Foundation (NSF) is required to publish
a notice of permit applications received
to conduct activities regulated under the
Antarctic Conservation Act of 1978.
NSF has published regulations under the
Antarctic Conservation Act in the
Code of Federal Regulations. This is the
required notice of permit applications
received.**DATES:** Interested parties are invited to
submit written data, comments, or
views with respect to this permit
application by January 2, 2020. This

National Science Foundation, as
directed by the Antarctic Conservation
Act of 1978 (Pub. L. 95-541, 45 CFR
670), as amended by the Antarctic
Science, Tourism and Conservation Act
of 1996, has developed regulations for
the establishment of a permit system forvarious activities in Antarctica and
designation of certain animals and
certain geographic areas requiring
special protection. The regulations
establish such a permit system to
designate Antarctic Specially Protected
Areas.**Application Details***Permit Application: 2020-013*1. *Applicant:* Nicholas Teets,
Department of Entomology,
University of Kentucky, S-225
Agricultural Science Center, North,
Lexington, KY 40546.*Activity for Which Permit is**Requested:* Enter Antarctic Specially
Protected Area (ASPA). The applicant
proposes to collect midges (*Belgica
antarctica*) from sites along the
Antarctic Peninsula for physiology and
genetic studies. Sample collections
would require access to several ASPAs
(108, 126, & 134) and sites within
ASMA 7, Southwest Anvers Island and
Palmer Basin. Collection of the midges
would have minimal to no ecological
impacts. Any rocks disturbed would be
returned to their original location and
position. Very little, if any, plant
material would be removed and it
would typically be dead or decaying.
The local abundances of midges are very
high, so the sample collections are
expected to have very minimal impact
on local populations. The applicant
would also collect a small amount of
algae (*Prasiola crispa*) to serve as a food
source for midges in the laboratory.*Location:* Antarctic Peninsula region;
ASMA 7, Southwest Anvers Island and
Palmer Basin; ASPA 108, Green Island,
Berthelot Islands; ASPA 126, Byers
Peninsula, Livingston Island, South
Shetland Islands; ASPA 134 Cierva
Point and offshore islands, Danco Coast,
Antarctic Peninsula.*Dates of Permitted Activities:* January
1, 2020–July 1, 2022.*Permit Application: 2020-021*2. *Applicant:* Daniel P. Zitterbart,
Woods Hole Oceanographic
Institution, 266 Woods Hole Road,
Woods Hole, MA 02543-1050.*Activity for Which Permit is**Requested:* Take. The permit applicant
proposes to place short-term
deployment tags on humpback whales
(*Megaptera novaeangliae*) for the
purposes of studying their foraging
ecology. The applicant would deploy
digital acoustic recording tags (DTAGs)
onto humpback whales to record the
three-dimensional movement of the
animals, and the presence of feeding
lunges. DTAGs contain a 3-axis
accelerometer and magnetometer that

record the pitch, yaw, and heading of the whale at a high sampling rate (>50 Hz), as well as a pressure sensor that records the depth of the animal. A FastLoc® (Wildtrack Telemetry Systems Ltd) GPS tag will also be attached to the DTAG, allowing the position of the whale to be recorded throughout the deployment. To deploy the tag, a zodiac will be used to approach the whale, with the tag lowered onto the back of the whale using a carbon-fiber pole. Effort will be made to tag animals that are determined to be in transit or resting, and not currently feeding. The tags would be released from the whales after several hours and would be retrieved by the researchers. The applicant proposes to tag up to five adult or sub-adult humpback whales during the permit period (no calves would be tagged). Up to 70 additional whales, all ages, would potentially be approached and disturbed during the tagging efforts. The applicant and agents would also conduct water and oceanographic sampling, as well as deploy an echosounder and hydrophone, in order to study the availability of prey and oceanographic conditions during whale foraging. The study would be conducted during an expedition aboard a tour vessel operated by Polar Latitudes, Inc.

Location: West Antarctic Peninsula region.

Dates of Permitted Activities: February 27–March 31, 2020.

Erika N. Davis,

Program Specialist, Office of Polar Programs.
