

(c) There are currently no replacement 3M PAPRs that meet the MSHA standard for permissibility.

(d) The Versaflo™ TR-800 Intrinsically Safe PAPR qualifies as intrinsically safe in the US, Canada, and countries that accept the International Electrotechnical Commissions System for Certification to Standards Relating to Equipment for Use in Explosive Atmosphere (IECEX). It is not MSHA-approved and 3M is not currently pursuing approval.

The petitioner proposes the following alternative method:

(1) The operator is petitioning to use the Versaflo™ TR-800 Intrinsically Safe PAPR in return airways.

(2) The equipment will be examined at least weekly by a qualified person according to 30 CFR 75.512-2 and examination results will be recorded weekly and may be expunged after one year.

(3) The operator will comply with 30 CFR 75.323.

(4) A qualified person under 30 CFR 75.151 will monitor for methane as is required in the mine.

(5) Qualified miners will receive training regarding the information in the Decision and Order before using equipment in the relevant part of the mine. A record of the training will be kept and available upon request.

(6) Within 60 days of the Decision and Order becoming finalized, the operator will submit proposed revisions to 30 CFR 75.370, mine ventilation, to be approved under the 30 CFR part 48 training plan by the Coal Mine Safety and Health District Manager. The revisions will specify initial and refresher training and when the revisions are conducted, the MSHA Certificate of Training (Form 5000-23) will be completed. Comments will be made on the certificate to note non-permissible testing equipment training.

(7) The operator is responsible for all people, including contractors, using the above equipment. The petitioner asserts that the alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Docket Number: M-2019-069-C.

Petitioner: Peabody Twentymile Mining, LLC, 29515 Route County Road #27, Oak Creek, CO 80467.

Mine: Foidel Creek Mine, MSHA I.D. No. 05-03836, located in Routt County, CO.

Regulation Affected: 30 CFR 75.1002(a) (Installation of electric equipment and conductors; permissibility).

Modification Request: The petitioner requests a modification of the existing

standard, 30 CFR 75.1002(a), as it relates to the use of an alternative method of respirable dust protection at the Francisco Underground Pit mine. The operator is petitioning to use a battery powered respirable protection unit called a Versaflo™ TR-800 Intrinsically Safe Powered Air Purifying Respirator (PAPR) within 150 feet of pillar workings and longwall faces.

The petitioner states that:

(a) Peabody currently uses the 3M Airstream helmet to provide miners with respirable protection against coal mine dust, a protection with long-term health benefits.

(b) 3M is discontinuing the Airstream helmet by June 1, 2020 due to disruption in their component supply but it will offer the Versaflo™ TR-800 Intrinsically Safe Powered Air Purifying Respirator (PAPR). February 2020 will be the last opportunity to order the Airstream components.

(c) There are currently no replacement 3M PAPRs that meet the MSHA standard for permissibility.

(d) The Versaflo™ TR-800 Intrinsically Safe PAPR qualifies as intrinsically safe in the US, Canada, and countries that accept the International Electrotechnical Commissions System for Certification to Standards Relating to Equipment for Use in Explosive Atmosphere (IECEX). It is not MSHA-approved and 3M is not currently pursuing approval.

SUPPLEMENTARY INFORMATION:

I. *Background:* The Wage and Hour Division (WHD) of the Department of Labor (DOL) administers the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), 29 U.S.C. 1801 *et seq.* The MSPA protects migrant and seasonal agricultural workers by establishing employment standards related to wages, housing, transportation, disclosures, and recordkeeping. The MSPA also requires farm labor contractors and farm labor contractor employees to register with the U.S. Department of Labor and to obtain special authorization before housing, transporting, or driving covered workers. The MSPA requires that any person owning or controlling any facility or real property to be used for housing migrant agricultural workers shall not permit such housing to be occupied by any worker unless copy of a certificate of occupancy from the state,

local, or federal agency that conducted the housing safety and health inspection is posted at the site of the facility or real property. The certificate attests that the facility or real property meets applicable safety and health standards. Form WH-520 is an information gathering form and the certificate of occupancy that the Wage and Hour Division issues when it is the federal agency conducting the safety and health inspection.

II. *Review Focus:* The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

III. *Current Actions:* The DOL seeks an approval for the extension of this information collection that requires any person owning or controlling any facility or real property to be occupied by migrant agricultural workers to obtain a certificate of occupancy.
