

under the ESA. This policy may also guide the development of conservation efforts that sufficiently improve a species' status to make listing the species as threatened or endangered unnecessary. Under the PECE, the adequacy of conservation efforts is evaluated in terms of the certainty of their implementation and the certainty of their effectiveness. Criteria for evaluating the certainty of implementation include whether: The necessary resources are available; the necessary authority is in place; an agreement is formalized (*i.e.*, regulatory and procedural mechanisms are in place); there is a schedule for completion and evaluation; for voluntary measures, incentives to ensure necessary participation are in place; and there is agreement of all necessary parties to the measure or plan. Criteria for evaluating the certainty of effectiveness include whether the measure or plan: Includes a clear description of the factors for decline to be reduced; establishes specific conservation objectives; identifies necessary steps to reduce threats; includes quantifiable performance measures for monitoring compliance and effectiveness; employs principles of adaptive management; and is certain to improve the species' status at the time of listing determination. We request that any information submitted with respect to conservation measures, regulatory mechanisms, or other protective efforts that have yet to be implemented or show effectiveness explicitly address these criteria in the PECE.

If you wish to provide your information for this status review, please submit it as described in the **ADDRESSES** section above. We request that all information be accompanied by: (1) Supporting documentation such as maps, bibliographic references, or reprints of pertinent publications; and (2) the submitter's name, address, and any association, institution, or business that the person represents.
