

prohibited drugs, and the number of employees who tested positive for the misuse of alcohol during the reported year. Small employers commenced their FTA-required testing on January 1, 1996, and began reporting the same information as the large employers beginning March 15, 1997.

The FTA updated the testing rules on August 1, 2001 (66 FR 42002) and maintained a random testing rate for prohibited drugs at 50 percent and the misuse of alcohol at 10 percent, which the Administrator may lower if the violation rates dropped below the thresholds set forth in 49 CFR 665.45 for 2 consecutive years. Accordingly, based on the recent violation rates, in 2007, FTA reduced the random drug testing rate from 50 percent to 25 percent (72 FR 1057, January 7, 2007). In 2018, however, FTA increased the random drug testing rate to 50 percent for calendar year 2019 based on verified industry data for calendar year 2017, which showed the rate had exceeded 1 percent (83 FR 63812, December 12, 2018).

Pursuant to 49 CFR 655.45, the Administrator's decision to increase or decrease the minimum annual percentage rate for random drug and alcohol testing is based, in part, on the reported positive drug and alcohol violation rates for the entire public transportation industry. The information used for this determination is drawn from the drug and alcohol Management Information System (MIS) reports required by 49 CFR 655.72. In determining the reliability of the data, the Administrator considers the quality and completeness of the reported data, or may obtain additional information or reports from employers, and make appropriate modifications in calculating the industry's verified positive results and violation rates.

For calendar year 2020, the Administrator has determined the random drug testing rate for covered employees will remain at 50 percent based on a verified positive rate of 1.17 percent for calendar year 2018. Further, the Administrator has determined the random alcohol testing rate for calendar year 2020 will remain at 10 percent because the violation rate again was lower than 0.5 percent for calendar years 2016 and 2017. The random alcohol violation rates were 0.148 percent for 2016 and 0.160 for 2017.
