reflect the most recent data. This category is dependent upon the number of decisions the states issued during the prior calendar year, and varies from year to year. The ETA 9054 report has been revised to correct a typographical error in Section A. The third time lapse category reads 45–60 (days), but should read 46–60 (days). The BTQ program collects information and analyzes data. The BTQ data measure the timeliness and quality of states’ administrative actions and administrative decisions related to unemployment insurance benefit payments. Sections 303(a)(1) and (a)(6) of the Social Security Act (42 U.S.C. 503(a)(1) and 503(a)(6)) authorize this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the ADDRESSES section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention OMB control number 1205–0359.

Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments. DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, (e.g., permitting electronic submission of responses).

SUPPLEMENTARY INFORMATION: DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the Office of Management and Budget (OMB) for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

Under Executive Orders 12073 and 10582, and 20 CFR parts 651 and 654, the Secretary of Labor is required to classify Labor Surplus Areas (LSAs) and disseminate this information for the use of all Federal agencies. This information is used by Federal agencies for various purposes including procurement decisions, waiver decisions for the Supplemental Nutritional Assistance Program, certain small business loan decisions, as well as other purposes determined by the agencies. The LSA list is issued annually, effective October 1 of each year, utilizing data from the Bureau of Labor Statistics. Areas meeting the criteria are classified as LSAs.

Department regulations specify that the Department can add other areas to the annual LSA listing under the exceptional circumstance criteria. Such additions are based on information contained in petitions submitted by the state workforce agencies (SWAs) to ETA. These petitions contain specific economic information about an area to provide ample justification for adding the area to the LSA listing under the exceptional circumstances criteria. The
petitions submitted by the SWAs concern various aspects of unemployment and the economic condition for a specific area in order to provide justification for adding the area to the LSA list under the exceptional circumstances criteria. Under these criteria, an area may be determined eligible for classification as a LSA if it is experiencing a high rate of unemployment which is not temporary or seasonal and which was not adequately reflected in the unemployment data for the two-year reference period. Instructions designed to assist SWAs in the preparation of such petitions are currently contained on the ETA website: http://www.doleta.gov/programs/lsa.cfm.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number.
