

security concerns and international obligations. Application information includes: Corporate information; launch segment information; space segment information; ground segment information; plans and/or pricing policy for providing access to or distributing the unenhanced data generated by the system; and the plan for post-mission disposition of any Remote Sensing satellites.

Once an applicant holds a license, he/she is subject to amendment filings and notification requirements concerning an executive summary of the licensed system, foreign agreements, deviation in orbits, planned disposition of the spacecraft, data protection plans, preliminary design reviews, critical design reviews, certification of launch contract and pre-ship review of the satellite; and notification of system demise or decision to discontinue operations. The licensee is required to provide NOAA an executive summary that can be provided to the public within 30 days of obtaining a NOAA license.

Monitoring and compliance information is used to ascertain that the licensee's activities meet the requirements of the Act, applicable regulations, and license conditions. The following information collections serve as part of the monitoring and compliance function: Annual compliance audits; data collection restriction plans; operation plans for restricting collection and dissemination of imaging Israeli territory; data flow diagrams; satellite sub-system diagrams and imaging system specification sheets; operational declarations; quarterly reports; purge notifications; and annual operational audits.

NOAA notes the differences between this revision and the previous extension of this collection of information. First, although it appears that there are new collections of information (specifically, the Data Protection Plan, the Data Collection Restrictions Compliance Plan, the Plan for Restricted Operations Over Israel, and the Public Summary), each of these requirements were discussed in the 2017 **Federal Register** Notice and the Supporting Statement. These requirements are not new; they appear to have been inadvertently omitted from the list of information collections in the 2017 extension. This revision corrects that error.

Second, several information collections have been removed. The Data Flow Diagram has been removed as it is now part of the Data Protection Plan. The Satellite Subsystems Drawings, Submission of Preliminary Design Review, Submission of Critical

Design Review, and Notification of Binding Launch Service Contract are no longer required because after NOAA's review of certain material information over the last 20 years, NOAA determined that these documents are no longer relevant to the license determination process. The Notification of Any Operational Deviation is now part of the Quarterly Audit. Finally, the Annual Operational Audit is now part of the Annual Compliance Audit.

Affected Public: Business or other for-profit organizations (primary); non-profit organizations (secondary).

Frequency: Quarterly, annually and on occasion.

Respondent's Obligation: Mandatory.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.
