

Rubidium Elution System Version 3.0 directly infringes the asserted patents. *See* Order No. 27 (Feb. 8, 2019), *unreviewed*, Comm'n Notice (Mar. 8, 2019). In addition, the ID determines that Jubilant's RUBY Rubidium Elution System Version 3.1 and the RUBY Rubidium Elution System Version 4 do not directly infringe the asserted patents. *See id.* The ID (Order No. 27) declines to reach indirect infringement on summary determination. *See id.*

The ALJ conducted an evidentiary hearing on February 11–12 and 15–17, 2019, and on August 1, 2019, issued the FID finding no violation of section 337. Specifically, the FID finds that the domestic industry requirement is satisfied and that all the asserted claims are infringed but invalid as obvious over the prior art. The FID also contains the ALJ's Recommended Determination ("RD") recommending, should the Commission find a section 337 violation, that the Commission issue a limited exclusion order ("LEO") barring entry of articles that infringe the asserted claims. The RD does not recommend that the Commission issue a cease and desist order or impose a bond during the period of Presidential review. Furthermore, as directed by the Commission, the RD provides findings with respect to the public interest and recommends a determination that the public interest factors do not preclude entry of the proposed LEO.

On August 14, 2019, both Bracco and the Commission's Investigative Attorney ("IA") filed petitions for review of the FID. Bracco petitioned for review of the FID's findings with respect to invalidity, while the IA petitioned for review of the FID's findings with respect to domestic industry. On August 22, 2019, the parties filed responses to the respective petitions.

On September 30, 2019, the Commission determined to review the FID in part with respect to invalidity and domestic industry. *See* 84 FR 53177 (Oct. 4, 2019). The Commission determined not to review the remainder of the FID. *See id.*

Having considered the FID, the parties' petitions, responses thereto, and the record in this investigation, the Commission has determined to affirm with modification the FID's findings and conclusion of no violation of section 337. Specifically, as explained in the Commission Opinion issued concurrently herewith, the Commission has determined to affirm with modification and to supplement the FID's findings with respect to the invalidity of the asserted patent claims. The Commission has further determined to affirm in part and vacate in part the

FID's findings with respect to the domestic industry requirement. All findings in the FID that are not inconsistent with the Commission's final determination are affirmed. The investigation is terminated except with respect to the declassification proceeding presently before the Commission.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: December 2, 2019.

Lisa Barton,

Secretary to the Commission.

Attachment—Order Approving the Transfer of Licenses and Conforming Amendments

United States of America

Nuclear Regulatory Commission

In the Matter of: ZionSolutions, LLC, and Exelon Generation Company, LLC, Zion Nuclear Power Station, Units 1 and 2, EA-19-125.

Docket Nos. 50-295, 50-304, and 72-1037 License Nos. DPR-39 and DPR-48

Order Approving Transfer of Licenses and Conforming Amendments

I.

ZionSolutions, LLC (ZS) is the holder of Facility Operating License Nos. DPR-39 and DRP-48 for Zion Nuclear Power Station (ZNPS), Units 1 and 2, respectively, and the general license for the ZNPS independent spent fuel storage installation (ISFSI). ZS is authorized to possess and maintain ZNPS and the ZNPS ISFSI, which are located in Zion, Illinois. ZNPS is located on the west shore of lake Michigan approximately midway between Chicago, Illinois and Milwaukee, Wisconsin.

ZNPS Units 1 and 2 were both Westinghouse 3250 MWT pressurized-water reactors. Unit 1 was granted an operating license on October 19, 1973 and was shut

down on February 21, 1997. Unit 2 was granted an operating license on November 14, 1973 and was shut down on September 19, 1996.

In February 1998, pursuant to Title 10 of the *Code of Federal Regulations* (CFR) Part 50.82(a)(1)(i), the ZNPS licensee certified to the NRC that as of February 13, 1998, operations had permanently ceased at ZNPS and subsequently certified pursuant to 10 CFR 50.82(a)(1)(ii) that all fuel had been permanently removed from the units' reactor vessels (Agencywide Documents Access and Management System [ADAMS] Accession Nos. ML15232A492 and ML15232A487). Pursuant to 10 CFR 50.82(a)(2), operations or emplacement of fuel into the reactor vessels at ZNPS are no longer authorized under the licenses. On January 25, 2008, the ZNPS licensee submitted an application to transfer the ZNPS licenses from Exelon Generation Company, LLC (EGC) to ZS for the purpose of expedited decommissioning (ADAMS Accession No. ML080310521). The NRC consented to the license transfer on May 4, 2009 (ADAMS Accession No. ML090930037). Spent fuel transfer from the Spent Fuel Pool (SFP) to the ISFSI was completed on January 10, 2015. As of September 2019, the ZNPS site was in the final stages of radiological decommissioning, environmental remediation, and site restoration.

II.

By letter dated July 24, 2018 (ADAMS Accession No. ML18211A303), as supplemented by letters dated January 21, 2019 (ADAMS Accession No. ML19028A175) and February 8, 2019 (ADAMS Accession No. ML19043A673), ZS requested, on behalf of itself and EGC (collectively, the applicants), pursuant to Section 184 of the Atomic Energy Act of 1954, as amended, and Section 50.80, "Transfer of licenses," of 10 CFR, that the U.S. Nuclear Regulatory Commission (NRC, the Commission) consent to the transfer to EGC of Facility Operating License Nos. DPR-39 and DPR-48 for ZNPS, Units 1 and 2, respectively, and the generally licensed ZNPS ISFSI, which are currently held by ZS. Specifically, ZS intends to transfer its NRC-licensed possession, maintenance, and decommissioning authorities back to EGC upon the completion of the decommissioning activities at the ZNPS site. The application proposed no physical or operational changes to the facilities.

The NRC published a notice, "Zion Nuclear Power Station, Units 1 and 2: Zion Solutions, LLC, Application for direct transfer of facility operating license and conforming amendment; opportunity to comment, request a hearing, and petition for leave to intervene," in the *Federal Register* on September 24, 2018 (83 FR 48343). No comments or hearing requests were received.

Pursuant to 10 CFR 50.80, no license, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission gives its consent in writing. Upon review of the information in the application and other information before the Commission, and relying upon the representations and agreements contained in the application, the NRC staff has determined that EGC is
