ____.20(d) is modified by extending the reporting period for certain banking entities from within 10 days of the end of each calendar month to 30 days of the end of each calendar quarter. The threshold for reporting under section ____.20(d) is modified from $10 billion or more in trading assets and liabilities to $20 billion or more in trading assets and liabilities. The metrics reporting changes to the Appendix would impact the reporting burden under section ____.20(d). The agencies estimate that the current average hours per response will

[736] The proposed Securities Inventory Aging metric would not require banking entities to prepare an aging schedule for derivatives or include in its securities aging schedules those ''securities'' that are also ''derivatives,'' as those terms are defined under the 2013 rule. *See* 2013 rule §§ ____.2(h), (y). *See also supra* Part III.E.2.i (discussing the classification of securities and derivatives for purposes of the proposed Positions quantitative measurement).

[737] *See, e.g.,* Data Boiler; Credit Suisse; FSF; Goldman Sachs, GFMA; and State Street.

[738] Public Law 106–102, section 722, 113 Stat. 1338, 1471 (1999).

[739] In an effort to provide transparency, the total cumulative burden for each agency is shown. In addition to the changes resulting from this final rule, the agencies are also applying a conforming methodology for calculating the burden estimates in order to be consistent across the agencies.

decrease by 14 hours (decrease 40 hours for initial set-up).

Sections ____.3(b)(4), ____.4(c)(4), ____.20(g)(2), and ____.20(h) would implicate the notice and response procedures pursuant to section ____.20(i) that an agency would follow when rebutting a presumption or exercising a reservation of authority. The agencies estimate that the average hours per response would be 20 hours.

Recordkeeping Requirements

Section ____.3(d)(3) would expand the scope of the recordkeeping to include foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)), foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25)), or cross-currency swap. The agencies estimate that the current average hour per response will not change.

Section ____.4(c)(3)(i) requires a banking entity to maintain records regarding (1) any limit that is exceeded and (2) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the primary financial regulatory agency. The agencies estimate that the average time per response would be 15 minutes.

Section ____.5(c) is modified by reducing the requirements for banking entities that do not have significant trading assets and liabilities and eliminating documentation requirements for certain hedging activities. The agencies estimate that the current average hours per response will decrease by 20 hours (decrease 10 hours for initial set-up).

Section ____.20(b) is modified by limiting the requirement only to banking entities with significant trading assets and liabilities. The agencies estimate that the current average hour per response will not change.

Section ____.20(c) is modified by limiting the CEO attestation requirement to a banking entity that has significant trading assets and liabilities. The agencies estimate that the current average hours per response will decrease by 1,100 hours (decrease 3,300 hours for initial set-up).

Section ____.20(d) is modified by extending the time period for reporting for certain banking entities from within 10 days of the end of each calendar month to 30 days of the end of each calendar quarter. The agencies estimate that the current average hours per response will decrease by 3 hours.

Section ____.20(e) is modified by limiting the requirement to banking entities with significant trading assets and liabilities. The agencies estimate that the current average hours per response will not change.

Section ____.20(f)(2) is modified by limiting the requirement to banking entities with moderate trading assets and liabilities. The agencies estimate that the current average hours per response will not change.

The Instructions for Preparing and Submitting Quantitative Measurement Information, Technical Specifications Guidance, and XML Schema will be available on each agency's public website:

Proposed Revision, With Extension, of the Following Information Collections

Estimated average hours per response:

Reporting

Section ____.4(c)(3)(i)—0.25 hours for an average of 20 times per year.

Section ____.12(e)—20 hours (Initial set-up 50 hours) for an average of 10 times per year.

Section ____.20(d)—41 hours (Initial set-up 125 hours) quarterly.

Section ____.20(i)—20 hours.

Recordkeeping

Section ____.3(d)(3)—1 hour (Initial set-up 3 hours).

Section ____.4(b)(3)(i)(A)—2 hours quarterly.

Section ____.4(c)(3)(i)—0.25 hours for an average of 40 times per year.

Section ____.5(c)—80 hours (Initial setup 40 hours).

Section ____.11(a)(2)—10 hours.

Section ____.20(b)—265 hours (Initial set-up 795 hours).

Section ____.20(c)—100 hours (Initial set-up 300 hours).

Section ____.20(d)– 10 hours.

Section ____.20(e)—200 hours.

Section ____.20(f)(1)—8 hours.

Section ____.20(f)(2)—40 hours (Initial set-up 100 hours).

Disclosure

Section ____.11(a)(8)(i)—0.1 hours for an average of 26 times per year.

OCC

Proposed revisions estimated annual burden: −15,172 hours.

Estimated annual burden hours: 3,115 hours (1,656 hours for initial set-up and 1,459 hours for ongoing).

C. Regulatory Flexibility Act Analysis

OCC: The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.,* (RFA), requires an agency, in connection with a final rule, to prepare a Final Regulatory Flexibility Analysis describing the impact of the rule on small entities (defined by the SBA for purposes of the RFA to include commercial banks and savings institutions with total assets of $600 million or less and trust companies with total assets of $41.5 million or less) or to certify that the rule will not have a significant economic impact on a substantial number of small entities.

The OCC currently supervises approximately 782 small entities.[740] Under the EGRRCPA, banking entities with total consolidated assets of $10 billion or less generally are not ''banking entities'' within the scope of Section 13 of the BHCA if their trading assets and trading liabilities do not exceed 5 percent of their total consolidated assets. Thus, the final rule will not impact any OCC-supervised small entities. Therefore, the OCC certifies that the final rule will not have a significant impact on a substantial number of OCC-supervised small entities.

Board: The RFA requires an agency to either provide a regulatory flexibility analysis with a rule or certify that the rule will not have a significant economic impact on a substantial number of small entities. The U.S. Small Business Administration (SBA) establishes size standards that define which entities are small businesses for purposes of the RFA.[741] Except as otherwise specified below, the size standard to be considered a small business for banking entities subject to the proposal is $600 million or less in consolidated assets.[742]

The Board has considered the potential impact of the proposed rule on small entities in accordance with the RFA. Based on the Board's analysis, and for the reasons stated below, the Board believes that this proposed rule will not have a significant economic impact on a substantial of number of small entities. No comments were received related to the Board's initial RFA analysis, which was published with the proposal.

As discussed in the **SUPPLEMENTARY INFORMATION**, the agencies are revising the 2013 rule in order to provide clarity to banking entities about what activities are prohibited, reduce compliance costs, and improve the ability of the agencies to make supervisory assessments regarding compliance relative to the 2013 rule. The agencies are explicitly authorized under section 13(b)(2) of the BHC Act to adopt rules implementing section 13.[743]

The Board's rule generally applies to state-chartered banks that are members of the Federal Reserve System, bank holding companies, foreign banking organizations, and nonbank financial companies supervised by the Board (collectively, Board-regulated entities). However, EGRRCPA, which was enacted on May 24, 2018, amended section 13 of the BHC Act and modified the scope of the definition of banking entity by amending the term ''insured depository institution'' to exclude certain community banks.[744] The Board is not aware of any Board-regulated entities that meet the SBA's definition of ''small entity'' that are subject to section 13 of the BHC Act and the rule following the enactment of EGRRCPA. Furthermore, to the extent that any Board-regulated entities that meet the definition of ''small entity'' are or become subject to section 13 of the BHC Act and the rule, the Board does not expect the total number of such entities to be substantial. Accordingly, the Board's rule is not expected to have a significant economic impact on a substantial number of small entities.

The Board has not identified any federal statutes or regulations that would duplicate, overlap, or conflict with the proposed revisions, and the Board is not aware of any significant alternatives to the rule that would reduce the economic impact on Board-regulated small entities.

FDIC

(a) Regulatory Flexibility Analysis

The RFA generally requires an agency, in connection with a final rule, to prepare and make available for public comment a final regulatory flexibility analysis that describes the impact of a rule on small entities.[745] However, a regulatory flexibility analysis is not required if the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. The SBA has defined ''small entities'' to include banking organizations with total assets of less than or equal to $600 million.[746]

[740] The number of small entities supervised by the OCC is determined using the SBA's size thresholds for commercial banks and savings institutions, and trust companies, which are $600 million and $41.5 million, respectively. Consistent with the General Principles of Affiliation 13 CFR 121.103(a), the OCC counts the assets of affiliated financial institutions when determining if the OCC should classify an OCC-supervised institution a small entity. The OCC used December 31, 2018, to determine size because a ''financial institution's assets are determined by averaging the assets reported on its four quarterly financial statements for the preceding year.'' See footnote 8 of the U.S. Small Business Administration's *Table of Size Standards.*

[741] U.S. SBA, Table of Small Business Size Standards Matched to North American Industry Classification System Codes, available at *https://www.sba.gov/sites/default/files/files/Size_Standards_Table.pdf.*

[742] *See id.* Pursuant to SBA regulations, the asset size of a concern includes the assets of the concern whose size is at issue and all of its domestic and foreign affiliates. 13 CFR 121.103(6).

[743] 12 U.S.C. 1851(b)(2).

[744] Under EGRRCPA, a community bank and its affiliates are generally excluded from the definition of banking entity, and thus section 13 of the BHC Act, if the bank and all companies that control the bank have total consolidated assets equal to $10 billion or less and trading assets and liabilities equal to 5 percent or less of total consolidated assets.

[745] 5 U.S.C. 601 *et seq.*

[746] The SBA defines a small banking organization as having $600 million or less in assets, where an organization's ''assets are determined by averaging the assets reported on its four quarterly financial statements for the preceding year.'' See 13 CFR 121.201 (as amended by 84 FR 34261, effective August 19, 2019). In its determination, the ''SBA counts the receipts, employees, or other measure of size of the concern whose size is at issue and all of its domestic and foreign affiliates.'' See 13 CFR 121.103. Following these regulations, the FDIC uses

Continued

Generally, the FDIC considers a significant effect to be a quantified effect in excess of 5 percent of total annual salaries and benefits per institution, or 2.5 percent of total noninterest expenses. The FDIC believes that effects in excess of these thresholds typically represent significant effects for FDIC-supervised institutions. As discussed further below, the FDIC certifies that this final rule will not have a significant economic impact on a substantial number of FDIC-supervised small entities.

(b) Reasons for and Policy Objectives of the Final Rule

The agencies are issuing this final rule to amend the 2013 rule in order to provide banking entities with additional clarity and certainty about what activities are prohibited and seek to improve the efficacy of the regulations where possible. The agencies acknowledge that many banking entities have found certain aspects of the 2013 rule to be complex or difficult to apply in practice. This final rule amends the 2013 rule to make its requirements more efficient.

(c) Description of the Rule

First, the FDIC is amending its regulations to tailor the application of the final rule based on the size and scope of a banking entity's trading activities. In particular, the FDIC aims to further reduce compliance obligations for firms that do not have large trading operations and therefore reduce costs and uncertainty faced by firms in complying with the final rule, relative to their amount of trading activity. In addition to tailoring the application of the final rule, the FDIC is also streamlining and clarifying for all banking entities certain definitions and requirements related to the proprietary trading prohibition and limitations on covered fund activities and investments. Finally, the FDIC is reducing reporting, recordkeeping, and compliance program requirements for all banking entities and expanding tailoring to make the scale of compliance activity required by the rule commensurate with a banking entity's size and level of trading activity.

(d) Other Statutes and Federal Rules

On May 24, 2018, EGRRCPA was enacted, which, among other things, amends section 13 of the BHC Act. As a result, section 13 excludes from the definition of ''banking entity'' any institution that, together with their affiliates and subsidiaries, has: (1) Total assets of $10 billion or less, and (2) trading assets and liabilities that comprise 5 percent or less of total assets.

The FDIC has not otherwise identified any likely duplication, overlap, and/or potential conflict between this final rule and any other federal rule.

(e) Small Entities Affected

The FDIC supervises 3,465 depository institutions,[747] of which, 2,705 are defined as small banking organizations according to the RFA.[748] Almost all FDIC-supervised small banking entities are exempt from the requirements of section 13 of the BHC Act, pursuant to EGRRCPA, and hence the final rule does not affect them.

Only one FDIC-supervised small banking entity is not exempt from the requirements of section 13 of the BHC Act under EGRRCPA because it has trading assets and liabilities greater than five percent of total consolidated assets. This bank has trading activity at levels that would place it in the final rule's limited trading assets and liabilities compliance category, and it thus could benefit from the final rule which contains a rebuttable presumption of compliance for such banking entities. The FDIC estimates that banks with limited trading will save, on average, $115,233 from the reduced burden of this rule. This amount is far less than 5 percent of total salaries and 2.5 percent of total non-interest expenses for this one institution.

Consequently, the FDIC does not believe that this rule will have a significant economic impact on a substantial number of small entities.

(f) Certification Statement

Section 13 of the BHC Act, as amended by EGRRCPA, exempts all but one of the 2,705 FDIC-supervised small banking entities from compliance with section 13 of the BHC Act. Therefore, the FDIC certifies that this final rule will not have a significant economic impact on a substantial number of FDIC-supervised small banking entities.

CFTC: Pursuant to 5 U.S.C. 605(b), the CFTC hereby certifies that the amendments to the 2013 final rule will not have a significant economic impact on a substantial number of small entities for which the CFTC is the primary financial regulatory agency.

As discussed in this **SUPPLEMENTARY INFORMATION**, the Agencies are revising the 2013 final rule in order to provide clarity to banking entities about what activities are prohibited, reduce compliance costs, and improve the ability of the Agencies to make assessments regarding compliance relative to the 2013 final rule. To minimize the costs associated with the 2013 final rule, the Agencies are simplifying and tailoring the rule to allow banking entities to more efficiently provide financial services in a manner that is consistent with the requirements of section 13 of the BHC Act.

The revisions will generally apply to banking entities, including certain CFTC-registered entities. These entities include bank-affiliated CFTC-registered swap dealers, futures commission merchants, commodity trading advisors and commodity pool operators.[749] The CFTC has previously determined that swap dealers, futures commission merchants and commodity pool operators are not small entities for purposes of the RFA and, therefore, the requirements of the RFA do not apply to those entities.[750] As for commodity trading advisors, the CFTC has found it appropriate to consider whether such registrants should be deemed small entities for purposes of the RFA on a case-by-case basis, in the context of the particular regulation at issue.[751]

In the context of the revisions to the 2013 final rule, the CFTC believes it is unlikely that a substantial number of the commodity trading advisors that are potentially affected are small entities for purposes of the RFA. In this regard, the CFTC notes that only commodity trading advisors that are registered with the CFTC are covered by the 2013 final rule, and generally those that are registered have larger businesses. Similarly, the 2013 final rule applies to only those commodity trading advisors that are affiliated with banks that are within the scope of the Volcker Rule, which the CFTC expects are larger businesses.[752]

a covered entity's affiliated and acquired assets, averaged over the preceding four quarters, to determine whether the covered entity is ''small'' for the purposes of RFA.

[747] Categories of FDIC-supervised depository institutions are set forth in 12 U.S.C. 1813(q)(2).

[748] FDIC Call Report, March 31, 2019.

[749] The revisions may also apply to other types of CFTC registrants that are banking entities, such as introducing brokers, but the CFTC believes it is unlikely that such other registrants will have significant activities that would implicate the revisions. *See* 2013 final rule (CFTC), 79 FR 5808 at 5813 (Jan. 31, 2014).

[750] *See* Policy Statement and Establishment of Definitions of ''Small Entities'' for Purposes of the Regulatory Flexibility Act, 47 FR 18618 (Apr. 30, 1982) (futures commission merchants and commodity pool operators); and Registration of Swap Dealers and Major Swap Participants, 77 FR 2613, 2620 (Jan. 19, 2012) (swap dealers and major swap participants).

[751] *See* Policy Statement and Establishment of Definitions of ''Small Entities'' for Purposes of the Regulatory Flexibility Act, 47 FR 18618, 18620 (Apr. 30, 1982).

[752] In this regard, the CFTC notes that the agencies recently revised the 2013 final rule in

The CFTC requested that commenters address whether any CFTC registrants covered by the proposed revisions to the 2013 final rule are small entities for purposes of the RFA. The CFTC did not receive any public comments on this or any other aspect of the RFA as it relates to the rule.

Because the CFTC believes there are not a substantial number of commodity trading advisors within the scope of the Volcker Rule that are small entities for purposes of the RFA, and the other CFTC registrants that may be affected by the proposed revisions have been determined not to be small entities, the CFTC believes that the revisions to the 2013 final rule will not have a significant economic impact on a substantial number of small entities for which the CFTC is the primary financial regulatory agency.

SEC: In the proposal, the SEC certified that, pursuant to 5 U.S.C. 605(b), the proposal would not, if adopted, have a significant economic impact on a substantial number of small entities. Although the SEC solicited written comments regarding this certification, no commenters responded to this request.

As discussed in the **SUPPLEMENTARY INFORMATION**, the Agencies are adopting revisions to the 2013 rule that are intended to provide banking entities with clarity about what activities are prohibited and improve supervision and implementation of section 13 of the BHC Act.

The revisions the agencies are adopting today will generally apply to banking entities, including certain SEC-registered entities.[753] These entities include SEC-registered broker-dealers, investment advisers, security-based swap dealers, and major security-based swap participants that are affiliates or subsidiaries of an insured depository institution.[754] Based on information in filings submitted by these entities, the SEC believes that there are no banking entity registered investment advisers,[755] broker-dealers,[756] security-based swap dealers, or major security-based swap participants that are small entities for purposes of the RFA.[757] For this reason, the SEC certifies that the rule, as adopted, will not have a significant economic impact on a substantial number of small entities.

D. Riegle Community Development and Regulatory Improvement Act

Section 302(a) of the Riegle Community Development and Regulatory Improvement Act of 1994 (RCDRIA)[758] requires that each Federal banking agency, in determining the effective date and administrative compliance requirements for new regulations that impose additional reporting, disclosure, or other requirements on insured depository institutions, consider, consistent with principles of safety and soundness and the public interest, any administrative burdens that such regulations would place on depository institutions, including small depository institutions, and customers of depository institutions, as well as the benefits of such regulations. The agencies have considered comment on these matters in other parts of this **SUPPLEMENTARY INFORMATION.**

In addition, under section 302(b) of the RCDRIA, new regulations that impose additional reporting, disclosures, or other new requirements on insured depository institutions generally must take effect on the first day of a calendar quarter that begins on or after the date on which the regulations are published in final form.[759] Therefore, the effective date for the OCC, Board, and FDIC is January 1, 2020, the first day of the calendar quarter.[760]

E. OCC Unfunded Mandates Reform Act Determination

The OCC has analyzed the rule under the factors set forth in the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1532). Under this analysis, the OCC considered whether the rule includes a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year (adjusted for inflation). The cost estimate for the final rule is approximately $4.1 million in the first year. Therefore, the OCC finds that the final rule does not trigger the UMRA cost threshold. Accordingly, the OCC has not prepared the written statement described in section 202 of the UMRA.

F. SEC Economic Analysis

1. Broad Economic Considerations

a. Scope

As discussed above, section 13 of the Bank Holding Company (BHC) Act generally prohibits banking entities from engaging in proprietary trading and from acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with a hedge fund or private equity fund (covered funds), subject to certain exemptions. Section 13(h)(1) of the BHC Act defines the term ''banking entity'' to include (i) any insured depository institution (as defined by statute), (ii) any company that controls an insured depository institution, (iii) any company that is treated as a bank holding company for purposes of section 8 of the

---

order to be consistent with statutory amendments made by EGRRCPA to section 13 of the BHC Act. The general result of one of these statutory revisions was to exclude community banks and their affiliates and subsidiaries from the scope of the Volcker Rule. *See* 84 FR 35008. The CFTC believes this exclusion lessens the likelihood that any commodity trading advisors that remain within the scope of the Volcker Rule are small entities.

[753] The SEC's Economic Analysis, below, discusses the economic effects of the final amendments. *See* SEC Economic Analysis, *supra* Part V.F.

[754] *See* 2013 rule § _.2(c) (definition of banking entity); 2013 rule § _.2(r) as amended (definition of insured depository institution).

[755] For the purposes of an SEC rulemaking in connection with the RFA, an investment adviser generally is a small entity if it: (1) Has assets under management having a total value of less than $25 million; (2) did not have total assets of $5 million or more on the last day of the most recent fiscal year; and (3) does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management of $25 million or more, or any person (other than a natural person) that had total assets of $5 million or more on the last day of its most recent fiscal year. *See* 17 CFR 275.0–7.

[756] For the purposes of an SEC rulemaking in connection with the RFA, a broker-dealer will be deemed a small entity if it: (1) Had total capital (net worth plus subordinated liabilities) of less than $500,000 on the date in the prior fiscal year as of which its audited financial statements were prepared pursuant to 17 CFR 240.17a–5(d), or, if not required to file such statements, had total capital (net worth plus subordinated liabilities) of less than $500,000 on the last day of the preceding fiscal year (or in the time that it has been in business, if shorter); and (2) is not affiliated with any person (other than a natural person) that is not a small business or small organization. *See* 17 CFR 240.0–10(c). Under the standards adopted by the SBA, small entities also include entities engaged in financial investments and related activities with $38.5 million or less in annual receipts. *See* 13 CFR 121.201 (Subsector 523).

[757] Based on SEC analysis of Form ADV data, the SEC believes that there are not a substantial number of registered investment advisers affected by the proposal that qualify as small entities under RFA. Based on SEC analysis of broker-dealer FOCUS filings and NIC relationship data, the SEC believes that there are no SEC-registered broker-dealers affected by the proposal that qualify as small entities under RFA. With respect to security-based swap dealers and major security-based swap participants, based on feedback from market participants and information about the security-based swap markets, the Commission believes that the types of entities that would engage in more than a *de minimis* amount of dealing activity involving security-based swaps—which generally would be large financial institutions—would not be ''small entities'' for purposes of the RFA. *See* Regulation SBSR—Reporting and Dissemination of Security-Based Swap Information, 81 FR 53546, 53553 (Aug. 12, 2016).

[758] 12 U.S.C. 4802(a).

[759] 12 U.S.C. 4802(b).

[760] Additionally, the Administrative Procedure Act generally requires that the effective date of a rule be no less than 30 days after publication in the **Federal Register.** 5 U.S.C. 553(d)(1). The effective date, January 1, 2020, will be more than 30 days after publication in the **Federal Register.**

International Banking Act of 1978, and (iv) any affiliate or subsidiary of such an entity.[761] In addition, as discussed above, the Economic Growth, Regulatory Relief, and Consumer Protection Act (EGRRCPA), enacted on May 24, 2018, amended section 13 of the BHC Act to exclude from the definition of ''insured depository institution'' any institution that does not have and is not controlled by a company that has (1) more than $10 billion in total consolidated assets; and (2) total trading assets and trading liabilities, as reported on the most recent applicable regulatory filing filed by the institution, that are more than 5% of total consolidated assets.[762]

Certain SEC-regulated entities, such as broker-dealers, security-based swap dealers (SBSDs), and registered investment advisers (RIAs) affiliated with a banking entity, fall under the definition of ''banking entity'' and are subject to the prohibitions of section 13 of the BHC Act.[763] This economic analysis is limited to areas within the scope of the SEC's function as the primary securities markets regulator in the United States. In particular, the SEC's economic analysis is focused on the potential effects of the final rule on SEC registrants, in their capacity as such, the functioning and efficiency of the securities markets, investor protection, and capital formation. SEC registrants affected by the final rule include SEC-registered broker-dealers, SBSDs, and RIAs. Thus, the below analysis does not consider broker-dealers, SBSDs, and investment advisers that are not banking entities, or banking entities that are not SEC registrants, in either case for purposes of section 13 of the BHC Act, beyond the potential spillover effects on these entities and effects on efficiency, competition, investor protection, and capital formation in securities markets. Other sections of this **SUPPLEMENTARY INFORMATION** discuss the effects of the final rule on banking entities not overseen by the SEC for purposes of section 13 of the BHC Act.

In the proposal, the SEC solicited comment on all aspects of the costs and benefits associated with the proposed amendments for SEC registrants, including any spillover effects the proposed amendments may have on efficiency, competition, and capital formation in securities markets. The SEC has considered these comments, as discussed in greater detail in the sections that follow.

b. Economic Effects and Justification

As stated in the proposal, in implementing section 13 of the BHC Act, the agencies sought to increase the safety and soundness of banking entities, promote financial stability, and reduce conflicts of interest between banking entities and their customers.

In the proposal, the SEC recognized a number of effects of the 2013 rule.[764] The SEC continues to recognize that distinguishing between permissible and prohibited activities may be complex and costly for some firms,[765] which may impede the conduct of permissible activities.[766] The SEC continues to believe that the 2013 rule may have resulted in a complex and costly compliance regime that is unduly restrictive and burdensome for some banking entities, particularly smaller firms that do not qualify for the simplified compliance regime.[767] Since the 2013 rule became effective, new estimates regarding compliance burdens and new information about the various effects of the 2013 rule have become available.[768] The passage of time has also enabled an assessment of the value of individual requirements that enable SEC oversight, such as the requirement to report certain quantitative metrics, relative to reporting and other compliance burdens.[769]

As discussed below, a number of commenters have indicated that the proposed amendments would have altered the scope of permissible activities and compliance requirements of the 2013 rule in a way that significantly affects the economic costs and benefits of the 2013 rule. In addition, commenters offered a variety of views on the baseline economic effects, which include section 13 of the BHC Act, the 2013 rule, sections 203 and 204 of EGRRCPA and conforming amendments, and current practices of banking entities aimed at compliance with these regulations.[770] As part of the proposal's economic baseline, the SEC discussed the effects of the agencies' 2013 rule.[771] The economic baseline section below discusses these effects in greater detail.

The final rule includes amendments that impact the scope of permitted activities for all or a subset of banking entities (*e.g.,* trading account definition, underwriting and market making, and trading and investing activities by foreign banking entities), and amendments that simplify, tailor, or eliminate the application of certain aspects of the 2013 rule intended to reduce compliance and reporting burdens while preserving and, in some cases, enhancing the effectiveness of the 2013 rule. Many of the final amendments seek to provide greater clarity and certainty about which activities are permitted under the 2013 rule, which may increase the ability and willingness of banking entities to engage in permitted activities, and to promote the effective allocation of compliance resources.

Broadly, the SEC believes that a greater ability and willingness to engage in permitted activities would benefit the parties to those transactions and capital markets as a whole. Reduced compliance costs may translate into increased willingness of banking entities to engage in activities that facilitate risk-sharing and capital formation, such as underwriting securities and making markets. Accordingly, the rule may also benefit clients, customers, and counterparties in the form of an increased ability to transact with banking entities.

The SEC continues to recognize that some of these changes may also, in certain circumstances, increase activities involving risk exposure or increase the incidence of conflicts of interest among some market participants. The returns and risks from

[761] *See* 12 U.S.C. 1851(h)(1).

[762] These and other aspects of the regulatory baseline against which the SEC is assessing the economic effects of the final rule on SEC banking entities are discussed in the economic baseline. On July 22, 2019, the agencies adopted a final rule amending the definition of ''insured depository institution'' in a manner consistent with EGRRCPA.

[763] Throughout this economic analysis, the term ''banking entity'' generally refers only to banking entities for which the SEC is the primary financial regulatory agency unless otherwise noted. While section 13 of the BHC Act and its associated rules apply to a broader set of banking entities, this economic analysis is limited to those banking entities for which the SEC is the primary financial regulatory agency as defined in Section 2(12)(B) of the Dodd-Frank Act. *See* 12 U.S.C. 1851(b)(2); 12 U.S.C. 5301(12)(B).

Compliance with SBSD registration requirements is not yet required and there are currently no registered SBSDs. However, the SEC has previously estimated that as many as 50 entities may potentially register as SBSDs and that as many as 16 of these entities may already be SEC-registered broker-dealers. *See* Capital, Margin, and Segregation Requirements for Security-Based Swap Dealers and Major Security-Based Swap Participants and Capital and Segregation Requirements for Broker-Dealers, Exchange Act Release No. 86175 (June 21, 2019), 84 FR at 43872 (Aug. 22, 2019), (henceforth ''Capital, Margin, and Segregation Adopting Release'').

For the purposes of this economic analysis, the term ''dealer'' generally refers to SEC-registered broker-dealers and SBSDs.

[764] *See* 83 FR at 33520–33552.

the activities of banking entities may flow through to their investors. In general, to the extent that the final rule increases or decreases the scope of permissible activities, the final rule may dampen or magnify some of the economic tensions inherent in this rulemaking. As discussed above, various aspects of the final rule are designed to ensure that the prudential objectives of the rule are not diminished. Moreover, amendments adopted as part of the final rule that redefine the scope of entities subject to certain provisions of the 2013 rule may have an effect on competition, allocative efficiency, and capital formation. Where the final rule reduces burdens on some groups of market participants (*e.g.,* on banking entities without significant trading assets and liabilities and certain foreign banking entities), the final rule is expected to increase competition and trading activity in related market segments.

Other amendments to the 2013 rule reduce compliance program, reporting, and documentation requirements for some banking entities. The SEC believes that these amendments may reduce the compliance burdens of SEC-regulated banking entities, which may enhance competition, trading activity, and capital formation. The SEC recognizes that these amendments may alter the mix of tools available for regulatory oversight and supervision. However, the SEC believes that the final rule as a whole is unlikely to reduce the efficacy of the agencies' regulatory oversight.[772] Further, under the final rule, banking entities (other than banking entities with limited trading assets and liabilities for which the presumption of compliance has not been rebutted) are still required to develop and provide for the continued administration of a compliance program that is reasonably designed to ensure and monitor compliance with the prohibitions and restrictions set forth in section 13 of the BHC Act. Finally, the final rule does not change the scope of entities subject to the statutory obligations and prohibitions of section 13 of the BHC Act.

c. Analytical Approach

The SEC's economic analysis is informed by research on the effects of section 13 of the BHC Act and the 2013 rule and on related incentives conflicts, by comments received by the agencies from a variety of interested parties, and by the agencies' experience administering the 2013 rule since its adoption. Throughout this economic analysis, the SEC discusses how different market participants may respond to various aspects of the final rule and considers the potential effects of the final rule on activities by banking entities that involve risk, on their willingness and ability to engage in client-facilitation activities, and on competition, market quality, and capital formation, as informed, among other things, by research and comment letters. The SEC's analysis also recognizes that the overall risk exposure of banking entities may arise out of a combination of activities, including proprietary trading, market making, and traditional banking, as well as the volume and structure of hedging and other risk-mitigating activities. As discussed further below, the SEC recognizes the complex baseline effects of section 13 of the BHC Act, as amended by sections 203 and 204 of EGRRCPA, and implementing rules, on overall levels and structure of banking entity risk exposures.

The SEC also considered the investor protection implications of the final rule. Broadly, the SEC notes that market liquidity can be important to investors as it may enable investors to exit (in a timely manner and at an acceptable price) from their positions in instruments, products, and portfolios. At the same time, excessive risk exposures of banking entities can adversely affect markets and, therefore, investors.

The final rule tailors, removes, or alters the scope of various requirements in the 2013 rule and adds certain new requirements. Since section 13 of the BHC Act and the 2013 rule combined a number of different requirements, and, as discussed above, the type and level of risk exposure of a banking entity is the result of a combination of activities,[773] it is difficult to attribute the observed effects to a specific provision or set of requirements. In addition, analysis of the effects of the implementation of the 2013 rule is confounded by macroeconomic factors, other policy interventions, and post-crisis changes to market participants' risk aversion and return expectations. Because of the extended timeline of implementation of section 13 of the BHC Act and the overlap of the 2013 rule period with other post-crisis changes affecting the same group or certain sub-groups of SEC registrants, the SEC cannot rely on typical quantitative methods that might otherwise enable causal attribution and quantification of the effects of section 13 of the BHC Act and the 2013 rule on measures of capital formation, liquidity, competition, and informational or allocative efficiency. Moreover, empirical measures of capital formation or liquidity do not reflect issuance and transaction activity that does not occur as a result of the 2013 rule. Accordingly, it is difficult to quantify the primary issuance and secondary market liquidity that would have been observed following the financial crisis absent various provisions of Section 13 of the BHC Act and the 2013 final rule.

Importantly, the existing securities markets—including market participants, their business models, market structure, etc.—differ in significant ways from the securities markets that existed prior to enactment of Section 13 of the BHC Act and the implementation of the 2013 rule. For example, the role of dealers in intermediating trading activity has changed in important ways, including the following: In recent years, on both an absolute and relative basis bank-dealers generally committed less capital to intermediation activities while nonbanking dealers generally committed more; the volume and profitability of certain trading activities after the financial crisis may have decreased for bank-dealers while it may have increased for other intermediaries, including nonbanking entities that provide intraday liquidity using sophisticated electronic trading algorithms and high speed access to data and trading venues; and the introduction of alternative credit markets may have contributed to liquidity fragmentation across markets while potentially increasing access to capital.[774]

Where possible, this analysis attempts to quantify the costs and benefits expected to result from the final rule. In many cases, however, the SEC is unable to quantify these potential economic effects. Some of the primary economic effects, such as the effect on incentives that may give rise to conflicts of interest in various regulated entities and the efficacy of regulatory oversight under various compliance regimes, are inherently difficult to quantify. Moreover, some of the benefits of the 2013 rule's prohibitions that are being amended here, such as potential benefits for resilience during a crisis, are less readily observable under strong economic conditions and cannot be isolated from the effects of other post-crisis regulatory efforts intended to enhance resilience. Lastly, because of overlapping implementation periods of various post-crisis regulations affecting

[772] *See, e.g.,* sections IV.B.2 and IV.D.1.

[773] *See, e.g.,* 79 FR 5541.

[774] *See* Sec. & Exch. Comm'n, Access To Capital And Market Liquidity, (2017) [hereinafter SEC Report 2017].

the same group or certain sub-groups of SEC registrants, the long implementation timeline of the 2013 rule, and the fact that many market participants changed their behavior in anticipation of future changes in regulation, it is difficult to quantify the net economic effects of individual amendments to the 2013 rule adopted here.

In some instances, the SEC lacks the information or data necessary to provide reasonable estimates for the economic effects of the final rule. For example, the SEC lacks information and data, and commenters have not provided such information or data, to allow a quantification of (1) the volume of trading activity that does not occur because of uncertainty about how to demonstrate that underwriting or market making activities satisfy the reasonably expected near-term demand (RENTD) requirement; (2) the extent to which internal limits may capture expected customer demand; (3) how accurately correlation analysis reflects underlying exposures of banking entities with, and without, significant trading assets and liabilities in normal times and in times of market stress; (4) the feasibility and costs of reorganization that may enable some U.S. banking entities to become foreign banking entities for the purposes of relying on the foreign trading exemption; and (5) the extent of the overall risk reduction (if any) caused by the 2013 rule. Where the SEC cannot quantify the relevant economic effects, the SEC discusses them in qualitative terms.

2. Baseline

The baseline against which the SEC is assessing the economic effects of the final rule includes the legal and regulatory framework as it exists at the time of this release and current practices aimed at compliance with these regulations.

a. Regulation

The regulatory baseline includes section 13 of the BHC Act, as amended by EGRRCPA, and the 2013 rule, as amended by the agencies' amendments conforming to EGRRCPA. Further, the baseline accounts for the fact that since the adoption of the 2013 rule, the staffs of the agencies have provided FAQ responses to questions about the 2013 rule.[775] In addition, the federal banking agencies released a 2019 policy statement with respect to foreign excluded funds.[776]

The subsections below discuss in greater detail the legal and regulatory baseline applicable to entities that are registered with the SEC and that the SEC oversees for purposes of section 13 of the BHC Act. In particular, the SEC discusses the exemptions for permissible underwriting and market making-related activities, risk-mitigating hedging, and foreign trading; requirements and exemptions related to covered funds; compliance and metrics reporting requirements; and sections of EGRRCPA and conforming amendments that exempt certain banking entities from section 13 of the BHC Act and the 2013 rule.

i. The 2013 Rule

(1) Definition of the Trading Account

The scope of prohibited proprietary trading activity is determined by the definition of ''trading account'' and related exclusions.[777] As discussed in detail in section IV.B.1.a, the 2013 rule's definition of trading account includes three prongs: The short-term intent prong, the market risk capital rule prong, and the dealer prong. In addition, the 2013 rule includes a rebuttable presumption, under which a purchase (or sale) of a financial instrument is presumed to be for the trading account under the short-term intent prong if the banking entity holds the financial instrument for fewer than 60 days or substantially transfers the risk of the financial instrument within 60 days of the purchase (or sale).

The 2013 rule provides several exclusions from the definition of proprietary trading in section § ____.3(d). In particular, under certain conditions, the 2013 rule excludes from the definition of proprietary trading any purchases or sales that arise under a repurchase or reverse repurchase agreement or under a transaction in which the banking entity lends or borrows a security temporarily, any purchase or sale of a security for the purpose of liquidity management in accordance with a documented liquidity management plan,[778] any purchase or sale by a banking entity that is a derivatives clearing organization or a clearing agency in connection with clearing financial instruments, any excluded clearing activities, any purchase or sale that satisfies an existing delivery obligation or an obligation in connection with a judicial, administrative, self-regulatory organization, or arbitration proceeding, any purchase or sale by a banking entity that is acting solely as agent, broker, or custodian, any purchase or sale through a deferred compensation, stock-bonus, profit-sharing, or pension plan, and any purchase or sale in the ordinary course of collecting a debt previously contracted in good faith.

In addition, section § ____.3(e)(13) of the 2013 rule defines ''trading desk'' as the smallest discrete unit of organization of a banking entity that purchases or sells financial instruments for the trading account of the banking entity or an affiliate thereof, and applies certain requirements at the ''trading desk''-level of organization.[779]

(2) Exemption for Underwriting and Market Making-Related Activity

Section 13(d)(1)(B) of the BHC Act contains an exemption from the prohibition on proprietary trading for underwriting and market making-related activities. Under the 2013 rule, all banking entities with covered activities must satisfy several requirements with respect to their underwriting activities to qualify for the exemption for underwriting activities, discussed in detail in section IV.B.2.a above.[780] In addition, under the current baseline, all banking entities with covered activities must satisfy six requirements with respect to their market making-related activities to qualify for the exemption for market making-related activities, as discussed in section IV.B.2.a.[781]

The SEC also notes that, under the baseline, an organizational unit or a trading desk of another banking entity that has consolidated trading assets and liabilities of $50 billion or more is generally not considered a client, customer, or counterparty for the purposes of the RENTD requirement.[782] Thus, such demand does not contribute to RENTD unless such demand is affected through an anonymous trading facility or unless the trading desk documents how and why the organizational unit of said large banking entity should be treated as a client,

customer, or counterparty. To the extent that such documentation requirements increase the cost of intermediating interdealer transactions, this requirement may affect the volume and cost of interdealer trading.

(3) Exemption for Risk-Mitigating Hedging

Under the baseline, certain risk-mitigating hedging activities may be exempt from the restriction on proprietary trading under the risk-mitigating hedging exemption. To make use of this exemption, the 2013 rule requires all banking entities to comply with a comprehensive and multi-faceted set of requirements, including (1) the establishment, implementation, and maintenance of an internal compliance program; (2) satisfaction of various criteria for hedging activities; and (3) the existence of compensation arrangements for persons performing risk-mitigating hedging activities that are designed not to reward or incentivize prohibited proprietary trading. In addition, certain activities under the exemption for risk-mitigating hedging are subject to documentation requirements.[783]

Specifically, the 2013 rule requires that a banking entity seeking to rely on the exemption for risk-mitigating hedging must establish, implement, maintain, and enforce an internal compliance program that includes reasonably designed written policies and procedures regarding the positions, techniques, and strategies that may be used for hedging, including documentation indicating what positions, contracts, or other holdings a particular trading desk may use in its risk-mitigating hedging activities, as well as position and aging limits with respect to such positions, contracts, or other holdings. The compliance program must also provide for internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures. In addition, the 2013 rule requires that all banking entities, as part of their compliance program, must conduct analysis, including correlation analysis, and independent testing designed to ensure that the positions, techniques, and strategies that may be used for hedging are designed to reduce or otherwise significantly mitigate and demonstrably reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged.

The 2013 rule does not require a banking entity to prove correlation mathematically—rather, the nature and extent of the correlation analysis should be dependent on the facts and circumstances of the hedge and the underlying risks targeted. Moreover, if correlation cannot be demonstrated, the analysis needs to state the reason and explain how the proposed hedging position, technique, or strategy is designed to reduce or significantly mitigate risk and how that reduction or mitigation can be demonstrated without correlation.[784] In the proposal, the SEC referenced market participants' estimate that the inability to perform correlation analysis, for instance, for non-trading assets such as mortgage servicing assets, can add as much as 2% of the asset value to the cost of hedging.[785]

To qualify for the exemption for risk-mitigating hedging, the hedging activity, both at inception and at the time of any adjustment to the hedging activity, must be designed to reduce or otherwise significantly mitigate and demonstrably reduce or significantly mitigate one or more specific identifiable risks.[786] Hedging activities also must not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously. Additionally, the hedging activity must be subject to continuing review, monitoring, and management by the banking entity, including ongoing recalibration of the hedging activity to ensure that the hedging activity satisfies the requirements for the exemption and does not constitute prohibited proprietary trading.

Finally, the 2013 rule requires banking entities to document and retain information related to the purchase or sale of hedging instruments that are either (1) established by a trading desk that is different from the trading desk establishing or responsible for the risks being hedged; (2) established by the specific trading desk establishing or responsible for the risks being hedged but that are effected through means not specifically identified in the trading desk's written policies and procedures; or (3) established to hedge aggregate positions across two or more trading desks.[787] The documentation must include the specific identifiable risks being hedged, the specific risk-mitigating strategy that is being implemented, and the trading desk that is establishing and responsible for the hedge. These records must be retained for a period of not less than 5 years in a form that allows them to be promptly produced if requested.[788]

(4) Exemption for Foreign Trading

Under the 2013 rule, a foreign banking entity that has a branch, agency, or subsidiary located in the United States (and is not itself located in the United States) is subject to the proprietary trading prohibitions and related compliance requirements unless the transaction meets five criteria.[789] First, a branch, agency, or subsidiary of a foreign banking organization that is located in the United States or organized under the laws of the United States or of any state may not engage as principal in the purchase or sale of financial instruments (including any personnel that arrange, negotiate, or execute a purchase or sale). Second, the banking entity (including relevant personnel) that makes the decision to engage in the transaction must not be located in the United States or organized under the laws of the United States or of any state. Third, the transaction, including any transaction arising from risk-mitigating hedging related to the transaction, must not be accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any state. Fourth, no financing for the transaction can be provided by any branch or affiliate of a foreign banking entity that is located in the United States or organized under the laws of the United States or of any state (the financing prong). Fifth, the transaction must generally not be conducted with or through any U.S. entity (the counterparty prong), unless (1) no personnel of a U.S. entity that are located in the United States are involved in the arrangement, negotiation, or execution of such transaction; (2) the transaction is with an unaffiliated U.S. market intermediary acting as principal and is promptly cleared and settled through a central counterparty; or (3) the transaction is executed through an unaffiliated U.S. market intermediary acting as agent, conducted anonymously through an

exchange or similar trading facility, and is promptly cleared and settled through a central counterparty.[790]

(5) Covered Funds

The 2013 rule generally defines covered funds as issuers that would be investment companies but for section 3(c)(1) or 3(c)(7) of the Investment Company Act of 1940 and then excludes specific types of entities from the definition. As described above, the 2013 rule provides for market making and hedging exemptions to the prohibition on proprietary trading. However, the 2013 rule places additional restrictions on the amount of underwriting, market making, and hedging a banking entity can engage in when those transactions involve covered funds. For underwriting and market making transactions in covered funds, if the banking entity sponsors or advises a covered fund, or acts in any of the other capacities specified in § ____.11(c)(2) of the 2013 rule, then any ownership interests acquired or retained by the banking entity and its affiliates in connection with underwriting and market making-related activities for that particular covered fund must be included in the per-fund and aggregate covered fund investment limits in § ____.12 of the 2013 rule and is subject to the capital deduction provided in § ____.12(d) of the 2013 rule.[791] Additionally, a banking entity's aggregate investment in all covered funds is limited to 3% of a banking entity's tier 1 capital, and banking entities must include all ownership interests in covered funds acquired or retained in connection with underwriting and market making-related activities for purposes of this calculation.[792] Moreover, under the 2013 rule, the exemption for risk-mitigating hedging activities related to covered funds is available only for transactions that mitigate risks associated with the compensation of a banking entity employee or an affiliate that provides advisory or other services to the covered fund.[793]

Under the 2013 rule, foreign banking entities can acquire or retain an ownership interest in, or act as sponsor to, a covered fund, so long as those activities and investments occur solely outside of the United States, no ownership interest in such fund is offered for sale or sold to a resident of the United States (the marketing restriction), and certain other conditions are met. Under the 2013 rule, an activity or investment occurs solely outside of the United States if (1) the banking entity is not itself, and is not controlled directly or indirectly by, a banking entity that is located in the United States or established under the laws of the United States or of any state; (2) the banking entity (and relevant personnel) that makes the decision to acquire or retain the ownership interest or act as sponsor to the covered fund is not located in the United States or organized under the laws of the United States or of any state; (3) the investment or sponsorship, including any risk-mitigating hedging transaction related to an ownership interest, is not accounted for as principal by any U.S. branch or affiliate; and (4) no financing is provided, directly or indirectly, by any U.S. branch or affiliate. In addition, the staffs of the agencies have issued FAQs concerning the requirement that no ownership interest in such fund is offered for sale or sold to a resident of the United States.[794]

(6) Compliance Program

For compliance purposes, the 2013 rule differentiates banking entities on the basis of certain thresholds, including the amount of the banking entity's consolidated trading assets and liabilities and total consolidated assets. More specifically, U.S. banking entities that have, together with affiliates and subsidiaries, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which—on a worldwide consolidated basis, over the previous consecutive four quarters, as measured as of the last day of each of the four prior calendar quarters—equals $10 billion or more are subject to reporting requirements of Appendix A under the 2013 rule. Banking entities that have $50 billion or more in total consolidated assets as of the previous calendar year end and banking entities with over $10 billion in consolidated trading assets and liabilities are subject to the requirement to adopt an enhanced compliance program pursuant to Appendix B of the 2013 rule. Additionally, banking entities that engage in covered activities and that have total consolidated assets of $10 billion or less as reported on December 31 of the previous 2 calendar years qualify for the simplified compliance regime.

The 2013 rule emphasized the importance of a strong compliance program and sought to tailor the compliance program to the size of banking entities and the size of their trading activity. As noted in the preamble to the 2013 rule, the agencies believed it was necessary to balance compliance burdens posed on smaller banking entities with specificity and rigor necessary for large and complex banking organizations facing high compliance risks. As a result, the compliance regime under the 2013 rule is progressively more stringent with the size of covered activities and/or balance sheet of banking entities.

Under the 2013 rule, all banking entities with covered activities must develop and maintain a compliance program that is reasonably designed to ensure and monitor compliance with section 13 of the BHC Act and the implementing regulations. The terms, scope, and detail of the compliance program depend on the types, size, scope, and complexity of activities and business structure of the banking entity.[795]

Under the 2013 rule, banking entities that qualify for the simplified compliance program (banking entities that have total consolidated assets of less than $10 billion) are able to incorporate compliance with the 2013 rule into their regular compliance policies and procedures by reference, adjusting as appropriate given the entities' activities, size, scope, and complexity.[796]

All other banking entities with covered activities are, at a minimum, required to implement a six-pillar compliance program. The six pillars include (1) written policies and procedures reasonably designed to document, describe, monitor and limit proprietary trading and covered fund activities and investments for compliance; (2) a system of internal controls reasonably designed to monitor compliance; (3) a management framework that clearly delineates responsibility and accountability for compliance, including management review of trading limits, strategies, hedging activities, investments, and incentive compensation; (4) independent testing and audit of the effectiveness of the compliance program; (5) training for personnel to

[795] *See* 2013 rule § ____.20(a).

[796] *See* 2013 rule § ____.20(f). Note that if an entity does not have any covered activities, it is not required to establish a compliance program until it begins to engage in covered activity.

effectively implement and enforce the compliance program; and (6) recordkeeping sufficient to demonstrate compliance.[797]

In addition, under the 2013 rule, banking entities with covered activities that do not qualify as those with modest activity (banking entities that have total consolidated assets in excess of $10 billion) and that are either subject to the reporting requirements of Appendix A or have more than $50 billion in total consolidated total assets as of the previous calendar year end are required to comply with the enhanced minimum standards for compliance as specified in Appendix B of the 2013 rule.[798]

Appendix B requires the compliance program of the banking entities that are subject to it to (1) be reasonably designed to supervise the permitted trading and covered fund activities and investments, identify and monitor the risks of those activities and potential areas of noncompliance, and prevent prohibited activities and investments; (2) establish and enforce appropriate limits on the covered activities and investments, including limits on the size, scope, complexity, and risks of the individual activities or investments consistent with the requirements of section 13 of the BHC Act and the 2013 rule; (3) subject the compliance program to periodic independent review and testing and ensure the entity's internal audit, compliance, and internal control functions are effective and independent; (4) make senior management and others accountable for the effective implementation of the compliance program, and ensure that the chief executive officer and board of directors review the program; and (5) facilitate supervision and examination by the agencies.

Additionally, under the 2013 rule, any banking entity that has more than $10 billion in total consolidated assets as reported in the previous 2 calendar years is required to maintain additional records related to covered funds. In particular, a banking entity must document the exclusions or exemptions relied on by each fund sponsored by the banking entity (including all subsidiaries and affiliates) in determining that such fund is not a covered fund, including documentation that supports such determination; for each seeding vehicle that will become a registered investment company or SEC-regulated business development company, a written plan documenting the banking entity's determination that the seeding vehicle will become a registered investment company or SEC-regulated business development company, the period of time during which the vehicle will operate as a seeding vehicle, and the banking entity's plan to market the vehicle to third-party investors and convert it into a registered investment company or SEC-regulated business development company within the time period specified.[799]

(7) Metrics

Under Appendix A of the 2013 rule, banking entities with trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which—on a worldwide consolidated basis, over the four previous quarters, as measured by the last day of each of the four prior calendar quarters—equals or exceeds $10 billion to meet requirements concerning recording and reporting certain measurements for each trading desk engaged in covered trading activity.[800] Banking entities subject to Appendix A are required to record and report the following quantitative measurements for each trading day and for each trading desk engaged in covered trading activities: (i) Risk and Position Limits and Usage; (ii) Risk Factor Sensitivities; (iii) Value-at-Risk and Stress Value-at-Risk; (iv) Comprehensive Profit and Loss Attribution; (v) Inventory Turnover; (vi) Inventory Aging; and (vii) Customer-Facing Trade Ratio.

The metrics reporting requirements are intended to assist banking entities, the SEC, and other regulators in achieving the following: A better understanding of the scope, type, and profile of covered trading activities; identification of covered trading activities that warrant further review or examination by the banking entity to verify compliance with the rule's proprietary trading restrictions; evaluation of whether the covered trading activities of trading desks engaged in permitted activities are consistent with the provisions of the permitted activity exemptions; evaluation of whether the covered trading activities of trading desks that are engaged in permitted trading activities (*i.e.,* underwriting and market making-related activity, risk-mitigating hedging, or trading in certain government obligations) are consistent with the requirement that such activity not result, directly or indirectly, in a material exposure to high-risk assets or high-risk trading strategies; identification of the profile of particular covered trading activities of the banking entity, and its individual trading desks, to help establish the appropriate frequency and scope of the SEC's examinations of such activity; and the assessment and addressing of the risks associated with the banking entity's covered trading activities.[801]

Under the 2013 rule, banking entities with significant trading assets and liabilities (Group A entities) and with moderate trading assets and liabilities (Group B entities) that have less than $50 billion in consolidated trading assets and liabilities are required to report metrics for each quarter within 30 days of the end of that quarter. In contrast, Group A and Group B banking entities with total trading assets and liabilities equal to or above $50 billion are required to report metrics more frequently—each month within 10 days of the end of that month.[802]

ii. EGRRCPA and Conforming Amendments

In accordance with section 203 of EGRRCPA,[803] the agencies amended the definition of ''insured depository institution'' in § ____.2(r) of the 2013 rule to exclude an institution if it, and every entity that controls it, has both (1) $10 billion or less in total consolidated assets and (2) total consolidated trading assets and liabilities that are 5% or less of its total consolidated assets. The agencies also amended the 2013 rule to reflect the changes made by section 204 of EGRRCPA. That provision modified section 13 of the BHC Act to permit, in certain circumstances, bank-affiliated investment advisers to share their name with the hedge funds or private equity funds they organize and offer.

As discussed elsewhere,[804] certain SEC-regulated entities, such as dealers and RIAs, fell under the definition of ''banking entity'' for the purposes of section 13 of the BHC Act before the enactment of EGRRCPA and qualified for the final amendments implementing

[797] *See* 2013 rule § ____.20(b).

[798] *See* 2013 rule § ____.20(c) and Appendix B.

[799] *See* 2013 rule § ____.20(e).

[800] *See* 2013 rule § ____.20(d) and Appendix A.

[801] *See* 2013 rule § ____.20 and Appendix A.

[802] *See* 2013 rule § ____.20(d)(3).

[803] Specifically, section 203 of EGRRCPA provides that the term ''insured depository institution,'' for purposes of the definition of ''banking entity'' in section 13(h)(1) of the BHC Act (12 U.S.C. 1851(h)(1)), does not include an insured depository institution that does not have, and is not controlled by a company that has (1) more than $10 billion in total consolidated assets; and (2) total trading assets and trading liabilities, as reported on the most recent applicable regulatory filing filed by the institution, that are more than 5% of total consolidated assets.

[804] *See* EGRRCPA Conforming Amendments Adopting Release, 84 FR at 35008.

sections 203 and 204 of EGRRCPA.[805] Therefore, the economic baseline against which the SEC is assessing the final rule incorporates the economic effects of sections 203 and 204 of EGRRCPA, as analyzed in the agencies' release adopting the conforming amendments.[806]

b. Response to Commenters Regarding Economic Baseline and Effects of Section 13 of the BHC Act and the 2013 Rule

In the proposal, the SEC described the baseline effects of the 2013 rule[807] and recognized that amendments that increase or decrease the scope of permissible activities may magnify or attenuate the baseline economic effects of the 2013 rule.[808] The SEC also noted that amendments that decrease (or increase) compliance program and reporting obligations could alter the economic effects toward (or away from) competition, trading activity, and capital formation on the one hand, and against (or in favor of) regulatory and internal oversight on the other. However, the SEC noted that the proposed amendments may enhance trading liquidity and capital formation and that some of the proposed changes need not reduce the efficacy of the regulation or the agencies' regulatory oversight.[809]

A number of commenters, however, have indicated that the proposed amendments would have changed the scope of permissible activities and the compliance regime in the 2013 rule in a manner that significantly alters the costs and benefits of that rule and offered a variety of assessments of the baseline economic effects of section 13 of the BHC Act and the 2013 rule.[810] In response to those comments, this section expands the discussion of the baseline and supplements the analysis in the proposal with a discussion of the comments received by the agencies and, in response to comments, recent research on that topic. In the 2013 rule, the agencies sought to increase the safety and soundness of banking entities and to promote financial stability,[811] and to reduce conflicts of interest between banking entities and their customers, clients, and counterparties,[812] while preserving the provision of valuable client-oriented services[813] and mitigating unnecessary compliance burdens and related competitive effects.[814] Accordingly, the sections that follow address the SEC's understanding of the baseline effects of section 13 of the BHC Act and the 2013 rule on (a) risk exposures, (b) conflicts of interest between banking entities and their customers and counterparties, (c) client-oriented financial services and market quality, and (d) compliance burdens and competition.

The SEC's analysis of these various effects reflects comments received, academic research, and the SEC's experience overseeing registered entities for purposes of section 13 of the BHC Act. Importantly, research studies cited below are limited to their specific settings and are subject to various methodological and measurement limitations, as discussed in the sections that follow. Moreover, as described below, some studies empirically examine the relevant effects around the implementation of the 2013 rule, while others focus on the anticipatory response of market participants around the enactment of section 13 of the BHC Act and prior to the effective date of the 2013 rule. As a result, the SEC recognizes that these findings may have limited generalizability and may or may not extend to various groups of SEC registrants.

As discussed below, some research suggests that section 13 of the BHC Act and the 2013 rule may have reduced risk exposures of banking entities related to trading, but may not have reduced the overall exposure to risk of some banking entities. Other research suggests that the 2013 rule may have partly mitigated certain conflicts of interest between banking entities and clients in a limited set of banking entity-client relationships. Moreover, some research suggests that the 2013 rule imposed large compliance costs that may have disproportionately affected smaller banking entities and may have decreased the willingness and ability of banking entities to engage in certain client facilitation activities.

In addition, commenters suggested that the agencies must consider the effects of the 2013 rule and proposed amendments in light of the overall effects of new requirements on banking entities, including Basel III, regulations of systemically important financial institutions, the SEC's money market reform, and the liquidity coverage ratio.[815] Where relevant, the analysis that follows discusses the direct effects of section 13 of the BHC Act, the 2013 rule, sections 203 and 204 of EGRRCPA and conforming amendments, and the final rule, as well as how they may interact with the effects of other related financial regulations.

i. Risk Exposure

As discussed in the proposal, in implementing section 13 of the BHC Act, the agencies sought to increase the safety and soundness of banking entities and to promote financial stability, among other things.[816] The regulatory regime created by the 2013 rule was intended to enhance regulatory oversight and compliance with the substantive prohibitions in section 13 of the BHC Act.[817]

In response to the proposal, some commenters indicated that the benefits from the statutory prohibition in section 13 of the BHC Act and implementing rules on proprietary trading include reduced banking profits resulting from proprietary trading and corresponding reductions in the costs associated with bailouts;[818] prudent risk management that makes job-creating functions of banks more viable;[819] greater financial stability;[820] dampened bubbles in products such as synthetic collateralized debt obligations,[821] and reduced highly risky bank trading activities and hedge fund and private equity investments that can threaten financial stability.[822] Other commenters stated that proprietary trading was not the cause of the 2007–2008 financial crisis and that almost every financial crisis in history has been driven by classic extensions of credit;[823] that rather than reducing systemic risk, section 13 of the BHC Act and the implementing rules harm the healthy functioning of the financial services

805 The SEC continues to believe that all bank-affiliated entities that may register with the SEC as security-based swap dealers and major security-based swap participants were unaffected by section 203 of EGRRCPA or the conforming amendments because of the size of their balance sheets and the amount of trading activity of their affiliated banking entities. The SEC's analysis was based on DTCC Derivatives Repository Limited Trade Information Warehouse (TIW) data on single-name credit-default swaps.

industry;[824] and that section 13 of the BHC Act and the implementing rules are no longer necessary given Basel III capital requirements, stress testing, and liquidity coverage ratio rules that promote short-term resilience of bank risk profiles.[825]

In response to the comments discussed above, the SEC has analyzed relevant academic research on these issues. Most existing qualitative analysis and quantitative research on moral hazard,[826] incentives to increase risk exposures that arise out of deposit insurance[827] and implicit bailout guarantees,[828] and systemic risk implications of proprietary trading do not explicitly analyze the effects of section 13 of the BHC Act or of the 2013 rule.[829]

Several recent academic studies examined the baseline effects of section 13 of the BHC Act and implementing regulations on activities by banking entities that involve market risk. As discussed in detail below, this research suggests that, although section 13 of the BHC Act and the 2013 rule may have reduced risk exposure related to trading, it is not clear that the 2013 rule reduced the overall risk of individual banking entities and potentially of banking entities as a whole.

For example, one study[830] compares changes in equity returns and CDS spreads of 93 U.S. listed banks affected by post-crisis financial reforms and of those that were not. Specifically, the study finds that news concerning the potential enactment of substantive prohibitions in section 13 of the BHC Act[831] led to a rise in credit default swap (CDS) spreads (by as much as 17–18 basis points) and to a decrease in equity prices (statistically significant in most specifications). The paper interprets the results as an indication that the proprietary trading prohibition reduced bank profitability because of the spinoffs of profitable trading and swap desks. In an additional analysis, the paper finds that these effects were more significant for investment banks, for banks that are more likely to be systemically important,[832] and for banks that are closer to default. Notably, the paper does not examine changes in specific types of risky activities, so it is possible that the observed effects may have occurred for reasons unrelated to the proprietary trading prohibitions.[833] While the paper concludes that the reforms reduced bail-out expectations, the rise in CDS spreads and the decrease in equity prices are also consistent with the interpretation that market participants reacted to the event as a change increasing the risk to banking entities, for instance because of the expected shift to risk taking through lending or reduced hedging of lending activities with trading activities. For instance, a shift away from trading activity and toward more illiquid and potentially less diversified lending or trading activities may have increased banking entities' exposure to liquidity and counterparty risks, and this risk may have been priced in higher CDS spreads of banking entities.

In contrast, another paper[834] examines the cumulative market reaction to 15 events related to section 13 of the BHC Act using a sample of 784 listed banks and seeks to distinguish the events from announcements surrounding Orderly Liquidation Authority events. The paper finds significant negative cumulative abnormal equity returns (−11.97%) for targeted banks,[835] consistent with targeted banks losing out on profitable opportunities, and positive cumulative abnormal returns (7.1%) for non-targeted banks. Similarly, the paper estimates that targeted banks experienced a 0.021% increase in CDS spreads, consistent with the changes making targeted banks riskier, whereas non-targeted banks experienced a decline in CDS spreads of −0.049%. In addition, banks with a higher measure of systemic risk (marginal expected shortfall), higher illiquidity (Amihud (2002)[836] measure and the bid-ask spread), and worse reporting quality (abnormal loan loss provisions) experienced more negative market reactions to events surrounding section 13 of the BHC Act and the 2013 rule. On aggregate, the paper finds that equity returns rose and CDS spreads declined for sample banks, and concludes that the rule targeted larger institutions and enhanced the relative position of smaller banks.

Four factors limit the interpretation of this paper's results. First, the validity of inference from event studies is affected by the presence of confounding events on announcement days. While a study of a greater number of event days may provide a more complete picture of market responses to even minor announcements concerning the reform of interest, it increases the likelihood of confounding events occurring on event days, ceteris paribus. Second, the proprietary trading prohibitions scoped in all, not just a subset of, banking entities, while the paper hypothesizes differential effects of the proprietary trading prohibition on targeted and non-targeted banks. As a result, the measurement of targeted banks may simply be capturing prior performance of an institution during times of severe

[824] *See, e.g.,* American Action Forum and CAP.

[825] *See* Oonagh McDonald. *See also infra* note 849.

[826] A classic definition of moral hazard is ''the loss exposure of an insurer (the FDIC) that results from the character or circumstances of the insured'' (here, the banking entity). *See* Anthony Saunders & Marcia Cornett, Financial Institutions Management: A Risk Management Approach, 573 (8th ed. 2014) p. 573.

[827] Saunders and Cornett (2014) discusses how deposit insurance reduces the risks of depositors or other liability holders engaging in a run on a banking entity and the related costs of a banking entity's failure. However, if the risk of bank failure is not adequately priced in the insurance premium paid by the banking entity, deposit insurance can create incentives to engage in more risky activities. Moreover, even absent deposit insurance, the limited liability of a banking entity's shareholders still creates incentives to risk shift at the expense of depositors, bondholders, and other fixed claimants. *See* Saunders and Cornett (2014), ch. 19.

[828] Deposit insurance and implicit bailout guarantees may give rise to risk taking incentives that are not specific to proprietary trading. In other words, even in the absence of proprietary trading, both deposit insurance and implicit bailout guarantees may create incentives for banking entities to increase risk exposures from permissible activities such as lending, underwriting, and market making. Thus, a prohibition of proprietary trading need not by itself reduce moral hazard or overall risk exposures of banking entities if banking entities increase risk exposures from other activities during the same time.

stress or the likelihood of an institution being affected by other regulatory restrictions or sanctions and not necessarily the degree of exposure to the proprietary trading prohibition. Third, since the management of bank balance sheets and risk exposures can take several quarters, narrow event windows may reflect market participants' expectations but may not be informative about ex-post changes in risky bank activities in response to the event.[837] Finally, all but one event considered in this study relate to the substantive prohibitions in section 13 of the BHC Act (and not the agencies' implementing rules), and all of the events examined in this study precede the adoption of the 2013 rule.

A recent paper uses regulatory data on net trading profits reported by bank holding companies to the Federal Reserve under the Market Risk Capital Rule and examines the risk-taking of U.S. banks via trading books before and after the 2013 rule.[838] The paper finds that, prior to 2014, U.S. banks had significant exposures to equity risk factors through their trading books, but that such trading exposures declined after the implementing regulations. The paper also finds that, in response to the 2013 rule, the trading desks of U.S. banks have decreased their exposures to interest rate risk but not to credit risk. Consistent with bank reliance on certain exemptions with respect to commodities, foreign exchange, and currency trading, U.S. banks also continue to be exposed to currency risk. Importantly, post-2013 rule credit and dollar risk exposures are far less significant in magnitude compared to pre-2013 rule exposure to equity risk factors. The paper concludes that the ban on proprietary trading was effective in curtailing large exposures. These results seem to suggest that holding companies significantly reduced their exposure to risk from trading activities.

Four considerations limit the interpretation of these results. First, the paper's tests focus on data aggregated to the weekly frequency, and it is not clear if the results would continue to hold using daily, monthly, or quarterly frequencies. For example, the results appear inconsistent with other research analyzing FR Y–9C data on trends in quarterly trading positions and trading revenues, which does not find significant changes in equity profits and losses after the 2013 rule.[839] Second, anticipatory compliance and confounding regulatory and macroeconomic events (unaccounted for in the paper) complicate definitive causal inference. Third, the paper does not examine the possibility that, since higher risk is generally compensated with higher expected returns,[840] banking entities may have offset risk reductions in their trading books by shifting risk into illiquid banking books. Fourth, the paper also does not test changes in the total amount of risk on bank balance sheets before and after the relevant regulatory shocks or consider the effects of the implementing regulations on the overall risk of U.S. banking entities.

Another study empirically examines the effects of the substantive prohibitions of section 13 of the BHC Act on the returns and overall risk of publicly traded U.S. bank holding companies before and after the third quarter of 2010.[841] Consistent with the papers discussed above, this paper finds that most affected bank holding companies, *i.e.* those with the largest trading books before 2010, reduced trading books relative to total assets by 2.34% more than other bank holding companies. However, this result is generally consistent with mean reversion in trading activity by banks that may have suffered the greatest trading losses during the crisis. In addition, the paper does not directly distinguish between proprietary trading and client facilitation trading or hedging trading. Although the paper finds a decline in trading activity and a general decline in overall bank risk (measured by the *z-score*),[842] the paper does not find a pronounced effect on most affected bank holding companies; in fact, some of the results suggest that most affected banks became riskier than less affected banks. The paper finds that the channel for this effect on overall risk is an increase in asset return volatility of affected bank holding companies. In addition, the paper finds no significant differences in the volatility of bank stock prices and liquidity ratios of affected and unaffected entities. The paper concludes that the risk taking incentives of banking entities have not changed and that affected banks have been able to maintain their levels of risk taking by becoming less likely to use remaining trading assets to hedge banking book returns.[843] The SEC notes that the sample period of the paper ends prior to the full effective date of the 2013 final rule, which may partly limit the interpretation of these results.

Another recent paper[844] uses structural methods to isolate and estimate the effects of the limitation of bank proprietary trading in section 13 of the BHC Act on the probability of bank defaults, earnings, and the value of their equity. Using a model calibrated to the data from a sample of 34 of the most affected U.S. banks, this paper finds that banks—and particularly banks most affected by section 13 of the BHC Act—

[837] For example, see the below discussion of a study by Keppo and Korte (2018) examining changes in bank risk taking over a 10 quarter period and finding that banks did not decrease risk-taking.

Jackson Jr., ''Proposed Amendments to the Volcker Rule,'' Securities and Exchange Commission, June 5, 2018, note 21 available at *https://www.sec.gov/news/public-statement/jackson-statement-proposed-amendments-volcker-rule.*

[842] The z-score is one of the most popular multiple discriminant analysis models of bankruptcy, originally developed by Altman (1968) and updated frequently since. Multiple discriminant analysis consists of identifying a linear combination of accounting measures that provides the best fit for the observed default and non-default outcomes in a particular sample of firms. The variables that enter into the z-score include: The ratio of working capital to total assets; retained earnings to total assets; earnings before interest and taxes to total assets; market value of equity to total liabilities; and net sales to total assets. While the weights on these components of the z-score are periodically recalibrated using more recent samples, all components enter with a positive sign, such that an increase in each of the variables decreases the probability of bankruptcy. *See* Phillippe Jorion, GARP Financial Risk Manager Handbook: Frm Part I/Part II, 475 (2011).

[843] In another context, Keppo and Korte (2018) also find that, after the passage of the Gramm-Leach-Bliley Act that repealed the Glass-Steagall Act, the overall risk (measured by the z-score) of affected banks relative to unaffected banks did not change. In that context, the paper finds that affected banks did significantly increase their trading risk and decrease the risk of their banking book.

Also cited in Robert J. Jackson Jr., ''Proposed Amendments to the Volcker Rule,'' Securities and Exchange Commission, June 5, 2018, note 22 available at *https://www.sec.gov/news/public-statement/jackson-statement-proposed-amendments-volcker-rule.*

may have become riskier after the statutory change. In the model, the key mechanism behind this effect is the banks' ability to respond to shocks: Since the rule leads to a reduction in the size of the trading book and increases the relative weight of an illiquid banking book, banks face greater difficulties scaling down the bank book when faced with negative earnings shocks after the rule. The model assumes no implementation costs, as the costs were sunk when the statutory prohibition came into effect and yields an estimate of between −0.72% and 56.72% increase in average bank default probability after the law. This estimate range may suggest that the overall risk of some banks may have increased, in some cases, after the law. In the model, banks for which a small trading book is optimal, banks with a profitable and low-risk bank book, and banks that take more risk through leverage, do not experience this rise in the default risk after the proprietary trading prohibition. Because the banking book is more profitable and volatile than the trading book for most affected banks, the paper actually estimates no significant decrease and, in some cases, an increase in banks' expected earnings and earnings volatility (a range of −0.04% to 0.73% depending on calibration).[845] An important caveat for the interpretation of these results is the sensitivity of the estimates to modeling assumptions, the limited sample used in model calibration, and the extremely broad range of estimates of an increase in average bank default probability after the law.

Finally, a recent paper[846] identified three potential channels behind the effects of section 13 of the BHC Act and the 2013 rule on risky activities of bank holding companies: (i) Risks from proprietary trading activity itself, (ii) risk from a lack of diversification of bank revenue (trading and non-trading revenue), and (iii) risk from similarity among banks. The paper measures overall risk with the z-score (as well as volatility in returns, revenues, and returns on assets) and systemic risk with marginal expected shortfall (average stock return of each bank holding company during bottom 5th percentile shocks to 1-year market returns; it also measures marginal expected shortfall for the financial industry, and tail beta)[847] and documents two main results. First, an index of bank revenue diversification reduces measures of bank and systemic risk, while similarity across banks increases systemic risk, and trading activity increases both. Second, the 2013 rule reduced risks from trading activity of affected banks, reduced the diversification of bank revenue of affected banks, and increased similarity across banks.

The interpretation of these results may be limited because of respective methodologies, measurement, identifying assumptions, and residual confounding, as well as the general limitations noted at the outset. However, these results are broadly consistent with other research that finds that banking entities can respond to regulations by risk shifting within an asset class while remaining in compliance[848] and that the implementation of other financial reforms can create effects inconsistent with the regulators' intentions.[849]

Some commenters indicated that restricting pay practices of banking entities may effectively reduce proprietary trading cross-subsidized by taxpayers and accordingly lower the risks of banking entities.[850] While the final rule does not amend existing requirements or impose new requirements related to compensation practices of banking entities, the SEC notes two incentive effects relevant for the consideration of these issues. First, as discussed above, proprietary trading is one of many activities through which a banking entity can take risk. Both deposit insurance and implicit government bailout guarantees incentivize risk taking that is not specific to proprietary trading. Even in the absence of proprietary trading, deposit insurance and implicit bailout guarantees may lead banking entities to take greater risks through lending and permitted underwriting and market making, among other things. As a result, a prohibition on proprietary trading need not by itself reduce the overall risk of banking entities if banking entities increase risk through other activities during the same time.

Second, the incentives to take on greater risks described above are those of both a banking entity's shareholders who are residual claimants on the banking entity's assets and management. Under limited liability, all shareholders enjoy a limited downside (at worst, shareholders stand to lose their investment) and an unlimited upside if the firm performs well (the value of shareholders' equity depends on the value of the assets net of the value of fixed claims, such as claims of debtholders, depositors, and employees).[851] Thus, the incentives of banking entities to take on greater risks discussed above may persist so long as any restrictions on pay practices leave the incentives of a banking entity's management and employees even partly aligned with those of shareholders.

ii. Conflicts of Interest

As discussed in the proposal, in implementing section 13 of the BHC Act, the agencies also sought to reduce conflicts of interest between banking entities and their customers.[852] Some commenters indicated that bank trading activities and interests in hedge funds and private equity funds resulted in

[845] The estimate of −0.04% was obtained using parameters for ''median hedge fund banks,'' calculated as the median of the 34 sample banks, for which the drift and volatility of the trading earnings were estimated from Credit Suisse Long/Short Equity Hedge Fund Index data for 2000 through the beginning of 2010. The estimate of 0.73% was obtained using drift and trading earnings volatility for an asset-weighted mean of sample banks.

[846] *See* Christina Bui and Talis Putnins, *The Intended and Unintended Effects of the Volcker Rule,* (Aug. 31, 2018) (working paper), *available at http://fmaconferences.org/SanDiego/Papers/Volcker_SubmissionFMA.pdf,* last accessed 4/23/2019.

[847] Acharya et al. (2017) finds that a bank's impact on systemic expected shortfall is affected by its marginal expected shortfall and leverage. *See* Viral Acharya et al., *Measuring Systemic Risk,* 30 Rev. Fin. Stud. 2 (2017).

[848] *See* Ran Duchin and Denis Sosyura, *Safer Ratios, Riskier Portfolios: Banks' Response to Government Aid,* 113 J. Fin. Econ. 1 (2014).

[849] For example, Sundaresan and Xiao (2019) show that the interaction of liquidity requirements of Basel III and the money market fund reform may have increased the reliance of private financial institutions on liquidity provided by Federal Home Loan Banks that enjoy an implicit government guarantee. The paper concludes that the rules increased the role of a government-sponsored enterprise in the aggregate liquidity transformation and the reliance of private institutions on public liquidity backstops. In another context, Baghai et al. (2019) finds that following the money market fund reforms, safer funds exited the industry, the remaining funds increased their portfolio risk, and issuers with lower credit risk experienced a reduced access to money market funding. *See* Suresh Sundaresan and Kairong Xiao, *Unintended Consequences of Post-Crisis Liquidity Regulation* (Aug. 9, 2019) (working paper) *last accessed* 8/29/2019. *See also* Ramin Baghai et al., *Liability Structure and Risk-Taking: Evidence from the Money Market Fund Industry,* (Aug. 18, 2019) (working paper) last accessed 8/29/2019.

Jackson Jr., ''Proposed Amendments to the Volcker Rule,'' Securities and Exchange Commission, June 5, 2018, available at *https://www.sec.gov/news/public-statement/jackson-statement-proposed-amendments-volcker-rule* on potential effects of pay practices on proprietary trading.

[851] *See, e.g.,* Jonathan Berk & Peter DeMarzo, Corporate Finance, 552–53 (3rd ed. 2014), discussing how leverage can (1) incentivize shareholders to shift from lower-risk to higher-risk assets (the ''asset substitution'' problem); and (2) induce shareholders to undertake negative net present value, but sufficiently risky projects (the ''over-investment'' problem). *See also* Michael Jensen and William Meckling, *Theory of the Firm: Managerial Behavior, Agency Costs and Ownership Structure,* 3 J. Fin. Econ. 305 (1976).

[852] *See, e.g.,* 79 FR at 5659.

significant conflicts of interest between banks and their customers.[853] One commenter also indicated that the agencies should amend the provisions concerning material conflicts of interest by permitting banking entities to rely on information barriers under certain circumstances.[854]

In response to these comments, the SEC reviewed relevant research on conflicts of interest between banking entities and their customers. As discussed below, related research generally examines trading of banking entities in stocks, bonds, or options of their advisory and underwriting clients. While the findings are somewhat mixed and limited to their specific empirical settings, this research is consistent with the presence of such conflicts in certain groups of merger and acquisition (M&A) deals. In addition, one study finds that a narrow type of conflicts of interest between banking entities and their clients may have decreased after the implementation of the 2013 rule.

Specifically, a recent study [855] examines both the presence of conflicts of interest between advisor banks and their customers based on banks' options holdings, and changes in such trading activity around the implementation of the Volcker Rule. The paper documents three main results. First, the paper finds that merger advisors tend to increase their holdings in call options relative to put options in merger targets during the quarter before the announcement. Second, merger advisors are significantly more likely to increase put option holdings in the acquirer firm.[856] In combination with the literature's general finding of average negative announcement returns in acquirer firms and positive announcement returns in target firms, the paper argues that these results are suggestive of informed trading by advisor banks on client firms. Third, within the subsample of affected deals (deals in which one or more advisor banks ceased proprietary trading operations around the enactment of section 13 of the BHC Act) after 2011, the paper finds that advisors did not increase their net call option holdings on target firms before merger announcements. The paper concludes that, in this narrow setting, the Volcker Rule may have decreased banks' options trading on client information.

Importantly, the paper finds that some of this bank activity was replaced by hedge fund activity: Specifically, hedge funds increased their informed trading in options of M&A client firms around the same time in the same subsample of deals.

The SEC is also aware of a broader body of research that empirically tests the existence and magnitude of conflicts of interest between banks and their customers in the context of advising and underwriting relationships and that does not directly empirically test the effects of section 13 of the BHC Act or the 2013 rule on the presence or magnitude of such conflicts. One article in the legal literature [857] empirically measures the profitability of trading by banks that have advisory clients and are subject to reporting requirements as temporary insiders. They document that such trading by banks in the stocks of advisory clients is profitable (with an estimated average 25% return on their trades), that the trading centers around adverse events, and that the elimination of Glass-Steagall restrictions in 2002 was associated with more frequent and more profitable trading. However, the paper does not empirically test the effects of section 13 of the BHC Act or of the 2013 rule.

Finance research on this type of conflict of interest between banks and their customers finds mixed effects. One of the earlier papers [858] examines trading in M&A target firms by the advisor banks of bidders and links advisor pre-announcement stakes in target firms with the probability of deal success and with the target premium. They document positive returns of this trading strategy and conclude that advisors acquire positions in deals of their advisory clients, as well as influence deal outcomes. Since such advisor behavior benefits the bidder, the authors recognize that they cannot rule out the alternative explanation that the bidder's board retains the advisor with strong incentives for deal completion. Outside of the M&A context, other work [859] explores the trading activity of IPO underwriters and finds that lead underwriter trades in IPO firms are associated with subsequent IPO abnormal returns.

Another study [860] focuses on bond trading and uses a sample covering 1994 through 2006 to examine the trading of bond dealers affiliated with M&A advisory banks with insurance companies. The study finds weak evidence that when affiliated dealers are one side of a bond transaction, they earn higher bond returns than unaffiliated dealers, and that affiliated dealers sell more of the bonds that may lose value ahead of bad news than unaffiliated dealers. The paper observes only a subset of such dealer trades with insurance companies and is unable to evaluate whether affiliated dealers are net buyers or sellers of affected bonds before bad news. The study concludes that there is weak and suggestive evidence that transfer of information within financial institutions is one of the potential information sources before public announcements.

Similarly, another paper [861] finds no evidence of information leakage because of investment bank M&A advisory, underwriting, or lending relationships from 1997 through 2002. Specifically, the paper finds no evidence that investment bank clients buy shares in takeover targets in advised deals. Similarly, bank clients with previous underwriter or lending relationships do not trade or earn abnormal returns before earnings announcements. The paper also examines market making imbalances and investment returns by connected brokerage houses and finds that they do not trade profitably ahead of earnings announcements by their IPO, SEO, M&A client, or borrower firms. The paper concludes that neither brokerage houses nor their clients trade on inside information available to the brokerage because of their market making or advising roles.

The SEC continues to note that the above studies are limited to their specific empirical settings and, as can be seen above, different empirical design, measurement, and identification approaches limit inference in each of the papers discussed above. Moreover, the SEC continues to note that the scope of this economic analysis is limited to SEC registrants, investors in securities markets, and the functioning of securities markets. While the research discussed above does not focus

specifically on banking entities that are SEC registrants, some of the incentive effects and conflicts of interest discussed above may extend to banking entities overseen by the SEC.

iii. Client-Oriented Services and Market Quality

In the 2013 rule, the agencies recognized that client-oriented financial services, such as underwriting and market making, are critical to capital formation and can facilitate the provision of market liquidity and that the ability to hedge is fundamental to prudent risk management as well as capital formation.[862]

In the proposal, the agencies stated that compliance with the conditions of the underwriting and market making exemptions under the 2013 rule, such as RENTD, creates ambiguity for some market participants, is over-reliant on historical demand, and necessitates an accurate calibration of RENTD for different asset classes, time periods, and market conditions.[863] Since forecasting future customer demand involves uncertainty, particularly in less liquid and more volatile instruments and products, banking entity affiliated dealers face uncertainty about the ability to rely on the underwriting and market making exemptions. This uncertainty can reduce a banking entity's willingness to engage in principal transactions[864] with customers, which, along with reducing profits, may reduce the volume of transactions intermediated by banking entities.[865]

Moreover, consistent with the views of some commenters,[866] the SEC believes that, as a baseline matter, the 2013 rule creates significant uncertainty among market participants regarding their ability to rely on the risk-mitigating hedging exemption. For example, there may be considerable uncertainty regarding whether a potential hedging activity will continue to demonstrably reduce or significantly mitigate an identifiable risk after it is implemented.[867] Unforeseeable changes in market conditions and other factors could reduce or eliminate the intended risk-mitigating effect of the hedging activity, making it difficult for a banking entity to comply with the continuous requirement that the hedging activity demonstrably reduce or significantly mitigate specific, identifiable risks.[868] According to commenters, uncertainty and compliance burdens related to the risk-mitigating hedging exemption are leading to less timely, less flexible, and less efficient hedging.[869]

The SEC continues to recognize that SEC-regulated entities routinely engage in both static and dynamic hedging at the portfolio (not the transaction) level and monitor and reevaluate on an ongoing basis aggregate portfolio risk exposures, rather than the risk exposure of individual transactions.[870] Dynamic hedging may be particularly common among dealers with large derivative portfolios, especially when the values of these portfolios are nonlinear functions of the prices of the underlying assets (*e.g.,* gamma hedging of options).[871] As a baseline matter, the SEC notes that the 2013 rule permits dynamic hedging. However, the 2013 rule requires the banking entity to document and support its decisions regarding individual hedging transactions, strategies, and techniques for ongoing activity in the same manner as for its initial activities, rather than permitting a banking entity to provide documentation for the hedging decisions regarding a portfolio as a whole.

The agencies have received a number of comments concerning the baseline effects of section 13 of the BHC Act and the 2013 rule on client facilitation activities, hedging, and market quality. The agencies received comments that the 2013 rule maintains the depth and liquidity of U.S. capital markets and that market liquidity remains within historical norms;[872] that there is no clear evidence that the 2013 rule has affected liquidity at a level that should cause concern;[873] and that liquidity may signal a bubble and should not be a key or even a major metric in assessing the effects of reforms.[874] Other commenters stated that the 2013 rule has imperiled valuable market making and risk-mitigating hedging and reduced market liquidity;[875] that the prescriptive nature of the 2013 rule has raised costs of providing liquidity, which has been passed along to investors and may have exacerbated dislocations,[876] and that less liquid capital markets have made it difficult for derivative end-users to raise capital in times of stress.[877]

The role of dealers in market making and client facilitation may be more significant in dealer markets, such as derivative and corporate bond markets. The SEC has elsewhere discussed several key changes in liquidity in bond markets and security-based swaps after the financial crisis. For example, the SEC found that, in corporate bond markets, although estimated average transaction costs have decreased, trading activity has become more concentrated in less complex bonds and bonds with large issue sizes; that transaction costs have increased for some subgroups of corporate bonds; and that dealers have, in aggregate, reduced their capital commitment since its 2007 peak, consistent with the claim that the Volcker Rule and other reforms potentially reduced the liquidity provision in corporate bonds.[878] The SEC recognizes difficulties in causal attribution of the various provisions of section 13 of the BHC Act and the 2013 rule and notes that some studies do not find significant structural breaks associated with post-crisis financial regulations in several measures of market liquidity.[879] However, the SEC continues to be informed by both comments discussed above and a body of research drawing causal inference concerning the adverse effects of section 13 of the BHC Act and the 2013 rule on dealer provision of liquidity and on the risk of market dislocations in times of stress.[880]

Importantly, the 2013 rule included a large number of requirements and provisions, and aspects of the 2013 rule most likely to affect banking entities' client facilitation activity (such as the RENTD requirement for the underwriting and market making exemptions) are not quantifiable or subject to public or regulatory reporting. As a result, existing research primarily seeks to document trends in various aspects of market liquidity in general and the effects of section 13 of the BHC

Act and the 2013 rule on dimensions of market liquidity in particular. However, the most likely channels for the below effects of section 13 of the BHC Act and the 2013 rule on client facilitation activities are the requirements for the exemptions (such as RENTD) and uncertainty around the ability to rely on exemptions for client facilitation activities.

As discussed below, several studies show significant declines in various measures of liquidity after the financial crisis and post-crisis reforms, including a recent study that ties the effects to the underwriting exemption of the 2013 rule. In addition, some research that reconciles the deterioration in dealer liquidity provision with improvements in price-based measures of liquidity attributes those effects to the reduced willingness of dealers to provide liquidity on a principal basis after implementation of the 2013 rule. Further, existing research suggests that the 2013 rule resulted in reduced liquidity during times of stress, with an increase in liquidity provision by dealers unaffiliated with banks failing to fully offset the reduction in liquidity provision by bank-affiliated dealers. Moreover, some research suggests that post-crisis financial reforms led to persistent deviations from no-arbitrage conditions across markets, with the effect driven by banking entities and levered nonbanking entities that rely on systemically important banking entities for funding liquidity. Finally, new evidence indicates that post-crisis financial regulations may also be having effects on the co-movement in liquidity metrics across markets. Though the research discussed below is unable to attribute observed trends to specific provisions of the 2013 rule, these findings are largely consistent with the claim that the 2013 rule had adverse effects on certain aspects of client facilitation activity by banking entities, as discussed below.

A number of studies documented declines in several dimensions of liquidity after the financial crisis and post-crisis reforms. For example, one study [881] finds that the willingness of dealers to commit capital overnight, turnover, the frequency of block trades, and average trade size have all declined after the financial crisis. Importantly, the paper finds that the shift away from market-makers absorbing customer imbalances and toward agency trading was most acute when banks were required to comply with the proprietary trading prohibition. Further, the paper finds that these declines in dealer provision of liquidity stem from bank-affiliated dealers. The paper concludes that post-crisis banking regulations, including the 2013 rule, contributed to the reductions in turnover, trade size, frequency of block trades, and the willingness of dealers to commit capital.

Another paper [882] examines the cost of immediacy in corporate bonds, using index exclusions as a setting in which uninformed traders exogenously demand immediacy. The paper finds that the cost of immediacy has more than doubled and that dealers revert back to target inventory far more quickly after the 2007–2008 financial crisis. The paper finds that this post-crisis dealer behavior is most severe for bank dealers and concludes that such changes are consistent with the effects of the Volcker Rule.

Research on changes in liquidity around the post-crisis reforms, including the 2013 rule, presents two seemingly contradictory results: On the one hand, price-based measures of liquidity (such as the bid-ask spread) have improved; on the other hand, measures of dealer liquidity supply have significantly worsened.[883] A few studies seek to reconcile these two effects. One paper [884] focuses on dealers' willingness to provide liquidity in certain types of bonds out of inventory. The paper finds that, when transacting in riskier and less liquid bonds, dealers are significantly more likely to offset trades on the same day instead of committing capital overnight. Specifically, the paper documents that dealers offset approximately 75% of trades in the lowest-rated, least-actively-traded bonds, but only 55% of trades in the highest-credit-quality, most-actively-traded bonds. In addition, liquidity provision out of inventory involves risk to the dealer—a risk that is priced in higher transaction costs. As a result, a decline in transaction costs in observed trades may be a reflection of the decline in dealers' willingness to take certain groups of bonds into inventory.

Another study [885] finds that, after the post-crisis banking regulations, including the 2013 rule, customer provision of liquidity has increased and, as a result, the paper posits that bid-ask spread measures will necessarily underestimate the cost of dealer liquidity provision. The paper estimates that, for a subset of large liquidity demanding customer trades in which dealers provide liquidity from their inventory, customers pay between 35% and 65% higher spreads after the crisis than before the crisis.[886] The paper concludes that a large portion of liquidity provision has moved from dealers to large asset managers and that the effect is consistent with the effects of tighter banking regulations.

A recent paper [887] focuses on the effects of the underwriting exemption of the 2013 rule on trading by affected dealers. Specifically, the paper examines changes in the trading and liquidity of newly issued bonds that affected dealers have underwritten relative to bonds that the dealers have not underwritten around the implementation and conformance of the 2013 rule. This empirical design accounts for potentially confounding dealer effects (as dealers trade in bonds that they both underwrite and bonds that they do not) and bond effects (as both underwriters and non-underwriters trade in a given bond), and isolates the effects of the underwriting exemption in the 2013 rule from the effects of other bank regulations during the implementation period of the 2013 rule. The paper estimates that dealer markups have increased by between 42 and 43 basis points for fast roundtrip trades (15 minutes or less) after April 2014, but finds that the effect is transitional and disappears after August of 2015. However, the paper estimates that the adverse effects on dealer markups for slower roundtrip trades of between 15 minutes and 1 day—trades that involve dealers absorbing trades into inventory—are both economically significant and persist past the

[886] In contrast, Bessembinder et al. (2016) focuses on dealer-to-customer principal trades and finds the average transaction cost, particularly for small trades (less than $100,000) and large trades (over $1,000,000), is lowest in the pre-crisis and regulation periods. As the SEC stated elsewhere, the difference between these two results may stem from different proxies for transaction costs and the measurement of principal trading activity.

[887] *See* Meraj Allahrakha et al., *The Effects of the Volcker Rule on Corporate Bond Trading: Evidence from the Underwriting Exemption* (Off. of Fin. Research Working Paper 19–02, 2019) *available at https://www.financialresearch.gov/working-papers/files/OFRwp-19-02_the-effects-of-the-volcker-rule-on-corporate-bond-trading.pdf,* last accessed 8/9/2019.

implementation period (a range of 27–43 bps increase between April 2014 and July 2015, and a range of 18–35 basis point effect after July 2015).[888] To rule out the selection explanation (that dealers post-2013 rule simply pre-arrange more trades so the non-prearranged trades become costlier), the paper tests changes in short-term, non-inventory trades. The paper finds an increase in such trades around the effective date of the 2013 rule, but no differences when conditioning on dealer underwriting activity, and concludes that endogenous selection of time in inventory cannot explain the above results. Moreover, the paper finds that nonbanking dealers enjoy a significant increase in market share after the conformance period, while bank-affiliated dealers lose market share. Finally, the paper concludes that the 2013 rule increased dealer trading risk on short round-trip trades (15 minutes or less), estimating that the standard deviation of covered dealers' markups on corporate bonds has risen by between 0.09 and 0.1.

These results are subject to three primary caveats. First, the paper relies on a relatively narrow measure of risk (the standard deviation of dealer profits at the bond-month level). Unlike other research discussed in this section, the paper does not examine changes in the overall volume of trading activity, measures of downside risk at the individual banking entity level, or commonality of risk exposures among affected and unaffected dealers. Second, some of the paper's tests are affected by small sample sizes, limiting inference related to transitional and permanent effects of the 2013 rule in certain trades (including the 15 minute–1 day subsample and the 60–90 day subsample). Third, the paper recognizes that these results are specific to dealer provision of liquidity in the corporate bond market, and may not extend to trading by affected firms in other asset classes.

Other research helps inform the SEC's understanding of the effects of section 13 of the BHC Act and the 2013 rule on liquidity in times of stress. Specifically, there is growing evidence that liquidity provision in times of stress may be adversely affected by post-crisis reforms in general and the Volcker Rule in particular. Two studies directly test the effects of the Volcker Rule on market making by dealers in times of stress. One of the papers[889] examines liquidity during corporate bond downgrades that result in selling by certain institutions. The paper suggests that dealers affected by the Volcker Rule decreased market making in newly downgraded bonds, and that unaffected dealers have not fully offset this decline. Moreover, the paper rules out the alternative explanation that these changes are attributable to other financial reforms, finding that the same effects are present for dealers affected by the Volcker Rule but not constrained by Basel III and Comprehensive Capital Analysis and Review (CCAR) regulations. The paper isolates the effect in a relatively small sample of bonds experiencing relatively large stress events (under normal aggregate conditions). This methodological design reflects the common tradeoff between a narrower empirical setting that enables causal inference, and a larger sample that is less amenable to causal interpretations.[890]

A related study[891] compares liquidity during times of stress before and after the crisis, and defines times of stress on the basis of extreme increases in market-wide volatility (measured by the VIX index), bond yield drops, and credit rating downgrades from investment grade to speculative grade. While the study does not find that price-based liquidity measures decreased around idiosyncratic shocks, the study does find that the price impact of large trades surrounding market-wide shocks has increased after the post-crisis financial reforms relative to the pre-crisis period.[892]

A recent report by the International Organization of Securities Commissions (IOSCO)'s Committee on Emerging Risks examined changes in bond market liquidity focusing on stressed conditions.[893] The report notes that the most significant effect of post-crisis financial reforms and reduction in dealer risk appetite is the decline in the capacity of dealers to intermediate transactions on a principal basis, combined with a drastic increase in the size of the market. The report concludes that such effects mean the lack of liquidity in times of stress is likely to be more acute than in past episodes of stressed conditions.

One of the important results identified in this literature is the finding that nonbank dealers may step in but may not fully offset the decline in the liquidity provision of bank dealers caused by section 13 of the BHC Act and the 2013 rule.[894] New research suggests that the fundamental mechanism behind this result may be the effect of other post-crisis regulations on the ability of bank dealers to provide funding liquidity to nonbank intermediaries.[895] Specifically, the paper examines the interplay between post-crisis bank regulations, including the Volcker Rule, the supplementary leverage ratio, the liquidity coverage ratio, and the net stable funding ratio, and their effects on the ability of nonbank intermediaries to arbitrage away mispricing. The paper finds that the profitability of classic arbitrage trades (on-the-run/off-the-run, Treasury-interest swap, CDS-bond basis, and single name-index CDS arbitrage trades) is significantly lower under the supplementary leverage ratio, liquidity coverage ratio, and net stable funding ratio components of Basel III compared with Basel II. In addition, using a differences-in-differences estimation, the paper finds that levered hedge funds relying on prime brokers that are identified in the paper as globally systemically important banks experience lower abnormal returns and a decline in assets under management. The paper concludes that the effects of post-crisis regulations affect not only bank intermediation but also the ability of private funds to rely on banks for funding liquidity supporting arbitrage strategies. The paper notes that the supplementary leverage ratio and the net stable funding ratio disincentivize

[888] The paper also finds an increase of between 8% and 14% in dealer markups on trades around the 60-day cutoff for the rebuttable presumption in the 2013 rule. The paper acknowledges that this result could be consistent with dealers conducting profitable proprietary trades and holding positions past the 60-day rebuttable presumption window but is cautious in interpreting the result given the methodological limitations of its empirical design and very small sample size that does not allow conclusive inference.

[889] *See* Jack Bao et al., *The Volcker Rule and Corporate Bond Market Making in Times of Stress,* 130 J. Fin. Econ. 95 (2018).

[890] For a fulsome discussion of this and other issues and limitations, *see* SEC Report 2017, *supra* note 774, at 109–11.

[891] *See* Mike Anderson & René Stulz, *Is Post-Crisis Bond Liquidity Lower?* (Dice Ctr. Working Paper 2017–09, 2017) *last accessed 6/3/2019.*

[892] Consistent with these results, Goldstein and Hotchkiss (2019) finds that on days with large VIX increases, dealers tend to offset trades more quickly even for highly rated bonds that they normally would take into inventory. For a more detailed discussion, *see* SEC Report 2017, *supra* note 774, at 114–15.

[893] *See* OICU–IOSCO, 2019, Liquidity in Corporate Bond Markets Under Stressed Conditions, FR079/2019, May. Available at *https://www.iosco.org/library/pubdocs/pdf/IOSCOPD634.pdf,* last accessed 7/1/2019.

[894] As discussed above, when examining informed trading of advisor banks in options on the stocks of client firms, Lowry et al. (2018) finds that informed trading by hedge funds increases simultaneously with a decrease in informed trading by banks around the enactment of section 13 of the BHC Act. *See* Michelle Lowry et al., *Informed Trading By Advisor Banks: Evidence from Options Holdings,* 32 Rev. Fin. Stud 605 (2018).

[895] *See* Boyarchenko, Eisenbach, Gupta, Shachar, and Van Tassel, 2018, ''Bank Intermediated Arbitrage,'' Federal Reserve Bank of New York Staff Report No. 858, last accessed 6/3/2019.

low margin activities and a reliance on short-term funding, such as repo, and that the liquidity coverage ratio incentivizes holdings of more liquid securities. The paper concludes that Basel III is the regulation with the biggest effect on the profitability of trades exploiting arbitrage opportunities.[896]

Post-crisis regulations may also be having effects on the co-movement [897] in liquidity metrics across markets. A recent paper [898] exploring this issue posits two channels for this increased co-movement in liquidity. First, liquidity supply is capital intensive, and absorbing trades into inventory in one risky asset class may use up the capital capacity of a dealer to provide liquidity in other assets. Basel III and liquidity requirements for banks may aggravate this effect. Second, bank dealers may face uncertainty about their ability to rely on the market making exemption in the 2013 rule, as the distinctions between prohibited proprietary trading and permissible market making may often be unclear. As discussed above, prior studies suggest that the 2013 rule may have reduced the inventory capacity of bank dealers. Empirically, the paper documents that co-movement among measures of illiquidity of stock, bond, and CDS markets has risen significantly after the 2007–2008 financial crisis, particularly during the regulatory implementation period. For example, the regulatory period is characterized by a much larger fraction of firms exhibiting positive pairwise correlations between measures of illiquidity. The paper concludes that the 2013 rule and the tightening of capital and liquidity regulations reduced the inventory capacity of market makers, resulting in higher co-movement in liquidity across various financial markets. Importantly, the paper argues that these results are not consistent with increased electronic trading as that would have resulted in a reduced reliance on market makers and an increased reliance on customers, which should have reduced (instead of increased) co-movement in liquidity across markets.

With respect to liquidity in the dealer-centric, single-name CDS market, the SEC elsewhere found that, while dealer-customer activity and various trading activity metrics have generally remained stable, interdealer trading, trade sizes, number of quotes, and quoted spreads for certain illiquid borrowers have worsened since 2010.[899] In addition, a recent paper [900] seeks to tie financial reforms to trends in liquidity in the single-name CDS markets. Specifically, the paper finds that the sample period (2010 through 2016) saw a decline in interdealer trading, a decrease in net dealer inventories, and a decline in customer transaction volume. In addition, bid-ask spreads in later years are more heavily dependent on individual dealer inventories rather than aggregate inventories of all dealers. Notably, the paper does not estimate the optimal volume of trading activity. Overall, the paper concludes that increased costs of market making have affected liquidity provision in the single-name CDS market.

While these studies are necessarily limited in scope, methodology, and measurement, their results may indicate that section 13 of the BHC Act and the 2013 rule may have reduced dealer provision of liquidity, particularly in times of stress.[901] There is little empirical evidence concerning whether customers will continue to provide liquidity in times of severe market stress, possibly since such empirical settings are scarce in the post-crisis period. One recent paper builds a theoretical model [902] that suggests that constraints on dealer balance sheets may benefit customers and reduce transaction costs as they can induce dealers to invest in technology designed to match customers to each other. However, this model does not explicitly examine dealer behavior in times of stress. In addition, the results rely on strong modeling assumptions. The model assumes that only bank dealers are able to develop technology to match customers and assumes away the role of an inter-dealer market or competition among dealers in the interdealer market. If these assumptions are violated, it is unclear whether the results will continue to hold. For example, if nonbank dealers (as well as bank dealers) can develop customer matching technology, constraining dealer balance sheets may not be necessary for the development of technology matching customers to other customers or the disintermediation of trading, with its resulting welfare improvements. Similarly, in the presence of an interdealer market, constraining dealer balance sheets may benefit customers by facilitating customer-to-customer trading but may also reduce the ability of dealers to demand liquidity from other dealers.

Moreover, as discussed above, existing research suggests that non-dealer institutions may be constrained in their ability to secure funding from prime brokers that are affected by post-crisis regulations, limiting the ability of non-dealers to arbitrage away mispricings. It is even less clear whether customers would be willing and able to secure funding liquidity and stand on the buy side of customer sells during severe market stress across asset markets.

Finally, the agencies also received comment that end-users are increasingly finding that their bank counterparties have reduced short-term lending and repo activity, while other end-users are experiencing higher discounts to posted collateral as a result of the 2013 rule.[903] The SEC is informed by research on the effects of the constraints dealers face as a result of post-crisis regulations and liquidity provision.[904] One particular study on this issue [905] finds that dealer balance sheet constraints have broad market-wide effects on bond liquidity beyond the liquidity of bonds with a particular credit rating, sector, or issue size. The paper finds that, prior to the crisis, bonds were more liquid when they were traded by more levered dealers, dealers with higher return on assets and lower vulnerability

[896] These findings are also consistent with another paper that finds an exogenous increase in the leverage ratio constraint in the UK to have reduced repo market liquidity—an effect especially pronounced in transactions between dealers and small customers. *See* Antonis Kotidis and Neeltje Horen, *Repo Market Functioning: The Role of Capital Regulation* (2018) (working paper) last accessed June 3, 2019.

[897] Co-movement in two variables generally refers to a positive correlation of changes in the two variables over time. For example, co-movement in returns refers to a pattern of positive correlation in returns among different securities or asset classes. Similarly, co-movement in liquidity metrics suggests a positive correlation of changes in liquidity metrics. *See, e.g.,* Nicholas Barberis et al., *Co-movement,* 75 J. Fin. Econ. 283 (2005).

(measured by conditional value-at-risk),[906] dealers with lower risk-weighted assets, and dealers with relatively low reliance on repo. However, during the rule implementation period (post-2014) these results have reversed, and bonds are more liquid when they are traded by less-levered dealers, dealers with lower return on assets, dealers with higher risk-weighted assets, and dealers with more reliance on repo funding. Finally, unlike the pre-crisis period, during the rule implementation period (post-2014), dealers with more reliance on repo funding, with higher trading revenues, with larger maturity mismatches, with higher measures of vulnerability, and with fewer assets held as loans are less likely to accommodate customer order flow and are more likely to access the interdealer market instead. Though these results do not speak to dealer behavior in times of stress, they are based on a substantially larger sample compared with the discussed above work showing liquidity declines in times of stress. Overall, while the paper does not delineate the effects of the Volcker Rule from other post-crisis regulations (such as the supplemental leverage ratio), the paper's findings indicate that tightening of dealer balance sheet constraints due to the package of post-crisis financial regulations may adversely affect the ability of affected dealers to intermediate customer trading in bond markets.

The SEC also recognizes that the effects of the 2013 rule on the ability and willingness of banks to engage in repo activity may be compounded by other post-crisis reforms. For example, one study [907] focuses on the effects of the liquidity coverage ratio, exploiting cross-country differences in the implementation of the rule. The paper finds that, as a result of the liquidity coverage ratio, U.S. dealers reduced their reliance on repo in funding high-quality liquid assets by more, and increased the maturity of lower-quality-collateral repos by more, than did foreign dealers.

Importantly, reduced ability and willingness to engage in repo activity are likely to have downstream effects on customers and market quality. For example, a paper [908] recently showed that dealers' ability to rely on repos to finance bond inventory has an effect on bid-ask spreads and bond transaction costs; that dealers with less access to funding liquidity are less likely to provide liquidity on a principal basis and are more likely to trade on an agency basis instead; and that funding liquidity has causal effects on bond market liquidity.

As discussed above, corporate bond dealers, particularly bank-affiliated dealers, may have, on aggregate, reduced their capital commitment post-crisis—a result that is consistent with a reduction in liquidity provision in corporate bonds because of the 2013 rule. In addition, the 2013 rule may have resulted in many corporate bond dealers shifting from trading in a principal capacity to agency trading. Moreover, corporate bond dealers may decrease liquidity provision during certain times of stress in general (*e.g.,* during a financial crisis) [909] and after the 2013 rule in particular, as discussed above. Nonbank dealers and non-dealer intermediaries may not have fully offset the shortfall in liquidity provision, partly because of their reliance on funding from financial institutions affected by post-crisis financial reforms.

The SEC recognizes that the effects of the 2013 rule on the activities of banking entities and conflicts of interest may flow through to SEC-registered dealers and investment advisers affiliated with banks and bank holding companies directly (if banks and holding companies transact through their dealer affiliates) and indirectly (*e.g.,* through effects on capital requirements, profitability, compliance systems, and policies and procedures), and may have an effect on securities markets. As discussed in the proposal,[910] the presence and magnitude of spillover effects across different types of financial institutions vary over time and may be more significant in times of stress.[911]

iv. Compliance Burdens, Profitability, and Competitive Effects

In the proposal, the SEC recognized that the scope and breadth of the compliance obligations impose costs on banking entities, which may be particularly important for smaller entities.[912] The SEC noted commenters' estimates that banking entities may have added as many as 2,500 pages of policies, procedures, mandates, and controls per institution for the purposes of compliance with the 2013 rule, which need to be monitored and updated on an ongoing basis, and that some banking entities may spend, on average, more than 10,000 hours on training each year. In terms of ongoing costs, in the proposal the SEC noted a market participant's estimate that some banking entities may have 15 regularly meeting committees and forums, with as many as 50 participants per institution dedicated to compliance with the 2013 rule.

In connection with the proposal, the agencies have received a number of comments on the compliance burdens of the 2013 rule. Some commenters presented trends in bank profitability, trading revenue, and loan growth, arguing that the proposed amendments are unnecessary.[913] Others indicated that the Volcker Rule may reduce bank profits due to the elimination of proprietary trading but that lost profits are not costs but intended regulatory effects of section 13 of the BHC Act.[914]

[913] *See, e.g.,* Volcker Alliance and AFR.

[914] *See, e.g.,* Occupy the SEC.

In response to those comments, the SEC continues to note that the scope of this economic analysis is limited to SEC registrants, and securities markets and their participants. Importantly, trends in profitability are not informative of the direct causal effect on profitability or compliance burdens of section 13 of the BHC Act or of the 2013 rule, since there is no data about the amount of revenue or compliance burdens that would have occurred in the absence of the 2013 rule. Moreover, the agencies have received a number of comments pointing to large and significant burdens of section 13 of the BHC Act and various components of the agencies' 2013 rule. For example, one commenter estimated that proprietary trading requirements related to RENTD involved annual costs of as much as about $513 million; that the metrics-related policies and procedures requirements involved initial burdens of approximately $41.5 million; that total compliance expenditures of affected entities (including with respect to covered funds) totaled between $402 million and $541 million; and that covered funds requirements involved a cost of between $152 million and $690 million.[915] Another commenter estimated that, for at least one banking entity, sorting counterparties into customers and non-customers for the purposes of calculating RENTD requires dozens of employees spending thousands of hours in initial and ongoing burdens.[916] Another commenter stated that simplifying covered funds requirements would eliminate thousands of unnecessary hours in compliance burdens related to activities that do not raise the concerns intended to be addressed by section 13 of the BHC Act.[917] One trade organization indicated that duplicative examinations drastically increase burdens on registrants, estimating that in 2016 members of the organization spent in aggregate over 50,000 hours responding to inquiries and examinations related to section 13 of the BHC Act.[918]

Moreover, the SEC notes that risk-averse market participants are compensated for bearing greater systematic [919] risks with higher expected returns.[920] If capital markets have a high degree of efficiency and arbitrage opportunities are generally scarce, greater profitability may simply be indicative of greater risks taken on by banking entities. Setting aside the challenges of causal inference discussed above, trends in bank profitability may reflect not only compliance burdens of the 2013 rule, but also the effects of the 2013 rule on banking entity risk exposures from permissible activities. That is, banking entities may have become more willing to take risk through engaging in activities permitted by the 2013 rule. For more discussion of the existing evidence on the effects of the 2013 rule on the activities of banking entities, see the preceding sections of the economic baseline.

The agencies also received a number of comments concerning the need to tailor regulations to banking entities on the basis of risk profile in order to balance the intended regulatory goals with compliance burdens and competitive effects. Specifically, a number of commenters supported tailoring the 2013 rule to more effectively accomplish the underlying goals of section 13 of the BHC Act, reduce unnecessary compliance burdens, particularly on smaller and mid-sized banking entities and entities with small trading books, and more effectively allocate supervisory resources to prudential goals.[921]

The SEC continues to believe that the compliance regime under the 2013 rule and related burdens reduce the profitability of permissible activities by bank-affiliated dealers and investment advisers and may be passed along to customers or clients in the form of reduced provision of services or higher service costs.[922] Moreover, the SEC continues to believe that the extensive compliance program under the 2013 rule detracts resources of some banking entities and their compliance departments and supervisors from other compliance matters, risk management, and supervision. Finally, the SEC continues to believe that prescriptive compliance requirements may not optimally reflect the organizational structures, governance mechanisms, or risk management practices of complex, innovative, and global banking entities.

In the sections that follow the SEC discusses rule provisions of the 2013 rule, how each amendment in the final rule changes the economic effects of the regulatory requirements, and the anticipated costs and benefits of the amendments.

c. Affected Participants

The SEC-regulated entities directly affected by the final rule include broker-dealers, security-based swap dealers, and investment advisers.

i. Broker-Dealers [923]

Under the 2013 rule, some of the largest SEC-regulated broker-dealers are banking entities because they are affiliated with banks or bank holding companies. Table 1 reports the number, total assets, and holdings of broker-dealers by the broker-dealer's bank affiliation.

[915] *See* Data Boiler, citing its own analysis as well as SIA Partners Briefing Note, July 2015, ''Volcker Implementation,'' available at *http://en.finance.sia-partners.com/sites/default/files/post/sia_partners_-_briefing_note_volcker_coveredfunds_blog_version.pdf,* last accessed 6/4/2019.

[916] *See* CCMC.

[917] *See* SFIG.

[918] *See* SIFMA.

[919] The term ''systematic risk'' generally refers to the variability of returns due to macroeconomic factors that affect all risky assets and, thus, cannot be eliminated by diversification. *See* Frank Reilly & Keith Brown, Investment Analysis & Portfolio Management, 1025 (9th ed. 2009). *See also* Bodie, *supra* note 840, at G–12.

[920] *See supra* note 840.

[921] *See, e.g.,* IIB; CCMC; CREFC; CCMR; Covington; Capital One et al. and Credit Suisse.

[922] *See* 83 FR at 33550.

[923] These estimates differ from the estimates in the proposal and in the EGRRCPA Conforming Amendments Adopting Release, as these estimates rely on more recent data and information about both U.S. and global trading assets and liabilities of bank holding companies. This analysis is based on data from Reporting Form FR Y–9C for domestic holding companies on a consolidated basis and Report of Condition and Income for banks regulated by the Board, FDIC, and OCC for the most recent available four-quarter average, as well as data from S&P Market Intelligence LLC on the estimated amount of global trading activity of U.S. and non-U.S. bank holding companies. Broker-dealer bank affiliations were obtained from the Federal Financial Institutions Examination Council's (FFIEC) National Information Center (NIC). Broker-dealer assets and holdings were obtained from FOCUS Report data for Q4 2018.

While the 199 bank-affiliated broker-dealers subject to the 2013 rule (affected broker-dealers) are greatly outnumbered by the 3,595 broker-dealers that are either bank broker-dealers exempt under section 203 of EGRRCPA or nonbank broker-dealers, the affected broker-dealers dominate other broker-dealers in terms of total assets (72.7% of total broker-dealer assets) and aggregate holdings (66.5% of total broker-dealer holdings).

TABLE 1—BROKER-DEALER COUNT, ASSETS, AND HOLDINGS BY AFFILIATION

Broker-dealer bank affiliation	Number	Total assets, $mln [924]	Holdings, $mln [925]	Holdings (altern.), $mln [926]
Bank broker-dealers affected by the final rule [927]	199	3,142,780	761,532	567,387
All other broker-dealers [928]	3,595	1,179,805	382,451	225,675
Total	3,794	4,322,586	1,143,983	793,062

Some of the amendments to the 2013 rule that the agencies are adopting differentiate banking entities on the basis of their consolidated trading assets and liabilities.[929] Table 2 reports affected broker-dealer counts, assets, and holdings by consolidated trading assets and liabilities of the (top-level) parent firm. The SEC estimates that 163 broker-dealer affiliates of firms with less than $20 billion in consolidated trading assets and liabilities account for 20.4% of bank-affiliated broker-dealer assets and 17.8% of holdings (or 7% using the alternative measure of holdings).[930]

TABLE 2—BROKER-DEALER COUNTS, ASSETS, AND HOLDINGS BY CONSOLIDATED TRADING ASSETS AND LIABILITIES OF THE BANKING ENTITY [931]

Consolidated trading assets and liabilities [932]	Number	Total assets, $mln	Percent	Holdings, $mln	Percent	Holdings (altern.), $mln	Percent
≥50bln	28	2,152,225	68	555,787	73	510,325	90
20bln–50bln	8	349,716	11	70,054	9	17,611	3
10bln–20bln	9	198,895	6	49,797	7	13,301	2
5bln–10bln	24	261,622	8	55,316	7	14,295	3
1bln–5bln	33	66,583	2	18,319	2	4,998	1
≤1bln	97	113,740	4	12,259	2	6,857	1
Total	199	3,142,780	100	761,532	100	567,387	100

ii. Security-Based Swap Dealers

The final rule may also affect bank-affiliated SBSDs. As compliance with SBSD registration requirements is not yet required, there are currently no registered SBSDs. However, the SEC has previously estimated that as many as 50 entities may potentially register as security-based swap dealers and that as many as 16 of these entities may already be SEC-registered broker-dealers.[933] Similarly, the SEC previously estimated that between 0 and 5 entities may register as Major Security-Based Swap Participants (MSBSPs).[934] On the basis of the analysis of TIW transaction and positions data on single-name credit-default swaps, the SEC believes that all entities that may register with the SEC as SBSDs are bank-affiliated firms, including those that are SEC-registered broker-dealers. Therefore, the SEC estimates that, in addition to the bank-affiliated SBSDs that are already registered as broker-dealers and included in the discussion above, as many as 34 other bank-affiliated SBSDs may be affected by these amendments. Similarly, on the basis of the analysis of TIW data, the SEC estimates that none of the entities that may register with the SEC as MSBSPs are affected by the final rule.

Importantly, compliance with capital and other substantive requirements for SBSDs under Title VII of the Dodd-Frank Act is not yet required.[935] The SEC recognizes that firms may choose to move security-based swap trading activity into (or out of) an affiliated bank or an affiliated broker-dealer instead of registering as a standalone SBSD, if bank or broker-dealer capital and other regulatory requirements are less (or more) costly than those that may be imposed on SBSDs under Title VII. As a result, the above figures may

[924] Broker-dealer total assets are based on FOCUS report data for ''Total Assets.''

[925] Broker-dealer holdings are based on FOCUS report data for securities and spot commodities owned at market value, including bankers' acceptances, certificates of deposit and commercial paper, state and municipal government obligations, corporate obligations, stocks and warrants, options, arbitrage, other securities, U.S. and Canadian government obligations, and spot commodities.

[926] This alternative measure excludes U.S. and Canadian government obligations and spot commodities.

[927] This category includes all bank-affiliated broker-dealers except those exempted by section 203 of EGRRCPA.

[928] This category includes both bank affiliated broker-dealers subject to section 203 of EGRRCPA and broker-dealers that are not affiliated with banks or holding companies.

[929] *See, e.g.,* 2013 rule § ____.20(d)(1).

[930] *See supra* note 926.

[931] This analysis excludes SEC-registered broker-dealers subject to section 203 of EGRRCPA.

[932] Consolidated trading assets and liabilities are estimated using information reported in form FR Y–9C data and from S&P Market Intelligence LLC on the estimated amount of global trading activity provided for U.S. and non-U.S. firms. These estimates exclude from the definition of consolidated trading assets and liabilities government, agency, and GSE securities. U.S. trading assets and liabilities are calculated on the basis of the most recent four-quarter average, except for foreign firms without an intermediate holding company, for which the amount of trading activity for the nonbank and edge subsidiaries does not exclude securities of government-sponsored enterprises. For top-tier bank holding companies, top-tier independent depositary institutions, and foreign parents with U.S. activity, Ginnie Mae securities are included in the calculation of trading assets and liabilities because of data limitations. (It is not possible to exclude Ginnie Mae securities without also excluding Fannie Mae and Freddie Mac securities.)

[933] *See* Capital, Margin, Segregation Adopting Release, 84 FR at 43960.

[934] *Id.*

[935] *Id.*

overestimate or underestimate the number of SBSDs that are not broker-dealers and that may become SEC-registered entities affected by the final rule. Quantitative cost estimates are provided separately for affected broker-dealers and potential SBSDs.

iii. Private Funds and Private Fund Advisers [936]

This section focuses on RIAs advising private funds. Using Form ADV data, Table 3 reports the number of RIAs advising private funds by fund types, as those types are defined in Form ADV. Table 4 reports the number and gross assets of private funds advised by RIAs and separately reports these statistics for bank-affiliated RIAs. As can be seen from Table 3, the two largest categories of private funds advised by RIAs are hedge funds and private equity funds.

Bank-affiliated RIAs advise a total of 4,316 private funds with approximately $2 trillion in gross assets. Per Form ADV data, bank-affiliated RIAs' gross private fund assets under management are concentrated in hedge funds and private equity funds. On the basis of this data, bank-affiliated RIAs advise 929 hedge funds with approximately $668 billion in gross assets and 1,420 private equity funds with approximately $395 billion in assets. While bank-affiliated RIAs are subject to all of section 13's restrictions, because RIAs do not typically engage in proprietary trading, the SEC continues to believe that they will not be affected by the final rule as it relates to proprietary trading.

TABLE 3—SEC-REGISTERED INVESTMENT ADVISERS ADVISING PRIVATE FUNDS, BY FUND TYPE [937]

Fund type	All RIA	Bank-affiliated RIA
Hedge Funds	2,656	154
Private Equity Funds	1,644	98
Real Estate Funds	526	52
Securitized Asset Funds	220	45
Liquidity Funds	46	16
Venture Capital Funds	193	8
Other Private Funds	1,066	146
Total Private Fund Advisers	4,756	296

TABLE 4—THE NUMBER AND GROSS ASSETS OF PRIVATE FUNDS ADVISED BY SEC-REGISTERED INVESTMENT ADVISERS [938]

Fund type	Number of private funds		Gross assets, $bln	
	All RIA	Bank-affiliated RIA	All RIA	Bank-affiliated RIA
Hedge Funds	10,431	929	7,160	668
Private Equity Funds	14,775	1,420	3,446	395
Real Estate Funds	3,472	320	646	100
Securitized Asset Funds	1,814	358	661	129
Liquidity Funds	83	30	297	195
Venture Capital Funds	1,201	43	136	3
Other Private Funds	4,460	1,217	1,396	474
Total Private Funds	36,230	4,316	13,741	1,964

In addition, for an additional period of 2 years until July 21, 2021, the banking agencies will not treat qualifying foreign excluded funds that meet the conditions included in the policy statement discussed above as banking entities or attribute their activities and investments to the banking entity that sponsors the fund or otherwise may control the fund under the circumstances set forth in the policy statement.[939]

iv. Registered Investment Companies

The potential that a registered investment company (RIC) or a business development company (BDC) would be treated as a banking entity where the fund's sponsor is a banking entity and holds 25% or more of the RIC or BDC's voting securities after a seeding period also forms part of the baseline. On the basis of Commission filings and public data, the SEC estimates that, as of year-end 2018, there were approximately

[936] These estimates are calculated from Form ADV data as of March 31, 2019. An investment adviser is defined as a ''private fund adviser'' if it indicates that it is an adviser to any private fund on Form ADV Item 7.B. An investment adviser is defined as a ''bank-affiliated RIA'' if it indicates on Form ADV Item 6.A.(7) that it is actively engaged in business as a bank, or it indicates on Form ADV Item 7.A.(8) that it has a ''related person'' that is a banking or thrift institution. For purposes of Form ADV, a ''related person'' is any advisory affiliate and any person that is under common control with the adviser. The definition of ''control'' for purposes of Form ADV, which is used in identifying related persons on the form, differs from the definition of ''control'' under the BHC Act. In addition, this analysis does not exclude SEC-registered investment advisers affiliated with banks that have consolidated total assets less than or equal to $10 billion and trading assets and liabilities less than or equal to 5% of total assets. Thus, these figures may overestimate or underestimate the number of bank-affiliated RIAs.

[937] This table includes only the advisers that list private funds on Section 7.B.(1) of Form ADV. The number of advisers in the ''Any Private Fund'' row is not the sum of the rows that follow, since an adviser may advise multiple types of private funds. Each listed private fund type (*e.g.,* real estate fund, liquidity fund) is defined in Form ADV, and those definitions are the same for purposes of the SEC's Form PF.

[938] Gross assets include uncalled capital commitments on Form ADV.

[939] *See* ''Statement regarding Treatment of Certain Foreign Funds under the Rules Implementing Section 13 of the Bank Holding Company Act,'' July 19, 2019, available at *https://www.occ.gov/news-issuances/news-releases/2019/nr-ia-2019-79a.pdf,* last accessed July 19, 2019.

15,700 RICs [940] and 104 BDCs. Although RICs and BDCs are generally not banking entities themselves subject to the 2013 rule, they may be indirectly affected by the 2013 rule and the final rule, for example, if their sponsors or advisers are banking entities. For instance, bank-affiliated RIAs or their affiliates may reduce their level of investment in the funds they advise, or potentially close those funds, to avoid those funds becoming banking entities themselves.

v. Entities Reporting Metrics to the SEC [941]

The regulatory reporting requirements of the 2013 rule with respect to bank-affiliated broker-dealers, SBSDs, and RIAs are described in section V.F.2.a above. As discussed below, the final rule increases the threshold for entities subject to metrics reporting from the $10 billion under the 2013 rule to $20 billion in trading assets and liabilities. Moreover, the final amendments that link the trading desk definition to the market risk capital rule have an effect on the volume of reporting to the SEC and corresponding burdens.

The agencies have received a number of comments opposing the proposed amendments to metrics reporting and challenging the agencies' assessment of the proposed amendments.[942] For example, one commenter indicated that the SEC's assessment of the overall streamlining effects of the amendments to metrics reporting and recordkeeping will not be supported by a full-fledged cost-benefit analysis.[943] Another commenter stated that the proposal presented no analysis showing that the benefits of eliminating some metrics outweigh the costs of imposing new metrics.[944] A number of commenters indicated that the agencies should not adopt any of the proposed amendments to metrics reporting as they would result in a significant net increase in metrics data.[945] One commenter estimated that the proposed requirements would require its member institutions to report hundreds of thousands of additional data points each month.[946] One commenter indicated that the extended reporting timeframe for metrics submission is insufficient and frequent resubmissions are likely to persist.[947] In response to these comments and to enable a quantification of the economic effects of the metrics amendments on the volume and timeliness of metrics reporting, the SEC is updating the economic baseline with summary information about the current volume and resubmission statistics by different groups of Appendix A filers.

TABLE 5—VOLUME OF METRICS RECORDS SUBMITTED TO THE SEC, BY TRADING ASSETS AND LIABILITIES [948]

Trading assets & liabilities	Number of reporters	Records submitted
>50bln	8	40,771,825
20bln–50bln	4	7,357,794
<20bln	6	10,440,677
Total	18	58,570,296

TABLE 6—TRADING DESKS REPORTING METRICS TO THE SEC, BY TRADING ASSETS AND LIABILITIES

Trading assets & liabilities	Average number of desks	Average number of records per submission	Average number of records per desk
>50bln	56	450,921	7,588
20bln–50bln	43	195,010	5,172
<20bln	38	216,433	7,093

TABLE 7—TIME DELAYS AND RESUBMISSIONS OF METRICS RECORDS SUBMITTED TO THE SEC

Trading assets & liabilities	Total number of submitted records	Percent of records not resubmitted	Percent of records resubmitted once	Percent of records resubmitted twice
Panel A. Resubmissions of Initial Records				
>50bln	40,785,033	34	56	10
20bln–50bln	6,908,332	61	39	0
<20bln	10,441,265	96	4	0

[940] This estimate includes open-end companies, exchange-traded funds, closed-end funds, and non-insurance unit investment trusts and does not include fund of funds. The inclusion of fund of funds increases this estimate to approximately 17,200.

[941] The estimates in this section are based on Appendix A information provided by reporters to the SEC under the 2013 rule at the holding company level for April 2018 through March 2019, based on the most complete filing for each reporting period. Appendix A records for a particular trading desk are reported to the SEC if a trading desk books activity into the SEC registrant.

[942] *See, e.g.,* ABA; Credit Suisse; CCMR; FSF, Public Citizen and SIFMA.

[943] *See* SIFMA Annex C.

[944] *See* CCMR.

[945] *See, e.g.,* CCMC and FSF.

[946] *See* FSF.

[947] *See* SIFMA Annex C.

[948] For the purposes of this analysis, each record is one line of the matrix reported to the SEC, with the value filled out by the reporting entity, on a monthly basis, for all its related trading desks. The total number of records also includes the header, body, and footer. Each submission is the full data matrix reported by the reporting entity to the SEC for any specific reporting month.

Trading assets & liabilities	Total records submitted late (initial submission)	Percent of late initial submissions	Average delay in initial submissions (days, simple average)	Average delay in initial submissions (days, weighted by record count)
Panel B. Delayed Submission of Initial Records				
>50bln	4,771,713	12	2	2
20bln–50bln	4,020,778	58	32	32
<20bln	10,437,647	99.97	46	42

The SEC notes two important caveats relevant for the interpretation of these statistics. First, direct attribution of specific trading activity by a trading desk to an SEC registrant or group of registrants is not feasible, since the trading desk may book transactions into multiple legal entities, including both those registered with the SEC as well as those that are not registered. As a result, the scope of activity reported in this section is likely to overestimate the records and reporting by legal entities registered with the SEC. Second, the SEC does not receive reporting from trading desks that do not transact on behalf of SEC-registered entities. Therefore, these estimates may significantly underestimate the overall volume of metrics reporting by all banking entities (including those that are not registered with the SEC) related to the 2013 rule.

3. Economic Effects

a. Treatment of Entities Based on the Size of Trading Assets and Liabilities

As proposed, the agencies are adopting a categorization of banking entities into three groups on the basis of the size of their trading activity. Under the final rule, banking entities with significant trading assets and liabilities (Group A entities) are required to comply with a streamlined but comprehensive version of the 2013 rule's compliance program requirements, as discussed below. Banking entities with moderate trading assets and liabilities (Group B entities) are subject to reduced requirements and an even more tailored approach in light of their smaller trading activities. The burdens are further reduced for banking entities with limited trading assets and liabilities (Group C entities), for which the amendments establish a presumption of compliance, which can be rebutted by the agencies. The sections that follow discuss the economic effects of each of the amendments on these groups of entities.

i. Costs and Benefits

First, banking entities with significant trading assets and liabilities are defined as those that have, together with affiliates and subsidiaries, trading assets and liabilities (excluding trading assets and liabilities attributable to trading activities permitted pursuant to § ____.6(a)(1) and (2) of subpart B) the average gross sum of which, over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equals or exceeds $20 billion.[949] This $20 billion threshold is higher than the threshold that the agencies proposed in the proposal. Accordingly, more banking entities may qualify as Group B entities rather than Group A entities (as compared to those that would have qualified under the proposal's lower threshold), which will reduce compliance burdens for more banking entities relative to the proposal.[950] The agencies received comments that a higher than the proposed $10 billion trading assets and liabilities threshold would provide Group B banking entities that are near or approaching $10 billion threshold with flexibility to have moderate growth over time and to manage their business without triggering the more stringent compliance requirements imposed on Group A banking entities.[951] In addition, some commenters stated that potential fluctuations resulting from customer-driven trades, quarter-end activity, and market and foreign exchange volatility may cause banking entities that are near or approaching the $10 billion threshold to exceed this threshold.[952] The SEC recognizes that fluctuations in customer demand or market events may cause these banking entities to exceed the $10 billion threshold temporarily or permanently, which could trigger a more enhanced compliance regime and expose these banking entities to higher compliance costs.[953] Thus, a $20 billion threshold accounts for such fluctuations and provides banking entities that are near or approaching $10 billion in trading assets and liabilities with more certainty regarding their compliance burdens.

Some commenters stated that changing the threshold from $10 to $20 billion would have minimal effect on the number of banking entities that would remain categorized as having significant trading assets and liabilities.[954] The SEC estimates that there are 66 broker-dealers with approximately 16% of all broker-dealer holdings (or 6% based on the alternative measure) that would qualify as Group B entities with the adopted $20 billion threshold—compared to 57 broker-dealers with between 9% and 4% of all broker-dealer holdings that would have qualified under the proposed threshold value. Thus, relative to the proposal, 15 additional broker-dealers will experience the cost reduction because of reduced compliance burdens.

Second, as in the proposal, the agencies are defining a banking entity with limited trading assets and liabilities as a banking entity that has, together with its affiliates and subsidiaries on a consolidated basis, trading assets and liabilities (excluding trading assets and liabilities attributable to trading activities permitted pursuant to § ____.6(a)(1) and (2) of subpart B) the average gross sum of which, over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is

[949] With respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, this threshold for having significant trading assets and liabilities applies according to the trading assets and liabilities of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States).

[950] The final rule defines banking entities with moderate trading assets and liabilities as those that are neither banking entities with significant trading assets and liabilities nor banking entities with limited trading assets and liabilities.

[951] *See, e.g.,* Capital One et al.; ABA; BPI; and Custody Banks.

[952] *See, e.g.,* Custody Banks and BPI.

[954] *See, e.g.,* ABA; Custody Banks; New England Council; Capital One et al.; SIFMA; State Street and BPI.

less than $1 billion. However, in the proposal, the agencies proposed this threshold to be calculated on the worldwide consolidated basis for both foreign and domestic registrants. Unlike in the proposal, with respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, this threshold will be applied on the basis of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States).

The SEC continues to recognize that the 2013 rule may have resulted in significant compliance burdens for banking entities that do not have significant U.S. operations, even though such entities may not pose substantial risks to the U.S. financial system because of their limited presence in the U.S. The SEC estimates that the adopted definition of limited trading assets and liabilities will allow 97 broker-dealers to reduce compliance costs related to the 2013 rule as a result of the final rule's presumption of compliance. In contrast, if the final rule adopted the proposed calculation of limited trading assets and liabilities, some foreign broker-dealers would not qualify as those affiliated with entities with limited trading assets and liabilities, even though the entities these broker-dealers are affiliated with may have very limited activity in the U.S.

Third, in the final rule the calculation of thresholds for limited and significant trading assets and liabilities will exclude—in addition to the proposed exclusion of trading assets and liabilities involving obligations of, or guaranteed by, the United States, or any agency of the United States—trading assets and liabilities involving obligations, participations, or other instruments of, or issued or guaranteed by, government-sponsored enterprises listed in § ____.6(a)(2). Some commenters stated that the calculation of trading assets and liabilities should exclude financial instruments that are not regulated under the 2013 rule.[955] The SEC recognizes that inclusion of trading assets and liabilities involving obligations of, participations by, or other instruments of, or issued or guaranteed by, government-sponsored enterprises in the calculation of trading assets and liabilities may inadvertently scope in entities whose trading assets and liabilities primarily consist of financial instruments that are excluded from the prohibition on proprietary trading under the 2013 rule.[956] Accordingly, the final rule will better align the application of the tiered compliance regime with trading activities that are subject to the proprietary trading prohibitions. The SEC estimates that the exclusion of the aforementioned trading assets and liabilities from the calculation of the $1 billion and $20 billion thresholds will not change the assignment of banking entities into the tiered compliance groups.

The SEC continues to believe that the primary effect of these amendments for SEC registrants is the reduced compliance burdens, as discussed in more detail in later sections. To the extent that the compliance costs are currently passed along to customers and counterparties, some of the cost reductions for these entities associated with the final rule may flow through to counterparties and clients in the form of reduced transaction costs or a greater willingness to engage in activity, including intermediation that facilitates risk-sharing.

The SEC notes that, from above, Group B and Group C broker-dealers currently account for approximately 7% to 18% of total bank broker-dealer holdings and that, to the extent that holdings reflect risk exposure resulting from trading activity, current trading activity by Group B and Group C entities may represent lower risks than the risks posed by Group A entities' trading activities addressed in the 2013 rule. In addition, the SEC continues to recognize that some Group B and Group C entities that currently exhibit low levels of trading activity because of the costs of compliance may respond to the final rule by increasing their trading assets and liabilities while still remaining under the $20 billion or $1 billion threshold, as applicable. Increases in aggregate risk exposure by Group B and Group C entities may be magnified if trading activity becomes more highly correlated among such entities, or dampened if trading activity becomes less correlated among such entities. Since it is difficult to estimate the number of Group B and Group C entities that may increase the riskiness of their activities and the degree to which their trading activity would be correlated, the implications of this effect for aggregate risk and capital market activity are unclear.

The shifts in risk exposure may have two competing effects. On the one hand, if Group B and Group C entities are able to bear risk at a lower cost than their customers, increased risk exposures could promote secondary market trading activity and capital formation in primary markets and increase access to capital for issuers, benefitting issuers and investors. On the other hand, Group B and Group C firms may be incentivized to increase their risk exposures, resulting in more aggregate risk in the banking sector, greater market fragility, and exacerbated conflicts of interest between banking entities and their customers. This may ultimately adversely affect issuers and investors. However, the SEC continues to recognize that the amendments are focused on tailoring the compliance regime based on the amount of trading activity engaged in by each banking entity, and all banking entities would still be subject to the statutory prohibitions related to such activities. Thus, the potential risk of increased market fragility and the severity of conflicts of interest effects is mitigated.

In response to the final rule, it is possible that trading activity that was once consolidated within a small number of unaffiliated banking entities may become fragmented among a larger number of unaffiliated banking entities that each manage down their trading books under the $20 billion and $1 billion trading assets and liabilities thresholds to enjoy reduced hedging compliance and documentation requirements and a less costly compliance and reporting regime described in sections V.F.3.c, V.F.3.d, V.F.3.g, and V.F.3.h. The extent to which banking entities may seek to manage down their trading books will depend on a number of factors, such as the size and complexity of each banking entity's trading activities and organizational structure, along with those of its affiliated entities, as well as forms of potential restructuring and the magnitude of expected compliance savings from such restructuring relative to the cost of restructuring. The SEC anticipates that the incentives to manage the trading book under the $20 billion or $1 billion threshold, as applicable, may be strongest for those holding companies that are near or just above the thresholds. Such management of the trading book may reduce the size of trading activity of some banking entities and reduce the number of banking entities subject to more stringent hedging, compliance, and reporting requirements. At the same time, if the amendments incentivize banking entities to have smaller trading books, they may mitigate moral hazard and reduce market impacts from the failure of a given banking entity.

[955] *See, e.g.,* KeyCorp; BMO and Capital One et al.

[956] *See* § ____.6(a)(2).

ii. Efficiency, Competition, and Capital Formation

The 2013 rule imposes compliance burdens that may be particularly significant for smaller market participants. Moreover, such compliance burdens may be passed along to counterparties and customers in the form of higher costs, reduced capital formation, or a reduced willingness to transact. For example, in the proposal, the SEC cited one commenter's estimate that the funding cost for an average non-financial firm may have increased by as much as $30 million after the 2013 rule's implementation.[957] At the same time, and as discussed in section V.F.2, the SEC continues to recognize that the 2013 rule may have yielded important qualitative benefits, such as reducing certain types of risks in the financial system and mitigating potential incentive conflicts that could be posed by certain types of proprietary trading by dealers, as well as enhancing oversight and supervision.

On one hand, as a result of the amendments, Group B and Group C entities might enjoy a competitive advantage relative to similarly situated Group A and Group B entities respectively. As noted, firms that are near to the $20 billion threshold may actively manage their trading book to avoid triggering stricter requirements, and some firms above the threshold may seek to manage down the trading activity to qualify for streamlined treatment under the amendments. As a result, the amendments may result in greater competition between Group B and Group A entities around the $20 billion threshold, and similarly, between Group B and Group C entities around the $1 billion threshold, to the extent that Group C and Group B entities will increase their trading activity without reaching the $1 and $20 billion thresholds respectively. On the other hand, to the extent that the risk exposure of Group B and Group C entities increases as they compete with Group A and Group B entities, respectively, investors may demand additional compensation for bearing financial risk. A higher required rate of return and higher cost of capital could therefore offset potential competitive advantages for Group B and Group C entities.

In addition, the adopted methods for the calculation of limited and significant trading assets and liabilities may result in lower compliance costs for foreign banking entities relative to the domestic banking entities, increasing the competitive advantage of foreign Group B and C entities.

As in the proposal, the SEC recognizes that cost savings to Group B and Group C entities related to the compliance requirements and requirements described in sections V.F.3.g and V.F.3.h may be partially or fully passed along to clients and counterparties. To the extent that hedging documentation and compliance requirements for Group B and Group C entities are currently resulting in a reduced willingness to make markets or underwrite securities, the amendments may facilitate trading activity and risk-sharing, as well as capital formation and reduced costs of access to capital. Again, the SEC notes that the amendments do not eliminate statutory prohibitions under section 13 of the BHC but create a simplified compliance regime for banking entities that do not have significant trading assets and liabilities. Thus, the statutory prohibitions on proprietary trading and covered funds activities will continue to apply to all affected entities, including Group B and Group C entities.

iii. Alternatives

Alternative approaches were considered. For example, the rule could have used other values for thresholds for total consolidated trading assets and liabilities in the definition of entities with significant trading assets and liabilities. As noted in the discussion of the economic baseline, using different thresholds would affect the scope of application of compliance requirements and requirements described in sections V.F.3.g and V.F.3.h by changing the number and size of affected broker-dealers. For instance, using the proposed $10 billion threshold or a lower threshold, such as $5 billion, in the definition of significant trading assets and liabilities would scope a larger number of entities into Group A, as compared to the final rule's $20 billion threshold, thereby subjecting a larger share of the dealer and investment adviser industries to six-pillar compliance obligations. However, the SEC continues to recognize that trading activity is heavily concentrated in the right tail of the distribution and that using a lower threshold would not significantly increase the volume of trading assets and liabilities scoped into the Group A regime.[958] For example, Table 2 shows that 57 bank-affiliated broker-dealers that have between $1 and $10 billion in consolidated trading assets and liabilities and are subject to section 13 of the BHC Act account for only approximately 10% of bank-affiliated broker-dealer assets and between approximately 4% and 9% of holdings. In addition, 33 broker-dealer affiliates of firms that have between $1 and $5 billion in consolidated trading assets and liabilities and are subject to section 13 of the BHC Act account for only approximately 2% of bank-affiliated broker-dealer assets and between approximately 1% and 2% of holdings.[959] At the same time, with a lower threshold, more banking entities would face higher compliance burdens and related costs. Therefore, as discussed in section IV.A.1.b, the agencies decided against this alternative.

A different threshold for the definition of banking entities with limited trading assets and liabilities was also considered. As pointed out by some commenters, a higher threshold, such as $5 billion, would allow small and mid-size banking entities to have moderate growth over time without triggering more costly compliance requirements.[960] As shown in Table 2, 33 more broker-dealers would qualify for presumed compliance under this alternative. However, as discussed in section IV.A.1.b, the agencies continue to believe that banking entities with $1 billion or less in trading assets and liabilities differ from banking entities with between $1 and $5 billion in trading assets and liabilities in their business models and risk exposures, and that a $1 billion threshold appropriately accounts for the risks posed by Group B and Group C entities; therefore, the agencies are not adopting this alternative.

An alternative of splitting banking entities into only two groups according to their trading assets and liabilities—those with significant trading assets and liabilities and those without, *i.e.* joining the limited and moderate trading assets and liabilities groups was also considered.[961] This alternative could have reduced compliance burdens for Group B entities if the threshold was set at $20 billion. But, if the threshold for this alternative would have been set at $1 billion, the compliance burdens for Group B entities would have been

[957] *See* 83 FR at 33526.

[958] Some commenters supported this view. *See, e.g.,* Capital One et al.

[959] In addition, one commenter stated that firms with $20 billion or more in trading assets and liabilities represented approximately 94.80% of total reported U.S. trading assets and liabilities and firms with $5 billion or less in trading assets and liabilities represented approximately 1.32% of total reported U.S. trading assets and liabilities. *See* BPI.

[960] *See, e.g.,* ABA.

[961] This alternative approach was also suggested by some commenters. *See, e.g.,* Capital One et al.

higher than their compliance costs under the final rule. As shown in Table 2, Group B broker-dealers represent approximately 16% of total assets of bank-affiliated broker-dealers and approximately 16% of their holdings, while Group C broker-dealers account for only 4% of total assets of bank-affiliated broker-dealers and 2% of their holdings. The SEC continues to believe that Groups B and C differ in their business models (*e.g.,* level of trading activity) and the risks posed to the U.S. financial system. For these reasons, the agencies decided not to adopt this alternative.

A percentage-based threshold for determining whether a banking entity has significant trading assets and liabilities was also considered. For example, the amendment could have relied exclusively on a threshold where banking entities are considered to be entities with significant trading assets and liabilities if the firm's total consolidated trading assets and liabilities are above a certain percentage (for example, 10% or 25%) of the firm's total consolidated assets. Under this alternative, a greater number of entities could have benefited from lower compliance costs and a streamlined regime for Group B entities. In addition, as pointed out by a commenter, this alternative could address risk for individual banking entities since it would base the threshold on the materiality of trading activity to the entity's business.[962] However, under this approach, even firms in the extreme right tail of the trading asset distribution could be considered without significant trading assets and liabilities if they are also in the extreme right tail of the total assets distribution. Thus, without placing an additional limit on total assets within such regime, entities with the largest trading books could have been scoped into the Group B regime if they also had a sufficiently large amount of total consolidated assets, while entities with significantly smaller trading books could be categorized as Group A entities if they had fewer assets overall. Thus, the SEC believes that this alternative would not have appropriately accounted for the size of banking entities' trading activity.

In addition, a threshold based on total assets could have been adopted. It is possible that losses on small trading portfolios can be amplified through their effect on non-trading assets held by a banking entity. To that extent, a threshold based on total assets may be useful in potentially capturing both direct and indirect losses that originate from trading activity of a holding company.[963] However, such threshold may not be as meaningful as a threshold based on trading assets and liabilities when applied in the context of section 13 of the BHC Act. A threshold based on total assets would scope in entities merely on the basis of their balance sheet size, even though they may have little or no trading activity of the type that section 13 of the BHC Act is intended to address. Therefore, the agencies decided against this alternative.

Thresholds based on the level of total revenues from permitted trading activities could have been adopted. To the extent that revenues could be a proxy for the structure of a banking entity's business and the focus of its operations, this alternative may apply more stringent compliance requirements to those entities that focus their business the most on covered activities. However, revenues from trading activity fluctuate over time, rising during economic booms and deteriorating during crises and liquidity freezes. As a result, under the alternative, a banking entity that is scoped into the regulatory regime during normal times may be scoped out during a time of market stress because of a decrease in the revenues from permitted activities. That is, under such alternative, the weakest compliance regime may be applied to banking entities with the largest trading books in times of acute market stress, when the performance of trading desks is deteriorating and the underlying requirements of the 2013 rule may be the most valuable.

Finally, the agencies could have excluded from the definition of entities with significant trading assets and liabilities those entities that may be affiliated with a firm with over $20 billion in consolidated trading assets and liabilities but that are operated separately and independently and are not consolidated with the parent company that have total trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) under $20 billion. As shown in Table 8 below, the SEC estimates that there are 17 broker-dealers that have holdings of less than $20 billion and are affiliated with bank holding companies that have trading assets and liabilities in excess of $20 billion. The SEC does not have data on how many of these 17 broker-dealers are operated separately and independently and are not consolidated with affiliated entities with significant trading assets and liabilities. However, the SEC notes that, at a maximum, this alternative could decrease the scope of application of the Group A regime for 17 broker-dealers.

TABLE 8—BROKER-DEALER ASSETS AND HOLDINGS, BY GROSS TRADING ASSETS AND LIABILITIES THRESHOLD OF AFFILIATED BANKING ENTITIES

Type of broker-dealer	Number	Total assets, $mln	Holdings, $mln	Holdings (altern.), $mln
Holdings ≥$20bln and affiliated with firms with gross trading assets and liabilities ≥$20bln	19	2,225,989	594,513	514,360
Holdings <$20bln and affiliated with firms with gross trading assets and liabilities ≥$20bln	17	275,951	31,328	13,576
Affiliated with firms with gross trading assets and liabilities <$20bln [964]	163	640,840	135,691	39,451
Total	199	3,142,780	761,532	567,387

Somecommenters indicated that this alternative may be beneficial for banking entities.[965] The SEC recognizes that this alternative would increase the number of entities able to avail themselves of the reduced compliance, documentation, and metrics reporting requirements, potentially resulting in cost reductions flowing through to

[962] *See, e.g.,* KeyCorp.

[963] Some commenters supported this view. *See, e.g.,* Data Boiler.

[965] *See, e.g.,* JBA.

customers and counterparties. At the same time, this alternative would permit more trading activities by entities affiliated with firms that have gross trading assets and liabilities in excess of $20 billion. In addition, it could encourage such firms to fragment their trading activity, for instance, across multiple dealers, and operate them separately and independently, thereby relieving such firms of the requirement to comply with the hedging, compliance, and reporting regime of the 2013 rule. This alternative may, therefore, reduce the regulatory oversight and compliance benefits of the full hedging, documentation, reporting, and compliance requirements for Group A banking entities. The feasibility and costs of such fragmentation would depend, in part, on the organizational complexity of a firm's trading activity, the architecture of trading systems, the location and skillsets of personnel across various dealers affiliated with such entities, and current inter-affiliate hedging and risk mitigation practices.

Some commenters suggested that periodic adjustment to thresholds to account for inflation should be adopted.[966] This alternative would account for changing market conditions in the absence of any changes in a banking entity's business and level of trading activities. In an environment with a moderate level of inflation, Group B and Group C banking entities that are situated just below the thresholds may reduce their level of activity to avoid triggering a more costly compliance regime. However, the agencies do not believe that the additional complexity associated with inflation-indexing the thresholds in the final rule is necessary in light of the other changes to the thresholds and calculation methodologies described above. Therefore, the agencies decided against this alternative.

b. Proprietary Trading

Under section 13 of the BHC act and the 2013 rule, proprietary trading is defined as engaging as principal for the ''trading account'' of a banking entity.[967] Thus, the definition of the trading account determines the trading activity that falls within the scope of the statutory prohibitions and the compliance regime in the 2013 rule associated with such activity. The definition of trading account in the 2013 rule has three prongs, including the dealer prong. The final amendments introduce certain changes to the definition of trading account; however, these amendments do not remove or modify the dealer prong. In addition, the amendments introduce new exclusions from the trading account and a new definition of the trading desk.

i. Trading Account

(1) Costs and Benefits

Under the final rule, the definition of ''trading account'' continues to include purchases and sales of financial instruments by banking entities engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent these instruments are purchased or sold in connection with the activities of such business.[968] Thus, the SEC expects that most (if not substantially all) trading activity by SEC-regulated dealers that are banking entities will continue to be captured by the dealer prong of a banking entity, notwithstanding any of the changes made to the definition of the trading account.

Some commenters pointed out that not all of dealers' trading activity is conducted in a dealer capacity.[969] The SEC recognizes the possibility that some dealers engage in transaction activity that, by itself, would not trigger a dealer registration requirement.[970] Under the baseline, such activity may be scoped into the ''trading account'' definition by the short-term prong or the market risk capital prong. Thus, as discussed below, the SEC believes that only a small subset of trading activity by dealers may be affected by the changes to the definition of the trading account.

The agencies are adopting three changes to the definition of the trading account. First, the applicability of the short-term prong and the market risk capital prong is changed under the final rule. In particular, for dealers that are subject to the market risk capital prong, trading activity outside of the dealer prong will be scoped into the trading account only if it is a covered position for the purposes of the market risk capital rule. That is, if the activity is not captured by the dealer prong or the market risk capital prong, it would be scoped out from the definition of the trading account under the final rule. This is in contrast to the 2013 rule, under which, for banking entities that are subject to the market risk capital prong, trading activity that is not captured by the dealer prong or the market risk capital prong could still be captured by the short-term prong.[971] Thus, under the 2013 rule, bank dealers that are subject to the market risk capital prong have to apply three prongs: The dealer prong, the market risk capital prong, and the short-term prong. Under the final rule, these same entities will apply only two prongs: The dealer prong and the market-risk capital prong. To the extent that dealers subject to the market risk capital prong have trading activities that are not captured by the dealer prong currently experience organizational inefficiencies or duplicative costs as a result of being subject to both short-term and market risk capital prongs, this amendment may benefit such dealers by decreasing their compliance costs, as discussed in section V.F.3.g, and decreasing the regulatory complexity, consequently increasing operational efficiency. The SEC expects that these benefits are likely to be greater for banking entities that are not subject to the dealer prong, although, as noted above, the SEC does not analyze those potential benefits here.

In addition, to the extent that the definition of trading account in the 2013 rule involves position-by-position analysis of financial instruments which may be costly, and to the extent that the costs of such analysis discourage dealers that are subject to the market risk capital prong from conducting activities that could be scoped in by the short-term intent prong, this amendment may promote trading activities that would not be captured by the dealer prong or the market risk capital prong. On the one hand, such trading activities may allow dealers that are subject to the market risk capital rule to manage their business more efficiently. On the other hand, to the extent that, under the final rule, trading activity that is not captured by either the dealer prong or the market risk capital prong would have been captured by the short-term intent prong, and to the extent that this activity exposes dealers to additional risks, this amendment may increase risk exposure of dealers that are subject to the market risk capital rule. The SEC does not have information about the amount of trading activity of SEC-registered broker-dealers

[964] This category excludes SEC-registered broker-dealers affiliated with banks that have consolidated total assets less than or equal to $10 billion and trading assets and liabilities less than or equal to 5% of total assets, as well as firms for which bank trading assets and liabilities data was not available.

[966] *See, e.g.,* BPI and Capital One et al.

[968] *See* 2013 rule § ___.3(b)(1)(iii).

[969] *See, e.g.,* SIFMA and BPI.

[970] *See* 79 FR at 5549 (''The Agencies believe the scope of the dealer prong is appropriate because, as noted in the proposal, positions held by a registered dealer in connection with its dealing activity are generally held for sale to customers upon request or otherwise support the firm's trading activities (*e.g.,* by hedging its dealing positions), which is indicative of short term intent.'').

[971] As noted in section IV.B.1.a.iii, the scope of activities captured by the short-term intent prong substantially overlaps with the scope of activities captured by the market risk capital prong.

that is not captured by the dealer prong or the market risk capital prong and about the prevalence of the current application of the market risk capital prong and the short-term prong under the 2013 rule. As shown in Table 9 below, the SEC estimates that there are 100 broker-dealers that in aggregate hold between 98% and 99% of holdings by broker-dealers affected by the final rule that are subject to the market risk capital rule and may be affected by this amendment. The SEC continues to believe that the largest share of dealers' trading activity will continue to be captured by the dealer prong. Thus, the SEC expects that the effects of this amendment on SEC-regulated dealers will be modest.

TABLE 9—MARKET RISK CAPITAL RULE APPLICATION

Market risk capital rule application	Number of broker-dealers	Total assets, $mln	Holdings	Holdings (altern.)
Subject to the market risk capital rule	100	3,002,834	749,867	562,515
Not subject to the market risk capital rule	99	139,946	11,665	4,872
Total	199	3,142,780	761,532	567,387

The second change to the definition of trading account affects banking entities that are not subject to the market risk capital rule and cannot apply the market risk capital prong under the 2013 rule. Under the final rule, these entities will be able to elect to apply the market risk capital prong instead of the short-term prong to determine the scope of the banking entity's trading account. This amendment will affect those dealers that have trading activity that is not captured by the dealer prong and instead captured by the short-term prong. To the extent that the market risk capital prong is less costly to comply with, relative to the short-term prong, this amendment may benefit dealers that are not subject to the market risk capital rule and have trading activity that is not captured by the dealer prong by providing them with flexibility to apply the prong that is more cost-effective. This amendment may particularly benefit foreign banking entities that are not subject to the market risk capital rule but are applying a different market risk framework, to the extent that this framework is similar to the market risk capital rule. To the extent that foreign dealers with frameworks similar to the framework of the market risk capital rule are currently experiencing inefficiencies because they cannot apply the market risk capital prong of the trading account definition, this amendment may reduce the compliance costs of these dealers. The SEC estimates that, at most, 99 broker-dealers that are not subject to the market risk capital rule may be affected by this amendment, to the extent that they have trading activity that is captured by the short-term prong under the 2013 rule. However, the SEC continues to believe that the largest share of dealers' trading activity will continue to be captured by the dealer prong. Thus, the SEC expects that the effects of this amendment for dealers will be modest.

The third amendment to the trading account definition will eliminate the 60-day rebuttable presumption in the short-term prong and instead establish a new rebuttable presumption that financial instruments held for 60 days or more are not within the short-term prong. Many commenters supported the proposed rule's elimination of the 60-day rebuttable presumption,[972] and some commenters suggested that the agencies should presume, for banking entities not subject to the market risk capital rule, that financial instruments held for longer than 60 days, or that have an original maturity or remaining maturity upon acquisition, of fewer than 60 days to their stated maturities, are not for the banking entity's trading account.[973] As recognized in section IV.B.1.a.iv, the agencies have found that the rebuttable presumption has captured many activities that should not be included in the definition of proprietary trading. In addition, as stated by some commenters, the presumption may be difficult to rebut.[974] Therefore, the SEC believes that the reversal of the presumption in the 2013 rule would reduce the compliance burdens for dealers that conduct trading activity that is not otherwise captured by the dealer prong or the market risk capital prong. To the extent that the compliance burdens related to the rebuttable presumption of the 2013 rule limit dealers' ability to conduct customer-accommodating transactions or liquidity management activities, the cost reductions of the amendment may flow through to customers and counterparties and increase operational efficiency of dealers. The SEC estimates that this amendment may affect 99 broker-dealers—the broker-dealers that are not subject to the market risk capital rule—which on aggregate have 1.5% of broker-dealer holdings. However, the SEC expects that the largest share of dealing activity subject to SEC oversight will continue to be captured by the dealer prong. Thus, the SEC expects that the effects of this amendment for dealers will be modest.

(2) Efficiency, Competition, and Capital Formation

To the extent that the compliance related to the rebuttable presumption of the 2013 rule limits dealers' ability to conduct customer-accommodating transactions, or liquidity management or risk management activities that are covered by the short-term prong, the amendments to the definition of trading account may facilitate such activities, which could, in turn, promote capital formation. In addition, to the degree that the amendments to the trading account may provide banking entities with more flexibility to underwrite, market make, and hedge, and to the extent these activities facilitate capital formation, these amendments may improve allocative efficiency. To the extent that the amendments to the short-term prong reduce compliance costs and to the extent that the short-term prong primarily applies to smaller dealers (*i.e.,* those not covered by the market risk capital prong), the amendments to the trading account definition may improve the competitive position of smaller dealers. However, the SEC notes that the largest share of dealing activity subject to SEC oversight is already captured by the dealer prong; and, therefore, the above economic effects of the amendments to the definition of the trading account on SEC-regulated entities, including the effects on efficiency, competition, and capital formation, may be de minimis.

[974] *See, e.g.,* State Street; Chatham; BPI; FSF; CCMR and CFA.

(3) Alternatives

As an alternative to the short-term prong, the agencies proposed replacing the short-term prong in the 2013 rule with an accounting prong that would have included within the definition of ''trading account'' any account used by a banking entity to purchase or sell one or more financial instruments that are recorded at fair value on a recurring basis under applicable accounting standards.[975] As the agencies noted when they proposed this alternative, the accounting prong was designed to provide more certainty and clarity about which financial instruments should be included in the trading account due to the fact that banking entities should know which positions are recorded at fair value on their balance sheets.[976] In addition, as pointed out by some commenters,[977] this alternative could deter noncompliance and facilitate the agencies' supervision. However, a large number of commenters stated that the proposed accounting prong would inadvertently scope in activities that are not principally for the purpose of selling in the near term or otherwise with the intent to resell in order to profit from short-term price movements. For example, some commenters pointed out that longer term positions, such as available-for-sale debt securities,[978] certain long-term investments,[979] static hedging of long term investments,[980] traditional asset-liability management activities,[981] derivative transactions entered into for any purpose and duration,[982] long-term holdings of commercial mortgage-backed securities; [983] would be scoped in under this alternative. Although some of these instruments are held for less than 60 days and may fall under the short-term prong of the trading account under the 2013 rule, these instruments, in general, are not held for trading purposes, *i.e.,* they are not held principally for the purpose of selling in the near term; rather, the majority of the aforementioned instruments are held for investment.[984] Since this alternative would include all instruments reported at fair value, regardless of the purpose with which these instruments are bought or sold and regardless of the period during which these instruments are held (short-term or long-term), the scope of the trading account would be significantly greater under this alternative than the scope of the trading account in the 2013 rule. Given that many of the instruments that would be captured by the accounting prong are not held principally for the purpose of selling in the near term, the agencies are not adopting this alternative. The SEC also notes that if this alternative had been adopted, the effect on SEC-regulated dealers would have been limited because the majority of dealer trading activity falls under the dealer prong.

The agencies also proposed, but are not adopting, including a reservation of authority allowing for a determination, on a case-by-case basis, with appropriate notice and response procedures, that any purchase or sale of one or more financial instruments by a banking entity for which it is the primary financial regulatory agency either is or is not for the trading account. While the SEC continues to recognize that the use of objective factors to define proprietary trading is intended to provide bright lines that simplify compliance, the SEC also recognizes that this approach may, in some circumstances, produce results that are either underinclusive or overinclusive with respect to the definition of proprietary trading. The SEC continues to believe that the reservation of authority may add uncertainty for banking entities about whether a particular transaction could be deemed as a proprietary trade by the regulatory agency, which may affect the banking entity's decision to engage in transactions that are not included in the definition of the trading account under the 2013 rule. As discussed in the proposal, notice and response procedures related to the reservation of authority provision would cost as much as $19,877 for SEC-registered broker-dealers, and $5,006 for entities that may choose to register with the SEC as SBSDs.[985]

The agencies proposed but are not adopting the revision of the market risk capital prong to apply to the activities of FBOs to take into account the different market risk frameworks FBOs may have in their home countries.[986] This alternative may better align foreign banking entities' compliance with the 2013 rule and compliance with market risk regulations of their home counties, increasing organizational efficiency and potentially decreasing compliance costs for such banking entities. However, as suggested by some commenters, under this alternative, positions that are not held for short-term trading would be captured in some foreign market risk capital frameworks.[987] Therefore, the agencies decided against this alternative and instead are adopting a more flexible approach, under which foreign banking entities would be able to apply the market risk capital prong if they choose to do so.[988]

As an alternative, the agencies could have modified the dealer prong of the trading account definition to include only near-term trading, *e.g.,* positions held for less than 60, 90, or 120 days. This alternative would likely narrow the scope of application of the substantive proprietary trading prohibitions to a smaller portion of a banking entity's activities. Under this alternative, bank-affiliated dealers would be able to amass large trading positions at the near-term definition boundary (*e.g.,* for 61, 91, or 121 days) to take advantage of a directional market view, to profit from mispricing in an instrument, or to collect a liquidity premium in a particular instrument. This may significantly increase the risk exposure of bank-affiliated dealers. However, as this alternative could stimulate an increase in potentially impermissible proprietary trading by these dealers, the volume of trading activity in certain instruments and liquidity in certain markets may increase. The SEC also notes that the temporal thresholds necessary to implement such a short-term trading alternative would be difficult to quantify and may have to vary by product, asset class, and aggregate market conditions, among other factors. For instance, the markets for large cap equities and investment grade corporate bonds have different structures, types of participants, latency of trading, and liquidity levels. Therefore, an appropriate horizon for short-term positions will likely vary across these markets. Similarly, the ability to transact quickly differs under strong macroeconomic conditions and in times of stress. A meaningful implementation of this alternative would likely require calibrating and

[988] *See* section IV.B.1.a.v.

recalibrating complex thresholds to exempt non-near-term proprietary trading and so could introduce additional uncertainty and increase the compliance burdens on SEC-regulated banking entities.

As another alternative, the agencies could have categorically excluded financial instruments of dealers purchased in a non-dealing capacity, such as financial instruments purchased for long-term investment purposes. Some commenters pointed out that it is not always clear whether such instruments are scoped in the dealer prong and that banking entities may engage in costly and time-consuming position-by-position analysis to confirm that a long-term investment is captured in the trading account.[989] As discussed in section IV.B.1.a.vi, the agencies continue to believe that only the activities that are done in connection with activities that would require the banking entity to be licensed or registered are covered by the dealer prong. For example, if a banking entity purchases or sells a financial instrument in connection with activities that do not require registration as a dealer, this activity would not be covered by the dealer prong. However, this activity could still be included in the trading account under the short-term prong or the market risk capital prong, as applicable.[990]

ii. Exclusions From Proprietary Trading

The agencies are adopting the proposed expansion of the liquidity management exclusion, as well as an exclusion for trading errors and subsequent correcting transactions, certain matched derivative transactions, certain trades related to hedging mortgage servicing rights or mortgage servicing assets, and transactions in instruments not included in the definition of trading asset or trading liability under the applicable reporting form for a banking entity.

(1) Costs and Benefits

Exclusion for Liquidity Management Activities

The agencies are adopting the proposed expansion of the liquidity management exclusion substantially as proposed, but with a modification to permit the use of non-deliverable cross-currency swaps. Thus, liquidity management exclusion would apply not only to securities, but also to foreign exchange forwards and foreign exchange swaps (each as defined in the Commodity Exchange Act), and to cross-currency swaps (both physically- and cash-settled) that are traded for the purpose of liquidity management in accordance with a documented liquidity management plan. On the one hand, under this amendment, SEC-regulated banking entities would face lower burdens and enjoy greater flexibility in currency-risk management as part of their overall liquidity management plans. In the proposal, the SEC recognized that the liquidity management exclusion in the 2013 rule may be narrow and that the trading account definition may scope in routine asset-liability management and commercial-banking related activities. In their response to the proposal, some commenters supported that view and stated that the 2013 rule may be restricting liquidity-risk management by banking entities.[991] Therefore, the SEC continues to believe that, to the degree that these effects constrain activities of dealers, this amendment could facilitate more efficient risk management, greater secondary market activity, and more capital formation in primary markets.

Some commenters indicated that this amendment may make it easier to trade in currency markets for speculative purposes under the guise of legitimate liquidity management.[992] The SEC continues to recognize that this liquidity-management amendment may lead to currency derivatives exposures, including potentially very large exposures, being scoped out of the trading account definition and the ensuing substantive prohibitions of the 2013 rule, which may increase the risk exposures of banking entities and reduce the effectiveness of regulatory oversight. However, the SEC continues to believe that the conditions maintained in the exemption, including the requirement to conduct liquidity management in accordance with a documented liquidity management plan, will limit these adverse effects.

Exclusion for Error Trades

The agencies are also adopting an exclusion for trading errors and subsequent correcting transactions from the definition of proprietary trading. The 2013 rule excludes from the proprietary trading prohibition certain excluded clearing activities by banking entities that are members of clearing agencies, derivatives clearing organizations, or designated financial market utilities. Specifically, such excluded clearing activities are defined to include, among others, any purchase or sale necessary to correct error trades made by, or on behalf of, customers with respect to customer transactions that are cleared, provided the purchase or sale is conducted in accordance with certain regulations, rules, or procedures.[993] Accordingly, the exclusion for error trades under the 2013 rule is applicable only to clearing members with respect to cleared customer transactions.[994]

[989] *See, e.g.,* SIFMA and BPI.

[990] *See* 79 FR 5549.

[991] *See, e.g.,* ISDA; Goldman Sachs and SIFMA.

[992] *See* Volcker Alliance and Data Boiler.

[993] *See* 2013 rule § ____.3(e)(7).

[994] *Id.*

This amendment primarily benefits dealers that are not clearing members with respect to all customer trades and dealers that are clearing members with respect to customer trades that are not cleared, since under the 2013 rule error trades of these dealers are not considered excluded clearing activity. Table 10 reports information about broker-dealer count, assets, and holdings, by affiliation and clearing type.

TABLE 10—BROKER-DEALER ASSETS AND HOLDINGS, BY CLEARING STATUS [995]

Broker-dealers subject to section 13 of the BHC Act	Number	Total assets, $mln	Holdings, $mln	Holdings (altern.), $mln
Clear or carry (or both)	76	3,101,936	755,975	562,649
Other	123	40,844	5,557	4,738
Total	199	3,142,780	761,532	567,387

Since correcting error trades is not conducted for the purpose of profiting from short-term price movements, as also pointed out by some commenters,[996] this amendment is likely to facilitate valuable customer-facing activities and promote effective risk management by dealers. As discussed in section IV.B.1.b.ii, the agencies continue to believe that banking entities generally should monitor and manage their error trade account because doing so would help prevent personnel from using these accounts for proprietary trading. Some commenters stated that banking entities could still make profits while relying on the error trade exclusion.[997] To the degree that this may happen, banking entities could become incentivized to use error trade exclusion to conduct proprietary trading. However, some commenters noted that bona fide trade error activity is separately managed and classified as an operational loss when there is a loss event or a near miss when error activity results in a gain.[998] The SEC agrees with the commenters' view and believes that existing requirements and operational risk management practices would be sufficient to deter participants from using the error trade exclusion to obfuscate impermissible proprietary trades.

Exclusion for Customer-Driven Swaps and Customer-Driven Security-Based Swaps

In addition, the agencies are adopting an exclusion for transactions in which banking entities contemporaneously enter into a customer-driven swap or security-based swap and a matched swap or security-based swap if (i) the banking entity retains no more than minimal price risk; and (ii) the banking entity is not a registered dealer, swap dealer, or security-based swap dealer. The SEC continues to recognize that loan-related swaps and customer accommodation back-to-back derivatives facilitate lending transactions as a customer service and are not designed to profit from speculative price movements.[999] Some commenters indicated that such customer accommodation loan-related swaps transactions may reduce the risk of banking entities and borrowers, and encourage the extension of credit, commonly for smaller and medium-size banking entities that engage in trading in connection with loans and other extensions of customer credit. Some commenters stated that this amendment increases the scope of permissible trading activity. The SEC notes that under the final rule this exclusion is not available to banking entities that are subject to the market risk or the dealer prong, reducing such risks. Therefore, the SEC believes that the effects of this amendment discussed above on SEC-regulated entities would be de minimis.

Exclusion for Hedges of Mortgage Servicing Rights or Mortgage Servicing Assets

The agencies are adopting an exclusion for transactions involving any purchase or sale of one or more financial instrument that the banking entity uses to hedge mortgage servicing rights or mortgage servicing assets in accordance with a documented hedging strategy. This amendment will provide more clarity to banking entities that are subject to the short-term prong that intangibles, including servicing assets, are not included in the definition of proprietary trading. Because under the market risk capital prong, intangibles, including servicing assets, are explicitly excluded from the definition of ''covered position,'' the exclusion will provide additional certainty to dealers that do not apply the market risk capital prong. To the extent that dealers that do not apply the market risk capital prong currently experience uncertainty as to whether the aforementioned financial instruments are included in the trading account and to the extent that this uncertainty impedes transactions involving these types of financial instruments, the amendment may facilitate permitted trading activity in these financial instruments. In addition, to the extent that these exclusions facilitate more efficient risk management, dealers that are not subject to the market risk capital rule may benefit from this amendment.[1000]

Exclusion for Financial Instruments That Are Not Trading Assets or Trading Liabilities

In addition to the above exclusions, the agencies are adopting an exclusion for purchases or sales of financial instruments that do not meet the definition of trading assets or trading liabilities under the applicable reporting form for a banking entity as of January 1, 2020. Similar to the exclusion for hedges of mortgage servicing rights or assets, this exclusion is intended to clarify the scope of the prohibition on proprietary trading and to provide parity between banking entities that apply the market risk capital prong and banking entities that apply the short-

[995] Broker-dealers clearing or carrying customer accounts (or both) are identified using FOCUS filings. Broadly, broker-dealers that are clearing or carrying firms directly carry customer accounts, maintain custody of the assets, and clear trades. Other broker-dealers may accept customer orders but do not maintain custody of assets. This analysis excludes SEC-registered broker-dealers affiliated with banks that have consolidated total assets less than or equal to $10 billion and trading assets and liabilities less than or equal to 5% of total assets, as well as firms for which bank trading assets and liabilities data was not available.

[996] *See, e.g.,* BPI; FSF and BB&T.

[997] *See, e.g.,* Data Boiler; CAP and Public Citizen.

[998] *See, e.g.,* ABA; BB&T; BPI and Capital One et al.

[999] Commenters agreed with this view. *See, e.g.,* Covington; Credit Suisse; SIFMA; Chatham and ABA.

[1000] The SEC estimates that there are 99 SEC-registered broker-dealers that are not subject to the market risk capital rule, which on aggregate hold approximately 1.5% of broker-dealer holdings.

term intent prong by scoping out of the rule positions that would not be captured by the market risk capital prong. In addition, this amendment will exclude financial instruments purchased by a dealer in its dealing capacity that are not trading assets or liabilities. Therefore, the SEC believes that this amendment will benefit dealers, to the extent that the 2013 rule's dealer prong is overinclusive because it scopes in financial instruments acquired in dealer capacity, regardless of their purpose (*i.e.* both for trading and non-trading purposes). To the extent that this aspect of the 2013 rule leads to inefficiencies or increases costs at the dealer level, the SEC expects that the final rule will promote dealers' organizational efficiency by narrowing the scope of the dealer prong to financial instruments that are considered trading assets and liabilities.

To the extent that some financial instruments that are not trading assets or liabilities are currently scoped-into the rule by the short-term prong due to the fact that they are held for less than 60 days, this amendment may decrease the scope of the trading account. For example, some fair value financial instruments that are not trading assets or liabilities, such as available-for-sale securities or derivatives not reported as trading, may be held for less than 60 days and therefore be presumed to be for the trading account under the 2013 rule. However, under the 2013 rule, banking entities could rebut this presumption by demonstrating that such instruments are not purchased or sold principally for the purpose of selling in the near term.[1001] In addition, the SEC notes that dealers, in general, hold primarily trading assets and trading liabilities due to the nature of their business. The SEC does not have data or information about what fraction of dealers' financial instruments that are not defined as trading assets or liabilities under the applicable banking agency reporting forms is currently being scoped-into the trading account by the short-term prong in the 2013 rule. This is because only non-trading fair value instruments held for fewer than 60 days are likely to be scoped into the trading account via the short-term prong under the 2013 rule, rather than all such financial instruments, and the data disaggregated by maturity of non-trading fair value instruments is not available. However, the SEC reiterates that only a small subset of trading activity by dealers may be affected by this exclusion, as majority of financial instruments purchased or sold by dealers are trading assets and liabilities. For this reason and the reasons discussed above, the SEC expects that this amendment will not substantially affect the scope of the trading account for banking entities that are dealers.

(2) Efficiency, Competition, and Capital Formation

To the degree that the 2013 rule may be restricting liquidity-risk management by banking entities, and to the extent that this affects their trading activity, the liquidity management amendment could facilitate more efficient risk management, greater secondary market activity, and more capital formation in primary markets. Similarly, to the extent that corrections for bona-fide errors and exclusions for customer-driven swaps and customer-driven security-based swaps and transactions related to mortgage servicing rights facilitate customer-driven transactions and increase banking entities' willingness to conduct such transactions, these exclusions could facilitate more efficient risk management and promote capital formation and secondary market activity. In addition, to the degree that the exclusions from proprietary trading may provide banking entities with more flexibility to manage risks, and to the extent these activities facilitate capital formation, these amendments may improve allocative efficiency.

To the extent that these amendments may increase the ability of dealers that are banking entities to hedge risks related to customer transactions, the competitive position of dealers that are banking entities may improve relative to nonbanking dealers. In addition, to the extent that these amendments reduce compliance costs of dealers that are banking entities and to the extent that these compliance costs are currently passed onto customers and counterparties, the reduction in costs related to the exclusions from proprietary trading may result in more competitive prices set by dealers that are banking entities, improving their competitive position further.

(3) Alternatives

The agencies could have taken the approach of expanding the liquidity management exclusion to exclude additional trading activities. For example, the agencies could exclude transactions in other derivatives, such as derivatives related to government securities, derivatives on foreign sovereign debt,[1002] instruments that qualify for certain treatment under the liquidity coverage ratio or section 165 of the Dodd-Frank Act, or transactions executed by SEC-registered dealers on behalf of their asset management customers.[1003]

The 2013 rule exempts all trading in domestic government obligations and trading in foreign government obligations under certain conditions; however, derivatives referencing such obligations that are intended to manage risks—including derivatives portfolios that can replicate the payoffs and risks of such government obligations—are not excluded from the trading account. Therefore, existing requirements reduce the flexibility of banking entities to engage in asset-liability management and result in a different treatment of two groups of financial instruments that have similar risks and payoffs. Excluding derivatives transactions on government obligations from the trading account definition could reduce costs to market participants and provide greater flexibility in their asset-liability management. This alternative could also result in increased volume of trading in markets for derivatives on government obligations, such as Treasury futures. The SEC recognizes, nonetheless, that derivatives portfolios that reference an obligation, including Treasuries, can be structured to magnify the economic exposure to fluctuations in the price of the reference obligation. Moreover, derivatives transactions involve counterparty credit risk not present in transactions in reference obligations themselves. Since the alternative would exclude all derivatives transactions on government obligations, and not just those that are intended to mitigate risk, this alternative could permit banking entities to increase their exposure to counterparty, interest rate, and liquidity risk. For the reasons discussed in section IV.B.1.i, the agencies decided not to expand the liquidity management exclusion further.

The agencies also considered mandating the use of a separately-managed trade error account for the purposes of this amendment. This alternative could deter banking entities from using the error trade exclusion to obfuscate impermissible proprietary trades. However, as indicated by the commenters, this approach may result in duplicative systems and additional

[1001] As discussed above, the final rule eliminates the 60-day rebuttable presumption in the short-term prong and instead establishes a new rebuttable presumption that financial instruments held for 60 days or more are not within the short-term prong.

[1002] Some commenters indicated that all derivatives should be excluded in the liquidity management exclusion. *See, e.g.,* FSF; Capital One et al.; IIB and JBA.

[1003] *See, e.g.,* Capital One et al. and ABA.

compliance costs.[1004] The agencies agree with these commenters and, therefore, are not adopting this alternative.

iii. Trading Desk Definition

The final rule adopts a multi-factor definition of the trading desk that is substantially similar to the definition included in the request for comment in the proposal, except that the reference to incentive compensation has been removed from the first prong. The definition of trading desk includes a new second prong that aligns the definition with the market risk capital rule. Specifically, for a banking entity that is subject to the market risk capital rule, the trading desk established for purposes of the market risk capital rule must be the same unit of organization that is established as a trading desk for purposes of the regulations implementing section 13 of the BHC Act.

(1) Costs and Benefits

The SEC continues to recognize that the definition of trading desk is an important component of the implementation of the 2013 rule in that certain requirements, such as those applicable to the underwriting and market making exemptions, and the metrics-reporting requirements, apply at the trading desk level of organization. Under the 2013 rule, a trading desk is defined as the smallest discrete unit of organization of a banking entity that purchases or sells financial instruments for the trading account of the banking entity or an affiliate thereof. Some commenters asserted that the smallest discrete unit language of the 2013 rule was subjective, ambiguous, or could be interpreted in different ways.[1005] Thus, the SEC continues to believe that SEC-regulated banking entities may currently experience substantial compliance costs related to the trading desk designation for the purposes of compliance with section 13 of the BHC Act. Accordingly, the SEC believes that the adopted definition of the trading desk may provide more certainty to SEC-regulated banking entities regarding trading desk designations and will reduce their compliance burdens, as the multi-factor definition better aligns with other operational, management, and compliance purposes,[1006] which typically depend on the type of trading activity, asset class, product line offered, and individual banking entity's structure. Among the metrics submissions from 18 entities received by the SEC, the SEC estimates that the average number of desks reported per entity is approximately 51.[1007] To the extent that the trading desk designations under the final rule will be less granular than those under the 2013 rule, and to the extent that establishing a large number of desks is more costly, this amendment will reduce compliance costs for dealers that are banking entities.

As seen in Table 9, the SEC estimates that 100 broker-dealers with between 98% and 99% of holdings are currently subject to the market risk capital rule and would be able to align their trading desks for the purposes of the Volcker Rule and the market risk capital rule. The SEC continues to believe that such alignment will reduce organizational complexity, consequently reducing compliance burdens for these banking entities.[1008] The SEC also estimates that 99 broker-dealers are not currently subject to the market risk capital rule—these broker-dealers will be able to establish trading desks on the basis of the multi-factor definition. To the extent that the current operational, management, or compliance structure of these entities may not perfectly align with the adopted multi-factor definition of the trading desk, these entities may experience one-time setup costs related to the reorganization of trading activity in order to satisfy the multi-factor definition. The SEC does not have information or data about the costs of this reorganization. However, the SEC believes that these reorganization costs will be offset by a reduction in ongoing compliance costs, which will be reduced as a result of the amended definition of the trading desk for dealers that are not subject to the market risk capital rule, to the extent that the trading desk designations under the final rule will be less granular than those under the 2013 rule and will better align with criteria used to establish trading desks for operational and management purposes.

(2) Efficiency, Competition, and Capital Formation

To the extent that the reduction in compliance costs stemming from this amendment facilitates permitted trading activity by banking entities, capital formation may increase. To the extent that the reduced compliance costs stemming from this amendment flow through to customers and counterparties, bank-affiliated dealers may become more competitive with nonbanking dealers. The amendment to the definition of the trading desk does not change the information available to market participants, and the SEC does not believe that these amendments are likely to have an effect on informational efficiency. To the degree that this amendment facilitates capital formation, allocative efficiency may improve.

(3) Alternatives

The agencies could have adopted an amendment that would allow trading desks to be set completely at the discretion of banking entities.[1009] This would provide banking entities greater flexibility in determining their own optimal organizational structure and allow banking entities organized with various degrees of complexity to reflect their organizational structure in the trading desk definition. This alternative could reduce operational costs from fragmentation of trading activity and compliance program requirements, as well as enable more streamlined metrics reporting. However, under this alternative, a banking entity may be able to aggregate impermissible proprietary trading with permissible activity (*e.g.,* underwriting, market making, or hedging) into the same trading desk and consequently take speculative positions under the guise of permitted activities. To the extent that this alternative would allow banking entities to use a highly aggregated definition of a trading desk, it may increase risk exposures of banking entities and the conflicts of interest that the prohibitions of section 13 of the BHC Act aimed to address.[1010] The SEC does not have data on operating and compliance costs that arise because of the fragmentation of trading activity by SEC-regulated banking entities, or data on their organizational complexity, and the extent of variation therein. For the reasons discussed in section IV.B.1.c, the agencies are not adopting this definition.

c. Permitted Underwriting and Market Making

Underwriting and market making are customer-oriented financial services that are essential to capital formation and market liquidity, and the risks and profit sources related to these activities are distinct from those related to impermissible proprietary trading. Moreover, as discussed above, market liquidity can be important to investors

[1004] *See, e.g.,* ABA; Credit Suisse; JBA and SIFMA.

[1005] *See, e.g.,* ABA and CCMC.

[1006] This was also supported by commenters. *See, e.g.,* ABA; JBA; FSF; Goldman; ISDA; SIFMA and CCMC.

[1007] *See* section V.0.

[1008] *See id.*

[1009] This alternative was also suggested by a commenter. *See* JBA.

[1010] *See, e.g.,* Volcker Alliance.

as it may enable investors to exit (in a timely manner and at an acceptable price) from their positions in instruments, products, and portfolios. At the same time, excessive risk exposure by banking entities can, of course, adversely affect markets and, therefore, investors.

Under the final rule, banking entities with covered activities are presumed compliant with the RENTD requirements of the exemption for underwriting and market making-related activities if the banking entity establishes and implements, maintains, and enforces certain internal limits that are designed not to exceed RENTD, taking into account the liquidity, maturity, and depth of the market for the relevant type of security or financial instrument. These internal limits are subject to supervisory review and oversight on an ongoing basis.

For Group A entities, these limits are required to be established either within the entity's internal compliance program or under the presumption of compliance within the exemptions for permitted underwriting and market making related activities. Under the final rule, Group B entities are not required to establish a separate compliance program for underwriting and market making requirements, including the internal limits for RENTD. However, in order to be presumed compliant with the RENTD requirements under the exemptions for underwriting and market making-related activities, banking entities are required to establish and enforce limits designed not to exceed RENTD, as well as authorization procedures for limit breaches and increases for each trading desk as described below.

With respect to limit increases and breaches, banking entities are required to maintain and make available upon request records regarding any limit that is exceeded and any temporary or permanent increase to any limit. Unlike the proposal, the final rule does not include the requirement of prompt reporting of breaches or limit increases but requires that banking entities keep and provide such records to the agencies upon request. However, consistent with the requirements under the 2013 rule, the final rule includes certain requirements for the continued availability of the presumption of compliance in the event of limit increases or breaches. Specifically, the presumption of compliance will continue to remain available in the event of a breach or limit increase only if (i) the banking entity takes prompt action to bring the trading desk into compliance; and (ii) establishes and complies with a set of written authorization procedures, including escalation procedures that require review and approval of any trade that exceeds a trading desk's limits, demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limits, and independent review of such demonstrable analysis and approval.

i. Costs and Benefits

This section discusses the expected benefits of the final rule and how regulatory oversight of internal limits may reduce such benefits; potential costs related to deterioration of risk management practices and increased risk exposures of banking entities, including with respect to the removal of the demonstrability requirement; aspects of the final rule and baseline that mitigate these costs; and factors likely to affect the overall balance of these economic effects.

The primary expected benefits of the final rule are threefold. First, the agencies have received comments that the 2013 rule has created significant costs and uncertainty about some banking entities' ability to rely on the exemption for underwriting and market making-related activities,[1011] and the economic baseline discusses existing research on the baseline effects of the 2013 rule on market quality, trading, and client facilitation activities. The SEC believes that the final rule may provide SEC-regulated banking entities with beneficial flexibility and certainty in conducting permissible underwriting and market making-related activities. Second, consistent with commenter views,[1012] the SEC recognizes that banking entities may already routinely establish and monitor internally set risk and position limits for purposes of meeting capital requirements and internal risk management. Thus, to the degree that some banking entities already establish limits that meet the requirements under the final rule, the presumption allows the reliance on internal limits in accordance with a banking entity's risk management function that may already be used to meet other regulatory requirements. Therefore, the amendment may prevent unnecessary duplication of risk-management compliance procedures for the purposes of complying with multiple regulations and may reduce compliance costs for SEC-regulated banking entities. Third, to the extent that the uncertainty and compliance burdens related to the RENTD requirements are currently impeding otherwise profitable permissible underwriting and market making by dealers,[1013] the amendments may increase banking entities' profits and the volume of dealer underwriting and market making activity. The SEC notes that the returns and risks arising from banking entity activity may flow through to investors and that investors in securities markets may benefit from market liquidity as it enables exit from investment positions.

Since the 2013 rule requires oversight of internal limits and authorization policies and procedures related to internal limit increases or breaches, this aspect of the final rule is unlikely to result in new compliance burdens for SEC registrants. In addition, the SEC has received comment that some banking entities may already have escalation and recordkeeping procedures when limits are breached or changed.[1014] The SEC continues to believe that agency oversight of internal limits for the purposes of compliance with the final rule may help support the benefits and costs of the substantive prohibitions of section 13 of the BHC Act. The agencies have also received comment that the amendments may allow the agencies to challenge the limit approval and exception process but not the nexus between RENTD and limits.[1015] As discussed above, sections ____.4(c)(1)(i)–(ii) of the final rule require that such limits must be designed not to exceed RENTD.

In the proposal, the SEC noted that some entities may be able to maintain positions that are larger than RENTD and increase risk exposures arising out of trading activities, thus reducing the economic effects of section 13 of the BHC Act and the 2013 rule. The agencies have received comment that limits may be designed to exceed RENTD and banking entities may frequently exceed limits and that introducing the presumption may lead to a deterioration of risk management practices and increase risk taking by banking entity dealers.[1016] However, as discussed above, under the final rule internal limits need to be tied to RENTD, such that if the banking entity complies with the limits it will not maintain positions that are larger than RENTD. The SEC also notes that breaches and changes to internal limits may reflect banking entities' close

[1011] *See, e.g.,* ABA; Credit Suisse; State Street and BB&T.

[1012] *See* JBA.

[1013] *See* section V.F.2.

[1014] *See* JBA.

[1015] *See, e.g.,* Better Markets.

[1016] *See, e.g.,* Volcker Alliance; Better Markets; NAFCU and Public Citizen.

monitoring of market conditions and tailoring such limits, valuable for both internal risk management and supervision and oversight over banking entities. The agencies have received comment that some banking entities may change the way they set internal limits in response to the final rule, for instance, by selecting higher initial limits to avoid breaches or increases for the purposes of section 13 of the BHC Act.[1017] The SEC recognizes these possible effects from entities changing their internal limit setting practices and notes that this effect may reduce the value of closely tailored and dynamically adjusted internal limits for internal oversight and agency supervision. Moreover, the SEC notes that this effect may lead some banking entities to take on greater trading risks. Nevertheless, to satisfy the presumption of compliance, such trading activity must conducted within risk and position limits designed not to exceed RENTD, and thus be consistent with section 13(d)(1)(B) of the BHC Act. The SEC also notes that the final rule contains recordkeeping obligations concerning any exceeded limits or temporary or permanent increases to limits, which may facilitate agency oversight but impose new burdens on banking entities. As discussed in section V.B, this aspect of the final rule may increase initial burdens[1018] by $8,870[1019] for SEC-registered banking entities and ongoing burdens for SEC-registered broker-dealers by approximately $227,278 per year and for SBSDs by approximately $38,831 per year.[1020]

The final rule also eliminates the requirements of the market making exemption related to the demonstrable analysis of historical customer demand, current inventory of financial instruments, and market and other factors concerning financial instruments in which the trading desk makes a market, including though block trades. Some commenters indicated that this aspect of the amendments gives banking entities greater discretion to establish higher risk and inventory limits in excess of RENTD[1021] and that banking entities should be required to demonstrate the analysis behind their RENTD forecasts and compare ex-ante forecasts with ex-post realizations.[1022] However, the agencies also received comment that RENTD can significantly deviate from historically observed levels, particularly in times of severe market stress, and internal limits designed to not to exceed RENTD may be based on current or forward looking customer inquiries, anticipated volatility shocks, and other forward looking information about market conditions and the evolving risks of a particular desk.[1023] The SEC also notes that, under the final rule, the presumption of compliance requires risk and position limits to be designed not to exceed RENTD and that the agencies may rebut the presumption as discussed above.

Four key aspects of the final rule are aimed at mitigating these risks and costs. First, the internal limits, including any changes to limits, used to establish the presumption of compliance are subject to rebuttal procedures discussed above, and the final rule requires that the internal limits are designed not to exceed RENTD and take into account the liquidity, maturity, and depth of the market for the relevant type of security or financial instrument. Second, the presumption of compliance is conditional on the banking entity's prompt action to bring the trading desk into compliance if a limit is exceeded. Third, banking entities are required to establish and comply with a robust set of internal policies and procedures, requiring review of limits, demonstrable analysis of a basis for any limit increase, and independent review of such analysis and approval. Fourth, the economic effects of the presumption of compliance interact with the effects of the amended trading desk definition, which the SEC believes will allow the agencies to better oversee trading activity across a given banking entity's trading desks and across groups of banking entities to determine whether the internal limits are appropriately designed not to exceed RENTD.

The SEC also notes that the final rule tailors compliance obligations of banking entities for purposes of the exemptions for underwriting and market making-related activities. The economic effects of the final amendments related to compliance are discussed in section V.F.3.g.

The SEC continues to believe that the overall economic effect of these amendments will depend on how banking entities choose to comply with the substantive prohibitions in section 13 of the BHC Act and the 2013 rule as amended. Specifically, banking entities are likely to weigh the unmet demand for and profitability of client facilitation activity against the potential costs of establishing and maintaining appropriate internal limits.[1024] The SEC does not have data on the volume of trading activity that does not occur because of the costs associated with complying with the RENTD requirement or data on the profitability of such trading activity for SEC-regulated banking entities. The SEC is not aware of any such data, and commenters did not provide data enabling such quantification.[1025]

ii. Efficiency, Competition, and Capital Formation

The SEC believes that the final rule may reduce the costs of relying on the exemptions for underwriting and market making-related activities, which may facilitate the activities related to these exemptions. The evolution in market structure in some asset classes (*e.g.,* equities) has transformed the role of traditional dealers vis-à-vis other participants, particularly as it relates to high-frequency trading and electronic platforms. However, dealers continue to play a central role in less liquid markets, such as corporate bond and over-the-counter (OTC) derivatives markets. While it is difficult to establish causality, corporate bond dealers, particularly bank-affiliated dealers, have, on aggregate, significantly reduced their capital commitment post-crisis.[1026] Corporate bond dealers are increasingly shifting from trading in a principal capacity to agency trading. To the extent that this change cannot be explained by enhanced ability of dealers to manage corporate bond inventory, electronic trading, post-crisis changes in dealer risk tolerance and macro factors (effects

[1017] *See, e.g.,* Capital One et al.; Better Markets; and State Street.

[1018] For the purposes of the burden estimates in this release, the SEC is assuming the cost of $423 per hour for an attorney, from SIFMA's ''Management & Professional Earnings in the Securities Industry 2013,'' modified to account for an 1,800-hour work year, multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead, and adjusted for inflation as of June 2019.

[1019] Initial reporting and recordkeeping burdens: 0.5 hours × 0.18 dealer weight × [199 broker-dealers + 34 SBSDs not already registered as broker-dealers] × Attorney at $423 per hour = $8,870.

[1020] Ongoing burdens for broker-dealers: [10 hours recordkeeping + 5 hours reporting] × 0.18 dealer weight × 199 × Attorney at $423 per hour = $227,278.

Ongoing burdens for SBSDs: [10 hours recordkeeping + 5 hours reporting] × 0.18 dealer weight × 34 SBSDs not already registered as broker-dealers × Attorney at $423 per hour = $38,831.

[1021] *See* Volcker Alliance.

[1022] *See* Data Boiler.

[1023] *See, e.g.,* FSF.

[1024] *See, e.g.,* 83 FR at 33532.

[1025] The SEC observes that, as shown in Table 1, broker-dealers affected by the final rule have total assets of approximately $3.14 trillion and holdings of approximately $761.53 billion. If the final amendments increase affected broker-dealer holdings by even 0.01%, the economic impact of the final rule may exceed $100 million.

[1026] *See, e.g.,* FRB's ''Staff Q2 2017 Report on Corporate Bond Market Liquidity.'' *See also* section V.F.2 above.

which themselves need not be fully independent of the effect of section 13 of the BHC Act and the 2013 rule), such effects may point to a reduced supply of liquidity by dealers. Moreover, corporate bond dealers decrease liquidity provision in times of stress after the 2013 rule.[1027] In dealer-centric single-name CDS markets, interdealer trade activity, trade sizes, quoting activity, and quoted spreads for illiquid underliers have deteriorated since 2010, but dealer-customer activity and various trading activity metrics have remained stable.[1028]

Because of the methodological challenges described earlier in this analysis, the SEC cannot quantify potential effects of the 2013 rule in general—and the RENTD, underwriting, and market making provisions of the 2013 rule in particular—on capital formation and market liquidity. The SEC also recognizes, as discussed above, that these provisions may not be currently affecting all securities markets, asset classes, and products uniformly. If, because of uncertainty and the costs of relying on exemptions for market making-related activity and risk-mitigating hedging, dealers currently limit their market making and hedging activity in certain products, the final rule may facilitate market making. Because secondary market liquidity can affect the willingness to invest in primary markets, and access to liquidity in these markets can enable market participants to mitigate undesirable risk exposures, the amendments may increase trading activity and capital formation in some segments of the market.

While section 13 of the BHC Act and the 2013 rule, as amended, prohibit banking entities from engaging in proprietary trading, some trading desks may attempt to use certain elements of the final RENTD amendments to circumvent those restrictions, which may reduce the economic effects of the 2013 rule outlined in the economic baseline. However, under the final rule, internal limits and policies and procedures regarding breaches and limit increases and other aspects of banking entities' compliance with section 13 of the BHC Act remain subject to the full scope of agency oversight and supervision, and the presumption of compliance is rebuttable.

The SEC continues to recognize that proprietary trading by banking entities may increase the risk exposures of banking entities, may give rise to economic inefficiency because of implicitly subsidized risk exposures of banking entities, and may increase market fragility and conflicts of interest between banking entities and their customers.[1029] However, the SEC also recognizes the comments and research discussed above concerning the unintended effects of the 2013 rule on valuable underwriting and market making activities, and the nuanced effects of section 13 of the BHC Act and the 2013 rule on the overall volume and structure of banking entity risk exposures.

The SEC continues to believe that, where the final rule increases the scope of permissible activities or decreases the risk of detection of proprietary trading, its effect on informational efficiency stems from a balance of two effects.[1030] On the one hand, where proprietary trading strategies are based on superior analysis and prediction models, their enhanced ability to trade on such information may make securities markets more informationally efficient. While such proprietary trading strategies can be executed by dealers that are not affiliated with banking entities and therefore unaffected by the prohibitions on proprietary trading, their ability to do so may be constrained by their limited access to capital and a lack of scale needed to profit from such strategies. On the other hand, if superior information is obtained by an entity from its customer-facing activities and as a result of conflicts of interest, and if such conflicts are recognized by other market participants, proprietary trading may make other market participants less willing to transact with banks or participate in securities markets, potentially reducing informational efficiency.

iii. Alternatives: Prompt Notice, Thresholds

The agencies could have adopted a prompt notice requirement for limit breaches and limit changes, such as internal limit increases, for all or a subgroup of banking entities. Prompt notification of breaches and changes to internal limits under the alternative may provide more immediate information to agencies about limit breaches and changes supporting oversight.[1031] The agencies have received comment that such prompt notice may be especially beneficial for the oversight of smaller and mid-size banking entities with less sophisticated internal controls that may be more susceptible to risks from rogue trading.[1032]

However, consistent with the views of a number of commenters,[1033] the SEC believes that the prompt notice requirement would have imposed considerable costs on registrants. Such information may duplicate metrics reporting for Group A entities and other information provided to the agencies in the ordinary course of prudential supervision.[1034] Further, such costs would likely be most significant for Group B and Group C entities that do not engage in significant trading activity and which may face more difficulties absorbing reporting costs,[1035] as well as for non-U.S. banking entities with large non-U.S. operations.[1036] In addition, internal limit increases or breaches may reflect changes in market conditions and not changes in a banking entity strategy or risk tolerance, and smaller and mid-size banks may currently be setting internal limits considerably below RENTD.[1037] Finally, to the degree that market participants may interpret the prompt reporting requirement as an enhanced regulatory focus on the number of times an entity has breached RENTD, traders may become less willing to request limit increases to accommodate customer demand;[1038] alternatively, entities may set higher internal limits to avoid breaches or increases.[1039]

The final rule balances these considerations by imposing recordkeeping requirements that enable the agencies to access books and records concerning internal limit increases and breaches in the course of other supervision, inspections, and examinations; require prompt action to bring the trading desk back in compliance in the event of a breach; and impose requirements concerning policies and procedures for escalation, for demonstrable analysis of the basis for internal limit increases, and for independent review for such analysis and approval.

The agencies could have also adopted the internal limit approach, but with more or less flexibility provided to banking entities in setting internal limits. For example, the agencies could have specified that a desk's internal

[1039] *See, e.g.,* Capital One et al.; Better Markets; MBA and State Street.

limits can reflect risk appetite, risk capacity, and business strategy, so long as that desk holds itself out as a market maker; the agencies could have also permitted limits based on absolute value of profit and loss (in the case of an underwriting desk).[1040] The agencies could have also adopted an approach under which the internal limits necessary for the presumption of compliance are developed in collaboration with onsite supervisors or prudential examiners.[1041] The agencies could have also adopted an approach under which all or Group B and Group C banking entities would be able to rely on the presumption of compliance if their internal limits were appropriate to the activities of the desk subject to other existing bank regulations, supervisory review, and oversight by the appropriate agency.[1042] Finally, the agencies could have adopted an approach under which the presumption of compliance is available for activity-based internal limits, such as those based on notional size and inventory turnover.[1043] Alternatives that would provide banking entities with greater flexibility in setting internal limits would bolster the ability of market makers and underwriters to proactively adjust their risk exposures to changing market conditions and potentially accommodate a greater volume of customer demand. At the same time, such alternatives may also allow banking entities to engage in a greater degree of trading activity while relying on the presumption of compliance.

Similarly, one commenter suggested an approach that more prescriptively specifies how banking entities should set and adjust internal limits and what factors they should consider.[1044] Another commenter stated that such a one-size-fits all approach ignores differences in the business models of banking entities and desks.[1045] The SEC believes that, while this alternative may decrease the trading activity of banking entities, it would not appropriately tailor the 2013 rule to the differences in organization, operation, and risks of various banking entities and their trading desks; may hamper client facilitation activity when market conditions are in flux; and may have the unintended effect of banking entities delegating certain risk management functions to the agencies. As discussed above, the final rule specifies that internal limits must be designed not to exceed RENTD and that internal limits of banking entities are subject to ongoing regulatory oversight by the agencies.

The agencies could have adopted an approach under which underwriting and market making requirements are tailored to banking entities on the basis of different thresholds. For example, the agencies could have instead relied on the trading assets and liabilities threshold for market making compliance (as in the final rule), but applied a different threshold for underwriting compliance, such as on the basis of the volume or profitability of past underwriting activity. This alternative would have tailored the compliance requirements for SEC-regulated banking entities with respect to underwriting activities. However, the volume and profitability of underwriting activity is highly cyclical and is likely to decline in weak macroeconomic conditions. As a result, under the alternative, SEC-regulated banking entities would face lower limits with respect to underwriting activity during times of economic stress when covered trading activity related to underwriting may pose the highest risk of loss. The alternative may also limit banking entities in their ability to engage in underwriting during economic weakness when economic activity and capital formation are in decline.

One commenter suggested that the agencies interpret the underwriting exemption broadly to accommodate any activity that assists persons or entities in accessing the capital markets or raising capital, as well as any activities done in connection with a capital raise.[1046] Under such an approach, an underwriter's hedging of unsold, contingent, or forward underwriting allotments would be permissible under the underwriting exemption. To the degree that banking entities are unable to engage in such activities in reliance on the hedging or other exemptions under the 2013 rule, this alternative may increase the ability of some banking entities to hedge some of the risks related to underwriting and their willingness to engage in underwriting activity. Moreover, a broad underwriting exemption would eliminate the need to categorize the underwritten instruments, which may be difficult to do in some foreign markets with respect to loans, repos, securities loans, financial instruments, or derivatives. At the same time, the SEC believes that banking entities may currently be able to engage in hedging related to underwriting activity under the rule, such as in reliance on the hedging exemption.

d. Permitted Risk-Mitigating Hedging

i. Costs and Benefits

As discussed in the proposal,[1047] hedging is an essential tool for risk mitigation and can enhance a banking entity's provision of client-facing services, such as market making and underwriting, as well as facilitate financial stability. In recognition of the important role that this activity can play as part of a banking entity's overall operations, the agencies are adopting a number of changes that streamline and clarify the 2013 rule's exemption for risk-mitigating hedging activities to reduce unnecessary compliance burdens and uncertainty some banking entities face concerning their ability to rely on the hedging exemption.

First, the final rule simplifies the requirements of the risk-mitigating hedging exemption for banking entities that do not have significant trading assets and liabilities. The amendment removes the requirement to have a specific risk-mitigating hedging compliance program, as well as the documentation requirements and certain hedging activity requirements for such entities. As a result, these banking entities are subject to the following requirements: (1) The hedging activity, at the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof; and (2) the hedging activity is subject, as appropriate, to ongoing recalibration by the banking entity to ensure that the hedging activity satisfies these requirements and is not prohibited proprietary trading.

As discussed in the proposal,[1048] banking entities without significant trading assets and liabilities may be less likely to engage in large or complicated trading activities and hedging strategies. The agencies have received comment supporting such reduced compliance

[1040] *See* JBA.

[1041] *See, e.g.,* FSF and SIFMA.

[1042] *See* Capital One et al.

[1043] *See* BB&T.

[1044] *See* Better Markets.

[1045] *See* Committee on Capital Markets.

[1046] *See, e.g.,* ISDA.

[1047] *See, e.g.,* 83 FR at 33535.

[1048] *See, e.g.,* 83 FR at 33536.

requirements for banking entities that do not have significant trading assets and liabilities.[1049] One commenter stated that reduced compliance requirements for risk-mitigating hedging by Group B and Group C banking entities would not affect the safety and soundness of banking entities or financial stability and pointed to the importance of robust monitoring and banking entity risk management in the context of risk-mitigating hedging.[1050] Another commenter opposed this aspect of the amendments and stated that, absent proprietary trading intent, ensuring that hedging does not increase banking entities' risks at inception of the hedge and that trading personnel are not compensated for doing so is not complex.[1051]

The SEC continues to believe that compliance with the 2013 rule, including compliance with the requirements of § ____.5(b)(2), imposes disproportionate costs on banking entities without significant trading assets and liabilities.[1052] The SEC continues to note that, as quantified in the economic baseline, Group B and Group C broker-dealers represent a very small fraction of total assets and holdings in the broker-dealer industry. In addition, fixed compliance costs represent disproportionately greater burdens for smaller entities as they may face greater difficulty absorbing such costs into revenue. Importantly, the final rule does not waive the substantive proprietary trading prohibitions in section 13 of the BHC Act for any banking entity, including for any Group B or Group C banking entity. Instead, the SEC continues to believe that the amendment reduces the costs of relying on the hedging exemption and, thus, the costs of engaging in hedging activities for Group B and Group C entities. To the extent that the removal of these requirements may reduce the costs of risk-mitigating hedging activity, Group B and Group C entities may increase their intermediation activity while also growing their trading assets and liabilities.

Second, the final rule reduces documentation requirements for Group A entities. In particular, the final rule removes the documentation requirements for some risk-mitigating hedging activity. More specifically, the activity is not subject to the documentation requirement if (1) the financial instrument used for hedging is identified on a written list of pre-approved financial instruments commonly used by the trading desk for the specific type of hedging activity; and (2) at the time the financial instrument is purchased or sold the hedging activity (including the purchase or sale of the financial instrument) complies with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument for hedging activities undertaken for one or more other trading desks.

The agencies received comment that this and other final amendments to the risk-mitigating hedging exemption may lead banking entities to engage in less planning, documentation, and testing in their hedging activities, may reduce the effectiveness of agency oversight, and may weaken the proprietary trading prohibitions of the 2013 rule.[1053] Other commenters supported the revisions, but stated that enhanced documentation requirements for the hedging exemption, as a whole, are unnecessary given the robust compliance framework under the 2013 rule and amendments, and supported the complete elimination of the documentation requirements for all banking entities.[1054]

Consistent with the views of some commenters,[1055] the economic effects with respect to internal limits for the purposes of hedging with pre-approved instruments may be similar to the effects of internal limits for the purposes the underwriting and market making exemptions discussed above. The SEC recognizes that the economic effects of this aspect of the final rule depend on the prevalence of hedging activities in each registrant, their organizational structure, business model, and complexity of risk exposures. However, the SEC continues to believe that the flexibility to choose between providing documentation regarding risk-mitigating hedging transactions and establishing hedging limits for pre-approved instruments may be beneficial for Group A entities, as it will allow these entities to tailor their compliance programs to their specific organizational structure and existing policies and procedures.[1056] At the same time, the SEC believes that the remaining documentation requirements for Group A entities being adopted will facilitate effective internal risk management and agency oversight.

Third, the final rule eliminates the requirement that the risk-mitigating hedging activity must demonstrably reduce or otherwise significantly mitigate one or more specific identifiable risks at the inception of the hedge. Additionally, the demonstrability requirement is also removed from the requirement to continually review, monitor, and manage the banking entity's existing hedging activity. Banking entities will continue to be subject to the requirement that the risk-mitigating hedging activity be designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, as well as to the requirement that the hedging activity be subject to continuing review, monitoring and management by the banking entity to confirm that such activity is designed to reduce or otherwise significantly mitigate the specific, identifiable risks that develop over time from the risk-mitigating hedging.

Consistent with the views of a number of commenters,[1057] the SEC believes that the removal of the demonstrability requirement may benefit banking entity dealers, as it decreases uncertainty about the ability to rely on the risk-mitigating hedging exemption and may reduce the compliance costs of engaging in permitted hedging activities. The SEC continues to recognize that some SEC-regulated banking entities may respond to this aspect of the final rule by accumulating positions that increase the banking entity's risk exposure through adjustments (or lack thereof) to otherwise permissible hedging portfolios.[1058] The SEC also recognizes concerns raised by commenters that some banking entities may forecast changes in correlations and construct hedging portfolios such that they leave the entity exposed to directional market movements.[1059] The SEC continues to recognize that this may result in increased risks from the trading activity of some banking entities.[1060] However, the final rule's requirement concerning ongoing recalibration may mitigate these adverse effects. In addition, as discussed in greater detail in the economic baseline, the SEC recognizes that trading activity is only one form of activity conducted by banking entities that can increase risk exposure, and that market, credit, and liquidity risks of the banking book as well as the degree to which banking book risks are hedged by tradeable assets all contribute to the overall risk of a banking entity or group of banking entities. As a result, the SEC

[1059] *See, e.g.,* Public Citizen.

[1060] *See, e.g.,* 83 FR at 33536.

recognizes that, to the degree that some banking entities may respond to the final rule by increasing risk exposures arising out of trading activity, these effects may be partly offset by changes in the risks these banking entities take in the normal course of their banking activity or more complete hedging of their banking and trading risks through trading portfolios. Moreover, the SEC believes that this aspect of the final rules may not only benefit banking entities by alleviating compliance burdens related to risk management, but may also benefit clients and counterparties by enabling greater trading activity and liquidity provision by dealers that are banking entities. Furthermore, the SEC reiterates that the returns and risks arising from the activity of banking entities may flow through to banking entity's investors and that investors in securities markets may benefit from greater liquidity as it enables exit from investment positions.

Finally, the final rule removes the requirement to perform the correlation analysis. The SEC continues to recognize that a correlation analysis based on returns may be prohibitively complex for some asset classes and that a correlation coefficient may not always serve as a meaningful or predictive risk metric.[1061] The agencies received comment that permitting additional time to provide correlation analysis would better address time-related challenges;[1062] that requiring statistical tests of randomness to the observed returns on the hedged positions may serve to duly constrain hedging;[1063] and that there should be no regulation-related delays when hedging if banking entities rely on documented and stable risk relationships.[1064] The SEC notes that time costs are only one of the issues in the correlation requirement and that banking entities may not be able to rely on documented and stable risk relationships in quickly evolving market conditions. Although in some instances correlation analysis of past returns may be helpful in evaluating whether a hedging transaction was effective in offsetting the risks intended to be mitigated, the SEC continues to recognize that correlation analysis may not be an effective tool for such evaluation in other instances. For example, correlations across assets and asset classes evolve over time and may exhibit jumps at times of idiosyncratic or systematic stress. In such circumstances, historical correlations among the returns on assets or asset classes may not be representative of the way in which they will affect portfolio risk going forward. Moreover, the SEC notes that asset return correlations may not be informative when financial instruments are traded infrequently, if the prices used to construct asset returns are non-binding indicative quotes (and not actual execution prices). Additionally, the hedging activity, even if properly designed to reduce risk, may not be practicable if costly delays or compliance complexities result from a requirement to undertake a correlation analysis.[1065] These costs and delays may be most acute in times of market stress and during spikes in volatility, during which customers and other dealers may demand greater liquidity. The SEC continues to believe that the removal of the correlation analysis requirement may provide dealers with greater flexibility in selecting and executing risk-mitigating hedging activities.[1066]

The SEC received comments that the elimination of the correlation analysis may impede supervisory review, enable some banking entities to disguise proprietary trades as hedges, or result in permissible over- or under-hedging due to changes in asset correlations over time.[1067] Other commenters indicated that correlation analysis is highly automated and forces banking entities to be more purposeful in hedging activities.[1068] The SEC recognizes these concerns and continues to recognize that the removal of the correlation analysis requirement involves the tensions of the effects discussed above.[1069] The SEC continues to recognize that, to the extent that some banking entities may respond to this aspect of the final rule by engaging in more trading activities that leave them exposed to directional market movements while relying on the risk-mitigating hedging exemption, this aspect of the final rule may increase risk taking and conflicts of interest between banking entities and their customers. However, the SEC believes that the final rule's requirement concerning ongoing recalibration by the banking entity to ensure that the hedging activity satisfies the requirements above and is not prohibited proprietary trading may mitigate these concerns. In addition, similar to the discussion above, the SEC continues to recognize that changes in the overall risk of banking entities reflect both changes in the risk of trading activities and their banking activities. Importantly, the SEC continues to believe that the requirement to engage in correlation analysis may have slowed the timing of hedging activities by some banking entities and may not be beneficial for prudent risk management or practical under some circumstances. Moreover, the SEC continues to believe that potential increases in permitted risk-mitigating hedging may benefit clients, customers, and counterparties by increasing trading activity and capital formation by banking entities, particularly in times of market stress and during spikes in volatility. Finally, under the final rule, banking entities remain subject to the full scope of agency oversight over trading activities in reliance on the hedging exemption.

As discussed above, the SEC estimates burden reductions, per firm, as a result of the final rule. The final amendments to § ____.5(c) may result in ongoing cost savings for SEC-registered broker-dealers[1070] estimated at $1,295,903.[1071] Additionally, the final rule will result in lower ongoing costs for potential SBSD registrants relative to the costs that they would incur under the 2013 rule's regime if they were to choose to register with the SEC—this cost reduction is estimated to reach up to $51,775.[1072] However, the SEC recognizes that compliance with SBSD registration

[1069] *See* 83 FR at 33536.

[1070] The SEC continues to believe that the burden reduction for SEC-regulated entities will be a fraction of the burden reduction for the holding company as a whole. In the proposal, the SEC attributed 18% of the reductions in holding company (parent) burdens to the dealer affiliates, on the basis of the average weight of broker-dealer assets in holding company assets. The SEC received no comment on this estimate and continues to rely on this figure in estimates of compliance burden reductions for SEC registrants. However, the SEC recognizes that compliance burdens may be borne disproportionately by dealer affiliates because of their role in trading for the holding company. As a result, some dealers may currently be bearing a larger fraction of holding company compliance burdens related to section 13 of the BHC Act. To this extent, the estimates of compliance burden savings may underestimate the magnitude of the benefits enjoyed by SEC registrants under the final amendments.

[1071] Ongoing recordkeeping burden reduction for broker-dealers: (100 hours per firm × 0.18 weight × (Attorney at $423 per hour) × 199 firms) − (80 hours per firm × 0.18 weight × (Attorney at $423 per hour) × 36 firms affiliated with Group A entities) = $1,515,186 − $219,283 = $1,295,903.

[1072] Recordkeeping burden reduction for entities that may register as SBSDs: (100–80) hours per firm × 0.18 weight × (Attorney at $423 per hour) × 34 SBSDs not already registered as broker-dealers = $51,775. This estimate assumes all SBSDs are Group A entities and will still be subject to these ongoing recordkeeping obligations.

requirements is not yet required and that there are currently no registered SBSDs.

ii. Efficiency, Competition, and Capital Formation

The primary efficiency, competition, and capital formation effects of the risk-mitigating hedging amendments stem from competition and capital formation. The final hedging amendments provide greater relief with respect to the requirements of the exemption for hedging activity to Group B and Group C entities relative to Group A entities. Since the fixed costs of relying on such exemptions may be more significant for entities with smaller trading books, the final hedging amendments may permit Group B entities just below the $20 billion threshold to more effectively compete with Group A entities just above the threshold.

The final hedging amendments may also influence the volume of hedging activity and capital formation. To the extent that some registrants currently experience significant compliance costs related to the hedging exemption, these costs may constrain the amount of risk-mitigating hedging they currently engage in. The ability to hedge underlying risks at a low cost can facilitate the willingness of SEC-regulated entities to commit capital and take on underlying risk exposures. Because the final rule may reduce costs of relying on the hedging exemption, these entities may become more incentivized to engage in risk-mitigating hedging activity, which may in turn contribute to greater capital formation.

These amendments to risk-mitigating hedging do not change the amount or type of information available to market participants, and the SEC does not believe that the final rule is likely to have an effect on informational efficiency. To the degree that these amendments may enable some banking entities to more easily rely on the hedging exemption, and to the extent that hedging supports extension of credit and other capital formation, these amendments may somewhat improve allocative efficiency.

iii. Alternatives

The agencies could have adopted an approach that would exclude from the proprietary trading prohibition or allow all or a subset of banking entities (such as Group B and Group C entities) to rely on the presumption of compliance with respect to hedging activity accounted for under hedge accounting principles.[1073] The agencies could have also adopted an approach excluding trading activity of non-U.S. banking entities accounted for under hedge accounting rules in their home jurisdictions.[1074] The SEC believes that such alternatives would effectively replace the compliance and documentation obligations for permitted risk-mitigating hedging in the 2013 rule as amended in this final rule with the compliance obligations necessary for an entity to qualify for hedge accounting treatment. For example, banking entities must generally document the hedge relationship, including hedge objectives, risks being hedged, hedged item and the financial instrument used in the hedge, demonstrate that the hedge is highly effective, and recognize any ineffectiveness in profits and losses.[1075] As a result, some commenters[1076] indicated that such approaches may reduce compliance duplication and further reduce uncertainty regarding the ability of some banking entities to rely on the risk-mitigating hedging exemption with respect to certain hedging transactions.

However, the SEC also recognizes commenter concerns that the compliance and effectiveness testing for the purposes of hedge accounting are designed for the purposes of transparent and informative financial statements and are not designed to distinguish between prohibited proprietary trading and permissible risk-mitigating hedging for the purposes of section 13 of the BHC Act.[1077] Moreover, international accounting standards may not involve the same level of compliance, documentation, and effectiveness testing as either the U.S. hedge accounting standards or the compliance program for the hedging exemption of the 2013 rule. As a result, the SEC continues to believe that the final rule implements the purposes of section 13 of the BHC Act while reducing compliance burdens on most affected registrants.

As another alternative, the agencies could have adopted an approach, under which compliance with the risk-mitigating hedging exemption is applied on the basis of analysis of the trading desk's activities as a whole and not on a trade-by-trade basis.[1078] In a related vein, the agencies could have adopted an approach that allows portfolio hedging that is not contemporaneous with the inception of the position being hedged and that does not occur at the desk to which the risk is booked, so long as the hedging exposure remains within permitted internal limits applicable to each desk and to the banking entity as a whole.[1079] The SEC believes that such alternatives would have the effect of enabling firm-wide macro hedges of a banking entity's risk exposures by centralized risk management desks, which may involve fewer transaction costs and reduce the burden of demonstrating compliance with the hedging exemption for each trade. However, such an approach may make it more difficult for the agencies and banking entities to oversee compliance with the hedging exemption and distinguish between transactions reasonably designed at their inception to hedge specific risks and impermissible proprietary trades intended to profit from asset mispricing or directional changes in the value of assets or asset classes.

As discussed above, the agencies could have also eliminated all enhanced documentation requirements for Group A banking entities and all other conditions of the hedging exemption not expressly required by the statute.[1080] The SEC believes that, relative to the final rule, such an alternative would further reduce compliance burdens on Group A banking entities and uncertainty regarding their ability to rely on the hedging exemption and may increase the volume of risk-mitigating hedging by Group A banking entities. However, the elimination of enhanced documentation requirements as a whole and other conditions of the exemption may also reduce the effectiveness of internal risk management and agency oversight of Group A entities and may result in increased trading activity by Group A entities in reliance on the hedging exemption. This risk may be particularly acute given the size and complexity of trading activity of Group A entities and their role in the dealer industry and in the U.S. financial system as a whole.

The agencies could have adopted an explicit exclusion from the proprietary trading prohibition for hedges of corporate debt issuances. Specifically, the agencies have received comment that financial institutions may routinely hedge debt securities issued for corporate purposes with interest rate swaps, which fall into the trading account under the 60-day rebuttable

presumption of the 2013 rule.[1081] As discussed above, the final rule modifies the short-term prong of the trading account definition, reducing the likelihood that such activity would fall in to the trading account and require the reliance on the hedging exemption. As a result, the SEC believes that the final rule may enable valuable and routine hedging of corporate debt issued by banking entities subject to the short-term prong without the costs of complying with the risk-mitigating hedging exemption.

e. Exemption for Foreign Trading

i. Costs and Benefits

Foreign banking entities seeking to rely on the exemption for trading outside of the United States under the 2013 rule face a complex set of compliance requirements that may result in significant burdens and implementation inefficiencies, which may have reduced cross-border trading activity and liquidity between U.S. and non-U.S. entities.[1082] In particular, agencies have received comment from some market participants that compliance with the financing prong may be difficult for some non-U.S. banking entities because of the fungibility of some forms of financing.[1083] In addition, the SEC continues to recognize that satisfying the U.S counterparty prong is burdensome for foreign banking entities and may have led some foreign banking entities to reduce the range of counterparties with which they engage in trading activity.[1084] The final rule removes the financing and counterparty prongs.

Under the final rule, financing for a transaction relying on the foreign trading exemption can be provided by U.S. branches or affiliates of foreign banking entities, including U.S. branches or affiliates that are SEC-registered dealers. Foreign banking entities may benefit from the final rule because of the greater flexibility afforded to how they are permitted to finance their transaction activity in reliance on the foreign trading exemption. The agencies have also received comment supporting the focus of the exemption on the location of the principal risk and the location in which decision making behind the trading occurs.[1085] At the same time, the agencies have received comment that the proposed amendments to the exemption may increase the vulnerability of the U.S. financial system to proprietary trading losses of foreign banking entities.[1086] However, for the reasons noted below, the SEC does not believe that the amendments will, on balance, increase vulnerability in the manner described by commenters. Specifically, the SEC continues to recognize that some of the economic exposure and risks of proprietary trading by foreign banking entities may flow not just to the foreign banking entities, but to U.S.-located entities financing the transactions, *e.g.,* through margin loans.[1087] However, potential adverse effects on vulnerability may be mitigated by two primary factors. First, the SEC notes that the final rule retains the condition that any purchases or sales by a foreign banking entity, including any hedging trades, are not accounted for as principal directly or on a consolidated basis by any U.S. branch or affiliate of the foreign banking entity. Thus, under the final rule, the principal risk of proprietary trading by non-U.S. banking entities will remain outside of the United States. Moreover, U.S. banking entities providing financing to their foreign banking entity affiliates are likely to be separately subject to a full range of capital, margin, and other obligations unrelated to section 13 of the BHC Act, which may reduce risks to the U.S. branches and affiliates of foreign banking entities. The SEC believes that the focus on where the principal risk and decision making behind the trading resides tailors the application of the 2013 rule with respect to foreign banks' non-U.S. operations by reducing compliance burdens and uncertainties of foreign banking entities in their trading activity.[1088]

In addition, the final rule removes the counterparty prong and its corresponding clearing and anonymous exchange and personnel requirements. As a result, the final rule makes it easier for foreign banking entities to transact with or through U.S. counterparties. To the extent that foreign banking entities are currently bearing[1089] and passing along compliance burdens to their U.S. counterparties, or are unwilling to intermediate or engage in certain transactions with or through U.S. counterparties, the final rule may reduce transaction costs for U.S. counterparties and may increase the volume of trading activity between U.S. counterparties and foreign banking entities.[1090]

The SEC recognizes that this aspect of the final rule may adversely affect the current competitive standing of U.S. banking entities insofar as foreign banking entities will have greater ability to engage in proprietary trading activities with U.S. counterparties.[1091] However, the removal of the counterparty prong in the final rule maintains a comparable treatment of the U.S. operations of U.S. and non-U.S. banking entities with respect to the transactions that are booked in the U.S., as neither U.S. nor non-U.S. banking entities are able to rely on the foreign trading exemption for such activity.[1092] The agencies have also received comment that the elimination of clearing and exchange requirements may enable U.S. intermediaries to compete for business in OTC financial products with foreign banking entity counterparties, and that the amendments may foster trading activity between foreign affiliates and branches of U.S. banking entities and foreign banking entities without the constraints under the counterparty prong on the involvement of their U.S. personnel.[1093]

When a foreign banking entity engages in proprietary trading through a U.S. dealer, such trades expose the counterparty to risks related to the transaction, though such risks born by U.S. counterparties likely depend on both the identity of the counterparty and the nature of the instrument and terms of trading position. Moreover, the SEC continues to emphasize that concerns about moral hazard and the volume of risk-taking by foreign banking entities may be less relevant for U.S. markets for two reasons.[1094] First, foreign banking entities are less likely to be beneficiaries of U.S. deposit insurance and implicit bailout guarantees. Second, foreign banking entities are likely subject to foreign

[1087] *Id.*

[1088] In addition, the agencies confirmed in this **SUPPLEMENTARY INFORMATION** that the foreign trading exemption does not preclude a foreign banking entity from engaging a non-affiliated U.S. investment adviser as long as the actions and decisions of the banking entity as principal occur outside of the United States. To the extent that foreign banking entities were restricting engagement of non-affiliated U.S. investment advisers due to uncertainty about the 2013 rule, non-affiliated U.S. investment advisers may become better able to compete for the foreign banking entity's investment mandates.

securities and prudential regulations that address these concerns.

In addition, as proposed, the final rule replaces references to personnel arranging, negotiating, and executing trades with references to relevant personnel. This change is consistent with the views of some commenters, who stated that the current arrange, negotiate, or execute test is burdensome and may restrain trading activity outside of the U.S.[1095] Specifically, the availability of the foreign trading exemption is amended to be conditioned on the banking entity engaging as a principal (including relevant personnel) not being located in the U.S. or organized under U.S. laws. As discussed elsewhere in this **SUPPLEMENTARY INFORMATION**, the agencies are modifying the rule such that relevant personnel for the purposes of the foreign trading exemption are limited to personnel engaged in the banking entity's decision in the purchase or sale as principal. The SEC believes that the location of the personnel engaged in the banking entity's decision in the purchase or sale is a meaningful trigger for the application of section 13 of the BHC Act and implementing rules. Specifically, the SEC has considered how narrowing the personnel requirement may increase risk exposure of banking entities from trading activity and conflicts of interest between banking entities and their clients on the one hand and may enhance market quality and availability of trading counterparties on the other hand. In addition, as part of the baseline for analysis, the conditions for the foreign trading exemption in the 2013 rule include both requirements concerning relevant personnel that makes the decision to purchase or sell as principal and requirements concerning personnel involved in arranging, negotiating, and executing trades. As a result, under the 2013 rule foreign banking entities have to determine whether a particular employee meets both the requirements related to relevant personnel and related to personnel arranging, negotiating, and executing purchases and sales. This aspect of the final rule eliminates the need for a foreign banking entity to separately establish that a given employee meets both sets of requirements, reducing inefficiencies associated with foreign banking entities relying on the foreign trading exemption from the proprietary trading prohibition.

ii. Efficiency, Competition, and Capital Formation

The final rule likely expands the scope of trading activity by foreign banking entities that may qualify for the foreign trading exemption. As a result, the amendments may reduce the costs, benefits, and effects on efficiency and capital formation of the 2013 rule discussed in the economic baseline, and may increase competition between U.S. and foreign banking entities. The final rule reflects consideration of the potentially inefficient restructuring of activities undertaken by foreign banking entities after the 2013 rule came into effect and the loss of access of U.S. market participants to foreign banking entity counterparties, on the one hand,[1096] and, advancement of the objectives of section 13 of the BHC Act, on the other hand.

Allowing foreign banking entities to be financed by U.S.-dealer affiliates and to transact with U.S. counterparties on an OTC basis (*i.e.,* off-exchange) and without clearing the trades, may reduce costs of non-U.S. banking entities' trading activity under the foreign trading exemption, including with U.S. counterparties. These costs may currently represent barriers to entry for foreign banking entities that contemplate engaging in trading and other transaction activity using a U.S. affiliate's financing and OTC trading with U.S. counterparties. To that extent, the final rule may provide (1) incentives for foreign banking entities that currently receive financing from non-U.S. affiliates or other sources to move financing to U.S. dealer affiliates, and (2) incentives for foreign banking entities that currently do not transact with or through U.S. counterparties (or transact with or through U.S. counterparties only in transactions that are promptly cleared) to transact with or through U.S. counterparties (or transact with or through U.S. counterparties outside of promptly cleared transactions). As a result, the number of banking entities engaging in trading activities in U.S. markets may increase, which may enhance the incorporation of new information into prices. However, the amendments may result in a shift in securities trading activity away from U.S. banking entities to foreign banking entities that are not comparably regulated.

The final rule may increase market entry, as it will decrease the need for foreign banking entities to rely on a narrower set of unaffiliated market intermediaries in order to conduct trading activity under the foreign trading exemption in compliance with the 2013 rule. Additionally, the final rule may increase operational efficiency of trading activity by foreign banking entities in the United States, which may decrease costs to market participants and may increase the level of market participation by U.S-dealer affiliates of foreign banking entities.

Consistent with the views of commenters,[1097] the SEC continues to recognize that the final rule may also affect competition among banking entities.[1098] The statute may introduce competitive disparities between U.S. and foreign banking entities. Under the final rule, foreign banking entities may enjoy a greater degree of flexibility in financing proprietary trading and transacting with or through U.S. counterparties relative to the baseline. At the same time, U.S. banking entities are not able to engage in proprietary trading and are subject to the substantive prohibitions of section 13 of the BHC Act. One commenter indicated that non-U.S. banking entities will continue to bear operational burdens because of the legal entity requirements.[1099] To the degree that the final requirements regarding the location of the principal risk and relevant personnel are still burdensome and constraining foreign banking entities in their reliance on the foreign trading exemption, this may partly dampen the above competitive effect. To the extent that banking entities at the holding company level may be able to reorganize and move their business to a foreign jurisdiction, some U.S. banking entity holding companies may exit from the U.S. regulatory regime. However, under sections 4(c)(9) and 4(c)(13) of the Banking Act, U.S. entities would have to conduct the majority of their business outside of the United States to become eligible for the exemption, reducing potential effects of their activities on U.S. markets. In addition, certain changes in control of banks and bank holding companies require supervisory approval. Hence, the feasibility and magnitude of such regulatory arbitrage remain unclear. The SEC also notes that, as referenced above, the final rule preserves equal competitive treatment of the U.S. operations of both U.S. and

[1095] *See, e.g.,* EBF; HSBC and IIB.

[1096] In the Proposing Release, the SEC noted that, according to one market participant, at least seven international banks have terminated or transferred existing transactions with U.S. counterparties in order to comply with the foreign trading exemption and to avoid compliance costs of relying on alternative exemptions or exclusions. *See* 83 FR at 33537.

[1097] *See, e.g.,* Bean; Data Boiler; FSF and Better Markets.

[1098] *See* 83 FR at 33538.

[1099] *See, e.g.,* JBA.

non-U.S. banking entities that will remain unable to rely on the foreign trading exemption and will remain subject to section 13 of the BHC Act.[1100]

To the extent that foreign banking entities currently engage in cleared transactions with or through U.S. counterparties because of the existing counterparty prong but would have chosen not to do so otherwise, the final rule may reduce the amount of cleared transactions. This may reduce opportunities for risk-sharing among market participants and increase idiosyncratic counterparty risk born by U.S. and foreign counterparties.

At the same time, the final rule may increase the availability of liquidity and reduce transaction costs for market participants seeking to trade in U.S. securities markets. To the extent that non-U.S. banking entities will face lower costs of transacting with U.S. counterparties, it may become easier for U.S. banking entities or customers to find a transaction counterparty willing to engage in, for instance, hedging transactions. To that extent, U.S. market participants accessing securities markets to hedge financial and commercial risks may increase their hedging activity and assume a more efficient amount of risk. The potential consequences of relocation of non-U.S. banking entity activity to the United States for liquidity and risk-sharing may be most concentrated in those asset classes and market segments where activity is most constrained by the requirements in the 2013 rule.

iii. Alternatives

The agencies could have amended the foreign trading exemption to remove all conditions for the exemption, including the engaging as principal and decision-making requirements, except for the booking requirement.[1101] Relative to the final rule, the SEC believes that such an alternative approach would further lower the compliance burdens of non-U.S. banking entities relying on the foreign trading exemption and may foster more trading activity by U.S. affiliates of non-U.S. banking entities. For example, the agencies have received comment that the engaging as principal and decision-making requirements have led Japanese firms to downsize their U.S. affiliates and that the decision-making requirement is operationally difficult for Japanese banks executing trades in U.S. markets because of time zone differences. [1102] To the degree that this alternative encourages more activity of non-U.S. banking entities in the United States, U.S. counterparties may benefit from greater availability and choice of banking entity counterparties. However, the alternative would place U.S. banking entities at a greater competitive disadvantage relative to the final rule, because it would result in more flexibility for the U.S. operations of non-U.S. banking entities to engage in trading activities relative to the U.S. operations of U.S. banking entities.

In addition, the agencies have received comment suggesting an exclusion of non-U.S. banking entities with limited U.S. assets and operations from the scope of section 13 of the BHC Act.[1103] The SEC notes that nothing in the final rule changes or waives ongoing statutory obligations of banking entities. However, to the degree that reliance on the foreign trading exemption is burdensome and prevents non-U.S. entities from trading in the United States, the final rule may reduce compliance burdens related to the 2013 rule by introducing the presumption of compliance for Group C banking entities. As discussed above, the Group C threshold of $1 billion applies to the trading assets and liabilities of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States). As a result, under the final rule, non-U.S. banking entities that have limited trading assets and liabilities in the United States will be able to avail themselves of the rebuttable presumption of compliance and will no longer be required to bear the fixed costs and burdens of demonstrating compliance with section 13 of the BHC Act and the 2013 rule.

f. Covered Funds

The agencies are adopting amendments to § ____.11 and § ____.13, as proposed.

i. Costs and Benefits

First, the final rule removes the requirement in § ____.11(c)(3) of the 2013 rule that a banking entity include, for purposes of the aggregate fund limit and capital deduction, the value of any ownership interests of a third-party covered fund (*i.e.,* a covered fund that the banking entity does not advise or organize and offer pursuant to § ____.11 of the 2013 rule) acquired or retained in accordance with the underwriting or market making exemptions in § ____.4. In addition, the final rule removes the guarantee language in § ____.11(c)(2) of the 2013 rule which requires a banking entity to include, for purposes of the aggregate fund limit and capital deduction, the value of any ownership interests of a covered fund, the obligations or performance of which is directly or indirectly guaranteed, assumed, or insured by the banking entity.

The final amendments aim to more closely align the requirements for engaging in underwriting or market making-related activities with respect to ownership interests in covered funds with the requirements for engaging in these activities with respect to other financial instruments. The SEC agrees with a number of commenters [1104] and continues to believe that the 2013 rule imposed requirements on dealers' transactions in ownership interests in covered funds that may limit the ability of dealers to underwrite and make markets in ownership interests in covered funds, even if dealers are able to underwrite and make markets in the underlying securities owned by covered funds or in securities that are otherwise similar to ownership interests in covered funds. The SEC continues to believe that, as also articulated by a number of commenters,[1105] the final amendments provide banking entities with greater flexibility in underwriting and market making ownership interests in covered funds.

In addition, the SEC continues to recognize that the 2013 rule's restrictions on underwriting and market making-related activities involving ownership interests in covered funds impose costs on banking entities, as also discussed by a number of commenters.[1106] Under the final rule, banking entities are able to engage in potentially profitable market making and underwriting in ownership interests in covered funds that they do not advise or organize or offer without the value of any ownership interests of the covered fund acquired or retained in connection with underwriting or market making-related activities becoming subject to aggregate limits and capital deduction. Some commenters noted that this amendment would facilitate capital-raising activities of covered funds,[1107] increase liquidity, and generally benefit the marketplace.[1108] The SEC agrees with these commenters and continues to believe that SEC-regulated banking

[1100] *See, e.g.,* IIB.

[1102] *Id.*

[1103] *See* IIB.

[1104] *See, e.g.,* SIFMA.

[1105] *See, e.g.,* SIFMA and ISDA.

[1106] *See, e.g.,* BPI; IIB; SIFMA; ABA and Goldman Sachs.

[1107] *See* SIFMA.

[1108] *See* ISDA.

entities will benefit from this amendment to the extent that they engage in underwriting and market making activities involving ownership interests in covered funds, or to the extent that they restricted or eliminated such activities as a result of the requirements in the 2013 rule. These benefits may also, at least partially, flow to funds and investors in those covered funds. In addition, as some commenters pointed out,[1109] banking entities may become more willing and able to underwrite and make markets in ownership interests in covered funds.

Some commenters indicated that these amendments would greatly increase banking entities' exposure to interests in covered funds, which would entail additional risks.[1110] For example, the removal of the guarantee language in § ____.11(c)(2) would allow dealers to have arrangements such as a put option on the ownership interest in the covered fund, which could expose the banking entity to additional risk. The SEC continues to recognize that ownership interests in covered funds expose banking entities to the risks related to covered funds. The SEC agrees with the commenters that it is possible that covered fund ownership interests acquired or retained by a banking entity acting as an underwriter or engaged in market making-related activities may lead to losses for banking entities.[1111] However, the SEC also continues to recognize that the risks of market making or underwriting of ownership interests in covered funds are substantively similar to the risks of market making or underwriting of otherwise comparable financial instruments, the activity which is expressly permitted by section 13 of the BHC Act. Therefore, the same general tensions discussed in section V.F.3.c of this **SUPPLEMENTARY INFORMATION** between potential benefits for capital formation and liquidity and potential costs related to banking entity risk exposures and market fragility apply to banking entities' underwriting and market making activities involving ownership interests in covered funds and other types of securities.

Second, the final rule amends section § ____.13(a) of the 2013 rule to expand the scope of permissible risk-mitigating hedging activities involving ownership interests in covered funds, and to remove the demonstrability requirement of the risk-mitigating hedging exemption for covered funds activities, in each case as proposed.[1112] Under the final rule, in addition to being able to acquire or retain an ownership interest in a covered fund as a risk-mitigating hedge with respect to certain employee compensation agreements as permitted under the 2013 rule, the banking entity will be able to acquire or retain an ownership interest in a covered fund when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund. Some commenters stated that acquiring or retaining ownership interests in covered funds as a hedge when acting as intermediary on behalf of a customer accommodates client facilitation and related risk management activities.[1113] The SEC agrees with those commenters and continues to recognize that the 2013 rule's restrictions on risk-mitigating hedging activities with respect to ownership interests in covered funds limit banking entities' ability to hedge the risks of fund-linked derivatives through ownership interests in the covered funds referenced by those derivatives. In addition, in the proposal the SEC recognized that, as a result of the approach in the 2013 rule, banking entities may not be able to participate in offering certain customer facilitating products related to covered funds.[1114] The final rule is likely to benefit banking entities and their customers, as well as bank-affiliated advisers of covered funds, as the final rule increases the ability of banking entities to facilitate customer-facing transactions while hedging banking entities' own risk exposure.[1115] As a result, this amendment may increase banking entity intermediation and provide customers with more efficient access to the risks and returns of covered funds. To the degree that banking entities' acquisition or retention of ownership interests in covered funds to hedge customer-facing transactions may facilitate banking entities' engagement in customer-facing transactions, customers of banking entities may benefit from greater availability of financial instruments providing exposure to covered funds and related intermediation. Banking entities' ability to hedge customer-facing transactions through the acquisition or retention of ownership interests in covered funds may be particularly valuable as private capital plays an increasingly important role in U.S. capital markets and firm financing.

The SEC recognizes that, under certain circumstances, an increased ability of banking entities to acquire or retain ownership interests in covered funds in connection with risk-mitigating hedging activities may result in banking entities' exposure to greater risk.[1116] Some commenters supported this view.[1117] The SEC continues to recognize that banking entities' transactions in fund-linked products that reference covered funds with customers can expose a banking entity to risk in cases where a customer fails to perform, transforming the banking entity's covered fund hedge of the customer trade into an unhedged, and potentially illiquid, position in the covered fund (unless and until the banking entity takes action to hedge this exposure and bears the corresponding costs of hedging). However, the SEC also continues to recognize that such counterparty default risk is present in any principal transaction in illiquid financial instruments, including when facilitating customer trades in the securities in which covered funds invest, as well as in market making and underwriting activities. Commenters also recognized this.[1118] The SEC continues to note that, under the final rule, risk-mitigating hedging transactions involving covered funds must be conducted consistent with the other requirements of the 2013 rule, including the requirements with respect to risk-mitigating hedging transactions. For example, such transactions must be made in accordance with the banking entity's written policies, procedures, and internal controls; not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously with the risk-mitigating hedging requirements; and be subject to continuing review, monitoring, and management by the banking entity. Therefore, the SEC continues to believe that hedging and customer facilitation in ownership interests in covered funds does not necessarily pose a greater risk to banking entities than hedging or customer facilitation in similar financial instruments that is permissible under the 2013 rule.

Third, the final rule amends section § ____.13(b)(4) of the 2013 rule to remove the financing prong of the foreign fund exemption and formally incorporates existing staff guidance regarding the marketing of ownership

interests in foreign funds to U.S. residents into section § ____.13(b)(3).[1119] Under the final rule, a foreign banking entity is able to acquire or retain ownership interests in and sponsor covered funds with financing for the banking entity's ownership or sponsorship provided, directly or indirectly, by branches or affiliates of the banking entity, including SEC-regulated dealers, that are located in the United States or organized under the laws of the United States or any state. The costs, benefits, and effects on efficiency, competition, and capital formation of this amendment generally parallel those of the removal of the financing prong with respect to trading activity outside of the United States in section V.F.3.e of this **SUPPLEMENTARY INFORMATION.**[1120]

In light of commenters' responses,[1121] the SEC continues to believe that foreign banking entities may benefit from the final rule and enjoy greater flexibility in financing their covered fund activity. In addition, allowing foreign banking entities to obtain financing of covered fund transactions from U.S.-dealer affiliates may reduce costs to foreign banking entities as the amendment may decrease their need to rely on foreign dealer affiliates solely for the purposes of avoiding the compliance costs and prohibitions of the 2013 rule. This may increase the operational efficiency of covered fund activity by foreign banking entities outside the United States.

Other commenters indicated that elimination of the financing prong could result in a U.S. branch or affiliate that extends financing to bear some risks.[1122] The SEC agrees with the commenters and continues to recognize that the economic exposure and risks of foreign banking entities' covered funds activities may be incurred not just by the foreign banking entities, but by U.S. entities financing the covered fund ownership interests, *e.g.,* through margin loans covering particular transactions. However, the SEC also continues to note that the final rule retains the 2013 rule's requirement that the investment or sponsorship, including any related hedging, is not accounted for as principal by any U.S. branch or affiliate.[1123] The SEC continues to believe that concerns about the size of U.S. banking entity risk exposures are less relevant when the covered fund activity is conducted by, and the risk consolidates to, foreign banking entities. Moreover, as noted above, U.S. banking entities providing financing to their foreign banking entity affiliates are likely to be separately subject to a full range of capital, margin, and other obligations unrelated to section 13 of the BHC Act, which may further mitigate risks to the U.S. branches and affiliates of foreign banking entities.

ii. Efficiency, Competition, and Capital Formation

As discussed above, the SEC believes that the final rule's amendments to the covered fund provisions in subpart C provide banking entities with greater flexibility in underwriting, market making, and hedging ownership interests in covered funds. To the extent that the 2013 rule's restrictions on underwriting and market making with interests in covered funds limit fund formation, the final rule may reduce long-term compliance costs and, as a result, increase capital formation. In addition, to the extent that banking entities experience a reduction in compliance costs and an increased ability to accommodate clients and perform risk management activities, the willingness of SEC-regulated entities to commit capital and take on underlying risk exposures may increase, which may enhance capital formation.

The final rule may affect competition between foreign and domestic entities, as foreign banking entities may benefit from the final rule and enjoy greater flexibility in financing their covered fund activity. To the extent that costs of compliance with the ''financing prong'' of the 2013 rule's foreign fund exemption may represent barriers to entry for foreign banking entities' covered fund activities, the final rule may increase foreign banking entities' operational efficiency and promote their sponsorship and financing of covered funds.

The final rule's amendments to § ____.11 and § ____.13 do not change the information available to market participants, and the SEC does not believe that these amendments are likely to have an effect on informational efficiency. To the degree that these amendments may provide banking entities with more flexibility to underwrite, make markets in, and hedge ownership interests in covered funds, and to the extent these activities facilitate capital formation, these amendments may improve allocative efficiency.

iii. Alternatives

The agencies considered alternatives that would scope out from calculation of the per-fund limit, aggregate fund limit, and capital deduction for banking entities all ownership interests acquired or retained by banking entities in connection with other underwriting and market making. For example, the agencies considered excluding the value of ownership interests acquired or retained in connection with underwriting or market making-related activities with respect to covered funds offered or organized by the banking entity from the calculation of the per-fund and aggregate limits and capital deductions.[1124] If the agencies had adopted this alternative, this would have provided dealers a level of flexibility in underwriting and making markets in ownership interests in covered funds that is more similar to the level of flexibility for dealers in conducting these activities with respect to all other types of financial instruments, including the underlying financial instruments owned by the same covered funds.

Compliance with the 2013 rule for covered funds imposes costs on banking entities. To the extent that, under the baseline, such costs prevent banking entities that are dealers from making markets in or underwriting certain financial instruments, this alternative would enable them to engage in potentially profitable market making in and underwriting ownership interests in covered funds. The benefits of this alternative may also flow through to funds, investors, and customers as

[1119] The SEC understands that, as a practical matter, market participants have adjusted their activity in light of the FAQs regarding the marketing restriction. *See supra* note 59, FAQ 13. Hence, the SEC continues to believe that the economic effects of the amendment to incorporate existing staff guidance are likely to be de minimis, and the SEC focuses this discussion on the removal of the financing prong.

[1120] In addition, the agencies confirmed in this **SUPPLEMENTARY INFORMATION** that the foreign fund exemption (1) permits the U.S. personnel and operations of a foreign banking entity to act as an investment adviser to a covered fund in certain circumstances and (2) does not preclude a foreign banking entity from engaging a non-affiliated U.S. investment adviser as long as the actions and decisions of the banking entity as principal occur outside of the United States. To the extent that foreign banking entities were restricting (1) hiring of U.S. personnel to provide investment advice and recommend investment selections to the manager or general partner of a covered fund relying on the foreign fund exemption, or (2) engagement of non-affiliated U.S. investment advisers due to uncertainty about the 2013 rule, foreign banking entities may be more likely to hire U.S. personnel to provide such services, and non-affiliated U.S. investment advisers may become better able to compete for the foreign banking entity's investment mandates.

[1121] Several commenters supported removing the financing prong from the foreign fund exemption. *See, e.g.,* BPI; EBF; IIB; JBA and New England Council.

[1122] *See, e.g.,* Better Markets and CAP.

[1123] Some commenters supported this view. *See, e.g.,* EBF and BPI.

[1124] Some commenters supported this alternative. *See, e.g.,* ISDA.

banking entities may become more willing and able to underwrite and make markets in products linked to covered funds and to provide customers with an economic interest in the profits and losses of covered funds. This may increase investor access to the returns and risks of private funds, which may be particularly valuable when issuers are increasingly relying on private capital and delaying public offerings. Finally, the increased ability of banking entities to engage in market making and underwriting activities with respect to covered funds under this alternative may have increased market quality for covered funds that are traded.

The SEC also continues to recognize that transactions in covered funds—including transactions with customers, and holdings of ownership interests in covered funds related to underwriting and market making—necessarily involve the risk of losses. However, the risks of market making or underwriting by banking entities of financial instruments held by the covered fund, or financial instruments or securities that are otherwise similar to covered funds, are substantively similar. Therefore, the same tensions among the economic effects discussed in section V.F.3.c of this **SUPPLEMENTARY INFORMATION** between potential benefits to capital formation and liquidity and potential costs related to bank risk exposures and market fragility apply to both banking entity interests from underwriting and market making in financial instruments and underwriting and market making in covered funds. It is not clear that the existence of a legal and management structure of a covered fund per se changes the economic risk exposure of banking entities, and, thus, the capital formation and other tensions of the economic effects discussed above. Therefore, the SEC continues to believe that this alternative would simply involve a more consistent treatment of financial instruments and interests in covered funds as it pertains to underwriting and market making. However, as discussed above in section V.F.1 of this **SUPPLEMENTARY INFORMATION**, some of the effects of the 2013 rule's provisions are difficult to evaluate outside of economic downturns, and the SEC is unable to measure the amount of capital formation or liquidity in covered funds or investments of the covered funds that does not occur because of the existing treatment of underwriting and market making activities by banking entities involving covered funds.

g. Compliance Program

The SEC continues to recognize that the scope and breadth of the compliance obligations under the 2013 rule impose significant costs on banking entities, which may be particularly burdensome for smaller entities. For example, in the proposal, the SEC cited a market participants' estimate that some banking entities have added as many as 2,500 pages, per institution, of policies, procedures, mandates, and controls (which need to be monitored and updated on an ongoing basis) [1125] for purposes of compliance with the 2013 rule, and that some banking entities may spend, on average, more than 10,000 hours on training each year.[1126] The SEC also cited a market participants' estimate that some banking entities may have 15 regularly meeting committees and forums, with as many as 50 participants per institution dedicated to compliance with the 2013 rule.[1127]

The compliance regime of the 2013 rule and related burdens may reduce the profitability of covered activities by dealers and investment advisers that are banking entities and may be passed along to customers or clients in the form of reduced provision of services or higher service costs. Moreover, the SEC recognizes that the extensive compliance program under the 2013 rule may detract resources of banking entities and their compliance departments and supervisors from other compliance matters, risk management, and supervision. Finally, prescriptive compliance requirements may not optimally reflect the organizational structures, governance mechanisms, or risk management practices of complex, innovative, and global banking entities. However, the SEC agrees with commenters [1128] that compliance programs are important to support the safety and soundness of the U.S. financial markets.

i. Costs and Benefits

The final rule is expected to lower compliance burdens in two ways. First, the SEC continues to believe that the amendments would increase flexibility in complying with the final rule for banking entities without significant trading assets and liabilities, reducing compliance costs for these entities. Second, the adopted amendments would streamline the compliance program for banking entities with significant trading assets and liabilities. The SEC continues to believe that, to the extent that the requirements in the 2013 rule are duplicative and that maintaining compliance systems to comply with both the general and an enhanced compliance program requirements is inefficient, banking entities with significant trading assets and liabilities may benefit from the amendments. The specific final amendments are discussed below.

For Group C entities, the agencies are adopting presumed compliance with proprietary trading and covered fund prohibitions. Some commenters noted that the presumed compliance standard proposed for Group C entities may benefit entities with very low levels of trading activity.[1129] In light of the commenters' responses, the SEC continues to believe that the presumption of compliance will provide Group C entities with additional compliance flexibility. The SEC estimates that approximately 97 broker-dealers that hold 3.6% of assets held by broker-dealers subject to the final rule would be able to avail themselves of the rebuttable presumption of compliance and would not have to apply the final rule's compliance program requirements. Out of these 97 broker-dealers, 28 are subject to the enhanced requirements under the 2013 rule, 51 are subject to the standard compliance requirements under the 2013 rule, and 18 qualify for the simplified compliance regime under the 2013 rule. As discussed in section V.B, the agencies estimate recordkeeping or reporting burden reductions related to presumed compliance with the final rule are as high as $1,648,812.[1130]

Some commenters expressed concern that Group C entities may experience uncertainty because of the absence of specific guidance about what events would trigger an agency to rebut the presumption of compliance,[1131] and, as a result, incur compliance costs related to establishing internal systems and controls in anticipation of potential rebuttal of the presumption.[1132] To the extent that some Group C entities experience this uncertainty and costs, they may not fully enjoy the benefits of presumed compliance. One commenter estimated that smaller banking entities would likely incur an additional one-time cost of $50,000–$100,000 in

[1130] *See* section V.B. Ongoing cost reduction for broker-dealers: (40 hours per firm × 18 broker-dealers + 265 hours per firm × 79 broker-dealers) × 0.18 dealer weight × (Attorney at $423 per hour) = $1,648,812.

[1131] *See, e.g.,* Chatham; ABA and SIFMA.

[1132] *See, e.g.,* Covington; Chatham; EBF; JBA and Data Boiler.

consulting or legal advice fees.[1133] Using this estimate, the total initial cost related to consulting or legal advice fees for Group C broker-dealers may range between $873,000 and $1,746,000.[1134]

Some commenters opposed the presumption of compliance.[1135] The SEC continues to recognize that the presumption of compliance for Group C entities may increase the risks of non-compliance with the statute. However, the SEC also continues to note that the amendments do not waive the proprietary trading and covered fund prohibitions of section 13 of the BHC Act for such entities.

For Group B entities, the agencies are adopting the simplified compliance program as proposed. Some commenters expressed support for this approach for Group B entities.[1136] In the proposal, the SEC recognized that existing compliance program requirements may burden entities that engage in little covered trading activity but have larger total assets.[1137] The SEC continues to recognize that this amendment may reduce costs for banking entities that have more than $10 billion in total assets but do not have significant trading assets and liabilities, as these banking entities do not qualify for the simplified compliance program under the 2013 rule. As shown in Table 2, the SEC estimates that 66 broker-dealers would qualify for the simplified compliance regime under the final rule. As discussed in section V.B, the agencies estimate recordkeeping or reporting burden reductions related to the simplified compliance program for Group B broker-dealers to be $1,130,679 for registered broker-dealers and up to $582,471 for entities that may choose to register as SBSDs.[1138]

The agencies are amending covered fund recordkeeping requirements to apply to Group A entities only, rather than to banking entities with over $10 billion in total assets. The SEC believes that the covered funds activities of banking entities without significant trading assets and liabilities may generally be smaller in scale and less complex than those of banking entities with significant trading assets and liabilities. Thus, the value of additional documentation requirements for banking entities without significant trading assets and liabilities may be lower. The final amendment reflects these considerations and may reduce the costs associated with these covered funds recordkeeping requirements by reducing the number of banking entities subject to these requirements.[1139] The SEC continues to note that entities with moderate trading assets and liabilities would still be required to comply with all the covered fund provisions and that the proposal simply eliminates recordkeeping for the purposes of demonstrating compliance. However, in general, the SEC believes that SEC oversight of dealers and investment advisers of covered funds should not be adversely affected, as the remaining compliance requirements will be sufficient to monitor compliance with the statute. As discussed in section V.B, the agencies estimate recordkeeping or reporting burden reductions related to the covered fund recordkeeping requirements to be $2,208,060 for registered broker-dealers and up to $517,752 for entities that may choose to register as SBSDs.[1140]

The agencies are also adopting the removal of the requirements in Appendix B of the 2013 rule as proposed, with an exception for the CEO attestation. The removal of Appendix B requirements will affect all banking entities that have trading assets and liabilities above $10 billion, as well as banking entities that have total consolidated assets of $50 billion or more. Some commenters expressed general support for this amendment.[1141] In addition, some commenters indicated that compliance with Appendix B required entities to develop and administer an enhanced compliance program that may not be tailored to the business model or risks of specific institutions.[1142] Further, in the proposal the SEC cited a market participants' estimate that some banking entities have established as many as 500 controls related to Appendix B obligations, some of which may be duplicating other policies and procedures designed as part of prudential safety and soundness.[1143] In light of these comments, the SEC continues to believe that compliance with Appendix B may impose significant costs on SEC-regulated banking entities and that removal of the Appendix B requirements may significantly reduce the number and complexity of the compliance requirements to which such entities are subject. The SEC estimates that there are 122 broker-dealers that may experience reduced compliance costs as a result of this amendment, among which 28 are Group C entities, 58 are Group B entities and 36 are Group A entities. As discussed in section V.B, the removal of Appendix B requirements will result in ongoing annual cost savings estimated as $10,217,988 for registered broker-dealers and up to $2,847,636 for entities that may choose to register as SBSDs.[1144]

Some commenters opposed the removal of Appendix B, arguing that, given the size of affected holding companies, the 2013 rule's stringent compliance regime may help reduce compliance risks related to the substantive prohibitions of section 13 of the BHC Act and the 2013 rule.[1145] However, the SEC notes that, under the final rule, both Group A and Group B entities will be required to establish and maintain a compliance program under § ____.20.

Finally, the agencies are adopting the amendment to require CEO attestation

[1133] *See* Data Boiler.

[1134] Initial set-up burden increase for broker-dealers: 97 broker-dealers × 0.18 dealer weight × $100,000 = $1,746,000. Using the lower bound: 97 broker-dealers × 0.18 dealer weight × $50,000 = $873,000.

[1135] *See, e.g.,* Occupy the SEC and Data Boiler.

[1136] *See, e.g.,* CFA and JBA.

[1137] *See* 83 FR 33432.

[1138] Cost reduction for broker-dealers: 225 hours per firm × 0.18 dealer weight × 66 broker-dealers × (Attorney at $423 per hour) = $1,130,679.

Cost reductions for entities that may register as SBSDs may be as high as 225 hours per firm × 0.18 dealer weight × 34 SBSDs × (Attorney at $423 per hour) = $582,471. The estimate for SBSDs assumes that 34 SBSDs not already registered as broker-dealers would be Group B entities and so may overestimate the cost savings.

[1139] As discussed in section V.F.2.c, RIAs do not typically engage in proprietary trading, and the SEC continues to believe that they will not be affected by the final rule as it relates to proprietary trading. In addition, the SEC does not have the information necessary to quantify the compliance program costs at the RIA level of a BHC. Thus, the SEC does not allocate cost savings from monetized PRA burdens to bank-affiliated RIAs from the proposed Appendix B amendments. To the degree that some bank-affiliated RIAs may be extending compliance resources and systems independent of the affiliated holding company and other affiliates and subsidiaries, this approach may be underestimating the cost savings from the final rule.

[1140] Cost reduction for broker-dealers: 200 hours per firm × 0.18 dealer weight × 145 broker-dealers × (Attorney at $423 per hour) = $2,208,060.

Cost reductions for entities that may register as SBSDs may be as high as 200 hours per firm × 0.18 dealer weight × 34 SBSDs × (Attorney at $423 per hour) = $517,752. The estimate for SBSDs assumes that all 34 SBSDs not already registered as broker-dealers would be Group B entities and so may overestimate the cost savings.

[1141] *See, e.g.,* Insurance Coalition; Real Estate Associations; CREFC; Credit Suisse; JBA; FSF and ABA.

[1142] *See, e.g.,* Credit Suisse; CREFC; SIFMA and Capital One et al.

[1143] *See* 83 FR at 33551.

[1144] Cost reduction for broker-dealers: 1,100 hours per firm × 0.18 dealer weight × 122 broker-dealers × (Attorney at $423 per hour) = $10,217,988.

Cost reductions for entities that may register as SBSDs may be as high as 1,100 hours per firm × 0.18 dealer weight × 34 SBSDs × (Attorney at $423 per hour) = $ 2,847,636. The estimate for SBSDs assumes that all 34 SBSDs not already registered as broker-dealers would be subject to Appendix B requirements and so may overestimate the cost savings.

[1145] *See, e.g.,* AFR and Bean.

for Group A entities only.[1146] In the proposal, the SEC recognized that the CEO attestation process is costly and cited market participants' estimates that some banking entities may spend more than 1,700 hours on the CEO attestation process and that the elimination of this requirement may reduce time dedicated towards the compliance program by as much as 10%.[1147] In addition, as indicated by some commenters, the CEO attestation requirement requires banking entities to undertake costly internal compliance efforts that are not consistent with the activities or risks of such firms.[1148] Therefore, the SEC believes that the amendments to the application of the CEO attestation requirement will benefit SEC-regulated banking entities and their holding companies that do not have significant trading assets and liabilities but are subject to the CEO requirement under the 2013 rule.

The SEC continues to note that, under the 2013 rule, SEC-regulated banking entities have flexibility to comply with the attestation requirement either at the SEC-registrant or at the holding-company level. In 2019, the SEC received a total of 55 attestations that cover compliance for 2018, including 14 attestations directly from SEC registrants, none of which are Group A entities. Therefore, the SEC expects that, under the final rule, these registrants would no longer be providing CEO attestations. The SEC estimates that there are 122 broker-dealers that are subsidiaries or affiliates of bank holding companies that are required to comply with the CEO attestation requirement under the 2013 rule. The SEC estimates that under the final rule this number will decrease to 36 Group A broker-dealers. Therefore, the amendment may result in annual cost savings from $654,804 to $774,000 for broker-dealers and up to between $258,876 and $306,000 for entities that may choose to register as SBSDs.[1149]

The agencies are also adopting notice and response procedures related to sections ____.3(b)(4), ____.4(c)(4), ____.20(g)(2), and ____.20(h) of the final rule. As a result, all broker-dealers and entities that may potentially register as SBSDs may experience increases in initial reporting set-up costs. As discussed in section V.B, the agencies estimate the initial set-up reporting burden increase related to the notice and response procedures to be $303,037 for registered broker-dealers and up to $51,775 for entities that may choose to register as SBSDs.[1150] In addition, as discussed in section V.B, the agencies may exercise a reservation of authority and seek to rebut the presumption in section ____.3(b)(4) in accordance with the notice and response procedures in section ____.20(i) of the final rule, involving a burden of up to 20 hours per entity per response. In such cases, an SEC-regulated banking entity may incur a cost of up to $1,523 (=20 hours per response × 0.18 dealer weight × Attorney at $423 per hour) per response. The SEC is unable to estimate how many entities may bear such costs since this figure will depend on how SEC-regulated banking entities may choose to comply with the final rule.

ii. Efficiency, Competition, and Capital Formation

Under the final amendments, both Group A and Group B entities will benefit from reduced compliance program requirements and Group C entities will be presumed compliant with prohibitions of subparts B and C of the final rule. To the extent that compliance program requirements for Group B entities are less costly, Group A entities close to the $20 billion threshold may choose to manage down their trading book such that they would qualify for the simplified compliance program, resulting in more competition among entities that are close to the threshold. Similarly, the final rule may incentivize Group B entities close to the $1 billion threshold to rebalance their trading book in order to qualify for the presumed compliance treatment of Group C entities. Such management of the trading book may reduce the risk of each individual banking entity and may decrease the risks to the financial system. The SEC notes that entities are likely to weigh potential cost savings related to lighter compliance requirements for Group B and Group C entities against the costs of reducing trading activity below the $20 billion and $1 billion thresholds. Therefore, this competition effect may be particularly significant for Group A entities that are close to the $20 billion threshold and for Group B entities that are close to the $1 billion threshold.

Since the compliance requirements do not affect the scope of information available to investors, the SEC does not anticipate effects on informational efficiency to be significant. To the extent that some dealers are experiencing large compliance costs and partially or fully passing them along to customers in the form of reduced access to capital or higher cost of capital, the amendment may reduce costs of and increase access to capital.

iii. Alternatives

As an alternative, the agencies could have applied the CEO attestation requirement to both Group A and Group B entities. Under this alternative, some banking entities would have become subject to the CEO attestation requirement for the first time, as noted by some commenters.[1151] As discussed above and noted by commenters,[1152] the SEC continues to recognize that Group B entities pose lower risks to the financial system that may not necessarily justify a costly and stringent compliance regime that requires CEO attestation.

As other alternatives, the agencies could have required CEO attestations for Group A entities only if they have over $50 billion in total assets; removed the CEO attestation requirement; or allowed other senior officers, such as the chief compliance officer (CCO), to provide the requisite attestation for some or all affected banking entities. As discussed above, the SEC recognized in the proposal that the CEO attestation process is costly and that some market participants estimated that some banking entities may spend more than 1,700 hours on the CEO attestation process and that eliminating this requirement may reduce time dedicated toward the compliance program by as

[1146] As a baseline matter, under the 2013 rule, the CEO is required to annually attest that the banking entity has in place processes to establish, maintain, enforce, review, test, and modify the compliance program established pursuant to Appendix B in a manner reasonably designed to achieve compliance with section 13 of the BHC Act and the 2013 rule.

[1147] *See* 83 FR at 33551.

[1148] *See, e.g.,* Capital One, et al.

[1149] Cost reduction for broker-dealers: 100 hours per firm × 0.18 dealer weight × 86 broker-dealers × (Attorney at $423 per hour) = $654,804. Alternatively, using the CEO hourly rate, cost reduction for broker-dealers is: 100 hours per firm × 78 broker-dealers × 0.18 dealer weight × (CEO at $500 per hour) = $774,000.

Cost reduction for entities that may register as SBSDs may be as high as: 100 hours per firm × 0.18 dealer weight × 34 SBSDs × (Attorney at $423 per hour) = $258,876. Alternatively, using the CEO hourly rate, cost reduction for broker-dealers is: 100 hours per firm × 34 SBSDs × 0.18 dealer weight × (CEO at $500 per hour) = $306,000. The SEC assumes that all entities that may register as SBSDs would be subject to the CEO attestation requirement, and so may overestimate the cost savings.

[1150] Initial set-up reporting burden increase for broker-dealers: 20 hours per firm × 0.18 dealer weight × 199 broker-dealers × (Attorney at $423 per hour) = $303,037.

Initial set-up reporting burden increase for entities that may register as SBSDs may be as high as: 20 hours per firm × 0.18 dealer weight × 34 SBSDs × (Attorney at $423 per hour) = $51,775.

[1151] *See, e.g.,* IIB.

[1152] *See, e.g.,* Capital One et al.; BB&T; ABA; Arvest; State Street and IIB.

much as 10%.[1153] Under the aforementioned alternatives, more SEC-regulated banking entities would generally experience larger cost reductions. However, as discussed in section IV.D.1, the agencies continue to believe that incorporating the CEO attestation requirement into § ___.20(c) for Group A banking entities will help to ensure that the compliance program established pursuant to that section is reasonably designed to achieve compliance with section 13 of the BHC Act and the final rule.

As an alternative, the agencies could have included a knowledge qualifier for CEO attestation. Since CEOs of banking entities do not necessarily know every single policy, procedure, process, and control, as pointed out by some commenters,[1154] they may rely on multiple layers of sub-attestations within a banking entity. If CEOs of banking entities are risk averse, they may require additional liability insurance, higher compensation, or lower incentive pay as a fraction of overall compensation. Under this alternative, such effects stemming from risk aversion would be mitigated. However, the attestation may also serve as a disciplining mechanism and incentivize compliance. In addition, as one commenter stated, CEOs of publically traded banking entities regularly attest that their company's annual and quarterly reports are accurate and complete and that internal controls have been established and maintained.[1155] The SEC also notes that the covered activities of larger and more complex banking entities with higher volumes of trading activity may involve risk exposures with a larger potential for systemic risk and conflicts of interest.

The agencies also recognize that CEO attestation may be costly for banking entities affiliated with foreign banking organizations. For example, the SEC noted in the proposal that one foreign firm reported that it organized and managed a global controls sub-certification process that takes 6 months to complete and involves over 400 staff (including over 260 outside of the United States) in order for the CEO to sign and deliver the annual attestation.[1156] As an alternative, the agencies could have proposed exempting banking entities affiliated with a foreign banking organization from the CEO attestation requirement. Under the 2013 rule, the requirement covers only the U.S. operations of a foreign banking entity and not its foreign operations. Similar to the analysis of the final amendment to trading outside of the United States, this alternative may decrease compliance costs and increase trading activity by foreign banking entities in the United States but result in losses in market share and profitability for U.S. banking entities that would remain subject to the attestation requirement and would be placed at a competitive disadvantage as a result.

h. Metrics

i. Costs and Benefits

In the proposal, the SEC discussed the compliance burdens related to the metrics reporting and recordkeeping requirements under the 2013 rule. For example, the SEC reported that a market participant estimated that the average cost of collecting and filing metrics subject to the reporting requirements may be as high as $2 million per year per participant, and that market participants may submit an average of over 5 million data points in each filing.[1157] The SEC also reported an estimate from a market participant incurring approximately $3 million in costs associated with the buildout of new IT infrastructure and system enhancements and estimated that this IT infrastructure will require at least $250,000 in maintenance and operating costs year-to-year.[1158] In addition, the SEC noted that the same firm estimated costs related to compliance consultants assisting with the construction of the 2013 rule compliance regime at $3 million.[1159]

The SEC continues to believe that the metrics reporting and recordkeeping requirements of the 2013 rule may involve large compliance costs.[1160] The agencies have received comment that the proposed amendments do not streamline metrics reporting and recordkeeping requirements but impose costly new requirements.[1161] Moreover, the agencies received comment that the new qualitative information requirements, such as the trading desk information, are unlikely to enhance review by regulators.[1162] In addition, the agencies received comment that even where underlying data is already collected by reporters in the regular course of business and for regulatory compliance, reporters will still incur costs of determining how best to compile and standardize the information.[1163]

As discussed below, the SEC continues to recognize that some aspects of the final rule may impose new requirements on reporters. Moreover, the SEC continues to emphasize that quantitative metrics do not clearly identify impermissible proprietary trading, but, rather, inform general agency oversight and supervision. As discussed further below, in response to the comments received, the SEC has revised its estimates of the compliance costs of various amendments and burden savings from metrics amendments as a whole. Importantly, the final metrics amendments include changes from the proposed approach—changes that both reduce the scope of new requirements and eliminate other existing quantitative metrics, such as risk factor sensitivities. For example, as discussed in section IV.E, the agencies estimate that the final rule may significantly reduce both the number of reported data items (by approximately 67%) and the overall volume of submissions (by approximately 94%) relative to baseline.

Overall, the SEC believes that the final rule reduces the costs of metrics requirements for reporters, eliminating certain metrics on the basis of regulatory experience with the data and provides some entities with additional reporting time. Broadly, metrics reporting provides information for regulatory oversight and supervision but presents compliance burdens for registrants. The balance of these effects turns on the value of different metrics in evaluating covered trading activity for compliance with the rule, as well as their usefulness for risk assessment and general supervision. These effects are discussed with respect to each final amendment in the sections that follow.

The SEC considered how to assess the costs of the final rule for SEC-regulated banking entities. The metrics costs are generally estimated at the holding company level for each reporter.[1164] The SEC allocates these costs to the affiliated

[1163] *Id.*

[1164] The SEC currently receives metrics from 18 entities, including 2 reporters that are below $10 billion in trading assets and liabilities. Since voluntary reporters are not constrained by the requirements of the amendment, they are not reflected in the SEC's cost estimates. In addition, the SEC believes that the additional systems costs estimated here will be incurred at the holding company level and scope in the trading activity of all SEC-registered banking entity affiliates.

SEC-regulated banking entity.[1165] The SEC believes that estimating the cost savings of the final rule at the individual registrant level would be inconsistent with the SEC's understanding of how these entities are complying with the metrics reporting requirements of the 2013 rule. The SEC continues to believe that SEC-regulated banking entities within the same corporate group will collaborate with one another to comply with the final rule, to take advantage of efficiencies of scale. Further, the SEC continues to note that individual SEC-regulated banking entities may vary in the scope and type of activity they conduct and that not all entities within an organization subject to Appendix A engage in the types of covered trading activity for which metrics must be reported. Thus, to the extent that metrics compliance occurs at the holding company level, estimating costs at the registrant level may overstate the magnitude of the costs and cost savings for SEC-regulated entities as a result of the final rule.

The discussion that follows addresses the effects of the final rule on the reporting and recordkeeping burdens and other compliance costs for banking entities, the effects of the elimination and streamlining of certain metrics, the effects of extended time to report, and amendments related to the XML format.

(1) Reporting and Recordkeeping Burden for SEC-Regulated Banking Entities

The changes in reporting and recordkeeping burdens as a result of the final rule stem from four key groups of changes to the metrics reporting regime. First, the final rule requires metrics reporting for Group A entities only. Under the 2013 rule, banking entities with consolidated trading assets and liabilities above $10 billion are required to record and report certain quantitative measurements for each trading desk engaged in covered trading.[1166] Under the amended rules, entities with $20 billion or more in trading assets and liabilities would be required to furnish metrics. The SEC estimates that three metrics reporters that have affiliated broker-dealers required to submit metrics to the SEC under the 2013 rule will no longer be required to report metrics under the final rule.

Second, as discussed above, the agencies are narrowing the scope of many of the 2013 rule's metrics requirements or eliminating them as a whole. For example, the agencies are eliminating the Inventory Aging metric, the Stress Value-at-Risk (VaR) metric, and the Risk Factor Sensitivities metric. As discussed above, the agencies estimate that the final rule eliminates approximately 67% of data items by number and 94% of data by volume. The reduction in the volume of data required to be compiled, reviewed, and transmitted to the agencies is expected to decrease the volume of data that needs to be produced, manipulated, and submitted to the agencies for purposes of compliance with the 2013 rule.

Third, the amendment to the trading account definition may change the scope of desks required to report metrics. Specifically, some trading desks, such as some asset and liability management desks, under the 2013 rule, may be required to report metrics solely due to activity that falls within the 60-day rebuttable presumption. Because of the nature of their activity, such trading desks may face greater burdens of producing metrics that are routine for other trading desks. The elimination of the 60-day rebuttable presumption may eliminate the need for such desks to report metrics, removing related burdens.

Fourth, the agencies are adopting an amendment to require metrics reporting by all reporters on a quarterly basis within 30 days of the end of each calendar quarter. Under the 2013 rule, banking entities that report metrics and have less than $50 billion in consolidated trading assets and liabilities are required to report metrics for each quarter within 30 days of the end of that quarter. In contrast, under the 2013 rule, banking entities with total trading assets and liabilities equal to or above $50 billion are required to report metrics more frequently—each month within 10 days of the end of that month.[1167] As discussed further below, because processes enabling reporting under tight deadlines may generally be costlier, the SEC anticipates that the amended reporting requirements may reduce compliance costs for entities that are subject to the 2013 rule's metrics requirements and have more than $50 billion in trading assets and liabilities and may result in fewer resubmissions by such filers.

In the proposal, the SEC stated that reporters may incur systems-related costs of approximately $120,000 to $130,000, estimated at the level of the reporter. The agencies have received comment that the SEC's estimates of the costs of the metrics amendments are a significant underestimate, since reporters will need to revise all of their metrics reporting systems and embark on a new round of systems integration with multiple agencies independently.[1168] The commenter indicated that the exercise is not dissimilar from the initial implementation of the 2013 rule's metrics.[1169] Another commenter supported retaining requirements of the 2013 rule, since any metrics amendments would require modifications to measurement tools, involving burdens, testing time, and outsourcing costs of development staff.[1170]

The SEC agrees that compliance with the final rule will involve one-time costs to transition systems and compliance architecture to the metrics amendments for Group A entities, including the new requirements related to granular Transaction Volumes and Positions metrics, Comprehensive Profit and Loss Attribution, Trading Desk and Quantitative Measurements Identifying Information, and the elimination of reporting of other metrics (such as Inventory Turnover, Customer-Facing Trade Ratio, Risk Factor Sensitivities, and Stress VaR). The SEC notes that its analysis is specific to SEC registrants, and the estimates represent only a fraction of the compliance costs of holding companies allocated to affiliated SEC-regulated banking entities. Moreover, the SEC anticipates considerable variation in one-time system transition costs among reporters, depending on the size and complexity of their existing trading activity, the number of trading desks per reporter for the purposes of metrics reporting, the way in which reporters may organize reporting and compliance obligations for the purposes of, for instance, the market risk capital rule, and the complexity of their current systems. However, if transitioning reporting systems to meet the requirements of the final rule impose one-time costs and IT burdens comparable with those of the metrics requirements of the 2013 rule,[1171] the compliance costs related to the 2013 rule can be used to estimate potential one-time switching costs for some banking entities. In the proposal, the SEC reported an estimate from a market participant incurring approximately $3 million in costs associated with the buildout of new IT infrastructure and system enhancements.[1172] Using this estimate, the one-time costs related to transitioning metrics reporting to

[1172] *Id.*

comply with the requirements of the final rule may be as high as $540,000 [1173] for SEC-regulated dealers affiliated with a single Group A metrics reporter and as high as $6,480,000 [1174] for all SEC-regulated entities affiliated with all reporters.

However, as discussed earlier in this section, the SEC believes that the final metrics amendments may reduce reporting and recordkeeping burdens.[1175] The SEC estimates that the amendments may decrease ongoing annual reporting and recordkeeping cost by $463,921.[1176] These figures reflect the estimated burden reductions net of any new systems costs imposed by the final rule.

(2) Elimination, Replacement, and Streamlining of Certain Metrics

As discussed above, the final rule includes a number of amendments eliminating, replacing, and streamlining metrics reporting. For example, the final rule eliminates the Inventory Aging, Stress VaR, and Risk Factor Sensitivities metrics, as well as replaces the Inventory Turnover with the Positions metric and the Customer Facing Trade Ratio with the Transaction Volumes metric. As discussed above, both the Transaction Volumes metric and the Positions metric will be required only by desks involved in underwriting or market making-related activity. The SEC continues to believe that the key balancing of economic effects from metrics reporting is between compliance burdens (which may be particularly significant for smaller entities) and the amount and usefulness of information provided for regulatory oversight of the 2013 rule, as well as for general supervision and oversight. As estimated above, the limitation of certain metrics to desks engaged in covered trading activities, elimination of the above metrics, and removal of the Stress VaR limit requirements is expected to reduce burdens related to reporting and recordkeeping for Group A entities. Although metrics do not allow the SEC to clearly identify proprietary trading from permitted market making, risk-mitigating hedging, or underwriting activity, certain metrics may provide additional information that is useful for regulatory oversight.

Replacement of Inventory Turnover With Positions and Customer-Facing Trade Ratio With Transaction Volumes

The final rule replaces the Inventory Turnover metric with the Market Value of Positions quantitative measurement and replaces the Customer-Facing Trade Ratio metric with the Transaction Volumes quantitative measurement. The Inventory Turnover and Customer-Facing Trade Ratio metrics are ratios that measure the turnover of a trading desk's inventory and compare the transactions involving customers and non-customers of the trading desk, respectively.

The Positions and Transaction Volumes metrics are expected to provide information about risk exposure and trading activity at a more granular level. Specifically, the final rule requires that banking entities provide the relevant agency with the underlying data used to calculate the ratios for each trading day, rather than providing more aggregated data over 30-, 60-, and 90-day calculation periods. By providing more granular data, the Positions metric, in conjunction with the Transaction Volumes metric, is expected to provide the SEC with the flexibility to calculate inventory turnover ratios and customer-facing trade ratios over any period of time, including a single trading day, allowing the use of the calculation method the SEC finds most effective for purposes of regulatory oversight.

Moreover, the new Positions and Transaction Volumes metrics will distinguish between securities and derivatives positions, unlike the Inventory Turnover and Customer-Facing Trade Ratio metrics. These metrics would require a banking entity to separately report the value of securities positions and the value of derivatives positions. While the Inventory Turnover and Customer-Facing Trade Ratio metrics require banking entities to use different methodologies for valuing securities positions and derivatives positions because of differences between these asset classes, these metrics currently require banking entities to aggregate such values for reporting purposes. By combining separate and distinct valuation types (*e.g.,* market value and notional value), the Inventory Turnover and Customer-Facing Trade Ratio metrics are providing less meaningful information than was intended by the 2013 rule. Therefore, requiring banking entities to disaggregate the value of securities positions and the value of derivatives positions for reporting purposes may enhance the usability of this information.

In addition to requiring separate reporting of the value of securities positions and the value of derivatives positions, the final rule would also streamline valuation method requirements for different product types. The removal of the notional value of derivative positions in the Positions metric avoids complexities related to mixing various calculation methods for notional value for different derivatives. For example, using delta-adjusted notional for options, bond equivalents for interest rate derivatives, commodity price adjusted values for commodity derivatives, and gross notional for other derivatives increases complexity and reduces comparability. Moreover, certain valuation methodologies required by the 2013 rule's Inventory Turnover and the Customer-Facing Trade Ratio metrics may not be otherwise used by banking entities (*e.g.,* for internal monitoring or external reporting purposes). Furthermore, the 2013 rule's requirements result in information being aggregated and furnished to the SEC in non-comparable units. At the same time, the final rule retains gross notional value of derivatives as part of the Transactions Volumes Metric. The SEC believes that changing market values of positions as well as the volume of derivative contracts in terms of notional are important measures of risk useful for ongoing agency oversight. Therefore, this aspect of the final rule may further enhance the usability of the information provided in the Positions metric.

Moreover, the valuation methods required under the final rule are intended to be more consistent with the agencies' understanding of how banking entities value securities and derivatives positions in other contexts, such as internal monitoring or external reporting purposes, which may allow them to leverage existing systems and

[1173] $3 million × 0.18 × 1 reporter = $540,000.

[1174] $540,000 × 12 reporters = $6,480,000.

[1175] In the proposal, the SEC estimated the effect on SEC-registered broker-dealers and entities that may register as SBS dealers by scaling per-reporter estimates by 0.18 and multiplying by the number of broker-dealers or SBSDs affiliated with reporters in an affected category. This approach assumes that reporters with multiple dealers may allocate metrics compliance costs savings to each dealer. The SEC now more conservatively allocates compliance cost savings to multiple dealers affiliated with a reporter as one dealer entity. This approach also avoids assuming that entities that may register as SBSDs that are not broker-dealers are affiliated with reporters with over $50 billion in trading assets and liabilities (TAL) and is consistent with how the SEC allocates systems costs related to metrics amendments.

[1176] Ongoing reporting cost reduction for SEC entities: [(55 hours per report × 12 reports per year × 9 reporters with over $50 billion) + (55 hours per report × 4 reports per year × 9 reporters with under $50 billion) − (41 hours per report × 4 reports per year × 12 reporters with TAL above $20 billion)] × 0.18 dealer weight × (Attorney at $423 per hour) = $453,185.

Ongoing recordkeeping cost reduction for SEC entities: [(16 hours per firm × 9 reporters with over $50 billion + 13 hours per firm × 9 reporters with <$50 billion) − (10 hours per firm × 12 reporters with >$20 billion TAL)] × 0.18 × (Attorney at $423 per hour) = $10,736.

Total ongoing cost reduction: $453,185 reporting + $10,736 recordkeeping = $463,921.

reduce ongoing costs relative to the costs of reporting requirements under the 2013 rule. While a banking entity may incur one-time costs in modifying how it values certain positions for purposes of metrics reporting, the SEC does not expect such systems costs to be significant, particularly if the banking entity is able to use the systems it currently has in place for purposes of metrics reporting to value positions consistent with the final rule. However, the SEC recognizes that some metrics reporters may incur such costs, and they are reflected in the estimate of the one-time metrics switching costs of up to $540,000 for SEC-registered dealers affiliated with a single Group A metrics reporter in section V.F.3.h.i above.

The agencies have received a number of comments on the proposed replacement of the Inventory Turnover metric with the Positions metric and of the Customer-Facing Trade Ratio metric with the Transaction Volumes metrics. With respect to the replacement of Inventory Turnover with Positions, commenters indicated that the Positions metric will involve costly modifications to existing infrastructure and re-scoping of products.[1177] In addition, commenters indicated that Positions metric will provide few valuable insights regarding each desk's overall risk profile and that the granularity will result in false positives.[1178] Commenters also opposed the replacement of the Customer-Facing Trade Ratio with the Transactions Volume metric, arguing that it would create a new metric, require firms to classify inter-affiliate transactions, increase transition and system update costs, and fail to provide the agencies with valuable information enhancing oversight for the purposes of section 13 of the BHC Act.[1179]

The SEC continues to believe that requiring banking entities to provide more granular data in the Positions and Transaction Volumes metrics will not significantly alter the costs associated with the 2013 rule's Inventory Turnover and Customer-Facing Trade Ratio metrics.[1180] The Positions and Transaction Volumes metrics are based on the same underlying data regarding the trading activity of a trading desk as the Inventory Turnover and Customer-Facing Trade Ratio metrics. The SEC expects that banking entities already keep records of these data and have systems in place that collect these data. Moreover, in response to commenter concerns regarding the extra recordkeeping costs related to distinguishing trades across affiliated banking entities from trades within a single banking entity, the final rule adds a category of counterparty for internal transactions that consolidates the two proposed categories (transactions across affiliated banking entities from trades within a single banking entity) into one category (transactions with trading desks and other organizational units). This additional category of information may facilitate better classification of internal transactions, which may assist the SEC in evaluating whether the trading desk's activities are consistent with the requirements of the exemptions for underwriting or market making-related activity.

The SEC remains cognizant of the costs of the amendments on reporters. In the proposal the SEC anticipated that reporting more granular information in the Positions and Transaction Volumes metrics may result in costs of $24,480.[1181] The SEC revises the estimate to $17,280 to reflect updated information about the number of reporters with affiliated SEC-registered dealers affected by the metrics amendments.[1182] In addition, in the proposal, the SEC estimated that modifying the 2013 rule's requirements of the Customer-Facing Trade Ratio to require SEC-regulated banking entities to further categorize trading desk transactions may impose additional systems costs related to tagging internal transactions and maintaining associated records valued at $21,420 for all reporters.[1183] The SEC now revises this estimate to $15,120 to reflect updated information about the number of reporters with affiliated SEC-registered dealers affected by the metrics amendments.[1184]

Importantly, the Positions and Transaction Volumes metrics requirements as amended may reduce costs compared to the reporting requirements under the 2013 rule by limiting the scope of trading desks that must provide the position- and trade-based data that is currently required by the Inventory Turnover and Customer-Facing Trade Ratio metrics. Under the 2013 rule, banking entities are required to calculate and report the Inventory Turnover and the Customer-Facing Trade Ratio metrics for all trading desks engaged in covered trading activity. The final rule would limit the scope of trading desks for which a banking entity would be required to calculate and report the Positions and Transaction Volumes metrics to only those trading desks engaged in market making-related activity or underwriting activity. These burden reductions are captured in the estimates of reporting and recordkeeping burden reductions in section V.F.3.h.i.

Risk Factor Sensitivities, Inventory Aging, and Stress VaR

The final rule eliminates the Risk Factor Sensitivities, Inventory Aging, and Stress VaR metrics of the 2013 rule. As estimated in section V.F.3.h.i, the SEC expects that the metrics amendments, including the elimination of these quantitative metrics requirements, will reduce burdens related to reporting and recordkeeping for Group A entities without adversely affecting the SEC's ability to oversee banking entities for purposes of section 13 of the BHC Act.

The final rule removes the requirement to report Risk Factor Sensitivities metrics, which is expected to reduce burdens related to data manipulation. The SEC understands that reporters may routinely calculate Risk Factor Sensitivities as part of their risk systems. However, the SEC understands that reporters have to routinely summarize large volumes of highly disaggregated Risk Factor Sensitivities from the risk systems for purposes of compliance with the 2013 rule. As discussed in section IV.E.5, the agencies estimate that the removal of Risk Factor Sensitivities may reduce the total volume of data submitted by reporters by more than half.

In addition, the SEC recognizes that one size may not fit all with respect to risk factors. Specifically, different risk factors at various levels of granularity may be relevant for different banking entities, and the Risk Factor Sensitivities may not adequately capture structural differences among the types of risk managed by trading desks in some banking entities.[1185] The SEC also notes that banking entities may already provide information about risk factor sensitivities as part of market risk

[1177] *See, e.g.,* SIFMA and GFMA.

[1178] *Id.*

[1179] *See* IIB; SIFMA and JBA.

[1180] *See, e.g.,* 83 FR at 33541.

[1181] In the Proposing Release, the SEC anticipated that costs associated with the more granular reporting in the Positions and Transaction Volumes metrics will be $8,000 per affiliated group of SEC-regulated banking entities. ($8,000 × 17 reporters × 0.18 SEC-registered banking entity weight) = $24,480.

[1182] $8,000 × 12 reporters × 0.18 SEC-registered banking entity weight = $17,280.

[1183] In that Release, the SEC estimated that the additional costs associated with categorizing transactions under the Transaction Volumes metric will be $7,000 per reporter. ($7,000 × 17 reporters × 0.18 SEC-registered banking entity weight) = $21,420.

[1184] $7,000 × 12 reporters × 0.18 SEC-registered banking entity weight = $15,120.

[1185] *See* SIFMA.

reporting.[1186] As discussed in section IV.E.9.a.i above, the final rule may reduce redundancy in metrics reporting since banking entities would be required to submit one consolidated Internal Limits Information Schedule for the covered trading activity of the entire entity.

The elimination of the Inventory Aging metric in the final rule recognizes the limitations of this metric for SEC's oversight for purposes of section 13 of the BHC Act, the information in the newly required Positions metric, as well as the fact that the notions of inventory and inventory aging are not meaningful indicators of the scale and risk of derivative positions.[1187] The SEC continues to believe that this amendment does not reduce the benefits of metrics reporting, as inventory aging does not enable a clear identification of prohibited proprietary trading or exempt market making, risk-mitigating hedging, or underwriting activities.

The elimination of the Stress VaR metric is expected to reduce burdens related to reporting and recordkeeping for Group A entities, contributing to the estimates of burden reductions in section V.F.3.h.i. The SEC recognizes one commenter's concerns that banking entities may currently face computational challenges, including those related to the determination of the stressed period and dynamic recalibration and that multinational holding companies may use different stress periods for subsidiaries in different jurisdictions.[1188] As discussed above, under the final rule, banking entities would still be required to submit one consolidated Internal Limits Information Schedule for the covered trading activity of the entire entity. The SEC understands that many banking entities do not routinely set Stress VaR limits at the trading desk level but compute Stress VaR at the entity level. Thus, as discussed above, the final rule may alleviate the need for redundant computations and submissions of Stress VaR at the desk level and may reduce the size of electronic submissions. Importantly, the SEC continues to note that eliminating the Stress VaR metric is unlikely to reduce the benefits of metrics reporting, as Stress VaR does not enable the SEC to distinguish between prohibited proprietary trading and permissible market making, risk-mitigating hedging, or underwriting activities of a trading desk.[1189]

Comprehensive Profit and Loss Attribution

The final rule makes two main changes to the Source-of-Revenue Measurements. First, the final rule eliminates the requirement that banking entities calculate and report the volatility of comprehensive profit and loss. Since the volatility of profit and loss can be calculated from other items being reported by the banking entities, the SEC does not believe that this aspect of the final rule would adversely affect the information available for the oversight of entities for the purposes of section 13 of the BHC Act.

Second, the final rule requires banking entities to provide a complete attribution of their profit and loss and, for one or more factors that explain the preponderance of the profit or loss changes due to risk factor changes, banking entities are required to report a unique identification label for the factor and the profit or loss due to the factor change. The SEC recognizes that the Risk Factor Attribution Information Schedule and the new unique identification label reporting requirement may impose additional burdens on reporters. As discussed in section IV.E, the agencies generally expect that the final rule may enable banking entities to leverage compliance with market risk capital programs to meet the final metrics requirements, which may reduce complexity and cost for banking entities and improve the effectiveness of the final rule. The SEC also notes that the final rule also includes an amendment to the trading desk definition, allowing reporters to use the same trading desk and risk factor attribution and risk factor sensitivity hierarchies. At the same time, profit and loss attribution and the identification label may enhance the ability of regulators to connect risk factors that explain a preponderance of the profit or loss changes due to risk factors with a separate Risk Factor Attribution Information Schedule. Thus, these amendments may help enhance the agencies' understanding of the structure of reporters' activity and the nature of their revenue sources.

(3) Trading Desk Information, Quantitative Measurements Identifying Information, and Narrative Statement

As recognized in Appendix A of the 2013 rule, the effectiveness of particular quantitative measurements may differ depending on the profile of a particular trading desk, including the types of instruments traded and trading activities and strategies.[1190] Thus, the additional qualitative information the agencies would collect in the Trading Desk Information and Quantitative Measurements Identifying Information provision may facilitate SEC review and analysis of covered trading activities and reported metrics. For instance, the trading desk description may help the SEC assess the risks associated with a given activity and establish the appropriate frequency and scope of examination of such activity. Having access to such information may allow the agencies to consider the specifics of each trading desk's activities during the reporting period, which may facilitate regulatory oversight.

In addition, under the final rule, banking entities may choose to provide a Narrative Statement that describes any changes in calculation methods used, a description of and reasons for changes in the trading desk structure or trading desk strategies, and when any such change occurred. The Narrative Statement may include any information the banking entity views as relevant for assessing the information reported, such as further description of calculation methods used. The Narrative Statement may provide banking entities with an opportunity to describe and explain unusual aspects of the data or modifications that may have occurred since the last submission, which may facilitate better evaluation of the reported data.

The SEC has received comments opposing the inclusion of additional descriptive information about metrics, including the Trading Desk Information, Narrative Statement, and Quantitative Measurements Identifying Information, as part of amended metrics reporting requirements.[1191] Specifically, a number of commenters indicated that there are few benefits of such qualitative information for the agencies' ability to oversee registrants for purposes of section 13 of the BHC Act.[1192] In addition, some commenters stated that the requirements are costly and burdensome as they vastly expand the scope of information requested.[1193] With respect to the Narrative Statement, one commenter recognized that banking entities currently provide such additional information voluntarily but indicated that the requirement would impose costs on banking entities that are

[1186] *Id.*

[1187] For example, the value of derivatives fluctuates with the price of an underlying asset and the notional amount of the contract, and derivative contracts are routinely amended and terminated prior to expiry. *See also, e.g.,* GFMA, State Street, Data Boiler.

[1188] *See, e.g.,* Data Boiler.

[1189] *See, e.g.,* Goldman Sachs; FSF and Data Boiler.

[1190] *See* 79 FR 5798.

[1191] *See, e.g.,* Credit Suisse; JBA and SIFMA.

[1192] *See* ABA; CCMR; SIFMA and Credit Suisse.

[1193] *See, e.g.,* Credit Suisse and CCMR.

unnecessary given that the agencies may be able to obtain this information through other supervision.[1194] Another commenter indicated that the proposed amendments significantly expanded the scope of the Narrative Statement requirement relative to current voluntary submissions, and that the Narrative Statement may provide little value to the agencies when assessing data submissions for purposes of compliance with the 2013 rule.[1195]

As discussed above, the SEC continues to believe that the Trading Desk Information and Quantitative Measurements Identifying Information may enhance the efficiency of data review by regulators. Three aspects of the final rule address the cost concerns of commenters regarding the proposed Trading Desk, Narrative Statement, and Quantitative Measurements Identifying Information amendments discussed above. First, the final rule would not require reporters to identify the legal entity used as a booking entity by the trading desk, but instead would require the reporting of a list of agencies receiving the submission of the trading desk and the exemptions or exclusions under which the desk conducts trading activity. Second, the final rule would not require reporters to identify products traded by the desk. Third, under the final rule, the submission of the Narrative Statement would be optional for reporters. The SEC believes that these aspects of the qualitative information amendments would mitigate any new burdens related to these requirements while facilitating oversight by the agencies.

However, the SEC recognizes that several proposed schedules in quantitative measurements identifying information may create reporting burdens. As discussed in section IV.E, the final rule does not require reporting of the risk factor sensitivities information schedule, the limit/sensitivity cross-reference schedule, and the risk-factor sensitivity/attribution cross-reference schedule. However, the final rules would require reporting of Risk Factor Attribution Information Schedules and Internal Limits Information Schedules that includes identification of the corresponding risk factor attribution for certain limits, imposing two new schedule requirements relative to the regulatory baseline under the 2013 rule. However, as discussed above, some reporters may currently use the same limits and risk factors for multiple desks, resulting in duplicative reporting of daily limits by multiple desks for a given reporter. To the extent that these reporters may choose to use the two new schedules to submit a comprehensive list of risk and position limits and risk-factor sensitivities, these schedules may reduce duplicative reporting burdens. The agencies have also received comment that the agencies have alternative tools for monitoring banking entity risk (such as the CCAR process) and that the risk factor attribution schedule does not adequately capture differences between risks managed by different trading desks of a banking entity.[1196] The SEC believes that the descriptions of the Internal Limits Information Schedule and Risk Factor Attribution Information Schedule for certain limits may inform oversight of SEC-regulated banking entities affiliated with reporters with respect to their compliance with the requirements of the final rule.

Moreover, the SEC continues to note that all the SEC-regulated entities that currently report metrics are also currently providing certain elements of the Trading Desk Information to the SEC. The SEC continues to believe that the costs associated with preparing the Narrative Statement will depend on the extent to which a banking entity modifies its calculation methods, makes changes to a trading desk's structure or trading strategies, or otherwise has additional information that it views as relevant for assessing the information reported. Preparation of a Narrative Statement is expected to be more of a manual process involving a written description of pertinent issues. However, all but one SEC reporter already provides a narrative with every submission.

In the proposal, the SEC estimated that the proposed Narrative Statement requirement is expected to result in ongoing personnel and monitoring costs of only $1,980.[1197] The agencies have received comment that this estimate of ongoing costs is a significant underestimate, since reporters will need to revise all of their metrics reporting systems and embark on a new round of systems integration with multiple agencies independently.[1198] The commenter indicated that the exercise is not dissimilar from the initial implementation of the 2013 rule's metrics.[1199] Another commenter supported retaining requirements of the 2013 rule since any metrics amendments would require modifications to measurement tools, involving burdens, testing time, and outsourcing costs of development staff.[1200]

The SEC agrees that the final rule will involve one-time costs to transition their systems and transition their compliance architecture to the amended metrics requirements for Group A entities, which are incorporated in the agencies' estimates in section V.B and in the SEC's analysis in section V.F.3.h.i. The SEC notes that its analysis is specific to SEC regulated banking entities and the estimates only represent a fraction of the compliance costs of holding companies allocated to affiliated SEC-regulated banking entities. The SEC also notes that the $1,980 estimate in the proposal was specific to the Narrative Statement requirement for one reporter, rather than the totality of the burdens imposed on registrants from new metrics requirements; and, under the final rule, the submission of the Narrative Statement is optional. Moreover, the SEC anticipates considerable variation in one-time system transition costs among reporters, depending on the size and complexity of their existing trading activity, the number of trading desks per reporter for the purposes of metrics reporting, the way in which reporters may organize reporting and compliance obligations for the purposes of, for instance, the market risk capital rule, and the complexity of their current systems.

However, recognizing the above comments concerning systems changes that all reporters may have to make for the purposes of reporting of qualitative information, the SEC now estimates that the combined one-time systems costs related to the submission of new qualitative information (including Trading Desk Information, Quantitative Measurements Identifying Information, and the optional Narrative Statement) may be as high as $22,500 for SEC-registered entities affiliated with a single Group A metrics reporter[1201] and

[1194] *See* SIFMA.

[1195] *See* Credit Suisse.

[1196] *See, e.g.,* SIFMA.

[1197] The SEC estimates that costs associated with the proposed Narrative Statement will be $11,000 per affiliated group of SEC-regulated banking entities. ($11,000 × 1 reporter × 0.18) = $1,980.

[1198] *See* SIFMA.

[1199] *Id.*

[1200] *See, e.g.,* JBA.

[1201] In Regulation Crowdfunding, the SEC estimated that intermediaries (whether broker-dealers or funding portals) that already have in place platforms and related systems that will need to tailor their existing platform and systems to comply with the requirements of Regulation Crowdfunding may incur an initial average cost of $250,000. *See* 80 FR 71509. Since the qualitative information requirements in the final rule are considerably more limited than the requirements in Regulation Crowdfunding, the SEC estimates that tailoring existing platforms and systems with respect to the qualitative information requirements for metrics reporters may be half as costly as the

Continued

$270,000 for all SEC-registered entities affiliated with all reporters.[1202] If transitioning reporting systems to meet the requirements of the final rule impose one-time costs and IT burdens comparable with those of the metrics requirements of the 2013 rule,[1203] the compliance costs related to the 2013 rule can be used to estimate potential one-time switching costs for some banking entities. In the proposal, the SEC reported an estimate from a market participant incurring approximately $3 million in costs associated with the buildout of new IT infrastructure and system enhancements.[1204] Using this estimate, the one-time costs related to transitioning metrics reporting to comply with the requirements of the final rule may be as high as $540,000 [1205] for SEC-registered dealers affiliated with a single Group A metrics reporter and as high as $6,480,000 [1206] for all SEC-registered entities affiliated with all reporters.

(4) Time to Report

The agencies are amending the time frame for metrics reporting by requiring quarterly reporting for all reporters and extending the timeline for metrics submissions to 30 days following the end of each calendar quarter. The SEC has received comments supporting a move to quarterly reporting [1207] and an extended reporting timeframe for reporters with more than $50 billion in trading assets and liabilities [1208] and stating that such timeframes account for the scale and complexity of profit and loss reconciliations as well as the internal compliance and governance processes of such banking entities. The SEC also notes that, to the extent that the shorter timeframe for submission may result in later resubmissions to correct errors, the increase in time for some reporters may decrease compliance burdens and make the information collection process more efficient.

As estimated in Table 5 of the economic baseline, this amendment would not affect the reporting schedule of four reporters with between $20 billion and $50 billion in trading assets and liabilities and would provide additional flexibility and time to eight reporters with over $50 billion in trading assets and liabilities. In addition to reductions in compliance burdens, the final rule may also involve greater improvements in the number of banking entities reporting on time and in the quality of submissions. As estimated in Panel A of Table 7, approximately 66% of all records submitted by reporters with over $50 billion in trading assets and liabilities are resubmitted to the SEC at least once. In addition, from Panel B of Table 7, the average delay in initial submissions is approximately 2 days. The SEC notes that in addition to resulting in potentially higher quality submissions with fewer resubmissions, under the final rule the agencies may not receive the information as promptly. However, the SEC will continue to have access to quantitative metrics and related information through the standard examination and review process and existing recordkeeping requirements.

(5) XML Format

The agencies are requiring banking entities to submit the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement in accordance with the XML Schema specified and published on the relevant agency's website.[1209] Under the 2013 rule, the metrics are not required to be reported in a structured format, and banking entities are currently reporting quantitative measurement data electronically. In the proposal, the SEC noted that, on the basis of discussions with metrics reporters, most of these entities indicated a familiarity with XML, and further, several indicated that they use XML internally for other reporting purposes. In addition, banks currently submit quarterly Reports of Condition and Income (''Call Reports'') to the Federal Financial Institutions Examination Council (''FFIEC'') Central Data Repository in eXtensible Business Reporting Language (''XBRL'') format, an XML-based reporting language, so they are generally familiar with the processes and technology for submitting regulatory reports in a structured data format. The SEC believes that familiarity with these practices at the bank level will facilitate the implementation of these practices for SEC registrants. Furthermore, FINRA requires its member broker-dealers to file their FOCUS Reports in a structured format through its eFOCUS system.[1210] The eFOCUS system permits broker-dealers to import the FOCUS Report data into a filing using an Excel, XML, or text file. Therefore, the SEC continues to believe that SEC-regulated dealers covered by the metrics reporting and recordkeeping requirements may have experience applying the XML format to their data.

Reporting metrics and other information in XML allows data to be tagged, which in turn identifies the content of the underlying information. The data then becomes instantly machine readable through the use of standard software. Requiring banking entities to submit the metrics in accordance with the XML Schema would enhance the agencies' ability to process and analyze the data. Once the data is in a structured format, it can be easily organized for viewing, manipulation, and analysis through the use of commonly used software tools and applications. Structured data can allow the agencies to discern patterns from large quantities of information much more easily than unstructured data. The SEC continues to believe that structured data also facilitates the ability to dynamically search, aggregate, and compare information across submissions, whether within a banking entity, across multiple banking entities, or across multiple date ranges. The data supplied in a structured format could help the SEC identify outliers or trends that could warrant further investigation.

Specifying the format in which banking entities must report information may help ensure that the agencies receive consistently comparable information in an efficient manner across banking entities. The costs associated with providing XML data lie in the specialized software or services required to make the submission and the time required to map the required data elements to the requisite taxonomy. In addition to enhanced viewing, manipulation, and analysis, the benefits associated with providing XML data lie in the enhanced validation tools that minimize the likelihood that data are reported with errors. Therefore, subsequent reporting periods may require fewer resources, relative to both initial reporting periods under the final rule and the current reporting process.

In the proposal, the SEC recognized that, as a result of the proposed amendments, banking entities will be

cost estimate in Regulation Crowdfunding. $250,000 × 0.5 × 0.18 = $22,500.

[1202] $22,500 × 12 reporters = $270,000.

[1203] *See* SIFMA.

[1204] *Id.*

[1205] $3 million × 0.18 × 1 reporter = $540,000.

[1206] $540,000 × 12 reporters = $6,480,000.

[1207] *See, e.g.,* SIFMA.

[1208] *See, e.g.,* Goldman Sachs; Credit Suisse and FSF.

[1209] XML is an open standard, meaning that it is a technological standard that is widely available to the public at no cost. XML is also widely used across the industry.

[1210] For example, FINRA members commonly use FINRA's Web EFT system, which requires that all data be submitted in XML. *See http://www.finra.org/industry/web-crd/web-eft-schema-documentation-and-schema-files. Also see* 81 FR 49499. Information about FINRA's eFOCUS system is available at *http://www.finra.org/industry/focus.*

required to establish and implement systems in accordance with the XML Schema that will result in one-time costs and estimated such costs at an average of $75,000 [1211] per reporter, for an expected aggregate one-time cost of approximately $229,500 for all SEC registrants.[1212]

The agencies received several comments regarding the costs of transitioning to metrics reporting in an XML format. Some commenters indicated that they did not support the amendment as it would increase costs related to switching formats of reporting software and systems and supported the retention of existing (.DAT) format used for submissions but did not provide any quantification for the costs of switching to the .XML format.[1213] Other commenters generally supported metrics reporting in a standardized data format and the proposed transition to XML reporting.[1214] One commenter indicated that the transition to XML reporting of metrics will require significant switching costs and that there will also be ongoing costs because of potential changes to the XML schema or the underlying information to which the XML schema relates over time.[1215] Another commenter supported the XML reporting format and estimated that reporters would incur a one-time switching cost related to equipment, systems, training, and staffing or maintenance of $40,000 per banking entity.[1216]

The SEC continues to estimate that each reporter may incur a one-time switching cost of up to $75,000 but is adjusting the total aggregate reporting costs to reflect an updated count of metrics reporters with affiliated SEC-registered banking entities. As discussed in the economic baseline, using data from March 2018 through March 2019, the SEC estimates that 12 reporters with trading assets and liabilities in excess of $20 billion may be subject to the final metrics reporting amendments, resulting in an aggregate estimate of a one-time switching cost of $162,000 for all SEC registrants.[1217] Moreover, since the final rule involves a single one-time change to the reporting format, the SEC continues to believe that SEC-regulated banking entities will not incur significant ongoing costs from this aspect of the final rule. Moreover, the SEC continues to believe that XML reporting will result in a more efficient submission process, including validation of submissions, and anticipates that some of the implementation costs may be offset over time by these greater efficiencies.

ii. Competition, Efficiency, and Capital Formation

Under the amendments, entities that have between $10 and $20 billion in trading assets and liabilities would incur lower costs of compliance as they would no longer be subject to metrics requirements. To the extent that these compliance burdens may be significant for some entities, and since Group B entities are not subject to any metrics requirements, Group A entities close to the threshold may become more competitive with Group B entities. To the extent that some entities are currently experiencing significant metrics-reporting costs and partially or fully passing them along to customers in the form of reduced willingness to transact or higher costs, the final rule may reduce costs of and increase access to capital. However, estimated reporting and recordkeeping burden savings resulting from the final rule are relatively modest, and the SEC does not anticipate a substantial increase in access to capital as a result of the final rule to metrics reporting requirements.

iii. Alternatives

The agencies could have taken several alternative approaches. First, the agencies could have kept the metrics being reported unchanged, but increased or decreased the trading activity thresholds used to determine metrics recordkeeping and reporting by filers and the frequency of such reporting. For instance, the agencies could have used the $10 billion trading activity threshold as proposed. As shown in Table 2, the SEC estimates that this alternative would affect nine bank-affiliated SEC-registered broker-dealers. The alternative would increase the amount and frequency of quantitative data available for regulatory oversight of banking entities. However, under the alternative, these dealers would be required to keep or report metrics, experiencing higher compliance burdens. Similarly, increasing the recordkeeping and reporting thresholds would reduce the scope of application of the metrics reporting requirement, lowering accompanying recordkeeping and reporting obligations as well as potential oversight and supervision benefits. The SEC continues to recognize that while metrics may be used to flag risks and enhance general supervision, as well as demonstrate prudent risk management, metrics being reported under the 2013 rule do not clearly distinguish proprietary trading from market making or hedging activities.

In addition, the agencies could have eliminated the VaR requirement [1218] or replaced VaR with Expected Shortfall [1219] as a potentially better measure of tail risk of a trading desk or banking entity.[1220] The SEC recognizes that VaR and Expected Shortfall are normally based on firm-wide activity, and some entities may not be routinely using such measures to manage and control risk at the trading desk level. As a result, VaR, or Expected Shortfall limits may not be meaningful at the trading desk level. These alternatives

---

[1211] These cost estimates were based in part on the SEC's recent estimates of the one-time systems costs associated with the proposed requirement that security-based swap data repositories (SDRs) make transaction-level security-based swap data available to the SEC in Financial products Markup Language (FpML) and Financial Information eXchange Markup Language (FIXML). *See* Establishing the Form and Manner with which Security-Based Swap Data Repositories Must Make Security-Based Swap Data Available to the Commission, Exchange Act Release No. 76624 (Dec. 11, 2015), 80 FR 79757 (Dec. 23, 2015) (SBS Taxonomy rule proposing release). The SBS Taxonomy rule proposing release estimates a one-time cost per SDR of $127,000. Although the substance of reporting associated with the metrics is different from the information collected and made available by SDRs, in the Proposing Release, the SEC stated that similar costs may apply to the implementation of XML for the reporting metrics. In particular, on the basis of its experience with similar structured data reporting requirements in other contexts (*e.g.,* the SBS Taxonomy rule), the SEC expected that systems engineering fixed costs will represent the bulk of the costs related to the XML requirement. Among other things, the proposed SBS Taxonomy rule would require SDRs to make available to the SEC in a specific format (in this case, FpML or FIXML) transaction-level data that they are already required to provide. Similarly, in the Proposing Release, the SEC noted that the proposed metrics amendments would require banking entities to produce in XML metrics reports that they are already required (or will be required) to provide. However, the SEC's estimate was reduced to account for the fact that registered broker-dealers already provide eFOCUS reports to FINRA in XML and, therefore, must have the requisite systems in place. The SEC's cost estimates at proposal included responsibilities for modifications of information technology systems to an attorney, a compliance Manager, a programmer analyst, and a senior business analyst and responsibilities for policies and procedures to an attorney, a compliance Manager, a senior systems analyst, and an operations specialist.

[1212] In the Proposing Release, the SEC computed total costs as follows: $75,000 × 17 reporters × 0.18 entity weight = $229,500.

[1213] *See, e.g.,* JBA and Credit Suisse.

[1214] *See, e.g.,* Goldman Sachs and Data Boiler.

[1215] *See* SIFMA.

[1216] *See* Data Boiler.

[1217] $75,000 × 12 reporters × 0.18 entity weight = $162,000.

[1218] *See, e.g.,* Goldman Sachs.

[1219] Expected Shortfall is an estimate of the expected value of losses beyond a given confidence level and is generally calculated as the area under the probability distribution of asset or portfolio returns in the left tail. For an expected shortfall at the 99 percent confidence level, the measure would capture the area under the probability distribution from the 99th percentile to the 100th percentile. *See* Saunders and Cornett (2014), pp. 458–461.

[1220] *See, e.g.,* Data Boiler.

may reduce the burden of reporting and compliance costs relative to the approach being adopted without necessarily reducing the effectiveness of regulatory oversight by the SEC. In addition, VaR and Expected Shortfall may not be informative about banking entity compliance with section 13 of the BHC Act but may help agencies understand the tail risk of supervised entities as a part of ongoing oversight and supervision.

The agencies could have required all Group A banking entities to report metrics on a monthly basis within 20 days of the end of the calendar month. The SEC believes that this alternative would have two partly offsetting effects relative to the baseline. First, the reporters with more than $50 billion in trading assets and liabilities, which are required to report metrics monthly and within 10 days of the end of each calendar month under the 2013 rule, would, under the alternative, have 20 days after the end of each calendar month to report metrics. As estimated in Table 5 of the economic baseline, this aspect of the alternative would affect eight reporters with SEC-registered affiliated banking entities. Second, reporters with more than $20 billion but less than $50 billion in trading assets and liabilities are required to report metrics on a quarterly basis and have 30 days after the end of reach calendar month to do so under the 2013 rule. Under the alternative, these reporters would be required to report on a monthly basis and would have 10 fewer days to do so, relative to the baseline. As estimated in Table 5, this aspect of the alternative would affect four reporters with SEC-registered affiliated banking entities. Thus, the effects of the alternative on the compliance costs and resubmissions of data, as well on changes to the timeliness of data available to the SEC, would likely to be partly offsetting for these two groups of reporters.

The SEC recognizes that the alternative would increase how promptly the SEC receives data from some SEC-registered banking entities relative to the baseline and the final rule. However, more frequent reporting may also decrease the quality of submissions and the need for resubmissions by some SEC-registered banking entities. In addition, because processes enabling more frequent reporting under tight deadlines may generally be costlier, the alternative would result in even smaller reductions in compliance costs for reporters.

The agencies could have eliminated all quantitative metrics recordkeeping and reporting requirements under Appendix A of the 2013 rule.[1221] Alternatively, the agencies could have eliminated all quantitative metrics except for Risk Management and Source of Revenue Metrics.[1222] The SEC recognizes that these alternatives would reduce the amount of data produced and transmitted to the agencies. Metrics reporting enables regulators to have a more complete picture of risk exposures from trading and profit and loss attribution for supervised entities. However, the metrics reporting regime is costly, and banking entities subject to the 2013 rule and SEC oversight are also subject to other compliance and reporting requirements unrelated to the 2013 rule, as well as the standard examination and review process. It is not clear that metrics are superior to internal quantitative risk measurements or other data (such as metrics in the FOCUS reports) reported by SEC-registered broker-dealers in illustrating risk exposures and profitability of various activities by SEC registrants. As previously noted, metrics—such as VaR, dealer inventory, transaction volume, and profit and loss attribution—do not delineate a prohibited proprietary trade and a permitted market making, underwriting or hedging trade. In addition, reporting at the trading desk level may obscure potential prohibited proprietary trades since a banking entity could attempt to accumulate large proprietary trading exposures by allocating them to a large number of trading desks and comingling these proprietary positions with customer facilitation positions for reporting purposes. For example, as can be seen from Table 6 of the economic baseline, reporters across various trading assets and liabilities thresholds currently report metrics for an average or 38 to 56 trading desks. Moreover, reporters' flexibility in defining the metrics may reduce their comparability. The SEC continues to recognize that metrics do not delineate a prohibited proprietary trade and a permitted market making, underwriting or hedging trade, but they may be used to enhance regulatory oversight. The SEC notes that reporters are already currently subject to a large number of reporting obligations unrelated to section 13 of the BHC Act, such as those under the Market Risk Capital rule and Form FOCUS reporting requirements, providing large volumes of distinct data that can be used to flag risks and enhance general supervision. However, as discussed above, the SEC recognizes that metrics may have value for ongoing oversight, and the final rule tailors and streamlines metrics reporting requirements rather than eliminating all metrics as a whole.

[1221] *See* New England Council.

[1222] *See, e.g.,* New England Council and State Street.

As discussed elsewhere in this supplementary information, the final rule has a compliance date of January 1, 2021, while enabling early voluntary compliance with the final rule (subject to the agencies' completion of necessary technological changes). This approach recognizes the heterogeneity in the existing compliance burdens related to the 2013 rule and in the one-time burdens and time costs that different banking entities may incur as a result of transitioning their compliance programs, while preserving continuity of metrics reporting and agency oversight. The SEC has considered alternative approaches adopting more (or less) delayed compliance dates and disallowing voluntary early compliance with some aspects of the final rule. Such alternatives would provide more (or less) time to transition their compliance programs and adapt reporting systems to the requirements of the final rule. Moreover, as discussed elsewhere in this economic analysis, the SEC continues to believe that the final rule may result in significant burden reductions for some banking entities. Alternatives disallowing early voluntary compliance would delay the benefits of such burden reductions for the most affected banking entities.

G. Congressional Review Act

For the SEC, the Office of Information and Regulatory Affairs, pursuant to the Congressional Review Act (CRA), has designated this rule as a ''major rule'' as defined by 5 U.S.C. 804(2). For the FDIC and OCC, the Office of Information and Regulatory Affairs, pursuant to the CRA, has designated this rule as not a ''major rule.''

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Chapter I

Authority and Issuance

For the reasons stated in the Common Preamble, the Office of the Comptroller of the Currency amends chapter I of Title 12, Code of Federal Regulations as follows:

PART 44—PROPRIETARY TRADING AND CERTAIN INTERESTS IN AND RELATIONSHIPS WITH COVERED FUNDS

■ 1. The authority citation for part 44 continues to read as follows:

Authority: 7 U.S.C. 27 *et seq.,* 12 U.S.C. 1, 24, 92a, 93a, 161, 1461, 1462a, 1463, 1464, 1467a, 1813(q), 1818, 1851, 3101 3102, 3108, 5412.

Subpart A—Authority and Definitions

■ 2. Section 44.2 is revised to read as follows:

§ 44.2 Definitions.

Unless otherwise specified, for purposes of this part:

(a) *Affiliate* has the same meaning as in section 2(k) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(k)).

(b) *Bank holding company* has the same meaning as in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841).

(c) *Banking entity.* (1) Except as provided in paragraph (c)(2) of this section, *banking entity* means:

(i) Any insured depository institution;

(ii) Any company that controls an insured depository institution;

(iii) Any company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978 (12 U.S.C. 3106); and

(iv) Any affiliate or subsidiary of any entity described in paragraph (c)(1)(i), (ii), or (iii) of this section.

(2) Banking entity does not include:

(i) A covered fund that is not itself a banking entity under paragraph (c)(1)(i), (ii), or (iii) of this section;

(ii) A portfolio company held under the authority contained in section 4(k)(4)(H) or (I) of the BHC Act (12 U.S.C. 1843(k)(4)(H), (I)), or any portfolio concern, as defined under 13 CFR 107.50, that is controlled by a small business investment company, as defined in section 103(3) of the Small Business Investment Act of 1958 (15 U.S.C. 662), so long as the portfolio company or portfolio concern is not itself a banking entity under paragraph (c)(1)(i), (ii), or (iii) of this section; or

(iii) The FDIC acting in its corporate capacity or as conservator or receiver under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

(d) *Board* means the Board of Governors of the Federal Reserve System.

(e) *CFTC* means the Commodity Futures Trading Commission.

(f) *Dealer* has the same meaning as in section 3(a)(5) of the Exchange Act (15 U.S.C. 78c(a)(5)).

(g) *Depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)).

(h) *Derivative.* (1) Except as provided in paragraph (h)(2) of this section, *derivative* means:

(i) Any swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68));

(ii) Any purchase or sale of a commodity, that is not an excluded commodity, for deferred shipment or delivery that is intended to be physically settled;

(iii) Any foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)) or foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25));

(iv) Any agreement, contract, or transaction in foreign currency described in section 2(c)(2)(C)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(C)(i));

(v) Any agreement, contract, or transaction in a commodity other than foreign currency described in section 2(c)(2)(D)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(D)(i)); and

(vi) Any transaction authorized under section 19 of the Commodity Exchange Act (7 U.S.C. 23(a) or (b));

(2) A derivative does not include:

(i) Any consumer, commercial, or other agreement, contract, or transaction that the CFTC and SEC have further defined by joint regulation, interpretation, or other action as not within the definition of swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68)); or

(ii) Any identified banking product, as defined in section 402(b) of the Legal Certainty for Bank Products Act of 2000 (7 U.S.C. 27(b)), that is subject to section 403(a) of that Act (7 U.S.C. 27a(a)).

(i) *Employee* includes a member of the immediate family of the employee.

(j) *Exchange Act* means the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

(k) *Excluded commodity* has the same meaning as in section 1a(19) of the Commodity Exchange Act (7 U.S.C. 1a(19)).

(l) *FDIC* means the Federal Deposit Insurance Corporation.

(m) *Federal banking agencies* means the Board, the Office of the Comptroller of the Currency, and the FDIC.

(n) *Foreign banking organization* has the same meaning as in § 211.21(o) of the Board's Regulation K (12 CFR 211.21(o)), but does not include a foreign bank, as defined in section 1(b)(7) of the International Banking Act of 1978 (12 U.S.C. 3101(7)), that is organized under the laws of the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, or the Commonwealth of the Northern Mariana Islands.

(o) *Foreign insurance regulator* means the insurance commissioner, or a similar official or agency, of any country other than the United States that is engaged in the supervision of insurance companies under foreign insurance law.

(p) *General account* means all of the assets of an insurance company except those allocated to one or more separate accounts.

(q) *Insurance company* means a company that is organized as an insurance company, primarily and predominantly engaged in writing insurance or reinsuring risks underwritten by insurance companies, subject to supervision as such by a state insurance regulator or a foreign insurance regulator, and not operated for the purpose of evading the provisions of section 13 of the BHC Act (12 U.S.C. 1851).

(r) *Insured depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)), but does not include:

(1) An insured depository institution that is described in section 2(c)(2)(D) of the BHC Act (12 U.S.C. 1841(c)(2)(D)); or

(2) An insured depository institution if it has, and if every company that controls it has, total consolidated assets of $10 billion or less and total trading assets and trading liabilities, on a consolidated basis, that are 5 percent or less of total consolidated assets.

(s) *Limited trading assets and liabilities* means with respect to a banking entity that:

(1)(i) The banking entity has, together with its affiliates and subsidiaries, trading assets and liabilities (excluding trading assets and liabilities attributable to trading activities permitted pursuant to § 44.6(a)(1) and (2) of subpart B) the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1 billion; and

(ii) The OCC has not determined pursuant to § 44.20(g) or (h) of this part that the banking entity should not be treated as having limited trading assets and liabilities.

(2) With respect to a banking entity other than a banking entity described in paragraph (s)(3) of this section, trading assets and liabilities for purposes of this paragraph (s) means trading assets and liabilities (excluding trading assets and liabilities attributable to trading activities permitted pursuant to § 44.6(a)(1) and (2) of subpart B) on a worldwide consolidated basis.

(3)(i) With respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, trading assets and liabilities for purposes of this paragraph (s) means the trading assets and liabilities (excluding trading assets and liabilities attributable to trading activities permitted pursuant to § 44.6(a)(1) and (2) of subpart B) of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States).

(ii) For purposes of paragraph (s)(3)(i) of this section, a U.S. branch, agency, or subsidiary of a banking entity is located in the United States; however, the foreign bank that operates or controls that branch, agency, or subsidiary is not considered to be located in the United States solely by virtue of operating or controlling the U.S. branch, agency, or subsidiary. For purposes of paragraph (s)(3)(i) of this section, all foreign operations of a U.S. agency, branch, or subsidiary of a foreign banking organization are considered to be located in the United States, including branches outside the United States that are managed or controlled by a U.S. branch or agency of the foreign banking organization, for purposes of calculating the banking entity's U.S. trading assets and liabilities.

(t) *Loan* means any loan, lease, extension of credit, or secured or unsecured receivable that is not a security or derivative.

(u) *Moderate trading assets and liabilities* means, with respect to a banking entity, that the banking entity does not have significant trading assets and liabilities or limited trading assets and liabilities.

(v) *Primary financial regulatory agency* has the same meaning as in section 2(12) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 5301(12)).

(w) *Purchase* includes any contract to buy, purchase, or otherwise acquire. For security futures products, purchase includes any contract, agreement, or transaction for future delivery. With respect to a commodity future, purchase includes any contract, agreement, or transaction for future delivery. With respect to a derivative, purchase includes the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(x) *Qualifying foreign banking organization* means a foreign banking organization that qualifies as such under § 211.23(a), (c), or (e) of the Board's Regulation K (12 CFR 211.23(a), (c), or (e)).

(y) *SEC* means the Securities and Exchange Commission.

(z) *Sale* and *sell* each include any contract to sell or otherwise dispose of. For security futures products, such terms include any contract, agreement, or transaction for future delivery. With respect to a commodity future, such terms include any contract, agreement, or transaction for future delivery. With respect to a derivative, such terms include the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(aa) *Security* has the meaning specified in section 3(a)(10) of the Exchange Act (15 U.S.C. 78c(a)(10)).

(bb) *Security-based swap dealer* has the same meaning as in section 3(a)(71) of the Exchange Act (15 U.S.C. 78c(a)(71)).

(cc) *Security future* has the meaning specified in section 3(a)(55) of the Exchange Act (15 U.S.C. 78c(a)(55)).

(dd) *Separate account* means an account established and maintained by an insurance company in connection with one or more insurance contracts to hold assets that are legally segregated from the insurance company's other assets, under which income, gains, and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company.

(ee) *Significant trading assets and liabilities* means with respect to a banking entity that:

(1)(i) The banking entity has, together with its affiliates and subsidiaries, trading assets and liabilities the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equals or exceeds $20 billion; or

(ii) The OCC has determined pursuant to § 44.20(h) of this part that the banking entity should be treated as having significant trading assets and liabilities.

(2) With respect to a banking entity, other than a banking entity described in paragraph (ee)(3) of this section, trading assets and liabilities for purposes of this paragraph (ee) means trading assets and liabilities (excluding trading assets and liabilities attributable to trading activities permitted pursuant to § 44.6(a)(1) and (2) of subpart B) on a worldwide consolidated basis.

(3)(i) With respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, trading assets and liabilities for purposes of this paragraph (ee) means the trading assets and liabilities (excluding trading assets and liabilities attributable to trading activities permitted pursuant to § 44.6(a)(1) and (2) of subpart B) of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States as well as branches outside the United States that are managed or controlled by a branch or agency of the foreign banking entity operating, located or organized in the United States).

(ii) For purposes of paragraph (ee)(3)(i) of this section, a U.S. branch, agency, or subsidiary of a banking entity is located in the United States; however, the foreign bank that operates or controls that branch, agency, or subsidiary is not considered to be located in the United States solely by virtue of operating or controlling the U.S. branch, agency, or subsidiary. For purposes of paragraph (ee)(3)(i) of this section, all foreign operations of a U.S. agency, branch, or subsidiary of a foreign banking organization are considered to be located in the United States for purposes of calculating the banking entity's U.S. trading assets and liabilities.

(ff) *State* means any State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, and the Commonwealth of the Northern Mariana Islands.

(gg) *Subsidiary* has the same meaning as in section 2(d) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(d)).

(hh) *State insurance regulator* means the insurance commissioner, or a similar official or agency, of a State that is engaged in the supervision of insurance companies under State insurance law.

(ii) *Swap dealer* has the same meaning as in section 1(a)(49) of the Commodity Exchange Act (7 U.S.C. 1a(49)).

Subpart B—Proprietary Trading

■ 3. Section 44.3 is amended by:
■ a. Revising paragraphs (b), (d)(3), and (d)(8) and (9);
■ b. Adding paragraphs (d)(10) through (13);
■ c. Redesignating paragraphs (e)(5) through (13) as paragraphs (e)(6) through (14);
■ d. Adding new paragraph (e)(5); and
■ e. Revising newly redesignated paragraphs (e)(11), (12), and (14).

The revisions and additions read as follows:

§ 44.3 Prohibition on proprietary trading.

* * * * *

(b) *Definition of trading account.* (1) *Trading account.* Trading account means:

(i) Any account that is used by a banking entity to purchase or sell one or more financial instruments principally for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging one or more of the positions resulting from the purchases or sales of financial instruments described in this paragraph;

(ii) Any account that is used by a banking entity to purchase or sell one or more financial instruments that are both market risk capital rule covered positions and trading positions (or hedges of other market risk capital rule covered positions), if the banking entity, or any affiliate with which the banking entity is consolidated for regulatory reporting purposes, calculates risk-based capital ratios under the market risk capital rule; or

(iii) Any account that is used by a banking entity to purchase or sell one or more financial instruments, if the banking entity:

(A) Is licensed or registered, or is required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such; or

(B) Is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in connection with the activities of such business.

(2) *Trading account application for certain banking entities.* (i) A banking entity that is subject to paragraph (b)(1)(ii) of this section in determining the scope of its trading account is not subject to paragraph (b)(1)(i) of this section.

(ii) A banking entity that does not calculate risk-based capital ratios under the market risk capital rule and is not a consolidated affiliate for regulatory reporting purposes of a banking entity that calculates risk based capital ratios under the market risk capital rule may elect to apply paragraph (b)(1)(ii) of this section in determining the scope of its trading account as if it were subject to that paragraph. A banking entity that elects under this section to apply paragraph (b)(1)(ii) of this section in determining the scope of its trading account as if it were subject to that paragraph is not required to apply paragraph (b)(1)(i) of this section.

(3) *Consistency of account election for certain banking entities.* (i) Any election or change to an election under paragraph (b)(2)(ii) of this section must apply to the electing banking entity and all of its wholly owned subsidiaries. The primary financial regulatory agency of a banking entity that is affiliated with but is not a wholly owned subsidiary of such electing banking entity may require that the banking entity be subject to this uniform application requirement if the primary financial regulatory agency determines that it is necessary to prevent evasion of the requirements of this part after notice and opportunity for response as provided in subpart D of this part.

(ii) A banking entity that does not elect under paragraph (b)(2)(ii) of this section to be subject to the trading account definition in (b)(1)(ii) of this section may continue to apply the trading account definition in paragraph (b)(1)(i) of this section for one year from the date on which it becomes, or becomes a consolidated affiliate for regulatory reporting purposes with, a banking entity that calculates risk-based capital ratios under the market risk capital rule.

(4) *Rebuttable presumption for certain purchases and sales.* The purchase (or sale) of a financial instrument by a banking entity shall be presumed not to be for the trading account of the banking entity under paragraph (b)(1)(i) of this section if the banking entity holds the financial instrument for sixty days or longer and does not transfer substantially all of the risk of the financial instrument within sixty days of the purchase (or sale).

* * * * *

(d) * * *

(3) Any purchase or sale of a security, foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)), foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25)), or cross-currency swap by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan of the banking entity that:

(i) Specifically contemplates and authorizes the particular financial instruments to be used for liquidity management purposes, the amount, types, and risks of these financial instruments that are consistent with liquidity management, and the liquidity circumstances in which the particular financial instruments may or must be used;

(ii) Requires that any purchase or sale of financial instruments contemplated and authorized by the plan be principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes;

(iii) Requires that any financial instruments purchased or sold for liquidity management purposes be highly liquid and limited to financial instruments the market, credit, and other risks of which the banking entity does not reasonably expect to give rise to appreciable profits or losses as a result of short-term price movements;

(iv) Limits any financial instruments purchased or sold for liquidity management purposes, together with any other financial instruments purchased or sold for such purposes, to an amount that is consistent with the banking entity's near-term funding needs, including deviations from normal operations of the banking entity or any affiliate thereof, as estimated and documented pursuant to methods specified in the plan;

(v) Includes written policies and procedures, internal controls, analysis, and independent testing to ensure that the purchase and sale of financial instruments that are not permitted under § 44.6(a) or (b) of this subpart are for the purpose of liquidity management and in accordance with the liquidity management plan described in this paragraph (d)(3); and

(vi) Is consistent with the OCC's regulatory requirements regarding liquidity management;

* * * * *

(8) Any purchase or sale of one or more financial instruments by a banking entity through a deferred compensation, stock-bonus, profit-sharing, or pension plan of the banking entity that is established and administered in accordance with the law of the United States or a foreign sovereign, if the purchase or sale is made directly or indirectly by the banking entity as trustee for the benefit of persons who are or were employees of the banking entity;

(9) Any purchase or sale of one or more financial instruments by a banking entity in the ordinary course of collecting a debt previously contracted in good faith, provided that the banking entity divests the financial instrument as soon as practicable, and in no event may the banking entity retain such instrument for longer than such period permitted by the OCC;

(10) Any purchase or sale of one or more financial instruments that was made in error by a banking entity in the course of conducting a permitted or excluded activity or is a subsequent transaction to correct such an error;

(11) Contemporaneously entering into a customer-driven swap or customer-driven security-based swap and a matched swap or security-based swap if:

(i) The banking entity retains no more than minimal price risk; and

(ii) The banking entity is not a registered dealer, swap dealer, or security-based swap dealer;

(12) Any purchase or sale of one or more financial instruments that the banking entity uses to hedge mortgage servicing rights or mortgage servicing assets in accordance with a documented hedging strategy; or

(13) Any purchase or sale of a financial instrument that does not meet the definition of trading asset or trading liability under the applicable reporting form for a banking entity as of January 1, 2020.

(e) * * *

(5) *Cross-currency swap* means a swap in which one party exchanges with another party principal and interest rate payments in one currency for principal and interest rate payments in another currency, and the exchange of principal occurs on the date the swap is entered into, with a reversal of the exchange of principal at a later date that is agreed upon when the swap is entered into.

* * * * *

(11) *Market risk capital rule covered position and trading position* means a financial instrument that meets the criteria to be a covered position and a trading position, as those terms are respectively defined, without regard to whether the financial instrument is reported as a covered position or trading position on any applicable regulatory reporting forms:

(i) In the case of a banking entity that is a bank holding company, savings and loan holding company, or insured depository institution, under the market risk capital rule that is applicable to the banking entity; and

(ii) In the case of a banking entity that is affiliated with a bank holding company or savings and loan holding company, other than a banking entity to which a market risk capital rule is applicable, under the market risk capital rule that is applicable to the affiliated bank holding company or savings and loan holding company.

(12) *Market risk capital rule* means the market risk capital rule that is contained in 12 CFR part 3, subpart F, with respect to a banking entity for which the OCC is the primary financial regulatory agency, 12 CFR part 217 with respect to a banking entity for which the Board is the primary financial regulatory agency, or 12 CFR part 324 with respect to a banking entity for which the FDIC is the primary financial regulatory agency.

* * * * *

(14) *Trading desk* means a unit of organization of a banking entity that purchases or sells financial instruments for the trading account of the banking entity or an affiliate thereof that is:

(i)(A) Structured by the banking entity to implement a well-defined business strategy;

(B) Organized to ensure appropriate setting, monitoring, and management review of the desk's trading and hedging limits, current and potential future loss exposures, and strategies; and

(C) Characterized by a clearly defined unit that:

(*1*) Engages in coordinated trading activity with a unified approach to its key elements;

(*2*) Operates subject to a common and calibrated set of risk metrics, risk levels, and joint trading limits;

(*3*) Submits compliance reports and other information as a unit for monitoring by management; and

(*4*) Books its trades together; or

(ii) For a banking entity that calculates risk-based capital ratios under the market risk capital rule, or a consolidated affiliate for regulatory reporting purposes of a banking entity that calculates risk-based capital ratios under the market risk capital rule, established by the banking entity or its affiliate for purposes of market risk capital calculations under the market risk capital rule.

■ 4. Section 44.4 is revised to read as follows:

§ 44.4 Permitted underwriting and market making-related activities.

(a) *Underwriting activities*—(1) *Permitted underwriting activities.* The prohibition contained in § 44.3(a) does not apply to a banking entity's underwriting activities conducted in accordance with this paragraph (a).

(2) *Requirements.* The underwriting activities of a banking entity are permitted under paragraph (a)(1) of this section only if:

(i) The banking entity is acting as an underwriter for a distribution of securities and the trading desk's underwriting position is related to such distribution;

(ii)(A) The amount and type of the securities in the trading desk's underwriting position are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, taking into account the liquidity, maturity, and depth of the market for the relevant types of securities; and

(B) Reasonable efforts are made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant types of securities;

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (a) of this section, including reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing:

(A) The products, instruments or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities;

(B) Limits for each trading desk, in accordance with paragraph (a)(2)(ii)(A) of this section;

(C) Written authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval; and

(D) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits.

(iv) A banking entity with significant trading assets and liabilities may satisfy the requirements in paragraphs (a)(2)(iii)(B) and (C) of this section by complying with the requirements set forth in paragraph (c) of this section;

(v) The compensation arrangements of persons performing the activities described in this paragraph (a) are designed not to reward or incentivize prohibited proprietary trading; and

(vi) The banking entity is licensed or registered to engage in the activity described in this paragraph (a) in accordance with applicable law.

(3) *Definition of distribution.* For purposes of this paragraph (a), a distribution of securities means:

(i) An offering of securities, whether or not subject to registration under the Securities Act of 1933, that is distinguished from ordinary trading transactions by the presence of special selling efforts and selling methods; or

(ii) An offering of securities made pursuant to an effective registration statement under the Securities Act of 1933.

(4) *Definition of underwriter.* For purposes of this paragraph (a), *underwriter* means:

(i) A person who has agreed with an issuer or selling security holder to:

(A) Purchase securities from the issuer or selling security holder for distribution;

(B) Engage in a distribution of securities for or on behalf of the issuer or selling security holder; or

(C) Manage a distribution of securities for or on behalf of the issuer or selling security holder; or

(ii) A person who has agreed to participate or is participating in a distribution of such securities for or on behalf of the issuer or selling security holder.

(5) *Definition of selling security holder.* For purposes of this paragraph (a), *selling security holder* means any person, other than an issuer, on whose behalf a distribution is made.

(6) *Definition of underwriting position.* For purposes of this section, *underwriting position* means the long or short positions in one or more securities held by a banking entity or its affiliate, and managed by a particular trading desk, in connection with a particular distribution of securities for which such banking entity or affiliate is acting as an underwriter.

(7) *Definition of client, customer, and counterparty.* For purposes of this paragraph (a), the terms *client, customer, and counterparty,* on a collective or individual basis, refer to market participants that may transact with the banking entity in connection with a particular distribution for which the banking entity is acting as underwriter.

(b) *Market making-related activities*—(1) *Permitted market making-related activities.* The prohibition contained in § 44.3(a) does not apply to a banking entity's market making-related activities conducted in accordance with this paragraph (b).

(2) *Requirements.* The market making-related activities of a banking entity are permitted under paragraph (b)(1) of this section only if:

(i) The trading desk that establishes and manages the financial exposure, routinely stands ready to purchase and sell one or more types of financial instruments related to its financial exposure, and is willing and available to quote, purchase and sell, or otherwise enter into long and short positions in those types of financial instruments for its own account, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the relevant types of financial instruments;

(ii) The trading desk's market-making related activities are designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties, taking into account the liquidity, maturity, and depth of the market for the relevant types of financial instruments;

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this paragraph (b), including reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing:

(A) The financial instruments each trading desk stands ready to purchase and sell in accordance with paragraph (b)(2)(i) of this section;

(B) The actions the trading desk will take to demonstrably reduce or otherwise significantly mitigate promptly the risks of its financial exposure consistent with the limits required under paragraph (b)(2)(iii)(C) of this section; the products, instruments, and exposures each trading desk may use for risk management purposes; the techniques and strategies each trading desk may use to manage the risks of its market making-related activities and positions; and the process, strategies, and personnel responsible for ensuring that the actions taken by the trading desk to mitigate these risks are and continue to be effective;

(C) Limits for each trading desk, in accordance with paragraph (b)(2)(ii) of this section;

(D) Written authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval; and

(E) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits.

(iv) A banking entity with significant trading assets and liabilities may satisfy the requirements in paragraphs (b)(2)(iii)(C) and (D) by complying with the requirements set forth in paragraph (c) of this section;

(v) The compensation arrangements of persons performing the activities described in this paragraph (b) are designed not to reward or incentivize prohibited proprietary trading; and

(vi) The banking entity is licensed or registered to engage in activity described in this paragraph (b) in accordance with applicable law.

(3) *Definition of client, customer, and counterparty.* For purposes of this paragraph (b), the terms *client, customer, and counterparty,* on a collective or individual basis refer to market participants that make use of the banking entity's market making-related services by obtaining such services, responding to quotations, or entering into a continuing relationship with respect to such services, provided that:

(i) A trading desk or other organizational unit of another banking entity is not a client, customer, or counterparty of the trading desk if that other entity has trading assets and liabilities of $50 billion or more as measured in accordance with the methodology described in § 44.2(ee) of this part, unless:

(A) The trading desk documents how and why a particular trading desk or other organizational unit of the entity should be treated as a client, customer, or counterparty of the trading desk for purposes of paragraph (b)(2) of this section; or

(B) The purchase or sale by the trading desk is conducted anonymously on an exchange or similar trading facility that permits trading on behalf of a broad range of market participants.

(ii) [Reserved]

(4) *Definition of financial exposure.* For purposes of this section, *financial exposure* means the aggregate risks of one or more financial instruments and any associated loans, commodities, or foreign exchange or currency, held by a banking entity or its affiliate and managed by a particular trading desk as part of the trading desk's market making-related activities.

(5) *Definition of market-maker positions.* For the purposes of this section, *market-maker positions* means all of the positions in the financial instruments for which the trading desk stands ready to make a market in accordance with paragraph (b)(2)(i) of this section, that are managed by the trading desk, including the trading desk's open positions or exposures arising from open transactions.

(c) *Rebuttable presumption of compliance*—(1) *Internal limits.* (i) A banking entity shall be presumed to meet the requirement in paragraph (a)(2)(ii)(A) or (b)(2)(ii) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the internal limits for the relevant trading desk as described in paragraph (c)(1)(ii) of this section.

(ii)(A) With respect to underwriting activities conducted pursuant to paragraph (a) of this section, the presumption described in paragraph (c)(1)(i) of this section shall be available to each trading desk that establishes, implements, maintains, and enforces internal limits that should take into account the liquidity, maturity, and depth of the market for the relevant types of securities and are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's underwriting activities, on the:

(*1*) Amount, types, and risk of its underwriting position;

(*2*) Level of exposures to relevant risk factors arising from its underwriting position; and

(*3*) Period of time a security may be held.

(B) With respect to market making-related activities conducted pursuant to paragraph (b) of this section, the presumption described in paragraph (c)(1)(i) of this section shall be available to each trading desk that establishes, implements, maintains, and enforces internal limits that should take into account the liquidity, maturity, and depth of the market for the relevant types of financial instruments and are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's market-making related activities, that address the:

(*1*) Amount, types, and risks of its market-maker positions;

(*2*) Amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes;

(*3*) Level of exposures to relevant risk factors arising from its financial exposure; and

(*4*) Period of time a financial instrument may be held.

(2) *Supervisory review and oversight.* The limits described in paragraph (c)(1) of this section shall be subject to supervisory review and oversight by the OCC on an ongoing basis.

(3) *Limit breaches and increases.* (i) With respect to any limit set pursuant to paragraph (c)(1)(ii)(A) or (B) of this section, a banking entity shall maintain and make available to the OCC upon request records regarding:

(A) Any limit that is exceeded; and

(B) Any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the OCC.

(ii) In the event of a breach or increase of any limit set pursuant to paragraph (c)(1)(ii)(A) or (B) of this section, the presumption described in paragraph (c)(1)(i) of this section shall continue to be available only if the banking entity:

(A) Takes action as promptly as possible after a breach to bring the trading desk into compliance; and

(B) Follows established written authorization procedures, including escalation procedures that require review and approval of any trade that exceeds a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval.

(4) *Rebutting the presumption.* The presumption in paragraph (c)(1)(i) of this section may be rebutted by the OCC if the OCC determines, taking into account the liquidity, maturity, and depth of the market for the relevant types of financial instruments and based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The OCC's rebuttal of the presumption in paragraph (c)(1)(i) must be made in accordance with the notice and response procedures in subpart D of this part.

■ 5. Section 44.5 is amended by revising paragraphs (b) and (c)(1) introductory text and adding paragraph (c)(4) to read as follows:

§ 44.5 Permitted risk-mitigating hedging activities.

* * * * *

(b) *Requirements.* (1) The risk-mitigating hedging activities of a banking entity that has significant trading assets and liabilities are permitted under paragraph (a) of this section only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures regarding the positions, techniques and strategies that may be used for hedging, including documentation indicating what positions, contracts or other holdings a particular trading desk may use in its risk-mitigating hedging activities, as well as position and aging limits with respect to such positions, contracts or other holdings;

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(C) The conduct of analysis and independent testing designed to ensure that the positions, techniques and strategies that may be used for hedging may reasonably be expected to reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged;

(ii) The risk-mitigating hedging activity:

(A) Is conducted in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section;

(D) Is subject to continuing review, monitoring and management by the banking entity that:

(*1*) Is consistent with the written hedging policies and procedures required under paragraph (b)(1)(i) of this section;

(*2*) Is designed to reduce or otherwise significantly mitigate the specific, identifiable risks that develop over time from the risk-mitigating hedging activities undertaken under this section and the underlying positions, contracts, and other holdings of the banking entity, based upon the facts and circumstances of the underlying and hedging positions, contracts and other holdings of the banking entity and the risks and liquidity thereof; and

(*3*) Requires ongoing recalibration of the hedging activity by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(1)(ii) of this section and is not prohibited proprietary trading; and

(iii) The compensation arrangements of persons performing risk-mitigating hedging activities are designed not to reward or incentivize prohibited proprietary trading.

(2) The risk-mitigating hedging activities of a banking entity that does not have significant trading assets and liabilities are permitted under paragraph (a) of this section only if the risk-mitigating hedging activity:

(i) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof; and

(ii) Is subject, as appropriate, to ongoing recalibration by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(2) of this section and is not prohibited proprietary trading.

(c) * * *

(1) A banking entity that has significant trading assets and liabilities must comply with the requirements of paragraphs (c)(2) and (3) of this section, unless the requirements of paragraph (c)(4) of this section are met, with respect to any purchase or sale of financial instruments made in reliance on this section for risk-mitigating hedging purposes that is:

* * * * *

(4) The requirements of paragraphs (c)(2) and (3) of this section do not apply to the purchase or sale of a financial instrument described in paragraph (c)(1) of this section if:

(i) The financial instrument purchased or sold is identified on a written list of pre-approved financial instruments that are commonly used by the trading desk for the specific type of hedging activity for which the financial instrument is being purchased or sold; and

(ii) At the time the financial instrument is purchased or sold, the hedging activity (including the purchase or sale of the financial instrument) complies with written, pre-approved limits for the trading desk purchasing or selling the financial instrument for hedging activities undertaken for one or more other trading desks. The limits shall be appropriate for the:

(A) Size, types, and risks of the hedging activities commonly undertaken by the trading desk;

(B) Financial instruments purchased and sold for hedging activities by the trading desk; and

(C) Levels and duration of the risk exposures being hedged.

■ 6. Section 44.6 is amended by revising paragraph (e)(3), removing paragraphs (e)(4) and (6), and redesignating paragraph (e)(5) as paragraph (e)(4).

The revision reads as follows:

§ 44.6 Other permitted proprietary trading activities.

* * * * *

(e) * * *

(3) A purchase or sale by a banking entity is permitted for purposes of this paragraph (e) if:

(i) The banking entity engaging as principal in the purchase or sale (including relevant personnel) is not located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State; and

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

* * * * *

Subpart C—Covered Funds Activities and Investments

■ 7. Section 44.10 is amended by revising paragraphs (c)(7)(ii) and (c)(8)(i)(A) to read as follows:

§ 44.10 Prohibition on Acquiring or Retaining an Ownership Interest in and Having Certain Relationships with a Covered Fund.

* * * * *

(c) * * *

(7) * * *

(ii) Participates in the profits and losses of the separate account other than in compliance with applicable requirements regarding bank owned life insurance.

(8) * * *

(i) * * *

(A) Loans as defined in § 44.2(t) of subpart A;

* * * * *

■ 8. Section 44.11 is amended by revising paragraph (c) to read as follows:

§ 44.11 Permitted organizing and offering, underwriting, and market making with respect to a covered fund.

* * * * *

(c) *Underwriting and market making in ownership interests of a covered fund.* The prohibition contained in § 44.10(a) of this subpart does not apply to a banking entity's underwriting activities or market making-related activities involving a covered fund so long as:

(1) Those activities are conducted in accordance with the requirements of § 44.4(a) or (b) of subpart B, respectively; and

(2) With respect to any banking entity (or any affiliate thereof) that: Acts as a sponsor, investment adviser or commodity trading advisor to a particular covered fund or otherwise acquires and retains an ownership interest in such covered fund in reliance on paragraph (a) of this section; or acquires and retains an ownership interest in such covered fund and is either a securitizer, as that term is used in section 15G(a)(3) of the Exchange Act (15 U.S.C. 78*o*–11(a)(3)), or is acquiring and retaining an ownership interest in such covered fund in compliance with section 15G of that Act (15 U.S.C. 78*o*–11) and the implementing regulations issued thereunder each as permitted by paragraph (b) of this section, then in each such case any ownership interests acquired or retained by the banking entity and its affiliates in connection with underwriting and market making related activities for that particular covered fund are included in the calculation of ownership interests permitted to be held by the banking entity and its affiliates under the limitations of § 44.12(a)(2)(ii) and (iii) and (d).

§ 44.12 [Amended]

■ 9. Section 44.12 is amended by redesignating the second instance of paragraph (e)(2)(vi) as paragraph (e)(2)(vii).

■ 10. Section 44.13 is amended by revising paragraphs (a), (b)(3) and (4), and (c) to read as follows:

§ 44.13 Other permitted covered fund activities and investments.

(a) *Permitted risk-mitigating hedging activities.* (1) The prohibition contained in § 44.10(a) of this subpart does not apply with respect to an ownership interest in a covered fund acquired or retained by a banking entity that is designed to reduce or otherwise significantly mitigate the specific, identifiable risks to the banking entity in connection with:

(i) A compensation arrangement with an employee of the banking entity or an affiliate thereof that directly provides investment advisory, commodity trading advisory or other services to the covered fund; or

(ii) A position taken by the banking entity when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund.

(2) The risk-mitigating hedging activities of a banking entity are permitted under this paragraph (a) only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program in accordance with subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures; and

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(ii) The acquisition or retention of the ownership interest:

(A) Is made in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedge, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks arising:

(*1*) Out of a transaction conducted solely to accommodate a specific customer request with respect to the covered fund; or

(*2*) In connection with the compensation arrangement with the employee that directly provides investment advisory, commodity trading advisory, or other services to the covered fund;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section; and

(D) Is subject to continuing review, monitoring and management by the banking entity.

(iii) With respect to risk-mitigating hedging activity conducted pursuant to paragraph (a)(1)(i) of this section, the compensation arrangement relates solely to the covered fund in which the banking entity or any affiliate has acquired an ownership interest pursuant to paragraph (a)(1)(i) and such compensation arrangement provides that any losses incurred by the banking entity on such ownership interest will be offset by corresponding decreases in amounts payable under such compensation arrangement.

(b) * * *

(3) An ownership interest in a covered fund is not offered for sale or sold to a resident of the United States for purposes of paragraph (b)(1)(iii) of this section only if it is not sold and has not been sold pursuant to an offering that targets residents of the United States in which the banking entity or any affiliate of the banking entity participates. If the banking entity or an affiliate sponsors or serves, directly or indirectly, as the investment manager, investment adviser, commodity pool operator or commodity trading advisor to a covered fund, then the banking entity or affiliate will be deemed for purposes of this paragraph (b)(3) to participate in any offer or sale by the covered fund of ownership interests in the covered fund.

(4) An activity or investment occurs solely outside of the United States for purposes of paragraph (b)(1)(iv) of this section only if:

(i) The banking entity acting as sponsor, or engaging as principal in the acquisition or retention of an ownership interest in the covered fund, is not itself, and is not controlled directly or indirectly by, a banking entity that is located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to acquire or retain the ownership interest or act as sponsor to the covered fund is not located in the United States or organized under the laws of the United States or of any State; and

(iii) The investment or sponsorship, including any transaction arising from risk-mitigating hedging related to an ownership interest, is not accounted for as principal directly or indirectly on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

* * * * *

(c) *Permitted covered fund interests and activities by a regulated insurance company.* The prohibition contained in § 44.10(a) of this subpart does not apply to the acquisition or retention by an insurance company, or an affiliate thereof, of any ownership interest in, or the sponsorship of, a covered fund only if:

(1) The insurance company or its affiliate acquires and retains the ownership interest solely for the general account of the insurance company or for one or more separate accounts established by the insurance company;

(2) The acquisition and retention of the ownership interest is conducted in compliance with, and subject to, the insurance company investment laws and regulations of the State or jurisdiction in which such insurance company is domiciled; and

(3) The appropriate Federal banking agencies, after consultation with the Financial Stability Oversight Council and the relevant insurance commissioners of the States and foreign jurisdictions, as appropriate, have not jointly determined, after notice and comment, that a particular law or regulation described in paragraph (c)(2) of this section is insufficient to protect the safety and soundness of the banking entity, or the financial stability of the United States.

■ 11. Section 44.14 is amended by revising paragraph (a)(2)(ii)(B) to read as follows:

§ 44.14 Limitations on relationships with a covered fund.

(a) * * *

(2) * * *

(ii) * * *

(B) The chief executive officer (or equivalent officer) of the banking entity certifies in writing annually no later than March 31 to the OCC (with a duty to update the certification if the information in the certification materially changes) that the banking entity does not, directly or indirectly, guarantee, assume, or otherwise insure the obligations or performance of the covered fund or of any covered fund in which such covered fund invests; and

* * * * *

Subpart D—Compliance Program Requirement; Violations

■ 12. Section 44.20 is amended by revising paragraphs (a), (b) introductory text, (c), (d), (e) introductory text, and (f)(2) and adding paragraphs (g), (h), and (i) to read as follows:

§ 44.20 Program for compliance; reporting.

(a) *Program requirement.* Each banking entity (other than a banking entity with limited trading assets and liabilities) shall develop and provide for the continued administration of a compliance program reasonably designed to ensure and monitor compliance with the prohibitions and restrictions on proprietary trading and covered fund activities and investments set forth in section 13 of the BHC Act and this part. The terms, scope, and detail of the compliance program shall be appropriate for the types, size, scope, and complexity of activities and business structure of the banking entity.

(b) *Banking entities with significant trading assets and liabilities.* With respect to a banking entity with significant trading assets and liabilities, the compliance program required by paragraph (a) of this section, at a minimum, shall include:

* * * * *

(c) *CEO attestation.* The CEO of a banking entity that has significant trading assets and liabilities must, based on a review by the CEO of the banking entity, attest in writing to the OCC, each year no later than March 31, that the banking entity has in place processes to establish, maintain, enforce, review, test and modify the compliance program required by paragraph (b) of this section in a manner reasonably designed to achieve compliance with section 13 of the BHC Act and this part. In the case of a U.S. branch or agency of a foreign banking entity, the attestation may be provided for the entire U.S. operations of the foreign banking entity by the senior management officer of the U.S. operations of the foreign banking entity who is located in the United States.

(d) *Reporting requirements under appendix A to this part.* (1) A banking entity engaged in proprietary trading activity permitted under subpart B of this part shall comply with the reporting requirements described in appendix A to this part, if:

(i) The banking entity has significant trading assets and liabilities; or

(ii) The OCC notifies the banking entity in writing that it must satisfy the reporting requirements contained in appendix A to this part.

(2) *Frequency of reporting:* Unless the OCC notifies the banking entity in writing that it must report on a different basis, a banking entity subject to the Appendix shall report the information required by appendix A to this part for each quarter within 30 days of the end of the quarter.

(e) *Additional documentation for covered funds.* A banking entity with significant trading assets and liabilities shall maintain records that include:

* * * * *

(f) * * *

(2) *Banking entities with moderate trading assets and liabilities.* A banking entity with moderate trading assets and liabilities may satisfy the requirements of this section by including in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act and this part and adjustments as appropriate given the activities, size, scope, and complexity of the banking entity.

(g) *Rebuttable presumption of compliance for banking entities with limited trading assets and liabilities*—(1) *Rebuttable presumption.* Except as otherwise provided in this paragraph, a banking entity with limited trading assets and liabilities shall be presumed to be compliant with subpart B and subpart C of this part and shall have no obligation to demonstrate compliance with this part on an ongoing basis.

(2) *Rebuttal of presumption.* If upon examination or audit, the OCC determines that the banking entity has engaged in proprietary trading or covered fund activities that are otherwise prohibited under subpart B or subpart C of this part, the OCC may require the banking entity to be treated under this part as if it did not have limited trading assets and liabilities. The OCC's rebuttal of the presumption in this paragraph must be made in accordance with the notice and response procedures in paragraph (i) of this section.

(h) *Reservation of authority.* Notwithstanding any other provision of this part, the OCC retains its authority to require a banking entity without significant trading assets and liabilities to apply any requirements of this part that would otherwise apply if the banking entity had significant or moderate trading assets and liabilities if the OCC determines that the size or complexity of the banking entity's trading or investment activities, or the risk of evasion of subpart B or subpart C of this part, does not warrant a presumption of compliance under paragraph (g) of this section or treatment as a banking entity with moderate trading assets and liabilities, as applicable. The OCC's exercise of this reservation of authority must be made in accordance with the notice and response procedures in paragraph (i) of this section.

(i) *Notice and response procedures*—(1) *Notice.* The OCC will notify the banking entity in writing of any determination requiring notice under this part and will provide an explanation of the determination.

(2) *Response.* The banking entity may respond to any or all items in the notice described in paragraph (i)(1) of this section. The response should include any matters that the banking entity would have the OCC consider in deciding whether to make the determination. The response must be in writing and delivered to the designated OCC official within 30 days after the date on which the banking entity received the notice. The OCC may shorten the time period when, in the opinion of the OCC, the activities or condition of the banking entity so requires, provided that the banking

entity is informed of the time period at the time of notice, or with the consent of the banking entity. In its discretion, the OCC may extend the time period for good cause.

(3) *Waiver.* Failure to respond within 30 days or such other time period as may be specified by the OCC shall constitute a waiver of any objections to the OCC's determination.

(4) *Decision.* The OCC will notify the banking entity of the decision in writing. The notice will include an explanation of the decision.

■ 13. Revise appendix A to part 44 to read as follows:

Appendix A to Part 44—Reporting and Recordkeeping Requirements for Covered Trading Activities

I. Purpose
