Endangered and Threatened Wildlife and Plants; Initiation of 5-Year Status Reviews of 66 Species in California and Nevada

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of initiation of reviews; request for information.

SUMMARY: We, the U.S. Fish and Wildlife Service, are initiating 5-year status reviews of 66 species in California and Nevada under the Endangered Species Act. A 5-year review is based on the best scientific and commercial data available at the

time of the review; therefore, we are requesting submission of any new information on these species that has become available since the last review.

DATES: To ensure consideration in our reviews, we are requesting submission of new information no later than March 27, 2020. However, we will continue to accept new information about any species at any time.

ADDRESSES: For how and where to submit information or questions, see Request for New Information.

FOR FURTHER INFORMATION CONTACT: For general questions, please contact Peter Erickson, 916-414-6741. For whom to contact with species-specific information or questions, see Request for New Information.

Individuals who are hearing impaired or speech impaired may call the Federal Relay Service at 800-877-8337 for TTY assistance.

SUPPLEMENTARY INFORMATION:

Why do we conduct 5-year reviews?

Under the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*), we maintain lists of endangered and threatened wildlife and plant species (referred to as the List) in the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for wildlife) and 17.12 (for plants). Section 4(c)(2)(A) of the Act requires us to review each listed species' status at least once every 5 years. For additional information about 5-year reviews, refer to our factsheet at <http://www.fws.gov/endangered/what-we-do/recovery-overview.html>.

What information do we consider in our review?

A 5-year review considers all new information available at the time of the review. In conducting these reviews, we consider the best scientific and commercial data that have become available since the listing determination or most recent status review, such as:

(A) Species biology, including but not limited to population trends, distribution, abundance, demographics, and genetics;

(B) Habitat conditions, including but not limited to amount, distribution, and suitability;

(C) Conservation measures that have been implemented to benefit the species;

(D) Threat status and trends in relation to the five listing factors (as defined in section 4(a)(1) of the Act); and

(E) Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Any new information will be considered during the 5-year review and will also be useful in evaluating the ongoing recovery programs for the species.

Habitat Conservation Plans for the Mount Hermon June Beetle, Zayante Band-Winged Grasshopper, and Ben Lomond Spineflower; Categorical Exclusion for the Renovation of the Santa Cruz County Juvenile Hall and the Verizon Wireless Expansion Project; Santa Cruz County, California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have received two applications for an incidental take permit (ITP), one for the federally endangered Mount Hermon June beetle and one for the federally endangered Mount Hermon June beetle and Zayante band-winged grasshopper, under the Endangered Species Act of 1973, as amended. The County of Santa Cruz submitted a permit application that, if issued, would authorize take of the
