SUPPLEMENTARY INFORMATION: The Commission reports on water quality of the Red River as it crosses the boundary pursuant to a reference under Article IX of the Boundary Waters Treaty between the United States and Canada. Commission recommendations to the two federal governments under Article IX References of the Boundary Waters Treaty are not binding and not to be considered decisions of the two federal governments.

The International Red River Board was established by the Commission in part to assist in reporting on the water quality of the Red River as it crosses the boundary and to recommend amendments or additions to the water quality objectives approved by the U.S. and Canadian governments in 1968 when considered warranted by the Commission.

In the 2000s the IRRB identified nutrients as an issue of concern. The Board established a Water Quality Committee to develop recommendations for potential nutrient load allocations and/or targets. At the IRRB's September 2019 meeting the Board agreed to recommend the following nutrient concentration objectives and nutrient load targets for the Red River at the boundary between the U.S. and Canada: Nutrient concentration objective: Total Phosphorus 0.15 mg/L; Total Nitrogen 1.15 mg/L Application: Seasonal Average (April 1–October 30) Nutrient load target: Total Phosphorus 1,400 tonnes/year; Total Nitrogen 9,525 tonnes/year Application: Five year running average

Commissioners will be present to hear comments at the above referenced public hearing in Fargo, North Dakota on January 16, 2020 from 7–9 p.m. A public comment period on the IRRB's report will also be open through February 28, 2020. Public input is essential to the Commission's consideration of a recommendation to the Governments of the United States and Canada.

The International Joint Commission was established under the Boundary Waters Treaty of 1909 to help the United

States and Canada prevent and resolve disputes over the use of the waters the two countries share. Its responsibilities include investigating and reporting on issues of concern when asked by the governments of the two countries.

Title: Alternative Uses of the Right of Way.

Background: Government agencies that acquire real property for a Federal-aid highway project in which Federal funds participated in any phase, are charged with managing the acquired property after the project is completed, as described in 23 CFR 710 Subpart D—Real Property Management. As a part of this consideration, any excess or available right-of-way (ROW) for potential disposal must be determined and inventoried. Each State Department of Transportation (SDOT) must track, manage and update its inventory continually until the property is disposed.

This survey will collect information that will support analysis of the current state of the practice of Alternative Uses of the ROW nationwide. The report will identify current processes and tools used by SDOTs to identify and track ROW available for alternative uses, the types of alternative use requests they receive, and any safety, operational, or legal issues related to alternative uses. The survey will also identify additional opportunities for improving the existing processes, tools for identifying and tracking ROW that can streamline agencies' Property Management programs and provide information to states that have shown interest in alternative uses.

Respondents: Each of the 52 SDOTs (for the 50 states, the District of Columbia, and Puerto Rico) will be asked to respond to a written questionnaire. A subset of the state DOT's will be asked to participate in follow up interviews.

Frequency: One-time survey.

Estimated Average Burden per Response: Approximately 2 hours per survey response and 1 hour per interview.

Estimated Total Annual Burden Hours: Approximately 120 hours.

enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued On: December 19, 2019.
