SUPPLEMENTARY INFORMATION:

I. Introduction

By letter dated July 17, 2019 (ADAMS Accession No. ML19211C044) and supplemented by letter dated November 14, 2019 (ADAMS Accession No. ML19337A275), SHINE filed with the NRC, pursuant to Section 103 of the Atomic Energy Act and part 50, "Domestic Licensing of Production and Utilization Facilities," of title 10 of the *Code of Federal Regulations* (10 CFR), an application for an operating license for the SHINE Medical Isotope Production Facility to be located in Janesville, Wisconsin (ADAMS Package Accession No. ML19211C143). The November 14, 2019, application supplement (ADAMS Package Accession No. ML19331A832) addressed facility design changes and administrative errors identified in application documents. A notice of receipt and availability of this application was previously published in the **Federal Register** on September 10, 2019 (84 FR 47557).

SHINE has proposed to construct and operate a facility in Janesville, Wisconsin for the production of molybdenum-99 (Mo-99) through the irradiation and processing of a uranyl sulfate solution. As described in the operating license application, the proposed facility would comprise an irradiation facility and radioisotope production facility. The irradiation facility would consist of eight subcritical operating assemblies (or irradiation units), which would each be licensed as a utilization facility, as defined in 10 CFR 50.2, "Definitions," and supporting structures, systems, and components (SSCs) for the irradiation of low enriched uranium. The radioisotope production facility would consist of hot cell structures, licensed collectively as a production facility, as defined in 10
