

Need and Proposed Use of the Information: National RWHAP client-level data is collected through the RWHAP Client Level Data Reporting System. The RWHAP Client Level Data Reporting System dataset (OMB control number 0915–0323) is HRSA's primary source of annual, client-level data collected from its nearly 2,000 funded grant recipients/service providers and the data have been used to assess the numbers and types of clients receiving services and limited HIV outcomes. However, the RWHAP Client Level Data Reporting System dataset does not include relevant data in order to fully assess the extent to which the care provided by RWHAP service providers is meeting the HHS and USPSTF guidelines. This proposed new information collection request will

provide the full range of HIV outpatient ambulatory health services, primary care, and screening and treatment for hepatitis, STIs, and opioid use disorder data and allow HRSA to assess the extent to which care provided by RWHAP service providers meets the HHS and USPSTF guidelines.

Likely Respondents: HRSA RWHAP Part A, Part B, Part C, and Part D service providers funded to deliver outpatient ambulatory health services to eligible clients.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose

of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

The burden estimate increased by 25 hours (0.5 hour increase for each medical record data abstraction) to a total of 225 hours (previous estimate was 200 hours as published in the 60-day notice on May 10, 2019 in Vol. 84, No. 91, pages 20638–20639). The burden estimate increased as the result of a pilot of the data collection forms.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Provider Site screening interview	100	1	100	0.5	50
Provider Pre-Site Visit Interview	50	1	50	1.0	50
Medical Record Data Abstraction	50	1	50	2.5	125
Total	200		200		225

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

National Vaccine Injury Compensation Program: Revised Amount of the Average Cost of a Health Insurance Policy

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: HRSA is publishing an updated monetary amount of the average cost of a health insurance policy as it relates to the National Vaccine Injury Compensation Program (VICP).

SUPPLEMENTARY INFORMATION: Section 100.2 of VICP's implementing regulation (42 CFR part 100) states that the revised amount of an average cost of a health insurance policy, as determined by the Secretary of HHS (the Secretary), is effective upon its delivery by the Secretary to the United States Court of Federal Claims (the Court), and will be published periodically in a notice in the **Federal Register**. The Secretary delegated this responsibility to the HRSA Administrator. This figure is calculated using the most recent Medical Expenditure Panel Survey–Insurance Component (MEPS–IC) data available as the baseline for the average monthly cost of a health insurance policy. This baseline is adjusted by the annual percentage increase/decrease obtained from the most recent annual Kaiser Family Foundation (KFF) Employer Health Benefits Survey or other authoritative source that may be more accurate or appropriate.

In 2019, MEPS–IC, available at www.meps.ahrq.gov, published the annual 2018 average total single

premium per enrolled employee at private-sector establishments that provide health insurance. The figure published was \$6,715. This figure is divided by 12 months to determine the cost per month of \$559.58. The \$559.58 figure is increased or decreased by the percentage change reported by the most recent KFF Employer Health Benefits Survey, available at www.kff.org. The percentage increase from 2018 to 2019 was 4.0 percent. By adding this percentage increase, the calculated average monthly cost of a health insurance policy for a 12-month period is \$581.96.

Therefore, the Secretary announces that the revised average cost of a health insurance policy under the VICP is \$581.96 per month. In accordance with § 100.2, the revised amount was effective upon its delivery by the Secretary to the Court. Such notice was delivered to the Court on November 7, 2019.

Dated: November 7, 2019.

Thomas J. Engels,

Acting Administrator.
