Type of Request: Intent to Seek Approval to Revise and Extend an Information Collection for a period of three years.

Abstract: The primary objective of the National Agricultural Statistics Service (NASS) is to collect, prepare and issue State and national estimates of crop and livestock production, prices, and disposition as well as economic statistics, environmental statistics related to agriculture and also to conduct the Census of Agriculture. The Cotton Ginning surveys provide cotton ginning statistics from August through May by State. Data collected consists of bales of cotton ginned to date, cotton to be ginned, lint cotton produced, cottonseed produced, cottonseed sold to oil mills, cottonseed used for other uses, number of gins by type, and bales produced by county of origin. The forecasting procedure involves calculating a weighted percent ginned to date as well as an allowance for cross-state movement and bale weight adjustments. Production by State allows adjustments for year-end State and county estimates. Total pounds of lint cotton produced, is used to derive an actual bale weight which increases the precision of production estimates.

Authority: These data will be collected under authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3501, et seq.) and Office of Management and Budget regulations at 5 CFR part 1320.
