Background

On May 1, 2019, Commerce published in the **Federal Register** a notice of opportunity to request an administrative review of the antidumping duty (AD) order on certain circular welded carbon steel pipes and tubes from Taiwan for the period of review May 1, 2018, through April 30, 2019.¹ Pursuant to requests from interested parties, Commerce initiated an administrative review with respect to 27 companies in accordance with section 751(a) of the Tariff Act of 1930, as amended (the

Partial Rescission of Administrative Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if the party that requested the review withdraws its request within 90 days of the publication of the notice of initiation. For the companies for which this review is rescinded, antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instruction to CBP 15 days after publication of this notice in the **Federal Register**, if appropriate.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of any antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the presumption that reimbursement of any antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision of an existing information collection.

NOAA’s Office of Ocean Exploration and Research (OER) is the only federal organization dedicated to ocean exploration. By using unique capabilities in terms of personnel, technology, infrastructure, and exploration missions, OER is reducing unknowns in deep-ocean areas and providing high-value environmental intelligence needed by NOAA and the nation to address both current and emerging science and management needs. Our expertise, work products, and services generally fall into the areas of expedition planning and operations; marine archaeology; coastal and ocean mapping; science; technology; data management; and education.

Since the inception of NOAA’s exploration program in 2001, OER data management has been guided by the 2000 President’s Panel Report recommendations which prioritized rapid and unrestricted data sharing as one of five critical exploration program components. More recently, Public law 111-11 [Section XII Ocean Exploration] reinforced and expanded OER data management objectives, continuing to stress the importance of sharing unique exploration data and information to improve public understanding of the oceans, and for research and management purposes.

Telepresence satellite communication from the ship to shore brings the unknown ocean to the screens of both scientists and the general public in their homes, schools or offices in near real time. With technology constantly evolving it is important to address the needs of the shore-based scientists and public to maintain a high level of participation. We use voluntary surveys to identify the needs of users of data and best approaches to leverage expertise of shore-based participants for meaningful public engagement focused on ocean exploration.

This information collection consists of four forms. (1) Sailing Contact Information (new). This form is sent to the few scientists that directly sail on NOAA Ship *Okeanos Explorer*. The ship’s operational officer needs certain information such as: If a sailing individual has securely submitted their

proper medical documents to NOAA’s Office of Marine and Aviation Operations, if the person is up to date with required security documents such as a passport, if the ship is traveling to a foreign port, or any dietary restrictions so that the person will be served food that is safe. (2) *Okeanos Explorer* Participation Assessment. This voluntary form is sent to the scientists that sailed on any *Okeanos Explorer* cruise funded by NOAA’s Office of Ocean Exploration and Research to record any feedback they wish to provide to the office about their experience. The office uses their feedback in assessments for improving the utility and experience of these scientific guests sailing on the *Okeanos Explorer*. (3) EX Collaboration Tools Feedback (new). This voluntary form is sent to members of the marine scientific community at the beginning of a fiscal year to ask if members would like to participate in any of the upcoming cruises and to what degree, such as simply asking to be included in emailed updates or if they want to be on a direct line to the ship for remotely operated vehicle dive operations. (4) Citizen Scientist. This voluntary form is available to general members of the public and is used for members to improve the annotation efforts when watching short video clips of 30 seconds to 5 minutes.
