

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: www.nhlbi.nih.gov/meetings/nhlbac/index.htm, where an agenda and any additional information for the meeting will be posted when available.

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Molecular, Cellular and Developmental Neuroscience Integrated Review Group; Neurodifferentiation, Plasticity, Regeneration and Rhythmicity Study Section.

Date: February 4–5, 2020.

Time: 9:00 a.m. to 1:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Embassy Suites Alexandria Old Town, 1900 Diagonal Road, Alexandria, VA 22314.

Contact Person: Joanne T. Fujii, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4184, MSC 7850, Bethesda, MD 20892, (301) 435-1178, fujij@csr.nih.gov.

Name of Committee: Musculoskeletal, Oral and Skin Sciences Integrated Review Group; Musculoskeletal Tissue Engineering Study Section.

Date: February 5–6, 2020.

Time: 8:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Virginian Suites, 1500 Arlington Boulevard, Arlington, VA 22209.

Contact Person: Baljit S. Moonga, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4214, MSC 7806, Bethesda, MD 20892, 301-435-1777, moongabs@mail.nih.gov.

Name of Committee: Genes, Genomes, and Genetics Integrated Review Group; Molecular Genetics B Study Section.

Date: February 5, 2020.

Time: 8:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Four Points Los Angeles Westside, 5990 Green Valley Circle, Culver City, CA 90230.

Coast Guard

[Docket Number USCG-2019-0882]

BNSF Railway Bridge Across the Missouri River at Bismarck, North Dakota; Preparation of Environmental Impact Statement

AGENCY: Coast Guard, DHS.

ACTION: Notice of intent to prepare an EIS; and request for comments.

SUMMARY: In accordance with the National Environmental Policy Act of 1969 (NEPA) and the regulations implemented by the Council on Environmental Quality (CEQ), and the National Historic Preservation Act (NHPA), the Coast Guard announces its intent to prepare an Environmental Impact Statement (EIS) to evaluate the potential environmental consequences of replacing the existing BNSF bridge across the Missouri River at Bismarck, ND, or constructing a bridge adjacent to the existing bridge. CEQ regulations require an early and open process for determining the scope of issues that the Coast Guard needs to address in an EIS (“scoping”). Scoping determines which issues to analyze in depth in the EIS and eliminates from detailed study the issues that are not significant or were covered in prior environmental reviews. This document invites the participation of affected federal, state, and local agencies, any affected Indian tribes and other interested persons in determining the appropriate issues for EIS analysis for this project.

DATES: Comments must be submitted to the online docket via <https://www.regulations.gov/>, on or before February 24, 2020.

ADDRESSES: You may submit comments identified by docket number USCG-2019-0882 using the Federal eRulemaking Portal at <https://www.regulations.gov/>. See the “Public Participation and Request for Comments” portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Rob McCaskey, Coast Guard District Eight Project Officer, 314-269-2381.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

BNSF Railway Company owns and operates the existing bridge that crosses the Missouri River between the cities of Mandan, and Bismarck, North Dakota. With components over 130 years old, the in-place structure is approaching the end of its useful service life. The structure has a history of exposure to ice jams and its substructure configuration renders it potentially susceptible to scour events. Although currently stable, the structure has experienced structural issues at both approaches in the past, resulting in unanticipated substructure movements. Since constructing the original bridge in 1882, the east hill slope began to move and resulted in the slope moving the pier west towards the river inches per year. Multiple remediation efforts to correct the pier damage/location and slope movement took place from the early 1800s to the mid 1950s. The intent of the project is to construct a new, independent bridge across the Missouri River upstream of the in-place structure. Operationally, the new structure will carry the mainline track and the current structure will be taken down. The new structure will provide a significant improvement in operational reliability and safety, and will provide enhanced structural redundancy thereby making it less susceptible to damage. As the current structure is 130 years old, it requires substantial inspection and maintenance, which are disruptive to rail service. The new structure will be a single-track bridge but have the capability to carry a second track in the future when and if volumes necessitate that addition.

The BNSF Bismarck Bridge was constructed with similar methods in the same era as the Brooklyn Bridge. It is an iconic landmark that predates official North Dakota statehood by six years. The bridge is eligible for listing in the National Register of Historic Places for its association with broad patterns of railroad, commercial and military history of the United States. Because of these attributes, certain interest groups have expressed a desire to preserve the existing bridge.

The federal bridge statutes, including the River and Harbors Act of 1899, as amended, the Act of March 23, 1906, as amended, and the General Bridge Act of 1946 (33 U.S.C. 525 *et seq.*), require that the location and plans of bridges in or over navigable waters of the United States be approved by the Secretary of Homeland Security, who has delegated that responsibility to the Coast Guard. The Missouri River is a navigable water of the United States as defined in 33
