NS explains that the subject cars are currently stenciled "MW" as per 49 CFR 215.305, and they will remain in that dedicated service. NS states it will add additional stenciling with the words "DO NOT OPERATE HANDBRAKE WHILE CAR IS IN MOTION" in the area of the hand brake. NS states it will add a handling message on the NS Internal Alert System notifying persons that the hand brakes on these cars cannot be operated while the cars are in motion.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2019-0090]

Petition for Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on November 12, 2019, Norfolk Southern Corporation (NS) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 232, *Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment*. FRA assigned the petition Docket Number FRA-2019-0090.

Specifically, NS seeks relief from § 232.305(b)(2), which requires a single car air brake test (SCABT) when a "car is on a shop or repair track . . . for any reason and has not received a [SCABT] within the previous 12-month period." NS requests to replace FRA-condemnable and other non-condemnable wheelsets on railcars as part of an in-train wheelset replacement program, without performing the required SCABT. NS explains that railcars due for 5- and 8-year SCABTs would still be addressed. The NS system alert notifications are viewable to NS repair personnel for railcars that are due SCABTs. NS asks that this relief apply to all NS unit trains receiving in-train wheel replacement as part of NS's in-train wheelset replacement program, on two designated tracks at the NS railyard in Bluefield, West Virginia.

NS desires to implement this program to proactively identify and replace wheelsets. In-train wheelset replacements can be done by NS mechanical forces in as little as 15

minutes with no need to remove the cars from trains. This reduces the number of switching events that would otherwise be required to repair cars, reducing the risk of injury and derailment. Additionally, in-train wheelset replacement will permit NS to replace a greater percentage of wheelsets than those currently replaced using traditional techniques.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Ave. SE, W12-140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal Holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. On June 18, 2019, FTA published a 60-day notice (84 FR 28383) in the **Federal Register** soliciting comments on the ICR that the agency was seeking OMB approval. Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507 (b)-(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30-day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983, Aug. 29, 1995.
