Sheila McConnell, Director, Office of Standards, Regulations, and Variances, MSHA, at MSHA.information.collections@dol.gov (email); (202) 693-9440 (voice); or (202) 693-9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

In this revision to OMB No. 1219-0144, it is being combined with OMB No. 1219-0078 (Expiring 2/29/2020) to be housed in OMB No. 1219-0144 only. The 5000-3 Form, which currently belongs to both OMB No.'s, will then cover one OMB No.

30 CFR part 49, subpart B—Mine Rescue Teams for Underground Coal Mines, sets standards related to the availability of mine rescue teams; alternate mine rescue capability for small and remote mines; inspection and maintenance records of mine rescue equipment and apparatus; physical requirements for mine rescue team members and alternates; and experience and training requirements for team members and alternates. The collection of information under 30 CFR part 49, subpart B, covers the following requirements for underground coal mines.

Section 49.12 requires each operator of an underground coal mine to send the District Manager a statement describing the mine's method of compliance with this standard.
