

Search and Rescue

Several comments expressed concerns about the Coast Guard's ability to conduct effective search-and-rescue (SAR) operations within a wind farm. The Coast Guard has had similar concerns and believe we have addresses these in Section III.J. of the draft report. Ultimately, the Coast Guard recommends that if the MA/RI WEA turbine layout is developed along a standard and uniform grid pattern with at least three lines of orientation and standard spacing that this will help minimize the risk to SAR operations within the MA/RI WEA.

Review Report on an Allision Between a Vessel and Wind Turbine

Some commenters urged the Coast Guard to review a report on an allision between a vessel navigating within a European wind farm and an unlit wind turbine. We did review the report and address it in Section III.H.6. of the draft report. In March 2019, *marineinsight.com* reported about a 2012 incident. An accident investigation was conducted by the United Kingdom's Maritime and Coast Guard Agency (MCA) Marine Accident Investigation Board (MAIB). The MCA found the vessel's master at fault due to several contributing factors: Operating in 30 knot winds, in heavy seas, driving rain, at night, with excessive speed, and all without a proper lookout.

Radar Interference

Some commenters expressed their concerns about possible radar interference while transiting within the WEA. We address these comments in Section III.H.6. of the draft report where we discuss our review of several studies that address correlations between wind turbines and marine radar interference. To date, the USCG is not aware of an authoritative scientific study that confirms or refutes the concern that WTs will degrade marine radar.

Wildlife Conservation and Protection of Right Whales

The Coast Guard received a comment requesting we consider vessel speeds in our evaluation of potential navigation routes, as cavitation and noise there from may adversely impact right whales. The Coast Guard will continue to consult with the National Oceanic and Atmospheric Administration, interagency partners and other stakeholders through the National Environmental Policy Act (NEPA) and marine planning processes as a necessary part of any action to formally establish routing measures associated

with this or any other wind farm proposal.

IV. Information Requested

Do you agree or disagree with the draft report's recommendations, and if so, why?

V. Public Participation and Request for Comments

We encourage you to comment on the content and development of the report.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A. The **Federal Register** notice for the 60 days was published October 31, 2019 at 84 FR 58408.

A. Overview of Information Collection

Title of Information Collection: Mortgage Insurance Termination

Application for Premium Refund or Distributive Share Payment.
OMB Approval Number: OMB-2502-0414.

Type of Request: Revision of a currently approved collection.
Form Number: Application for Premium Refund or Distributive Share Form HUD-27050-B.

Description of the need for the information and proposed use: Mortgage Insurance Termination is used by servicing mortgagees to comply with HUD requirements for reporting termination of FHA mortgage insurance. This information is used whenever FHA mortgage insurance is terminated and

no claim for insurance benefits will be filed. This information is submitted on via the internet or EDI and is used to directly pay eligible homeowners. This condition occurs when the form passes the criteria of certain system edits.

As the result, the system generates a disbursement to the eligible homeowner for the refund consisting of the unused portion of the paid premium. The collection information required is used to update HUD's Single-Family Insurance System. The billing of mortgage insurance premiums is discontinued as a result of the transaction. Without this information

the premium collection/monitoring function would be severely impeded and program data would be unreliable. Under streamline III when the form is processed and but does not pass the series of edits the system generates in these cases the Application for Premium Refund or Distributive Share Payment to the homeowner to be completed and returned to HUD for further processing for the refund. In general, a Premium Refund is the difference between the amount of prepaid premium and the amount of the premium that has been earned by HUD up to the time the mortgage is terminated.

Information collection	Number of respondents	Frequency of response	Total annual responses	Hours per response	Total annual hours
Mortgage Insurance Termination—HUD-27050-A	6,000	Varies	675,000	.08	54,000
Application for Premium Refund or Distributive Share—HUD-27050-B	20,000	1	20,000	.25	5,000

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

- (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) The accuracy of the agency's estimate of the burden of the proposed collection of information;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.
