SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing collection of information requirements in accordance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and incidents (see 29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining said information (see 29 U.S.C. 657).

The collection of information specified in the Noise Standard (29 CFR

1910.95) protects workers from suffering material hearing impairment. The collection of information contained in the Noise Standard includes conducting noise monitoring; notifying workers when they are exposed at or above an 8-hour time-weighted average of 85 decibels (dBA); providing workers with initial and annual audiograms; notifying workers of a loss in hearing based on comparing audiograms; maintaining records of workplace noise exposure and workers' audiograms; and allowing workers access to materials and records required by the Standard.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

The agency is requesting an adjustment increase of burden hours associated with the collection of information in the Standard from 2,184,591 to 2,240,636 (a total increase of 56,045 hours). The agency is also requesting an adjustment increase in the cost under Item 13 from \$31,242,929 to \$34,812,006 (a total increase of \$3,569,077). The agency estimates that there are 215,624 establishments and 3,684,785 employees exposed to 85 dBA affected by the Standard. OSHA estimates that the number of establishments from the previous ICR decreased by 0.2%, while the estimated number of employees from the previous ICR increased by 2.5%. These estimated decreases and increases are based on updated County Business Pattern data for manufacturing.

Type of Review: Extension of a currently approved collection.

Title: Occupational Exposure to Noise Standard (29 CFR 1910.95).

OMB Control Number: 1218-0048.

Affected Public: Business or other for-profits.

Number of Respondents: 215,624.

Frequency of Responses: On occasion.

Average Time per Response: Various.
Estimated Total Burden Hours: 2,240,636.
