SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-88008; File No. SR-BatsBZX-2017-34]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Order Setting Aside Action by Delegated Authority and Approving a Proposed Rule Change, as Modified by Amendments No. 1 and 2, To Introduce Cboe Market Close, a Closing Match Process for Non-BZX Listed Securities Under New Exchange Rule 11.28

January 21, 2020.

I. Introduction

The official closing price for a listed security is generally determined each day through a closing auction conducted by that security's primary listing exchange. A closing auction is a point in time event conducted at the end of each trading day pursuant to a process set forth in the primary listing exchange's rules¹ that determines a security's official closing price by executing all orders participating in the auction at a single price. Closing auctions are designed to set closing prices that maximize the number of shares executed and minimize the amount of the imbalance between orders to buy a security and orders to sell a security. Market participants seeking to execute orders at a security's official closing price may do so by submitting a variety of order types to a closing auction, such as:

- Market-on-close ("MOC") orders, which are orders to either buy or sell a security that are specifically designated to be executed at a security's official closing price;

¹ See, e.g., NYSE Rule 123C; and Nasdaq Rule 4754.
