

for the proposed modifications to the rail line—Modification 1B for Segment 1 and Modification 2C for Segment 2 (incorporating design changes the Port proposed in comments on the Draft Supplemental EA)⁶—based on the entire environmental record, including the comments received on the Draft Supplemental EA and the final recommended mitigation measures. (Final Supp. EA 5–1 to 5–2.) OEA considered and responded to the five comments received on the Draft Supplemental EA, which raised issues pertaining to fish, wildlife, and vegetation; hazardous materials; socioeconomics and environmental justice; traffic and transportation; water resources; and wetlands. (*Id.* at 3–1 to 3–11.) OEA also responded to Mr. Piercy's comment on the Port's petition to reopen, which raised issues pertaining to alternatives and traffic and transportation. (*Id.* at 3–1 to 3–2.) Lastly, OEA set forth its final recommended mitigation measures in Chapter 6 of the Final Supplemental EA. (*Id.* at 6–1 to 6–12.)

The Board's Analysis of the Environmental Issues. The Board adopts the analysis and conclusions in both the Draft Supplemental EA and Final Supplemental EA, and the final recommended mitigation measures. The Board is satisfied that OEA, together with the FRA, has taken the requisite hard look at the potential environmental impacts associated with the Port's proposal and properly determined that, with the recommended environmental mitigation in the Final Supplemental EA, the proposed project will not have potentially significant environmental impacts, and that preparation of an EIS is unnecessary.

Conclusion

In conclusion, after weighing the transportation merits and environmental issues, and considering the entire record, the Board authorizes the proposed route modifications to the Port's project that have been assessed in the Draft and Final Supplemental EAs, subject to compliance with the mitigation measures listed in Chapter 6 of the Final Supplemental EA.

This action, as conditioned, will not significantly impact the quality of the human environment or the conservation of energy resources.

It is ordered:

1. Under 49 U.S.C. 10502, the Board exempts construction of the Port's proposed route modifications from the prior approval requirements of 49 U.S.C. 10901.

2. The Board adopts the environmental mitigation measures set forth in the Final Supplemental EA and imposes them as conditions to the exemption granted here.

3. Notice will be published in the **Federal Register** on December 3, 2019.

4. Petitions for reconsideration must be filed by December 23, 2019.

5. This decision is effective January 2, 2020.

Decided: November 26, 2019.

By the Board, Board Members Begeman, Fuchs, and Oberman.

Kenyatta Clay,

Clearance Clerk.
