**SUPPLEMENTARY INFORMATION:** On December 10, 2019, DOE published a notice in the **Federal Register** (84 FR 67438) on the publication of the Draft SRS DWPF Recycle Wastewater EA. The Draft SRS DWPF Recycle Wastewater EA evaluates the potential impacts from a proposed action to retrieve, stabilize, and dispose of up to 10,000 gallons of Defense Waste Processing Facility (DWPF) recycle wastewater from Savannah River Site (SRS) at a commercial low-level radioactive waste disposal facility located outside of South Carolina, licensed by either the Nuclear Regulatory Commission (NRC) or an Agreement State under NRC's regulations regarding licensing requirements for land disposal of radioactive waste. If implemented, this proposal would provide alternative treatment and disposal options for up to 10,000 gallons of DWPF recycle wastewater through the use of existing, licensed, off-site commercial facilities.

DOE has determined that an extension of the public comment period on the Draft SRS DWPF Recycle Wastewater EA is appropriate, and is hereby extending the comment period an additional 32 days with the public comment period ending on February 10, 2020.

Signed at Washington, DC, on December 20, 2019.

**Mark S. Senderling,**

*Deputy Assistant Secretary for Waste and Materials Management, Office of Regulatory and Policy Affairs, Office of Environmental Management, U.S. Department of Energy.*
