

and maintenance areas. A portion of the facility is sited on approximately 690 acres of public lands managed by the BLM. All the facilities are existing; no new construction is proposed. The project site is located within the California Desert Conservation Area.

This Notice informs the public that the BLM intends to prepare an EIS for the Project, and announces the beginning of the public scoping process for this effort. The purpose of the public scoping process is to determine the size and scope of analysis needed, additional issues to study, and mitigation measures that should be considered in the analysis of the proposed action.

Preliminary issues for the project have been identified by the BLM, other Federal agencies, the State, local agencies, and other stakeholders. Issues include air quality, special status wildlife and vegetation species, hazards and hazardous materials, hydrology and water quality.

Alternatives will include the proposed action, a no action alternative, and at least one more alternative designed to reduce environmental impacts.

Written comments may be submitted to the BLM at a scoping meeting or via one of the methods listed in the **ADDRESSES** section earlier. Input must be received by the close of the 30-day public scoping period.

The BLM will utilize and coordinate the NEPA scoping process to help fulfill the public involvement process under the National Historic Preservation Act (NHPA) (54 U.S.C. 306108 as provided in 36 CFR 800.2(d)(3)). The information about historic and cultural resources within the area potentially affected by the proposed action will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Indian tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with tribes and other stakeholders that may be interested in or affected by the proposed action that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your
